Student grades, honors programs before Senate

Student grades and honors programs will be among the topics under consideration when the University Faculty Senate meets at 2:10 p.m. on Thursday, Sept. 8, in Room 112 Kern Bldg.

Following consideration of the grade inflation problem, the Subcommittee on Grading of the Senate Committee on Undergraduate Instruction will recommend a change of wording in the current Senate policy on student grades, as it appears in the Student Handbook.

Policy 47-20 currently states that: "Grades shall be assigned to individual students solely on the basis of the instructor's judgment as to a student's scholastic achievement as set forth in Policy 47-60." Under the proposed legislation, the policy would be amended as follows: "The college and department faculties are responsible for establishing and monitoring academic standards for courses offered in their academic units; the application of these standards to the achievement of individual students, and therefore the assignment of grades, is the sole responsibility of the course instructor."

The subcommittee will also propose several wording changes to current Senate policies dealing with University withdrawal and course drop procedures. Those changes are designed to eliminate loopholes that now make it possible for students accused of academic dishonesty to avoid punishment in the grading system.

News in Brief

First fact-finding meeting scheduled

Fact-finder Robert D. Kreitler, of Radnor, Pa., will hold his first meeting with representatives of the University and Teamsters Union Local No. 8 on Thursday, Sept. 8.

Mr. Kreitler was named fact-finder in the dispute between the University and the Union by the Pennsylvania Labor Relations Board last week. The Labor Board action means that the Union may not call a strike during the fact-finding process.

President Oswald had directed University representatives to request fact-finding from the PLRB because of the unprecedented fiscal difficulties and uncertainties facing the University.

The fact-finding procedures can take up to 60 days.

Intramural sign-up to be held Sept. 6-9

Entries will be taken in the Intramural Office at University Park from Tuesday, Sept. 6, until noon on Friday, Sept. 9, for the men's program in touch football and tennis singles. In the women's program, participants may sign up at the same time and place for tennis singles, doubles and coed doubles. Coed flag football registrations will also be taken, but each team roster must include four men and four women. Both faculty and staff are eligible to participate in these programs, and further information is available by calling 865-5401.

(Continued on page 3)

President voices his frustration over Legislature's budget action

President Oswald shared with Penn State graduates his frustrations over legislative action that now places the entire burden of raising taxes "solely, only and totally on one element of the State — higher education."

Speaking at the Summer Term commencement on Aug. 27, Dr. Oswald said he recognized that many of the 1,700 graduates had frustrations of their own, or would face frustrations in the future.

To cope with frustration, he urged the graduates to keep the faith, exercise patience and use their God-given talents and what they had learned at Penn State to keep on top of the events and situations that are frustrating them.

Dr. Oswald said, "I stand before you as frustrated as I have been in my 20 years as a university president, spanning three major public universities."

"I consider it absolutely incredible," he said, "that the Commonwealth could let the foundations of this University — and universities like Pittsburgh and Temple — slip away any more than the state of Ohio could let Ohio State slip away, or the state of Michigan could let the great universities of Michigan or Michigan State slip away."

Dr. Oswald noted that the State Legislature recently settled a \$5 billion budget for the State. Included was \$300 million in increases for branches of State government, for State workers, for school subsidies, for the State-owned colleges, special help for Philadelphia programs, and a host of other programs.

"I don't question the value of any of these programs," he continued. "My total

personal frustration comes from the fact that, to achieve this \$300 million, the Legislature did not come to grips with the revenue problem and taxes.

"Rather, it put this off by taking all of the funds that are normally appropriated for Penn State, Pitt and Temple and used this money to increase the budget for the rest of the State."

"This leaves this University at this point with zero dollars. To operate — and operate we will — we must borrow funds and pay the necessary interest."

Dr. Oswald emphasized that "higher education is as bipartisan as anything that exists in the State. We are neither a Democratic nor a Republican university. We are a University of this State."

Dr. Oswald said a legislator called him last week and said, "Jack, how does it feel to be swinging in the wind?"

"I indicated to him that if anything was twisting in the wind, it was this great University and that would be most troublesome because the very foundations of this great University would then be in jeopardy."

"I cannot believe that reason will not prevail," he added, pledging that he will do everything possible in this situation, and will call on the graduates, the 100,000 Penn State alumni in Pennsylvania, and the people of the State to help to resolve the problem.

In outlining three ways to deal with frustration, Dr. Oswald suggested the graduates "maintain faith and confidence that reason and good sense will prevail."

(Continued on page 3)

Q: What were some of the reasons behind your decision to give up the presidency of Chatham College and come to Penn State, particularly in an era which is bound to be dominated by budgetary problems?

A: There were several reasons. First, no institution, whether public or private, is immune from budgetary problems. Budgetary problems at Penn State are generally no more severe than those of a fairly well endowed private college. In the long term, I think the public university has a better outlook for healthy survival than many of the private colleges and universities.

The second point would be that 17 years in a college presidency is enough punishment for anybody. On the other hand, to be serious, I don't expect to hide from criticism as provost. I've been a provost before in a public university. I realize that you're fair game for anybody and everybody who has a concern about the institution which that person doesn't think is being appreciated or heard.

Third, I think it's important for everybody, if they have the luxury, to try something different and new at various times in life. I admit that going from one institution of higher education to another isn't like jumping from the practice of medicine to running a shipyard in South America, but there is a significant enough difference in terms of the size of Penn State's operation and its problems as well as the location and sources of support — and particularly the scope of the curricular program — to say that this is something, perhaps not new, but substantially different. When you make a change of this character or any comparable change in your career, you find that you are drawing upon resources that you had either neglected or didn't realize that you had. You discover that you're a lot younger than you thought you were becoming. As anybody who has been on leave will attest, just a change in the daily routine is invigorating.

And finally, I'd add one more point, and it's a very strategic one. There's no question about the fact that the

An interview with the new Provost

Dr. Edward D. Eddy

Pennsylvania State University is highly regarded in higher education, that its opportunities are unique, and that the ambience of "Happy Valley" evidently is both intriguing and contagious.

Q: Although you've only been here a short time, and you obviously knew that Penn State would be quite different from Chatham, have you had any surprises?

A: The number of joggers per square foot is substantially larger in State College than in all of Pittsburgh.

Q: Do you have any idea yet of what you hope to accomplish during your first year here?

A: Well, that's difficult to tell until we know what the budgetary restrictions are going to be. Of course, in any case, anyone devotes a first year to finding out what makes the institution tick and learning how other people perceive it — whether in the process there are more ticks than ticks. My first year will be an absorption experience. It would be foolish for anyone in a position which calls for some measure of academic leadership to begin launching "bold new programs" without knowing what the healthy old programs are. My hope is that the Provost's Office will provide some stimulus in the way of asking some of the more fundamental questions about education. I assume that in a good institution of higher learning almost nothing should be taken for granted in regard to what is right and good for the student and for society and that we ought continually to be probing and wondering and speculating.

One of my first aims will be to develop some kind of organization within the office which will free the Provost to think.

Q: You have published a number of articles on student values. Is this a long standing interest of yours?

A: It's been an interest of mine throughout almost all of my professional career. I wrote a book on it, *The College Influence on Student Character*, back in the '50s. It's a fascinating subject, partly because there's nothing static about student values. The emphasis and the direction change almost from year to year and certainly from decade to decade. We're now in the process of a major change. I don't think we know yet what the direction will be, but obviously higher education has been affected

(Continued on page 3)

Faculty Notes

Dr. Joseph H. Britton, professor of human development and chairman of the Gerontology Center of the Institute for the Study of Human Development, has been named acting dean of the College of Human Development, effective Sept. 1.

Dr. Donald H. Ford, who has served as dean since 1967, last fall announced plans for his return to teaching responsibilities to be effective Aug. 31. He will be on leave in 1977-78.

Provost Edward D. Eddy said that Dr. Britton will continue in the interim position until a new dean is appointed and assumes his duties. While the Search Committee seeking a successor to Dean Ford has made progress, Dr. Eddy noted, it became evident that an interim appointment would have to be made to begin service with the opening of the fall term.

A member of the faculty since 1949, Dr. Britton is a graduate of Albion College and obtained his M.A. and Ph.D. degrees, with major work in the field of human development, from the University of Chicago.

Dr. Caroline Eckhardt, associate professor of English and comparative literature, has been named director of the Comparative Literature Program. She succeeds Dr. Arthur O. Lewis, professor of English, who continues his duties as associate dean of the College of the Liberal Arts.

Dr. Eckhardt has a B.A. from Drew University. Her M.A. was granted by Indiana University where she concentrated on the literature of the Renaissance, and her Ph.D. by the University of Michigan, where she specialized in the literature of the European Middle Ages. Her recent research has dealt with the late-medieval uses of the Arthurian legend for political ends, and she is currently editing a 15th century *Prophecia Merlini* text.

Dr. Edward H. Kleavans, professor of nuclear engineering, will receive the 1977 Glenn Murphy Award of the American Society for Engineering Education's Nuclear Engineering Division. The award is given annually to a distinguished engineering educator in recognition of notable professional contributions to the teaching of nuclear engineering. Dr. Kleavans was lauded for initiating new and original courses at Penn State in the theory of plasma and fusion devices; for assisting in the development of a new nuclear engineering undergraduate theory sequence; for initiating a course on nuclear energy for nonengineers; for distinguishing himself as an educator through the accomplishments of his students, and for his numerous publications in refereed journals.

Dr. Gladys I. Ritchie, associate professor of speech communication, is serving as interim associate dean of academic instruction for the Commonwealth Campuses. Dr. Ritchie assumed this position Aug. 15, replacing Dean Joseph F. Douglas, who wished to resume teaching duties and special programming responsibilities at the Capitol Campus.

Dr. Margaret Newman has been named professor-in-charge of the graduate program in nursing in the Department of Nursing, College of Human Development, effective Sept. 1. She was previously an associate professor in the Division of Nursing at New York University. Dr. Newman has a B.S. in nursing from the University of Tennessee, Memphis; an M.S. from the University of California, San Francisco; and a Ph.D. from New York University. She is a fellow of the American Academy of Nursing.

Dr. Thomas J. Jech, professor of mathematics, recently returned from a month-long exchange visit to the Hungarian Academy of Sciences in Budapest. During his visit, sponsored by the U.S. National Academy of Sciences, he conferred with Hungarian specialists in set theory and mathematical logic and lectured on his work in that field. He also was the invited speaker at the Logic Colloquium of the 1977 European summer meeting of the Association for Symbolic Logic (ASL) in Wrocław, Poland. The meeting was organized by the Polish Academy of Sciences in collaboration with ASL and the International Union for the History and Philosophy of Science.

Dr. William W. Reynolds, assistant professor of biology, Wilkes-Barre, presented a seminar, "Temperature as a Proximate and Ultimate Factor in the Orientation Behavior of Fishes," at a NATO-sponsored Advanced Study Institute on Sensory Ecology in Lennoxville, Quebec, July 10-22. He was also co-author of the paper, "Thermoregulation and Fever in Ectotherms," presented by Martha E. Casterlin, at a laboratory technician at Wilkes-Barre, at the XXVth International Congress of Physiological Sciences in Paris, July 18-23. Nearly 50 papers have been published or are now in press resulting from research at the Wilkes-Barre Campus biology laboratory.

Dr. Thomas A. Hale, assistant professor of French and comparative literature, is co-editor of *The Teaching of African Literature*, the first book ever devoted exclusively to that subject. He collaborated with Dr. Richard K. Priebe, assistant professor of English at the Virginia Commonwealth University, on the book, which is a collection of 19 papers prepared by members of the African Literature Association.

Dr. Hale is also the author of an article, "Audio-Visual Approaches to the Birth of Black Literature of French Expression," included in the book.

In their introduction, Dr. Hale and Dr. Priebe explain that, while more than 100 U.S. colleges and universities now offer courses in African literature, the special problems of African literature teachers have been largely ignored in the past.

The essays in the volume cover topics ranging from the teaching of African literature in urban universities to the destruction of stereotypes about African cultures. The book was published by the Journals Department of the University of Texas Press.

Two professors of industrial engineering, **Benjamin W. Nibel**, head of the Department of Industrial and Management Systems Engineering, and **Dr. Inyong Ham**, presented a two-day invited seminar on "Techniques for Improving Productivity" in Monterrey, Mexico, last month. The seminar was sponsored by the Monterrey Chapter of the American Institute of Industrial Engineers and the Monterrey Institute of Technology's Department of Industrial Engineering.

Obituary

David B. Pugh, who retired from the University in 1951 as a supervisor in Continuing Education, died Aug. 16 at the age of 86. Starting out at Penn State in 1923, he was an instructor in education and psychology in Extension. In 1934, he was named supervisor of the Undergraduate Centers and was responsible for the organizing of centers in Hazleton, Pottsville, DuBois and Altoona. He also served as director of arts and science extension. From 1948 until his retirement, he was in charge of the Division of Instruction in Central Extension. He was a graduate of Lebanon Valley College and held an A.M. from the University of Pittsburgh.

Ellen Garber

Ellen K. Garber, assistant Extension director in the Southeast Extension Region, retired Sept. 1, following 29 years of service. She has supervised Extension programs, in Philadelphia, Delaware, Chester, Montgomery, Bucks, Lehigh and Northampton counties since 1973. Before that, she served as assistant State home economics leader in this same area and five other counties for ten years.

A native of Mt. Joy, she received her B.S. in home economics education from Penn State and her M.S. in Extension administration from the University of Wisconsin.

As assistant director of the Southeast Extension Region, Miss Garber supervised 60 professional and 70 paraprofessional staff who conducted educational programs for the 4½ million residents of the area. She also helped develop the Philadelphia Urban Garden Program in 1977. Its nine new staff members work with several thousand gardeners and eight demonstration gardens in inner city Philadelphia. The Expanded Nutrition Education Program, conducted by the Cooperative Extension Service, was organized and developed in 1969 in the southeast region under Miss Garber's direction. The program helps persons on a limited income improve their diets and is conducted in all eight counties of the region.

Dr. Randall S. Stout, a professor of economics who specializes in public finance and tax policy, retired July 1 with the rank of professor emeritus of economics.

In the early 1950s, he was a member of the Pennsylvania Governor's Emergency Tax and Revenue Fact-Finding Committee, and ten years ago, he was appointed to a task force of the Pennsylvania Governor's Tax Study Commission concerned with long range tax revenues in the Commonwealth. He was also a consultant to the Pennsylvania Committee on Government Reorganization, and from 1945 to 1947, was a tax research consultant to the Pennsylvania Joint State Government Commission.

Dr. Stout is the author of, or a major contributor to, four books: *The Consumer Finance Industry in Pennsylvania*, *The Tax Problem in Pennsylvania*, *State and Local Taxation*, and *Taxation of Cooperatives in Pennsylvania*.

Before coming to Penn State in 1941, he taught at Central College in Iowa and was an accountant for the Jewel Tea Company. He earned an A.B. in economic history from Illinois College in 1935 and an M.B.A. in public finance from Northwestern University in 1937. His Ph.D., also in public finance, was conferred by the University of Pittsburgh in 1945.

Randall Stout

Jack Zubrod

Jack C. Zubrod, associate director for academic affairs at the Altoona Campus, retired June 20 after completing 32 years of service to the University.

Mr. Zubrod joined the DuBois Campus in 1946, following World War II, and transferred to Altoona in 1951 as an assistant professor of biological science. He was promoted to dean of faculty in 1955, a title which was subsequently changed to assistant director for resident instruction.

Following a year as interim director in 1974-75, Mr. Zubrod was promoted to the newly created position of associate director for academic affairs. During his 27 years at Altoona, he was instrumental in creating the faculty senate. He served as a member of the University Senate, chairing its task force on academic advising, and was chairman of the Altoona Campus task force to develop the "Five Year Plan."

A native of Johnstown, Mr. Zubrod earned his bachelor's and master's degrees from the University of Pittsburgh.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Second-class postage paid at State College, Pa. 16801

President

(Continued from page 1)

Reach back to those strengths of which you are made, your values, your reliance on your religious faith, and your confidence in those things that sustain you."

Second, Dr. Oswald suggested the graduates must have patience.

Finally, Dr. Oswald emphasized to the graduates that "most important in dealing with frustration is to use your God-given talents and what you have learned here at Penn State to get on top of the events and situations that are frustrating you."

"For my part," he said, "I shall do everything possible and leave no stone unturned."

Senate

(Continued from page 1)

In other action, Senate will consider revisions to its policy on the structuring of honors programs, proposed by the Subcommittee on Honors Programs of the Senate Committee on Undergraduate Instruction. According to the subcommittee, the revisions are an attempt to achieve greater flexibility, since many departments do not have the resources to offer honors programs under existing Senate policy.

Currently, students in honors programs must complete at least 12 credits in authorized honors program course work, with no fewer than six of those credits earned in courses designed specifically for, and open only to, honors program students. The proposed legislation would allow students to complete the six credits either through courses open only to honors program students or through extra course work, approved for the purpose, in their major areas of study.

The subcommittee will also request that a University Task Force on Programs for Academically Superior Students be appointed to review the question of academic excellence in undergraduate education.

Senate will be asked to approve an appointment to the standing Joint Committee on Tenure and to amend the procedure for filling vacancies on that committee.

In addition, Senate will hear an information report on the indirect costs of research from the Committee on Research. The Subcommittee on Athletic Standards of the Committee on Academic and Athletic Standards will also present an informational report.

Chairmen of several standing committees will respond to the report of an evaluation team representing the Commission on Higher Education of the Middle States Association, prepared after the team visited Penn State last year.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed although names will be withheld on request.

Q: I understand AudioVisual Services has moved to the boondocks, leaving only a ghost of its former office in Willard Bldg. While it's true that the branch office will still handle most requests for films, etc., what we'll lose is same-day or prompt service. What happens when there's a mistake and a film that should be in a classroom in Willard is at AV's main office out PostTrest? Why has such a vital service been decentralized?

A: In planning the move of selected functions of Audio Visual Services to the Special Services Bldg., much careful thought was given not only to maintaining but also to improving service to the faculty. Virtually all of the functions involved in direct instructional support at University Park remain at Willard Bldg. These include all equipment and operator scheduling, pick up of both films and equipment, and the previewing of films.

The functions moved to Special Services are concerned primarily with service to other locations, both within the University and to film users at other colleges and schools.

The additional space at the new location is intended to enable important new activities to be added which could not be done because of lack of space in Willard. Chief among these, and most immediate, is the development of a reference center on film and tape materials which will be available to faculty. This center will provide faculty with a far greater opportunity to become familiar with potential solutions to instructional problems.

Mistakes will happen. A film that should be in Willard will occasionally be in Special Services. It isn't possible to handle in excess of 50,000 transactions a year and not make an occasional mistake. However, it is our intention that any inconvenience caused by such a mistake will be ours at AVS, not the faculty's. We intend to continue to honor every reasonable request of the faculty with the same level of service that everyone has come to expect.

All members of the faculty are urged to visit the new Audio Visual Services offices. In addition, the staff welcomes any opportunity to work more closely with individual faculty members or with departments in responding to existing problems or in anticipating future problems.

Robert Allen, director
Audio Visual Services

News in brief

(Continued from page 1)

Salary increases to go into effect before Nov. 1

Faculty and staff members who were notified of salary increases earlier this summer will receive them at the end of October. Increases are retroactive to July 1, and the retroactive portion will be paid in a separate check before Nov. 1.

The passage of the State budget implementing salary raises for State employees influenced Penn State's action, according to Provost Edward D. Eddy, who noted: "This is one way available to the University to be certain that the loyalty and competence of our faculty and staff are recognized, and to avoid further personal penalty as a result of the budgetary situation."

Because of the fiscal uncertainties facing Penn State, a second round of permanent budget cuts for all academic and administrative divisions, amounting to more than \$1.3 million, was implemented on Aug. 16. An earlier round of budget cuts totaling \$2.5 million was made effective July 1.

Choir auditions open

Auditions for the University Choirs will be held from 9 a.m. to 4 p.m. on Thursday and Friday, Sept. 1 and 2, and from 9 a.m. to noon on Saturday, Sept. 3, in Room 112 Music Bldg. and Room 212 Eisenhower Chapel. Choir membership is open to all students, staff, faculty and alumni as well as to their spouses.

The Choirs have been invited to sing with the Pittsburgh Symphony Orchestra under Andre Previn, Pittsburgh's music director, and again under Michael Tilson Thomas, who is currently music director of the Buffalo Philharmonic. With Previn, they will present three performances in Pittsburgh during February of Sir William Walton's *Belshazzar's Feast*. With Thomas, they will appear in two performances of Mahler's Second Symphony on Feb. 3 and 4 at University Park.

CIA informs University of past research links

The Central Intelligence Agency has informed Penn State in a letter that the University was among 80 public and private institutions which the CIA says were used for some of its secret experiments in the 1950s and 1960s.

In a statement, the Office of Public Information and Relations noted that, in some cases, individual researchers and institutions "apparently were aware of CIA sponsorship, but in many other cases they were not informed that the research was connected in any way with the CIA."

Penn State officials have requested additional details from the government on the matter."

Berks fund drive nets Campus \$15,230

More than \$15,000 has been raised as a result of the 1976-77 fund drive for the Berks Campus, according to Campus Director Harold W. Perkins.

The contributions, which will be used exclusively for Berks' projects, totaled \$15,230 and came from 333 individual donors.

This year's Berks Campus fund was partially used for the children's theatre program of Berks Summer Theatre. All children in Berks and surrounding counties were invited to participate free of charge in special children's theatre presentations and workshops which were held two days each week throughout the summer.

Funds also went toward the purchase of projection screens for audio-visual services, an herbarium for teaching and research use, equipment to outfit a photo lab for campus and camera club use, and a motorized service cart for the 130-acre campus.

In addition, funds went toward the completion of a picnic pavilion and to purchase additional masterpiece art reproductions, which are available on a one-month loan basis to anyone in the Berks County area.

Ambulatory Care Center to open at Hershey

Ribbon-cutting ceremonies for Hershey's new Ambulatory Care Center are being held today (Sept. 1). Participants include President Oswald; William K. Ulerich, president of the Board of Trustees; and Dr. Harry Prystowsky, Hershey's provost and dean.

The 43,200-square-foot addition to the Medical Center hospital houses patient care areas for the Department of Family and Community Medicine; faculty offices and outpatient care areas for internal medicine; examination and treatment rooms for outpatient pediatrics; additional outpatient care areas in radiology, ophthalmology and orthopaedic surgery; two new operating rooms and centralized intensive and coronary care units.

All aboard

The London Bus will be touring University Park on Mondays and Fridays through Nov. 11, leaving the HUB at 2:30 p.m. On the Saturday mornings of home football games, the bus will make two runs, leaving at 10 and 11 a.m. from the foot of the Mall. Tickets (at 25 cents apiece) will be sold on the bus.

Provost interview

(Continued from page 1)

profoundly by the emphasis on careers rather than on the fulfillment of less materialistic life goals. The student is more concerned now with what he or she will do to sustain a comfortable existence rather than how he or she will do it. It's almost as though the students are taking for granted a set of priorities rather than reordering priorities out of their own convictions.

The great period of reordering, of course, came at the end of the '60s, and the period of greatest acceptance per se in our lifetimes was in the '30s.

One of my principal concerns has been how higher education can best contribute to challenging the student to establish his or her own system of values rather than merely to inherit a system or to adopt one without much questioning. I don't think that we do a very good job in colleges and universities of asking fundamental questions. We transmit pieces of knowledge but we don't really expect the student to add up all the pieces and make sense in terms of the individual person.

Q: Did you institute any programs at Chatham to try to deal with these problems?

A: I did, but they were caught up, as so many things were, in the period of student rebellion. Really, in that period, all of us, faculty and staff alike, retreated from the students. We didn't know how to deal with them, and it

was easier to go home and read books or work in the laboratory, so we sort of crossed them out of our existence. We've suffered from that. As a result, we now have a generation of students who are really seeking for something, and we're not prepared to help them as fully as we should be.

Q: Is Penn State today, in your view, meeting special needs not met by other institutions in this State. If so, what are they?

A: It does in a number of ways. One of these, of course, is in terms of curricular offerings such as the comprehensive program in Agriculture which is not available elsewhere. It does so in the unique approach taken by areas to the discipline or the field of study. I'd cite Human Development as an example of that. It does so in the three-pronged, interdependent combination of instruction, research, and service. And it does so by the opportunity it offers students to gain an education of genuine quality at a reachable price. Our big problem in the next decade is to keep opportunity and quality in balance and to be certain that we continue to keep the price reachable.

Q: Do you agree with the claim of the State Department of Education that there is unnecessary duplication among higher education programs in Pennsylvania and that some effort should be made to eliminate "redundant" curricula?

A: I don't think it's easy to play God. I think that there are many risks involved. I would rather trust to the marketplace, in effect. I doubt that students will continue to choose institutions whose programs duplicate those at other institutions but are shoddy in quality and careless in approach.

We're in the middle of the age of the student consumer. I suspect that we will have as a result of this an increase in the paraphernalia of consumerism, the guides to programs — "Ten Easy Ways to Find the Institution of Your Choice."

But basically the real revolution is taking place in the freedom to transfer. Very few students go to college these days with a commitment to stay in one place for four years. They go with the idea that they'll try it out for one year. If they like it, they will go back for another year. But they don't have the kind of pre-freshman commitment that used to keep students on the campus without interruption for four years. They also have discovered that many colleges and universities are hungry for transfers. All of this is mostly to say that the student is in the position to do the cutting, and to eliminate the programs. I'd hate to see either a state agency or a voluntary group from higher education make decisions.

Q: Is there anything you would like to say to the faculty?

A: Ask them to remember that even provosts are human.

Copyright Act revision may require action by some faculty before Jan. 1

Congress has enacted a general revision of the Copyright Act, which, for most purposes, will become effective Jan. 1, 1978. During the fall term, the University Copyrights Committee will study the ramifications of the new law and a revised Policy will be developed. The notice below is "timely," i.e., action before a deadline may be needed in certain cases. Dr. Robert F. Custard, University patent counsel, has recently pointed out two instances in which authors may have options available only until Jan. 1, 1978. University authors currently involved with the creation and/or publication of copyrightable works should consider the two provisions set forth below and discuss any problems related to these provisions with their publisher since any related actions must be taken before Jan. 1, 1978.

Copyright term for unpublished works

Under the new Act, the term of protection for works first created on or after 1/1/78 is the life of the author plus 50 years. The term of protection for previously created works in which statutory copyright existed as of 1/1/78 is an original term of 28 years plus a renewal term of 47 years, or a total of 75 years from the date statutory copyright was first secured. As to 19 works, the renewal structure remains in effect, and is altered only by the addition of 19 years to the renewal term. A third category of works—those works created before 1/1/78 but protected by common-law copyright until 1/1/78. On this date all common-law copyrights will be preempted, and these works then will be protected by statutory copyright. The term of statutory protection for these works is life of the author plus 50 years, but whether or not the author has been dead for more than 50 years, the term of protection will continue until 12/31/2002, or if the work is published before 12/31/2002, until 12/31/2027.

For unpublished works which are presently protected by common-law copyright, the author (or his successor in interest) has a choice as to which copyright term will be applicable. If the work retains its common-law copyright status until 1/1/78, then the life plus 50-year term with the above minimums will be applicable. If between now and 1/1/78 a statutory copyright is obtained for the work, then the work will be protected for a total of 75 years from the date the statutory copyright is obtained.

Which term will prove longer and/or advantageous to the copyright owner will depend upon the authors' vital statistics. If the authors are already dead, then the 75 years from the date when statutory copyright is obtained will be the longer term. If the authors are living, and they are likely to die within the next 25 years, then it will probably be advantageous to select the term of 75 years from the date of statutory copyright; however, if life expectancy exceeds 25 years, preserving the common-law copyright status until 1/1/78 should be selected. If, after considering the above alternatives, it is concluded that the 75-year term is preferable, then in order to obtain this term, it is necessary to obtain a statutory copyright in the work prior to 1/1/78.

Termination of transfers in unpublished works previously the subject of an assignment or license

The new Act provides that under certain circumstances the authors (or their surviving spouses and/or children) may terminate transfers of copyright. In the situation where an assignment or license of renewal rights in a work has been executed prior to 1/1/78, and the work is presently protected by common-law copyright, one factor related to termination rights must be resolved prior to 1/1/78. If the assignment or license was executed before 1/1/78, and statutory copyright in the work has been obtained prior to 1/1/78, then the termination provisions of the new Act will be applicable. This means that for the additional 19-year period that has been added to the renewal term of copyright, the authors (and surviving spouses and/or children) may terminate any grant of renewal rights which they previously executed. But if a statutory copyright is not obtained prior to 1/1/78, then these termination rights will not be available. The new Act applies only to grants related to works in which a statutory copyright existed on 1/1/78.

Whether or not termination rights will be available with respect to a previously executed grant of renewal rights in a work presently protected by common-law copyright will depend upon what action is taken between now and 1/1/78. It may be in the interest of the grantor to obtain statutory copyright before 1/1/78, and it will be in the interest of the grantee to preserve the common-law copyright status of the work until 1/1/78. Who has the right to obtain statutory copyright prior to 1/1/78, the grantor, the grantee, or both, may depend upon the terms of the grant which has been previously executed.

University authors can obtain additional information from Dr. Custard at 865-1765.

Creation: *Life Force*, a sculpture by John Forham, has been presented to the University by Carburetorium Company. It is on display at the Materials Research Laboratory.

WPSX Highlights

The experiences of two aging women are captured on *Something Personal* Sunday, Sept. 4, at 7:30 p.m. In "Yudie," the first of two film portraits, an elderly New York resident tells about her early life, a divorce, and of living alone in the city. A 70-year-old retired music teacher is the subject of the second film, called "Older and Bolder."

Former Penn State president Milton S. Eisenhower is the guest on *Talkabout*, Tuesday, Sept. 6, at 7:30 p.m. Dr. Eisenhower discusses education in American and how it has changed over the years.

With the 1977 college football season underway, *TV Quarterbacks* returns to Channel 3 with coverage of game highlights, scouting reports, and interviews with members of the Nittany Lions' squad. Coach Joe Paterno joins series hosts Fran Fisher and Jim Tarman, live each Wednesday at 7 p.m., beginning Sept. 7.

Pennsylvania's economic future is the subject of the first program of *The Benjamin Franklin Symposium*, premiering Wednesday, Sept. 7 at 10 p.m. The four-part television series is based on a political symposium which was held to help the Pennsylvania General Assembly look ahead at the long-range issues facing the Commonwealth.

The four-year history of the partially completed nuclear power plant at Seabrook, N.H., provides the basis for an analysis of the country's energy problem on *Seabrook — Do We Need It?* Wednesday, Sept. 7, at 10:30 p.m.

Thursday, Sept. 8, at 9 p.m., a 90-minute documentary special, *Inside the Cuckoo's Nest*, compares the realities of treatment at the Oregon State Hospital with scenes from the Academy Award-winning film, *One Flew Over the Cuckoo's Nest*, which was shot on location at the hospital. Included are behind-the-scenes interviews with actors appearing in the feature film and scenes of actual therapy sessions at the institution. Among those appearing in the documentary is Dean Brooks, superintendent of the hospital, who also played the role of Dr. Spivey in the motion picture.

Speech, Hearing services are reaccredited

Penn State's Speech and Hearing Clinic has been granted accreditation for a third five-year period of its speech-language pathology and audiology services by the American Speech and Hearing Association.

Although there are more than 2,500 clinics and centers located throughout the country, less than 300 have been accredited to provide speech and hearing services, according to Dr. Bruce M. Siegenthaler, director of the clinic.

The comprehensive evaluation, which we requested, included a review of our staff, clinical practices and procedures, supervision, professional interrelationships, administration, records and reports, physical facilities and equipment," Dr. Siegenthaler said.

"Following this evaluation, the Professional Services Board granted accreditation."

Dr. Siegenthaler noted that the clinic will be reviewed each year to insure that it continues to meet the stringent national standards of the American Speech and Hearing Association.

The Speech and Hearing Clinic's services include hearing evaluation, consultation for selection of hearing aids, speech pathology diagnostic and therapy services for children and adults, and services to hearing impaired children and adults. The services of the program include otological evaluations as part of the diagnostic procedures.

The accreditation of speech pathology and audiology service programs is one part of the 26,000 member American Speech and Hearing Association's goal of encouraging and maintaining high nationwide standards.

In operation since 1939, the clinic is located in Moore Bldg. Coordinated with the clinical services is an Environmental Acoustics Research Laboratory and academic training programs through the doctorate in speech pathology, audiology and education of the hearing impaired. The clinic, while a part of the University, has a heavy schedule to support its clinical operations. The training programs prepare professional workers, researchers and teachers in the schools. Referrals to the Speech and Hearing Clinic are open to anyone; please call 814-865-5414.

Funding Sources

(282-1) Faculty members may serve for one year as **DOT Research Fellows** under an IPA/DOT sponsored program. Twenty-two problem areas are cited for study, and study locations are almost as numerous. Selection notifications are made about 60 days after a proposal is submitted. (Ref. DOT Announcement)

(282-2) Program descriptions are available for **13 HEW programs** which are newly listed in the Catalog of Domestic Assistance. The programs are new and are newly funded as follows: (13-257) Nursing Research Service Awards; (13-338) Graduate Training in Public Health; (13-586) Bilingual Vocational Instructional Training; (13-587) Bilingual Vocational Instructional Materials, Methods, and Techniques; (13-640) Youth Research and Development; (13-879) Medical Library Assistance; (13-882) Hypertension Program; (13-883) National Health Planning Information Center; (13-884) Grants for Residency Training in General Internal Medicine and General Pediatrics; (13-885) Transfer of U.S. Students in Foreign Medical Schools to U.S. Schools; (13-886) Educational Programs for the Physician's Assistant; (13-887) Medical Facilities Construction Project Grants; and (13-888) Home Health Services Grant Program. (Ref. 1977 CFDA)

(283-1) Some new and/or newly funded **Federal programs** follow. The CFDA program descriptions are available: **Agriculture**: (10-066) Emergency Hay and Cattle Transportation Assistance and Livestock Feed; (10-825) Technical Assistance to Rural Areas; (10-908) Land Inventory and Monitoring. **Commerce**: (11-700) Academy Planning Assistance and (11-701) State Fire Incidence Reporting Assistance. **HUO**: (14-157) Housing for the Elderly and Handicapped and (14-220) Housing Rehabilitation Loans.

Staff Vacancies Calendar

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring prohibition. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 4754-367). Applications for these staff vacancies will be received until 5 p.m. Sept. 8. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

ASSISTANT HEALTH PHYSICIST — Hershey Responsible to the Health Physicist for the daily operation of the Health Physics Laboratory and supervision of a varying number of technicians as well as carrying out an effective Medical Center monitoring program. Master's degree or equivalent in health physics, plus one to two years of directly related experience.

ASSISTANT DIRECTOR OF GRADUATE ADMISSIONS, GRADUATE SCHOOL — University Park Responsible to the Dean of the Graduate School and the Director of Admissions for assistance in the development and administration of the Graduate School admissions system. Bachelor's degree or equivalent, plus one year and up to and including two years of administrative experience.

Tuesday, Sept. 6
Ceramic Science, Tapan Gupta, Westinghouse Research and Development, on "Characteristics of Tetragonal Zirconia Ceramics," 11 a.m., Room 301 Mineral Industries.

Air Pollution Control, Robert J. Heinsohn, PSU, on "Source Sampling for Particulates," 2:20 p.m., Room 140 Fenske.

Thursday, Sept. 8
Metalurgy, Michael A. Hughes, University of Bradford, U.K., on "Interfacial Aspects of Solvent Extraction," 2 p.m., Room 301 Mineral Industries.

Microbiology & Cell Biology, E. V. Galfrey on "In Vitro Studies with Human Mammary Cells," 4 p.m., Room 52 Froar.

Stone Valley's fall schedule

The fall schedule for boat rentals is now in effect at Stone Valley. At the Mineral Industries Camp, canoes, rowboats and Sunfish sailboats may be rented weekdays from 10 a.m. to 6:30 p.m. and on weekends from 10 a.m. to 7:30 p.m. The Boathouse rental facility closed for the season Aug. 14. Stone Valley will remain open to picnicking and fishing, daily from sunrise to dusk.

Penn State Intercom

An Open Letter to the Penn State Community:

As the Fall Term begins, I realize that many of you have questions, anxieties, and perhaps some sense of confusion about the current budgetary impasse at the University in regard to the lack of an appropriation from the State Legislature. If some of you have been out of touch with developments this summer, let me state simply that the Legislature in late August passed a State budget eliminating all support to higher education at Penn State, Pitt, Temple, Lincoln, and the large number of private institutions that receive State grants and used these funds to support other agencies in the State.

Comments I made at the Summer Commencement exercises on August 27 relate to this unprecedented circumstance. I quote a few paragraphs here:

"This morning as I stand before you, I am more frustrated than I have ever been in my professional career spanning three major state universities.

"Most of you are aware of the legislative battle that has occurred in the last several days in the State in the effort to settle on a budget. The Legislature of our State has recently passed a budget providing some 300 million dollars of increases to branches of State Government, increases for State workers, for school subsidies, for the State colleges, special help for Philadelphia programs, and a host of other programs — none of whose value I argue with.

"My total frustration comes from the fact that to secure this 300 million dollars, the Legislature did not come to grips with the revenue problem and taxes. Rather it delayed action on taxes and took all of the funds that are normally appropriated for Penn State, Pitt, and Temple — and appropriated this money to provide for increases to meet the needs of other State responsibilities.

"This leaves Penn State at this point with zero dollars from the Commonwealth. To operate — and operate we will — we must borrow the funds, incurring the necessary interest that goes with borrowing.

"Several State leaders and the Governor gave absolute assurance that as soon as the Legislature returns in late September, consideration of University appropriations and the necessary taxes to support them will be given highest priority. My deep concern is that we have been placed in the situation that the burden for raising taxes, which is difficult at any time, appears now solely, only, and totally to relate to one activity of the State — namely, higher education — and not to total needs of the Commonwealth.

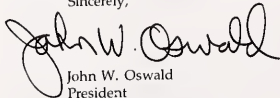

"Higher education is as bipartisan as anything that exists in this State. We are neither a Democratic nor a Republican University; we are a University of all the people of this State. At times during this partisan argument, people from both sides of the aisle urged me to get into the fray. I could not and will not drag this University into a partisan debate."

Frustration need not mean discouragement. Rather, it can challenge us to overcome adversity. We must maintain our faith that reason and good sense will prevail. It is beyond belief that the Commonwealth could let the foundations of this University and universities like Pitt, Temple, and Lincoln slip away any more than the State of Ohio could let Ohio State University slip away, or the State of Michigan let the University of Michigan or Michigan State University slip away. I am certain that good sense will prevail when the Legislature reconvenes to consider our appropriation September 26.

In addition, we must exercise patience and perspective in dealing with frustration. Penn State is a university that has existed for 118 years and has graduated more than 200,000 young people — some 100,000 of whom live and work within Pennsylvania, many of them in positions of key leadership. Penn State must — and will — continue to provide quality education, essential public services, and vital research. The future of our young people, the health of Pennsylvania's economy, and the very life of the Commonwealth demand it.

We will continue this Fall Term to operate under the most stringent economies and with borrowed money. We can take encouragement in knowing that a great many people are working together on behalf of Penn State as we marshal our efforts to emerge from this budgetary crisis with an appropriation adequate for the quality of services we are committed to provide. Together we must do everything possible and leave no stone unturned to see that Penn State continues as a strong University. Each of us, in our own way, can contribute to this strength.

Sincerely,

John W. Oswald
President

This year's student orientation program used an actual balloon, tethered at the Pollock intramural fields near Eisenhower Auditorium, to emphasize its theme, "Getting off (to a good start)."

News in Brief

Performing Arts series announced

Bubbling Brown Sugar, the musical that brought to Broadway all the glitter of the Jazz Age, will open the 1977-78 season of the Artists Series' Performing Arts division at 8:30 p.m. on Tuesday, Sept. 20, in Eisenhower Auditorium.

Tickets for the performance, and for others in the Performing Arts series, will be on sale from 9 a.m. to 4 p.m. on Thursday, Sept. 15, and Friday, Sept. 16, at the box office in Eisenhower Auditorium.

Other highlights of the 1977-78 season will include a matinee performance of *My Fair Lady*, starring Edward Mulhare and Anne Rogers, on Sunday, Oct. 30, and special holiday performances on Saturday, Dec. 3, and Sunday, Dec. 4, of "The Nutcracker," by the Pittsburgh Ballet Theatre.

On Saturday, Feb. 4, Michael Tilson Thomas will conduct the Pittsburgh Symphony Orchestra and the University Choirs in a performance of Mahler's Symphony No. 2 in C Minor. The Paul Taylor Dancers will present a program of innovative dance on Saturday, Feb. 18, and the Jury's Irish Cabaret of Dublin, a company of songsters, storytellers, fiddlers and others, will perform on Sunday, March 19.

Mail orders will be accepted after Sept. 16 for tickets to all events other than *Bubbling Brown Sugar*. In addition, although tickets cannot be reserved by phone, orders charged to Visa and Master Charge will be accepted. For more ticket information, call 865-1871.

Newcomers welcome planned

The Newcomers Club of the Faculty Women's Club is again planning a series of tall coffees to welcome women who are

new to University Park. Membership is open both to incoming faculty and administrators or their wives. Persons transferring from one of the Campuses are equally welcome.

The "coffees" will be held the week of Sept. 18, prior to the fall reception of Sept. 29, and a complete schedule will be issued next week. At these introductory programs, newcomers can learn about the community, the University, local organizations and places of interest. Anyone who has not been contacted by Sept. 15 or who wishes more information about the club can call Jean Hoffman at 234-0653.

Sports Camps boom

Some 2,000 high school boys and girls attended Penn State Sports Camps at University Park this summer, up from 1,500 last year and 900 in 1975. Ten sports

are offered — baseball, basketball, competitive swimming, field hockey, football, gymnastics, soccer, springboard and tower diving, track and field, and wrestling. According to conference coordinator Robert Beam, who administers the program, there were 20 camps this year as compared to seven in 1975.

Life Sciences Library invites faculty visits

New faculty are invited to visit the Life Sciences Library, E205 Pattee, at 4 p.m. on either Monday, Sept. 12, or Thursday, Sept. 15, for an orientation program. Library staff will be happy to arrange special orientation programs for classes. Arrangements may be made by phoning 865-7056.

Elsewhere in Academe

Wisconsin extends tenure

To open the door to younger faculty in departments where most of the professors are already tenured, the regents of the University of Wisconsin have approved a proposal to extend the tenure probation period from seven to ten years. Judgments on a faculty member's eligibility for tenure will still be made at the end of six years. When no positions are available, qualified personnel will receive three-year appointments to the academic staff; and if an opening occurs during this period, they will receive tenure.

More women on campus

The U.S. Census Bureau reports that the number of women under 35 attending

Artists Series, American Film Theatre, Eugene Ionesco, *Rhinoceros*, 8 p.m., Eisenhower Auditorium.

Thursday, Sept. 8
Fixed date for meetings involving Commonwealth Campus faculty.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Jazz Dance Theatre Company auditions, 7 p.m., Room 119 Arts Bldg.

Friday, Sept. 9
Fixed date for meetings involving Commonwealth Campus faculty.
Last date for registering with foreign language departments (other than French and Spanish) for written language examinations.
Sports: soccer, vs. Lock Haven, 7 p.m.

Saturday, Sept. 10
Fixed date for meetings involving Commonwealth Campus faculty.
P.S.O.C. Hiking Division, annual ascent of Mount Nittany via north face, 1:30 p.m., HUB lawn.
Sports: field hockey, Penn State Invitational.

Sunday, Sept. 11
P.S.O.C. Hiking Division, trail clearing in Rothrock State Forest, free cubs steak supper, 9 a.m., HUB parking lot.
University Chapel service, The Rev. Charles L. Coleman, PSU, 11 a.m., Eisenhower Chapel.
Sports: field hockey, Penn State Invitational.

Week of Sept. 12

Monday, Sept. 12
Intramural sports: men's graduate student and faculty/staff bowling (round robin), entry open. Entry closes, noon, Sept. 15, Intramural Bldg.
france-cinema, Duvivier, *The Man in the Raincoat* (1956), a comedy spoof starring Fernandel, 7 and 9 p.m., Room 112 Kern.

Tuesday, Sept. 13
U.S.C. Health Fair, all day, HUB ballroom and north lounge, through Sept. 15.
Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1, Faculty Club, William Schmalstieg on "A Few Notes on the Igor Tale."

Wednesday, Sept. 14
Department of Material Sciences Nelson W. Taylor memorial lecture, Elbert F. Osborn, Carnegie Institution of Washington, former director, U.S. Bureau of Mines; vice-president for research emeritus of Penn State, on "The Mineral Shortage and What Can Be Done About It," 3:45 p.m., Room 112 Kern.
G.S.A. Commonsplace Theatre, *To Have and Have Not*, 7:30 and 9:30 p.m., Room 112 Kern.
Artists Series, The Cleveland Orchestra, 8:30 p.m., Eisenhower Auditorium.

Thursday, Sept. 15
Add deadline.
Department of Material Sciences Nelson W. Taylor memorial lecture, Elbert F. Osborn, Carnegie Institution of Washington, on "Can We Be Self-Sufficient in Mineral Resources?" 3:45 p.m., Room 112 Kern.
International Council lecture, 7:30 p.m., Room 101 Kern.

Friday, Sept. 16
Sports: soccer vs. Trenton State, 7 p.m.
International Council film, 7:30 p.m., Room 112 Kern.

Saturday, Sept. 17
P.S.O.C. Hiking Division, backpack on Quehanna Trail, through Sunday.
Sports: football, vs. Hebron, 1:30 p.m.
Shaver's Creek Nature Center, bird banding and other things, with campfire, 8 p.m., Stone Valley.

Sunday, Sept. 18
University Chapel service: Donald Barrett, Gulf Oil Corporation, Pittsburgh, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, fall wildflowers and weeds walk, 2 p.m., Stone Valley.
Free U registration, 1-6 p.m., HUB ballroom.

Week of Sept. 19

Monday, Sept. 19
Last date for Nov. graduates to activate diploma cards in Registrar's Office and pay these fees at Bursar's Office.
Deadline for IAHS sponsored faculty research grants for winter and spring term, Ithaca College.
Shakespeare film, *Henry V* (Olivier), 6:30 p.m., Room 101 Chambers. Free admission.
Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, Sept. 20
Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club, Hugh Chapman on "Mollers."
University Senate Council meeting, 2:10 p.m., Room 101 Kern.
Sports: women's tennis, vs. Lock Haven, 2:20 p.m.; field hockey, vs. Millersville, 2:30 p.m.
Shakespeare film, *Henry V* (Olivier), 6:30 p.m., Room 101 Chambers. Free admission.
Free U classes begin.
france-cinema, Bourguignon, *Sundays and Cybele* (1962), the friendship between a girl and a war veteran, 7 p.m., Room 112 Kern.
English colloquium, Joanne Trautman, Hershey, on "Virginia Woolf and Company: Selections from Her Letters," 8 p.m., Room 101 Kern.
Artists Series, *Bubbling Brown Sugar*, 8:30 p.m., Eisenhower Auditorium.

Wednesday, Sept. 21

Shaver's Creek Nature Center, animal homes and signs walk, 2 p.m., Stone Valley.

Week of Sept. 26

Monday, Sept. 26
Drop deadline.
Passfall deadline.
Course repeat deadline.
Preregistration deadline for winter term, 1978.
Intramural sports: men's graduate student and faculty/staff handball singles (round robin) and volleyball (round robin), entry open.
Entry close, noon, Sept. 29.
france-cinema, Duvivier, *Pope le Moko* (1937) the original Cashab movie, starring Jean Gabin, 7 and 9 p.m., Room 112 Kern.
Robert Trehy, baritone, accompanied by John Wustman, University of Illinois, IAHS visitor, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Sept. 27
Last date for written foreign language examinations (other than French and Spanish) for advanced-degree candidates.
Sports: field hockey, vs. Lock Haven, 3 p.m.; soccer, vs. West Chester, 7 p.m.
Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club, John Kaiser.
Artists Series, Lloyd film, *The Freshman*, 8 p.m., Eisenhower Auditorium.

Wednesday, Sept. 28
G.S.A. Commonsplace Theatre, *The Big Sleep*, 7:30 and 9:30 p.m., Room 112 Kern.
Music Dept. wind faculty, 8:30 p.m., Music Bldg. recital hall.

Thursday, Sept. 29
Sports: women's tennis, vs. Mary Baldwin, 9:30 a.m.
Faculty Women's Club fall reception, 7:30-9:30 p.m., Rooms 101 and 102 Kern.

Friday, Sept. 30
Sports: i.v. football, vs. Fork Union, 2 p.m.
Artists Series, Vienna Choir Boys, 8:30 p.m., Eisenhower Auditorium.

Saturday, Oct. 1
Last date for Nov. graduates to deliver doctoral theses to Committee.
P.S.O.C. Hiking Division, backpack on Pine Creek in Tiadaghton State Forest, through

Sunday.
Sports: football, vs. Kentucky, 1:30 p.m.
Outdoor pool closes officially, possibly open on a temporary basis, depending on weather.

Sunday, Oct. 2
University Chapel service, Richard Shaull, Princeton Theological Seminary, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, pods, prickles, and paracuties, 2 p.m., Stone Valley.

Week of Oct. 3

Monday, Oct. 3
Shakespeare film, *Hamlet* (Olivier), 6:30 p.m., Room 101 Chambers. Free admission.
france-cinema, Berni, *The Two of Us* (1968), a rare relationship between an old man and a small boy, 7 and 9 p.m., Room 112 Kern.

Tuesday, Oct. 4
Fixed date for meetings involving Commonwealth Campus faculty.
Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club, John Dixon Hunt on "Rosetti."
University Faculty Senate meeting, 2:10 p.m., HUB assembly.
Shakespeare film, *Hamlet* (Richardson/Williamson), 6:30 p.m., Room 101 Chambers. Free admission.
English colloquium, 8 p.m., Room 101 Kern.

Wednesday, Oct. 5
P.S.O.C. Hiking Division meeting, James Lindzey will talk on the Pennsylvania black bear, 7:30 p.m., Room 214 Boucke.
Student preview of *A View From the Bridge*, 8 p.m., Pavilion Theatre.
G.S.A. Commonsplace Theatre, *Maltese Falcon*, 7:30 and 9:30 p.m., Room 112 Kern.
Artists Series, American Film Theatre, Edward Albee, *A Delicate Balance*, 8 p.m., Eisenhower Auditorium.
Earl Williams, cello, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 6
University Theatre, Arthur Miller, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Sports: women's tennis, vs. Colgate, 1:30 p.m.

Friday, Oct. 7
Fixed date for meetings involving Commonwealth Campus faculty.
Homecoming Alumni Tea, 4:45 p.m., Room 101 Kern.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, Oct. 8
Fixed date for meeting involving Commonwealth Campus faculty.
Last date for final oral doctoral examinations for Nov. graduates.
Last date for Nov. graduates to deliver master's theses or papers to advisors.
Sports: men's fencing, varsity/university meet, 8 a.m.; men's cross-country, vs. Kent State and Bucknell, field hockey, vs. Ohio State, 10 a.m., football, vs. Utah State, 1:30 p.m.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Sunday, Oct. 9
P.S.O.C. Hiking Division, introduction to orienteering, 9 a.m., HUB parking lot.
University Chapel service, The Rev. Elmer A. Vastyan, Hershey Medical Center, 11 a.m., Music Bldg. recital hall.
Shaver's Creek Nature Center, autumn ramble, 2 p.m., Stone Valley.
Artists Series, *Shakespeare's People*, 8:30 p.m., Eisenhower Auditorium.

Week of Oct. 10

Monday, Oct. 10
E.A. Day Memorial Lecture in Food Science, Andrew A. Benson, Scripps Institution of Oceanography, former PSU professor of agriculture and biochemistry, on "Oceanic Food Chains and Challenges," 11 a.m., Room 112 Kern.
Shakespeare film, *Macbeth* (Schaefer/Edwards), 6:30 p.m., Room 101 Chambers. Free admission.

Tuesday, Oct. 11
Sports: field hockey, vs. Cortland, 2:30 p.m.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club, Robert Schmalz on "Atlantis."

Wednesday, Oct. 12

University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
G.S.A. Commonsplace Theatre, *Lost Weekend*, 7:30 and 9:30 p.m., Room 112 Kern.
Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 13

Faculty Women's Club, "A Morning at the Art Museum," 10 a.m., Museum of Art.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
IAHS lecture, Philip Radcliffe, University of Manchester on "TV: Culture with a Capital C?" 8 p.m., Room 112 Kern.

Friday, Oct. 14

Sports: soccer, vs. Maryland, 7 p.m.
International Council film, 7:30 p.m., Room 112 Kern.
Shaver's Creek Nature Center, stars, myths and legends, 8 p.m., Stone Valley.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Faculty Club, fall dance, 9 p.m., Faculty Club, Jil Olson, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, Oct. 15

University Chapel service Jerome Weinstein, Central Daily Times, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, old time pioneer crafts festival, noon-5 p.m., Stone Valley.
Sports: women's golf, EAIAW Championships.

Week of Oct. 17

Monday, Oct. 17

Color Slide Club, 7:30 p.m., Room 112 Kern.
Music Bldg. recital hall.

Tuesday, Oct. 18

Friends of the Museum of Art Gallery Talk.
Hedy Landman, museum consultant, on "East to West: Chinese Export Porcelain," 10:30 a.m., Museum of Art.
University Senate Council meeting, 2:10 p.m., Room 101 Kern.
English colloquium, 8 p.m., Room 101 Kern.
Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club. Philip Radcliffe on "Mass Communication and the Developing Countries."

International Council lecture, 7:30 p.m., Room 112 Kern.

Wednesday, Oct. 19

G.S.A. Commonsplace Theatre, *The Wild Bunch*, 7:30 and 9:30 p.m., Room 112 Kern.
Thalia Trio, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 20

Afro-American Studies Forum. James E. Lewis, Morgan State University, Baltimore, will speak on African art and Black art in the Western hemisphere, 8 p.m., Room 101 Kern.

Friday, Oct. 21

Sports: j.v. football, vs. Milford Academy, 2 p.m.; soccer, vs. Navy, 7 p.m.
Un-Common Theatre, Neil Simon, *The Good Doctor*, 8 p.m., Room 112 Kern.
Artists Series, Vermeer Quartet, 8:30 p.m., Eisenhower Auditorium.

Saturday, Oct. 22

Sports: football, vs. West Virginia, 1:30 p.m.
Un-Common Dinner Theatre, Neil Simon, *The Good Doctor*, 8 p.m., Room 112 Kern.
Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Oct. 23

P.S.O.C. Hiking Division, trail clearing on Mid State Trail, free picnic supper, 9 a.m., HUB parking lot.
University Chapel service. The Rev. Donald Davis, PSU, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, nature discovery walk, 2 p.m., Stone Valley.
Un-Common Dinner Theatre, dinner, 6:30 p.m., Room 102 theatre, Neil Simon, *The Good Doctor*, 8 p.m., Room 112 Kern.

Week of Oct. 24

Monday, Oct. 24

Last date for Nov. graduates to deliver theses to Graduate School Office.
Last date for Departments to certify to Graduate School completion of required papers for Nov. graduates.

First day for signing winter term NSDL and University long term loans at 108 Shields.
Shakespeare film, *King Lear* (BrookSchofield), 6:30 p.m., Room 101 Chambers. Free admission.

Raymond Brown, bass-baritone, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Oct. 25

Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club. Dominique Jauch on a topic in French philosophy.
Central Pa. Society of the Archaeological Institute of America lecture, James Russell, University of British Columbia, on "Rome's Northernmost Frontier," 8 p.m., Room 101 Kern.

Artists Series, Keaton films, *The Playhouse and The General*, 8 p.m., Eisenhower Auditorium.

Wednesday, Oct. 26

G.S.A. Commonsplace Theatre, *Midnight Cowboy*, 7:30 and 9:30 p.m., Room 112 Kern.
University Theatre, *Something's Afoot*, student preview, 8 p.m., The Playhouse.
Alard Striving Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 27

Sports: field hockey, vs. Maryland, 2:30 p.m. Bldg. Halloween party, 6:30 p.m., Kern Graduate Bldg.
University Theatre, *Something's Afoot*, 8:00 p.m., The Playhouse.

Friday, Oct. 28

P.S.O.C. Hiking Division, idiot overnight (wait all night on Mount Nittany for the Great Pumpkin to show up).
Sports: j.v. football, vs. Wesley Jr. College, 2 p.m.
University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.
Penn State Brass Choral, 8:30 p.m., Music Bldg. recital hall.

Saturday, Oct. 29

Sports: football, vs. Miami, 1:30 p.m.
University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.
Shaver's Creek Nature Center, ghouls and beasties and things that go bump in the night, 8 p.m., Stone Valley.

Sunday, Oct. 30

Sports: women's cross country, Blue & White Invitational.

Artists Series, American Film Theatre, David Storey, *In Celebration*, 8 p.m., Eisenhower Auditorium.
Artists Series, Edward Tarr, trumpet and George Kent, organ, 8:30 p.m., Music Bldg. recital hall.

Thursday, Nov. 10

Board of Trustees meeting, Room 402 Keller.

Friday, Nov. 11

Board of Trustees meeting, Room 402 Keller.
Faculty Women's Club luncheon/lecture.

Exhibits

Anthropology Museum

Open Tuesday and Thursday, 9 a.m.-noon and Wednesday, 1-5 p.m. Entrance at rear of Sparks near blue mail box.
Central American and Mexican Pre-Columbian exhibit.
Ethnographic artifacts of Ethiopia.

Earth and Mineral Sciences Museum

Open Tuesday — Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m., and by appointment. Mineral Industries Bldg.

Frost Entomological Museum

Open weekdays 9 a.m.-noon and 1-4:30 p.m., Room 102 Patterson. Special gypsy moth exhibit.

Hammond Gallery

Neil Feather and Marilyn Ranker, Nov. 1-13.

HUB Gallery

Smithsonian Institution exhibit, "The Seat of American Invention," the development of American chairmaking, Sept. 1-25.
Bruce Schwabach, paintings, Sept. 1-30.
Homecoming exhibit, Oct. 1-15.
San Francisco posters and PSU Wildlife Society exhibit, Oct. 16-29.
Paul O'Hara, sculpture, and Joan Sonnenberg, prints, Oct. 30-Nov. 30.

Kern Commons Gallery

Waskewich prints, Sept. 6-9.
Prints by faculty and graduate students, Sept. 17-Oct. 1.
Walker Benson, photographs, Sept. 17-Oct. 1.
Nancy Norton, stained glass, Sept. 17-Oct. 1.
Michael Ondik, photographs, and Les Rishel, wood sculpture, Oct. 1-15.
Multi-media Fire Prevention Week exhibit, Oct. 1-8.

Barbara Hackman Franklin on "The Growth of the Consumer Movement and Current Product Safety Issues," noon, Nittany Lion Inn.

Saturday, Nov. 12

Last date for submitting petitions to Records Officer to graduate in absentia on Nov. Sports: football, vs. Temple, 1:30 p.m.
Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Nov. 13

P.S.O.C. Hiking Division, exploration in Little Juniata Natural Area, 9 a.m., HUB parking lot.
University Chapel service, T. Vannora Vittach, United Nations, New York, 11 a.m., Music Bldg. recital hall.

Shaver's Creek Nature Center, winter trees and evergreen walk, 2 p.m., Stone Valley.
Sports: men's cross country, Eastern USSTF Championships.

Week of Nov. 14

Monday, Nov. 14

Fall term classes end, 9:55 p.m.
Last day for signing fall term emergency loans at 108 Shields.

Tuesday, Nov. 15

Final Examinations.
Friends of the Museum of Art Gallery Talk.
Edward Bryant, Picker Art Gallery, Colgate University, on "John Koch and American Art," 10:30 a.m., Museum of Art.
University Senate Council meeting, 2:10 p.m., Room 101 Kern.

Wednesday, Nov. 16

Final examinations.

Thursday, Nov. 17

Final examinations.

Friday, Nov. 18

Final examinations.

Saturday, Nov. 19

Final examinations (until noon).
Sports: fencing, PSU Open (men and women), all day.

Sunday, Nov. 20

Shaver's Creek Nature Center, weeds in winter, 2 p.m., Stone Valley.
Sports: fencing, PSU Open (men and women), all day.

Week of Nov. 21

Monday, Nov. 21

Fixed date for meetings involving Commonwealth Campus faculty.
Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, Nov. 22

Fixed date for meetings involving Commonwealth Campus faculty.

Thursday, Nov. 24

Thanksgiving day, holiday.

Saturday, Nov. 26

Commencement.

Pennsylvania Guild of Craftsmen,

multi-media, Oct. 15-29.
Edward S. Curtis, North American Indian photographs, Oct. 22-Nov. 5.

Museum of Art

Wonderlich exhibition; Kenneth Bittel, recent works; John Koch, models and moments, opens Nov. 6.

Museum of Art HUB Gallery

Esmark collection, Currier and Ives, through Oct. 23.

Supernud exhibition, opens Oct. 30.

Pattee Galleries

Bob Andriuli, Sept. 8-Oct. 10, East Corridor Gallery.
Steve Marvill, color photography, Sept. 6-Oct. 10, Lending Services Lobby.

Sackett Gallery

Systems, drawings and three dimensional models, through Sept. 20.

Zoller Gallery

M.F.A. exhibition, Sept. 10-21. Reception, Sunday, Sept. 11, 3-5 p.m.
Faculty exhibition, Sept. 24-Oct. 3. Reception, Sunday, Sept. 25, 3-5 p.m.
William King, sculpture, Oct. 8-Oct. 21.
Reception, Oct. 9, 9-3 a.m.
Larry Edwards and Bill Hanson, paintings, Oct. 22-Oct. 30. Reception, Sunday, Oct. 23, 3-5 p.m.
Supernud, Nov. 3-16.

Penn Staters

Dr. Ralph T. Heimer, professor of education, has been selected as one of 20 outstanding mathematics educators from the United States to participate in a National Council of Teachers of Mathematics study visit to the Peoples Republic of China. The visit, scheduled for this fall, will consist of 29 days in China. The group will visit school classrooms, universities, communes, teacher training institutions, plants and factories and pedagogical institutes. The study group also will spend five days in Japan as guests of the Japanese Mathematical Society.

Dr. Heimer, a graduate of Lock Haven State College, received his master and doctor of education degrees at Penn State. He was associate professor of mathematics at Lock Haven State College from 1958 to 1960 and has been a member of the Penn State faculty since 1966.

Wrestling coach William H. Koll, assistant professor of physical education, is one of ten men elected to the National Wrestling Hall of Fame. He will be formally inducted on Saturday, Sept. 24, in Stillwater, Okla., where the Hall of Fame and National Museum are operated by the U.S. Wrestling Federation. As a wrestler at Northern Iowa (then Iowa Teachers College), Mr. Koll was a three-time National Collegiate Athletic Association champion (1946-47-48) and was undefeated in 72 collegiate matches. In his junior and senior seasons he became the first person ever to be honored twice as the NCAA's outstanding wrestler. He has been head coach at Penn State for the past 13 years.

Dr. Donald E. Fahnlne, assistant professor of physics at Altoona, will serve as acting associate director for academic affairs at the Campus during 1977-78. He replaces Jack G. Zubrod, who retired last May.

Dr. Roy E. Myers, associate professor of mathematics at New Kensington, is serving as acting associate director for academic affairs at the Campus until a permanent associate director is found. Dr. Robert D. Arbuckle, who previously held the post, was named director of the Campus in July.

"Soil Warming for Utilization and Dissipation of Waste Heat in Pennsylvania" was the topic of a paper presented by Dr. David R. DeWalle, associate professor of forest hydrology and affiliate of the Institute for Research on Land and Water Resources, at the Topical Meeting on Low Temperature Nuclear Heat held in Helsinki last month. He also co-authored a paper with Dr. Warren W. Witzig, professor and head of nuclear engineering, which Dr. Witzig presented at the meeting. It was entitled "A Summary of United States Activities in Low Temperature Nuclear Heat."

Dr. Robert W. Ott, associate professor of art education, presented an invited paper at the Seventh World Congress of the International Association for the Advancement of Education Research held this summer in Ghent, Belgium. The theme of the Seventh Congress was "Self-Realization through Education," and Dr. Ott's paper was titled "Methodological Studies for the Supervision and Development of Art Teaching in Schools and in Museums."

Dr. Fred Rapp, professor and chairman of microbiology in the College of Medicine, has been named one of 21 Sigma Xi National Lecturers for 1977-78. Sigma Xi, a scientific research society, has for 40 years sponsored the national college of lecturers in order to give local chapters and clubs the opportunity to hear nationally known scientists discuss particularly lively areas of current research in a manner appropriate for interdisciplinary

audiences. Active in virus and cancer research for 25 years, Dr. Rapp is the author or coauthor of more than 300 publications.

Dr. Francis M. Dwyer, senior research associate and coordinator of instructional evaluations in UDIS, has been appointed to the National Science Foundation's advisory panel to evaluate proposals submitted in the Research in Science Education Program (RISE). The RISE program provides support for exploratory research, innovative teaching strategies, and other related communication technologies and systems designed to improve the quality and efficiency of learning at all levels of science education.

Dr. Della M. Roy, professor of materials science, has been appointed head of a new committee that will investigate the status of cement and concrete research and development in the United States. The committee is being organized by the National Materials Advisory Board, which operates under the Commission of Sociotechnical Systems of the National Research Council. Other committee members will represent university, industrial and non-profit research efforts, plus liaison people from U.S. government agencies.

Dr. Gordon C. Godbey, associate dean for Commonwealth Campuses and Continuing Education, College of Education, has been appointed to a one-year term on the Pennsylvania Community Education Advisory Council by Caryl M. Kline, the State's Secretary of Education.

Dr. A. J. Ferraro, professor of electrical engineering, has been appointed a member of the Arco Scientific Advisory Committee. This is a committee of 12 scientists who advise the Director of the National Astronomy and Ionosphere Center on operations of the Arco Observatory in Puerto Rico. The observatory is a research facility operated by Cornell University under contract with the National Science Foundation and is the location of the large 1000-foot radio telescope.

WPSX Highlights

Alec Guinness stars as an impassioned scientist and the inventor of a miracle fabric in *The Man in the White Suit* Saturday, Sept. 10, at 3 p.m. Part of the three-credit University of the Air course, *Foreign Film: Theme, Form, and Style*, the 1951 film classic can also be seen Sunday, Sept. 11, at 6 p.m.

Women in the United States outlive men by six or seven years, creating about 10 million American widows. Five widows are the subject of film portraits in "Till Death Do Us Part," Sunday, Sept. 11, at 7:30 p.m. on *Something Personal*.

A landmark in public television history will be revived Sunday, Sept. 11, at 10 p.m. when *The Forsythe Saga* returns to Channel 3. Described as "an instant classic" by the New York Times, the 26-episode series is based on two trilogies of novels by John Galsworthy.

Movement education, a new teaching technique in physical education, is the subject of *Talkabout*, Tuesday, Sept. 13, at 7:30 p.m. Jill Rattray and Betty Arink, both professors of physical education at Penn State, and Gladys Hart, president of the State College Chapter of the Association for Children with Learning Disabilities (ACLD), discuss the advantages movement education has for normal and disabled youngsters who do not excel in sports.

Gordon F. Dejong, professor of sociology and associate director of the Population

(284-1) The NSF Student Originated Studies (SOS) program has a Nov. 4 closing date. Baccalaureate degree granting institutions are eligible sponsors. Students must be regularly enrolled as juniors, seniors, or graduate students. Support includes stipends, operating expenses, and indirect costs. (Ref. SE 78-22)

(285-1) The American Association for University Women (AAUW) Education Foundation supports fellowships to both American and international graduate women. American fellowships are for dissertation or postdoctoral level or final year in selected professions (deadline Dec. 15). International fellowships are for graduate study (deadline Dec. 1). (Ref. AAUW letter & brochure)

Seminars

Monday, Sept. 12
Biochemistry/Biophysics, Robert Barker, Michigan State University, on "Studies with 13 C-Enriched Carbohydrates," 3:55 p.m., Room 101 Altohouse.

Tuesday, Sept. 13
Applied Research Laboratory, A. M. Jacobs on "Non-destructive Testing by X-ray Backscattered Imaging," 10:45 a.m., Walker Conference Room, Applied Sciences Bldg. Biochemistry/Biophysics, Robert Barker, Michigan State University, on "The Biochemical Synthesis of Glycosides," 11:10 a.m., Room 101 Altohouse. Air Pollution Control, John Straitz, III, National Air/Oil Burner Co., Philadelphia, on "Environmental Control by Means of Combustion," 2:20 p.m., Room 140 Fenske.

Wednesday, Sept. 14
Materials Research Laboratory, Charles Magee, RCA Research Labs, Princeton, on "Applications of Secondary Ion Mass Spectrometry to Materials Research," 10:30 a.m., Room 250 Materials Research Lab. Fuel Science, Brian S. Haynes, Institut Fur Physikalisches Chemie, Der Universitat Gottingen, on "Nitrogen Species in Combustion," 4 p.m., Room 301 Mineral Industries.

Thursday, Sept. 15
Microbiology/Cell Biology, C. Town, Imperial Cancer Research Fund, U.K., on "The Role of Cellular Interactions and Cyclic AMP in Dictyostelium Development," 4 p.m., Room 52 Frear.

Issues Research Office, is featured on *The Benjamin Franklin Symposium*, Wednesday, Sept. 14, at 10:30 p.m. Dr. Dejong, who participated in the symposium held for the Pennsylvania General Assembly earlier this year, assesses the future of Pennsylvania in light of present and projected population trends.

Three special programs on the education of handicapped children are featured on Thursday, Sept. 15, beginning at 9 p.m. with "Including Me." The hour-long documentary, hosted by Patricia Neal, introduces six youngsters who are handicapped and are living up to their potential through the encouragement of teachers, families, and friends.

Immediately following, at 10 p.m., "Education for Handicapped Children" takes a look at new legislation which has gone into effect to guarantee the rights of handicapped children to a full education. Appearing on the Penn State Television program are parent Mary Mohs, Gloria Mills of the ACLD, David Distler representing the Tuscarora Intermediate Unit, and Herman Axelrod, assistant professor of special education at Penn State.

At 10:30 p.m., "A Right to Belong" assesses an experimental program which has been conducted in Pennsylvania schools to provide special educational programs for deaf, blind, retarded, and physically disabled children.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Sept. 15. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

COLLEGE HEALTH NURSE—IN-PATIENT AND EMERGENCY ROOM, RITENOUR HEALTH CENTER—University Park. Responsible to Head, College Health Nurse, in-patient and emergency room, for providing nursing service in the in-patient service area and for the emergency room. Assist licensed physician and dentist in patient care. Graduate of an accredited nursing program or its equivalent and current licensure in Pennsylvania as a registered nurse, plus six to nine months of directly related experience.

NURSE ANESTHETIST—Hershey. Administratively responsible to the Chairman of the Department of Anesthesiology and professionally responsible to a designated anesthesiologist to administer anesthesia, and to provide pre-operative, operative, and post-operative care to patients. Graduate of accredited school of nursing, plus graduation from an accredited school of nurse anesthesia and registered in the State of Pennsylvania. In addition, one to two years of directly related experience is required.

college has doubled in the last decade, with women now accounting for 47 percent of the college population in that age group. From 1970 to 1976, the number of male students aged 22 to 34 rose 41 percent to 2.6 million, while the number of women in that age bracket rose 103 percent to 1.7 million. In addition, the Census Bureau says, more older students of both sexes are attending college, including 1.2 million people 35 or older.

Washington to cut number of graduate programs

More than 40 graduate programs in the state of Washington are due to be discontinued as the result of a decision made by the State's Council for Postsecondary Education. The Council postponed until 1979 an action recommended by its staff which would have eliminated doctoral programs in history and English at Washington State University. Officials at Washington State had lobbied against the proposal, claiming that the programs are "central to our modern mission."

Faculty invited to annual President's Convocation

The President's Convocation for all University faculty will be held at 4 p.m. on Wednesday, Sept. 28, at Eisenhower Auditorium. President Oswald, Faculty Senate Chairman Thomas E. Daubert, and Provost Edward D. Eddy will speak briefly, and their remarks will be broadcast to faculty on the Commonwealth Campuses.

News in Brief

Theatre season opens with Arthur Miller play

A View from the Bridge, Arthur Miller's modern tragedy set in Brooklyn's Waterfront area, is the first of six major productions planned for the 1977-78 University Theatre season.

The play, a study of a colony of Italian-American longshoremen, has been described by critic John Chapman as "an intensely absorbing drama, sure of itself every step of the way." The University Theatre production will be under the direction of M.F.A. candidate Steven Adler.

Performances are scheduled for Oct. 6 through 8 and 11 through 15 at the Pavilion Theatre, with a special student preview on Wednesday, Oct. 5. All University Theatre performances begin at 8 p.m.

The second production of the year will be *Something's Afoot*, a murder mystery musical which opens Oct. 27 at the Playhouse Theatre. It will be followed in January by *The Rummer Stumbles*, the Milan Stitt play that took Broadway by storm; in February by *Thieves' Carnival*, a farce about a gang of barely competent pickpockets; in April by *Jazz Dance Theatre in Concert*, with director-choreographer Jean Sabatine; and in May by a production of *Electra*.

Tickets for University Theatre productions will go on sale on Monday, Sept. 19, at the box office, located in the Playhouse in the Arts II Bldg. The box office will be open Monday through Saturday from 1 to 6 p.m. on non-performance days and from 1 to 9 p.m. on performance days.

Reservations for all University Theatre productions may be made by mail or by telephone (865-1884). All reservations must be paid for at least 48 hours in advance of the performance. Group rates are available for groups of 25 or more.

Library hours reduced

Because of the University's budget crisis, libraries at all campuses will operate on the following schedule until further notice: Pattee and branch libraries will be open from 1 to 10 p.m. Sunday; 7:45 a.m. to 10 p.m. Monday through Thursday, and 7:45 a.m. to 5 p.m. on Friday and Saturday.

At the University Park Campus, the Reserve Reading Room will be open until midnight Sunday through Thursday and until 5 p.m. Friday and Saturday. The East Halls Library will be open daily from 7 p.m. to midnight, and the Pollock Library

Senate discusses grades, academic dishonesty

Should colleges or departments formally establish academic standards for — and monitor — the grading of students?

That question sparked a University Faculty Senate discussion last week (Thursday, Sept. 8) that resulted in a vote against a proposed wording change to the current Senate grading policy.

At its first meeting of the fall term the Senate also voted on — and approved — a proposal aimed at eliminating loopholes that make it possible for students accused of cheating to avoid punishment in the grading system.

In addition, the senators approved wording changes to the current policy on the structuring of honors programs. The action was taken on the recommendation of a subcommittee charged with studying the University's responsibility to the superior student.

The discussion of grading followed presentation of a report by the Subcommittee on Grading of the Senate Committee on Undergraduate Instruction. In that report, the subcommittee — which had been investigating the problem of grade

inflation — recommended a change of wording in the current Senate policy on student grades.

Policy 47-20 currently states that: "Grades shall be assigned to individual students solely on the basis of the instructor's judgment as to a student's scholastic achievement as set forth in Policy 47-60."

The subcommittee's recommendation, which was subsequently defeated, was that the policy be amended as follows: "The college and department faculties are responsible for establishing and monitoring academic standards for courses offered in their academic units; the application of these standards to the achievement of individual students, and therefore the assignment of grades, is the sole responsibility of the course instructor."

A second proposal made by the subcommittee, dealing with cases of academic dishonesty, was approved. Donald C. Suit, director of the Office of Conduct Standards, and attorney John Gilliland spoke briefly on the procedures followed when a faculty member accuses a

student of cheating. In some cases, they noted, it is possible for a student to escape punishment by dropping the course or withdrawing from the University.

Following their remarks, the senators voted to approve several wording changes to the current Senate policy on University withdrawal and course drop procedures.

In brief remarks at the beginning of the meeting, President Oswald said he would discourage making fundamental changes in the University's promotion and tenure policy at this time, since the policy is only two years old. He added, however, that he expected to see consideration of some non-fundamental changes in the near future.

Provost Edward D. Eddy also spoke briefly, noting that Dean James B. Bartoo, formerly acting interim provost, has agreed to serve as a consultant to him during his period of transition to the University.

In other action, the Senate approved proposed revisions on the structuring of honors programs. The revisions make it possible for some credits to be completed

(Continued on page 6)

Retroactive paychecks to be distributed soon

Retroactive paychecks, where appropriate, for the period July 1 to Sept. 30, will be paid to University faculty and staff employees on Oct. 25, 1977.

The checks will be distributed using the same procedure followed on a normal payday. Employees having their checks deposited to their regular bank accounts will be advised by mail as to this deposit.

Faculty meetings planned

Officers of the University Faculty Senate have scheduled a series of informal meetings which will be open to all interested faculty members, in an effort to improve communications between the Senate and the faculty as a whole.

The first will be held from 3:30 to 5 p.m. on Monday, Sept. 19, in Room 305 of the Hetzel Union Bldg. The second is scheduled for 3:30 to 5 p.m. on Monday, Oct. 3, in Room 101 Kern Bldg. Times and

dates of other meetings will be announced later.

Faculty Senate Chairman Thomas E. Daubert said the meetings were intended to encourage free discussion of faculty concerns. In addition, he said, the Senate officers hoped to get faculty input on legislation that will come before the Senate this year, as well as suggestions for future Senate consideration.

Dr. Daubert said the officers urge all faculty members to attend one of the meetings.

Print of the clipper ship "Nightingale" is from the Esmark Collection of Carrier & Ives, on display at the HUB Gallery through Oct. 23.

Faculty Advisory Committee: an informational report

This article, describing the structure and operation of the Faculty Advisory Committee to the President, was prepared by the committee as an informational report for University faculty and staff.

BACKGROUND

The establishment of a Faculty Advisory Committee to the President (FAC) was recommended by The Joint Senate-Administrative Select Committee on Faculty Participation in University Governance, a report subsequently endorsed by the University Faculty Senate on May 7, 1974.

This new advisory group was envisioned to serve as a consultative body to the President and Provost on a wide variety of general concerns to the University community, such as academic administrative/structural changes, matters affecting University development and the utilization of resources, including all aspects of budgetary matters, and other matters pertaining to the general welfare of the University, and in particular, its faculty.

In 1975, the Senate approved the concept by creating the Faculty Advisory Committee to represent the Senate and the Faculty at large as an advisory and consultative body to the President on the concerns noted previously. Topics for discussion may include any matter initiated either by the President or the committee. The committee makes periodic reports to the Senate.

However, in contrast to other committees of the Senate in which formal, specific reports are discussed and enacted on the Senate floor, the committee as set up in the governance report must report delicate or confidential material in a more general way to maintain both confidentiality and accountability.

MEMBERSHIP

The Faculty Advisory Committee membership of seven includes the Chairman, Chairman-Elect, Immediate Past-Chairman, and Secretary of the Senate, and three elected faculty members chosen for three-year staggered terms. The members are elected by the Senate, and all members of the committee, whether or not an elected member of the Senate, have all the rights and privileges of a member. At least one member of the

Faculty Advisory Committee members William Rabinowitz, Evelyn Hovanec, Lee Saperstein, Thomas Daubert, John Coyle, Robert Friedman and Guy Rindone meet with President Oswald and Provost Edward Eddy.

committee must be from a non-University Park location.

The membership of the committee since its inception has included: Dr. Helen I. Snyder, associate professor of educational psychology, 1975-76; Mrs. Sally S. Small, associate librarian, Berks Campus, 1976-77; Dr. John J. Coyle, professor of business administration, 1975-78; Dr. Guy E. Rindone, professor of ceramic science, 1975-79; Dr. William Rabinowitz, professor of educational psychology, 1975-78; Dr. Margaret B. Matson, professor of sociology and social welfare, 1975-77.

Also Dr. Martha Adams, professor of physical education, 1975-76; Dr. Thomas E. Daubert, professor of chemical engineering, 1976-79; Dr. Lee W. Saperstein, associate professor of mining engineering, 1976-80; Dr. Evelyn Hovanec, associate professor of English, Fayette Campus, 1977-78; and Dr. Robert S. Friedman, professor of political science, 1977-80.

President Oswald and the Provost always meet with the committee, as do other key administrative officers (for example, Dr. Ikenberry, Mr. Norris or Dr. Dunham) when their presence is requested.

PHILOSOPHY OF OPERATION

The Faculty Advisory Committee operates informally with President Oswald and the Senate Chairman serving as co-chairmen. The latter solicits items for discussion and documentation materials from each committee member before each monthly meeting, and an agenda is prepared that contains items raised both by members and the President. In addition, any other

item can be brought up during a meeting. Discussion is frank.

Meetings are held each month and are three to four hours in duration. No minutes are taken. Advice is reached by consensus and no votes are taken. The atmosphere is such that each member of the committee is encouraged to speak his or her mind on any issue. Discussions are always constructive.

Although general topics of discussion and some conclusions are reported through the Senate to the faculty, the specific discussions (for example, dealing with personnel, with optional governmental strategy, or with matters that have not yet emerged publicly) are kept confidential in order to continue to provide an open forum where any or all issues may be discussed with a better Penn State as the only consideration.

TOPICS OF DISCUSSION DURING FIRST TWO YEARS OF OPERATION

Topics range from major issues to minor impasses of which it appears the President must be informed in order to effect a solution to a problem that, if left unattended, could lead to larger problems. Representative issues discussed include:

- Review and discussion of the 1975 revised promotion and tenure policies, as well as aid in modifying the administrative guidelines for promotion and tenure before each year's release

- Review and discussion of the possible policies to govern the review of academic administrators before it was begun

- The budget: requests to the State,

advice on allocation of resources, proceedings in Harrisburg, and other matters

- Student classroom problem resolution policies
- Tuition remission
- The calendar
- Registration and preregistration
- Policy on use of University equipment and services
- Student fees
- Classroom space and timing problems
- Part-time faculty
- Faculty liability to students
- Responsibilities of joint

Senate/Administrative committees

- Statewide educational issues
- The Buckley Amendment
- Non-academic personnel policies
- Transfer policies
- Middle States Accreditation
- Mid-range financial projections
- Basic skills
- Academic dishonesty
- Relating academic priorities to the budget
- Improved collegiality in the University

IN CONCLUSION

We start the third year of operation of the committee with a feeling of cooperation and accomplishment. Good faith and understanding are shared by the administration and the faculty in resolving issues discussed. Final advice to the President is taken and implemented if possible. In no case has this committee's advice been disregarded. The members of the committee would be pleased to entertain your comments.

Penn Staters

Dr. Jean W. MacCluer, associate professor of biology, is serving as a fellow during 1977-78 academic year at the Center for Advanced Study in the Behavioral Sciences at Stanford University. She is participating in a study of evolution and behavior and collaborating on a research project on quantitative inheritance. Dr. MacCluer is a specialist in population genetics.

Dr. Joseph L. Wysocki, Extension family housing specialist and associate professor of housing extension, was one of twelve U.S. housing specialists invited to develop a training manual for HUD-approved housing counseling agencies, August 22 to 26, at the Housing & Urban Development Training Center in Columbia, Md. Dr. Wysocki and his associates wrote a text on renting, home buying and home ownership. He was also one of the three people selected to return to Washington for the final editing of the training manual.

Dr. Forrest J. Remick, associate professor of nuclear engineering and assistant to the vice president for research and graduate study, has recently been reappointed a

technical member of the Atomic Safety and Licensing Board of the U.S. Nuclear Regulatory Commission. In addition, Dr. Remick has been elected to the executive committee of the Reactor Operations Division of the American Nuclear Society and appointed to the Advisory Committee for the Center for Educational Affairs of the Argonne National Laboratory.

Dr. Richard L. Gordon, professor of mineral economics, was recently appointed to the Federal Energy Administration Advisory Group on Anthracite Coal.

John E. Flynn, professor of architectural engineering, has been appointed chairman of international committee TC-3.5 (Light in the Environment), a committee of the International Commission of Illumination. The International Commission is based in Paris. Committee TC-3.5 functions to coordinate international work in the field of environmental lighting, and is asked to work toward the development of international standards and guidelines. Twenty-six countries are represented by official delegates, plus a number of special consultant members. Prof. Flynn chaired the first meeting of the new committee at the Technical University of Berlin in early July.

Albert Jay Miller, librarian at the New Kensington Campus, and Michael J. Aciri, associate professor of philosophy at Gannon College in Erie, have compiled a bibliographical guide to the literature of death, published this summer by Scarecrow Press of Metuchen, N.J.

Beginning with the earliest writings on the subject, the comprehensive annotated guide includes works published through 1974, with some significant studies of later date. In all, there are approximately 3850 numbered entries in the volume, entitled *DEATH: A Bibliographical Guide*, for books, articles, letters, editorials, pamphlets and media information. A symbol code is used to identify audiovisual media, and an AV source list is appended.

Extended author and subject indexes are expected to make the guide especially useful for researchers and reference librarians. It may also be used in the courses related to death and dying now being offered at a number of colleges and universities.

Two members of the mining engineering faculty participated in the 15th International Symposium on the Application of Computers and Operations Research in the Mineral Industries. The symposium took place in Brisbane, Australia. **Dr. R. V. Ramani**, associate

professor, served as chairman of a session on mining, and presented a paper, "Underground Coal Mine Modelling — A Total Systems Simulation Approach." The paper was co-authored by **Charles B. Manula**, associate professor of mining engineering, **Stanley C. Suboleski**, an instructor in mining engineering, and **Dr. Ramani** served as Penn State's representatives in the symposium's council.

University Park Calendar

Sept. 15 - 25

Special Events

Thursday, Sept. 15

Add deadline.
U.S.G. Health Fair, all day, HUB ballroom and north lounge.

Department of Material Sciences Nelson W. DePue Memorial Lecture. Elburt F. Osborn, Carnegie Institution of Washington, on "Can We Be Self-Sufficient in Mineral Resources?" 3:45 p.m., Room 112 Kern.

Signa Xi Lecture. F. Sherwood Rowland, University of California, Irvine, on "Man's Threat to Stratospheric Ozone," 8 p.m., Room 112 Kern.

Friday, Sept. 16

Sports: soccer, vs. Trenton State, 7 p.m.
Astronomy OpenHouse, 8 p.m., roof of Davey Lab. Cloud date, Sept. 17.

Saturday, Sept. 17

P.S.O.C. Hiking Division, backpack on Quahanna Trail, through Sunday.
Sports: football, vs. Houston, 1:30 p.m.
Shaver's Creek Nature Center, bird banding and other things, with campfire, 8 p.m., Stone Valley.

Sunday, Sept. 18

University Chapel service. Donald Barrett, Gulf Oil Corporation, Pittsburgh, 11 a.m., Eisenhower Chapel.

Free U registration, 1-6 p.m., HUB ballroom.
Shaver's Creek Nature Center, fall wildflowers and weeds walk, 2 p.m., Stone Valley.

Monday, Sept. 19

Last date for Nov. graduates to activate diploma cards in Registrar's Office and to pay these fees at Bursar's Office.

Deadline for IAHS sponsored faculty research grants for winter and spring terms. Ithaca Cottage.

Shakespeare film, *Henry V* (Oliver), 6:30 p.m., Room 101 Chambers. Free admission.
Color Slide Club meeting, 7:30 p.m., Room 112 Kern. Marc Levey on "Creative Photography."

Tuesday, Sept. 20

Camp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club. Hugh Chapman on "Molere."

University Senate Council meeting, 2:10 p.m., Room 101 Kern.

Sports: women's tennis, vs. Lock Haven, 2:20 p.m.; field hockey, vs. Millersville, 2:30 p.m.
Shakespeare film, *Henry V* (Oliver), 6:30 p.m., Room 101 Chambers. Free admission.

Free U classes begin.
france-cinema, Bourguignon, *Sundays and Cybele* (1962), the friendship between a girl and a war veteran, 7 and 9 p.m., Room 112 Kern.

"Apples, Pear and Landscape" by Emil Mellow is from the M.F.A. exhibition at Zoller Gallery through Sept. 21.

English colloquium, Joanne Trautmann, Hershey, on "Virginia Woolf and Company: Selections from Her Letters," 8 p.m., Room 101 Kern.

Artists Series, *Bubbling Brown Sugar*, 8:30 p.m., Eisenhower Auditorium.

Wednesday, Sept. 21

5 O'Clock Theatre, Dexter, 5:30 p.m., The Playhouse.

Sports: soccer, vs. Scranton, 7 p.m.
G.S.A. Commonsplace Theatre, *Cauchianca*, 7:30 and 9:30 p.m., Room 112 Kern.
Colloquy, David Frost, 8 p.m., Rec. Bldg.
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, Sept. 22

Pass/fail deadline.
Board of Trustees meeting, Room 402 Keller.

Friends of the Museum of Art Gallery Talk. Dianne Pilgrim, curator of decorative arts, Brooklyn Museum, on "The Victorian Collections and Period Rooms of the Brooklyn Museum," 10:30 a.m., Museum of Art.

5 O'Clock Theatre, Dexter, 5:30 p.m., The Playhouse.

Penn State Dates meeting, 7:30 p.m., Room 101 Kern.

Spanish, Italian and Portuguese Department, Servando Carballar and Company, traditional Hispanic folk-songs and ballads 8 p.m., Room 112 Kern. Free admission

Friday, Sept. 23

Pass/fail deadline.

Board of Trustees meeting, Room 402 Keller.
5 O'Clock Theatre, Dexter, 5:30 p.m., The Playhouse.

Saturday, Sept. 24

College of Agriculture Hort Show, 10 a.m.-9 p.m., Ice Pavilion.

Sports: football, vs. Maryland, 1:50 p.m.

Sunday, Sept. 25

College of Agriculture Hort Show, 9 a.m.-4 p.m., Ice Pavilion.

P.S.O.C. Hiking Division, joint trail clear with Bucknell Outing Club on R.B. winter extension in Bald Eagle State Forest, free picnic supper, 9 a.m., HUB parking lot.

University Chapel service. Gordon C. Godbey, PSU, 11 a.m., Eisenhower Chapel.

Sports: women's cross-country, Lady Lion Invitational.

Shaver's Creek Nature Center, animal homes and signs walk, 2 p.m., Stone Valley.

Faculty Exhibition reception, 3-5 p.m., Zoller Gallery.

Exhibits

Anthropology Museum: Tuesday and Thursday, 9 a.m.-noon, and Wednesday, 1-5 p.m. Central American and Mexican Pre-Columbian exhibit; ethnographic artifacts from Ethiopia

Earth and Mineral Sciences Museum: Tuesday - Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m.

Forest Entomology Museum: weekdays, 9 a.m.-noon and 1-4:30 p.m. Gypsy moth exhibit.

HUB Gallery: Smithsonian Institution exhibit, "The Seal of American Invention," the development of American chainmaking; Bruce Schwabach, paintings.

Kern Commons Gallery: prints by faculty and graduate students; Walter Benson, photographs, "The Quiet Moment," Nancy Norton, stained glass. Opens Sept. 17.

Museum of Art: Arne Jacobsen: Danish architect and designer; William Cullen Bryant collection; contemporary stage design.

Museum of Art HUB Gallery: Esmark collection; Currier and Ives.

Pattee Galleries: Bob Andriulli, *East Corridor* Gallery; Steve Marvill, color photography, Lending Services Lobby.

Sackett Gallery: Systems, drawings and three dimensional models, through Sept. 20.

Zoller Gallery: M.F.A. exhibition, through Sept. 21; faculty exhibition, opens Sept. 24.

Seminars

Thursday, Sept. 15

Bioengineering, Terry E. Spraker on "Correlation Studies of the Retino-Geniculate Pathway in Rabbit," 4 p.m., Room 325 EE East.
Meteorology, Nels Otto Jensen, Risk National Laboratory, Roskilde, Denmark, on "On the Structure of Penetrative Convective Elements," 4 p.m., Room 112 Walker.
Statistics, Douglas Jones, Rutgers University, on "Numerical Approximation of the M-Estimator," 4 p.m., Room 273 Willard.

Monday, Sept. 19

Biochemistry/Physiophysics, Russell Hilf, University of Rochester, on "Hormonal Responses of Experimental Mammary Adenocarcinomas," 3:35 p.m., Room 101 Althouse.

Tuesday, Sept. 20

Biochemistry/Physiophysics, Russell Hilf, University of Rochester, on "Application of Biochemistry to Prediction of Response of Breast Cancer," 11:10 a.m., Room 101 Althouse.

Air Pollution Control/Chemical Engineering, Arden B. Walters, Southern California Gas Co., Pico Rivera, Calif., on "The Political Challenge to Technology in Air Pollution Control," 2:20 p.m., Room 140 Fenske.

Materials Research Laboratory/Mineral Processing, E. Raask, Central Electricity Research Labs, Leatherhead, England, on "New Research on the Use of Fly Ash in Concrete," 3:30 p.m., Room 250 Materials Research Lab.

Inorganic Chemistry, Gregory L. Geoffroy on "Synthesis, Characterization, and Properties of Mixed-Metal Organometallic Clusters," 8 p.m., Room 333 Whitmore.

Thursday, Sept. 22

Chemistry, J.P. Young, Oak Ridge National Laboratory, on "Resonance Ionization Spectroscopy and the Detection of Single Atoms," 12:45 p.m., Room 333 Whitmore.

Microbiology/Cell Biology, Judy D. Wall, Indiana University, on "The Genetics of N₂ Fixation in the Photosynthetic Bacterium *Rhodospirillum rubrum*," 4 p.m., Room 325 Fenske.

Physics, Hans Bethge, Nobel Laureate professor emeritus Cornell University, on "Nuclear Matter," 11 a.m., Room 445 Davey and "The Energy Problem," 3:50 p.m., Room 119 Davey.

Meteorology, James K. Angel, NOAA, Silver Springs, Md., on "Recent Trends in Total Ozone Amounts," 4 p.m., Room 112 Walker.

WPSX Highlights

Akiro Kurosawa's film classic, *Rashomon*, is featured on **Foreign Film: Theme, Form, and Style** Saturday, Sept. 17, at 3 p.m., and again Sunday, Sept. 18, at 6 p.m. The winner of an Academy Award in 1952 for Best Foreign Film, *Rashomon* tells a woodcutter's story of violence and tragedy through a series of flashbacks.

Herbert von Karajan conducts the Berlin Philharmonic and the chorus of the Berlin Opera in Beethoven's *Symphony no. 9* Sunday, Sept. 18, at 2 p.m. on **Great Performances**. The program also includes Beethoven's popular concert piece *Egmont Overture*.

Something Personal captures the highly original philosophy and lifestyle of the late Imogen Cunningham on Sunday, Sept. 18, at 7:30 p.m. Cunningham, who earned an international reputation as an innovative portrait photographer, reminisces about her remarkable life in this film, entitled *Never Give Up*.

Economist John Kenneth Galbraith returns to public television Monday, Sept. 19, at 9 p.m. with *The Age of Uncertainty*

—his personal analysis of the last 200 years of economic and political turmoil. The 13-week series, which is part of a University of the Air 3-credit course, begins with the development of classical capitalism in England and France. To register for the course, contact Independent Study by Correspondence. (865-5403)

"People go to distant places to see beauty and pass it by in their own backyard," says Nebraska artist Reinhold Marxhausen. His theory and techniques for stimulating people to see the beauty and art in their local surroundings are revealed in the award-winning documentary *Findings: A Film About Reinhold Marxhausen*, Thursday, Sept. 22, at 9 p.m.

Society announces project

Members of the Penn State Aristotelian Society will discuss the problems of language and philosophy. Faculty and staff members interested in joining the society should contact Dr. Henry W. Johnstone, professor of philosophy, at 865-1684 for details on the times and dates of meetings.

Funding Sources

For further information,
call 865-1372

(286-1) The National Endowment for the Humanities (NEH) has published an Education Programs booklet describing the program of the Division of Education. Institutional grants include consultant, pilot, development, and college library grants. Higher education projects include humanities institutes, curricular materials, and general project grants. Elementary and secondary education program includes teacher grants and the cultural institutions program assists libraries and museums. Initial inquiries and preliminary drafts usually precede formal application. Deadlines range over the entire year. (Ref. ibid.)

(286-2) NSF's 1978 Engineering Research Institute Grants program has been assigned a Nov. 15 deadline. The National Science Foundation advises that this program is directed toward full time engineering faculty (professors, teaching metallurgy and materials sciences are included) who have had no substantial research support. A quarter of the academic year and two months of two summer terms must be set aside. Two options are offered. The first (A) requires all time to be spent on campus. The second (B) requires that summer work be non-academic. (Ref. NSF PR77-741)

(286-3) The National Science Foundation supports a program called **Handicapped in Science**. Eleven 1977 awards totalling \$481,155 were made to increase participation in science by physically handicapped people who have aptitude and interest in this field. (Ref. NSF PR77-7642F2388, 11/177). The next application deadline is Nov. 7 for support of conferences, workshops, studies, and science training models. (Ref. 42FRA4025, 9/177).

(286-4) The Office of Education has announced a Nov. 4 closing date for its Fulbright-Hays Training Grants: Faculty Research Award, Doctoral Dissertation Research Award, Group Projects Award, and Foreign Curriculum Consultants. (Ref. 42FRA4026, 9/177).

1977-78 Revised Guidelines for the Conduct of the University Promotion and Tenure Review Process

President Oswald has issued for immediate implementation the 1977-78 Revised Administrative Guidelines for the Conduct of the University Promotion and Tenure Review Process, the text of which appears below. These guidelines modify those used in 1976-77 and are the direct result of suggestions made by faculty and administrators after study and review of last year's procedure. The policy itself (PS-23) has not been altered. For easy reference, the revisions are printed in bold face type.

Foreword

PS-23 was endorsed by the University Faculty Senate on May 6, 1975, and was subsequently approved for implementation by President Oswald effective July 1, 1975. Administrative guidelines for implementing PS-23 during 1975-76 accompanied the policy. In 1976-77, the Administrative Guidelines were revised to make the review process more effective and efficient; however, no changes were made in the basic policies of PS-23.

Since decisions on promotion and tenure are of utmost importance to each faculty member, as well as to the University, it is essential that the evaluation of each nominee be made with complete fairness and objectivity. The process and guidelines for PS-23 are designed to maximize these conditions by (1) emphasizing the need for appropriate factual information; (2) requiring that department, college, and campus units establish relevant criteria within the broad University goals; (3) making use of reasonable evaluative methods; and (4) by providing a mechanism for multiple reviews within the system. Following a second year of experience in implementing PS-23, and after receiving recommendations from various faculty members and administrators, the 1976-77 Administrative Guidelines for the Conduct of the University Promotion and Tenure Review Process have been modified to a very minor degree for implementation during the 1977-78 review cycle. As in earlier revisions, the 1977-78 guidelines have been developed to assure fairness, to regularize the dossiers, increase objectivity, and to reduce the introduction of possible irrelevancies into the process.

Faculty members who are promoted or who receive tenure are viewed by their colleagues as having demonstrated academic excellence. The policy is purposely oriented to emphasize academic quality, in the broadest sense, as the central issue of concern with respect to promotion and tenure decisions. Neither the policy nor the guidelines are intended to in any way impede the full realization of academic excellence as represented by faculty members within a discipline, department, campus, or college. Indeed, academic and administrative units are urged to develop, specify, and consistently apply those criteria that are particularly appropriate to their area as long as such are consistent with University-wide criteria and policy.

1977-78 Revised Administrative Guidelines

I. EFFECTIVE DATE

The revised University promotion and tenure policy (PS-23) became effective on July 1, 1975.

II. APPLICABILITY

A. Faculty members appointed to a tenure-eligible position prior to July 1, 1975.

1. Procedures. The review procedures prescribed in the revised promotion and tenure policy apply in their entirety to all faculty members appointed to a tenure-eligible position prior to July 1, 1975; however, these revised procedures do not alter the basic conditions and rights under which faculty members employed prior to that date were appointed.

2. Substantive Policy Rights.

- a. Changes introduced in the revised promotion and tenure policy are primarily procedural rather than substantive. In the few instances in which the substantive rights contained in the revised policy exceed the rights granted under the previous policy, the new rights are immediately extended to all faculty members appointed to a tenure-eligible position prior to July 1, 1975. These expanded rights are (1) the provision for longer periods for notification of nonreappointment in the first and second years of appointment, and (2) a more flexible accounting for years of service toward tenure.

- b. One provision in the new policy could potentially diminish the rights granted under previous policy. The new policy includes the provision of an additional year of provisional status if, through inadvertence, a faculty member is not notified of

the award or denial of tenure by or before the end of the sixth year of appointment.

This provision shall not apply retroactively to faculty members appointed to a tenure-eligible rank prior to July 1, 1975.

- B. Faculty members serving in a non-tenure-eligible position prior to July 1, 1975.

All aspects of the new promotion and tenure policy, procedural and substantive, apply in their entirety to faculty members who were serving in non-tenure-eligible positions prior to July 1, 1975, and who may be promoted or reappointed to a tenure-eligible position on or after July 1, 1975.

- C. Faculty members appointed to The Pennsylvania State University on or after July 1, 1975.

All aspects of the new promotion and tenure policy apply in their entirety to faculty appointments effective on or after July 1, 1975.

III. CRITERIA

The policy indicates that all candidates for promotion and tenure are to be evaluated in terms of their (1) teaching ability and effectiveness, (2) research competence, (3) scholarship and mastery of subject matter, and (4) service to the University and the public. Within each of these broad categories, specific criteria applicable to the academic unit and reflective of the professional responsibilities of the faculty member are to be defined. The policy requires that the responsibilities of faculty members within units be identified in order that "all parties to the process share common expectations and understandings." This provides for a more well-defined alignment of reward with function within each of the four major categories.

Concerning these specific criteria (as well as those additional expectations that are relevant to a particular unit(s)) college deans, the Dean of the University Libraries, the Dean of Academic Instruction for Commonwealth Campuses, the Deans of Behrend College and Capitol Campus, and the Director of Intercollege Research Programs and Facilities, with appropriate faculty participation, shall:

- A. Develop a written statement of criteria and expectations that is responsive to the academic demands of the particular discipline or unit. These criteria and expectations are to relate to the aforementioned University-wide categories. In addition, any special emphasis in criteria and expectations or areas of divergence from those usually applicable to the discipline for a given faculty member shall be identified. Special attention shall be given by the administrative officers to assure compatibility between a faculty member's responsibilities and the criteria and expectations applied to promotion and tenure decisions. The Dean of Academic Instruction for the Commonwealth Campuses and the college deans shall jointly develop expectations and standards for faculty members on Commonwealth Campuses.
- B. Specify the evaluative methods used to assess the extent to which a faculty member has met the pre-stated criteria and expectations.
- C. Assure that faculty members are regularly apprised of the criteria and expectations that relate to their respective responsibilities, and that they are advised by the appropriate academic or administrative officer of the general results of the evaluation of their performance in accordance with the policy.
- D. Provide a copy of criteria, expectations, and evaluative methods to the Provost of the University and include a copy in the dossier of each candidate for promotion or tenure.

Regarding the evaluation of teaching effectiveness, the University Faculty Senate (May 3, 1977) took legislative action on the following points and requested that they be included in the 1977-78 Administrative Guidelines for implementing PS-23:

- A. Recommendations regarding personnel actions must incorporate various kinds of information on teaching effectiveness. Specifically, the evaluation of teaching effectiveness should in all cases include faculty input.
- B. All evaluations of teaching effectiveness should include student input. Academic units may, if they choose, utilize student in-class survey instruments in partial fulfillment of the student input requirement of PS-23, but if used, these survey instruments shall be supplemented by additional evidence on student evaluation of teaching effectiveness.

IV. REVIEW PROCEDURES

A. Establishment of Review Committees.

1. Campus, Department, College, University Libraries, and Intercollege Research Programs Review Committees.

- a. No later than October 1 of each year, campuses, departments, colleges, the University Libraries, and the Intercollege Research Programs shall establish promotion and tenure review committees and procedures subject to the guidelines for such reviews as set forth in the policy and as indicated below. Exceptions to the following guidelines may be approved by the Provost of the University; requests for exceptions shall be accompanied by documentation of support for the request by committee members, directors, or department heads of the unit concerned and who are directly affected by the exception, and these shall have the concurrence of the appropriate dean.

- (1) Members of the review committee shall be selected according to procedures approved by the faculty of the respective academic unit and by the appropriate administrative officer.

- (2) Only tenured faculty shall make recommendations about candidates for tenure.

- (3) Only faculty of higher rank than the candidate shall make recommendations about promotion.

- (4) Review committees shall have no fewer than three members.

- (5) For the review of Commonwealth Campus faculty only, the policy requires that a majority of the members of the committees at the department and college levels consist of faculty from the Commonwealth Campuses. Every attempt should be made, however, to include a mix of faculty members at the campuses and at University Park when possible, administratively feasible, and consistent with the policy.

- b. In addition to the required guidelines listed above, which are established by the policy, faculty members at the campuses, in the departments, colleges, the University Libraries, and the Intercollege Research Programs are urged to adopt the following additional optional guidelines:

- (1) Review committees should be limited to a maximum of seven members.

- (2) Committees should be selected proportionately as follows:

- (a) At least two-thirds of the membership elected by the faculty;

- (b) At least one-quarter of the membership appointed by the respective academic unit's administrative officer;

- (3) A majority of the faculty representatives should be full professors, and in the case of reviews for promotion from associate to full professor, the committee should be comprised solely of these full professors;

- (4) A committee chairman may be appointed by the appropriate academic administrator.

- c. No later than by October 1, all campus, college and University Libraries deans, and the Director of Intercollege Research Programs and Facilities shall submit to the Provost of the University a report describing the process adopted for establishing the review committees.

2. The University Promotion and Tenure Review Committee.

- a. In December of 1975, the University Faculty Senate elected six members of the University Promotion and Tenure Review Committee. This preliminary election provided for three one-year appointments (serving until June 30, 1976) and three two-year appointments (serving until June 30, 1977). By June 30 of succeeding years, the University Faculty Senate shall elect three members of the University Review Committee for two-year appointments.

- b. One representative from among the recipients of the Lindback Award for Distinguished Teaching and one representative

of the University's Evan Pugh Professors are selected annually by lot by the Provost of the University from among their respective groups and appointed to the University Review Committee.

- c. The President of the University shall appoint three senior academic administrators to the University Review Committee annually.
- d. For 1977-78, all members of the University Promotion and Tenure Review Committee shall have full voting authority in the evaluation of all candidates under review for promotion or tenure. In subsequent years, when a vote is taken on promotion to any rank, a majority of the University Committee members of the equivalent rank or higher must vote "Yes" in order for the promotion to be recommended. Similarly, only members of the University Committee who are tenured may vote on candidates for tenure.
- e. The Provost of the University, with the Office of Personnel Administration, shall be responsible for developing and maintaining procedures and recommendations forms for use by the University Promotion and Tenure Review Committee. These forms and procedures shall be distributed for information to the various academic units, commensurate with the initiation of each year's promotion and tenure reviews. Such forms to be used in preparing the dossiers can be obtained from Systems and Procedures, 225 Shields Building, or by calling 865-9568.

B. Review Schedule.

1. By September 15 of each year, the Provost of the University shall advise the college deans, the Director of Intercollege Research Programs, the Dean of University Libraries, the Deans of Capitol Campus and Behrend College, and the Dean of Academic Instruction for Commonwealth Campuses of any changes to be incorporated into the guidelines for conducting promotion and tenure reviews, and advise them to proceed with promotion and tenure reviews in the respective academic units.
2. By October 15 of each year, The Office of Personnel Administration shall provide the college deans, the Dean of University Libraries, the Deans of Capitol Campus and Behrend College, and the Dean of Academic Instruction for Commonwealth Campuses with a report of all academic staff accumulating credit toward tenure within their respective units, indicating the number of years of credit earned toward tenure as of the next July 1, and identifying those subject to final tenure review.
3. Promotion and tenure reviews should begin immediately following notification by the Provost of the University.
4. Promotion and tenure recommendations from the Commonwealth Campuses shall be forwarded to the college and University Libraries deans and the Dean of Academic Instruction for Commonwealth Campuses as specified in the policy before December 1. The college and University Libraries deans and the Dean of Academic Instruction for Commonwealth Campuses shall be jointly responsible to coordinate the reviews at the campus, department, and college levels to allow for adequate periods of review at each level.
5. Reviews for promotion and for the granting of tenure at the department level shall be completed by or before February 1.
6. Following the reviews at the college or University Libraries level, the positive recommendations made by the dean for promotion and for the granting of tenure shall be forwarded by the appropriate deans to the Provost of the University through the Office of Personnel Administration for transmittal to the University Promotion and Tenure Review Committee no later than March 15. This shall include those recommendations for promotion and for the granting of tenure for faculty members holding joint appointments in a college and in an Intercollege Research Program. The appropriate administrative officer shall inform those faculty members who did not receive a positive recommendation.
7. The Director of the Intercollege Research Programs and Facilities is responsible for coordinating promotion reviews for personnel in the intercollege research programs.

The Director shall forward positive recommendations for promotion for faculty not holding joint appointments in a college to the Provost of the University through the Office of Personnel Administration for transmittal to the University Promotion and Tenure Review Committee no later than March 15. The appropriate administrative officer shall inform those personnel who did not receive a positive recommendation.

8. For faculty members holding joint appointments in two or more colleges, the positive recommendations shall be forwarded by the college responsible for the largest share of the salary.
9. At the same time that recommendations are forwarded to the Provost of the University, a summary of the general processes followed in the reviews shall also be forwarded, as specified in the policy along with a **summary of the decisions/recommendations made at each review level (campus, department, and college) for promotion and tenure.** Appropriate explanation and documentation regarding significant instances of differences in judgment shall also be submitted. (The colleges shall utilize comparable procedures, as appropriate, for evaluating nominees for promotion from instructor to assistant professor. The decisions of the college shall be reported to the Provost of the University.)
10. By May 1 of each year, deans shall also complete the reviews of all other faculty members who are either not subject to a final tenure decision that year or not recommended for promotion that year, and will insure that faculty members are appropriately informed of the results of the evaluation.
11. The University Promotion and Tenure Review Committee shall complete its deliberations and forward its recommendations for promotion and tenure through the Provost of the University to the President of the University no later than May 15 of each year. The President shall notify, in writing, all recipients of promotion and tenure awards. Copies will be provided to the appropriate deans, the Director of Intercollege Research Programs, campus directors, and the Office of Personnel Administration.

C. Nomination Process and Development of the Dossier.

1. Faculty members will be reviewed for promotion only after having first been nominated in one of the following ways:
 - a. Normally by an appropriate academic administrator;
 - b. A person may be nominated by the initial peer review committee after the committee has consulted with the appropriate administrative officer.With respect to nominations from the Commonwealth Campuses, directors and deans should confer with each other regarding proposed nomination.
2. In the case of University Park candidates for promotion and/or tenure, department heads shall have responsibility for the development of the dossier. For faculty members on a Commonwealth Campus, development of a candidate's dossier is the responsibility of the Associate Director for Academic Affairs or the Assistant Director for Resident Instruction.
3. A standard format for organizing the material in the dossiers shall be used by all academic units. Supplemental support materials (books, reprints, syllabi, etc.) shall be retained by the initial administrator and/or review committee and not forwarded with the dossier unless requested by those responsible for the next level of review. Deans and campus directors will receive copies of the format which shall be required for 1977-78. It is the responsibility of the deans and directors to inform faculty members and administrators in their respective areas of the content required in and format of the dossiers. Each faculty member shall assist in supplying relevant information for the dossier. The department head, ADAA/ADRI, or other appropriate administrative officer is responsible for preparing an accurate, complete, and properly organized dossier for each candidate within his/her administrative area.

Dossiers should not usually contain the following items unless they are obviously appropriate and useful in making profes-

sional recommendations:

- a. Evaluative statements written by the candidate.
 - b. Statements about a candidate's personal life unless they are germane to the quality of the candidate's work.
 - c. A vita which restates information presented elsewhere in the dossier.
 - d. Samples of the candidate's publications.
 - e. Letters of appreciation or thanks.
 - f. Course outlines.
4. All committees and administrators who have previously reviewed a candidate's dossier shall be informed if any factual changes are subsequently made in the original materials. Committees and administrators shall not receive the written statements of evaluation and recommendations made at subsequent review levels. Throughout the process, however, the privacy rights of individual candidates shall be respected.
 5. All external letters of reference shall be obtained by the relevant dean and included in the candidate's dossier. The dean may delegate such responsibility to the cognizant department head. External letters are expected for all candidates for professor and/or tenure but are optional for candidates at the associate professor level. They are to give evidence that the person has achieved a reputation among professional colleagues elsewhere.
- #### D. Evaluative Role of Committees.
1. All individuals and committees responsible for evaluating a given candidate shall have the same factual record available.
 2. Department heads, campus directors, and deans should collaborate with their respective committees to assure that all individuals on the committees are well informed about each candidate. Although it is not required, such administrators may serve as resource persons to those review committees representing the units for which they have responsibility; however, the administrators and the committees shall render independent judgments of the candidates under review.
 3. Each review committee and each administrative officer shall summarize in writing their independent evaluation of a given candidate on each of the four general criteria. These evaluative statements, along with the recommendations, shall be inserted in the candidate's dossier. Each of the summaries shall be signed.
 4. For candidates being considered for tenure, a summary of the first, third, and fifth year reviews shall be included in the dossier by the campus, department, and college administrators.
 5. Each succeeding level (locus) has the responsibility to review the preceding committee and administrator statements concerning each of the candidate's qualifications and the documentation. However, particular emphasis should be given at each of the review levels as follows:
 - a. Campus (Programmatic).
 - (1) For Commonwealth Campus faculty members: evaluation of teaching ability and effectiveness.
 - (2) For Commonwealth Campus faculty members: evaluation of service to the University and to the public.
 - b. Department (Programmatic).
 - (1) For University Park faculty members: evaluation of teaching ability and effectiveness.
 - (2) For University Park and Commonwealth Campus faculty members: research competence.
 - (3) For University Park and Commonwealth Campus faculty members: scholarship and mastery of subject matter.
 - (4) For University Park and Commonwealth Campus faculty members: service to the University and to the public.
 - c. College: the college committee(s) review(s) department and/or campus recommendations for promotion and tenure in light of:
 - (1) College criteria;
 - (2) Documentation of accomplishments;
 - (3) Equity among departments; and
 - (4) Procedural fairness.
 - d. University: the University committee reviews all previous recommendations for promotion and tenure in light of:
 - (1) University criteria related to teaching ability and effectiveness, research

- competence, scholarship and mastery of subject matter, and service to the University and to the public;
- (2) Documentation of accomplishments;
 - (3) Equity within and among colleges; and
 - (4) Procedural fairness.

6. Faculty members at either Behrend College, Capitol Campus, or at the College of Medicine will be reviewed using procedures similar to those for faculty at University Park.

7. Although a candidate's age and time-in-grade are not criteria for promotion, it is incumbent on the relevant administrator(s) to provide persuasive documentation to justify the promotion of a faculty member in instances that diverge in any significant way from the normal promotion pattern for a department, campus, or college.

David Frost to speak

David Frost, the British talk-show host and television interviewer who is perhaps known best for his recent series of interviews with former President Nixon, will speak at the University this month. Sponsored by COLLOQUY, his appearance is scheduled for 8 p.m. Wednesday, Sept. 21, at Recreation Bldg. There will be no admission charge.

CIA-sponsored research here was not classified

The University announced last week that information from the Central Intelligence Agency shows that CIA-sponsored research performed here in the 1950s and 1960s was not classified but was basic research which was subsequently published in scientific journals.

According to Dr. Richard G. Cunningham, vice president for research and graduate studies, four sub-projects were funded through a cover agency, such as the Geschickter Fund for Medical Research. He said the University was not aware of the CIA backing.

"The documents show that no human experimentation was involved," he said. "The principal investigators were microbiologists and physicists, and the work took place in the College of Agriculture and the College of Chemistry and Physics, which is now the College of Science."

Dr. Cunningham said the research projects involved investigations of soil ecology, physical measurements on biologically active materials, occurrence of arboviruses in birds and consulting services in microbiology.

He said documents received from the CIA indicate that the studies during 1959-65 were of a basic research nature which apparently had the ultimate objective of national defense use in detecting and identifying chemical warfare and biological warfare-related materials.

Art classes offered for children, parents

Registration will continue through tomorrow (Friday, Sept. 16) for a series of art classes designed for young people and their parents. The classes will begin on Saturday, Sept. 17, and continue each Saturday through the fall term.

In all, 14 different courses are offered in the program, which is under the direction of Dr. Robert W. Ott, associate professor of art education, and Lola Kearns, a doctoral candidate in art education. Subjects range from photography and printmaking to weaving and pottery.

The classes are designed for children age five or older, and several are studios and workshops especially aimed at teenagers. In addition, an adult workshop in art is being offered to parents of students.

Registration may be made from 1 to 5 p.m. tomorrow with Holly Ping (865-5601) or at 270 Chambers Bldg., where more information about the courses is available.

New Kensington adds three associate degrees

The New Kensington Campus will add three new associate degree programs beginning in the fall term. They are Biomedical Equipment Technology, an Accounting Option in Business Administration, and a Business Option in Letters, Arts and Science.

Students exhibit work

The "Master of Fine Arts Graduate Exhibition," which features works by 26 students in the Department of Art, will continue through Wednesday, Sept. 21, at the Zoller Gallery.

Works from students in five major areas of emphasis — painting, printmaking, photography, ceramics and sculpture — are included in the show, one of the largest in the gallery's current season.

Zoller Gallery hours are 8 a.m. to 5 p.m. Monday through Friday and noon to 5 p.m. Saturday and Sunday. There is no admission charge.

Costume, set designs assembled for display

The first comprehensive American exhibition of scene and costume design ever assembled is on display at the Museum of Art through Oct. 2.

The show, Contemporary Stage Design, U.S.A., was organized by the International Theatre Institute of the United States, Inc., and is circulated by the Smithsonian Institution Traveling Exhibition Service (SITES). It includes set and costume designs for operas, ballets, musicals and dramas from Broadway, Off Broadway, regional, experimental and university theatres.

Among the set designs are those by Tony Walton for *Pippin* at the Imperial Theatre in New York, Ming Cho Lee for *Boris Godunov* at the Metropolitan Opera, John Conklin for *The Hostage* at Arena Stage in Washington, and Lester Polakov for *The Life and Times of Joseph Stalin* at the Brooklyn Academy of Music.

Costume designs include those by Florence Klotz for *A Little Night Music* at the Shubert Theatre in New York, Thomas F. Rasmussen for *The Waltz of the Toreadors* at the University of Southern California in Los Angeles, and John Doepf for *Treemonisha* at Wolf Trap Farm for the Performing Arts in Vienna, Va.

The museum is open from noon to 5 p.m. Tuesday through Sunday, with free tours conducted at 2:30 p.m. on Sundays. There is no admission charge.

Hispanic music planned

The Department of Spanish, Italian and Portuguese will present Servando Carballal and Company in a program of traditional Hispanic folksongs and ballads at 8 p.m. on Thursday, Sept. 22, in Kern Auditorium. Sr. Carballal has performed widely in Europe and is currently touring American Universities. The program is free of charge and is open to the public.

Senate

(Continued from page 1)

through approved extra course work in the student's major field. The action was taken at the recommendation of the Subcommittee on Honors Programs of the Committee on Undergraduate Instruction.

Senate also approved the creation of a University Task Force on Programs for Academically Superior Students.

The procedure for filling vacancies on the Standing Joint Committee on Tenure was amended and the appointment of John H. Partridge, associate professor of engineering at the York Campus, to that committee was approved.

The Senate also heard an informational report on the indirect costs of research from the Committee on Research.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Sept. 22. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

PROGRAM ASSISTANT, CONTINUING EDUCATION — University Park This person provides assistance to the area director in planning, implementing and conducting an evening college program. Responsible for supervising office procedures, exercising fiscal controls and maintaining related records.

Bachelor's degree, or equivalent, plus one to two years of related experience in performing administrative and supervisory tasks preferably related to the conduct of Continuing Education programs.

ASSISTANT TO THE DIRECTOR OF STUDENT ACTIVITIES, STUDENT AFFAIRS — University Park Responsible to the Director of Student Activities for providing administrative supervision and support services in the areas of student organization programming and the coordination of the Volunteer Service Center. Bachelor's degree, or equivalent, plus one to two years of related experience; or Master's degree, preferably in student affairs, social work or student personnel administration, plus one year of related experience.

ADMINISTRATIVE AIDE, (STUDENT AID) STUDENT AFFAIRS — University Park Responsible to the Director of Student Aid for providing administrative assistance with Student Aid programs, including identification of student financial problems and making appropriate referral to proper personnel within the division. A Baccalaureate degree or equivalent plus over one up to and including two years of directly related office experience is required.

From the Press

"New Women" in the Late Victorian Novel, by Lloyd Fernando. 168 pages. \$13.75.

Dr. Fernando examines the developments in the women's movement during the last 30 years of the 19th century in England, as reflected in the literature of the time. Through critical analysis of the works of George Eliot, George Meredith, George Moore, George Gissing and Thomas Hardy, he attempts to determine how ideas generated by the movement affected the work of the major contemporary novelists. And he argues that those ideas have a more profound effect than is usually thought to be the case on the literary achievement of the time. Dr. Fernando is head of the department of English at the University of Malaya in Malaysia.

Still a good investment

The Conference Board, a nonprofit, Manhattan-based outfit that does research in economics and management, reports that college is still a good investment, not only in terms of pure dollars-and-cents but also of rewards that might not be apparent at first. The report acknowledges that between 1969 and 1974 the differential between male college and high school graduates' earnings declined. But it also predicts that between 1974 and 1985 some 2.1 million jobs will open up to college graduates because of higher educational requirements for such positions as physicians' assistants and legal paraprofessionals.

News in brief

(Continued from page 1)

will be open from 9 a.m. to midnight Monday through Friday and from 1 p.m. to midnight Saturday and Sunday.

Library spokesmen say they hope to extend the hours of operation if the budget situation improves later in the year.

Schedule is announced for series of coffees

The Newcomers Club of the Faculty Women's Club has announced the schedule for its series of fall coffees welcoming women who are new to University Park. The coffees, which are for incoming faculty and administrators or their wives, will be held the week of Sept. 18, prior to the fall recollection of Sept. 29.

The schedule is as follows: Sunday, Sept. 18, 8 p.m., at the home of Pat Tracy, 44 High Meadow Lane, with co-hostess Marsha Drake; Monday, Sept. 19, 8 p.m., at the home of Peggy Kendall, 714 Devonshire, with co-hostess Sherrie Becker; Tuesday, Sept. 20, 8 p.m., at the home of Sue Tressler, 49 Orlando, with co-hostess Cynthia Tiff; Friday, Sept. 23, 8 p.m., at the home of Cynthia Ignizio, 22 Crickelewood Circle, with co-hostess Cheryl Rose.

Also, Sunday, Sept. 25, 3 p.m., at the home of Jane Snyder, 322 Douglas Drive, with co-hostess Nancy Stephenson; Sunday, Sept. 25, 8 p.m., at the home of Pat McCormack, 311 Lamppost, with co-hostess Natalie Creese; Monday, Sept. 26, 8 p.m., at the home of Margaret Hardy, 1250 S. Garner St., with co-hostess Susan Gootzaitz; and Tuesday, Sept. 27, 8 p.m., at the home of Lynn Jablonsky, 1042 Saxton, with co-hostess Sheryl Yashin.

Further information may be obtained by contacting Jean Hoffman, hospitality chairman, at 234-0653.

Proceeds to be donated

All proceeds from the sale of tickets to Jo Hays Day, a testimonial dinner for the State College mayor scheduled for Wednesday, Sept. 28, will be donated to Penn State's Renaissance Scholarship Fund, at Mayor Hays' request. For additional ticket information, contact David Colton or William Engle in the Office of Gifts and Endowments or Glen Carter in the Office of Secondary School Relations.

Skywatch set for Friday

An astronomy open house will be held at 8 p.m. Friday, Sept. 16, on the roof of Davis Laboratory. In case of overcast skies, the open house, sponsored by the Astronomy Club and the Astronomy Department, will be held on Saturday, Sept. 17.

Penn State Intercom

News in Brief

Speakers announce topics for Faculty Convocation

President Oswald, Provost Edward D. Eddy and Faculty Senate Chairman Thomas E. Daubert will address the faculty of the University at the fourth annual University-wide Faculty Convocation to be held from 4 to 5 p.m. on Wednesday, Sept. 28.

University Park faculty members will attend the program at Eisenhower Auditorium. To accommodate faculty at other campuses, a simultaneous broadcast will be made to all 21 University locations, where faculty will gather in areas convenient to them.

The convocation, held late in the Spring Term in previous years, was scheduled for the Fall Term this year at the suggestion of the Faculty Advisory Committee to the President. The schedule change is an attempt to make the convocation an integral part of the planning for the year's activities.

President Oswald will speak on "Priorities of the University." Dr. Daubert's topic will be "Priorities Among Issues Facing an Effective Senate," and Provost Eddy will speak on "The Quest for Quality."

Library hours at campuses

Reductions in library hours announced last week apply only to the University Park Campus. Libraries at other campus locations will continue to operate on a normal schedule unless announcement has been made to the contrary.

Annual Horticulture Show takes place this weekend

The Ice Pavilion at the University Park Campus will come to life with greenery this weekend when the 64th annual Horticulture Show opens at 10 a.m. on Saturday. The show will continue through 9 p.m. that day and will be open from 9 a.m. to 4 p.m. on Sunday. There is no admission charge.

In keeping with this year's theme, "Gardening with an International Flair," visitors will be taken through four international settings: Spanish, English, Oriental and Western European gardens. Each will include a number of landscaping ideas that could be incorporated into

home gardens in Pennsylvania.

In addition, Pi Alpha Xi, the honorary fraternity in floriculture and ornamental horticulture, has prepared an herb garden for the show.

The Horticulture Show, which attracts about 20,000 visitors annually, is put together by students in the College of Agriculture, working with faculty advisors. Traditionally, the show is dedicated to a person who has made an outstanding contribution to horticulture and to the Horticulture Show at Penn State. The name of the person to whom this year's show is dedicated will be announced early on Sept. 24.

Visitors will be invited to shop in the sales area, before leaving the show. Plants on sale will include ferns, tropical and potted plants, succulents, cacti and carnivorous plants such as the Venus flytrap.

Applications being accepted for temporary positions

The University's Employment Division has released the following statement concerning temporary research positions:

The University annually receives grants for projects designed to fulfill specific research responsibilities.

Such research grants or projects are normally of fixed duration and sometimes relatively short duration. In most instances, University project administrators must react quickly in making selections of staff personnel for their projects. Therefore, it is desirable to have an available pool of faculty and staff members who are interested in applying for such research staff positions.

This announcement is made so that qualified individuals may make their interests known. The types of research staff positions typically available are: senior project associate, project associate, project assistant, senior research technologist, research technologist and research technician.

The types of discipline background required vary depending on the projects involved. They may include physics, engineering, agriculture, mathematics, and chemistry, but are not limited to these areas.

If you apply, your name will be placed in the pool of candidates that will be considered as such opportunities arise. An announcement similar to this will be made each six months.

If you feel that you are interested in and have background related to typical University research projects, you may apply now or in the future for such research support staff positions by calling the University's Employment Division, 865-1387 (network 475-1387).

Application deadline noted

Faculty advisers are reminded that Monday, Oct. 31, is the deadline for the submission of applications for the Harry S. Truman Scholarship. The scholarship, which provides up to \$5,000 per year for tuition, fees, room and board and books, is awarded to students preparing for "the responsibilities of government service and active political participation."

To be eligible, a student must be enrolled in a baccalaureate degree program as a junior in the fall of 1978; have a GPA of 3.00 or better and rank in the top

(Continued on page 4)

A preview of topics to come before Senate committees this year

The University Faculty Senate has provided the following list of major policy topics which will be discussed in Senate committees over the next several months. Faculty members who would like to submit pertinent information or suggest additional topics for consideration should contact the appropriate committee chairman or sub-chairman.

COMMITTEE ON ACADEMIC AND ATHLETIC STANDARDS

(Peter Rebane, Chairman — Ogontz Campus, 717-386-9400)

1. Review of Eight-Week Drop Rule

COMMITTEE ON ADMISSIONS, RECORDS, AND SCHEDULING

(John E. Ayers, Chairman — 211 Buckhout Lab, 865-7776)

1. Special admissions programs (Judd Arnold, S-232 Burrows, 865-9445)

2. Improvements in registration process

3. Review of new admissions policies

COMMITTEE ON CONTINUING EDUCATION

(James J. Bell, Chairman — Schuylkill Campus, 717-385-1500)

1. Delegation of approval authority for non-credit courses

2. Graduate study by correspondence

3. Teacher education courses

4. Recognition of faculty participation in Continuing Education activities

5. Financial assistance to non-degree students

6. Continuing Education program development funds for college budgets

COMMITTEE ON CURRICULAR AFFAIRS

(Stuart H. Mann, Chairman — S-126 Human Development, 865-1467)

1. Criteria for continued evaluation of courses

2. Definition of course level numbers (e.g., 100 vs. 300 vs. 400)

3. Review of large enrollment service courses

4. Review of cross listed courses

COMMITTEE ON EXTENDED DEGREES

(Albert N. Skomra, Chairman — Fayette Campus, 412-437-2801)

1. Revised guidelines and procedures

COMMITTEE ON EXTERNAL AFFAIRS

(Ernest L. Bergman, Chairman — 200 Tyson, 865-6594)

1. The image of Penn State to the Commonwealth

2. Legislative contacts

COMMITTEE ON FACULTY AFFAIRS

(Philip A. Klein, Chairman — N 257 Burrows, 865-5781)

1. Part-time faculty (E. H. Klevans, 231 Sackett, 865-1343)

2. Promotion and tenure (Peter Gold,

150 A. Davey, 865-7694)

3. Faculty rights and responsibilities (R. E. Malcolm, 409 Bus. Adm., 863-0707)

4. Governance (R. A. Smith, 101 White Bldg., 865-7591)

COMMITTEE ON INTRA-UNIVERSITY RELATIONS

(Walter B. Severs, Chairman — College of Medicine, 717-534-8289)

1. Delegation of responsibility and authority to college and campus faculty organizations

2. Discussions on part-time faculty (E. H. Klevans, 231 Sackett, 865-1343)

COMMITTEE ON LIBRARIES

(Manfred Kroger, Chairman — 104 Borland, 865-5444)

1. Library finances

2. Alternate ways of serving the University community with limited resources

COMMITTEE ON PLANNING AND DEVELOPMENT

(John J. Cahir, Chairman — 620 Walker, 865-0478)

1. Long range study of Penn State as a center for academic quality in the 1980s

2. Necessity for resource allocation impact statements for Senate legislation

COMMITTEE ON RESEARCH

(Thomas D. Larson, Chairman — Research Bldg., "B", 865-1891)

1. The climate for research at Penn State

COMMITTEE ON STUDENT AFFAIRS, AWARDS, AND SCHOLARSHIPS

(Arthur E. Goldschmidt, Chairman — 603 Liberal Arts Tower, 863-0061)

1. Services to part-time and non-traditional students

2. Procedures for student organization activation and deactivation

3. International students

COMMITTEE ON UNDERGRADUATE INSTRUCTION

(George W. Franz, Chairman — Delaware County Campus, 215-565-3300)

1. Role and function of advisors

2. Recognition of effective teaching and advising

3. Implementation of new retention and transfer policies

4. Implementation of new guidelines for student evaluation of courses and instructors

5. Long range study of the future of undergraduate instruction

BACCALAUREATE DEGREE REQUIREMENTS REVIEW COMMITTEE

(Thomas D. Larson, Chairman — Research Bldg., "B", 865-1891)

(Review of the baccalaureate degree general education requirements)

Penn Staters

Three members of the faculty participated in a joint meeting of the American Association of Teachers of Spanish and Portuguese and the European Association of Spanish Professors, held Aug. 8 through 17 in Madrid. **Dr. Martha T. Halsey**, associate professor of Spanish, read a paper entitled "Martín Recuerda's 'Las arcaicas del Beaterio de Santa María Egipciaca': A Contemporary Celebration of Mariana de Pineda and Her Sisters." **Dr. Robert P. Lima**, professor of Spanish and comparative literature, participated in a symposium on Cuban literature, and **Dr. Gerald Moser**, professor of Romance languages, read a paper entitled "Relaciones da Literatura Africana de Expressao Portuguesa." **Dr. Moser** also took part in a panel discussion on Iberoamerican literature reference books.

Robert E. Andreyka, head, Division of Occupational and Vocational Studies, directed a two-day awareness workshop on Competency Based Instruction for the Department of Education, San Juan, Puerto Rico, during the month of June.

Gerald R. Bodman, assistant professor of agricultural engineering extension, has been elected first vice-president of the North Atlantic Region—American Society of Agricultural Engineers. The region is made up of over 1,000 agricultural engineers from the 12 northeastern states, District of Columbia, and six eastern Canadian provinces.

Dr. Gideon Golony, professor of urban and regional planning, presented a paper at the International Conference for Mathematical Modeling, held at St. Louis Aug. 20 to Sept. 1. **Dr. Golony's** presentation was titled "Quantitative Method for Site Selection of a Regional Shopping Center."

Raniero Corbelli, professor and head of the Department of Architecture, has been named to the State Board of Examiners of Architects. The five-member board is responsible for licensing of professional architects in Pennsylvania. Other duties include assisting the Department of State of the Commonwealth in fiscal and other matters related to professional and occupational affairs, conducting hearings and investigations of alleged violations of the Architects' Law, and taking appropriate disciplinary action in regards to such violations.

The Cessless Wind, An Introduction to the Theory of Atmospheric Motion by **Dr. John A. Dutton**, professor of meteorology, has been selected as one of the outstanding academic books of 1976 by *Choice* magazine. The magazine, published by the Association of College and Research Libraries, a division of the American Library Association, annually chooses outstanding books to add libraries find "works of enduring value."

Dr. Eugene N. Borza, associate professor of history, is one of four Americans who will present papers at the Third International Symposium on Ancient Macedonia in Thessalonica, Greece, this fall. **Dr. Borza's** subject will be "The Symposium at Alexander's Court."

Research for the paper was completed at the Center for Hellenic Studies in Washington, D.C., while **Dr. Borza** was a research fellow of the Institute for the Arts and Humanistic Studies. A specialist in the history of Alexander the Great, **Dr. Borza** attended the previous Macedonian conference in 1973, and will travel for the second time as a recipient of an American Council of Learned Societies grant sponsoring participation in major international meetings.

Appointments

R. Michael Alliston as assistant professor of mathematics at Mont Alto. B.A., Rice U.; M.S., Ph.D., U. of Virginia. Formerly assistant professor, Northern Illinois U., DeKalb.

Glen H. Helman as assistant professor of philosophy. B.A., Oakland U.; M.A., U. of Pittsburgh; Ph.D. candidate, Pitt.

Stephen B. Knouse as assistant professor, Division of Social and Behavioral Sciences at Behrend College. B.A., M.A., Southern Methodist U.; Ph.D. candidate, Ohio State U.

Deborah B. Shaw as assistant professor of classics. B.A., Tufts U.; M.A., UC-Berkeley; Ph.D. candidate, Berkeley.

Judith Van Herik as assistant professor of religious studies. B.A., M.A.T., A.M., U. of Chicago; Ph.D. candidate, Chicago.

Kathryn M. Moore as associate professor of education and research associate, Center for the Study of Higher Education. B.A., B.S., M.A., Ohio State U.; Ph.D., U. of Wisconsin-Madison. Formerly assistant professor, Cornell U.

Richard P. Perkins as associate professor and head, Division of Maternal-Fetal Medicine, at Hershey. A.B., Hamilton College; M.D., Columbia College of Physicians and Surgeons. Intern, Strong Memorial Hospital; resident and chief resident, Ob/Gyn, Columbia-Presbyterian Medical Center. Previously, assistant professor, U. of Colorado School of Medicine.

William C. Stringer as assistant professor of agriculture. B.S.A., M.S., U. of Georgia. Ph.D., expected in August, from Va. Polytechnic Institute and State U.

Michael L. Tierney as research associate, Center for the Study of Higher Education. B.A., M.A., UC-Santa Barbara; Ph.D., UCLA.

Robert D. Weaver as assistant professor of agricultural economics. B.A., Carleton College; M.S., Ph.D., U. of Wisconsin-Madison.

Joseph L. Wysocki as associate professor of housing extension. B.S., Drexel U.; M.S., Penn State; Ph.D., Cornell U. Previously, assistant professor, Indiana U. of Pa. and Va. Polytechnic Institute and State U.

Paul F. Fairbrother as assistant professor of obstetrics and gynecology at Hershey. B.A., Balliol College, U. of Oxford; B.M.B.Ch., Oxford U. of Bristol; M.A., Oxford; M.R.C.S., L.R.C.P., Royal College of Surgeons and Physicians; M.R.C.O.G., Royal College of Obstetricians and Gynecologists. Formerly research director, senior lecturer, U. of Natal Medical School, Durban, S.A.

John W. Furlow Jr. as assistant professor of history at DuBois. B.A., Middlebury College; M.A., U. of Michigan; Ph.D., U. of North Carolina at Chapel Hill. Formerly assistant professor, Wilkes College; caseworker, Family Service Assn., Wilkes-Barre.

Anna H. Gajjar as assistant professor of education at University Park. B.A., Hunter College; M.Ed., Ph.D., U. of Virginia. Formerly elementary school teacher; continuing education instructor, U. of Virginia.

Bruce K. Coulvey as assistant professor of business administration. Sc.B., Brown U.; Ph.D., U. of Pittsburgh.

G. Elwood Hatley as associate professor of agronomy at University Park. B.S., M.S., North Carolina State U.; Ph.D., Purdue U. Formerly assistant professor, U. of Guelph, Canada.

Kathryn Hume as associate professor of English at University Park. A.B., Radcliffe College; Ph.D., U. of Pennsylvania. Formerly assistant professor of English, Cornell U.

Retirements

Dr. Lawrence S. Darken, professor of mineral sciences since 1972, has retired. From 1962 to 1971, **Dr. Darken** headed the Edgar C. Bain Laboratory for Fundamental Research at U.S. Steel Corporation. He first joined U.S. Steel in 1935. From 1944 to 1953, he was also instructor and adjunct professor at Brooklyn Polytechnic Institute.

A member of the National Academy of Sciences since 1961, he has done pioneering work in the thermodynamics and kinetics of metallurgical systems. Last year, the Darken Conference on Physical Chemistry in Metallurgy, sponsored by U.S. Steel at its Monroeville research laboratory, was held in his honor and attended by more than 300 experts in the physical chemistry of metallurgy from ten countries.

Dr. Darken is a fellow of the American Society for Metals, the American Association for the Advancement of Science, the American Institute of Chemists, the New York Academy of Sciences, the Metallurgical Society (AIME), and the Royal Society of Arts (London), a life fellow member of the Franklin Institute, Philadelphia, and a distinguished member of the Iron and Steel Society (AIME).

He received his B.A. degree from Hamilton College in 1930 and his Ph.D. from Yale in 1933.

Dr. C. Wilson Anderson, former commissioner for children and youth in the Pennsylvania Department of Public Welfare, has retired from the University with the rank of professor emeritus of social welfare. He came to Penn State in 1972 as a professor of social welfare and head of the Center for Human Services Development.

A 1934 Penn State graduate, **Dr.**

Mary Jane Irwin as assistant professor of computer science at University Park. B.S., Memphis State U.; M.S., Ph.D., U. of Illinois.

James A. Kurre as assistant professor of economics at Behrend College. B.A., U. of Cincinnati; M.A., Wayne State U.; Ph.D. candidate, Wayne State.

Christiane J. Makward as assistant professor of French at University Park. Lic. Sorbonne; Dip. Et. Sup., U. of Dakar; Doct. 3e Cycle, Sorbonne. Formerly lecturer, U. of Ibadan, Nigeria; U. of Wisconsin at Madison.

Richard Mayhew as assistant professor of art at University Park. Art Students League and Brooklyn Museum Art School. Formerly instructor, Pratt Institute; assistant professor, Smith College; Hunter College and San Jose State U.

Zena B. McGlashan as assistant professor of journalism at University Park. B.A., U. of Montana; M.A., California State U.; Ph.D. candidate, U. of Iowa. Formerly Home Living editor, Albuquerque Journal.

Amy A. Atkinson as instructor of health and physical education at Behrend College. B.A., Muskingham College; M.A., Kent State U. Formerly assistant sports information director, Muskingham.

David J. Beattie as assistant professor of agriculture at University Park. B.S., U. of Rhode Island; M.S., U. of Vermont; Ph.D., Michigan State U. Formerly research scientist, Canadian Dept. of Agriculture; director, Stanley Rowe Arboretum, Cincinnati; high school teacher, Fair Haven, Vt.

Allen C. Bloodorn as assistant professor of organizational behavior at University Park. B.S., M.A., Ph.D., U. of Iowa.

Dr. C. Wilson Anderson

Anderson received master of social work and doctor of social work degrees at the University of Pennsylvania and a law degree from the William Mitchell College of Law in St. Paul, Minn.

He served as director of home service for the Boston Metropolitan chapter, American Red Cross; as director of the Family Court for New Castle County in Wilmington, Del.; and as executive director of the Family and Children's Service, Minneapolis, Minn.

He was commissioner for children and youth in the Pennsylvania Department of Public Welfare from 1959 to 1966, when he became dean of the University of North Carolina's School of Social Work. Prior to joining the Penn State faculty, he headed the Center of Human Services in Cleveland, Ohio.

Following his retirement, effective Aug. 12, **Dr. Anderson** joined the faculty of Southern Illinois University, where he is assisting in the development of a graduate school of social work.

Sidney D. Berman as assistant professor of business administration at New Kensington. B.A., Gettysburg College, M.B.A., U. of Pittsburgh; Ph.D. candidate U. of Pittsburgh. Formerly staff auditor, Coopers and Lybrand, Boston, Mass.; financial analyst, Ketchum, MacLeod and Grove, Pittsburgh; assistant professor, Clarion State College.

Ronald W. Butler as assistant professor of statistics at University Park. B.S., Ph.D., U. of Michigan. Formerly, acting instructor, U.C.-Berkeley.

Peter J. Campbell Smith, assistant professor of biological chemistry and director of the Research Computer Facility at Hershey. B.Sc., Ph.D., U. of Edinburgh, Scotland. Formerly visiting assistant professor of biology, Purdue U.

Chan K. Chung as assistant professor of radiology, at Hershey. B.S., M.D., Yonsei Pre-Medical College, Seoul Intern, Long Island College Hospital; resident, Brooklyn-Cumberland Medical Center; resident and fellow, Jefferson University Hospital. Formerly assistant professor of radiology, U. of Virginia Hospital.

Department of Public Information and Relations

University Park, Pa. 16802
Telephone: (814) 865-7517

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Second-class postage paid at State College, Pa. 16801

University Park Calendar

Sept. 22-Oct. 2

Special Events

Thursday, Sept. 22

5 O'Clock Theatre, Dexter, 5:30 p.m., The Playhouse.
Department of Spanish, Italian and Portuguese, Servando Carballar and Company, traditional Hispanic folk-songs and ballads, 8 p.m., Room 112 Kern. Free admission.

Friday, Sept. 23

Pass/fail deadline.
Board of Trustees meeting, Room 402 Keller.
5 O'Clock Theatre, Dexter, 5:30 p.m., The Playhouse.

Saturday, Sept. 24

College of Agriculture Hort Show, 10 a.m.-9 p.m., Ice Pavilion.
Sports: football, vs. Maryland, 1:50 p.m.
Friends of India film, *Mausam*, 7:30 p.m., Room 112 Kern.

Sunday, Sept. 25

College of Agriculture Hort Show, 9 a.m.-4 p.m., Ice Pavilion.
P.S.O.C. Hiking Division, joint trail clear with Bucknell Outing Club on R. B. Winter extension in Bald Eagle State Forest, free picnic supper, 9 a.m., HUB parking lot.
University Chapel service, Gordon C. Godbey, 11 a.m., Eisenhower Chapel.
Sports: women's cross country, Lady Lion Invitational.

Shaver's Creek Nature Center, animal homes and signs walk, 2 p.m., Stone Valley.
Opening reception for Faculty Exhibition, 3-5 p.m., Zoller Gallery.

Monday, Sept. 26

Drop deadline.
Pass/fail deadline.
Coarse repeat deadline.
Reregistration deadline for winter term, 1978.
Intramural sports: men's graduate student and faculty/staff handball singles (round robin) and volleyball (round robin), entry open.
Entry close, Sept. 29.
france-cinema, *Duvivier, Pepe le Moko* (1937), the original Casbah movie, starring Jean Gabin, 7 and 9 p.m., Room 112 Kern.

Tuesday, Sept. 27

Last date for written foreign language examinations (other than French and Spanish) for advanced-degree candidates.
Comp. Lit luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club, John Kaiser.
Sports: field hockey, vs. Lock Haven, 3 p.m., soccer, vs. West Chester, 7 p.m.
Artists Series, Lloyd film, *The Freshman*, 8 p.m., Eisenhower Auditorium.
Sigma Delta Epsilon meeting, 8 p.m., Room 101 Kern.

Wednesday, Sept. 28

Arab Club lecture, 7:30 p.m., Room 101 Kern.
C.S.A. Commencement Theatre, *The Big Sleep*, 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, Sept. 29

Sports: women's tennis, vs. Mary Baldwin, 9:30 a.m.
Faculty Women's and Newcomers Clubs fall reception, 7:30-9:30 p.m., Rooms 101 and 102 Kern.

Friday, Sept. 30

Sports: j.v. football, vs. Fork Union, 2 p.m.
Artists Series, Vienna Choir Boys, 8:30 p.m., Eisenhower Auditorium.

Saturday, Oct. 1

Last date for Nov. graduates to deliver doctoral theses to Committee.
Outdoor pool closes officially, possibly open on a temporary basis, depending on weather.
P.S.O.C. Hiking Division, backpack on Pine Creek in Tiadaghton State Forest, through Sunday.

Sports: football, vs. Kentucky, 1:30 p.m.

Sunday, Oct. 2

University Chapel service, Richard Shaull, Princeton Theological Seminary, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, pods, prickles, and parachutes, 2 p.m., Stone Valley.

Seminars

Friday, Sept. 23

Analytical Chemistry, J. David Stuts on "Redox Equilibria of Inorganic Aqueous Sulfur Species," 11:10 a.m., Room 333 Whitmore.
Applied Research Laboratory, Frederick R. Stocker on "Computer Graphics and Acoustics: The Interaction," 2:30 p.m., Walker Conference Room, Applied Science Bldg.
Physical Chemistry, J. S. Lannom on "Raman Spectroscopy as a Probe of the Amorphous State," 4 p.m., Room 333 Whitmore.

Monday, Sept. 26

Biochemistry/Biophysics, Daisuke Nakada, University of Pittsburgh, on "Recent Progress in Plasmid Research: R Plasmids (Extrachromosomal Genetic Elements) Confering Drug Resistance to the Host Bacterial and Genetic Engineering," 3:55 p.m., Room 101 Althouse.

Tuesday, Sept. 27

Biochemistry/Biophysics, Daisuke Nakada, University of Pittsburgh, on "Transcriptional Control of R Plasmid Gene Expression," 11:10 a.m., Room 101 Althouse.
Air Pollution Control, Fred Osman, Pa. DER, Harrisburg, on "Pennsylvania Ambient Air Monitoring Networks," 2:20 p.m., Room 140 Fenske.
Engineering Science and Mechanics and Bioengineering, D. McQuern, New York University, on "Blood Flow Through Heart Valves," 4 p.m., 232 Hammond Bldg.
Inorganic Chemistry, William DeW. Horrocks, Jr. on "Lanthanide Ions as Probes in Chemistry and Biology," 8 p.m., Room 333 Whitmore.

Wednesday, Sept. 28

Bio/Inorganic Chemistry, Bernard T. Golding, University of Warwick, Coventry, England, on "Approaches to Enzyme Mechanisms. Stereochemical and Model Studies (Vitamin B₁₂)," 11 a.m., Room 333 Whitmore.
Fuel Science, Daniel J. Serer, United Aircraft Research Laboratories, East Hartford, on "Probe Sampling of Laboratory Flames," 4 p.m., Room 301 Mineral Industries.

Thursday, Sept. 29

Ceramic Science, S. Mahajan, Bell Telephone Labs. on "The Formation of Sucking Faults and Deformation and the Behavior of Silicon Containing Oxygen," 11 a.m., Room 301 Mineral Industries.

Chemistry, Russell N. Grimes, University of Virginia, on "Structures of Cage and Cluster Compounds: An Emerging Underlying Unity," 12:45 p.m., Room 333 Whitmore.

History Colloquium, Merritt Roe Smith, Ohio State University, on "Technology and the American Dream," 2:30 p.m., Room 301 HUB.
Physics, Samuel Williamson, New York University, on "The New Animal Magnetism," 3:50 p.m., Room 117 Osmond.
Meteorology, Joachim Joseph, Tel-Aviv University, on "Experiments with the Near Gem Using Radiative Parameterization of Natural Aerosols," 4 p.m., Room 112 Walker.
Microbiology/Cell Biology, S. Takahashi, McGill University, on "Identification and Purification of the *rep* Gene Protein of *E. coli*," 4 p.m., Room 52 Frear.
Philosophy, Robert Price on "The Philosophical Importance of Aristotle's *Categories*," 4 p.m., Room 174 Willard.

WPSX Highlights

Guest conductor Zubin Mehta leads the New York Philharmonic in a live concert of Mozart, Wagner, and Stravinsky on Live from Lincoln Center, Saturday, Sept. 24, at 8:30 p.m. Shirley Verrett is the soloist.

Murder One, Sunday, Sept. 25, at 11 p.m., looks at the issue of capital punishment through the eyes of six convicted murderers, their families, and the families of their victims. Of the six, only three now face the possibility of execution. They are doing time on Death Row in a Georgia prison.

John Kenneth Galbraith takes viewers into the rich, gaudy panorama of nineteenth-century capitalism — "a museum of the higher primates" — on **The Age of Uncertainty**, Monday, Sept. 26, at 9 p.m. Examining the manners and morals of the robber barons and railroad magnates, the noted economist draws a parallel between the early capitalists and organized crime in the twentieth century. The program is part of a credit course through The Pennsylvania State University of the Air.

The American free press has been extolled as the bulwark of all American liberties.

Friday, Sept. 30

History Colloquium, Merritt Roe Smith, Ohio State University, on "Technology Assessment from the Stance of a 19th Century Historian: Military Technology and the Industrial Revolution," 10:45 a.m., Applied Research Lab.

Exhibits

Anthropology Museum: Tuesday and Thursday, 9 a.m.-noon, and Wednesday, noon-5 p.m. Central American and Mexican Pre-Columbian exhibit: ethnographic artifacts from Ethiopia.

Chambers Gallery: Janet Tracy and R. H. Grinstead, prints and collages, opens Sept. 26.

Earth and Mineral Sciences Museum: Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m.

Frost Entomological Museum: weekdays, 9 a.m.-noon and 1-4:30 p.m. Gypsy moth exhibit.

HUB Gallery: Smithsonian Institution exhibit, "The Scent of American Invention," the development of American chaimaking, closes Sept. 25; Bruce Schwabach, paintings, closes Sept. 30; Homecoming exhibit, opens Oct. 1.

Kern Commons Gallery: prints by faculty and graduate students; Walter Benson, photographs; Nancy Norton, stained glass, all through Oct. 1. Michael Ondlik, photographs; Les Richel, wood sculpture; multimedia Fire Prevention Week exhibit, all open Oct. 1.

Museum of Art: noon-5 p.m., daily, closed Monday. Museum tours, Sunday, 2:30 p.m. Arne Jacobsen, Danish architect and designer; William Cullen Bryant collection; contemporary stage design.

Museum of Art HUB Gallery: Esmark collection of Currier and Ives prints.

Pattee Galleries: Bob Andriulli; Steve Marvill, color photography.

Zoller Gallery: Faculty exhibition, opens Sept. 24.

Charles Frankel examines his claim as the "first freedom" on **In Pursuit of Liberty**, Monday, Sept. 26, at 10 p.m. "It simplifies, it sensationalizes, it often gives us one-sided stories," says Frankel. "Is it possible that this 'first freedom' of ours is somewhat overrated?"

Mandatory retirement — its problems for employers and employees — is the subject of **Takabaut**, Tuesday, Sept. 27, at 7:30 p.m. Appearing on the program are Charles Taylor, professor of human development and psychology, and Fred Eisele, assistant professor of social policy in the division of community development at Penn State.

Education is the subject of a panel discussion on **The Benjamin Franklin Symposium** Wednesday, Sept. 28, at 10 p.m. Appearing on the panel are Senator Jeanette F. Reisman and Representative G. Sieber Pancoast, who represent the education committee of the state legislature. Jacques Angle, president of the Pennsylvania State Education Association, and Albert Unger, director of government relations for the Pennsylvania State Board Association.

News in brief

(Continued from page 1)

one-fourth of his class; be a U.S. citizen; and have selected an undergraduate major that will permit admission to a graduate program leading to a career in government.

A letter of application, an up-to-date transcript, three letters of recommendation and a paragraph outlining career plans should be submitted to Dr. Robert S. Friedman, 107 Burrows Bldg., (865-7515) before the deadline.

College marks anniversary

A series of special events and programs highlighting the importance of human services are planned for the tenth anniversary celebration of the University's College of Human Development Oct. 9 to 11.

State and national leaders in the human service field are being invited to the observance, which will feature a series of recognized speakers in each of the college's four academic divisions and the Institute for the Study of Human Development.

In addition to the speakers, the celebration, which is open to the public, will feature a special program sponsored by the College of Human Development Alumni Association. Twenty-five alumni who have been serving as field practicum supervisors for University students will participate.

As part of the observance, the annual Alumni Recognition Award will be presented on Tuesday, Oct. 11.

Seminar planned

The Faculty Affairs Committee of the University Faculty Senate is sponsoring a seminar for the ombudsmen who represent each voting unit within the University, beginning at 11:15 a.m. on Tuesday, Oct. 4. It will be held in the Penn State Room at the Nittany Lion Inn.

For additional information or to make reservations, ombudsmen may contact the Faculty Senate Office (865-0221).

Club schedules reception

The Faculty Women's Club and the Newcomers Club will hold their annual fall reception from 7:30 to 9:30 p.m. on Thursday, Sept. 29, at Kern Graduate Bldg. All faculty women and wives of University faculty are invited to attend.

At the reception, an informal punch party, members will be invited to sign up for the interest groups sponsored by both organizations. Interest group chairmen will set up exhibits describing each group's activities and will be present to answer questions.

Additional information is available from Mary Eagleton, chairman of the reception, at 238-2970.

Folk, square dances set

Three Folk and Square Dance Roundups have been scheduled for the Fall Term and will be open to all faculty, staff and students and their families. They are sponsored by the College of Health, Physical Education and Recreation.

Each roundup will be held from 7:30 to 9 p.m. in Room 133 of White Bldg. The dates are Friday, Sept. 30, Friday, Oct. 14, and Friday, Nov. 4.

Still some Free U openings

Although Free University registration was held earlier this week, it is still possible to sign up for some courses. For additional information, or a Free U course list, call 863-0038.

Fall reception planned for Forum on Black Affairs

The Forum on Black Affairs will hold its fourth annual fall reception for Black faculty, staff and graduate students from 7:30 to 9:30 p.m. this evening (Sept. 22) at the Paul Robeson Cultural Center.

Guest speakers will be Dr. Warren Coleman, assistant professor of physical education, discussing Black life at Penn State and in the Centre region, and Roosevelt Green Jr., assistant to the dean of the Graduate School for minority recruitment. Mr. Green will discuss the effort to recruit Black graduate students.

The executive committee of the Forum, headed by the Rev. Charles Coleman, Forum president, will discuss plans for the coming year. A fellowship hour will conclude the meeting from 8:30 to 9:30 p.m.

Scripts sought for TIPS

The coordinators of a new information service for students, to go into operation Jan. 1, are inviting all University faculty and staff to consider preparing scripts in their specialty areas to be included in the system.

To be known as TIPS (Telephone Information Programs), it will be operated through Listening-Learning Services and will make the answers to a number of questions students frequently ask as close as the nearest telephone. A phone call to the TIPS library will allow students and others to hear a pre-recorded tape on any one of many subjects, ranging from financial aid to the requirements for specific majors. The tapes will be approximately three to five minutes in length.

According to Willard Martin, the director of Listening-Learning Services, the TIPS coordinators are looking for questions that can be answered concisely and objectively in the general areas of undergraduate studies and student affairs. Scripts are being written now, and will be reviewed extensively before they are recorded.

Anyone who would like to suggest an idea for a script should contact Dr. Martin (865-1325), James Kelly, TIPS academic information coordinator (865-7576), or Mary Ann Sagarita, TIPS student affairs coordinator (865-3491).

Weekly meat sales resume

Weekly meat sales at the University Meats Laboratory have resumed, now that Fall Term classes are underway. The lab, which is located across Fox Hollow Road from Beaver Stadium, will be open for the sale of a variety of meat cuts from 1:30 to 4 p.m. every Friday.

Photography exhibit includes scenic views of Pennsylvania

"The Quiet Moment," an exhibition of photographs of Walter Benson, of Harrisburg, opened in the Commons Gallery, Kern Graduate Bldg., on Sept. 17. It will continue through Saturday, Oct. 1.

Mr. Benson's photographs depict the serenity of rural America, and the exhibit includes several scenic views of the Central Pennsylvania area.

A graduate of the Leica School of Photography, Mr. Benson is also a graduate of the University of Oklahoma and holds an M.S. from Syracuse University.

He was the organizer and the first president of the Central Pennsylvania Industrial Photographers Association.

The first photographer to exhibit at the William Penn Museum in Harrisburg, he has also exhibited his work at the University of Oklahoma, Syracuse University, the Jewish Community Center in Harrisburg, the Hershey Educational Center at Hershey, and in other Central Pennsylvania galleries.

Affirmative Action notice posted

The following notice, provided by Affirmative Action officers, will be published in two consecutive issues of *Intercom* and *The Reporter*, in compliance with Section 503 of the Rehabilitation Act of 1973.

The Pennsylvania State University is a government contractor subject to Section 503 of the Rehabilitation Act of 1973, which requires government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals.

We need your help in assuring compliance with the affirmative action guidelines established by Section 503 of the Rehabilitation Act of 1973. If you have a physical or mental impairment, a record of having had such an impairment, or are regarded as having an impairment that substantially limits your ability to secure, retain or advance in employment, we would like to include you under the Affirmative Action Program.

It will assist us in proper placement and appropriate accommodations if you tell us about (a) any special methods, skills, or procedures which qualify you for jobs that you might not otherwise be able to do

because of your handicap, so that you may be considered for any positions of that kind, and (b) possible accommodations which could be made which would enable you to perform the job properly and safely.

Submission of this information is voluntary and refusal to provide it will not subject you to discharge or disciplinary treatment. Information obtained concerning individuals shall be kept confidential, except that (1) supervisors and managers may be informed regarding restrictions on the work-duties of handicapped individuals, and regarding necessary accommodations, (2) first aid and safety personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment, and (3) government officials investigating compliance with the Act shall be informed.

The Affirmative Action Office is responsible for coordination of compliance with the requirements of Section 503.

To be included in the Affirmative Action Program, call 863-0473 and additional data will be sent to you.

Funding Sources

For further information, call 865-1372

Q387-3 A summary of November deadline dates follows. Specific information is available.

(1) **Arts/Humanities International** — ACLS recent PhD research fellowships, postdoctoral study fellowships; George Marshall Scandinavian fellowships; IIE graduate study abroad; IREX USIB graduate student, senior scholar, and secondary education scholar exchange; George Marshall German fellowships, NEA literary magazine, 1467 grants to composers, librettists, and translators; NEH research materials, education pilot and project grants, E&S education; Smithsonian foreign currency program.

(2) **Education/Human Development** — CLR library fellowships; NIE education research; OE doctoral dissertation, faculty research abroad; foreign curriculum consultants, group projects abroad.

(3) **Science/Energy** — NAS Eastern Europe exchange programs; NSF US-France exchange of scientists; Student oriented studies.

(4) **Health/Mental Health** — FDA food research grants; HRA nurse practitioner, advanced nurse training, nurse training improvement, long term care research, nursing research projects, D&D grants, emergency medical services research-health manpower research; NIDA alcohol dependence research, research centers; NIDA drug addiction and abuse research; NIMH studies, aging and epidemiology research; NIH biotechnology research, clinical and biomedical research, lab animal research; NCI cancer control, clinical education, NEI vision science research; NHLBI pulmonary research, prevention and control; NIA cellular aging research; NIAMD diabetes; NIDR dental research; NIEHS environmental and genetic research; NIGMS anesthesiology, pharmacology, toxicology, trauma and burn; NIM future resources and publication; NINCDS regeneration research. (Ref. OPF Nov. Deadline Dates)

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been exempted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Sept. 29. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS — Beaver. Responsible to Dean of Student Affairs for the administration and coordination of student aid programs and part time and summer student employment, for the coordination of special programs and services for veterans' affairs and for student recruiting. Master's degree in student personnel or other related fields, plus up to one year directly related experience or Bachelor's degree with two to three years directly related experience.

ASSISTANT PROGRAM/BUDGET ANALYST, OFFICE OF BUDGET AND PLANNING — University Park. Assist in developing data and analytical frameworks for the evaluation of program budget needs, effectiveness of resource utilization and program performance in meeting identified objectives for all major elements of the University program areas. Bachelor's degree in accounting/economics or other related field or from one to two years of directly related experience is required. Position available only until June 30, 1978.

Transitional dates set for heating, cooling systems

Fall "transitional dates" for University air conditioning and heating systems have been established by the University's executive energy conservation committee.

The following approximate dates have been determined:

Residence Halls and Ritenour Health Center — Heat has been available since the start of Fall Term.

Academic and administrative buildings — Comfort air chillers were turned off Sept. 15; heat will be available Sept. 24.

Research areas — Chillers were turned off Sept. 21, unless needed.

Computer Center and computer areas in Shields Bldg. — Chillers will be turned off Oct. 17.

According to Ralph E. Zilly, vice president for business and chairman of the committee, the dates were based on a

study of 30 years of hourly temperature history, supplied by the Department of Meteorology.

Mr. Zilly notes that some minor problems can be expected with systems that have been off for three months, and that all problems should be reported to the Maintenance and Operations Service Desk, 865-4731.

Faculty Club to meet

The fourth annual meeting of the Penn State Faculty Club will be held at 8 p.m. on Wednesday, Oct. 5, in Room 101 Kern Bldg. Reports of the last year's activities will be presented by the officers and committee chairmen.

Reports will also be given on current activities. Dinner will be available at the club prior to the meeting. Reservations are encouraged but not necessary.

Penn State Intercom

Dr. Benson

Benson to present E.A. Day lecture

Andrew A. Benson, professor of biology at Scripps Institution of Oceanography and a former faculty member at Penn State, will deliver the 1977 E. A. Day Memorial Lecture in Food Science.

The lecture, which is open to the public, will be given at 11 a.m. on Monday, Oct. 10, in Room 112, Kern Bldg. It will be entitled "Oceanic Food Chains and Challenges."

The Edgar Allan Day Lecture, sponsored by the Department of Food Science, honors an alumnus of the University (M.S. '55, Ph.D. '57) who was widely known for his research in flavor chemistry. He was executive vice president of International Flavors and Fragrances Inc. at the time of his death in 1972.

Dr. Benson, a member of the National Academy of Sciences, received a B.S. in chemistry from the University of California, Berkeley, in 1939, and a Ph.D. in organic chemistry and neurophysiology from California Institute of Technology in 1942.

In addition to faculty appointments at the University of California, Berkeley (1942-43 and 1946-54), and Stanford University (1944-46), he served as associate professor and professor of agricultural and biological chemistry at Penn State from 1955 to 1961. Prior to his appointment at Scripps, a unit of the University of California, San Diego, he was professor-in-residence in the medical school at UCLA during 1961-62.

In addition to his research and teaching responsibilities at Scripps, Dr. Benson has served as chairman of the Marine Biology Research Division (1965-71), associate director for biology (1966-70) and director of the Physiology Research Laboratory (1970-76). He has helped to organize and direct marine biology research expeditions to many areas of the world.

For his discovery of the intermediates of sucrose synthesis in plants, Dr. Benson was the recipient, together with Melvin Calvin, of the Sugar Research Foundation Award for 1950. He was awarded a Fulbright Lectureship at the Agricultural College of Norway for 1951-52. He received the Lawrence Award of the Atomic Energy Commission in 1962 for his development of radiotracer methods in biology.

News in Brief

First figures show 52,815 enrolled

Preliminary registration figures for the fall term at the University show an enrollment of 52,815 at all locations and 31,793 at University Park.

Compared with incomplete figures of a year ago, the enrollment for the current year shows a gain of 168 at University Park and a decrease of 233 in total figures. King of Prussia Graduate Center and Capitol Campus at Middletown also reported gains.

Incomplete totals, as of Sept. 14-15, were 31,793 at University Park; 16,146 at the Commonwealth Campuses; 1,599 at Behrend College; 308 at King of Prussia Graduate Center; 478 at The Milton S. Hershey Medical Center; and 2,491 at Capitol Campus.

The figures also show an enrollment of 38,694 baccalaureate degree candidates; 3,592 associate degree candidates; 6,379 graduate and medical students; 1,748 nondegree students; and 2,402 provisional students.

Final figures for the fall term, including all late registrations, will be published later.

University Council requirements revised

Acting on a University Council recommendation endorsed by President Oswald, the trustees have approved a revision of membership requirements for the Council.

The revision will permit faculty members from Behrend College at Erie, Capitol Campus at Middletown, and The Milton S. Hershey Medical Center at Hershey, and fourth-term students from the University Park Campus to be eligible to join the Council.

Formerly, seventh-term standing was required for student eligibility for appointment to the Council. In a biennial review of the organization and operation of the Council, however, it was noted that many of the most effective student members have been those who have served for more than one year-term.

The composition of the Council remains basically unchanged and includes the provost, two deans of the colleges, one director from a campus other than University Park, and four tenured members of the faculty, three from the University Park Campus and one from a campus other than University Park. Student members will now include two students with the status of fourth term or above, representing the undergraduate students at the University Park Campus; one graduate student; and one undergraduate student representing the students at campuses other than University Park.

The Council was established in 1970 by the Board of Trustees to serve as a broad advisory group to the president of the University; to provide a means of communication among administrative officers of the University, the faculty, and students; and to bring together the leaders of the University community to consider and review in depth significant matters.

Detail from "The Peter Snyder House" by Stuart Frost, professor of art, one of the exhibits from The Art Faculty Exhibition, on display at Zoller Gallery through Oct. 3.

VADD coverage may be changed

Since 1964, the University has offered a voluntary plan for accidental death and dismemberment insurance to all regular faculty and staff members. The plan provides optional amounts of insurance ranging from \$10,000 to \$150,000 and also provides accidental death and dismemberment coverage for dependents.

The month of October is the period when membership in this plan may be changed. One or more of the following actions may be taken during the month: (1) change the dollar amount of insurance coverage; (2) change from individual coverage to family coverage or vice versa; (3) enroll in the plan as a new member; (4) withdraw from the plan.

To accomplish any of the above changes, obtain and complete a new VADD enrollment card from your dean or administrative office and send it to the Employee Benefits Division, 133 Willard Bldg., by Oct. 31. All changes received by that date become effective Nov. 1.

If you should wish to check your present coverage, examine the section of your paycheck stub marked "VADD." The deduction will indicate the amount of coverage you have.

Coverage	Monthly Deduction	Biweekly Deduction
\$ 10,000	\$.50 single \$.70 family	\$.23 single \$.32 family
\$ 25,000	\$ 1.25 single \$ 1.75 family	\$.57 single \$.80 family
\$ 50,000	\$ 2.50 single \$ 3.50 family	\$ 1.15 single \$ 1.61 family
\$100,000	\$ 5.00 single \$ 7.00 family	\$ 2.30 single \$ 3.23 family
\$150,000	\$ 7.50 single \$10.50 family	\$ 3.46 single \$ 4.84 family

If you are unable to check in this manner, information about your coverage may be obtained from the Employee Benefits Division.

No action is needed to continue your current coverage without change.

Basic skills policy statement before Senate

The University Faculty Senate will be asked to reconsider a policy statement related to basic skills courses when it meets at 2:10 p.m. in Room 112 Kern Bldg. next Tuesday.

Because of a conflict between legislation passed by the Senate last spring and student financial aid requirements, the Senate Council will propose that the following policy statement be approved:

"Credits earned in English 4 and Math 198(R) shall be included in the cumulative grade point average. For a baccalaureate degree these credits shall be included in the total credits earned toward graduation, but shall not substitute for the minimum program requirements designated under the categories of 'Baccalaureate Degree Requirements,' 'Requirements for the Major,' and 'Electives.' For an associate degree these credits shall be included in the total credits earned toward graduation, but shall not substitute for the minimum program requirements unless approved by the program faculty."

The modified policy would replace legislation proposed by the Joint Presidential-Senate Commission to Study Remedial Education and approved at the March 1, 1977, Senate meeting. That legislation provided that:

"Courses that may be taken to remove deficiencies in the basic skills are to ensure the attainment of specific competencies as part of the student's program but may not be used to satisfy the basic minimum requirements for graduation in any baccalaureate degree program. Additionally, these courses may not be used in calculating grade-point averages in any baccalaureate degree program."

The change is being proposed because the Pennsylvania Higher Education Assistance Agency requires that students carry a minimum of eight credits per term which are applicable toward a degree and successfully complete a minimum of 24 credits per academic year. Balancing the current Senate policy with that requirement could present problems for a significant number of Penn State students, according to the Senate Council.

Senate will also hear an informational report from the Committee on Admissions, Records, and Scheduling on the reinstatement of baccalaureate students previously dropped as degree candidates.

Art historian to visit

Professor John Dixon Hunt, art and architectural historian from Bedford College in England, will visit the University Park Campus as a guest of the Institute for the Arts and Humanities Studies Oct. 3 to 5.

In addition to scheduled classroom visits, he will give three public lectures. The first, an illustrated lecture on Italian Renaissance villas and the English country home, is scheduled for 8 p.m. on Monday, Oct. 3, in Room 101 Kern Bldg. The second, a part of the English Colloquium,

(Continued on page 4)

Penn Staters

Dr. John Hardin Best has been appointed professor of education and head of the Division of Education Policy Studies in the College of Education. He previously served as chairman of the Department of Foundations of Education at Georgia State University in Atlanta.

Dr. Donald J. Willower, professor of education, served as acting head of the division until Aug. 1, the effective date of the appointment of Dr. Best.

Dr. Best, a graduate of Duke University, received an M.A. in history and Ph.D. in history of education from the University of North Carolina. He has taught at Mississippi Women's University, Rutgers University, and the University of Florida. He is the author of two books, *The American Legacy of Learning: Readings in the History of Education*, with Robert T. Sidwell, and *Benjamin Franklin on Education*. Dr. Best is president-elect of the American Educational Studies Association.

Dr. David T. Wilson, professor of marketing, has been named head of the Department of Marketing. He succeeds Dr. H. Lee Mathews, who resigned to become head of the Department of Marketing at Ohio State University.

Dr. Wilson, whose teaching and research interests focus on industrial marketing and decision-making processes, joined the University faculty in 1968. He spent the year prior to joining the faculty as the first American Marketing Association Fellow with Industry, serving as assistant to the president of American Standard Products, Canada.

A native of Canada, Dr. Wilson received the bachelor of science degree in mechanical engineering from Queen's University, and the master of business administration and doctor of philosophy degrees from the University of Western Ontario. He is the co-author of *The Distribution of Packaged Consumer Goods: An Annotated Bibliography*, as well as co-author, with Dr. Mathews and Dr. Ira Dolich, professor of marketing, of *Analysis and Decision Making: Cases for Marketing Management*.

Dr. Robert M. Stern, professor of psychology, has been named acting head of the Department of Psychology. He succeeds Dr. Merrill E. Noble, who has headed the department since 1967. Dr. Noble, on leave for the coming year, will continue as professor of psychology.

A graduate of Franklin and Marshall College, Dr. Stern received the master of science degree in psychology from Tufts University and the doctor of philosophy degree, also in psychology, from Indiana University at Bloomington.

He served as teaching and research assistant at Tufts University, as a research psychologist at Harvard University Medical School, and as a teaching and research assistant and teaching associate at Indiana. He joined Penn State's faculty in 1965.

Dr. James D. Hammond, professor of business administration, has been named the first William Elliott Faculty Fellow in the College of Business Administration. He will serve for the 1977-78 academic year.

The fellowship, made possible by Mr. Elliott, chairman of the Executive Committee of the Philadelphia Life Insurance Company, provides for special emphasis on the insurance industry and its business management.

Dr. Hammond, a faculty member at Penn State since 1964, is the author of *Essentials of Life Insurance*. He has been recipient or co-recipient of five Journal of Risk and Insurance awards for outstanding contributions to the insurance literature.

He is a 1955 graduate of Northwest Missouri State University, Maryville, Mo., an institution that honored him as a Distinguished Alumnus in 1976. He has served on the faculties at Ohio State University and the University of Pennsylvania, where he received his doctor of philosophy degree.

In addition, he was formerly president of the American Risk and Insurance Association and assistant editor of the *Journal of Risk and Insurance*. In 1967, he was a staff consultant to the Insurance Commission of the President's National Advisory Commission on Civil Disorders.

Dr. Frank Swetz, associate professor of mathematics and education at the Capital Campus, has been selected as one of 20 outstanding U.S. mathematics educators to be a member of a National Council of Teachers of Mathematics delegation to tour the People's Republic of China this fall. The delegation will study mathematics education there.

Dr. Swetz has done extensive research on Chinese mathematics education and the history of Chinese mathematics. His book, *Mathematics Education in China: Its Growth and Development*, will be used as a reference by the delegation.

Dr. Constance Pierce, assistant professor of English, has received a Fulbright Fellowship to Portugal. She will lecture on American literature at the University of Oporto from January to June, 1978.

Dr. Philip S. Skell, Evan Pugh Professor of Chemistry, presented a plenary lecture at the Symposium on the Chemistry of Free Radicals, at the national meeting of the American Chemical Society in Chicago, Ill. In his lecture, Dr. Skell described research on succinimidyl and related radicals conducted with Dr. James Day, a postdoctoral student in his laboratory.

Dr. Norman Freed, associate professor of physics, recently returned from a summer term as guest professor at the University of Paris at Orsay. His visit was sponsored jointly by the University of Paris and the Center for Nuclear Studies of the French Atomic Energy Commission at Saclay.

While in Europe, Dr. Freed also presented invited seminars in West Germany at the Deutsches Elektronen-Synchrotron Laboratory (DESY) in Hamburg, the Institute for Theoretical Nuclear Physics of the University of Bonn, and the Institute for Theoretical Nuclear Physics at the University of Karlsruhe.

Dr. George M. Enteen, associate professor of history, has been serving as a visiting fellow of the Institute for Sino-Soviet Studies of the George Washington University, conducting research on Russian history.

Art historian to visit

(Continued from page 1)

will take place at 8 p.m. on Tuesday, Oct. 4, also in 101 Kern Bldg., with the topic, "Travellers' Paradise: Englishmen in Italy as Recorded in Their Journals and Travel Books."

Prof. Hunt will also address the Comparative Literature Luncheon group, which meets at 12:15 p.m. on Oct. 4, on "Rossetti: Word and Image."

Author of the recent book, *The Figure in the Landscape: Poetry, Painting, and Gardening During the Eighteenth Century*, Prof. Hunt is particularly interested in the encounters between literature and the visual arts. He is considered an authority on nineteenth century art and architectural history.

An exhibition relating to Prof. Hunt's work is now on display in the main lobby of Pattee Library and in the Rare Books Room. There will be a reception honoring him, to which the public is invited, at 3 p.m. on Oct. 4 in the Rare Books Room.

USG President Grant Ackerman addresses Public Awareness Rally in front of Old Main.

Students hold rally on budget crisis

President Oswald expressed confidence last Friday that the Pennsylvania Legislature will reach a solution on the financial crisis facing higher education in the State.

Speaking at the Public Awareness Rally sponsored by the Undergraduate Student Government, Dr. Oswald said, "I personally have no doubt that a solution will be found to this very important and difficult matter."

"Nevertheless," he told students attending the rally, "it is important for you and your parents to keep before the legislature the importance of this problem and the urgency of it being solved in a bipartisan way as soon as possible."

He also urged students, in talking and writing to legislators, to emphasize the value of an institution like Penn State to the people of Pennsylvania, pointing out that it not only provides education for 53,000 students on 22 campuses, but is also an important research center.

Noting that the legislators should not only understand the seriousness of the funding situation but also the urgency of it, Dr. Oswald said, "There is no question in my mind about the solution. It will be

positive. But it will be a difficult one and it will take a great deal of attention."

Grant Ackerman, USG President, told the rally that the University faces an unprecedented budget crisis "that will not vanish tomorrow," and he urged students to watch developments in Harrisburg carefully this week.

"We must let them know they can't allow the University to suffer. We must ask them to invest in the future of all Pennsylvania by supporting higher education in this State," he said.

Dr. John J. Coyle, immediate past chairman of the University Faculty Senate, expressed concern at the rally about "erosion of academic quality inherent in this budget crisis."

Also voicing concern on the budget situation were University Trustees Kenneth L. Holderman and Marian U. Barash.

Other speakers included Trustee and State Rep. Helen D. Wise, State Sen. J. Doyle Corman, and House Majority Leader James J. Manderson, all of whom voiced support for a University appropriation.

Affirmative Action notice

The following notice, provided by Affirmative Action officers, will be published in two consecutive issues of *Intercom* and *The Reporter*, in compliance with Section 503 of the Rehabilitation Act of 1973.

The Pennsylvania State University is a government contractor subject to Section 503 of the Rehabilitation Act of 1973, which requires government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals.

We need your help in assuring compliance with the affirmative action guidelines established by Section 503 of the Rehabilitation Act of 1973. If you have a physical or mental impairment or a record of having had such an impairment, or are regarded as having an impairment that substantially limits your ability to secure, retain or advance in employment, we would like to include you under the Affirmative Action Program.

It would assist us in proper placement and appropriate accommodations if you tell us about (a) any special methods, skills, or procedures which qualify you for jobs that you might not otherwise be able to do because of your handicap, so that you may be considered for any positions of that kind, and (b) possible accommodations which could be made which would enable you to perform the job properly and safely.

Submission of this information is voluntary and refusal to provide it will not subject you to discharge or disciplinary

treatment. Information obtained concerning individuals shall be kept confidential, except that (1) supervisors and managers may be informed regarding restrictions on the work-duties of handicapped individuals, and regarding necessary accommodations, (2) first aid and safety personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment, and (3) government officials investigating compliance with the Act shall be informed.

The Affirmative Action Office is responsible for coordination of compliance with the requirements of Section 503.

To be included in the Affirmative Action Program, call 863-0473 and additional data will be sent to you.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the *Calendar Editor*, Room 312 Old Main, by Thursday of the week preceding publication.

Second-class postage paid at State College, Pa. 16801

University Park Calendar

Sept. 29-Oct. 9

Special Events

Thursday, Sept. 29

Sports: women's tennis, vs. Mary Baldwin, 9:30 a.m.

Faculty Women's and Newcomers Clubs fall reception, 7:30-9:30 p.m., Rooms 101 and 102 Kern.

Friday, Sept. 30

Sports: j.v. football, vs. Fork Union, 2 p.m.
Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Artists Series, Vienna Choir Boys, 8:30 p.m., Eisenhower Auditorium.

Saturday, Oct. 1

Last date for Nov. graduates to deliver doctoral theses to committee.

Outdoor pool closes officially, possibly open on a temporary basis, depending on weather.
P.S.O.C. Hiking Division, backpack on Pine Creek in Tadiaghton State Forest, through Sunday.

Sunday, Oct. 2

University Chapel service, Richard Shaull, Princeton Theological Seminary, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, pods, prickles, and parachutes, 2 p.m., Stone Valley.

Monday, Oct. 3

Shakespeare film, *Hamlet* (Olivier), 6:30 p.m., Room 101 Chambers. Free admission.
france-cinema, *Berri, The Two of Us* (1968), a rare relationship between an old man and a small boy, 7 and 9 p.m., Room 112 Kern.

L.A.I.F.S. illustrated lecture: John Dixon Hunt, Bedford College, London, on "My Pattern for a County Seat" (English Renaissance villas and the English country house), 8 p.m., Room 101 Kern.

Tuesday, Oct. 4

Fixed date for meetings involving Commonwealth Campus faculty.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club. John Dixon Hunt, Bedford College, London, on "Rosetti: Word and Image."

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Reception for John Dixon Hunt, 3 p.m., Rare Book Room, Pattee.

Shakespeare film, *Hamlet* (Richardson/Williamson), 6:30 p.m., Room 101 Chambers.

Free admission
English colloquium, 8 p.m., Room 101 Kern.
John Dixon Hunt, Bedford College, London, on "Travellers' Paradise: Englishmen in Italy as Recorded in their Journals and Travel Books," 8 p.m., Room 101 Kern.

Wednesday, Oct. 5

G.S.A. Commonsplace Theatre, *Maltese Falcon*, 7:30 and 9:30 p.m., Room 112 Kern.

Penn State Faculty Club annual meeting, 7:30 p.m., Faculty Club.

P.S.O.C. Hiking Division meeting, James Lindsey will talk on the Pennsylvania Black Bear, 7:30 p.m., Room 214 Boucke.

Artists Series, American Film Theatre, Edward Albee, *A Delicate Balance*, 8 p.m., Eisenhower Auditorium.

University Theatre, student preview of *A View From the Bridge*, 8 p.m., Pavilion Theatre.

University Readers, *The Pirates of Penzance*, with piano accompaniment, 8 p.m., HUB assembly room.

Earl Williams, cello, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 6

Sports: women's tennis, vs. Colgate, 1:30 p.m.

FSHA 4:10 dinner. Three plates from President Washington's table, 5:30 p.m., Maple Room. Reservations at 865-7441.

University Theatre, Arthur Miller, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Friday, Oct. 7

Fixed date for meetings involving Commonwealth Campus faculty.

Homecoming Alumni Tea, 4:45 p.m., Room 101 Kern.

University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

University Readers, *The Pirates of Penzance*, with piano accompaniment, 8 p.m., HUB assembly room.

Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, Oct. 8

Fixed date for meetings involving Commonwealth Campus faculty.

Last date for final oral doctoral examinations for Nov. graduates.

Last date for Nov. graduates to deliver master's theses or papers to advisers.

Sports: men's fencing, varsity/alumni meet, 8 a.m.; men's cross country, vs. Kent State and Bucknell; field hockey, vs. Ohio State, 10 a.m.; football, vs. Utah State, 1:30 p.m.

Penn State Glee Club/Blue Band Concert, 7:30 p.m., Eisenhower Auditorium. Free admission.

University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

WPSX Highlights

Freedom: Then, Now, and Tomorrow, Monday, Oct. 3, at 10 p.m., explores the many images of freedom cast by the United States during its history. Narrated by actor Chris Murney, the Penn State Television program traces the history of freedom in America and looks at recent challenges to our freedoms. Included are

archive footage documenting controversies over freedom of expression, interviews with nationally known scholars and humanists, including Penn State's Robert Murray, and an epilogue by historian and author Norman A. Graebner. Dr. Graebner was project director for Penn State's statewide bicentennial project, *Freedom: Then, Now, and Tomorrow*, and Distinguished Visiting Professor of History at Penn State in 1976.

How can Pennsylvania avoid another State budget crisis? That question is the focus of *Talkabout*, Tuesday, Oct. 4, at 7:30 p.m. The 30-minute program looks at the reasons for Pennsylvania's budget crises, what other states do to avoid the problem, and alternatives for building and passing a better budget. Appearing are former state legislator Galen Dreibeis; Robert O'Connor, assistant professor of political science at Penn State; and Irwin Feller, Penn State professor of economics.

Choreographer Twyla Tharp explores the creative relationship between television technology and dance in *Making*

Sunday, Oct. 9

P.S.O.C. Hiking Division, introduction to orienteering, 9 a.m., HUB parking lot. University Chapel service, The Rev. Elmer A. Vastyan, Hershey Medical Center, 11 a.m., Music Bldg. recital hall.

Shaver's Creek Nature Center, autumn ramble, 2 p.m., Stone Valley.

Reception for William King, sculptor, 3-5 p.m., Zoller Gallery.

College of Human Development Tenth Anniversary Observance, Norman Cousins, Editor, *Saturday Review*, keynote address, 7:30 p.m., HUB ballroom. A reception follows in the HUB north lounge.

Artists Series, *Shakespeare's People*, 8:30 p.m., Eisenhower Auditorium.

Seminars

Friday, Sept. 30

History, Merritt Roe Smith, Ohio State University, on "Technology Assessment from the Slaves of a 19th Century Historian: Military Technology and the Industrial Revolution," 10:45 a.m., Applied Research Lab. Analytical Chemistry, Maurice Gross, Louis Pasteur University, Strasbourg, on "Polarography and Redox Reactivity of Porphyrins: Effects of Pi-Electron System Modification," 11:10 a.m., Room 333 Whitmore.

Monday, Oct. 3

Biochemistry/Biophysics, Frank Gurd, Indiana University, on "Allosteric Control of Hemoglobin Functions," 3:55 p.m., Room 101 Althouse.

Tuesday, Oct. 4

Biochemistry/Biophysics, Frank Gurd, Indiana University, on "Motions in Proteins Molecules," 11:10 a.m., Room 101 Althouse. Genetics, David Mbah on "Genetic Correlation," 3:55 p.m., Room 52 Frear. Inorganic Chemistry, Harry R. Allcock on "Recent Advances in Inorganic Polymer Chemistry," 8 p.m., Room 333 Whitmore.

Thursday, Oct. 6

Ceramic Science, G. J. McCarthy on "Fixation and Isolation of High Level Nuclear Wastes," 11 a.m., Room 301 Mineral Industries.

Television Dance, Tuesday, Oct. 4, at 8 p.m. The one-hour special features the premiere of a major new work, "Country Dances," in which the television production team acts in partnership with the dancers. Mikhail Baryshnikov and Tharp are also seen rehearsing "Once More Frank."

A catastrophic mistake and its long-range consequences for the state of Michigan are examined Tuesday, Oct. 4, at 9:30 p.m. on *The Poisoning of Michigan*. The program tells how a flame retardant containing the chemical PBB was accidentally packaged as an animal food supplement, poisoning thousands of cattle which were then marketed to the public. Conduct of an investigation, which took months to discover the error, and the response of the state's bureaucracy are analyzed.

Thomas Gordon's Parent Effectiveness Training (P.E.T.) theory is the focus of a parenting television course, *Parent Effectiveness*, which begins Thursday, Oct. 6, at 10 p.m. The thirteen-week series uses nine fictional families attending a dramatized class to show alternatives for successful parenting. The families illustrate their use of parenting techniques both before and after their "course." The course, part of The Pennsylvania State University of the Air, is being offered through Independent Study through Correspondence. Call 5-5403.

Plant Pathology, L. Barran and E. Schneider, Chemistry and Biology Research Institute, Ottawa, on "Development and Structure of Chlamydomonas in the Genus Fusarium," 11 a.m., Room 119 Buckhout.

Chemistry, Mildred Cohn, University of Pennsylvania, on "P³¹ NMR of Phosphoryl Transfer Enzymes," 12:45 p.m., Room 333 Whitmore.

Physics, P. K. Kabir, University of Virginia, on "Can Elementary Systems Distinguish Past the Future?" 3:50 p.m., Room 117 Osmond.

Meteorology, Fritz K. Brunner, University of New South Wales, on "Geocentric Refraction: An Interdisciplinary Research Area of Geodesy and Meteorology," 3:55 p.m., Room 112 Walker.

Friday, Oct. 7

Analytical Chemistry, George Perkins on "Direct Photolysis of Silane," 11:10 a.m., Room 333 Whitmore.

Exhibits

HUB Gallery: Bruce Schwabach, paintings, and Penn State Room exhibit, *HUB Beginnings*, through Sept. 30; Homecoming exhibit, opens Oct. 1.

Kern Commons Gallery: prints and drawings by PSU student printmakers; Walter Benson, photographs; Nancy Norton, stained glass; Stephen Gerhart, jewelry, all through Oct. 1. Michael Ondik, photographs; Les Richel, wood sculpture; Fire Prevention Week exhibit, all open Oct. 1.

Museum of Art: noon-5 p.m. daily, closed Monday. Museum tours, Sunday, 2:30 p.m. Arne Jacobsen: Danish architect and designer; William Cullen Bryant collection.

Museum of Art HUB Gallery: Esmark collection of Currier and Ives prints.

Pattee Galleries: Bob Andruilli, East Corridor Gallery. Steve Marvill, color photography, *Leading Services Lobby*.

Zoller Gallery: 8 a.m.-5 p.m. weekdays, noon-5 p.m. weekends. Art Faculty exhibition, through Oct. 3. William King, sculpture, opens Oct. 8.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been exempted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1367 (network line 475-1367). Applications for these staff vacancies will be received until 5 p.m., Oct. 6. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

AREA REPRESENTATIVE, CONTINUING EDUCATION — Pittsburgh Area Responsible for the functions of development, organization, operation, and administration of Continuing Education programs and services within an assigned geographic district. Bachelor's degree or equivalent with two to three years of directly related experience in business, industry, or education.

SYSTEMS AND APPLICATIONS PROGRAMMER

Hershey Responsible to the Manager of Programming and Systems for translating systems analyst's designs and instructions into computer programs which control the processing of data within the computer. Bachelor's degree or equivalent and two to four years of directly related programming experience or associate degree plus four to six years of programming experience.

ASSISTANT DIRECTOR, NURSING SERVICES —

Hershey Responsible to the Associate Director, Nursing Services for planning, organizing, coordinating and evaluating activities of the nursing department to ensure that optimum nursing care is provided to all patients in accordance with hospital policies and procedures. Master's degree in nursing service administration plus two to four years of directly related experience, preferably in a teaching hospital environment.

Sept. 23 meeting

From the Trustee Docket

Gifts to University increased last year

Gifts received by the University during the year ending June 30, 1977, totaled \$6,594,614, a 14.3 percent increase over the \$5,771,188 contributed to Penn State the previous year.

The Trustees were informed that more than 27,500 gifts were received in 1976-77. Dr. Stanley O. Ikenberry, senior vice-president for development and relations, reported to the Board that alumni and friends of Penn State contributed \$2,437,012 for the year ending June 30, 1977, up 57.2 percent over the \$1,549,878 contributed the prior year.

"More and more alumni and other special friends of Penn State recognize that their support is important and that their gifts can help to keep Penn State in the top ranks among major universities," Dr. Ikenberry said.

Also in 1976-77, corporations and businesses contributed over \$2 million while foundations and organizations gave approximately \$2 million toward the \$6.5 million total. Most gifts — more than 95 percent — are restricted to special purposes specified by the donor.

Student aid and enrichment of the education programs of the Colleges are two major areas that receive support. The remaining 5 percent of undesignated contributions from alumni and friends are allocated to a limited number of special projects by the Trustees.

Investments yield 7% return

Investments of the endowment funds for The Milton S. Eshersky Medical Center and University scholarship funds yielded a current return of 7 percent during the year which ended June 30, 1977, the trustees were informed.

In a report to the Trustee Committee on Finance, Robert A. Patterson, senior vice-president for finance and operations and treasurer of the University, said the medical center endowment, with a year-end market value of \$15,312,000, produced income of \$1,054,000. The Associated Trust Fund, which consists of money supporting more than 200 University scholarships, had a market value of \$8,948,000 and netted income of \$633,000.

Seminar room named

Room 409-A in the C. R. Carpenter Building at the University Park Campus has been named the Maurice A. Mook Seminar Room in honor of Penn State's first professor of anthropology.

President Oswald noted that Dr. Mook "had special importance to the University because of his study of the Amish and other 'plain people' of Pennsylvania and because of his early influence in developing the study of anthropology at the University."

Dr. Mook presented his lecture on "Pennsylvania's Plain People" more than 200 times throughout the State. He was co-author of *Walapai Ethnography*, a book on the Walapai Indian tribe in Arizona, and author of many articles on Indian tribes, the Amish, Quaker social history, and Pennsylvania folklore.

In 1963, Dr. Mook received Penn State's Christian R. and Mary F. Lindback Award for Distinguished Teaching.

Dr. Mook died on Oct. 19, 1973, three years after he had retired as professor emeritus of anthropology.

FAA to help fund airport improvements

Two grant agreements between the University and the Federal Aviation Administration (FAA), approved last

Friday by the Board of Trustees, will provide \$511,000 for work at the University Park Airport which will improve safety conditions and security.

Ninety percent of the cost is paid by the FAA with the remaining 10 percent, or \$51,000, to be paid from funds provided to the University as gifts.

The agreements will provide for the joining of the two sections of taxiway A, security fencing around a portion of the airport perimeter, extension of the aircraft parking area, grooving of the surface of the main runway to reduce skidding danger, and the installation of a visual approach slope indicator (VASI) at the west side of the airport, similar to the one at the east end of the airport.

Also provided will be plans to clear trees at the runway approaches as required for the installation of the instrument landing system (ILS), which is expected to be completed next summer.

While the federal grants will make possible improvements that will benefit both the University and others in the community who use the airport, they will not in any way change the capacity of the main runway, which now accommodates planes up to the size of small corporate jets.

Hetzel Award changed

The Ralph Dorn Hetzel Award, established to encourage achievement among students and awarded annually to a University senior, has been changed to the Ralph Dorn Hetzel Memorial Award Fund.

Awards from the fund will recognize the achievements and potential of outstanding undergraduates who have demonstrated the qualities of responsible leadership during their college career and give promise of public spirited achievement in the future.

The award, as revised by action of the Board of Trustees, will be in the amount of \$100 and the number of awards made annually will be dependent on the earnings available from the principal of the fund. It will be made during the senior year of the recipient and is not renewable.

Recipients of the award will be selected by a committee appointed by the vice-president for student affairs, with the approval of the student aid. The award honors the late Dr. Ralph Dorn Hetzel, president of the University from 1926 until his death in 1947. It was established in 1949 with a grant of \$2,000 provided by Dr. Hetzel's widow, the late Estelle H. Hetzel. Additional contributions now may be made to the fund by interested organizations or persons.

Mineral processing section relocated

The mineral processing section in the College of Earth and Mineral Sciences has been relocated from the Department of Material Sciences to the Department of Mineral Engineering.

At the same time, Dr. Leonard G. Austin, professor of materials science, has been named chairman of the section. He succeeds Dr. Frank Aplan, who has elected to step down from the chairmanship to devote full time to research and teaching.

Dr. C. L. Hosler, dean of the college, explains that the close relationship between the mining of minerals and their processing makes it appropriate that the faculty of these two areas should be located in the same administrative unit. Other sections in the Department of Mineral Engineering are mining engineering, mineral engineering management, geomechanics, and petroleum and natural gas engineering. Dean Hosler also notes that the

educational programs in mining will be broadened by the change, and that there will be no additional costs.

The mineral processing section was created in the Department of Material Sciences in 1970. It had previously been the Department of Mineral Preparation.

The mineral processing program currently has an enrollment of 27 graduate students. No undergraduate program is offered.

Dr. Austin has a bachelor of science degree from London University and a doctor of philosophy degree in fuel technology from Penn State. He has been at the University since 1957.

He has more than 80 publications in the areas of fuels, mineral processing, and electrochemical power production, and is a fellow of the Institute of Fuel (London).

Three-two program planned with Juniata

Juniata College at Huntingdon and the University have established a three-two program of collegiate education in the liberal arts and engineering which will enable students from Juniata to qualify for appropriate dual baccalaureate degrees, normally at the end of five years.

Three years, or the equivalent, will be spent at Juniata College, studying liberal arts subjects along with pre-engineering courses with the basic sciences. Upon satisfactory completion of this part of the program, the student will spend two years, or the equivalent, at Penn State, completing specified engineering courses.

The student will enter the program at Juniata College, meeting admission requirements there. If found qualified to continue the program at Penn State, he or she will enter the College of Engineering or College of Earth and Mineral Sciences, as appropriate.

University will file to extend cable service

The University will file application for appropriate FCC licenses to extend existing Continuing Education cable television service in the Scranton/Wilkes-Barre area to other locations in Pennsylvania.

Since the beginning of 1976, Penn State has provided programming, consisting of credit and credit-free instruction as well as special interest programs for adults, to the people served by five cable systems in northeastern Pennsylvania. The system, called PENNARAMA, reaches some 30,000 homes.

The innovative programming concepts and organizational relationships with the community led to requests for service from other cable systems. As a result, several cable companies have agreed to finance the gradual development of a TV cable network that would make it possible for them to receive the programs.

Earlier this year, University officers entered into an agreement with the cable companies represented by Joe S. Gans, Inc. Mr. Gans is president of Northeast Cable TV, a subsidiary of the corporation bearing his name. Under this agreement, the University would be licensee of the facilities to be used in the network, with production, construction, and maintenance costs to be assumed by the cable companies.

Programming at present is "packaged" at University Park and shipped to the University's Worthington Scranton Campus which originates broadcasts directly into the cable systems. As the network develops, it would eventually reach University Park. Programs could then begin to originate from University Park, in addition to the continuing service originating from Scranton.

Calibration station to become storage site

The calibration station of the Applied Research Laboratory, built in 1947 at the edge of the lake at Black Moshannon State

Park, will be used by the College of Agriculture as a storage facility for a potato research project underway in that area.

The Board of Trustees authorized the continued use of the facility for the next five years. Last March the Board had authorized the sale or demolition of the building, after Applied Research Laboratory personnel said they had no further use for the facility.

The potato research project, explains Dr. Samuel H. Smith, is currently undergoing a rapid expansion of efforts to develop new potato cultivars for use in Pennsylvania. The building will be used for winter storage of potato selections grown at the potato seed farm located near the Mid-State Airport. The high elevation at Black Moshannon and the isolation from commercial agriculture provide an ideal site for clean potato seed production.

Most of the funds for the rapid expansion of this program are derived from a State Marketing Order, which assesses Pennsylvania potato growers for research funds, and from potato chip industry grants-in-aid. Dr. David R. MacKenzie, head of the potato breeding program, estimates that the authorized use of the former calibration station has saved this program approximately \$40,000 in new construction costs and speeded up the timetable of program expansion several years.

Physics options approved

The major in physics has been revised to provide three options.

New options in acoustics and physical metallurgy have been established, in addition to the standard physics program. All lead to the bachelor of science degree in the College of Science.

Dr. R. H. Good, Jr., professor and head of the Department of Physics, explains that the changes have been made to provide students with broader opportunities after their graduation, both in employment and in graduate study.

The options were developed in consultation with other University departments and without additional cost to the University.

Agreement authorized for antenna construction

The trustees authorized the signing of an application and agreement with the Corporation for Public Broadcasting for construction of a relay satellite antenna for the use of the University television station, WPSX-TV, Channel 13.

The Board of Trustees a year ago approved plans for construction of the antenna, located immediately south of the Wagner Bldg. studios of WPSX-TV.

The agreement now authorized assures the Corporation for Public Broadcasting that the University has acquired the necessary license and permits, and intends to extend its best efforts to facilitate construction.

Assurance is given also that the University will allow use of the ground station for distribution of programs by other noncommercial stations and provides that most of the maintenance and repairs are to be provided by the Corporation for Public Broadcasting. The University will have exclusive control and the ground station will be covered under the University's existing policies.

"The new system," explains David L. Phillips, director of broadcasting, "will provide up to four channels. With the ground-based network now in use, the University has access to only one program at a time."

"The additional channels will provide increased diversity of programs to member stations and viewers of the Public Broadcasting Service," he says.

Faculty hears three speakers at convocation

Following are three articles based on the addresses presented at the Sept. 28 faculty convocation.

Against the background of the "most difficult" fiscal and budgetary situation facing the University, Dr. John W. Oswald has outlined three priorities to which he hopes to devote his attention during the coming academic year. They are:

- To develop a better way to fine tune available budgetary monies to programmatic needs;
- To insure personnel policies which are clear, equitable and well understood for all Penn State employees; and
- To maximize the effectiveness of the ties between University Park and the Commonwealth Campuses.

Speaking via telephonic hook-up to all 22 Penn State campuses, the President announced that just an hour before the faculty convocation he had been informed that the House of Representatives had voted 166 to 28 to approve a budget of \$108,894,000 for Penn State. Calling this an encouraging first step, the President pointed out that the next step is the solution of the fiscal dilemma so as to assure funding. He emphasized that "the fiscal problem of the State is of the entire State and all of its programs, not just a crisis of higher education."

During this period when Penn State is forced to operate on borrowed money, the President pledged efforts to insure maximum austerity and the avoidance of permanent future commitments while at the same time attempting to meet the educational program of teaching,

"Each person who crosses a Penn State campus is an opportunity for quality," Provost Edward D. Eddy told the faculty convocation.

A concern for quality was the theme of Dr. Eddy's address, and he defined quality "as the consuming love of knowledge pursued according to the highest relevant standards and tempered by a deep caring for the human dimensions of learning."

Within a multi-purpose university, quality may exist at a variety of levels, Dr. Eddy said, noting: "In essence, it is what we say we do measured by what we actually do that determines how well we succeed. It is, then, how far we take our students as well as where we take them."

Calling integrity central to quality, Dr. Eddy said that he was more encouraged now than he had been for many years at the opportunity for quality in higher learning. Today's students, he continued, have "little of the cynicism and certainly less of the outright self-seeking of some recent generations. As a result, we have the chance to put behind us a dark period of mutual suspicion in higher education."

During the years of student rebellion, Dr. Eddy recalled, many faculty members and administrators retreated from students.

"We engaged ourselves in the transmission of knowledge and chose — sometimes out of hesitation and sometimes out of fear — to ignore a wider concern for what happens to the human beings who are involved."

"And this was as true of instruction as it was of research."

(All articles continue on page 4)

Today, more than ever before, faculty members must be sure that every academic endeavor they undertake is necessary and appropriate, University Faculty Senate Chairman Thomas E. Daubert said in an examination of issues that will come before the faculty during the next few years.

"We all must look at our academic priorities and, working in cooperation with the administration of the University, decide what is most important to Penn State to maintain a quality University in all pursuits," he said.

Dr. Daubert pointed out that the faculty, as represented by the University Faculty Senate, has primary authority over graduate and undergraduate instruction, research and continuing education programs, admissions standards, instructional courses, and graduation requirements.

For example, he noted, the Senate recently acted to strengthen policies that protect the rights of the instructor in assigning grades and in cases of academic dishonesty. In addition, some major issues that will come before the Senate this year are consideration of the role of part-time faculty and current promotion and tenure review processes.

But because the faculty is responsible for these areas, he said, it holds the added responsibility of determining which programs and courses of action should have highest priority, at a time when University goals exceed resources.

Noting that the University's long-term goals, to provide high quality instruction, research and continuing

News in Brief

Cousins to speak

Norman Cousins, editor of the Saturday Review, will be the keynote speaker at the tenth anniversary celebration of the College of Human Development Oct. 9-11.

Mr. Cousins, who has been editor of the Saturday Review since 1942, will speak at 7:30 p.m. on Sunday, Oct. 9, in the HUB ballroom. His topic is "The Fragility of Civilization."

National and State leaders in the human service field are being invited to the observance, which includes a lecture series and presentation of the annual Alumni Recognition Award.

After leaving Teachers College, Columbia University, in 1936, Mr. Cousins worked as an education reporter for the New York Evening Post and joined the Saturday Review staff in 1940.

Under his editorship, the magazine has expanded its coverage from book reviews to analyses of ideas, encompassing not just the arts, but the human condition.

Using the magazine's editorial page, Mr. Cousins has launched several humanitarian projects.

Following a 1949 visit to Japan, he initiated a plan to provide care and education for some 440 children orphaned by the bombing of Hiroshima.

In 1955, he arranged for a group of young women disfigured by the bombing to come to the United States for plastic surgery and medical treatment, with support and help from interested readers and physicians.

Mr. Cousins has lectured throughout the United States and in foreign countries

— often under State Department auspices. The author of numerous books, he has served as chairman of the Pulitzer Prize jury for literature.

Library conference scheduled

The University's Library Faculty Organization, in cooperation with the College and Research Libraries Section of the Pennsylvania Library Association, is hosting a conference for academic librarians Oct. 14-15. Topics include research methodologies, proposals and grants, and breaking into print. Among the featured speakers are Michael Buckland, dean of the School of Librarianship, University of California, Berkeley, and Richard Johnson, editor of College and Research Libraries.

Penn State participants include Dr. Stuart Forth, dean of University Libraries; Dr. Richard G. Cunningham, vice president for research and graduate studies; Dr. Edward R. Johnson, assistant dean of libraries; Dr. Stuart H. Mann, professor of operations research; Dr. Keith E. Roe, associate librarian; and Dr. James J. Barnett, assistant professor of educational psychology.

The meetings will be held in Keller Bldg., and persons interested in attending should contact the conference center for further information.

Sklare lecture is Oct. 10

Marshall Sklare, professor of American Jewish Studies and sociology at Brandeis University, will give a public lecture, "Self-Segregation, Acculturation or Assimilation: The Changing Balance in the American Jewish Community," on Monday, Oct. 10.

Sponsored by the Department of

(continued on page 6)

Penn Staters

Dr. James B. Turpen, assistant professor of biology, presented an invited paper at a symposium on developmental immunobiology in Aberdeen, Scotland, last month. The symposium was sponsored by the Scottish Immunology Group of the British Society for Immunology.

Dr. Frederick M. Brown, assistant professor of psychology at Worthington Scranton, presented a paper at the 13th International Conference of the Society for Chronobiology held last month in Pavia, Italy. His topic was "Viability-rate Factors Suggested for Experimental Rodents under Altered 24-Hour Lighting Regimens."

Dr. Paul E. Bell, associate professor of education, recently presented two invited papers before the International Conference on the Practice of Teaching, sponsored by the University of Rhodesia. Dr. Bell's topics, "Competency-based Teacher Education" and "Evaluation and Growth," comprised the final plenary sessions.

Dr. William A. Steele, professor of chemistry, presented an invited paper earlier this month at an international meeting in France. He spoke at a colloquium on two dimensional adsorbed phases, sponsored by the French National Center for Scientific Research in Marseilles.

Dr. Robert E. Hauser, assistant professor of history at the McKeesport Campus, presented a paper entitled "The Ethics of Gaming" at the annual International Simulation and Gaming Association Conference in Birmingham, England.

Dr. Frank Dachille, professor of geochemistry, recently presented a paper, "Energy and Momenta of Planetary Systems," at the 40th annual meeting of the Meteorological Society at Cambridge University, England.

Donald W. Girouard, associate professor of landscape architecture, has been selected as one of four recipients for the Council of Educators in Landscape Architecture's national "Outstanding Educator" awards for 1976-77. Prof. Girouard, whose principal areas of interest are design and theory, joined the Penn State faculty in 1972. Before coming to Penn State he completed graduate work at Harvard and served as head of landscape architecture at West Virginia University. His undergraduate work was done at the University of Wisconsin.

Dr. Robert L. Cunningham, professor of soil genesis and morphology, is the 1977 winner of the teaching award sponsored by the Northeastern branch of the American Society of Agronomy. The Penn State professor was cited for initiative in establishing such experimental courses as Soils and Environmental Quality and for his effective teaching in various inter-disciplinary courses.

Dr. William W. Reynolds, assistant professor of biology at Wilkes-Barre, has been reappointed for 1977-78 to the Governing Board of the American Institute of Biological Sciences, and also to chairmanship of the AIBS Liaison Committee of the American Fisheries Society, and associate editorship of the Transactions of the American Fisheries Society.

Philip A. Klein, professor of economics, has spent the past month conferring with European government officials and economists in his capacity as principal investigator of international economic indicators with the National Bureau of Economic Research. He was accompanied by Geoffrey H. Moore, director of business cycle research at the Bureau. Among their stops was Brussels, where

they conferred with the Director-General for Economic and Financial Affairs of the European Economic Commission about future collaboration in forecasting between the EEC and the Bureau. They also visited the German Institute of Economic Development in Berlin, and Dr. Klein delivered a paper, "Forecasting Foreign Trade with Leading Indicators" in Munich at a Conference of the Center for International Research on Economic Tendency Surveys. Other stops included meetings with the Organization for Economic Cooperation and Development in Paris in connection with starting up a data bank for current monitoring of business cycle developments and with the Chamber of Commerce and Industry in Paris.

Bookshelf

Dr. Philip Young, research professor of English and a Fellow of the Institute for the Arts and Humanistic Studies, is the author of *Revolutionary Ladies*, published in September by Alfred A. Knopf. The book, an examination of the lives of several Revolutionary-era women, is described by the publisher as "the surprising true histories of some forgotten American women—all beautiful, rich, and Loyalist—whose lives were shaped by scandal and turned upside down by the War for Independence."

In Dr. Young's extensive research for the book, he uncovered a number of discrepancies in previously recorded histories. Notable is the case of Margaret Moncrieffe, a teen-aged courtesan of the day, whose *Memoirs* were actually written several years after she died.

The Greenhouse Environment, a new book by **Dr. John W. Mastalerz**, professor of floriculture, is designed as a textbook for college students considering careers in greenhouse management. Published by John Wiley and Sons, it is subtitled "The Effect of Environmental Factors on Flower Crops."

The 629-page book is the only one in the field of greenhouse crop production that is concerned with the greenhouse environment and how environmental factors influence the growth and development of flower crops. Each chapter emphasizes the influence that a particular factor has on yield and quality of plant growth—particularly on flower initiation and development.

Dr. Gerald A. Anderson, assistant professor of mathematics, is the author of *Surgery with Coefficients*, a monograph on a new branch of geometric topology. Only the third book to be published on that topic, the volume is the first to lay the foundations for the study of an older branch of mathematics called rational homology manifolds. Dr. Anderson's work, released in July, is volume 591 in the series, *Lecture Notes in Mathematics*, published by Springer-Verlag.

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, has edited a new volume of George Bernard Shaw's works, published this month by Viking Press (hardcover edition) and Penguin books (paperback edition). Entitled *The Portable Bernard Shaw*, the book is part of The Viking Portable Library.

With an introduction and notes by Dr. Weintraub, the book includes five complete plays: *The Devil's Disciple*, *Paginalion*, *In the Beginning*, *Heartbreak House* and *Shakes Versus Shaw*. In addition, there are *The Adventures of the Black Girl in her Search for God*, Shaw's major prose work, and the celebrated Don Juan in Hell Scene from *Man and Superman*.

Dr. Watrous

Dr. Fletcher

Retirements

Dr. George H. Watrous Jr., an expert in the marketing and processing of dairy products, retired Oct. 1 as professor emeritus of food science after 33 years on the faculty.

A native of Elmira, N.Y., Dr. Watrous enrolled in 1937 at the New York State School of Agriculture, then transferred to Penn State where he qualified for his B.S. in dairy husbandry in 1942. His M.S. and Ph.D. degrees with majors in dairy manufacturing also were conferred by Penn State in 1947 and 1951, respectively.

Dr. Watrous worked in industry before becoming an instructor of dairy manufacturing at Penn State in 1944. At the University, he was in charge of quality control of all of the University's dairy products manufactured at the Creamery. He managed the Creamery from 1955 to 1966.

Dr. James L. Gobble, after 31 years of service to the University, retired on Aug. 1 as associate professor of animal science. Dr. Gobble completed his undergraduate work in animal husbandry at Purdue and his M.S., also in animal husbandry, at the University of Illinois. He earned his doctorate in animal production at Penn State in 1955.

From 1946 to 1965, Dr. Gobble was in charge of the swine facilities of the University, and he was largely responsible for planning the Swine Research Center. His most recent research has been concerned with the regulation of feed intake and feeding behavior in growing swine, effects of energy intake during lactation on reproductive performance of sows, feeding and management of growing-finishing swine for improved efficiency, metabolic regulation of growth development, and body composition in the very young pig.

Obituary

Frederick Y. Borden, professor of forest resources and a member of the University's faculty since 1957, died Aug. 29 at the age of 47. Dr. Borden held B.S. and M.S. degrees from Cornell University and earned his Ph.D. at Penn State in 1960. Working through the University's Office for Remote Sensing of Earth Resources, he helped develop a computer system now in use in six countries to analyze data from earth satellites. He also established a cooperative park studies unit at the University in cooperation with the U.S. National Park Service and did several studies of recreational carrying capacity in the national parks.

Dr. Peter W. Fletcher, professor of forestry, retired with emeritus rank on Oct. 1.

A 1933 graduate of Penn State with a B.S. in forestry, he received his M.F. from Yale University and a Ph.D. from the University of Missouri.

Dr. Fletcher, who served from 1959 to 1966 as director of the School of Forest Resources, joined the Penn State faculty in 1959. Earlier he had served 11 years on the forestry faculty of the University of Missouri and 11 years with the U.S. Forest Service.

His father, the late Dr. Stevenson W. Fletcher, was dean of the College of Agriculture at Penn State from 1939 to 1946.

Dr. Fletcher's research interests have centered on forest soils and site quality, first for timber growth, then for water supplies, and finally for outdoor recreation. His most recent research dealt with Pine Creek in northcentral Pennsylvania as a potential addition to the Pennsylvania system of Scenic Rivers and the national system of Wild and Scenic Rivers.

Dr. Mary E. Sanders, professor of botany at Mont Alto, retired on Sept. 1 after more than a decade on the faculty. She joined the Mont Alto faculty as an assistant professor in 1965. Previously, she held positions at the Carnegie Institution, Cold Spring Harbor, L.I.; All Saints College, Sioux Falls, S.D.; Connecticut College; Smith College; Mount Holyoke College; Yale University; University of Wisconsin; Northwestern University; South Dakota State University; and the Arnold Arboretum of Harvard University.

A specialist in plant genetics and development, she has been active in University affairs, serving on several Mont Alto committees and chairing the Campus's Hearing Board. A graduate of Mount Holyoke, Dr. Sanders has an M.S. from Cornell and a Ph.D. from Smith.

Special Events

Thursday, Oct. 6

Food Service and Housing Administration, "Three Plates at President Washington's Table," an evening meal, 5:30 p.m., Maple Room, Henderson.
University Theatre, Arthur Miller, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Friday, Oct. 7

Fixed date for meetings involving Commonwealth Campus faculty.
Homecoming Alumni Tea, 4:45 p.m., Room 101 Kern.
Terrace Room Homecoming Candlelight Dinner, with Phi Mu Alpha's Dividend and German bands, 4:45-7 p.m., HUB.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, Oct. 8

Fixed date for meetings involving Commonwealth Campus faculty.
Last date for final oral doctoral examinations for Nov. graduates.

Last date for Nov. graduates to deliver master's theses or papers to advisers.
Sports: men's fencing, varsity/alumni meet, 8 a.m.; men's cross country, vs. Kent State and Bucknell; field hockey, vs. Ohio State, 10 a.m.; football, vs. Utah State, 1:30 p.m.
Terrace Room Homecoming Candlelight Dinner, with dinner music provided by the Rio Group, 4:45-7 p.m., HUB.
Penn State Faculty Club Football Buffet, 6-9 p.m., Faculty Club.
Penn State Clee Club and Blue Band free concert, 7:30 p.m., Eisenhower Auditorium.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Sunday, Oct. 9

P.S.O.C. Hiking Division, introduction to orienteering, 9 a.m., HUB parking lot.
University Chapel service, The Rev. Elmer A. Vastyan, Hershey Medical Center, 11 a.m., Music Bldg. recital hall.
Shaver's Creek Nature Center, autumn ramble, 2 p.m., Stone Valley.
William King, sculptor, reception, 3-5 p.m., Zoller Gallery.
College of Human Development Tenth Anniversary Keynote Address, Norman Cousins, editor, *Saturday Review*, on "Fragility of Civilization," 7:30 p.m., HUB ballroom.
A reception follows in the HUB north lounge.
Artists Series, *Shakespeare's People*, 8:30 p.m., Eisenhower Auditorium.

Monday, Oct. 10

College of Human Development Tenth Anniversary Observance, Jerome Kagan, Harvard University, on "Infant Development: A Multi-disciplinary Perspective," 9 a.m., HUB assembly hall; David Hamburg, National Academy of Sciences, Washington, D.C., on "Development in Health: the Interplay of Biological and Social Factors," 12 noon, luncheon meeting, HUB ballroom; Monrad Paulsen, Cardozo School of Law, Yeshiva University, 2 p.m., HUB assembly hall; Norman Kretschmer, The International Organization for the Study of Human Development and The National Institute of Child Health and Human Development, on "Human Development: A Biomedical Perspective," 7 p.m., HUB assembly hall.

E.A. Day Memorial Lecture in Food Science

Andrew A. Benson, Scripps Institution of Oceanography, on "Oceanic Food Chains and Challenges," 11 a.m., Room 112 Kern.
Department of Religious Studies, Marshall Sklare, Brandeis University, on "Self-Segregation, Acculturation or Assimilation: The Changing Balance in the American Jewish Community," 2:30 p.m., Room 101 Kern.

Shakespeare film, *Macbeth* (Schaefer/Evans), 6:30 p.m., Room 101 Chambers. Free admission.

Robert Trehy, baritone, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Oct. 11

College of Human Development Tenth Anniversary Observance. René Jules Dubos, Rockefeller University, on "Environment, Choices and Human Development," 1:30 p.m., HUB ballroom. Alumni Recognition

Award Presentation follows Dr. Dubos's lecture. Alumni Recognition reception, 3:30 p.m. Living Center, Henderson.
Comp. Lit. luncheon, 12:15 p.m.; talk, 1 p.m., Room 1 Faculty Club. Robert Schmalz on "Atlantis," 2 p.m.
Sports: field hockey, vs. Cortland, 2:30 p.m. University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Wednesday, Oct. 12

Art Department/IAHS Lecture. William King on contemporary sculpture, 7 p.m., Room 102 Forum.
G.S.A. Commonsplace Theatre, *Lost Weekend*, 7:30 and 9:30 p.m., Room 112 Kern.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 13

Faculty Women's Club, A Morning at the Art Museum, 10 a.m., Museum of Art.
IAHS Lecture. Philip Radcliffe, University of Manchester, on "TV. Culture with a Capital C?" 8 p.m., Room 112 Kern.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Friday, Oct. 14

Sports: soccer, vs. Maryland, 7 p.m. Folk and square dance roundup, 7:30 p.m., Room 133 White.
Shaver's Creek Nature Center, Stars, Myths and Legends, 8 p.m., Stone Valley.
University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Jill Olson, piano, 8:30 p.m., Music Bldg. recital hall.
Penn State Faculty Club fall dance, "The Hobgoblin Hop," 9 p.m., Faculty Club.

Saturday, Oct. 15

P.S.O.C. Hiking Division, overnight foraging trip, through Sunday.
Shaver's Creek Nature Center, Adventure Series, children 7 and older, registration necessary—865-1851, 10 a.m.-3 p.m., Stone Valley.
Sports: men's cross country, Penn State Open; women's cross country, vs. Michigan State; women's golf, EAIAW Championships; field hockey, vs. East Stroudsburg, 2 p.m.; women's volleyball, vs. Robert Morris, 3 p.m. University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.
Artists Series. National Theatre of the Deaf, 8:30 p.m., Eisenhower Auditorium.

Sunday, Oct. 16

P.S.O.C. Hiking Division, famous flaming fall foliage hike in Thickseed Mountain wild area, 9 a.m., HUB parking lot.
University Chapel service, Stanley O. Ikenberry, senior vice president for University development and relations, 11 a.m., Eisenhower Chapel.
Sports: women's golf, EAIAW Championships. Shaver's Creek Nature Center, Old Time Pioneer Crafts Festival, noon-5 p.m., Stone Valley.

Seminars

Friday, Oct. 7

Analytical Chemistry, George Perkins on "Direct Photolysis of Sulfate," 11:10 a.m., Room 333 Whitmore.
Physical Chemistry, Julian Hecklen on "The Gas-Phase Oxidation of Simple Aldehydes," 4 p.m., Room 333 Whitmore.

Monday, Oct. 10

Biochemistry/Biophysics, Martyn Bailey, George Washington School of Medicine, on "Lipid Metabolism in Cultured Cells," 3:55 p.m., Room 101 Althouse.

Tuesday, Oct. 11

Ceramic Science, Cliff Ballard, Sandia Labs, on "Glass-Ceramic to Metal Seals," 11 a.m., Room 301 M.I.
Biochemistry/Biophysics, Martyn Bailey, George Washington School of Medicine, on "Essential Fatty Acids, Prostaglandins, and Atherosclerosis," 11:10 a.m., Room 101 Althouse.
Air Pollution Control, Franklin Flower, Cooke College, Rutgers, on "Land Fill Gases," 2:20 p.m., Room 140 Fenske.

Genetics, William E. Mercer on "Regulation of Proliferation in Transformed and Non-transformed Mammalian Cells," 3:55 p.m., Room S2 Frear.

Engineering Science and Mechanics/Bioengineering Program, George C. Lee, National Science Foundation, on "Structural Mechanics of Lungs," 4 p.m., Room 232 Hammond.

Organic Chemistry, William P. Weber, University of Southern California, on "Synthesis of Arene Oxides," 8 p.m., Room 333 Whitmore.

Wednesday, Oct. 12

Fuel Science, Ulrich Bonne, Honeywell Corporate Research Center, Bloomington, Mn., on "The Performance of Heating Systems," 4 p.m., Room 301 Mineral Industries.

Thursday, Oct. 13

Agronomy, Karl Shaffer on "Nitrate-Nitrogen and Cadmium Movement with Water through a Saturated Soil," 9:35 a.m., Room 111 Tyson.

Chemistry, W. H. Flygare, University of Illinois, on "Studies of Molecular Rotational Relaxation by Transient Effects in Microwave Spectroscopy," 12:45 p.m., Room 333 Whitmore.

Electrical Engineering, David D. Rupprecht, Hewlett Packard, on "LSI (Large Scale Integration) at Hewlett Packard: A Growing Part of Vertical Integration," 2:20 p.m., Room 115 EE West.

Physics, M. J. G. Lee, University of Toronto, on "A New Effect in Photo-Induced Field Emission," 3:50 p.m., Room 117 Osmond.

Microbiology and Cell Biology, Robert H. Rothman, Brookhaven National Laboratory, on "Repair of UV Damage in Recombination Deficient *E. coli*," 4 p.m., Room S2 Frear.
Philosophy, Henry W. Johnstone, Jr. on "Odysseus as a Traveler: A Categorical Study," 4 p.m., Room 214 Willard.

Friday, Oct. 14

Analytical Chemistry, Bill Milne, NIH, Bethesda, on "The NIH-EPA Chemical Information System," 11:10 a.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Janet Tracy, prints and collages; R. H. Grinstead, collages, through Oct. 12.
HUB Gallery: Homecoming exhibit, through Oct. 15.
Kern Commons Gallery: National Fire Prevention Week exhibit; Michael Ondik, photographs; Les Rishel, wood sculpture, all through Oct. 15. Pennsylvania Guild of Craftsmen exhibit, opens Oct. 15.
Museum of Art: Arne Jacobsen, Danish architecture and designer; William Cullen Bryant collection.

chitect and designer; William Cullen Bryant collection.

Museum of Art HUB Gallery: Esmark collection of Currier and Ives prints.

Pattee Galleries: Humphrey Repton, English Gardens, from the Rare Books Room, Main Lobby; Bob Andriuli, recent work, East Corridor Gallery, through Oct. 10; Steve Marxill, color photography, Lending Services Lobby, through Oct. 10.

Zoller Gallery: William King, sculpture, opens Oct. 8.

WPSX Highlights

Images of Aging, an eight-part anthology reflecting attitudes towards aging and the role of older citizens in American society, returns Sunday, Oct. 9, at 1 p.m.

VTR, beginning Sunday, Oct. 9, at 2 p.m., is a new series of six experimental video programs from the Television Laboratory at WNET, New York. Among the artists represented on the series are William Wegman (and his dog Man Ray), Arthur and Allen Ginsberg, Ed Emshwiller, and Elliot Noyes Jr.

Short stories representing 100 years of American writing are dramatized on **The American Short Story** which returns to Channel 3 Sunday, Oct. 9, at 11 p.m. The six-part series begins with F. Scott Fitzgerald's "Bernice Bobs Her Hair" and Sherwood Anderson's "I'm a Fool."

Visions, another popular dramatic series, returns on Monday, Oct. 10, at 9 p.m. with a collection of new productions. **Visions** is designed to introduce new playwrights who write especially for television. The new season begins with "Iowa," the story of a three-generation family reunion, written by Murray Mednick.

Sophia Loren and Marcello Mastroianni will be the first two guests on the premiere week of **The Dick Cavett Show** which begins Monday, Oct. 10, at 11 p.m. On Tuesday, Mr. Cavett talks with dancer Rudolf Nureyev; on Wednesday, with comedians Harry and Jimmy Ritz; on Thursday, with architect Philip Johnson; and on Friday, his guest is singer-composer Carly Simon. The series is seen immediately before **The Captioned**

(Continued on page 5)

Dr. Oswald

(Continued from page 1)

research and service with as minimal an adverse effect on quality as is humanly possible.

"I am confident," he added, "that the fiscal dilemma will be resolved, but I cannot stress strongly enough the need for early action because the interest we are paying mounts daily."

"It is important to emphasize, however, that this is not just a Penn State problem," Dr. Oswald continued, "but one of all the State-aided and State-related institutions and indeed of some 78 private institutions which receive Institutional Assistance Grants based on the number of PHEA students they enroll. I assure you that there is a strong, cooperative solidarity among all of higher education in the State as we work toward a solution."

Some in his audience, the President said, might be unaware of the magnitude of the scope of higher education in Pennsylvania. About 119 institutions enroll nearly 400,000 students and employ almost 99,000 full-time faculty and staff.

They spend \$130 million annually on research—much of it at Penn State—and collectively these institutions withhold about \$93 million in State and local taxes.

Dr. Oswald said he believed that there is less questioning of the value of higher education today than of how to keep it vital amidst a great variety of other competing needs.

"These are not easy fiscal times for our State or other states," he said, "as they strive to meet the ever escalating expectations of citizens for services, be they basic education, higher education, health care delivery, social welfare, care of the aged, transportation, and the like."

For the future, Dr. Oswald said, "We must discover and activate ways and means to keep this great University vital and responsive in a period of leveling of growth both in number of students and faculty support."

Accordingly, planning for more effective budgeting will be a high priority item for him next year, the President reported, adding: "We must fine tune the budgetary dollars that are available to our programmatic needs and at the same time conceive planning extending beyond the

present year."

Turning to academic personnel policies and PS-23 (the Promotion and Tenure Review Process), the President told his listeners: "At any time, and especially during a period of fiscal stringency and uncertainty, it is critical that the tenure and promotion policy has continuity and stability, but at the same time we must recognize the need for continuing review."

"But there are other personnel policies that are very important. In some areas of this University, there is a void that needs to be cared for. I am very aware that there are a number of non-tenure appointments, i.e., fixed-term appointments, instructors and research assistants and others for whom we do not have clearly articulated policies which spell out due process, peer review and other factors. It is very important that we work on these with appropriate faculty groups."

Finally, the President voiced his intention to maximize the effectiveness of ties between University Park and the Commonwealth Campuses.

"For students, we have a unique and

remarkably effective network," he pointed out. "We truly do have one University program geographically dispersed. But this kind of system is not so easy in the case of the faculty. There are some 800 or 900 faculty residing on the Campuses, who, by the nature of the organization, have, if you will, dual loyalties and responsibilities to their Campus on the one hand and to an academic discipline through a department or College at University Park on the other. With one such a system there are bound to be tensions. Our task is to make them healthy and creative tensions."

"You are all aware that we have in the past looked at basic changes which might be helpful in this regard, such as the possibility of developing a University College or special departments recognizing this dual role. For my part, I plan to work with the appropriate groups to try and develop the best possible policies. We must constantly strive to keep this unique but complex system working at its best. I pledge to give whatever leadership I can in developing this as a priority item during the year ahead."

Dr. Eddy

(Continued from page 1)

This attitude, according to the Provost, "encouraged a culture of cheating in higher education—in the classroom, in the laboratory, and, perhaps most tragically, in the individual who fails to recognize his or her own possibilities."

Such academic dishonesty, he continued, "subverts any quest for quality and has no place on a campus devoted to the pursuit and promulgation of truth."

Faculty members, Dr. Eddy noted, have some catching-up to do. Today's students may be ready "for more than we are prepared to offer, but, with a bit of encouragement, we could join together in a new rebellion of rising expectations."

Reporting that he believed there is now a genuine desire for excellence among students, Dr. Eddy added:

"It will serve no good or useful purpose if we smother that concern in the belief

that quality somehow is dependent solely on the supply of money—for facilities, for staffing, for ourselves. Indeed, a time of limited resources may have at least one benefit—it forces hidden assumptions out into the open. No longer can we think that more and more means better and better and that quality surely arrives with the next building, the added appointment, the added appropriation, the new grant."

"Quality is a state of mind, not a condition. It is the belief that each of us is capable of a higher level of performance regardless of the condition. Quality is the consuming love of knowledge—and the excitement which comes from discovery and from beholding the beauty of the acquisition of new ideas. And it is both infectious and contagious."

Dr. Eddy called on faculty members to reexamine their priorities, to ask what they really expect from their students and themselves and whether their expectations are big and bold enough.

"If higher education is to develop social responsibility while it disciplines the mind," he said, "if it is to provide guidance for the uses as well as the production of knowledge, if it is to yield wisdom and not only information, then we need a new rationale for thinking about and attaining these goals."

"Quality in higher learning isn't pursued through longer classes and heavier assignments. That's an uninspired route. I like to think that it is attained through mutual respect and mutually accepted levels of expectations, and from the affirmations and judgments which flow therefrom."

"We must expect the best, we must require the best, and we must be content only when each student is dissatisfied with less than the best."

Faculty can contribute to their students' quest for quality by demonstrating in their teaching and in their lives a genuine concern for higher expectations. Value awareness and analysis lie at the core of all

higher learning, Dr. Eddy stressed.

"I am trying to say," he continued, "that education must help all of us to identify the commitments by which we live and make our choices. A critical awareness of our values reveals where we really stand, what we truly cherish and what our standards actually are."

"Higher education gives us the opportunity to help students understand what it truly can mean to be a human being—and not just one more engineer, scientist or humanist cluttering up the job market."

Noting that since he came to Penn State in August he had been deeply impressed by the commitment of the faculty, Dr. Eddy concluded:

"That's a tremendous first step toward the acceptance of integrity as the basis of quality. From that base we can move easily to a consuming concern for both truth and for people."

"And that, I contend, is higher learning at its very finest."

Dr. Daubert

(Continued from page 1)

education, remain consistent, he added that specific educational needs change as society changes. Because of that, he said, faculty must continually "reevaluate and adjust all of our programs."

Dr. Daubert listed four major issues in undergraduate education which have been, or are currently being, discussed by the Senate, and he posed questions about the academic priorities implicit in each issue.

On the subject of baccalaureate degree requirements, currently under consideration by a special Senate committee, he said faculty need to decide what areas are essential to develop the general capability of every student.

Furthermore, he said, faculty should determine how, in the context of each program, degree requirements can best be met, either through coursework or other kinds of experience.

A second issue, admissions standards, came before the Senate last spring, when revised general policies on requirements for admission to, and transfer between, Colleges and programs were passed. With the new legislation, Dr. Daubert said, each College and program has the option of setting its standards above a fixed minimum.

"Faculties and administrators will have to consider their academic priorities in

balancing the number and quality of students admitted to programs with the total resources available," he said.

The third major policy area Dr. Daubert discussed was minimum student retention and graduation standards, which are set by Senate policy. He pointed out that a policy on retention of students in degree programs, recently passed by the Senate, allows faculty within each program to raise their retention standards if they feel they must do so.

An important question which should be asked in setting standards, he continued, is whether students should have to demonstrate some level of competency upon completion of the program.

The fourth and final issue Dr. Daubert raised was the establishment of new courses and programs. He cautioned that faculty must be more diligent in weeding out courses and programs that are not absolutely necessary or that duplicate each other.

Dr. Daubert concluded with a plea to the faculty to remember the importance of their role in determining the University's future strength.

"It is important for the Senate and the faculty of each College and program to act wisely and promptly on setting their respective academic priorities in instruction, research and public service areas. Otherwise decisions tend to be reactive and are made hastily to solve specific problems," he said.

New appointments to the faculty

Linda A. Craighead as assistant professor of education at University Park. B.A., Vanderbilt U.; M.S., Ph.D., Penn State. Formerly U.S. Public Health Service Fellow; clinical psychologist, Williamsport Hospital.

Timothy J. DeYoung as assistant professor of political science at Behrend College. B.A., Chapman College; M.A., Ph.D., Claremont Graduate School. Formerly with Peace Corps, Nepal.

Frank M. Downing as instructor in health and physical education and academic athletic advisor at University Park. A.B., Lafayette College; M.A., U. of Miami; Ed.D., Memphis State U. Formerly academic athletic advisor, U. of Kentucky; assistant advisor, Memphis State; high school teacher and football coach.

Pamela A. Miller as assistant professor of English at University Park. B.A., M.A., Penn State; Ph.D., U. of Texas at Austin. Formerly assistant professor, Slippery Rock State College.

Philip J. Morris as assistant professor of aerospace engineering at University Park. B.Sc., M.Sc., Ph.D., U. of Southampton, England. Formerly research/design development, Lockheed-Georgia Co.

Patricia J. Morton as head, cataloging, assistant librarian at Hershey. B.A., M.S.L.S., U. of Kentucky. Formerly acquisitions librarian, Edinboro State College; medical librarian, St. Vincent Health Center, Erie.

Lawrence W. Rosenfield as professor of speech communication at University Park. B.A., Cornell U.; M.A., U. of Illinois; Ph.D., Cornell. Formerly professor, U. of Wisconsin and Hunter College.

Anne H. Rowley as assistant professor of English at Behrend College. B.A., Lake Erie College; M.A., Ph.D., Case Western Reserve U. Formerly assistant professor, director of freshman English, Case Western Reserve.

Paul T. Sindelar as assistant professor of education at University Park. A.B., Dartmouth College; M.S., U. of Illinois; Ph.D., U. of Minnesota.

Rene B. Steffenmeier as assistant professor of sociology at Altoona. B.A., Rockford College; M.A., Ph.D., U. of Iowa. Formerly instructor, North Carolina State U.

Emily J. Toth as assistant professor of English at University Park. B.A., Swarthmore College; M.A., Ph.D., Johns Hopkins U. Formerly assistant professor, U. of North Dakota.

Nancy J. Treat as assistant professor of human development at Fayette. A.B., M.A., Ph.D., West Virginia U.

Mark D. Widome as assistant professor of pediatrics at Hershey. B.A., U. of Pennsylvania; M.D., Jefferson Medical College. Pediatric resident, Childrens Hospital of Pittsburgh; Public Health Fellowship, Johns Hopkins.

Arts Roundup

Arts critic is visiting fellow

Philip Radcliffe, head of Communications at the University of Manchester and music and theatre critic for two London papers, the Daily Mail and The Sunday Times, will be at University Park Oct. 12-18 as a visiting fellow in the Colleges of Arts and Architecture and Liberal Arts. His visit is being sponsored by the University's Institute for the Arts and Humanistic Studies.

During his week's residency, Mr. Radcliffe will present several public talks. A lecture, "TV: Culture with a Capital C," is scheduled for 8 p.m. on Thursday, Oct. 13, in Room 112 Kern Bldg. At 12:45 p.m. on Friday, Oct. 14, in the Playhouse Theatre, Mr. Radcliffe will talk in an open session with students in advanced theatre and journalism classes on the topic "Criticism at Large." At 10:30 a.m. on Tuesday, Oct. 18, he will meet informally with students and other interested persons in the Playhouse Theatre, and that same day at 12:15 he will address the Comparative Literature Luncheon at the Faculty Club on the topic "Media and Development."

After graduating from the University of Sheffield in 1953, Mr. Radcliffe served with the Royal Navy and the British Intelligence Corps, and was trained at Cambridge University as a Russian interpreter.

His journalism experience includes positions with the Bolton Evening News, The Manchester Guardian, The Times Literary Supplement, John O'London's, and the Daily Telegraph, as well as The Sunday Times and the Daily Mail. In addition he spent six years at the BBC working in news, current affairs and documentaries.

Mr. Radcliffe joined the University of Manchester in 1969. He assisted in the development of the Mass Media in Britain course that is run at Manchester each spring for Penn State study-abroad students.

Mr. Radcliffe previously visited the University as a guest lecturer in 1972 and 1975.

Artist to lecture

Sculptor William King, who will visit the University Oct. 9-14 as artist-in-residence in the Department of Art, will present a free public slide lecture on his work at 7 p.m. on Monday, Oct. 12 in Room 202 Forum Bldg.

An exhibition of Mr. King's work will be shown in Zoller Gallery Oct. 8-21, with a public reception in honor of the artist in the Gallery from 3-5 p.m. on Sunday, Oct. 9.

Mr. King is best known for his sculptures of human figures. He has worked in a wide range of media, including fabric, bronze, plaster and wood. His most recent pieces are of sheet aluminum.

A Florida native, Mr. King studied engineering and architecture before turning to sculpture. He graduated from the Cooper Union Art School and attended the Accademia dei Belle Arti in Rome on a Fulbright grant.

His teaching experience includes appointments at the Brooklyn Art Museum School, the University of California at Berkeley, the Art Students League, the University of Pennsylvania

and the State Universities of New York at Potsdam, Fredonia and New Paltz.

Mr. King's visit is sponsored by the Institute for the Arts and Humanistic Studies.

Chamber group to play

Musica da Camera, the University's chamber orchestra, will present a concert at 8:30 p.m. on Wednesday, Oct. 12, in the Music Building recital hall.

Dr. D. Douglas Miller, associate professor of music, conducts the group. The program will open with Overture Number 3, BWV 1068, one of three overtures by J. S. Bach. The baroque piece will be followed by a contemporary work, *Viere Kleine Stücke für Streichorchester* (Four Pieces for String Orchestra) by Karel Husa. Husa, who has won a Pulitzer Prize in composition, is Czech-born but has spent the past 20 years on the faculty of Cornell University.

The evening will conclude with Franz Schubert's Symphony No. 5 in B-flat major.

Trehy offers recital

Robert Trehy, baritone, will present the first of three recitals devoted to the songs of Franz Schubert, at 8:30 p.m. on Monday, Oct. 10, in the Music Building recital hall. He will be accompanied by pianist John Wustman.

This is the 150th anniversary of Schubert's death, according to Mr. Trehy, who will perform eight songs set to poems by Goethe and the famous *Schwanengesang*, 14 songs that were the composer's last works.

Mr. Wustman, whose appearance with Mr. Trehy is supported by a grant from the Institute for the Arts and Humanistic Studies, is a professor of music at the University of Illinois.

Wind ensemble concert

The Penn State Symphonic Wind Ensemble, under the direction of Smith Toulson, associate professor of music, will present its first concert of the season at 8:30 p.m. on Friday, Oct. 7, in the Music Building recital hall.

Highlighting the program will be works featuring the percussion and flute sections of the ensemble. Included are Michael Colgrass's *Concerto for Timpani with Brass and Percussion*, Eugene Bozza's *Jour et la nuit*, Maurice Strakosky's *Overture for Dimitri Shostakovich*, *Tritico for Symphonic Band* by Václav Nelhybel, and *Jericho*, a tone poem by Morton Gould.

Wood-carver exhibiting

Wood carvings by Lester E. Rishel, a research assistant in forestry at the University, are on exhibit in the Kern Commons Gallery through Saturday, Oct. 15.

Mr. Rishel, who lives in Bellefonte, is a self-taught wood-carver and has been a carpenter and a teacher of carpentry. Six years ago he began wood carving seriously and since last September has included chainsaw carving in his work. He has demonstrated, as an artist-in-action, at the Central Pennsylvania Festival of the Arts, the Ag Progress Days, and the State show of the Pennsylvania Guild of Craftsman.

Looking over the music for their joint concert are (from left): Phil Carles, Blue Band; Pat Hauch, Glee Club; Dr. Ned C. Deihl, Blue Band director; W. Bruce Trinkle, Glee Club director; Jill Kimberly and Steve Bell, Glee Club; and Ed Ober, Blue Band.

Blue Band, Glee Club to perform jointly for Homecoming

For the first time in its history, the marching Blue Band will perform indoors on Saturday, Oct. 8, at 7:30 p.m. joint concert with the University Glee Club. The concert, to take place at Eisenhower Auditorium, will be part of Homecoming weekend festivities.

According to Dr. Ned C. Deihl, director of the Blue Band, this will be the first indoor performance for the marching Blue Band, although the concert Blue Band regularly presents a spring concert.

The Glee Club, which will perform first, will sing Handel's "Hallelujah, Amen," followed by a group of Pennsylvania folksongs and songs by Pennsylvania composers. The program will include some new arrangements of songs from the Bicentennial Wagon Train Show.

In addition, the Glee Club selections will include "I Want More Religion," a Pennsylvania spiritual collected by folklorist Samuel Bayard, professor emeritus of English and comparative

literature. The arrangement for male voices, done by Glee Club director W. Bruce Trinkle, will feature a tenor solo by David Hudson, assistant director of the Glee Club.

Following the Glee Club selections, there will be a performance of English folksongs by the Hi-Lo's.

The Blue Band's portion of the program will include a number of school songs and other old favorites regularly performed at the football games. There will also be pop and rock selections, and the Penn State majorettes and flag corps, with star twirler Lori Donaldson, will perform.

To conclude the show, the Glee Club and Blue Band will present the premiere performance of the new Nittany Lion fight song, "Roar Lion Roar," which was written by State College area band director Richard Victor. The song won a fight song competition sponsored by the Homecoming Committee last spring.

Ferry." The hour-long documentary examines the circumstances surrounding the country's worst nuclear reactor accident. On Thursday at 9 p.m., The Advocates presents both sides of the nuclear power controversy. In a revival of an earlier public television debate format, the program asks the question: "Should there be a moratorium on nuclear power plant construction?"

News in brief

(Continued from page 1)

Religious Studies, the lecture will be presented from 2:30 to 4 p.m. in Room 101 Kern Bldg.

Dr. Sklare specializes in the study of racial, ethnic and religious groups, with particular emphasis on the sociology of the American Jew. He was formerly professor of sociology at Yeshiva University and has served as a visiting professor at Hebrew University, the Princeton Theological Seminary and Clark University.

Dr. Sklare is probably best known for his book, *Conservative Judaism: An American Religious Movement*. His most recent books are *The Jew in American Society* and *The Jewish Community in America*. Another of his volumes, *America's Jews*, is widely used as an introduction to the sociology of American Judaism.

His M.A. was granted by the University of Chicago and his Ph.D. by Columbia University.

Saubel presented alumni award

A retired faculty member deeply concerned for the welfare of her students is the 1977 recipient of the Alumni Recognition Award of the College of Human Development.

Evelyn R. Saubel, who retired July 1, 1976, as assistant professor of general family studies, will receive the award Tuesday, Oct. 11, at an afternoon session of the tenth anniversary observance of the College of Human Development in the HUB ballroom.

The award was established in 1973 to recognize achievements of alumni and provide an opportunity for them to return to campus and meet with faculty and students.

Mrs. Saubel was nominated by her former students for "playing a continuing significant part in student professional development while at Penn State and after her retirement."

A 1935 graduate of Penn State in home economics education, Mrs. Saubel did graduate work at Dickinson College and Penn State. She joined the University faculty in 1954 as a part-time instructor in home economics education, supervising the student teacher practicum. She became a full-time faculty member in 1965 and served as advisor to "News and Views," the student publication. In 1971, she was named assistant to the Dean in charge of student affairs and coordinated activities for student organizations.

HUB to offer special Homecoming dinner menus

The Terrace Room will celebrate Homecoming Weekend with candlelight dinners, served from 4:45 to 7 p.m., on Friday, Oct. 7, and Saturday, Oct. 8.

The menu for both evenings will be braised veal with mushroom and wine sauce, prime rib of beef au jus, seafood O'Brien on a bed of rice, roast turkey with bread dressing, stuffed pork chops with apple raisin dressing and Swiss steak.

In addition, there will be live entertainment both evenings. On Friday, Phi Mu Alpha's Dixieland and German bands will perform. On Saturday, dinner music will be provided by the Rio Group.

Since the Homecoming Parade will come up Shortledge Rd. at the dinner hour on Friday evening, motorists should go east on Pollock Rd. and park behind Boucke Bldg.

Daily information about Terrace Room menus is available through the Dial-A-Menu service, which is in operation 24 hours a day, seven days a week. The number to call is 865-1516.

Skating lessons offered

Penn State's Ice Skating School will begin its 1977-78 season on Tuesday, Oct. 11, under the direction of Kurt Oppelt, assistant professor of physical education and a former Olympic Gold Medal Winner.

Lessons will be offered adults and teen-agers every Tuesday from 6:40 to 7:40 p.m. or Wednesdays from 7 to 8 p.m. Classes for children will be held on Saturday afternoons from 12:30 to 1:30 p.m. and on Tuesdays from 5:20 to 6:20 p.m.

Registration for all classes will be held on a first-come basis on Thursday, Oct. 6, from 7 to 9 p.m. at the University Ice Pavilion. A fee of \$60 (for 20 sessions) or \$35 (for 10 sessions) must accompany each registration. Special family rates are available.

Mueller to retire; replacement sought

Ralph E. Zilly, vice president for business, in announcing the July 1, 1978, retirement of Otto E. Mueller, assistant vice president for housing and food service operations, invites nominations and applications for this position.

The primary responsibility of the position is to provide administrative leadership to the University-wide housing and food services operation. Applicants for the position should demonstrate significant experience in housing or food services administration, preferably in a higher education setting. A bachelor's degree, or equivalent experience, is required.

Nominations or applications should be sent to the University's Employment Division, Department 1, Room 117 Willard Bldg., University Park, PA 16802. The deadline for applications is Nov. 1.

Conference to deal with Art and the Special Child

Robert Koslosky, an outstanding consultant in the field of art in special education, will conduct a conference Saturday, Oct. 15, at the University on Art and the Special Child. The conference will present the latest information on State mandates and guidelines, mainstreaming, gifted child programs, and special education approaches that have proven successful. It is intended for art and special education teachers, gifted child resource persons, and concerned administrators.

Further information is available by calling Keller Conference Center at 865-7557. The conference is a continuing education service of the College of Education.

Inn to host post-game parties

The Nittany Lion Inn is hosting a post-game party, with a live band and cash bar, following each home football game this year. The parties are open to all University football fans and will provide a meeting place for visiting alumni and area residents.

Winter reserve lists due

Reserve reading lists for winter term 1978 should be submitted to the Reserve Reading Room, W11 Pattee, on or before Oct. 18 to allow ample time for processing. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes; all reserve lists will be processed strictly in order received.

Only required readings, which will circulate either for a two-hour period or for an overnight loan period, will be placed on reserve.

Typewritten lists should be submitted on reserve forms which are available by mail or in person from the Reserve Reading Room, W11 Pattee.

Crafts festival at Stone Valley

The Shaver's Creek Nature Center is presenting its second annual Old Time Pioneer Crafts Festival on Sunday, Oct. 16, from noon to 5 p.m. at the Stone Valley Recreation Area. Families are invited to come out and watch demonstrations of candle making, spinning and weaving, food drying, and woodcarving. Various uses for herbs and wildflowers will be shown, as well as aspects of Indian lore.

Anyone for Cal Club?

Anyone who studied at one of the University of California's campuses is eligible to join Cal Club. The group meets every other month. Interested persons should contact Prof. Howard Lawrence at 865-9535.

Editor to speak

Jeremiah Novak, consulting editor for The Asia Mail who frequently writes and speaks on international economics, will speak on "Life in the Year 2000," on Friday, Oct. 7, at 7 p.m. in Eisenhower Lounge. The program is sponsored by the Newman Club and is open to the public.

Movement education classes offered

A movement education program for children of kindergarten to third grade ages will be held at the University, sponsored by the College of Health, Physical Education, and Recreation. Classes, which will include basic movement skills, games and educational gymnastics, will meet from 4 to 5 p.m. on Thursdays, starting Oct 13 and continuing through Nov. 10. Classes will be held in the gymnasium of White Bldg. Registration for the classes is scheduled for 3:45 to 4 p.m. Thursday, Oct 13, at White Bldg., immediately before the first class.

Local No. 8 to vote Oct. 11

A vote seeking ratification of the Fact Finder's wage settlement recommendation in the dispute between the University and Teamsters Union Local No. 8 will be held on Tuesday, Oct. 11, at 7 p.m. in Eisenhower Auditorium at University Park.

Representatives of Local No. 8 will make direct contact with members not at University Park between now and Oct. 11. They will visit the Commonwealth Campuses, Capitol Campus, Behrend College and The Milton S. Hershey Medical Center.

Following two days of formal hearings, Fact Finder Robert David Kreitler strongly recommended a wage settlement which both parties have tentatively accepted.

The University had previously offered wage increases from 20 cents to 31 cents per hour. The Union demand ranged from 25 cents to 55 cents per hour.

Mr. Kreitler recommended wage rates ranging from 24 cents to 42 cents per hour. He said he based his recommendation upon all of the factors and evidence presented by the two parties during the extensive hearings.

Responding to the Fact Finder's recommendation, President Oswald said that the University is reluctantly prepared to accept the independent recommendation of the Fact Finder. He pointed out that the University has already announced salary increases for faculty and other staff.

The officers and executive committee of Local No. 8 stated that they unanimously recommend approval of the recommended settlement to their membership.

Eddy visits Campuses

Provost Edward H. Eddy made his first formal tour of the Commonwealth Campuses last week, meeting with faculty, staff, and students at the Shenango Valley and DuBois Campuses and at Behrend College.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring prohibition. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Oct. 13. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

ASSISTANT DIRECTOR, ISIA (INTERNATIONAL STUDENT AFFAIRS), STUDENT AFFAIRS — University Park. Responsible to the Director of International Student Affairs for the implementation, planning and execution of community, social, and cultural programs sponsored by International Student Affairs. Master's degree, or equivalent, with some preparation in counseling or related area, and up to one year of directly related experience.

MANAGER, MUSHROOM RESEARCH CENTER, AGRICULTURE — University Park. Responsible to the Director of the Mushroom Research Center for planning, implementing and supervising practices and procedures necessary for mushroom research; conduct quality control functions and pest management practices, and diagnose disorders of mechanical, pneumatic or electrical components integral to the operation of the Mushroom Research Center. Master of science degree, or equivalent, in science or biological engineering, plus one to two years of directly related experience in industrial microbiology and/or food sciences, or bachelor of science degree, or equivalent, plus two to three years of directly related experience in same.

INSTRUCTIONAL SERVICES OFFICER — Capital. Responsible to Dean of Faculty for effective utilization of instructional media, including instructional television, audio-visual and instructional materials services. Master's degree, or equivalent, preferably in instructional media and a minimum of one year of directly related experience is required.

Penn State Intercom

Basic skills credits to count toward graduation

Credits earned in the two existing basic skills courses will be included in the student's cumulative grade-point average, following action taken by the University Faculty Senate last week.

In addition, credits from the two courses, English 4 (three credits) and Math 198B, will be counted among the total credits earned toward graduation, but will not substitute for minimum program requirements currently designated as "Baccalaureate Degree Requirements," "Requirements for the Major," and "Electives."

Senate, faculty discussion Oct. 18

The third open discussion session between Senate officers and faculty will be held on Tuesday, Oct. 18, from 11 a.m. to noon in Room 101 Kern Bldg. The officers would like to hear about faculty problems and suggestions for the University as a whole and to discuss pending legislation and suggestions for items which should be considered by the Senate.

The Senate action, an amendment of the legislation that created the basic skills program, was taken because the original legislation conflicted with Pennsylvania Higher Education Assistance Agency (PHEAA) requirements.

Specifically, PHEAA requires that students carry a minimum of eight credits per term which are applicable toward a degree and successfully complete a minimum of 24 credits per academic year. When the basic skills program was created, it was specified that courses would not be used to satisfy basic minimum requirements for graduation and would not be used in calculating grade-point averages.

The basic skills program was established last spring for incoming students found to be deficient in basic math and English (primarily writing) skills.

Senate Chairman-Elect Lee Saperstein, who represented the Senate Council in proposing the amendment, said several thousand Penn State students currently receive PHEAA financial assistance. If the amendment were not approved, he said, many students would either have to take more courses than their advisers recommended or face the loss of their PHEAA aid.

The Senate action followed a report by Senator George McMurtry, chairman of the special committee on Basic Skills, on the progress of the basic skills program.

Dr. McMurtry said 12,000 incoming students have taken entrance exams to determine their proficiency in basic math and English since the program was established. During the summer term 1,769 students were found to be deficient in English and 1,854 were found to be deficient in math.

(Continued on page 4)

News in Brief

Berks to celebrate 20th anniversary

President Oswald will visit the Berks Campus on Saturday, Oct. 15, to open a two-day 20th anniversary celebration.

Dr. Oswald will address a morning convocation of students, parents and faculty and then speak at an alumni brunch. Later in the afternoon, he will participate in the opening of the new Berks Campus Nature Area.

Throughout Saturday and Sunday, a number of activities are planned in conjunction with a public open house on the Campus. There will be a Wildlife Art Exhibition, special exhibits by students and faculty members, slide-tape presentations describing the development of the Berks Campus and the use of the new library, and video-taped replays of Dr. Oswald's remarks at the convocation. The celebration will also include an antique car show, showings of the Charlie Chaplin film, *The Gold Rush*, and a presentation of *The Spoon River Anthology* by The Penn Players, the Berks Campus student theatre group.

University to withhold Occupational Privilege Tax

As it did last year, the University will withhold the Occupational Privilege Tax of \$10 from all employees who are based at University Park and are liable for the tax. Since the University will be able to obtain a 2 percent discount for prompt payment, it will pass this saving on to each employee. The deduction will also include an antique car show, showings of the Charlie Chaplin film, *The Gold Rush*, and a presentation of *The Spoon River Anthology* by The Penn Players, the Berks Campus student theatre group.

If any employees wish to appeal their liability for this tax, they should apply directly to Paul D. Bender, Tax Collector, 250 East Beaver Ave., State College, Pa. 16801.

Department Heads are asked to make certain that personnel in their areas are aware of this tax.

Capitol to dedicate Multi-Purpose Bldg.

Dedication ceremonies for Capitol Campus's new Multi-Purpose Bldg. will be held Wednesday, Oct. 19, at 11 a.m.

Participating in the ceremonies will be President John W. Oswald; Provost Edward D. Eddy; Robert E. McDermott, Capitol provost; and George D. Wolf, dean of faculty at Capitol.

Located directly south of the Main Bldg., the new structure houses classrooms, staff offices, and athletic facilities, including a gymnasium, handball courts and areas for other recreational activities.

No U.S. mail on Oct. 24

Mailing Services reminds faculty and staff that there will be no U.S. mail delivery at University Park on Monday, Oct. 24, which is Veterans' Day. Interoffice mail will be picked up and delivered as usual.

Dr. Walker

Eric A. Walker Bldg. dedicated on Saturday

"This University will be ever grateful for the leadership provided to it by Dr. Eric A. Walker," President Oswald said last Saturday morning at ceremonies naming the Eric A. Walker Bldg.

Trustees of the University last March approved the naming of the environmental sciences building for Dr. Walker, who served as president of the University from 1956 to 1970, after holding other administrative and academic posts from 1945 to 1956.

Dr. Oswald noted that 140 major buildings, including academic buildings and residence halls at University Park and other Campuses of the University, were constructed during Dr. Walker's tenure. He noted too that from 1956 to 1970 the University budget rose from \$34 to \$168 million; State appropriations from \$13 to \$69 million; enrollment from 16,000 to 43,000; and the number of full-time faculty from 1,500 to 3,200.

"And during this amazing growth, the quality of our program not only was sustained, but deepened," Dr. Oswald continued, noting also that many important programs were initiated during these years.

Education seeking teaching award nominees

The College of Education is seeking nominations for its Outstanding Teaching Award. The award is presented to a faculty member who exhibits

"outstanding performance as a teacher, adviser, developer of quality instruction processes, and evoker of professional aspiration and competence among students."

Nominations are to be submitted by students or former students from among College of Education faculty members, both undergraduate or graduate, at any of the University's Campuses. Nomination blanks and a list of criteria for the award are available in Room 220 Carpenter Bldg., University Park, Pa. 16802. Nominations close Oct. 31.

Consumers can air complaints Oct. 26

Wednesday, Oct. 26, will be "Gripe Day" for consumers in Centre County. Joseph Sobel, attorney-in-charge at the Harrisburg regional office of the Bureau for Consumer Protection, will meet with interested citizens at 1 p.m. in the HUB assembly room to hear complaints and suggestions regarding consumer affairs in the area. The meeting is sponsored by the consumer committee of the Organization of Town Independent Students (OTIS).

14 banks offering salary deposit service

The University's salary deposit procedure is now available to all salaried employees who have checking accounts in the following banks:

University Park —
Central Counties Bank
Mid-State Bank
Peoples National Bank of Central Pennsylvania
Union National Bank of Huntingdon
First National Bank of Centre Hall
Farmers National Bank, Millheim
The Community Bank, Port Matilda
County National Bank, Philipsburg

Hershey, Capitol, Berks, and York —
Hershey National Bank
The Valley Trust Company of Palmyra
Commonwealth National Bank
National Central Bank

Behrend College —
The First National Bank of Pennsylvania
Marine National Bank

Education re-accredited

The College of Education has been granted a 10-year re-accreditation by the National Council for Accreditation of Teacher Education (NCATE).

NCATE, recognized by the Council on Postsecondary Accreditation as the only national accrediting agency for the field of teacher education, cited several standards which its review team felt the College met "exceptionally well" at the undergraduate level.

These included competence and utilization of faculty, faculty involvement with schools, counseling and advising for students, and the student practicum.

At the graduate level, areas identified as points of strength included design of curricula, research in advanced curriculum, preparation of faculty, and composition of faculty for doctoral degree programs.

The report also noted several deficiencies — lack of clear delineation of the humanistic and behavioral studies in individual programs; use of a large number of adjunct faculty; and insufficient use of follow-up studies on graduates for planning and program improvement purposes.

According to College Dean Henry J. Hermanowicz, a number of steps already have been taken regarding a clearer role of humanistic and behavioral studies in individual programs.

"In addition," he said, "we plan to utilize the College's Instructional Support Center to design and coordinate follow-up studies on our graduates for possible use in program modification."

"We already have reduced the number of professional persons as adjunct faculty."

Editor's note: This is the first in a series of short essays by Penn State faculty members on the function of interdisciplinary studies in higher education. Dr. Joseph J. Kockelmans, professor of philosophy and director of the Interdisciplinary Graduate Program in the Humanities (IGPH), reflects on the program's accomplishments during the past four years. Any faculty member with a substantive contribution to make on this topic is welcome to send an article to INTERCOM.

Seeking to enhance the social relevance of higher education by emphasizing the role of the humanities, the University inaugurated the IGPH in the Fall of 1973 with the support of a four-year grant from the National Endowment for the Humanities.

Between 1973 and 1977, the program developed approximately 50 new graduate courses of a typical interdisciplinary nature; most of these courses were taught by a team. The majority of these courses were very well attended by graduate students from different departments.

During this same period, some 50 faculty members were affiliated with the program: participating in faculty seminars, teaching courses, conducting seminars, advising students, or functioning as members of the program's Steering Committee.

In these first four years of the program, 16 post-doctoral fellows were awarded fellowships to engage in interdisciplinary research and teaching and 26 fellowships were awarded to graduate students, giving them an opportunity to work for one year outside their home departments in fields related to their majors.

As of July 1, 1977, the program will be sponsored by the College of the Liberal Arts, which will maintain all aspects of the program with the exception of the post-doctoral component. In addition, the College has encouraged efforts to expand the program to include faculty and graduate students from departments of other Colleges within the University.

PURPOSE

The purpose of IGPH, as conceived by its Steering Committee, is to provide a non-disciplinary framework where students and faculty whose interests are problem-oriented and whose research

Interdisciplinary education

problems range over more than one discipline can study and teach outside their regular departments.

Those involved in the project have avoided structuring the program around an abstract and preconceived notion of what interdisciplinary study is or should be. Rather they have viewed the IGPH as an invitation to search for new approaches to important problems, both in research and in teaching. Since it was never intended to foster a specific school or trend, the program has tried to make room for all legitimate non-disciplinary efforts on the part of faculty and graduate students; in other words, the program was designed to function as an umbrella for inter-, cross-, and trans-disciplinary innovations in research and teaching.

In all of its efforts the IGPH has been concerned with the relevance of graduate education to contemporary social needs, believing that such relevance requires contact with the humanities. IGPH is a means to problem-oriented research and discourse, not an end in itself. This is one of the reasons the program is committed to interdisciplinary education and research based on a disciplinary foundation.

ORGANIZATION

The main characteristic of the IGPH is its flexibility; therefore there is no set faculty, student body, courses, or special degree. The IGPH tries to work within the existing departments, Colleges and University structures to minimize bureaucratic organization, duplication of efforts, and costs.

The program is directed by a Steering Committee which consists of faculty members and graduate students from different departments and Colleges. This committee functions as one of the standing committees of the College of the Liberal Arts, and its members are therefore appointed by the Dean of the College. A Program Director administers the program on a day-to-day basis. Each year the program offers ten to twelve graduate seminars or courses under the auspices of the participating departments. When necessary, these seminars and courses are prepared in faculty seminars. The program develops three faculty

seminars each year to make certain that the courses or seminars it offers are very well prepared and respond to an actual need expressed by its graduate students.

Faculty are recruited from among those professors who manifest an interest and have demonstrated competence in interdisciplinary graduate education. It is their responsibility to develop and offer interdisciplinary courses and seminars, participate in the faculty seminars, advise students, and function as members of the students' doctoral committees, where applicable.

Students affiliated with IGPH are as a rule enrolled in one of the graduate programs of the University. At the beginning of their final phase of graduate course work, they take one year to study outside their regular departments under the guidance of the IGPH Director and one or more faculty members competent in the areas of their choice. After this year of "forensic" study, the students usually return to their home departments to complete their doctoral education.

Students who prefer not to complete their graduate education in one of the existing graduate programs but are interested in non-departmental degrees are entitled to petition the Graduate School for special committees to serve as ad hoc "departments" guiding their graduate studies.

THE PROGRAM AND THE UNIVERSITY

Developing a new graduate program in a university with well over 100 functioning degree granting programs presents some real challenges. Over the past four years, it has not always been easy to explain the function of this new graduate program within our University. For many people it is difficult to understand why a large university with so many graduate programs would find it desirable to develop one more interdisciplinary program.

To clarify the program's function within the University, it is perhaps helpful to state once again that the primary aim of the program is to promote interdisciplinary work in both teaching and research, in order to make graduate

education more socially relevant and to make certain that specialization and training continue to go hand in hand with genuine education, which, in our opinion, to a great extent must flow from contact with the humanities. From a purely practical point of view this means that the program attempts to establish a meaningful contact between faculty and students who work in different disciplines or programs in such a manner that the humanities constitute an important part. It attempts to establish this contact by developing transdisciplinary courses, seminars, faculty seminars and conferences. In addition, the program tries to promote any form of interdisciplinary work taken in the broad sense, provided this work can be done on the graduate level. Yet although it promotes the development of interdisciplinary graduate programs, the program itself is not meant to become a degree granting program. Its primary goal is, rather, to establish meaningful relationships between existing programs.

The questions of whether or not new interdisciplinary graduate programs should be developed, how many there should be, and which in particular should be created first, etc., can be answered only by the faculty members actually competent in the relevant fields or areas and by the administration. One must realize, however, that once such programs are developed, they will substantially function in a manner similar to that in which departments developed for the various disciplines have functioned in the past. Interdisciplinary programs will be primarily self-oriented and function as relatively closed systems. The number of faculty involved in such programs as well as the total number of graduate students enrolled in them, will be relatively small compared to the total number of faculty and graduate students in the University as a whole. Thus, even if one were to succeed in promoting a number of new interdisciplinary graduate programs, one would still not have succeeded in accomplishing the main goal of our new program: namely, to establish meaningful contacts between those who work in these relatively closed fields, in order to make certain that all of our graduate education is socially relevant and that specialization continues to go hand in hand with a genuine, human education.

Joseph J. Kockelmans

Penn Staters

Dr. James B. Bartoo, a specialist in mathematical statistics and dean of the Graduate School, is marking his 25th year at the University.

Dr. Bartoo came to Penn State as an assistant professor of mathematics in 1952. In 1957 he was promoted to associate professor and in 1960, to professor. That same year, he became head of the Department of Mathematics.

During his tenure in that position, he encouraged the development of several new programs, and eventually a separate Department of Computer Science was established. When a new Department of

Statistics was formed in 1968, Dr. Bartoo became its head. He moved to his current position in 1969.

Before coming to Penn State, Dr. Bartoo was an instructor of mathematics at the State University of Iowa and before that, he taught mathematics in the Erie School District.

A native of Swanton, Vt., he holds a B.S. in education from the State Teachers College at Edinboro, Pa., and an M.S. and Ph.D. in mathematics from the State University of Iowa.

His research specialties are mathematical statistics, especially order statistics, distribution theory, and asymptotic test theory. He has been associated with a number of programs to improve the teaching of mathematics in Pennsylvania high schools.

For the first seven months of this year, Dr. Bartoo served as Interim Provost of the University, following the retirement of Dr. Russell Larson. In 1970 he served for several months as acting vice president for research.

Dr. Bernard J. Busovine, director of graduate admissions, participated in the Latin American Admission and Placement Workshop held from Sept. 22 to Oct. 9 in Rio de Janeiro. The workshop was sponsored by the American Association of Collegiate Registrars and Admissions Officers and the National Association of Foreign Student Affairs. Twenty participants were chosen among

applicants who have the major responsibility at their institutions for the admission and placement of foreign students.

Edward T. Reutzel has been promoted to assistant professor of management science in the College of Business Administration, effective Sept. 1.

Larry A. Hull has been promoted to assistant professor of entomology in the College of Agriculture, effective Sept. 1.

Dr. Inyong Ham, professor of industrial engineering, served as chairman of the 4th International Conference on Production Research, held in Tokyo Aug. 21-26. Dr. Ham also presented an invited lecture in Osaka on "Current and Future Trends of Manufacturing Systems" at an international symposium on this topic. He delivered a second paper, "Current and Future Trends of Integrated Computer Aided Manufacturing," at a special International Production Management Seminar in Tokyo. In New Delhi, India, Dr. Ham was co-chairman of the Production Design session of the International Conference on Production Engineering, held Aug. 27-28. He also delivered a paper at the 29th General Assembly of the International Institution for Production Engineering Research. His topic was "Machine Loading for Group Technology Applications."

Appointments

Bruce A. Albrecht as assistant professor of meteorology at University Park. B.S., Illinois State U.; M.S., Ph.D., Colorado State U. Formerly research associate, Colorado State U.

Mary P. Bradley as assistant professor of mathematics at York. A.B., Catholic U. of America; M.A., Ph.D., Georgetown U. Formerly assistant professor, George Mason U. and Ferrum College.

Joe P. Buhler as assistant professor of mathematics at University Park. B.A., Reed College; Ph.D., Harvard U.

Robert G. Clark as associate professor of general engineering at Hazleton. B.S., Penn State U.; M.S., U. of Pennsylvania; Ph.D., Walden U. Formerly mechanical engineer, Carpenter Technology, Bethlehem, Pa.; assistant professor, Lehigh Community College.

Susan A. Collins as instructor of special education at University Park. B.A., Millersville State College; M.S., Penn State U. Formerly teacher, Phillipsburg, Pa.; social worker, Mays Landing, N.J.

Rodney A. Erickson as assistant professor of geography at University Park. B.A., M.A., U. of Minnesota; Ph.D., U. of Washington. Formerly assistant professor, U. of Wisconsin.

University Park Calendar

Oct. 13-23

Special Events

Thursday, Oct. 13

IAHS lecture, Philip Radcliffe, University of Manchester, on "TV: Culture with a Capital C?" 8 p.m., Room 112 Kern.

University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Friday, Oct. 14

Sports: soccer, vs. Maryland, 7 p.m. Folk and square dance roundup, 7:30 p.m., Room 133 White.

Shaver's Creek Nature Center, Stars, Myths and Legends, 8 p.m., Stone Valley.

University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Jill Olson, piano, 8:30 p.m., Music Bldg. recital hall.

Penn State Faculty Club fall dance, "The Hobbler Hop," 9 p.m., Faculty Club.

Saturday, Oct. 15

P.S.O.C. Hiking Division, overnight foraging trip, through Sunday.

Shaver's Creek Nature Center, Adventure Series, children 7 and older, registration necessary—865-1851, 10 a.m.-3 p.m., Stone Valley.

Sports: men's cross country, Penn State Open; women's cross country, vs. Michigan State; women's golf, EIAAW Championships; field hockey, vs. East Stroudsburg, 2 p.m.; women's volleyball, vs. Robert Morris, 3 p.m.

University Theatre, *A View From the Bridge*, 8 p.m., Pavilion Theatre.

Artists Series, National Theatre of the Deaf, 8:30 p.m., Eisenhower Auditorium.

Sunday, Oct. 16

P.S.O.C. Hiking Division, famous flaming fall foliage hike in Thickhead Mountain Wild Area, 9 a.m., HUB parking lot.

Sports: women's golf, EIAAW Championships.

University Chapel service, Stanley O. Ikenberry, senior vice president for University development and relations, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Old Time Pioneer Crafts Festival, noon-5 p.m., Stone Valley.

Colloquy, "The Wide World of Health," Dr. Michael DeBakey, heart surgeon, 8 p.m., HUB ballroom.

Monday, Oct. 17

Colloquy, "The Wide World of Health," Michael Green on "Diet and Heart Disease," 1 p.m., HUB assembly hall; Gerald Phillips on "Rhetorically," 7:30 p.m., Room 112 Kern.

Comp. Lit. Film Series, *The Crusades: Saints and Sinners*, 8 p.m., Room 217 Willard. Free admission.

June Miller, organ, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Oct. 18

Friends of the Museum of Art Gallery Talk.

Hedy Landman, museum consultant, on "East to West: Chinese Export Porcelain," 10:30 a.m., Museum of Art.

Comp. Lit. luncheon, 12:15 p.m., Room 1 Faculty Club. Philip Radcliffe, University of Manchester, on "Mass Communications and the Developing Countries."

Colloquy, "The Wide World of Health," John Lucas on "Fitness and Running," 1 p.m., HUB main lounge; Dr. Philip Sarrel, Yale University, on "Sex and the College Student," 8 p.m., HUB ballroom.

University Senate officers and faculty discussion, 11 a.m., Room 101 Kern.

English colloquy, John Moore on "The Uses of Poetry: A Theme in *The Shepherds Calendar*," 8 p.m., Room 101 Kern.

Wednesday, Oct. 19

Agricultural Advisory Council meeting, 9:30 a.m., Room 101 Kern.

Colloquy, "The Wide World of Health," Karl Stoedebake and Elsworth Buskirk on "Assessment of Human Performance," 1 p.m., Room 121 Noll Lab; Jeremy Rifkin on "Who Should Play God?" 8 p.m., HUB ballroom.

Graduate Council meeting, 3 p.m., Room 101 Kern.

G.S.A. Commonsplace Theatre, *The Wild Bunch*, 7:30 and 9:30 p.m., Room 112 Kern.

University Chapel service, The Rev. Donald Davis, FSU, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Nature Discovery Walk, 2 p.m., Stone Valley.

Opening reception, Larry Edwards and Bill Hanson, painters, 3-5 p.m., Zoller Gallery.

Opening reception, Art of the 13th Term, 3-5 p.m., Hamann Gallery.

Un-Common Dinner Theatre, dinner, 6:30 p.m., Room 102, theatre, *The Good Doctor*, 8 p.m., Room 112 Kern.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Oct. 23

P.S.O.C. Hiking Division, trail clearing on Mid State Trail, free picnic supper, 9 a.m., HUB parking lot.

University Chapel service, The Rev. Donald Davis, FSU, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Nature Discovery Walk, 2 p.m., Stone Valley.

Opening reception, Larry Edwards and Bill Hanson, painters, 3-5 p.m., Zoller Gallery.

Opening reception, Art of the 13th Term, 3-5 p.m., Hamann Gallery.

Un-Common Dinner Theatre, dinner, 6:30 p.m., Room 102, theatre, *The Good Doctor*, 8 p.m., Room 112 Kern.

Seminars

Friday, Oct. 14

Analytical Chemistry, Bill Milne, NIH, Bethesda, on "The NIH-EPA Chemical Information System," 11:10 a.m., Room 333 Whitmore.

Monday, Oct. 17

Biochemistry and Biophysics, Louis Hass, Hershey, on "Human Red Cell Phosphoglycerate Synthetase and Phosphoglycerate Mutase: Implications in Control of Sickle Cell Anemia, Part I," 3:55 p.m., Room 101 Altohouse.

Organic Chemistry, M. Miljkovic, Hershey, on "Synthesis of Macrolide Antibiotics," 8 p.m., Room 333 Whitmore.

Tuesday, Oct. 18

Biochemistry and Biophysics, Louis Hass, Hershey, on "Human Red Cell Phosphoglycerate Synthetase and Phosphoglycerate Mutase: Implications in Control of Sickle Cell Anemia, Part II," 11:10 a.m., Room 101 Altohouse.

Air Pollution Control, Julian Heicklen on "Chemical Control of Photochemical Smog," 3:20 p.m., Room 140 Fenske.

Genetics, Susan Henderson on "Premature Chromosome Condensation in Eukaryotic Cells," 3:55 p.m., Room 52 Fern.

Engineering Science and Mechanics and Bioengineering Program, Harold Alexander, New Jersey Medical School, on "The Role of the Biomechanics Laboratory in Orthopaedics," 4 p.m., Room 232 Hammond.

Geology, Desmond Pretorius, University of Witwatersrand, on "Some Problems in South African Tectonics," 4 p.m., Room 112 Walker.

Inorganic Chemistry, Gregory L. Geoffroy on "How to Seek and Find Employment in Chemistry," 8 p.m., Room 333 Whitmore.

Thursday, Oct. 20

Agronomy, Keith Schumde, USDA Soil Conservation Service, Washington, D.C., on "Land Inventory and Monitoring Procedures and Programs of the USDA-SCS," 9:35 a.m., Room 111 Tyson.

Ceramic Science, J. A. Coppola, Carbondrum Research and Development Division, on "Sintered Alpha-Silicon Carbide," 11 a.m., Room 301 Mineral Industries.

Chemistry, Thomas C. Bruice, University of California, on "The Mechanism of Oxygen Activation Electron Transfer, and Dehydrogenation Reactions Mediated by Flavins," 12:45 p.m., Room 333 Whitmore.

Applied Research Laboratory, John B. Clay on "Transmission Through a Turbulent Medium," 4 p.m., Room 73 Willard.

Biochemistry and Biophysics, Dennis Burton, University of Lund, Sweden, on "Water-Proton Relaxation as a Probe of Antibody Mobility: Implications for Complement Activation," 4 p.m., Room 101 Altohouse.

Microbiology and Cell Biology, John S. Schutzbach, University of Alabama Medical Center, on "The Incorporation of Mannose into Mammalian Glycoproteins," 4 p.m., Room 52 Fern.

Friday, Oct. 21

Analytical Chemistry, David Dube on "Aspects of Electrochemistry of Vitamin B12," 11:10 a.m., Room 333 Whitmore.

Chambers Gallery: Hugh Stumbo, collages; Jack Troy, ceramics, opens Oct. 21.

Hammond Gallery: Tom Ferguson and Martin Raja, mixed media, opens Oct. 21.

HUB Gallery: Homecoming exhibits, through Oct. 15. San Francisco Posters exhibit; Penn State Wildlife Society exhibit, opens Oct. 15.

Kern Commons Gallery: Michael Ondik, photographs; Lester E. Rishel, woodcarving; Alpha Fire Company National Fire Prevention Week exhibit, all through Oct. 15.

Pennsylvania Guild of Craftswomen exhibit, opens Oct. 15.

Museum of Art: William Clann Bryant Collection: Arne Jacobsen: Danish architect and designer.

Museum of Art HUB Gallery: Esmark Collection of Currier and Ives prints.

Fatter Galleries: Humphrey Repton, English Gardens, Main Lobby, through Oct. 15; Canadian exhibit, Rare Books Room, opens Oct. 17.

Zoller Gallery: William King, sculptures, through Oct. 21; Larry Edwards and Bill Hanson, paintings, opens Oct. 22.

WPSX Highlights

The history of immigration to the United States is explored Friday, Oct. 14, at 9 p.m. on *The Forty Million*, a tribute to the courage and contributions of the 40 million people who left Europe for America beginning in 1850. The hour-long special features interviews with Pierre Samuel duPont, Laura Fermi, and Werner von Braun, who tell of their families' experiences as immigrants.

John Houseman and Irene Worth star in Flannery O'Connor's "The Displaced Person" on *The American Short Story* Sunday, Oct. 16, at 11 p.m.

Visiting Fellow Philip Radcliffe, head of communications at the University of Manchester, England, is the guest on *Talkabout* Tuesday, Oct. 18, at 7:30 p.m. A well-known media critic, Mr. Radcliffe discusses the differences between American and British television and journalism with Robert Farson, associate professor of journalism.

Beverly Sills stars in the New York City Opera's production of *Manon Tuesday*, Oct. 18, at 8 p.m. on *Great Performances: Live From Lincoln Center*.

"I couldn't go into a bank and borrow five cents," says a New York state farmer named Arvilla Groesbeck. "I am too small for one thing. . . I am too old for another thing; and I am a woman and I think that we have an awful lot to do with it." The 63-year-old dairy farmer's battle against inflationary pressures and lowered milk prices is documented Wednesday, Oct. 19, at 10:30 p.m. on *Arvilla*.

Filmed inside a locked psychiatric ward for men at the Metropolitan State Hospital in Norwalk, Conn., *Hurry Tomorrow* examines the treatment of poor patients in a mental institution where drugs have replaced laboratory and electro-shock therapy in "quitting" patients. The psychiatrist in charge of the ward allowed the film to be made, he said, because "I wanted you to see that the people on the inside are norazier than the people on the outside." Ask the filmmakers. "Then why lock them up?" *Hurry Tomorrow* can be seen Thursday, Oct. 20, at 9 p.m.

attracted to public transportation. (Ref. CBD, 9/28/77, p. 2)

(290-3) The Pennsylvania Water Resources Research Center (A. J. McDonnell, 863-0291) is currently accepting proposals for matching funds for Title I Water Resources Research Projects. Some of the priority areas this year are efficient use, energy development, urban water problems, and consequences of extreme hydrologic events. Early discussion of your proposal with Dr. McDonnell is requested. The deadline for proposals sent to the Water Center's Nov. 4 is under guarantee transmittal to the Dept. of Interior prior to Dec. 1.

(290-4) Applications for grants under the FY 1978 OE Environmental Education Program have a Jan. 20 closing date. General projects include curricula development, training, fellowships, and community education. Migrant (workshop) projects are also funded. (Ref. OE announcement)

(290-5) The NSF Division of Engineering provides funds for research equipment both as part of regular grants and as separate grants for specialized research equipment. Proposals for "separate" grants must be postmarked by Feb. 1 for FY 1978 funds. (Ref. NSF 77-45)

(290-6) The DOT Urban Mass Transportation Administration announces a Jan. 20 deadline for its UMFTA University Research and Training Program. Priorities include: research and training relevant to urban mass transportation, increased interactions between university and local transportation agencies, technical and advisory assistance, training, and career

Arts Roundup

Treteau to present Ionesco play

Eugene Ionesco's *The Bald Soprano* (*La Cantatrice chauve*) is this year's offering of Le Treteau de Paris when it returns to University Park at 7:30 p.m. on Monday, Oct. 24, in Eisenhower Auditorium.

The play, which was first produced in Paris in 1950, ushered in what later became known as the "theatre of the absurd." At its first performance in London, the noted British critic Kenneth Tynan accused Ionesco of promoting "anti-theatre" by showing that words are meaningless and communication between humans impossible. Ionesco replied that all he wanted to prove was that it is difficult to make oneself understood — not absolutely impossible.

The play will be performed by the company of the Theatre de la Huchette, which has toured this version in Europe, Japan and Israel as well as having performed it for 20 years in Paris — making it the longest running production in the history of the French theatre.

As the second part of the program, the company will offer a series of poems, songs and sketches from the French author Jacques Prevert.

Tickets are available now either at the auditorium or from Prof. Armitage, Room S402 Burrows Bldg.

African, Afro-American art to be forum topic

James E. Lewis, director of the Gallery of Art at Morgan State University in Baltimore, will be the featured speaker at the Afro-American Studies Forum on Wednesday, Oct. 19, at 8 p.m. in the HUB assembly room.

Prof. Lewis will be speaking about African and Afro-American art. Members of the University community are invited to join in a discussion on interdisciplinary concerns in the areas of art, sociology, history and human development, which will follow the talk. The forum is sponsored by the Black Studies Program.

Oct. 19 for Thalia Trio

The Thalia Trio, a chamber ensemble in residence in the Department of Music, will present its first concert of the current season at 8:30 p.m. on Wednesday, Oct. 19, in the Music Bldg. recital hall.

The trio, which celebrates its tenth anniversary this year, is made up of three University music faculty members, Leonard Feldman, cellist, Joanne Zagst Feldman, violinist, and Robert Baisley, pianist.

Included in Wednesday's concert will be compositions representing three centuries of chamber music. They are Trio in G major, K 564, by A. Mozart; Trio on Irish Folk Melodies by Frank Martin; and Trio, Opus 63, by C. M. von Weber.

Comp Lit film series

A Comparative Literature Film Series is being held Monday nights at 8 p.m. in Room 217 Willard Bldg. *The Crusades: Saints and Sinners*, a film describing the First Crusade and the capture of Jerusalem, will be shown Oct. 17. Two medieval plays, *Abraham and Isaac* and *The Second Shepherd's Play*, will be screened Oct. 24, and two works of Chaucer's will be seen Oct. 31. They are *From Every Shire's End*, a dramatized account of the Prologue of the *Canterbury Tales* and *The Pardoner's Tale*.

"Romance and Reality," a segment of Kenneth Clark's *Civilization* television series, will be shown Nov. 7. In it, Lord Clark examines the high Middle Ages and the concept of courtly love.

Admission to all the films is free, and the public is invited.

Buddha head chief among Museum's new acquisitions

Several important new works have been added to the permanent collection of the University's Museum of Art.

Chief among them is a glazed pottery Buddha Head from the Liao dynasty (907-1124 A. D.) of China. Museum Director William Hull calls the head the "premier piece in the Penn State permanent collection." It was a gift from Dr. Ralph C. Marcover of New York City. A second major gift is an oil painting, "Bathers in a Cove, Maine 1917," by the American painter and water colorist Maurice Prendergast, one of the eight painters of the so-called "Ashcan School." The painting was given to the Museum by Eugene Prendergast, widow of Maurice's brother Charles, who was also a painter.

A bronze Roman Lamp with Griffin's Head is another recent acquisition. The piece is thought to be the work of a 4th

century Constantinople craftsman.

Museum Curator Olga Preisner points out that while the lamp is not a major piece of this era, it represents a new area of acquisition for the Penn State museum.

Two Japanese paintings and one Chinese work make up the remainder of the new acquisitions. The Chinese work, a hanging scroll called "Lotus," is attributed to the painter Chu Ta. It was completed in 1705 and is thought to be one of the artist's last works.

Another hanging scroll, "Birds and Flowers," is the work of Japanese artist Tsubaki Chinzan, who painted in the middle of the 19th century. "Three Sections of Honen Shinon Eden," a pictorial biography of Saint Honen, is a handscroll from the Muromachi period of Japan.

Dinner Theatre at Kern

The Good Doctor, a comedy by Neil Simon, will be presented in Kern's Uncommon Dinner Theatre Friday through Sunday, Oct. 21-23. Simon based his play on the short stories of Anton Chekov.

A pre-revolutionary Russian Dinner will be served at 6:30 p.m. on Saturday and Sunday, followed by the play at 8 p.m. The dinner includes Russian potato soup, beef Madeira with mushrooms and Black Forest torte.

Tickets for the Dinner Theatre are \$6.50 apiece; theatre only tickets are \$2 for non-students. Tickets and reservations are available from the Kern Information Desk, 865-1878. The Dinner Theatre is sponsored by Kern in cooperation with the Department of Theatre and Film and the Hotel and Restaurant Society.

Organ recital Oct. 17

Penn State organist June Miller will present her first concert of the 1977-78 season at 8:30 p.m. on Monday, Oct. 17, in the Music Bldg. recital hall.

For her concert, Ms. Miller, an associate professor of music, has chosen works spanning three centuries of organ music. They are *Prelude and Fugue in E Major* by Vincent Lubek; "Toccata for the Elevation (Mass IV)" from *Fori Musicali*, 1635, and "Canzona IV" from *Il Secondo Libro* . . . 1637, both by Girolamo Frescobaldi; Toccata II in D Minor by

Johann Froberger; Toccata, Adagio, and Fugue in C Major (BWV 564) by J. S. Bach; "Communion" and "Sortie" from *Messe de la Pentecoste* by Olivier Messiaen; *Fantaisie in C, Op. 16*, by Cesar Franck; and "Finale" from *Symphony VI* by Louis Vierne.

Pivot on sale

Pivot, the poetry magazine founded in 1951 by Joseph Grucci, is now on sale in downtown State College. Mr. Grucci, an associate professor of English at Penn State from 1950 until his retirement in 1974, was director of the University's Poetry Workshop.

In addition to the publication of work by known poets, Pivot, according to its editor, "emphasizes an interest in the poetry of new talent, young and not-so-young, who are often undeservedly neglected By this fusion of new and seasoned talents, Pivot is happily engaged in a continual process of renewal."

Mail orders for the publication can be sent to Mr. Grucci at 221 S. Barnard St., State College, Pa. 16801. The price of a single copy is \$1.25.

Olson to play

Pianist Jill Olson, a part-time instructor in music, will present a recital at 8:30 p.m. on Friday, Oct. 14, in the Music Bldg. recital hall.

Senate

(Continued from page 1)

In examinations administered on Aug. 30, about 65 percent of the 574 students who took the math exam passed, according to Dr. McMurtry. None of those students had taken the basic skills math course, since it was not offered during summer term.

About 87 percent of the 80 students who took the basic skills English course passed it, thereby erasing their deficiency, and about 28 percent of the 160 students who took the English retake examination made passing grades.

In other action, Senate heard an informational report from the Committee on Admissions, Records, and Scheduling concerning the reinstatement of students who have been dropped as degree candidates. The committee concluded that the reinstatement process is working and that a significant number of students who go through the process are able to overcome their past problems and eventually earn a degree.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring limitation. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Oct. 20. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

PHOTOJOURNALIST, PUBLIC INFORMATION AND RELATIONS — UNIVERSITY PARK Responsible for photography to be utilized as photojournalism for local, State and national media to enhance the public image of The Pennsylvania State University. Plan and photograph original and imaginative materials depicting University Park and Commonwealth Campus academic and social life. Bachelor's degree in photojournalism or its equivalent, plus three to four years of directly related experience with a newspaper or comparable publication.

STAFF PHARMACIST — Hershey Responsible to the Assistant Manager or Pharmacy Supervisor to perform pharmaceutical functions of inpatient and outpatient dispensing, intravenous admixture and hyperalimentation preparation, extemporaneous compounding, providing drug information to physicians, students, nurses and patients. Maintain inpatient and outpatient drug profiles, enforce pharmaceutical regulations, and maintain required Formulary records and inventory levels. Bachelor of science in pharmacy, plus one to two years of directly related experience. Pennsylvania registration in pharmacy or eligibility required.

PERSONNEL ASSISTANT — Hershey Responsible to the Director of Personnel for the recruiting, interviewing, and screening of applicants and other projects as assigned. A bachelor's degree in business or equivalent and one to two years of directly related experience.

BUSINESS MANAGER — Schuylkill Responsible to the Director for the administration of Campus facilities, book store activities, custodial staff, maintenance of budget records, purchasing, inventory, and personnel activities. Bachelor's degree in an area such as business administration or equivalent outside training, plus over one year and up to and including four years of related experience in building construction and alteration, purchasing, etc. Supervisory background in operation and management of physical plant highly desirable.

Department of Public Information and Relations
Room 312 Old Main
University Park, Pa. 16802
Telephone: (814) 865-7517

INTERCOM is an internal communications medium published weekly during the four terms of the class scheduled for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Second-class postage paid at State College, Pa. 16801

Arts Roundup

Vermeer Quartet offers program Friday

The Vermeer Quartet will present an all-Beethoven concert as the opening event in the Artists Series Fine Arts program at 8:30 p.m. on Friday, Oct. 21, in Eisenhower Auditorium.

The four artists, all members of the Resident Artists Faculty of Northern Illinois University, will perform Opus 59, No. 1 in F major (Razumovsky) and Opus 130 in B-flat major.

Smuel Ashkenasi, violinist with the quartet, studied with Efreim Zimbalist at the Curtis Institute of Music. He won the Mervinweather Post Contest in Washington, D.C., and was second prize winner in the Tchaikovsky Competition in Moscow. Violinist Pierre Menard studied at the Quebec Conservatory and Juilliard. He appeared with the Montreal Symphony as winner of a National Festival of Music competition and was awarded a Prix d'Europe by the Government of Quebec.

Nobuko Imai, violinist, was first prize winner in the 1967 Munich International Competition and in the 1968 Geneva Competition. A frequent participant in the Casals, Marlboro and Spoleto Festivals, Ms. Imai made her New York recital debut in 1968 on the Young Concert Artists Series and drew critical acclaim at her Carnegie Hall recital in 1973.

While still a student at the Eastman School of Music, cellist Marc Johnson was the youngest member of the Rochester Philharmonic and has performed as soloist with that orchestra and the Denver Symphony.

Tickets for the concert will be on sale through 4 p.m. today (Oct. 20) and at the Eisenhower Auditorium box office beginning at 5 p.m. on the evening of the performance.

Brown to perform

Bass-bantone Raymond Brown will present his first recital of the current season at 8:30 p.m. on Monday, Oct. 24, in the Music Bldg. recital hall.

Mr. Brown, professor of music and director of University Chorus, will be accompanied by a variety of instrumental groupings as well as the traditional piano, which will be played by another University music professor, Barry Brinsmaid.

Mr. Brown will open his program, with Mr. Brinsmaid, with three songs by Franz Schubert from the composer's "Gesänge des Harfners," opus 12, and three of Hugo Wolf's "Michelangelo Lieder."

Musica da Camera, the University's chamber orchestra, will then join Mr. Brown for two Handel arias, "Tears Such as Tender Fathers Shed," from *Deborah* and "How Willing My Paternal Love" from *Samson*.

The second portion of the program will be given over to the performance of a solo cantata, *Ich will den Kreuzstab gerne tragen* (BWV 56) by J.S. Bach. Joining Mr. Brown for this piece will be members of the Penn State Singers, of which he is conductor, and a chamber instrumental ensemble.

Detail from "Snow Cathedral" by Lawrence Edwards on exhibit in Zoller Gallery.

Alard recital on Oct. 26

The Alard String Quartet will present its second concert of the season at 8:30 p.m. on Wednesday, Oct. 26, in the Music Bldg. recital hall.

The Quartet has chosen three works for its program. Two are traditional string quartets, Sixth Quartet by Bela Bartok and Quartet in D Minor, Op. 56, "Voices Intimate" by Jean Sibelius.

For the program's third work, Quintet in C Major, K. 515, by W. A. Mozart, the Alard will be joined by David Vogel, violinist.

Quartet members, all music faculty at the University, are Joanne Zagst Feldman and Donald Hopkins, violinists; Raymond Page, violist; and Leonard Feldman, cellist.

Indian photos at Kern

The Kern Commons Gallery will present "The Curtis Photogravure of the North American Indian" from Oct. 22 through Nov. 5.

An artist of monumental energy and supreme patience, Edward S. Curtis worked for more than 30 years, 1898-1930, to photograph over 70 American Indian tribes in the western United States. Curtis sought to convey with his photography the thought that "the Indians as a race, already shorn of their tribal strength and stripped of their primitive dress, were passing into the darkness of an unknown future."

Library receives Canadian recordings

Three representatives of the Canadian government and Canada Radio International are visiting the University Park Campus today (Oct. 20) to present a collection of recordings to the University.

They are the Honorable Howard Campbell, Consul for Canada in Philadelphia; Richard Boyer, director of public relations for the Canadian Consulate in Philadelphia; and Daniel Proteau, head of distribution for Radio Canada International.

The tapes and phonograph records, all of which have been broadcast on Radio Canada International, cover Canadian history, political affairs, and cultural life. They will be added to the University's collection of audio materials and will be available for loan to library patrons.

"One of the nicest things about this is that it is an ongoing project," Charles H. Ness, assistant dean of the University Libraries, says. "We will receive additions

to the collection as they become available."

According to Mr. Ness, Dr. Henry Albinski, professor of political science and a specialist in Canadian affairs, played a major role in the acquisition of the collection.

In addition to musical and theatrical selections, which emphasize Canadian composers and performers, there is an extensive collection of spoken word recordings. Among them is a series in which former members of the Royal Canadian Mounted Police tell of their experiences, a one-hour documentary drama about Benedict Arnold's attempt to conquer Canada; readings of the works of Canadian humorist Stephen Leacock, and a series of dramatized documentaries on the Klondike Gold Rush of the 1890s.

In all, there are several hundred tapes and recordings in the collection.

Legislative attitudes to be examined

A program, "Legislative Attitudes toward Higher Education," will be presented under the sponsorship of the College of the Liberal Arts Faculty Steering Committee at 3:30 p.m. on Thursday, Oct. 27, in Room 101 Kern Bldg.

Speakers include Dr. Helen Wise, Galen Godbey and Dr. Kenneth P. Mortimer. Dr. Wise, Rep/77 and former president of the National Education Association, is a trustee of the University. Mr. Godbey is an alumnus of the University and a special assistant to the Pennsylvania Secretary of Education. Dr.

Mortimer is director of the University's Center for the Study of Higher Education and professor of education.

Each of the speakers will present a brief talk, and there will be time for questions and discussion. According to Librarian Ronald L. Filippelli, who is in charge of arrangements for the meeting, the program is not designed as yet another investigation of why Penn State's budget has not been passed but is an attempt to familiarize faculty and students with the State and national legislative environments in so far as they relate to higher education.

Pa. Business Survey offered to staff

Full-time members of the faculty and the administration at all campuses of the University may subscribe without charge to the Pennsylvania Business Survey, a monthly review of economic conditions in Pennsylvania and its major areas published by the College of Business Administration. Persons who have in the past received the Survey should make

known their wish to continue receiving it.

The Survey is based on an analytical program conducted in the Center for Research of the College. The report is nontechnical and is part of a communications program of the College which includes news releases to daily papers, radio stations, and TV stations.

(Continued on page 2)

Scene from Ionesco's "La Cantatrice Chauve" to be presented by Le Troupe de Paris Oct. 24.

Penn Staters

Dr. Robert S. Brubaker, head of the Department of Speech Communication, was honored at a recent celebration marking his 25 years of service at the University.

Well known for his research in psycholinguistics and acoustics, Dr. Brubaker is co-author of the book, *Oral Communication in the Classroom*, and co-editor of another book, *Speech Pathology*. He is associate editor of the *Journal of Communication Disorders* and a member of the board of editors of the *Journal of Psycholinguistic Research*. In addition, he was formerly president of the Central Pennsylvania Acoustical Society.

Dr. Brubaker received his academic training at the University of Illinois, earning a B.A. in speech pathology and an M.A. and Ph.D. in speech science. After receiving his Ph.D. in 1952, he was awarded an American Speech and Hearing Association Travel Grant to Italy.

In 1972 he was selected by the Danforth Foundation to participate in its "Future of Liberal Arts" workshops in Colorado and was also invited by the Swiss National Foundation for the Improvement of Science to conduct research at St. Gallen Medical Academy, where he had earlier served as a research associate.

Dr. Brubaker joined the Penn State faculty in 1952 as an assistant professor and was named a professor in 1966. He has headed the Department of Speech Communication since 1975.

President John W. Oswald moderated two panel discussions in Philadelphia on Oct. 13 and 14, marking the 150th anniversary celebration of the Pennsylvania Horticultural Society.

The Thursday afternoon panel on "Whither Horticulture? The Next 150 Years," in addition to President Oswald, included Ian McHarg, chairman of Landscape Architecture and Regional Planning, University of Pennsylvania; Frances Perry, member of the Council, The Royal Horticultural Society, England; Peter Raven, director, Missouri Botanical Garden, St. Louis; and Richard Evans Schultes, Paul C. Mangelsdorf professor of natural sciences, Harvard University.

For the Friday morning panel on "Meanwhile, What about Now?" Dr. Oswald was joined by James Underwood Crockett, writer and television producer, Concord, Mass.; William Flemer III, Princeton Nurses, Princeton, N. J.; Rachel Snyder, editor-in-chief, *Flower and Garden*, Kansas City, Mo.; and Paul Tractman, editor, *Horticulture*, Boston, Mass.

Dr. Edwin L. Herr, professor and head, Division of Counseling and Educational Psychology, has recently authored, *The British Experience in Educational Change, Careers Education and Counselor Training: Implications for American Education*, published by the U.S. Office of Education in its monographs on career education series. The material for the monograph was derived from interview and other research conducted while Dr. Herr served as a Visiting Fellow at the National Institute for Careers Education and Counseling, Cambridge, England, during the summer of 1976.

Dr. Edward D. Eddy, provost of the University, has been elected to the Board of Directors of Duquesne University for a two-year term.

Dr. Parris H. Chang, professor of political science, was a witness at a hearing held by the Committee on International Relations of the U.S. House of Representatives on Sept. 29 to deliberate the problems of U.S. normalization of relations with the People's Republic of China. Last month, Dr. Chang visited Humboldt University of Berlin, German Democratic Republic, to lecture on "U.S.-China Relations" and on political and economic developments in China. His visit to East Germany was sponsored by the International Research and Exchange Board and Humboldt University.

Dr. G. P. Patil, professor of mathematical statistics, has been invited to undertake a lecture tour to universities and research centers in Turkey, Italy, Greece and Belgium under the auspices of the North Atlantic Treaty Organization Science Committee Special Programme Panel on Marine Sciences. He will lecture on statistical modeling and sampling for marine ecosystems.

Earlier this summer, Dr. Patil directed a Satellite Program in Statistical Ecology at Texas A & M University and UC-Berkeley.

Obituary

Albert P. Powell, formerly professor of engineering at the University and a faculty member from 1925 until 1959, died Oct. 9 at the age of 81 in Bradenton, Fla. Mr. Powell graduated from the Massachusetts Institute of Technology and taught at Lafayette College before coming to Penn State.

Deadlines announced for White House Fellowships

The 1977 deadlines for applications for White House Fellowships have been announced, and requests for applications must be postmarked no later than Tuesday, Nov. 15. Completed applications are due no later than Thursday, Dec. 1.

Application materials and additional information can be obtained from the President's Commission on White House Fellowships, Washington, D.C., 20415, phone (202) 653-6263.

Established by President Johnson in 1964, the White House Fellowship program brings a select group into national government to serve at a high level for one year. It is believed that these people will return to their own careers with a greater understanding of government and will share that understanding with their local communities.

Fellows come from a wide range of occupations and backgrounds, including college teaching and administration. They serve with pay as special assistants to cabinet officers, the vice president or senior White House staff. They also take part in an extensive education program which exposes them to all sectors of the national government.

The program is open to all U.S. citizens who are at least 23 years of age but are still at an early stage in their careers. It is not open to employees of the federal government, with the exception of regular members of the armed services.

Fellows are chosen on the basis of proven leadership, intellectual and professional ability, high motivation for service, and commitment to community and the nation.

News in Brief

United Way giving lags slightly at midpoint

Penn State's faculty and staff have contributed \$43,798 to the Centre County United Way campaign to date, or about 49 percent of the University goal of \$90,000, according to James M. Beattie, University campaign chairman.

"The response from University employees to the United Way is running slightly behind the pace of last year's campaign," Dr. Beattie, dean of the College of Agriculture, said, adding that at this point in the 1976 drive about 51 percent of the goal had been reached.

One reason for the smaller return this year is that to date only about 11 percent of the University's employees have responded.

"We are urging all University employees to respond so that we can have another successful campaign," Dean Beattie said.

Support for the United Way campaign is particularly important this year, Dean Beattie noted, because three new agencies have been added to the single fund raising effort.

"This is a step forward for United Way," he said, "because it means that three more fund drives in the county are being eliminated."

The new agencies include the Penns Valley Recreation Center, the Childbirth Education Association and On Drugs, Inc.

In order to fund its 27 member agencies, United Way's overall county goal is \$301,000 this year, an increase of about \$17,000 over last year.

Christmas tree sale

Due to increased demand, orders for the Christmas trees sold each year by forestry students must be placed by Nov. 5. All delivered trees will be fresh cut.

Trees may be reserved by calling Jody at 865-4237 Monday through Friday, 8 a.m. through 5 p.m., or Mark Hofmann at 865-6182 on weekends. Prices are:

Size	Blue Spruce	Scotch Pine
4'	\$11.50	\$ 8.50
5'	13.50	9.50
6'	15.00	11.00
7'	16.50	12.50
8'	17.50	14.50
9'	18.50	
10'	19.50	
11'	20.50	
12'	21.50	

Payment for trees ordered by departments must be made upon delivery by Interdepartmental Transfer to The School of Forest Resources Budget 804-14, Fund 1001.

Trees for personal use should be paid for on delivery by a check made out to the Penn State Forestry Society.

Delivery will be Dec. 5-10.

Keaton films to be shown

The Tuesday Night Film Series, The Comic Genes of Lloyd and Keaton, will continue with the screening of two short Keaton films, *The Playhouse* and *The General*, at 8 p.m. on Tuesday, Oct. 25, in Eisenhower Auditorium. The films are part of the Artists Series Film Festival.

In *The Playhouse*, which was made in 1921, Keaton pays tribute to vaudeville and plays some two dozen different roles. *The General*, which contains a classic chase sequence, stars Keaton in the role of Johnny Gray, a railroad engineer who rescues his train from a group of Union raiders.

Tickets for the films will be on sale at \$1.50 apiece at the auditorium beginning at 7:30 p.m. on the night of the screening.

Pattee to extend hours

Preliminary plans were made Monday night to reinstate late evening library hours at University Park starting at the beginning of winter term.

The plan was developed at a meeting of Dr. Edward D. Eddy, provost, and Dr. Stuart Ford, dean of University Libraries, with student leaders.

The plan was developed with the understanding that certain library services would need to be curtailed, principally during the late evening hours. This will enable the library to continue to operate within the limits of the current stringent budget. Details of the plan will be announced later by Dean Ford after discussions with library faculty members.

Hadrian's Wall is lecture topic

"Rome's Northernmost Frontier" is the title of an illustrated public lecture to be presented by Prof. James Russell, University of British Columbia, at 8 p.m. on Tuesday, Oct. 25, in Room 101 Kern Bldg. The meeting is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Prof. Russell will describe the Hadrianic frontier system in Britain, its construction, and its effect on the lives of the native inhabitants.

Singapore poet visiting

Singapore poet Edwin Thumboo will be at the University Park Campus Oct. 23 to 27. Dr. Thumboo is professor of English language and literature at the University of Singapore and acting head of the department. He is the author of two books of poetry, *Gods Can Die and Rib of Earth*, and editor of *The Second Tongue, An Anthology of Poetry from Malaysia and Singapore*.

Dr. Thumboo will speak on "Singapore, Writing in English: A Pigeon among Wary Cats" at the Comparative Literature Luncheon on Tuesday, Oct. 25, at 12:15 p.m. at the Faculty Club. He will give a reading of his own poetry, published and unpublished, at 3 p.m. on Wednesday, Oct. 26, in the Rare Book Room at Pattee Library, and at 8 p.m. the same day, he will speak on the African novelist, Gabriel Okara, at the Black Studies Center at Walnut Bldg.

Pa. Business Survey

(Continued from page 1)

Issued 12 times a year, the Survey usually takes the form of a four-page letter emphasizing current developments in the Pennsylvania economy presented against a background of national developments. This is supplemented by quarterly reports on the individual "little economies" of all of Pennsylvania's major metropolitan areas, plus University Park's home community, Centre County. An annual review is presented for the State and each of the covered areas.

Requests for Survey subscriptions should be addressed to the Director, Center for Research, College of Business Administration, Room 801 Bus. Ad. Bldg.

Department of Public Information and Relations

University Park, Pa. 16802
Telephone: (814) 865-7517

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Second-class postage paid at State College, Pa. 16801

University Park Calendar

Oct. 20 — 30

Special Events

Thursday, Oct. 20
Colloquy, "The Wild World of Health," Edward Wickhamson on "Sex, Health, and the Academic Community," 7:30 p.m., HUB main lounge.

Friday, Oct. 21
Sports: j.v. football, vs. Milford Academy, 2 p.m.; soccer, vs. Navy, 7 p.m.
Astronomy open house, 7:30 p.m., Davey Lab.
Cloud date, Oct. 22, 7:30 p.m.
Un-Common Theatre, Neil Simon, *The Good Doctor*, 8 p.m., Room 112 Kern.
Artists Series, Vermeer Quartet, 8:30 p.m., Eisenhower Auditorium.

Saturday, Oct. 22
Sports: football, vs. West Virginia, 1:30 p.m.
Un-Common Dinner Theatre, dinner, 6:30 p.m., Room 102, theatre, *The Good Doctor*, 8 p.m., Room 112 Kern.
Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Oct. 23
PSU Intercollegiate Sailing Regatta, 9:30 a.m., Stone Valley.
P.O.C. Hiking Division, trail clearing on Mid State Trail; free picnic supper, 9 a.m., HUB parking lot.
University Chapel service, The Rev. Donald Davis, PSU, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Nature Discovery Walk, 2 p.m., Stone Valley.
Opening reception, Larry Edwards and Bill Hanson, paintings, 3-5 p.m., Zoller Gallery.
Opening reception, Art of the 13th Term, 3-5 p.m., Hammond Gallery.

Un-Common Dinner Theatre, dinner, 6:30 p.m., Room 102, theatre, *The Good Doctor*, 8 p.m., Room 112 Kern.

Monday, Oct. 24
Last date for Nov. graduates to deliver theses to Graduate School office.

Last date for Departments to certify to Graduate School completion of required papers for Nov. graduates.

First day for signing winter term NDSE and University Long Term Loans, Room 108 Shields.

Shakespeare film, *King Lear* (Brook/Scofield), 6:30 p.m., Room 101 Chambers. Free admission.

Titaneau de Paris, *La Cantatrice Chante* (Ionesco), 7:30 p.m., Room 101 Chambers.

Comp. Lit. Film Series, *Alpham and Isaac* and *The Second Shepherd's Play*, two medieval plays, 8 p.m., Room 217 Willard.
Raymond Brown, bass-banjo, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Oct. 25
Comp. Lit. luncheon, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club, Edwin Thumboo, University of Singapore, on "Singapore Writing in English: A Pigeon among Wary Cats." Artists Series, Keaton films, *The Playhouse* and *The General*, 8 p.m., Eisenhower Auditorium.
Central Pa. Society of the Archaeological Institute of America lecture, James Russell, University of British Columbia, on "Rome's Northernmost Frontier," 8 p.m., Room 101 Kern.

Wednesday, Oct. 26
IAHS visitor, Edwin Thumboo, University of Singapore, will read his own poetry, 3 p.m. Rare Book Room, Pattee Library.
Commonplace Theatre, *Midnight Cowboy*, 7:30 and 9:30 p.m., Room 112 Kern.

IAHS visitor, Edwin Thumboo, will speak on the African novelist, Gabriel Okara, 8 p.m., Black Studies Center, Walnut.
University Theatre, *Something's Afoot*, student preview, 8 p.m., The Playhouse.
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, Oct. 27
Sports: field hockey, vs. Maryland, 2:30 p.m. College of Liberal Arts Faculty Steering Committee panel, Helen Wise, Rep. 77; Galen Godbey, special assistant to Pa. Sec'y of Education; Kenneth P. Mortimer, director of Center for the Study of Higher Education, on

"Legislative Attitudes toward Higher Education," 3:30 p.m., Room 101 Kern.
G.S.A. Halloween party, 6:30 p.m., Kern.
University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Friday, Oct. 28
P.S.O.C. Hiking Division, idyllic overnight (wait all night on Mount Nutt for the Great Pumpkin to show up).
Sports: j.v. football, vs. Wesley Jr. College, 2 p.m.
University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Penn State Brass Chorale, 8:30 p.m., Music Bldg. recital hall.

Saturday, Oct. 29
Sports: football, vs. Miami, 1:30 p.m.
Shaver's Creek Nature Center, Ghoulies and

Beasties and Things that Go Bump in the Night, 8 p.m., Stone Valley.
University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Sunday, Oct. 30
Sports: women's cross country, Blue & White Invitational.
P.S.O.C. Hiking Division, Jost locomotive hunt in the Seven Mountains, 9 a.m., HUB parking lot.
University Chapel service, Dr. Denis M. Seaward, executive assistant to the President, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Historical Walk, 2 p.m., Stone Valley.
Artists Series, *My Fair Lady*, matinee, 3 p.m., evening, 8:30 p.m., Eisenhower Auditorium.

The Vermeer Quartet

Seminars

Friday, Oct. 21
Materials Research Laboratory, Dr. D. A. Gorham, Cavendish Lab, Cambridge, England, on "Applications of High-Speed Photography," 10:30 a.m., Room 250 MRL.
Analytical Chemistry, David Dubois on "Aspects of the Electrochemistry of Vitamin B₁₂," 11:10 a.m., Room 333 Whitmore.
Materials Research Laboratory, Ian L. Spain, University of Maryland, on "Studies of Phase Transitions at High Pressure and Low Temperature in the Diamond Anvil Cell," 3:30 p.m., Room 250 MRL.

Monday, Oct. 24
Biochemistry and Biophysics, Alex McPherson, Hershey, on "The Three Dimensional Structure of a DNA Unwinding Protein: The Gene 5 Product of *Id Bacteriophage*," 3:55 p.m., Room 101 Althouse.
Organic Chemistry, N. C. Deno, Barbara Greiginger and Stephen Shour on "The Aliphatic

Structure of Coal, Lignin and Lignite," 8 p.m., Room 333 Whitmore.

Tuesday, Oct. 25
Applied Research Laboratory, Ward Gearhart on "Propulsors for the Small Water Plane Twin Hull Vehicle," 10:45 a.m., Walker conference room, Applied Science Bldg.
Biochemistry and Biophysics, Alex McPherson, Hershey, on "The Crystallization of Proteins and Their Analysis by X-Ray Diffraction: Some Examples in Progress," 11:10 a.m., Room 101 Althouse.
Surface Science, Mark Cardillo, Bell Labs, 1 p.m., Room 339 Davey.

Air Pollution Control, Terence H. Risby on "Analysis for Size-Fractionated Airborne Particulate Matter by Atomic Absorption Spectrometry and Neutron Activation Analysis," 2:20 p.m., Room 140 Fenske.
History, Robert J. Maddox on "American Intervention in Siberia," 3:30 p.m., Room 101 Kern.
Genetics, Reynaldo L. Villareal on "Inheritance of Resistance to Rice Blast Disease," 3:55 p.m., Room 52 Frear.

Plant Disease and Food Quality, Vann Gregory, "Production of Seed Quality and Quality Parameters: Part II: Mycotoxins in Food and Feed," 3:55 p.m., Room 213 Buckhout.
Inorganic Chemistry, James H. McNamara, Cyprus Metallurgical Processes Corp., on "The Hydrometallurgical Extraction of Copper from Sulfide Ores and Its Conversion to E.T.P. Copper Metal," 8 p.m., Room 333 Whitmore.

Thursday, Oct. 27
Agronomy, Donald McCormack, USDA Soil Conservation Service, on "New Developments in Soil Surveys and Their Use," 9:35 a.m., Room 111 Tyson.
Ceramic Science, Dennis Viechnicki, Army Materials and Mechanics Research Center, Watertown, Me., on "Solid State Formation of Neodymium-Doped Yttrium Aluminum Garnet," 11 a.m., Room 301 Mineral Industries.
Chemistry, Peter H. von Hippel, University of Oregon, on "Molecular Basis of DNA-Protein Interactions: The Lactose Operon System," 12:45 p.m., Room 333 Whitmore.

Physics, David Emin, Sandia Lab, on "A Qualitative Discussion of Small Polarons Formation and Motion," 3:50 p.m., Room 117 Osmond.

Applied Research Laboratory, Francis H. Fenlon on "Recent Developments in Low Mach Number Flow Noise Generation from Turbulent Boundary Layers," 4 p.m., Room 73 Willard.

Fuel Science/Chemical Engineering, Joseph Henry, West Virginia University, on "Novel Solid-Liquid Separation Processes for Removal of Particulates from Coal Derived Liquids," 4 p.m., Room 271 Willard.
Philosophy, Joseph Play on "Categories of Comportment," 4 p.m., Room 203 Willard.

Friday, Oct. 28
Analytical Chemistry, Mike Roland on "Coherent Anti-Stokes Raman Spectroscopy," 11:10 a.m., Room 333 Whitmore.
Geosciences, Elliot C. Morris, U.S. Geological Survey and AAPG Distinguished Lecturer, on "Viking View of Mars," 4 p.m., Room 112 Walker.

Exhibits

Chambers Gallery: Hugh Stumbo, collages; Kay Troy, ceramics.
Hammy Gallery: Art of the 13th Term: Tom Ferguson and Martin Rajala, mixed media, opens Oct. 21.
HUB Gallery: San Francisco Posters exhibit; Penn State Wildlife exhibit.
Kern Commons Gallery: Pennsylvania Guild of Craftsman exhibit; Edward S. Curtis, North American Indian photographs, opens Oct. 22.
Museum of Art: William Cullen Bryant Collection, through Oct. 23; Arne Jacobsen: Danish architecture and designer.
Museum of Art HUB Gallery: Esmark Collection of Turner and Ives prints, through Oct. 23.
Pattee Galleries: Canadian exhibit, Rare Book Room, through Oct. 28.
Zoller Gallery: William King, sculptures, through Oct. 21; Larry Edwards and Bill Hanson, paintings, opens Oct. 22.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved (i.e., positions filled completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds).

Consequently, the position vacancies listed below have been accepted from the current hiring curriculum. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Oct. 27.

DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

CLASSIFICATION ANALYST, PERSONNEL ADMINISTRATION — University Park. Responsible for assisting in the implementation of wage and salary plans of the University. Gather information for the review of existing positions or the evaluation of new positions. Write job descriptions based on the completed data. Assist in conducting research, surveys and

compiling data as a wide variety of special projects and reports. Bachelor's degree or equivalent, preferably in personnel administration or industrial engineering. Plus a minimum of two years of administrative experience.

ASSISTANT TO THE DIRECTOR, EXECUTIVE PROGRAMS, BUSINESS ADMINISTRATION — University Park. Responsible to Director for assistance in the research, marketing, and administration of new and existing Executive Programs of two weeks and four weeks residence education for corporate executives. Master of Business Administration or equivalent, plus one year of marketing experience. Position funded until June 30, 1978.

TECHNICAL SPECIALIST (PENPAT), CONTINUING EDUCATION — University Park. The PENPAT Technical Specialist will travel extensively throughout the Commonwealth, visiting public and private agencies and organizations to assist in identifying and solving energy-related problems; will make research findings available; will make referrals to consultants, manufacturers, and organizations as a means of conserving energy; will provide the user with follow-up data as to implementation and impact on specific solutions. Master's degree or equivalent training, plus two to four years of directly related experience in energy conservation. Ph.D. is desirable.

MANAGER, MANAGEMENT SYSTEMS — Hershey. Responsible to the Hospital Director for management engineering duties in planning and overseeing utilization of hospital facilities and personnel. B.S. degree in industrial engineering or equivalent and four to seven years of directly related experience.

ASSISTANT PERSONNEL DIRECTOR, APPLIED RESEARCH LABORATORY — University Park. Responsible to the Personnel Director of ARL for the administration of personnel and employee relations functions, including recruiting, job classification, employee records and personnel-related research. Bachelor's degree or equivalent, with two to four years of directly related experience in personnel or management related areas to include some experience in statistical analysis and computer programming. Some work toward a master's degree desirable.

ADMINISTRATIVE AIDE — Hershey. Responsible to the Chairperson, Department of Anesthesiology, for the performance of various administrative duties to include supervision of clerical staff and efficient operation of the departmental office. A high school graduate with at least two years of college or equivalency, plus an additional three to four years of directly related experience in the performance of various administrative type duties and supervision of clerical personnel. (Bachelor's degree preferable).

INTRODUCTION

University policy, as outlined in *The Academic Policy Plan*, asserts Penn State's fundamental responsibility to provide programs of instruction, research, and public service. Generally, the University's financial resources allocated to resident instruction are about twice those for organized research, and funds devoted to research about twice those for public service (including continuing education). During this past year (FY-76), organized research direct-cost expenditures amounted to \$46.3 million, and recovered indirect costs of research totaled about \$6 million, for a total of about 16 percent of the University's total expenditures. Unlike instruction and public service, less than 25 percent of the financial resources for research are derived from State appropriations. Yet, the development and maintenance of the University's national and international reputation depend to a major degree on the faculty's research output.

In its discussions on the "climate for research" over the past two years, the Senate Committee on Research recognized the need for providing the University community with information about Penn State's research activities, policies and procedures. And, in this regard, perhaps the most misunderstood and debated issue is the recovery and use of indirect research costs. This report presents the faculty with the most current information and policies regarding indirect cost of research and offers several interim suggestions regarding this complex matter.

SUPPORT OF RESEARCH

Proposal writing and participation in sponsored research by members of the faculty are strongly emphasized by the University, especially at the University Park and Hershey campuses. As noted below, more than 75 percent of the support for research is derived from external sponsors.

Research Support — FY 76		
Category	Amount (\$M)	%
State		
Appropriations (General Funds)	11.07	23.9
Federal		
Appropriations	3.00	6.5
Federal Grants and Contracts	24.84	53.7
Other Research Sponsors	7.35	15.9

Unlike the funds supporting the instructional and public service missions of the University, most research funds are a direct result of efforts by individual faculty in writing research proposals. Thus, individual rather than institutional efforts are a unique, and many times overlooked, aspect of research funding. These efforts are strongly influenced by the climate for research, which can be perceived as encouraging, neutral or discouraging by faculty members.

TOTAL COST OF RESEARCH

Research activities involve two types of expenditures: (1) direct costs related to the operation of each project and clearly identifiable with its specific purpose (i.e., salaries, wages, fringe benefits, supplies, equipment, travel, communications, publication charges, etc.) and (2) indirect or overhead costs related to general institutional activities that are essential to the performance of research but do not serve a research project uniquely. The latter are for joint functions that cannot easily be prorated project by project, these include business office operations—accounting, purchasing, payroll, plant operation and plant maintenance—utilities, janitorial services, security, library service and journal acquisitions; general and research administration at central, college, and departmental levels; and depreciation or use allowances for buildings and equipment.

Faculty as well as research sponsors must understand that the total project cost = direct costs + indirect costs. Thus, faculty have a responsibility to prepare and submit project budgets which cover the total costs, and sponsors should be expected to pay such costs. Although most federal and industrial organizations realize this "fact of life," many private foundations and philanthropic organizations will not pay the full costs. Typically, they will agree to meet the direct costs, but place a limitation on reimbursement of indirect costs. Similarly, some state agencies and municipalities maintain that they expect service from a publicly supported institution at less than the actual cost.

INDIRECT COSTS OF RESEARCH

It is a commonly held view among faculty that the addition of a research project does not add measurably to the over-all cost of operation of the University. On occasion, principal investigators argue that grant income is simply an

add-on to their departmental or project operation and that it is unnecessary and/or at least undesirable to attempt to charge a sponsor for indirect costs. While this view might be defensible if only a few projects were involved, it is demonstrably incorrect when the research volume exceeds \$50 million annually.

Research activities place a disproportionately large burden on accounting, purchasing, and payroll services, because project funds must be separated into separate accounts and sub-accounts. Many awards now come with a line-itemized budget that calls for the reporting of all project expenditures by categories—salaries and wages, supplies, travel, computing charges, etc. Much of the work in the purchasing office similarly relates to procurement of items needed for project activities. Likewise, a disproportionately large number of personnel, payroll and other administrative actions are necessitated by research project activities.

The item, "indirect costs," which appears on the award notification or the authorized budget of externally funded projects, provides reimbursement to the University for certain expenses incurred in conducting or supporting the research which are not specifically allocable in the project budget. Some of these are essentially joint costs, shared with the other institutional functions of instruction and public service.

Indirect cost dollars received from sponsors, therefore, are literally reimbursement dollars for expenditures already made; they cannot be treated as unassigned income available for discretionary allocation. Indirect cost dollars are received in increments as the direct cost payments are made to the University by the sponsor. Only rarely are research funds provided in advance; in the usual practice, the University furnishes monthly or quarterly billings either directly to the sponsor or against a letter of credit.

The budget office plans on income from recovered indirect costs in assembling the budget. These monies are in no way a bonus or an "extra" for the University; rather these funds are already planned for and budgeted.

RECOVERY OF INDIRECT COSTS OF RESEARCH

Clearly then, with Penn State's large research program it is essential that the indirect costs be recovered from research sponsors. Otherwise, the continuing heavy drain upon the University's General Fund would jeopardize academic programs, faculty salaries, and, in fact, all of the University's functions.

Federal agencies and educational institutions are guided by uniform indirect cost reimbursement procedures. In the 1950s and early 1960s, representatives of universities and educational organizations met with officials of the Bureau of the Budget and developed a set of principles applicable to government-university research agreements and laid down the procedures to be followed. The resulting document, Circular A-21, first issued by the Bureau of the Budget in 1958, was subsequently revised and reissued in 1961, 1965, and 1968. The 1968 issue established the procedures as government-wide in their application and required all agencies to accept the indirect cost reimbursement rate negotiated for each institution.

The indirect cost rate is not set arbitrarily by the institution but by negotiation with an inter-agency committee on the basis of cost figures submitted by the institution, including total expenditure data in specified categories (or elements) in order to determine the proper distribution of these between research and other institutional activities, and projections for the coming year. The data and calculations are reviewed by government auditors, who make recommendations for acceptance or adjustment to the inter-agency committee.

In the table above are shown the indirect cost elements and resultant total indirect cost rates negotiated with the resident Federal auditor for 1976-77. The identification and weighting of these elements are controlled by the A-21 federal regulations.

The cost elements forming the basis for the total indirect cost rate are real and legitimate expenses, which must be paid from some source of money. Thus, the University must

Indirect research costs — an informational report

carefully examine each future sponsored research proposal. It should not accept large additional sums for sponsored research unless the sponsor provides funds to cover the indirect costs as well as the direct. In the years ahead, in view of the increasing obligation to identify clearly the costs of University operations with the programs supported, it may be necessary to place a limit on the amount of unrecovered indirect costs that can be tolerated and to refuse additional grants that do not cover total costs. Faculty acceptance of such a limitation would require a better understanding of the indirect cost system then now exists. Many faculty today feel the addition of indirect costs to the project's budget reduces its attractiveness (i.e., its competitiveness to a sponsor).

Faculty in the humanities and social sciences, as well as faculty at locations other than University Park or Hershey, have questioned the use of one indirect cost rate for all types of research activity, claiming their research typically does not require the physical space and/or equipment reflected in the University's rates listed earlier. However, proliferation of differential

Audited Indirect Cost Rates for Organized Research, FY-77					
Indirect Cost Elements	University On-Campus	University Off-Campus	Hershey On-Campus	Hershey Off-Campus	Off-Campus
Research Administration	9.38	9.38	4.13	4.13	
General Administration	6.20	6.20	12.89	12.89	
Indirect Department Expense	7.75	7.75	5.35	5.35	
Operation/Maintenance-Physical Plant	15.08	—	15.58	—	
Operation of Library	1.66	—	1.46	—	
Use Charge — Buildings	3.31	—	2.27	—	
Use Charge — Equipment	5.81	—	3.12	—	
Tuition	7.62	7.62	0.34	0.34	
Leaves of Absence	0.80	0.80	—	—	
Total Indirect Cost Rate	57.61	31.75	45.14	22.71	

rates would be externally difficult to administer and cannot be justified at the present time.

A change in University policy in the direction of reducing or eliminating indirect costs would contribute little if anything to the "sales appeal" of proposals submitted to the main sources of research funding (federal agencies), and such a change could only be regarded as poor fiscal management since federal regulations provide for payment of indirect, as well as direct, costs of research supported by grants and contracts. For several years now, the University has submitted "asking" budgets to Harrisburg based on realistic assessments of operating costs, and subsequently has had to reduce costs (e.g., by eliminating all new program considerations) in order to operate within final appropriations which have been approximately below the asking amounts; the gap for 1976-77 is \$10 million. Foregoing part or all of the \$5-6 million recovered annually as indirect costs is simply not feasible.

The indirect costs are real costs; if they are not recovered from research sponsors, they must come out of funds already secured for other programs. Thus, it is important that faculty members understand the nature of indirect costs and lend their support to the continuing effort by the University to secure from outside agencies the full cost of the research they sponsor.

USE OF RECOVERED INDIRECT COSTS

There is a general lack of understanding of what happens to the indirect costs recovered as a result of sponsored research work in the University. Currently, these monies are pooled with tuition and the State appropriation, which is the largest single source of income to the University. The pooled funds are then used to pay for salaries, fuel oil, maintenance, etc., which may or may not be directly related to research. While elements of cross-subsidization of programs and units are essential to the ongoing operation of the University, there is real concern that recovered indirect cost monies are being used for activities other than those directly incurred by the University's research program.

In general, there is a widespread feeling among the faculty engaged in sponsored research that a portion of indirect costs should be returned directly to the department or unit responsible for the project to maintain and re-

place equipment used in research activities and to provide monies for encouraging and facilitating further faculty involvement in research activities.

Prior to 1970, approximately 10 percent of indirect cost or overhead monies was returned to the Colleges in which the projects were being carried out. In 1970 this was reduced to 5 percent because of budgetary problems. Since that time there has been a policy of "no-return" of overhead as such. Instead, funds for replacement of research and instructional equipment are made available annually by the President and administered by the Provost. An Advisory Committee on Academic Equipment, appointed by the Provost, receives equipment requests from the Colleges and other academic units including the Libraries and the Commonwealth Campuses. The committee recommends allocations to the Provost based on the extent of need, justification by the academic units, and a first approximation formula based on 50 percent on equipment inventory and 50 percent on student credit hours. Over the past five years, amounts allocated for this purpose have averaged about \$750,000 annually. Because of the short fall in the State appropriations for the current fiscal year, the equipment allocation was delayed and was smaller than usual (only about \$500,000).

The University's "asking" budget for 1977-78 includes an item to cover equipment purchases and, if this should take hold on a continuing basis, it may then be possible to consider factoring in a return-of-overhead concept. Otherwise, the present distribution of equipment funds by the Provost, based on recommendations from a combined teaching and research equipment committee, appears to be the best approach.

SENATE REVIEW AND SUGGESTIONS

In discharging its responsibilities to create an atmosphere consistent with maintaining viable research and scholarly activities, and to advise on research policies, the Senate's Committee on Research will continue to examine the question of the recovery and use of the indirect costs of research and to examine the following suggestions for future legislative action.

To the Administration

1. That the President through the Office of the Vice President for Research and Graduate Studies initiate a re-examination of the policy of "no-return" of indirect cost monies to the academic unit generating the sponsored projects. Even a small "stimulation" via money in proportion to the unit's sponsored research volume would serve to greatly improve the climate for research and encourage additional grant support solicitation.

2. That the President, through the Office of the Provost and the Advisory Committee on Academic Equipment, continue his efforts to improve on the first approximation formula for the allocation of equipment money, and seek a better solution for the joint cost problem of equipment purchases/maintenance for research, instruction and public service.

3. That Department Heads and research administrators take a more positive role in assisting faculty in the preparation of proposals, with emphasis on realistic total cost budgeting.

4. That all levels of administration (and operations) engage in a continuing effort to keep the actual cost and hence the rate for each indirect cost element as low as possible.

To the Faculty

5. That each project proposal writer ensure that the budget includes the total cost of research, i.e. all direct and indirect costs.

6. That the entire faculty support the University's policy of securing from all external agencies/organizations the full cost of research sponsored.

News in Brief

Halloween party for children at Kern

The Fourth Annual Children's Halloween Party, sponsored by the Graduate Student Association in conjunction with the Graduate Commons, will be held from 6:30 to 9 p.m. on Sunday, Oct. 30, in Kern Graduate Bldg. The party is open to children aged 2 to 12 of Penn State faculty, staff and graduate students. All children must wear costumes.

Among the evenings activities will be apple bobbing, pumpkin carving, games, singing and story telling. The most original, funniest, ugliest and prettiest costumes will all be awarded prizes.

Delaware County sponsors colloquium

The Fifth Colloquium for Social Philosophy will be held on April 20 and 21, 1978, at the Delaware County Campus, Media, Pa. The theme for the colloquium is "Film in the 70s: New Directions."

The colloquium will examine, from the viewpoint of theme, style, and sociological impact, four topics found in films produced in this decade: The Hero: Where Have You Gone Joe DiMaggio?; Politics: The Celluloid Candidate; Sex Roles: Men and Women Under the Influence; and Coping: Aging, Death, and Other Aggravations.

The sessions will include papers, lectures, panel discussions and critiques

and will utilize feature films and clips, documentaries, and animated, experimental and television films, where appropriate.

The program will run two full days, including an evening session and dinner on April 20. Participants and observers are invited to attend all or any portion of the program.

Inquiries and communications regarding the program should be directed to Dr. Edward S.J. Tomczak, Colloquium Director, Delaware County Campus, 25 Yearsley Mill Road, Media, Pa. 19063, (215-565-3300 x67). Respondents are asked to indicate the topic(s) in which they are interested, their preferred method of participation (presentation of paper, panelist, etc.), and which films they might provide or ask the colloquium to provide to illustrate their talk.

Lord Caradon to speak

Lord Caradon, former British Ambassador to the United Nations, will give a public address on "Two World Crises: the Middle East and Rhodesia" at 8 p.m. on Tuesday, Nov. 1, in Kern Bldg. auditorium.

The meeting is being sponsored by Colloquy, the University International Relations Organization, and the Centre County Chapter of the United Nations Association.

As Permanent British Representative to the United Nations from 1964-70, Lord Caradon was the major author of Security Council Resolution 242 of November, 1967, which remains one of the principal documents relevant to the current

Arab-Israeli conflict.

Since 1970, Lord Caradon has been a consultant for the United Nations Development Programme. He is presently in residence at the Research Program in Development Studies at the Woodrow Wilson School of Public and International Affairs at Princeton University.

Faculty Club restructuring dues

A revised dues structure for the Penn State Faculty Club will be instituted as of Nov. 1. The action was agreed upon at the Oct. 17 meeting of the club's board of directors.

Resident members will pay the following annual dues:

\$90 - professors, librarians, executives, administrators, academic administrators, and associate members of the club;

\$48 - associate professors, associate librarians, senior research associates, and staff exempt personnel;

\$24 - assistant professors, senior assistant librarians, research associates, instructors, lecturers, assistant librarians, research assistants and staff non-exempt personnel.

All non-resident members, whatever their rank or payroll classification, will pay annual dues of \$10.

All retirees, whether resident or non-resident, will be billed \$24 annually.

DNA expert visits

Dr. Stanley N. Cohen, one of the leaders in the field of recombinant DNA research, will present two public lectures at University Park on Wednesday, Nov. 2.

The first lecture, a technical one on "Site-Specific Recombination in Evolution of Genes," will be presented at 11 a.m. in Room 101 Altshouse Laboratory. The second, a more popular presentation on "Gene Transplantation: The Science and The Politics," will be offered in the Keller Bldg. Auditorium at 7:30 p.m. Both lectures are sponsored by the Graduate School Lecture Series and the Department of Biochemistry and Biophysics.

Dr. Cohen, who is professor of medicine and genetics at Stanford University Medical School, was the first to use many of the recombinant DNA techniques that allow genes from bacteria and higher organisms to be combined in the same molecule. The possibility that this technique could produce hazardous organisms never before seen in nature has aroused a storm of controversy and efforts at regulation.

Wallops Island program applications ready in Deike

Applications for the 1978 Spring Term Wallops Island Marine Science Program are available in Room 540 Deike Bldg. and must be completed by Friday, Dec. 9. Participants will be selected during Christmas break and announced on Monday, Jan. 9. The program allows about 55 students to live at the Marine Science Consortium in Wallops, Va., located on the eastern shore of Chincoteague Bay, 50 miles south of Ocean City, Md. It is open to any student of at least sixth-term standing who has an

(Continued on page 4)

Planning, graduate, BDR reports on Senate docket

The University Faculty Senate is scheduled to hear three legislative proposals at its Nov. 1 meeting.

They concern implementation of undergraduate common course numbers, revised entrance requirements for the College of Agriculture, and minor changes in Senate election procedures.

In addition, the Senate will hear informational reports on the University's planning and budget procedures and on the progress of the Senate Ad Hoc Committee on Baccalaureate Degree Requirements. (The BDR report will be printed in full in a later issue of INTERCOM.)

Also on the agenda are two oral informational reports from representatives of the Graduate School and the Department of Public Information and Relations.

At the Senate's June 1977 meeting, a motion was approved for four course descriptions to appear in the Baccalaureate Degree Catalog under the heading, *Common Course Numbers and Descriptions*. The common course designation would include independent studies and special topics courses.

The Committee on Curricular Affairs, which was asked to prepare implementation procedures, will present the following recommendations: that common course numbers be available to individual programs only upon request to the committee; that if a program has independent studies or special topics courses, they only be offered under the common course numbers; and that only the independent studies and special topics courses bear the common course numbers.

The committee will ask that a form be prepared and sent to each program director for designation of new and existing common course offerings.

The changes in the College of Agriculture entrance requirements were drafted after Colleges were urged to review their admissions requirements in basic English, math and science skills.

Under the revisions, applicants would need three units of secondary school English, three units of math, one of science, and eight electives to qualify for admission to the College. Under existing requirements, a prospective student must have three units of English and 12 electives.

The Senate Committee on Committees and Rules will propose minor changes in the returning of ballots and reporting time. Under the proposed changes, secret ballots would be mailed to all Senators and Senators-Elect at least 21 days before the June meeting. Currently, ballots are mailed out at least 15 days before that meeting.

A second proposed change is that votes be counted by five appointed tellers who are Senators but not members of the Nominating Committee. At present, members of the Senate Council are prohibited from participation as tellers.

Poster art by Lanny Sommesse opens Oct. 30 at Museum of Art.

Penn Staters

Dorothy E. Alfke, professor of science education, is marking her 25th year at the University.

Dr. Alfke received her B.S., M.S. and Ph.D. degrees from Cornell University. Before coming to Penn State she taught in the New York state public schools and at Oneonta State College, N.Y.

Since 1952, when she joined Penn State, she has been involved with many National Science Foundation summer institutes and has been director of numerous workshops for elementary science teachers. In 1961-62 she travelled to Bangkok, Thailand, where she taught at Chulalongkorn University and the International School, a private school for English speaking children. She has served as a consultant in elementary science to the Pennsylvania Department of Education and has been under contract to that organization to produce model instructional television series and related in-service materials for Science for the Seventies, a series of publications developed for the improvement of elementary science instruction. Dr. Alfke recently completed a sabbatical leave of absence during which she devoted her time to revising and expanding the Science for the Seventies program. She is the author of *Better Light for Better Sight*, as well as of many technical articles.

Dr. Daniel R. Frankl, professor of physics, recently returned from Europe where he participated in two international conferences and gave seminars at a number of research institutes and universities. In Vienna, he attended the 7th International Vacuum Congress and the 3rd International Conference on Solid Surfaces. He visited and lectured at the Institute of Physical Science, University of Genoa; Physical Institute "Tandemlabor," University of Erlangen, Nuremberg; Max Planck Institute for Electrical Studies, Göttingen; the University of Liege; the Center for Nuclear studies at Saclay, Paris; and the University of Sussex, Brighton.

Dr. Eugene J. Kelley, dean of the College of Business Administration, has been elected president of the Middle Atlantic Association of Colleges of Business Administration (MAACBA).

Department of Public Information and Relations
Room 312 Old Main
University Park, Pa. 16802
Telephone: (814) 865-7517

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Second-class postage paid at State College, Pa. 16801

Dr. Lowell L. Wilson, professor of animal science, has been appointed Associate Director for Life Sciences for the State's Legislative Office for Research Liaison. In this capacity, he will help direct the operation of a science and technology information network, designed to provide members of the House of Representatives with information, evaluation and expertise on diverse issues.

Dr. Joseph Jordan, professor of chemistry, presented a plenary lecture at the 4th International Symposium on Bioelectrochemistry held at the Marine Biological Laboratory in Woods Hole, Mass., Oct. 2-8.

Raymond Brown, professor of music and director of the University Chorus, has been elected president of a new chapter of the National Association of Teachers of Singing (NATS). The chapter, designated the Allegheny Mountain Chapter, covers the whole of the central portion of Pennsylvania, plus portions of southern New York and northern Maryland.

Bookshelf

For the remainder of this century, shortages of nonfuel minerals such as bauxite, tin and iron will not be caused by the depletion of deposits but by problems further along the supply chain, according to Dr. John Tilton, professor of mineral economics. Dr. Tilton presents that conclusion in his book, *The Future of Nonfuel Minerals*, published recently by the Brookings Institution.

He writes that shortages over the next several years are likely to be temporary, since they arise from the activities of men rather than the paucity of nature. Some, he says, can be prevented altogether with economic stockpiling, international commodity agreements, and international conventions covering trade and foreign investment.

Dr. Tilton's book grew out of his contributions to a 1974 Tokyo meeting sponsored by the Brookings Institution at which nonfuel mineral supply problems were discussed by economists from Japan, Europe and North America.

Gymnastics Safety Manual, the official manual of the U.S. Gymnastics Safety Assn. (USGSA), has been published by Penn State's Press.

The purpose of the manual, according to Eugene Wettstone, who edited it and also developed the certification program outlined in it, is to raise the level of safety in gymnastics activities. Mr. Wettstone retired last year after 30 years of teaching and coaching at Penn State.

Obituaries

Joseph E. DeCamp, professor emeritus of geology, died Oct. 20 in Lewisville, Pa., at the age of 90. Dr. DeCamp came to Penn State in 1919 as an assistant professor of geology and retired in 1955. Born in Arkansas, he was graduated from Arkansas University and earned his M.A. and Ph.D. degrees at the University of Michigan.

Chesleigh A. Bonine, professor emeritus of geology, died Oct. 19 in Martinsburg, Pa. He was 89. A member of the faculty from 1918 to 1947, Mr. Bonine was chairman of the Department of Earth Sciences in the School of Mineral Industries. Born in Sorrento, Fla., he received B.S. and Master of Engineering degrees from Lehigh University. He was a member of the U.S. Geological Survey and taught at Lehigh before coming to Penn State.

Logician tries some applied mathematics

Penn State's Dr. Richard B. Mansfield, associate professor of mathematics, recently was the only invited speaker to arrive by homemade bicycle at the summer meeting of the Association for Symbolic Logic in Wrocław, Poland.

The meeting is the most important annual gathering of mathematical

Dr. Mansfield and his handiwork.

logicians and followed by 11 days the London Mathematical Society Symposium on Sheaf Theory in Durham, England.

Since Dr. Mansfield was invited to speak at both conferences, he decided it was a "perfect opportunity to try my first long distance trip on the bicycle I made last winter."

The 600-mile journey from England to Poland took Dr. Mansfield, a runner and veteran of 10 marathons, just nine days, including time out to find new tires. After five flats and two blowouts in the first 60 miles crossing Denmark, he almost gave up, but in a small bicycle shop in Fredenicia he finally found the proper

tires, and "everything else was clear sailing."

Dr. Mansfield took ferries between England and Denmark, Copenhagen and Sweden, and across the Baltic Sea. The rest of the distance was logged on the bicycle.

The last 275 miles crossing Poland was the easiest part of the trip, Dr. Mansfield reports. "The people were friendly and overjoyed to see an American." His arrival in Wrocław became a "media event," reported at the meeting by the conference director and the local press.

At the conclusion of the conference, Dr. Mansfield and his bicycle came home on a 747. The bicycle arrived intact at New York, and Dr. Mansfield says that now he would like to sell it so that he can afford to build a new one.

The bicycle Dr. Mansfield rode to Wrocław was the second model he had built. (The first was built three months earlier and is now being ridden around State College by his wife, Phyllis.) It was constructed from standard bicycle parts, including special seamless carbon steel pipes called a "tube kit." The finished vehicle weighs about 22 pounds, depending on the tires, has front and rear derailleurs and is tailored to Dr. Mansfield's body proportions and preferences.

Dr. Mansfield claims that bicycle building is "a very mathematical thing." "You must be able to visualize space relationships to build a bike, and it helps to have a geometric mind," he says.

Dr. Mansfield had never seen anyone build a bike before he tried his. He taught himself gas welding and used *The Proteus Frame Building Book* as a guide to piece the bike together. While he thought the book was useful, he cautions, "It left a lot out."

Since building his first bike, Dr. Mansfield has also rebuilt an old Schwinn for his 8-year-old daughter, Becky. His 4-year-old son, David, rides another Schwinn (without training wheels) to nursery school.

Report on Ombudsman Seminar

Editor's note: The following statement was prepared by Robert E. Malcolm, chairman of the Subcommittee on Faculty Rights and Responsibilities of the University Senate Faculty Affairs Committee.

At a recent University Ombudsman Development Seminar, the dominant suggestion by far for improvement of the program was to increase communication to the faculty regarding the nature of issues handled by ombudsmen. The ombudsmen were asked to help by way of memos and introductions at faculty meetings. The Faculty Affairs Committee of the University Senate, which oversees and initiates legislative action for the program, is using this review to likewise increase awareness for potential usage by both faculty and administrators.

The central objective of the program is to ensure that procedural fairness exists in the decision-making processes which affect faculty, e.g., in such matters as promotion, compensation, or work assignments. In contrast, ombudsmen do not become involved in substantive issues on these matters, such as what should be proper rank or pay or work assignments for an individual.

Ombudsmen at the seminar indicated that the key element in their success in resolving an issue was being called in early where a dispute on procedures has occurred. Where disputes were entered after each party had reached extreme and unyielding positions on an issue, the ombudsmen found there was little they could do to improve a situation.

On the positive side, a survey of complaints handled during the past year

indicated that about 40 percent were resolved to the satisfaction of all parties. Another 37 percent of the complaints were dropped without further action. The remaining 23 percent are expected to be resolved at a higher level by the Committee on Faculty Rights and Responsibilities.

In general, functions of ombudsmen are to clarify misunderstandings, if possible; to advise faculty and administrators as to appropriate courses of action and to see these appropriate steps are followed; to assist in informal resolution of differences; and, as a last step, to refer the case to the University Committee on Faculty Rights and Responsibilities, c/o Senate Office, Birch Cottage, University Park, so that a formal hearing board may be set up. The ombudsmen do not hold the hearings or serve as counsel for either party before the hearing board.

Normally a faculty member would first discuss a grievance with his or her immediate supervisor, and, failing resolution there, discuss the matter with his or her dean or director. If an understanding is not reached, then the ombudsman from the complainant's academic unit should be consulted. Explicit detail on procedures may be found in the University Policy Statement PS 76.

Ombudsmen are selected through procedures established by a majority of faculty in each academic unit. Names should be available through the unit's dean or director, or may be obtained through the Senate or Provost's Office.

University Park Calendar

Oct. 27 — Nov. 6

Special Events

Thursday, Oct. 27

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.
History Roundtable, James Kingsland and Cyril Griffith discuss South Africa, 8 p.m., Room 106 Sackett

Friday, Oct. 28

P.S.O.C. Hiking Division, idiot overnight (wait all night on Mount Nitany for the Great Pumpkin to show up),

Sports: j.v. football, vs. Wesley Jr. College, 2 p.m.

Terrace Room Trick or Treat Candlelight Dinner, live entertainment, 4:45 — 7 p.m., HUB.

Chinese Student Association film, 7:30 p.m., Room 112 Kern.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Penn State Brass Chorale, 8:30 p.m., Music Bldg. recital hall.

Saturday, Oct. 29

Sports: football, vs. Miami, 1:30 p.m.

Terrace Room Trick or Treat Candlelight Dinner, live entertainment, 4:45 — 7 p.m., HUB.

Shaver's Creek Nature Center, Ghoulies and Beesties and Things that Go Bump in the Night, 8 p.m., Stone Valley.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Sunday, Oct. 30

Sports: women's cross country, Blue & White Invitational.

P.S.O.C. Hiking Division, lost locomotive hunt in the Seven Mountains, 9 a.m., HUB parking lot.

University Chapel service, Doris M. Seward, executive assistant to the President, 11 a.m., Eisenhower Auditorium.

Shaver's Creek Nature Center, History Walk: Reading the Landscape, 2 p.m., Stone Valley.

Artists Series, *My Fair Lady*, matinee, 3 p.m., and 8:30 p.m., Eisenhower Auditorium.

GSA Halloween Party. For children of faculty, staff and graduate students, ages 2-12, with costumes only, 6:30-9 p.m., Kern Commons.

Monday, Oct. 31

Last day of signing fall term NDSL and University Long Term Loans, Room 108 Shields.

Shakespeare film, *A Midsummer Night's Dream* (Hall/Rigg), 6:30 p.m., Room 101 Chambers.

Free admission.

france-cinema, *The Story of Adele H.*, 7 and 9 p.m., Room 112 Kern.

Comp. Lit. Film Series, *From Every Shire's End and The Pardoner's Tale*, 8 p.m., Room 217 Willard. Free admission.

Tuesday, Nov. 1

Fixed date for meetings involving Commonwealth campus faculty.

Comp. Lit. Film Series, 12:15 p.m., talk, 1 p.m., Room 1 Faculty Club. Dominique Janicoud, visiting fellow of IAHS, University of Nice, France, on "The New French Philosophers."

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Sports: field hockey, vs. Delaware, 2:30 p.m.; soccer, vs. Pittsburgh, 7 p.m.

Shakespeare film, *A Midsummer Night's Dream* (Hall/Rigg), 6:30 p.m., Room 101 Chambers.

Free admission.

Artists Series, Lloyd Films, *Safety Last* and excerpts from *Hot Water*, 8 p.m., Eisenhower Auditorium.

Colloquy, Lord Caradine on "Two Danger Areas — The Middle East and Southern Africa," 8 p.m., Room 112 Kern.

English colloquium, John Balaban, "A Reading of Works in Progress," 8 p.m., Room 101 Kern.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Wednesday, Nov. 2

Phi Mu Alpha Barbershop Quartet, 12:30 p.m., Kern Lobby.

Graduate School/Biochemistry and Biophysics lecture, Stanley N. Cohen, professor of medicine and genetics, Stanford University Medical School, on "Gene Transplantation: The Science and the Politics," 7:30 p.m., Keller Auditorium.

James Benshoof leads Brass Chorale Oct. 28.

GSA Commonsplace Theatre, *On the Waterfront*, 7:30 and 9:30 p.m., Room 112 Kern.

PSU Thespians, *Her Fatal Beauty*, 8 p.m., Pavilion Theatre.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Philip Dettra, piano recital, 8:30 p.m., Music Bldg. recital hall.

Thursday, Nov. 3

STS/Two Cultures Dialogue. Deans Arthur Lewis and Thomas Knight on "Public Concerns About Science and Technology and Related Value Issues," noon, State College Hotel.

Super Mud Opening Reception, Maria Martinez, 1:30-5 and 7:30-9 p.m., HUB.

FSHA, Norwegian seafood dinner, Maple Room, Henderson. For reservations, phone 865-7441.

Phi Mu Alpha Brotherhood recital, 6 p.m., Room 112 Kern.

Super Mud Invitational Graduate Student Slide Presentation, 7:30 p.m., HUB ballroom.

PSU Thespians, *Her Fatal Beauty*, 8 p.m., Pavilion Theatre.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Artists Series, The Chamber Music Society of Lincoln Center, 8:30 p.m., Eisenhower Auditorium.

Friday, Nov. 4

Super Mud, Wayne Higby, potter, a demonstration, 9:30 a.m., Eisenhower Auditorium.

Maria Martinez, potter, a demonstration, or Susan Peterson, biographer of Maria will speak, 1 p.m., Eisenhower Auditorium; firing of Indian pottery, 3 p.m., HUB lawn;

David Shaner, potter, a demonstration, 7:30 p.m., Eisenhower Auditorium.

Public Coffee Hour with playwrights James McDonald and Robert Gerlach, visiting fellows of IAHS, 4 p.m., Room 128 Arts Bldg.

Sports: soccer, vs. Temple, 7 p.m.

Folk and Square Dance Roundup, 7:30 p.m., Room 112 Kern.

Pennsylvania Scholarship Society plenary session, Roland Pellegrin, PSU, and Charles Wright, University of Pennsylvania, on "Third Century Threshold: New Uses of Old Variables," 8 p.m., Keller Auditorium.

PSU Thespians, *Her Fatal Beauty*, 8 p.m., Pavilion Theatre.

Artists Series Jazz Festival, 8:30 p.m., Eisenhower Auditorium.

Nitany Knights benefit, 8:30 p.m., Music Bldg. recital hall.

Saturday, Nov. 5

P.S.O.C. Hiking Division, cross country (bushwack) backpack, through Sunday.

Super Mud demonstrations, Robert Winokur, potter, 9:30 a.m.; David Middlebrook, potter, 1 p.m., Eisenhower Auditorium.

Shaver's Creek Nature Center, Adventure Series, children 7 and older, registration necessary — 865-1851, 10 a.m.-3 p.m., Stone Valley.

Sports: women's volleyball, vs. Pennsylvania, 2 p.m.

PUS Thespians, *Her Fatal Beauty*, 8 p.m., Pavilion Theatre.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Artists Series Jazz Festival, 8:30 p.m., Eisenhower Auditorium.

Sunday, Nov. 6

P.S.O.C. Hiking Division, hike on Centre Hall Mountain and the other Greens Valley, 9 a.m., HUB parking lot.

University Chapel service. The Rev. Marcus Meckstroth, Faith United Church of Christ, State College, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Mammals, Skinning and Tanning, 2 p.m., Stone Valley.

france-cinema, 7 and 9 p.m., Room 112 Kern.

Julius and Jim

Artists Series Jazz Festival, 8:30 p.m., Eisenhower Auditorium.

Seminars

Thursday, Oct. 27

Computation Center, "JCL," (1 of 5), introductory programming background suggested, 7:30 p.m., Room 105 Osmond.

Friday, Oct. 28

Analytical Chemistry, Mike Roland on "Coherent Anti-Stokes Raman Spectroscopy," 11:10 a.m., Room 333 Whitmore.

Gerontology Center/Community Development, Anne-Marie Guillard, University of Paris VII, on "A Marxist Analysis of French Policies on Aging," 4 p.m., Room S131 Henderson.

Physical Chemistry, George Birnbaum, National Bureau of Standards, on "Line-Shape Modeling and Its Application to Collision-Induced Spectra," 4 p.m., Room 333 Whitmore.

Monday, Oct. 31

Biochemistry and Biophysics, Robert Burris, University of Wisconsin, on "Biochemistry of Nitrogen Fixation," 3:35 p.m., Room 101 Alt-house.

Computation Center, "JCL," (2 of 5), introductory programming background suggested, 7:30 p.m., Room 112 Osmond.

Organic Chemistry, Philip S. Skell on "Successimidy Radical(s) Chemistry," 8 p.m., Room 333 Whitmore.

Tuesday, Nov. 1

Biochemistry and Biophysics, Robert Burris, University of Wisconsin, on "Potentials for Genetic Manipulation of Nitrogenase," 11:10 a.m., Room 101 Allhouse.

Surface Science, Bob Culbertson on "Field Ionization of Surface Adsorbates," 1 p.m., Room 339 Davey.

Computation Center, "Introduction to the Comp. Center," introductory programming background suggested, 1:30 p.m., Room 110 Comp. Bldg.

Air Pollution Control, Rosa G. DePena on "Sulur in the Atmosphere — Its Transformation and Deposition: A Review," 2:20 p.m., Room 140 Fenske.

Geosciences, Sergei V. Meyen, USSR Academy of Sciences, on "Three Fundamental Principles of Stratigraphy," 4 p.m., Room 222 Deike.

Inorganic Chemistry, Gregory L. Geoffroy and Julian Pinkos, Personnel Director, Erie Technological Corporation, on "How to Conduct a Job Interview," 8 p.m., Room 333 Whitmore.

Wednesday, Nov. 2

Biochemistry and Biophysics, Stanley N. Cohen, Stanford Medical School, "Site-Specific Recombination in the Evolution of Genes," 11 a.m., Room 101 Allhouse.

Engineering Science and Mechanics/ Bioengineering, D.J. Patel, National Heart and Lung Institute, National Institutes of Health, on "Role of Feedback and Relaxation Exercises in the Treatment of Hypertension," 4 p.m., Room 232 Hammond.

Fuel Science, Ismail K. Ismail on "Heats of Chemisorption of Oxygen on Sear Carbons," 4 p.m., Room 301 Mineral Industries.

Thursday, Nov. 3

Agronomy, Valerie Carey on "An Interview at the Agricultural Research and Education

Center, Homestead, Florida," 9:35 a.m., Room 111 Tyson.

Chemistry, Harry G. Mark, Jr., University of Cincinnati, on "Spectroelectrochemical

Studies of Vitamin B₁₂ and Related Cobalamins," 12:45 p.m., Room 333 Whitmore.

Physics, Jack Leibowitz, Catholic University, on "A General Introduction to Some Curious Effects in Bulk Superconductors Near the Transition Temperature: Detection of Non-Equilibrium and Spectroscopic Effects," 3:30 p.m., Room 117 Osmond.

Acoustics, Francis H. Fenton on "Recent Developments in Low Mach Number Flow Noise Generation from Turbulent Boundary Layers," 4 p.m., Room 73 Willard.

Computation Center, "JCL," (3 of 5), introductory programming background suggested, 7:30 p.m., Room 112 Osmond.

Friday, Nov. 4

Analytical Chemistry, Charlie Ting on "Electrochemical Modeling of Cytochrome C," 11:10 a.m., Room 333 Whitmore.

Ionosphere Research Laboratory/Meteorology, Thomas A. Seliga, Ohio State University, on "Differential Reflectivity: A New Measurement Technique in Radar Meteorology," 4 p.m., Room 329, EE East.

Exhibits

Chambers Gallery: Hugh Stumbo, collages; Jack Troy, ceramics.

Hammond Gallery: Art of the 13th Term: Tom Ferguson and Martin Rajala, mixed media, through Oct. 30; Neil Feather and Marilyn Ranker, ceramics, opens Nov. 1.

HUB Gallery: San Francisco Posters exhibit; Penn State Wildlife Society Invitational exhibit, both through Oct. 29. Paul O'Hara, sculpture, and Joan Sonnenberg, prints, opens Oct. 30.

Kern Commons Gallery: Pennsylvania Guild of Craftsmen, mixed media, through Oct. 29. Edward S. Curtis, photographs of North American Indians, through Nov. 5.

Museum of Art: Arne Jacobsen: Danish architect and designer, through Oct. 30. Lanny Sommers, poster art, opens Oct. 30. Kenneth Beittel, recent works, and John Koch: models and monuments, both open Nov. 6.

Museum of Art HUB Gallery: Super Mud exhibition, opens Oct. 30.

Pattee Galleries: Canadian exhibit, Rare Book Room, through Oct. 28.

Zoller Gallery: Larry Edwards, paintings, through Oct. 30. Super Mud opens Nov. 3.

News in brief

(Continued from page 1)

interest in the marine sciences.

For additional information on the program, contact Dr. Albert L. Guber, Room 538 Deike Bldg., phone 865-3836.

Computer programming workshops offered

Two programming workshops will be held following fall term for a period of five days: Monday, Tuesday and Wednesday, Nov. 21, 22, 23, and Monday and Tuesday, Nov. 28 and 29, allowing a break for Thanksgiving. These workshops are open to all faculty, staff and graduate students. The workshops offered are:

Introduction to FORTRAN (214 Boucke Bldg.)

Basic computer concepts and techniques of programming in the FORTRAN IV Language will be studied. This workshop is oriented toward those who have had no previous computer experience.

Introduction to PL/I (304 Boucke Bldg.)

This workshop will cover basic computer concepts and techniques of programming in PL/I Language. No previous computer experience will be necessary.

Lectures will be given throughout each day, beginning at 9 a.m. and resuming at 1:30 p.m. after a lunch break. Sample programs will be studied and practice problems will be assigned throughout the five-day period. In order to gain the maximum benefit, participants should plan to devote the entire five days to a workshop.

Registrations are now being accepted by Linda Yarnell, Room 229 Computer Bldg. (863-0422). A charge of \$3 (cash or interdepartmental transfer) for course materials will be made for each registrant. Computer charges will be borne by the Computation Center, and participants can use the computer for practice purposes free of charge throughout the winter term.

UNICARE review urged

Faculty and staff members of the University should periodically review the deduction being taken for their group health insurance (UNICARE) to be certain that they are paying for the correct coverage.

The reason the review should be made is that changes in family status may affect your costs and your coverage. For example, when you get married, when you have a first child, or when your spouse starts working for the University, you run the risk of having inadequate dependent coverage unless you do something about it.

You should check your coverage if any of the following circumstances arises:

1. Your spouse or only dependent child

begins working for the University as a regular employee.

2. Your spouse or only dependent child dies.
3. You are divorced.
4. Your only dependent child enters military service or reaches age 19 (or 23 in the case of a full-time student).
5. Your only dependent child gets married.

To determine whether or not you have the right coverage or are paying the right amount, compare the amounts shown on your salary check stub with the amount you should be paying as shown in the following table:

Insured Persons	Monthly	Bi-weekly
Employee only	None	None
Employee, child, children	\$1.75	\$0.80
Employee, spouse	\$3.60	\$1.66
Employee, spouse, child or children	\$5.00	\$2.30

(These rates apply when all insured persons are under age 65. Persons over age 65 are insured in a different plan at no cost.)

If a change should be made, call, write, or visit the Employee Benefits Division, Room 133 Willard Bldg., 865-1473. Faculty and staff members at locations away from University Park may receive assistance by contacting their Personnel Officer or Business Manager.

The University has no way of knowing whether a change should be made, so it is the employee's responsibility to keep the records up to date and accurate. No refunds for overpayment will be made unless it is shown the University was in error.

New JGE issued

Innovation in education is the theme of the current summer issue of *The Journal of General Education*, published by Penn State's Press. Guest editor for the issue is Thelma Baker, who teaches anthropology at the University. Among the Penn State contributors are Warren T. Morrill, professor and head of anthropology, writing on "Rethinking the Introductory Course: Structural Determinants of Content," E. R. Melander and Edward I. Pitts discuss "Faculty and Administrative Roles in Fostering Curricular Innovation." Dr. Melander is professor of quantitative business analysis and assistant vice president for undergraduate studies. Mr. Pitts is an instructor in educational policy studies. Stephen A. Bragg, an assistant in the Center for the Study of Higher Education, authored "St. Olaf and the Paracelcus: A Case Study of Planned Curricular and Organizational Change in Higher Education." Paul Hopper, instructor in English at Shenango Valley, contributed a poem.

Arts Roundup

'Something's Afoot' premieres tonight

Something's Afoot, a musical-comedy-mystery spoof is opening tonight (Oct. 27) at 8 p.m. at the Playhouse Theatre.

Directed by Helen A. Manfull, associate professor of theatre arts, the show will be presented Oct. 27-29 and Nov. 1-5 at 8 p.m. Because of the unusual complexity of the setting for the production, a guest professional scenic artist, Paul Tankersley, was brought in from New York to help paint the set designed by Ken Holoman, assistant professor of theatre arts.

Two of the play's authors, James McDonald and Robert Gerlach, will be in residence at Penn State Nov. 3-5 as visiting fellows of the Institute for the Arts and Humanities Studies. The public is invited to a coffee hour for them at 4 p.m. on Nov. 4 in Room 128 Arts Bldg. There will also be a critique of the production following the Friday, Nov. 4, performance at 10 p.m. in the Playhouse.

Dettra to present recital

Pianist Philip Dettra, who has been on leave of absence from the University for the past year, has returned to his position as an assistant professor of music and will present his first recital of the season at 8:30 p.m. Wednesday, Nov. 2, in the Music Bldg. recital hall.

Mr. Dettra has sonata two major works for the recital, Brahms' Sonatas No. 5 in F Minor and Book One of Debussy's Preludes. His decision to include the Debussy pieces, he notes, grew out of his leave, which he spent studying with pianist Paul Dugueure, one of the great interpreters of French piano music.

Student ceramics show

Super Mud '77, a student ceramics invitational exhibition, opens at the Zoller Gallery Sunday, Oct. 30, and will continue there through Nov. 12. The exhibition coincides, in part, with the annual Super Mud conference, which will be held at the University Nov. 3, 4 and 5.

Funding Sources

For further information, call 865-1372

(291-2) The NSF Science Faculty Professional Development Program (for the improvement of college science, mathematics, and engineering teaching) has a Dec. 16 deadline. The program is designed to help two-year and four-year college and university science teachers involved in undergraduate science instruction. Awards are offered to U.S. science teachers to pursue research or study at institutions of higher education or in industrial or other nonacademic laboratories. (See SE 78-28)

(291-2) A selection of Dec. 1977 deadlines follow by category. Detailed information is available.
(1) Arts/Humanities/International — AAUW fellowships; Scandinavian fellowships and grants; IBEX exchanges and grants; Japan Foundation grants and fellowships; NEA small presses, design, fellowships,

Elven schools have been selected for inclusion in the student invitational. They are Bennington, Hunter and Moore Colleges; the Universities of Colorado and Massachusetts; Purdue, Penn State, San Jose State and Tulane Universities; the Sun Valley Center for the Arts and Humanities; and the School of the Museum of Fine Arts-Boston.

Brass Choral concert Oct. 28

Penn State's Brass Choral will appear in concert at 8:30 p.m. Friday, Oct. 28, in the Music Bldg. recital hall.

The program will include selections of contemporary American brass music and English brass band music, collected by director James Benshoof under grants from the Institute for the Arts and Humanities Studies.

Jazz Festival opens Nov. 4

The Artists Series, in cooperation with the Penn State Jazz Club, is sponsoring a weekend of jazz Friday through Sunday, Nov. 4, 5 and 6. Featured in this jazz festival will be such jazz greats as George Benson, The Preservation Hall Jazz Band and the Billy Taylor Trio.

In addition to these concerts, workshops and a jazz film festival are scheduled for Sat., Nov. 5, and Sun., Nov. 6, in the HUB with Billy Taylor acting as master of ceremonies.

Other performers scheduled to participate in these activities will be The Preservation Hall Jazz Band, The Dance Band, Third Stream, and Art Goldstein, jazz pianist.

The schedule of concerts for the three days includes: George Benson, Friday, Nov. 4, in Recreation Bldg.; The Preservation Hall Jazz Band, Saturday, Nov. 5, in Recreation Bldg.; and the Billy Taylor Trio, Sunday, Nov. 6, in Eisenhower Auditorium. Mr. Benson's concert is at 9:15 p.m. and the other two are scheduled at 8:30 p.m. A brochure with a complete listing of workshops and films is available at the HUB Booth, Eisenhower Auditorium and the Artists Series office in Pine Cottage. Tickets are on sale at the HUB Booth.

cities, cultural resources, NEH translations, consultants, curriculum materials, fellowships; Indian studies, CIES teachers and research, Indo-American fellowships.
(2) Science/Energy — NSF — metabolic, regulatory, developmental, and genetic biology; biochemistry; biophysics; CAUSE; EHVIST; women in science; US Japan and US-Latin American cooperative; SEED; earth sciences; computer science research; teacher science education; engineering initiation grants; NATO postdoc; handicapped in science; postdoc fellows; ERDA — graduate energy-related traineeships.
(3) Health/Mental Health — Runyon/Winchell Cancer Fund; HSA child health and crippled children research; NIH Fogarty research fellowships; NIA nutrition and aging; NCI young investigator research; HRA long term care research.
(4) Urban/Community Development — Commerce travel service; Labor doctoral dissertation and CET& research; Truman public service grants.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by private grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been exempted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Nov. 3. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

PROGRAMMER — Hershey Conduct analyses and studies for less complex system requirements; develop block diagrams and logical flow charts for such systems. Convert logical flow charts to language processable by computer. Confer with supervisor and representatives of other departments concerned with program to resolve problems by program intent, output requirements, input data acquisitions, etc. Test, check and diagnose and correct standard computer programs. Complete documentation of program development and subsequent revisions. Prepare written instructions for operating personnel during production runs. Revise and refine, as required, procedures throughout the program that is formally established. An associate degree in computer science, plus two to three years of directly related experience, or a bachelor's degree in mathematics or a related field, plus one to two years of directly related experience

Cutting a ribbon to dedicate Capital Campus's new multi-purpose building on Oct. 19 are, from left: Capital Provost Robert E. McDermott; George D. Wolf, dean of faculty at Capitol; President John W. Oswald; Provost Edward D. Eddy.

Penn State Intercom

News in Brief

No telephone system changes being accepted

Telephone Services would like to remind faculty and staff that no changes in telephone service can be accepted between Nov. 1 and Jan. 3 because of revisions to be made in the system during December.

Bell Telephone must program the computer in their office prior to the actual change of service. Any additions, deletions, or changes will affect this procedure, causing service problems at cutover time. Requests for service changes will be accepted again after Jan. 3.

The cooperation of the University community is asked during the changeover to the new Centrex system. Complete instructions for using the new system will be issued in December.

Values symposium Nov. 7

Richard L. Morrill, executive assistant to the Provost, will speak on "Values, Relativism and Higher Learning: Defining the Issues" at 8 p.m. on Monday, Nov. 7, in the Human Development Living Center. His talk is sponsored by the Interdisciplinary Symposium on Value. Dr. Joseph C. Flay, associate professor of philosophy, will serve as respondent.

Faculty members and students from all areas of study who are interested in participating in the symposium are invited to contact Prof. Henry C. Johnson, Room 406 Rackley Bldg., 865-1487.

Free U seeking instructors

Any staff or faculty member interested in teaching a course at the Free University during winter term should send in a course description by Friday, Nov. 11. Forms are available in Room 223 HUB, 863-0038.

The Free U will sponsor a course in practically anything. Courses are not offered for credit and may start any time during the term. Based on past experience, Free U veterans say that short

(continued on page 6)

University alumni urged to contact legislators

More than 100,000 University alumni living in Pennsylvania are being asked to urge their legislators to "work toward an early and equitable solution to the fiscal dilemma which faces not just Penn State and other colleges and universities, but the entire Commonwealth."

The request was made in a letter sent to the alumni from the Executive Board of the Penn State Alumni Association. The Alumni Council and Executive Board met at University Park Oct. 28-29.

"Clearly, any solution is going to require bipartisan compromise," the letter reads. "Penn State students and programs — and ultimately the taxpayers — are being hurt by the delay."

"Will you make a special effort to contact your local legislators and urge their support in providing the monies necessary to fund Penn State and other universities? It is important that they

understand the tremendous additional costs that are occurring as a result of the delay in solving this crisis."

The letter mentions the interest costs which have mounted because of borrowed funds and states that "the executive board of the Alumni Council has met with Penn State President John W. Oswald to express to him our support and to tell him of the strong support of tens of thousands of Penn State alumni."

The letter is signed by Edward R. Book, president of the Alumni Association and president and chairman of HERCO, Inc.; Hershey; Grant R. Ackerman, of Pittsburgh, president of the Undergraduate Student Government; Barbara Hackman Franklin, commissioner, U.S. Consumer Products Safety Commission, Washington, D.C.; J. Lloyd Huck, executive vice president, Merck and Co., Inc., Rahway, N.J.; David J. McAleer, M.D., general surgeon and

vice president of the Delaware County Medical Society, Drexel Hill; Leslie Lewis Montz, public information assistant at the Ogontz Campus, Abington.

Ralph E. Peters, president, Berger Associates, Camp Hill; Jay H. Feldstein, vice president of the Alumni Association and president of Feldstein, Grinberg, Stein and McKee, Pittsburgh; Phyllis Watkins Crabtree, homemaker and teacher, State College; Harriet Curry Grier, headmistress, The Grier School, Tyrone; Owen E. Landon, Jr., president, Landon Associates, Westport, Ct.

Trish Morrison, State College, president, Graduate Student Association; Herbert R. Nurick, attorney, McNeese, Wallace and Nurick, Camp Hill; Stanley G. Schaffer, president, Duquesne Light Co., Pittsburgh; and William H. Sippel, Jr., principal, Deeter, Ritchey, Sippel Associates, Allison Park.

Recruitment, admissions studies review body named

A six-member review committee has been appointed by President John W. Oswald to review various Penn State admissions and recruitment studies made during the past year.

The studies, made by the Office of Budget and Planning, focus on how high school students select a college, Penn State's image among the various groups of students it serves, and what three paecetting institutions are doing in admissions and recruitment. The three institutions are the University of Mississippi, Purdue, and NYU.

The review committee, which is being

chaired by Dr. Richard E. Grubb, vice-president for administrative services, includes Dr. John J. Cahir, associate professor of meteorology; Dr. Thomas G. Fox, dean of faculty at Behrend College; Dr. Eugene J. Kelley, dean of the College of Business Administration; Dr. Richard L. Morrill, executive assistant to the Provost; and Dr. Jacqueline L. Schoch, associate director for academic affairs at the DuBois Campus.

The purpose of the studies is to identify ways to strengthen the recruitment and admissions functions at Penn State in light

of changing enrollment demands.

Dr. Oswald asked the committee to identify recommendations in the studies which they feel "should receive high priority for implementation, as well as recommendations which appear to be sound but which should receive further study prior to implementation."

He also invited the committee to make suggestions for additional steps that might be taken to strengthen Penn State's recruitment and admissions processes.

The committee has been requested to deliver its report by Dec. 1.

Tax deferred annuity plan orientation Nov. 7-11

All full-time faculty and staff members of the University are eligible to participate in a program which allows them to set a portion of their salary aside for savings or retirement income and reduce their income tax obligation at the same time.

Currently, nearly 1,000 faculty and staff members are participating in this unique

savings program, which is known as the tax deferred annuity plan. For those employees who are not participating but are interested in learning more about the program, the University has arranged for an orientation week running from Nov. 7 through 11 for the dissemination of tax-deferred annuity information.

During this one-week period, representatives from two of the participating insurance companies, The Equitable Life Assurance Society and the Variable Annuity Life Insurance Company (VALIC), will be in University Park or State College for individual

Penn Staters

Dr. Richard C. Nelson, professor of physical education and director of the Biomechanics Laboratory, has received the Philip Noel Baker Research Award for 1977 from the International Council of Sport and Physical Education. He is the first American ever to receive the award, which honors men and women who, through their scientific work as well as through their contributions to the International Council, merit recognition.

Dr. Nelson, who is president of the International Society of Biomechanics (founded at Penn State in 1973), is co-author of the book, *Biomechanics of Sport: A Research Approach*. He has served on the University faculty since 1964.

Dr. Robert E. Andreyka has been appointed head of the Division of Occupational and Vocational Studies in the College of Education. He has been serving as associate head of the division since he came to Penn State last year from Florida State University, where he was associate professor and program leader of vocational education. He previously taught at Ohio State University, the University of Akron and Kent State.

A native of Barborton, Ohio, Dr. Andreyka received his B.S., M.Ed. and Ph.D. degrees at Kent State.

Dr. C. Max Lang, professor and chairman of comparative medicine and director of the animal resource facility at Hershey, has been named chairman of the National Research Council's Committee on Laboratory Animal Facilities and Resources. The committee will gather information on the administration, personnel needs, equipment, costs of animal care and projected needs of laboratory animal facilities across the United States.

Bonnie M. Johnson, assistant professor of speech communication, received the Emerging Scholar Award of the Speech Communication Association of Pennsylvania. Dr. Johnson received the award for her book, *The Process of Organizing*, published this year by Allyn and Bacon. In addition to authoring articles for various professional journals, she serves on the editorial boards of Communication Quarterly and Communication Monographs. Dr. Johnson received her B.A. from Texas Christian University and her M.A. and Ph.D. degrees from SUNY-Buffalo.

The Emerging Scholar Award is presented annually to a speech communication educator in the first five years of professional affiliation.

Dr. Nunzio J. Palladino, dean of the College of Engineering, has been named vice president of Argonne Universities Association (AUA) by that group's board of trustees. He will also serve as acting president of the association until a full-time president assumes office, no later than March 31, 1978. AUA, of which Penn State is a member, is a non-profit corporation designed to foster scientific research through participation in the three-part contract for management and operation of Argonne National Laboratory, Argonne, Ill.

Dr. H. K. Henisch, professor of physics, was invited by the Hebrew University, Jerusalem, to serve as a consultant on a project involving semiconductor surface physics, sponsored by the U.S.-Israel Binational Science Foundation. During his one-week visit, Dr. Henisch also lectured at the Racah Institute of Physics in Jerusalem and at the University of Tel Aviv on the subject of his own researches into semiconductor contacts.

Dr. M. Albert Vannice, associate professor of chemical engineering, presented the keynote address at the 5th Canadian Symposium on Catalysis, held at Calgary Oct. 26. The title of Dr. Vannice's address, which he also presented at Stanford University on Oct. 28, was "The Catalytic Synthesis of Organic Compounds from CO and H₂."

Dr. L. G. Austin, professor of materials science and chairman of the mineral processing section, served as principal lecturer for a five-day course entitled "Grinding: Theory and Practice," given at the University of Witwatersrand in South Africa. The course was sponsored by the South African Institute of Mining and Metallurgy. Dr. Austin also presented a seminar at the University of Durban.

Dr. Alfred L. Bortree, professor and head of the Department of Veterinary Science, has been elected first vice president of the Pennsylvania Veterinary Medical Assn. He will take office in the 850-member professional organization on Jan. 1.

Dr. Elliot Vesell, professor and chairman of pharmacology and assistant dean for graduate education at Hershey, was the John C. Krantz Jr. Annual Endowed Lecturer in Pharmacology at the University of Maryland School of Medicine last month. His topic was "Pharmacogenetics: The Individual Factor in Drug Response."

Dr. J. Larry Duda, professor of chemical engineering, presented a seminar on "Molecular Diffusion in Polymer Solutions" to the Department of Chemical Engineering at Princeton University and to the Institute of Paper Chemistry at Appleton, Wisc., last month.

Dr. Hans Panofsky, Evan Pugh Professor of atmospheric sciences, recently presented a paper, "Scaling in the Convective Boundary Layer," at Riso National Laboratory, Roskilde, Denmark.

Jared K. Tyson, associate Adams County Extension agent, has been named winner of the 1977 State Achievement Award presented by the National Association of County Agricultural Agents. The awards are given annually to a member of the University's Cooperative Extension Service with less than 10 years of service who has demonstrated outstanding ability to conduct innovative educational programs.

Graham B. Spanier, associate professor of human development and sociology, has been elected to membership in the International Academy of Sex Research. The academy has a worldwide membership of 150 researchers who have distinguished themselves for their contributions to the study of sexual behavior, interaction, and development in humans and primates. Membership is multidisciplinary, with researchers having been elected from the fields of biology, medicine, anthropology, sociology, psychology and genetics.

Dr. Barbara Raffel Price, assistant professor of law enforcement and corrections, has been elected to the executive board of the American Criminology Society to serve as executive counselor for a three-year term.

Bookshelf

Dr. Richard L. Frautschi, professor and head of the Department of French, is one of three specialists who collaborated on a bibliography of French prose fiction recently published by Mansell Information/Publishing of London and Paris. Entitled *Bibliographie du genre romanesque français, 1751-1800*, it is the first

such publication to cover the second half of the Enlightenment period.

Dr. Frautschi's colleagues on the project were Angus Martin, of Macquarie University, New South Wales, and Vivienne Mylne, of the University of Kent, Canterbury. A supplement is projected for publication in 1979.

Although the bibliographers had expected to find most of their titles in western Europe when they undertook the project ten years ago, they discovered an unexpectedly strong demand for French prose fiction of the period in central Europe, with many volumes having been printed or sent there. In all, 2,449 original works and 4,680 re-editions have been identified to date.

Dr. Robert J. Maddox, professor of history, has written a book about the U.S. intervention in Siberia in the summer of 1918. President Woodrow Wilson's justification for sending an expeditionary force to Siberia was that the troops were to protect Czechoslovakian soldiers trapped there after the Soviet Union signed a separate peace treaty with Germany. But some historians, Dr. Maddox among them, have argued that the real mission was to undermine the Bolshevik government, then coming to power.

In his book, *The Unknown War with Russia*, he contends that President Wilson shaped the course of modern Soviet-American relations when he sent the troops to Siberia because the action convinced Russian leaders, notably Josef Stalin, of the duplicity of capitalist nations.

The book was published by Presidio Press of San Francisco.

Dr. Rio Preisner, professor of German, has just published the first of two volumes of essays, entitled, *Aspekte einer provokation ischeischen Germanistik*, in the Colloquium Slavicum series, edited by H. Kunstmann, University of Munich, and V. Setchaker, Harvard University. This book is of interest not only to critics of German literature, but also to Slavists, political scientists and philosophers.

The first volume contains, among other essays, a detailed analysis of the demise of German literary criticism in Czechoslovakia. In this study, Prof. Preisner shows how the inability of Czech intellectuals to comprehend until too late the fateful contradictions in German idealism and their rejection of Austrian cultural universalism helped lead to political catastrophe.

In another essay in the book, Dr. Preisner discusses the authenticity of a recently discovered (1965) Kafka manuscript.

Prof. Preisner is recognized internationally for his book and articles on Johann Nestroy, a prominent 19th-century Austrian playwright, and for his philosophical and political writings, including a two-volume study on the origins of totalitarianism. In his current book, he analyzes Nestroy in his role as the creator of "the tragic farce," a very special dramatic form which expresses certain features of life under totalitarian regimes.

Dr. Terry J. Peavler, assistant professor of Spanish and comparative literature, is the author of *Prose Fiction Criticism and Theory in Cuban Journals: An Annotated Bibliography*, which has been distributed in monograph-form to the membership of the Latin American Studies Association. The cross-referenced bibliography is intended to make hard-to-find Cuban publications accessible to foreign scholars.

The Department of English at the University now has its own collection of readings for students enrolled in English 20, a required freshman course.

The Penn State Reader: 20, in use for the first time this term, was compiled from suggestions submitted by faculty members. Although it includes selections from early writers, modern pieces are

emphasized and there are readings from Jacob Bronowski, A. J. Liebling, Walter Lippmann, and other contemporary writers.

The reader was edited by **Douglas B. Park**, director of freshman English, and **Edward M. Uehling**, formerly a Penn State graduate assistant.

"The department thought there was a need for a collection of readings designed specifically for English 20," Dr. Park explains. "The commercial anthologies are so concerned with reaching a broad market that they sometimes don't meet the needs of a particular course."

The reader was in preparation for about one year and is sold at cost, well below the price of nationally marketed readers. Many of the selections included in it have not been used previously in anthologies.

The project was supported by a Course Improvement Grant from the Office of Undergraduate Studies.

School contact register set up

University Provost Edward D. Eddy requests that all faculty and students who contemplate making contact with schools in the Centre region for any University related purpose register their intentions with Dean Madison Brewer, Room 278 Chambers Bldg., 865-2523, prior to the contact.

Officials from nearby schools have recently voiced concern over the character and extent of the requests they have been receiving for interviews, conferences, observation of classes, the use of students and teachers as subjects for studies and experiments, etc. The point is not that they do not welcome opportunities to relate in these ways to the University community, but rather that they are concerned about the relative extent to which the time of students, teachers, and administrators is allocated to these activities. There is also concern over compliance with government regulations regarding the use of human subjects.

Dean Brewer will provide those intending to make such contacts with information that might be relevant to their arrangements. This might include the volume of present contacts with a particular school, the nature of recent requests, the reaction of school officials to previous requests of a similar nature, etc.

Faculty and students may register their intention to contact the schools by phone, mail, or by visiting Dean Brewer's office in person. The information requested on registration will include the dates when the proposed project would be carried out, the approximate number and category of school personnel that would be involved, the kind of action requested of such personnel, the amount of time that would be required of them, and the plans for handling any data gathered, including publication plans.

According to the State College Area School District, the following Colleges encourage student-school district contacts: Human Development; Education; Health, Physical Education and Recreation; and Liberal Arts.

Department of Public Information and Relations
Room 312 Old Main
University Park, Pa. 16802
Telephone: (814) 865-7517

INTERCOM is an international communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, Nov. 3

Super Mud Opening Reception, Maria Martinez, 1:30-3 and 7:30-9 p.m., HUB.
FSHA, Norwegian seafood dinner, Maple Room, Henderson. For reservations, phone 865-7441.

Phi Mu Alpha Brotherhood recital, 6 p.m., Room 112 Kern.

PSU Thespians, *Her Fatal Beauty*, 8 p.m., Pavilion Theatre.

Sigma Xi lecture, Robert Sprague, director, Institute for Child Behavior and Development, University of Illinois, on "Ethics of and Litigation about Human Research," 8 p.m., HUB main lounge.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Artists Series, The Chamber Music Society of Lincoln Center, 8:30 p.m., Eisenhower Auditorium.

Friday, Nov. 4

Super Mud, firing of Indian pottery, 3 p.m., HUB lawn, weather permitting.
Public coffee hour with playwrights James McDonald and Robert Gerlach, visiting fellows IAHS, 4 p.m., Room 128 Arts Bldg.

Sports: soccer, vs. Temple, 7 p.m.
Folk and Square Dance Roundup, 7:30 p.m., Room 123 White.

International Council film, *Burn*, 7:30 p.m., Room 112 Kern.

Pennsylvania Sociological Society plenary session, Roland Peltgen, PSU, and Charles Wright, University of Pennsylvania, on "Third Century Threshold: New Uses of Old Variables," 8 p.m., Keller Auditorium.

PSU Thespians, *Her Fatal Beauty*, 8 p.m., Pavilion Theatre.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Artists Series Jazz Festival, George Benson, 9:15 p.m., Rec. Bldg.

Nittany Knights benefit, 8:30 p.m., Music Bldg. recital hall.

Saturday, Nov. 5

P.S.O.C. Hiking Division, cross country (bushwhack) backpack, through Sunday.

Jazz Festival, films and workshops, HUB, through Sunday. Complete listing available at HUB booth, Eisenhower Auditorium and Artists Series office in Pine Cottage.

Shaver's Creek Nature Center, Adventure

Maria Martinez, "star" of this year's Super Mud.

Series, children 7 and older, registration necessary — 865-1851, 10 a.m.-3 p.m., Stone Valley.

Sports: women's volleyball, vs. Pennsylvania, 2 p.m.

PSU Thespians, *Her Fatal Beauty*, 8 p.m., Pavilion Theatre.

University Theatre, *Something's Afoot*, 8 p.m., The Playhouse.

Artists Series Jazz Festival, Preservation Hall Jazz Band, 8:30 p.m., Rec. Bldg.

Sunday, Nov. 6

P.S.O.C. Hiking Division, hike on Centre Hall Mountain and the other Greens Valley, 9 a.m., HUB parking lot.

University Chapel service, the Rev. Marcus Meckstroth, Faith United Church of Christ, State College, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Mammals, Skinning and Tanning, 2 p.m., Stone Valley.

france-cinema, *Jules et Jim*, 7 and 9 p.m., Room 112 Kern.

Artists Series Jazz Festival, Billy Taylor Trio, 8:30 p.m., Eisenhower Auditorium.

Monday, Nov. 7

Intramural sports: women's swimming (open): co-ed volleyball (round robin); men's graduate student and faculty staff basketball (round robin) and squash (round robin): entry open. Entry dose, noon, Nov. 10.

Intramural Bldg.

Shakespeare film, *As You Like It* (Czinnet/Olivier), 6:30 p.m., Room 101 Chambers.

Free admission.

Commonsplace Theatre, *Investigation of a Citizen Alone Suspicion*, 7:30 and 9:30 p.m., Room 112 Kern.

Interdisciplinary Symposium on Value.

Richard L. Morrill, executive assistant to the Provost, on "Values, Relativism and Higher Learning: Defining the Issues," respondent: Joseph Flay, philosophy. Coffee, 7:30 p.m., paper and discussion, 8 p.m., Henderson Living Center.

Comp. Lit. Film Series, *Romance and Reality*, Kenneth Clark examines the high Middle Ages and the concept of courtly love, 8 p.m., Room 217 Willard. Free admission.

Leonard Feldman, 'cello, 8:30 p.m., Music

Bldg. recital hall.

Tuesday, Nov. 8

Shakespeare film, *As You Like It* (Czinnet/Olivier), 6:30 p.m., Room 101 Chambers.

Free admission.

Sports: women's volleyball, vs. Pittsburgh, 7 p.m.

france-cinema, *Jules et Jim*, 7 and 9 p.m., Room 112 Kern.

American Society for Metals meeting, Howard Pfeiffer, AMP Inc., a 1956 alumnus, on "Contact Surfaces," 7:30 p.m., Room 301 Mineral Industries.

Graduate Commons, "Perchance to Dream," an improvisational dream theatre presentation, 8 p.m., Room 101 Kern. Free admission.

Graduate Student Day. Dr. Helen Wise, Rep. of the 77th District, will hold an informal discussion of the current budget crisis and how it affects the graduate student population, 8 p.m., Room 112 Kern.

Wednesday, Nov. 9

PSU Press, Association of American University Presses Book Show, 10 a.m.-4 p.m., Kern.

Commonsplace Theatre, *All the King's Men*, 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, Nov. 10

Board of Trustees meeting, Room 402 Keller.

PSU Press, Association of American University Presses Book Show, 10 a.m.-4 p.m., Kern.

Friday, Nov. 11

Board of Trustees meeting, Room 402 Keller.

Faculty Women's Club luncheon/lecture. Barbara Hackman Franklin on "The Growth of the Consumer Movement and Current Product Safety Issues," noon, Nittany Lion Inn.

U.S. Air Force Band and Singing Sergeants, 8:15 p.m., Eisenhower Auditorium. Free tickets available on written request to Air Force Band Center, Eisenhower Auditorium. Enclose stamped self-addressed envelope.

Saturday, Nov. 12

Last date for submitting petitions to Records Officer to graduate in absentia in Nov.

Sports: women's volleyball, vs. Slippery Rock and East Stroudsburg, 1 p.m.; football, vs. Temple, 1:30 p.m.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Nov. 13

Sports: men's cross country, Eastern USTFF Championships.

P.S.O.C. Hiking Division, exploration in Little Juniata National Area, 9 a.m., HUB parking lot.

University Chapel service, T. Varindra Vittachi, United Nations, N.Y., 11 a.m., Music Bldg. recital hall. All University Day.

Shaver's Creek Nature Center, Winter Trees and Evergreen Walk, 2 p.m., Stone Valley.

Seminars

Thursday, Nov. 3

Computation Center, "JCL" (3 of 5), introductory programming backboard suggested, 7:30 p.m., Room 112 Osmond.

Friday, Nov. 4

Analytical Chemistry, Charlie Ting on "Electrochemical Modeling of Cytochrome C," 11:10 a.m., Room 333 Whitmore.

Ionosphere Research Laboratory/Meteorology, Thomas A. Seliga, Ohio State University, on "Differential Reflectivity: A New Measurement Technique in Radar Meteorology," 4 p.m., Room 329, EE East.

Monday, Nov. 7

Biochemistry and Biophysics, Charles Nichol, Wellcome Research Laboratories, N.C., on "Comparative Biochemistry Basic to Chemotherapy," 3:55 p.m., Room 101 Alt-house.

Tuesday, Nov. 8

Biochemistry and Biophysics, Charles Nichol, Wellcome Research Laboratories, N.C., on "Dihydrofolate Reductase as a Drug Receptor," 11:10 a.m., Room 101 Alt-house.

Air Pollution Control, Gary W. Malamud, Research-Cottrell, N.J., on "BAHCO Sulfur Dioxide Scrubber," 2:20 p.m., Room 140 Fenske.

Genetics, Melody Leithold on "Exposure to Chemicals and Drugs: A Generational Effect," 3:55 p.m., Room 52 Frear.

Engineering Science and Mechanics/ Biomechanics Program, R. L. Berger, Biophysical Instrumentation Branch, Na-

tional Heart and Lung Institute, NIH, on "Concepts of Dynamics as Part of Biomechanics," 4 p.m., Room 232 Hammond.

Philosophy, Alphonso Lingis on "Khajuraho (Sacred Eroticism in India) (Schemas, Phantasms, Categories)," 4 p.m., Room 101 Kern Bldg.

Psychology, Lloyd Kaufman, New York University, on "The New Animal Magnetism: Magnetic Fields of the Human Brain," 4 p.m., Room 352 Moore.

Wednesday, Nov. 9

Agricultural Economics, Dan Bromley, University of Wisconsin, on "The Economics of Property Rights and Public Choice," 10 a.m., Room 301 A Ag. Admin. Bldg.

Fuel Science, George R. Romovack, Koppers Company, Monroeville, Pa., on "Pitch as a Binder and Carbon Precursor," 4 p.m., Room 301 Mineral Industries.

Inorganic Chemistry, Wayne Gladfelder on "Molecular Dynamics of Mixed-Metal Clusters," 8 p.m., Room 333 Whitmore.

Thursday, Nov. 10

Chemistry, Herbert C. Brown, Purdue University, on "The Nonclassical Ion Problem," 12:45 p.m., Room 333 Whitmore.

Physics, V. Celli, University of Virginia, on "Semi-Classical Theory of Atom-Surface Scattering," 3:50 p.m., Room 117 Osmond.

Ecology, Douglas E. Gill, University of Maryland, on "Meta-Population Dynamics of Red-Spotted Newts, or Why Do Newts Love Beavers?" 4 p.m., Room 112 Kern.

Meteorology, Erik Peterson, Riso National Laboratory, Denmark, on "A Stochastic

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

Friday, Nov. 11

Analytical Chemistry, Lance Rose on "Chemical Identification and Quantitation of the Oak Leaf Roller Pheromone Complex," 11:10 a.m., Room 333 Whitmore.

Ceramic Science, Hiroshi Abe, Asahi Glass Company, Ltd., Yokohama, Japan, on "Corrosion of Silica Brick by Sodium Chloride Vapor," 11 a.m., Room 301 Mineral Industries.

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

Friday, Nov. 11

Analytical Chemistry, Lance Rose on "Chemical Identification and Quantitation of the Oak Leaf Roller Pheromone Complex," 11:10 a.m., Room 333 Whitmore.

Ceramic Science, Hiroshi Abe, Asahi Glass Company, Ltd., Yokohama, Japan, on "Corrosion of Silica Brick by Sodium Chloride Vapor," 11 a.m., Room 301 Mineral Industries.

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

Model of a 700,000 Year Temperature Record," 4 p.m., Room 112 Walker.

The butterfly didn't do it — he's just been murdered in this scene from "Something's Afoot," now being performed at The Playhouse Theatre. David Garfield plays the butterfly. Cheri Chenoweth discovers the body.

Exhibits

Chambers Gallery: Hugh Stumbo, collages and Jack Troy, ceramics, through Nov. 11.

Hammond Gallery: Neil Feather and Marilyn, ceramics, through Nov. 13.

HUB Gallery: Paul O'Hara, sculpture; Joan Sonnenberg, prints.

Kern Commons Gallery: Edward S. Curtis, photogravures of North American Indians, through Nov. 5; American Indian Cultural exhibit, and "Derivations," photo-graphs, both through Nov. 12.

Museum of Art: Lanny Sommers, poster art. Kenneth Beittel, recent works, and John Koch, Models and Moments, both open Nov. 6.

Museum of Art HUB Gallery: Super Mud Master Works.

Zoller Gallery: Super Mud Student Invitational.

The current general education requirements, popularly known as BDR II, were passed by the University Faculty Senate on July 18, 1972. This legislation specified that these requirements should be reviewed during the 1976-77 academic year for the purpose of determining whether or not they were still satisfactory. To this end, the Chairman of the University Faculty Senate convened an Ad Hoc Committee on Feb. 1, 1977, and charged it with a review of the BDR requirements.

At an early time, the committee agreed that its work should be divided into two phases. Since many members found the basic concepts for general education as specified in the 1972 legislation acceptable, Phase I of the review focused on operational problems, with the goal of recommending operational adjustments. Some members, however, questioned the BDR II concept, its philosophical foundations, and its appropriateness for general education at Penn State. From this perspective, the second phase of the committee's deliberations would involve the search for a conceptual framework on which to build general education requirements appropriate to the University for 1977 and beyond.

Following this strategy, the principal work of the committee during the spring of 1977 was to identify problems with BDR II and develop recommendations for improvement. The first task in identifying problems was to make a detailed analysis of how the BDR II requirements have been met by the ten University Park colleges. Twenty randomly selected transcripts from each college covering each major provided the raw data. In addition, each associate dean for instruction was interviewed, and student councils and colleagues were contacted. These efforts enabled the committee to identify a number of problems from which broad needs were synthesized: rigor should be maintained, a new consistency should be introduced and specificity should be improved.

Recommendations addressing these deficiencies follow:

A. Courses taken to meet BDR requirements may not be taken pass-fail.

B. BDR courses shall be offered only by the core colleges; exceptions must be approved by the Senate Curricular Affairs Committee (procedures for the implementation — Attachment 1).

C. There will be a Door Handout at the Nov. 1 Senate meeting (contents appear below) listing courses prescribed for the satisfaction of BDR II.¹ If divisions or departments wish to offer other courses for the satisfaction of the BDR requirement, then application should be made to the Senate Curricular Affairs Committee.² No course may be used for more than three credits in meeting the BDR requirement.

¹These lists reflect the collective experiences of some 200 students from all colleges and majors in meeting BDR II since its inception. The principle that BDR courses should be given by the core colleges was central in developing these lists.

²The approved list of courses is based on descriptions as given in the 1977-78 catalog. If new courses are added to course categories shown as having blanket approval, i.e., a new Classics course under the Arts and Humanities requirement, such courses must have approval by the Senate Committee on Curricular Affairs.

Attachment 1 Procedures for implementation

Category I. Requests for courses other than core college courses to be included in the BDR.

Category II. Core college course changes and course adds.

Senate Ad Hoc Committee on BDR Review, Phase I Information Report

The report on Baccalaureate Degree Requirements is under discussion by the University Faculty Senate and will come up for legislative action at the Dec. 6 meeting. To encourage debate on its contents, INTERCOM invites faculty at all Campuses to respond, either in writing or on tape, to one or more of the recommendations in the report. Signed written responses of a reasonable length should be mailed to the INTERCOM editor, Room 312 Old Main. Faculty members who are unable to submit a written response may call 865-7519 to request that an INTERCOM staff member tape their comments.

Category III. Programs within which there are courses listed under Baccalaureate Degree Requirements that do not conform to the new list of approved courses.

Category I

1. In the case of a program faculty desiring to have a noncore college course as part of its BDR, a formal request shall be made to the Senate Committee on Curricular Affairs.
2. This request shall include the BDR area requested, course name, description, current outline, statement of suitability from the program area offering the course in question (unless program area is the same as that requesting waiver) and a justification for using the course in the area of request.
3. A course approved in this manner will be available for university-wide use in the BDR area in question and such action will be reported in the "For Information Only" section of the Blue Sheet.
4. Requests for these waivers shall be submitted as soon as possible following approval of this legislation, but in no case later than April 1, 1978.

Category II

1. Each course change or request for a new course originating from one of the core colleges shall address the issue of its appropriateness for one (or more) of the BDR areas.
2. The regular supporting material submitted to the Senate Committee on Curricular Affairs shall address in Paragraph 1 of the justification ("Instructional Objectives") the appropriate BDR area.
3. A decision with regard to any changed course or new course that affects the existing published list of BDR would be announced in the "For Information Only" section of the Blue Sheet.

Category III

1. Program faculty who do not wish to request waivers under Category I shall submit a revised BDR to the Senate Committee on Curricular Affairs as soon as possible following approval of this legislation, but in any case no later than April 1, 1978.
2. The form of this submission shall be the same as for any request for program change as outlined in the "Guide to Undergraduate Curricular Procedures" except that the justification need state only "To Conform with BDR Legislation."
3. All changes will be reported in the "For Information Only" section of the Blue Sheet.

Door handout

The following Proposed List of Courses for Fulfilling the BDR Requirement represents the preliminary thinking of the Committee. It is presented for your

information. This list should stimulate discussion and from that discussion inputs to the Committee.

Copies of this list have been distributed to the colleges for reaction and input.

A final, revised list will be reported in the Senate Agenda for the December Meeting. The Baccalaureate Degree Requirements Review Committee will be meeting during November to prepare this final list. Any questions, comments, suggestions, or input should be submitted prior to Nov. 18. Written communications can be sent to the Senate Office, Birch Cottage.

COMMUNICATIONS (9 credits)

Speech Communications: Only 200
English: Only 10, 20, 30, 117, 119

QUANTIFICATION (6 CREDITS)

Mathematics: All courses except 4, 10, 35, 36, 200, 201, 202, 203, 401, 402, 413, 414, 416, 425, 426, 470, 471
Applied Mathematics: All courses
Computer Science: All courses except 1, 11, 20, 44

Statistics: All courses

Philosophy: Only 12, 212, 428

NATURAL SCIENCE (9 credits)

College of Science:

Astronomy: All except 430

Biochemistry: All courses

Biological Science: All courses

Biology: All courses except 411, 412

Biophysics: All courses

Chemistry: All except 390, 400, 408

Microbiology: All courses except 470

Physical Science: All courses

Physics: All courses

College of the Liberal Arts:

Anthropology: Only 21, 22, 31

Geography: Only physical geography courses (19, 20)

Non-Core College courses accepted for natural science credit:

GSCI: Only 1, 2, 19, 20, 21

METEOR: Only 300, 303, 304, 320

ARTS AND HUMANITIES (6 credits)

American Studies: All

Architecture: All

Art: All

Art History: All

The Arts: All

Chinese: Only 489

Classics: All

Comparative Literature: All

English: All except 4, 10, 20, 30, 117, 119, 407, 408, 410, 418, 491

Folklore: All

French: All except 1, 2, 3, 11, 21, 31, 32, 305, 306, 307, 308, 470, 471, 480

German: All except 1, 2, 3, 4, 12, 15, 16, 201, 202, 401, 411

Greek: All except 1, 2, 3

History: All

Humanities: All except 490

Italian: All except 1, 2, 3, 301, 302

Latin: All except 1, 2, 3, 436, 437

Liberal Arts: Only 200, 450, 480

Linguistics: All

Mathematics: Only 35, 36

Medieval Studies: All

Music: All except 157

Philosophy: All except 12, 212, 428

Polish: Only 100

Portuguese: Only 356

Religious Studies: All except 6, 130, 131, 235, 438, 461

Russian: All except 1, 2, 3, 5, 6, 7, 221, 222, 430

Science, Technology, Society: Only 107, 432, 435

Slavic: Only 100

Spanish: All except 1, 2, 3, 11, 100, 110, 120, 400, 410, 413

Speech Communications: Only 220, 412, 477, 478

Theatre Arts: All except 116, 193, 410, 411, 416, 417, 418

SPECIAL NOTES:

In the cases of History and Linguistics, the intention of the present rule, as interpreted by the Senate, should be continued, viz., if any History course or any Linguistics course is used to fulfill Humanities and Arts requirements by a given student, then that student may not use any other History course or any other Linguistics course, respectively, in order to fulfill the Social and Behavioral Sciences requirements. The rule applies conversely as well.

SOCIAL AND BEHAVIORAL SCIENCES (6 credits)

Anthropology: All except 21, 31, 400, 401, 402, 405, 408, 409, 415

Economics: All

Geography: All except 1, 2, 19, 433, 434

History: All

International Understanding: All

Journalism: Only 200, 240, 301, 302, 401, 404, 405, 419, 422, 436, 444, 468

Labor Studies: All except 104, 411, 457

Linguistics: All

Political Science: All except 409

Psychology: All except 15, 101, 203, 402, 403, 405, 408, 415, 450, 455, 456, 463

Religious Studies: Only 6, 130, 131, 235, 438, 461

Science, Technology, Society: Only 430, 450, 460

Social Science: All

Sociology: All except 321, 420, 457, 458, 470, 473

Speech Communications: Only 210, 230, 320, 410, 419, 431, 440, 450, 475, 490

SPECIAL NOTES:

Geography is included here since it is also a major in the College of the Liberal Arts and has traditionally been considered one of the social sciences. In the cases of History and Linguistics, the intention of the present rule, as interpreted by the Senate, should be continued, viz., if any History or Linguistics course is used to fulfill Social and Behavioral Sciences requirements by a given student, then that student may not use any History or Linguistics course, respectively, in order to fulfill the Humanities and Arts requirements. The rule applies conversely as well.

HEALTH SCIENCES, PHYSICAL EDUCATION, AND HUMAN RECREATION (4 credits)

Food Science: Only 205

Health Education: Only 3, 19, 43, 46, 48, 60, 303, 304, 408, 443

Nutrition: Only 100, 119, 120, 150, 351, 390, 420, 421, 457, 457, 459

Physical Education: Only 5, 9, 10, 100, 109

SPECIAL NOTES:

Courses used to fulfill this general requirement are not offered in any of the "core colleges." The very nature of the requirement necessitates that courses be used from the College of Human Development and the College of Health, Physical Education, and Recreation.

Arts Roundup

Super Super Mud

Super Mud, a national ceramics arts conference which is sponsored annually by Penn State, will be held Nov. 3, 4 and 5 on the University Park campus.

Highlighting this year's conference is the participation of the preeminent American potter, Maria Martinez. Mrs. Martinez, a Tewa Indian, will travel to the University from her home in the San Ildefonso pueblo in New Mexico. She will be accompanied by her son, Adam, and her great-granddaughter, Barbara Gonzales, both well known ceramists, who will also be participating in the conference.

Mrs. Martinez is the perfecter, along with her late husband, Julian, of a unique, burnished black pottery form. At the Super Mud conference, she and her family will demonstrate both the throwing of the famous Martinez pots and their firing in an outdoor homemade kiln.

Other ceramists who will be demonstrating at the conference are Robert Winokur, professor of ceramics at Philadelphia's Tyler School of Art, Wayne Higby, professor and chairman of ceramics at Alfred University, which has the country's oldest ceramics program; David Middlebrook, a California avant-garde ceramist; and David Shaner, a Montana production potter. A sampling of their works is on display at the Museum of Art's HUB Gallery.

Nearly all the works in the HUB's Masterworks Exhibition are being offered for sale to the public. As the sale includes the Martinez pieces, it represents a rare opportunity to purchase a collector's item, according to David DonTigny, professor of art and faculty coordinator of Super Mud.

A conference registration of 1,200-1,500 is expected for the three-day event. Admission to the professional demonstrations in Eisenhower Auditorium is open to registrants only. The firing of the Martinez pottery, scheduled for 3 p.m. Friday on the HUB lawn, is open to the public, as is the show in the HUB gallery and a student invitational show in Zoller.

Tarr, Kent on Wednesday series

The Wednesday Music Series sponsored by the Artists Series in cooperation with the Department of Music will present Edward Tarr and George Kent at 8:30 p.m. on Wednesday, Nov. 9, in the Music Bldg. recital hall.

Mr. Tarr, a trumpet soloist, has made over 60 major recordings and has concertized throughout Europe and North America. He founded and directs the Edward Tarr Brass Ensemble, which has won six major awards for its recordings on historical instruments.

Mr. Kent, an organist, is a professor of music at the University of Rhode Island and assistant conductor of the Rhode Island Philharmonic Orchestra.

For their program they have chosen: Sonata No. 3 in C, Fantini; Toccata avanti la Messa degli Apostoli, Frescobaldi; Sonata No. 7 in C, Fantini; Toccata per l'Elevazione, Frescobaldi; Sonata No. 8 in C, Fantini; Etude No. 1, Ligeti; Studies for Trumpet and Computer, Morill; Prelude and Fugue in A Major, Bach; and Three Chorale Preludes, Krebs.

Tickets for the performance will be on sale Monday, Nov. 7, and Tuesday, Nov. 8, at the HUB from 9 a.m. to 4 p.m.

Feldman recital Nov. 7

Cello Leonard Feldman will present a solo recital at 8:30 p.m. Monday, Nov. 7, in the Music Bldg. recital hall.

His selections include Bach's Suite No. 2 in D minor, perhaps the earliest masterpiece written for the cello; the contemporary Cello Sonata in G minor,

Soloists performing at University Park next week are Edward Tarr, above, and George Kent, below, on Nov. 9; Leonard Feldman, at right, on Nov. 7.

opus 65 by Burt Fenner, of the music department; and Zoltan Kodaly's Duo for Violin and Cello, opus 7. Joanne Zagat Feldman will play the violin part in the last piece.

A member of the Alard Quartet, Mr. Feldman is an associate professor of music. He has performed as a soloist with the Pittsburgh Symphony Orchestra and the Rochester Civic Orchestra and has played throughout this country and in Europe with the quartet.

Pops Concert

The Penn State Symphony Orchestra will give a "Pops Concert" to benefit the Performing Arts Scholarship Fund at 8:30 p.m. on Saturday, Nov. 12, in Eisenhower Auditorium.

The All-University Day concert will feature baritone Robert Trehy, who will sing selections from musical scores by Rodgers and Hammerstein, Lerner and Lowe, and Cole Porter. Mr. Trehy has performed with Arthur Fiedler and the Boston Pops, and the Cleveland, Pittsburgh and St. Louis Symphony Orchestras. He is a professor of music at Penn State.

Penn State's orchestra will also perform selections from *Fiddler on the Roof* and the ever-popular "Blue Danube Waltz."

Admission to this special benefit concert is \$3 for non-students, \$2 for students. The proceeds will become part of the newly created Performing Arts Scholarship Fund to aid talented undergraduates who demonstrate outstanding performing ability.

Museum offering John Koch works

"Models and Moments," an exhibition of paintings by the American artist John Koch, will open on Sunday, Nov. 6, in the Museum of Art.

The New York painter, born in 1909, grew up in Ann Arbor, Mich., and studied art independently, spending two

summers in the artists colony in Provincetown, Mass., before living for four years in Paris. He returned to America in 1934.

Most of the work in this show depicts informal scenes in an artist's studio. Typically, the setting is a break when the models and painter are relaxing or conversing. Mr. Koch's paintings encapsulate the entire scene, including the artist and his relationship to his models and their environment.

The exhibit will run through Dec. 21.

Indian cultural exhibit

The Commons Gallery is presenting an Indian Cultural Exhibit through Nov. 12. The exhibit is sponsored by the members of the Native American Administration Program at the University. On display are Indian artifacts and contemporary arts and crafts representing many tribes — turquoise jewelry and sand painting from the southwest; star blankets and jewelry from the Dakotas; clothing, corn husk masks and dolls from the northeast; beading from the midwest; and basketry, clothing and jewelry from the northwest.

Beittel show opens

The artistry of master potter Kenneth Beittel will be displayed in an exhibition which opens Friday, Nov. 4, in the Museum of Art.

Dr. Beittel is a professor of art education at Penn State, where he has taught for 25 years.

He works with clay from Centre County and blends his own porcelain. While on a sabbatical leave, he visited Japan and worked as an apprentice with the Japanese master potter, Manju Inoue.

Dr. Beittel began making pottery in 1946 at Carnegie-Mellon, where he majored in education. He taught at Winthrop College in North Carolina, and completed his master's and doctoral degrees at Penn State.

The Beittel exhibition will run through Dec. 21.

WPSX Highlights

The opulence and self-destructive greed that dominated the Roman Empire under the Claudians is brought vividly to life when Masterpieces Theatre presents *I, Claudius*, a 13-episode dramatization of Robert Graves' novels, beginning Sunday, Nov. 6, at 9 p.m. Derek Jacobi stars as Claudius, who tells the story of his family and of his own rise to the throne. *I, Claudius* may also be seen Fridays at 10 p.m.

Placido Domingo stars when WPSX-TV presents a live broadcast of *Rigoletto* from the stage of the Metropolitan Opera House in New York on Live from the Met Monday, Nov. 7, at 8 p.m.

Tuesday, Nov. 8, at 9 p.m., *Men of Bronze* documents the experiences of Black infantry members who were known as the Men of Bronze during World War I. These soldiers fought in the front lines longer than any other American regiment, becoming the most heavily decorated — and the most decorated — American regiment in the war.

Eva LeGallienne stars when Great Performances presents a 50th anniversary production of *The Royal Family*, George F. Kaufman's and Edna Ferber's comedy about the foibles of an American theatrical family, Wednesday, Nov. 9, at 9 p.m.

Press sponsors book show

Penn State's Press will sponsor the 1977 Book Show of the Association of American University Presses on Wednesday and Thursday, Nov. 9 and 10, between 10 a.m. and 4 p.m. in the Kern Graduate Bldg.

The 32 books in this traveling exhibit were chosen from among more than 200 books submitted by member presses of the association. They were selected to recognize a combination of good design and appropriate production and to suggest the diversity of university press publishing. The display copies will be available for inspection along with a catalog, describing each entry.

Among the books in this year's exhibition is *Aubrey Beardsley: Imp of the Perverse* by Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies. The book was designed at Penn State's Press by Glenn Ruby, and its production was supervised by Janet Dietz. The volume contains 200 illustrations from Beardsley's works.

Funding Sources

For further information, call 865-1372

(292-1) The Office of Education has announced a Dec. 20 deadline date for applications under the Ethnic Heritage Studies Program. One-year projects not to exceed \$50,000 will be funded to develop curriculum materials and to disseminate materials that help students learn the nature of ethnicity and the promotion of ethnic group interactions. Developmental programs of curriculum materials and dissemination programs are also supported. (Ref. OE Announcement) (CEFA 13.549)

(292-2) NSF has announced a Dec. 2 deadline for its CAUSE Program (Comprehensive Assistance to Science Education), designed to encourage the improvement in quality, effectiveness and self-assessment capability of undergraduate science education. Up to \$250K is provided over 3 years to science departments and institution consortiums for 2-year and 4-year colleges and universities. (Ref. SE78-30)

(292-3) NSF has released its FY1979 Guide to Science Education Programs (SE 78-1) including program descriptions and deadlines for fellowships, professional development grants, scientific personnel improvement, science education resources improvement and development and research, and science and society programs; a total of 22 programs.

(293-1) The Secretary of Labor has issued a compilation of regulations for Titles I (manpower services, education, and training), II (public service employment), and VI (public service training) of the Comprehensive Employment and Training Act (CETA). (Ref. 42FR5725-83, 10/18/77)

Editor's note: This is the second of a series of short essays on the subject of interdisciplinary education. The author, Dr. Theodore R. Vallance, is associate dean for research and graduate studies and professor of human development in the College of Human Development.

The main point of this essay is that effective interdisciplinary teaching and scholarship have direct implications for the way a university should be organized. To pursue analysis, research, and teaching of the concepts, the ethics, the motivations, the costs, the power shifts, the effects on family life, and other aspects of a societal problem — such as air pollution or the invasion of privacy through abuses of computer technology — means more than just getting specialists in the related academic areas together temporarily to talk, think, write about, and teach a set of courses about the problem. Effective interdisciplinary work requires special organizational forms.

We now generally accept the truth in the platitude that human problems do not come packaged in the ways universities are organized. They are not the primary domains of established disciplines, and cannot be fully understood, much less be the object of satisfying solutions, through analysis and prescription from the perspective of a particular set of traditional academic skills. Consider one example: teaching mentally retarded people to become independent in getting to and from sheltered workshops, in reading restaurant menus, in knowing health problems and how to act on them. Here is a fairly small proportion of the population, having difficulties not of their own making, and eligible for a normal amount of human compassion. Surely modern society has the means for solving a problem so seemingly small as this. Indeed there are psychological technologies for training slow learners to read and to match feelings and physical signs with health and illness labels. Simply find the specialists with the will and the skill to do the job and provide the money and facilities that are needed!

But, regrettably, simple solutions are often simple-minded and fail to consider

Implications of Interdisciplinary Programs for University Organization

or

Anything that Happens Happens in a Structure

the many other costs and side effects generated by the simple solution. Pursuing the example: What uses of skilled technicians would have to be stopped in order to "solve" this newly salient problem? How much would it cost to generate additional skilled trainers in order to avoid reductions in current uses of them? Is it more important to help this particular group of people than some other equally deserving set? What new taxes might be needed, and on whom should they fall? How does one decide who should be helped? And so on. . . . In asking such questions about a problem and possible solutions, we quickly raise profound issues of ethics, morality, economics, distributive justice, and social structure, as well as the "simple" ones of how to develop the appropriate material, social, or psychological technology to "solve the problem."

How can a university most effectively deal with public policy issues such as these?

A standard response is to create a multi-disciplinary or multi-professional team — and label it a center or an institute — to attend to the problem so long as money or the problem goes away, the team members are returned to their home departments. There have been some successes with this approach to particular problems, but their numbers are small and poorly remembered unless they are institutionalized. Several analysts of university structure, however, have found this approach unsatisfactory

because it produces a transitory group with transitory commitments, and the necessary energies are not evoked; the energy needed for continued analysis and redefinition of the problem and its components — energies and continuities of the sort that produced major scientific and technological breakthroughs — simply cannot be commanded on such an ad hoc basis. These critics argue for a career-shaping organizational form having equal conceptual opportunity and power alongside traditional departments.

I agree with this view and on two grounds recommend that we pay serious attention to how to put carefully selected talents together in ways — meaning organizational forms with financial commitments from the parent institution — that will provide for continuous and rewarding efforts to cope conceptually and operationally with problems that are clearly multidisciplinary in their make-up.

One ground for my argument is conceptually pragmatic: years of working together on related components of a complex problem of broad human concern are needed to evolve the new ideas — the new "interdiscipline" — and the necessary new technologies. This period of work should have grantsmanship as a supporting rather than a central component of an academic program; institutional commitment based on a recognized societal need should free faculty participants to do their jobs and from the task of ensuring organizational survival through money-chasing — and from the risk of having one's goals

changed by the "discovery" of money in a source having only peripheral interests.

The second ground is financially pragmatic. As we are seeing only too clearly, universities are much less popular with legislators than they used to be. Questions of relevance and accountability are constantly heard. Given the urgency of today's and tomorrow's problems and the difficulty and deadly seriousness of the intellectual challenges they pose, can we not find ways to ensure the amount and persistence of multidisciplinary commitment and development that are needed? As one means of using more efficiently the fixed (even shrinking?) resources we have, multidisciplinary and multiprofessional units — institutes, divisions, departments, colleges — on hard money should surely be seen as an important aspect of the university's survival.

How? Space permits one suggestion for argument's sake — others may be as good: First, adopt this hiring goal: Every college at Penn State should have 25 percent of its faculty members at least 40 percent on the budgets of other colleges, or newly designated hard-money multidisciplinary institutes — enough to represent a major multidisciplinary commitment and to foster joint responsibility for career development. Then, adopt this hiring rule for as long as necessary to meet the goal: Each year's replacements should consist of 50 percent of such joint appointments.

Problems and objections? Yes, this would require a much more involved and more selective hiring process than the relatively easy one of just filling a vacated slot. Surely there are many others, and I can think of them, too, the least of them being that it would force changes in departmental offerings and programs. But I also believe that there is enough ingenuity around here to solve these problems. What is needed is the will and agreement that the world is in a serious enough mess and that the university is in a serious enough financial situation that we should strive for still more innovation in how we conduct our own and affect other people's lives.

T. R. Vallance

News in brief

(Continued from page 1)

intensive courses seem to work better than ones offered for a full ten-week term. The longer the course, the more people are likely to drop out when mid-terms and finals roll around. Free U will supply mimeographing facilities and, in a pinch, audio-visual aids.

Calendar alert

Wednesday, Nov. 16, is the deadline for material to be included in the winter term calendar. Submissions should be sent to Lee Morrill, calendar editor, Room 312 Old Main, 865-2501.

Physical Plant cutbacks

A reduction in physical plant work projects, brought on by budget cutbacks in various departments throughout the University, has led to a reduction in the work force.

"The Office of Physical Plant is currently in a situation where there is not sufficient work available to maintain the current number of employees," an Oct. 25 letter to physical plant employees explained.

Some 33 employees were notified that they had been placed on layoff, effective either Nov. 4 or Nov. 7. An additional eight vacant positions will not be refilled. Efforts will be made to place the laid-off employees in other jobs, to the extent that this may be possible, in accordance with union contract provisions.

Early registration experiment to continue

Degree students who preregistered and wish to accept the schedule assigned as a result of preregistration for the winter term may register early and avoid returning to regular registration immediately prior to winter term.

Early registration for winter term will be held from 8:30 a.m. to 4:30 p.m. Nov. 14 through 18 in Room 112 Shields Bldg. In order to register early, a student must present evidence of fee payment, ID Card and Preregistration Schedule (Pink Slip). Students who register early will not be permitted to return to the regular registration at the Intramural Bldg.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network loc. 475-1387). Applications for these staff vacancies will be received until 5 p.m., Nov. 10. Do not contact the AREA that has these VACANCY.

REGIONAL COORDINATOR FOR COOPERATIVE EDUCATION — Beaver Organize, plan and operate Cooperative Education Office and maintain liaison with the University Park Cooperative Education Of-

fice; conduct programs to inform the University community of benefits of Cooperative Education; conduct assessment activities to determine interest of students, faculty and employers toward Associate Degree Cooperative Education offerings; submit periodic and final reports on progress and development of Cooperative Education Project; attend workshops, training programs and professional meetings. Bachelor's degree, or equivalent, plus one to two years of directly related experience in higher education, cooperative education or business and industry.

REGIONAL ASSISTANT DIRECTOR, COOPERATIVE EXTENSION SERVICE — Southeastern Pa. Responsible to the Associate Director for the total Extension program in the region, and for the personnel to conduct such a program. Works closely with those persons at the State level responsible for program development. Serves as a liaison between county personnel and State Extension administration. A minimum of a master's degree is required, but a candidate with a doctoral degree is desired. Six years demonstrated experience in community, adult/youth education is required. Previous experience with the Cooperative Extension Service is desirable.

BUSINESS MANAGER, UNIVERSITY PRESS — University Park. Responsible for the overall planning, development, implementation, and administration of all University Press business and financial operations, including computerized bookkeeping (accounts receivable and accounts payable), accounting, coding, royalty transactions, and budgeting systems and procedures. Supervisory responsibility for accounting, billing, accounts receivable, order fulfillment, warehousing, and management reports. Bachelor's degree in accounting or financial management, with two to four years of directly related experience.

SENIOR ACCOUNTANT, CONTROLLER'S OFFICE — University Park. Responsible to the Assistant Controller for the preparation of the annual Report of the Controller, which includes the Milton S. Hershley Medical Center. Review and calculate third-party hospital cost reports for the Medical Center. Review and calculate third-party hospital cost reports for the Medical Center Hospital. Bachelor's degree or equivalent, plus two to three years of additional accounting experience, including a working knowledge of financial statement reporting and the preparation of fund, hospital accounting, and third-party hospital cost reports. CPA required.

Annuity plan

(Continued from page 1)

consultations. Inquiries about the Equitable plan may be directed by mail, telephone, or in person to: J. Glenn Hawthorne, 301 South Allen St., State College, (814) 238-0664. Representatives from VALIC will be located in Room 324 Hetzel Union Bldg., University Park, (814) 234-3686 during the orientation week.

Information about the third participating company, the Teachers Insurance and Annuity Association (TIAA) may be obtained by contacting the Employee Benefits Division, Room 130 Willard Bldg., (814) 865-1473. This office can also provide interested faculty and staff members with a factsheet which compares the three companies on the basis of several performance factors common to each of the companies. Other printed information provided by each of the companies is also available.

Employees at major locations away from University Park should direct their inquiries to any of the following: the Regional Personnel Officer, the Business Manager, the Personnel Representative, or the Employee Benefits Division. If enough interest is demonstrated at one of these locations, arrangements can be made for the insurance company representatives to be present for on-site group presentations at any time.

At the conclusion of the special orientation week, all of the above sources will still be available. The significance of the orientation week is simply to call special attention to the tax-deferred annuity plan at a time when salary increases (and tax increases) are forthcoming and a new taxable year is only two months away.

Penn State Intercom

Senate receives ad hoc committee BDR report

Do proposed revisions to the University's baccalaureate degree requirements give students needed guidance or simply limit their options?

That question was one of several sparked by a report presented at the Nov. 1 meeting of the University Faculty Senate. The report, which opened discussion on what may become one of the Senate's most controversial issues this year, was prepared by an ad hoc committee charged with reviewing the current general requirements.

Senator Thomas D. Larson, representing the Senate Ad Hoc Committee on Baccalaureate Degree Requirements Review, said the committee didn't expect "to make a Renaissance man" of every student at the University. "But we see no justification for random choices by students. We do think some direction is needed," Dr. Larson said.

The BDR report, which was published in the Nov. 3 issue of INTERCOM, includes three provisions for general degree requirements:

— Courses taken to meet baccalaureate degree requirements may not be taken pass-fail.

— BDR courses shall be offered only by the core colleges, with exceptions being approved by the Senate Curricular Affairs Committee. (The core colleges are the College of the Liberal Arts, the College of Science, and the College of Arts and Architecture.)

— A door handout at the Nov. 1 meeting listed courses prescribed for the satisfaction of requirements. If divisions or departments wish to offer other courses, application should be made to the Senate Curricular Affairs Committee. No course may be used for more than three credits in meeting baccalaureate degree requirements.

In distributing the door handout, a list of courses compiled by the committee, Dr. Larson stressed that it was a preliminary list and that the committee was seeking input from all colleges for the final, revised list.

Sensors Thomas Fox and Michel Small, of the Behrend College, objected that the committee had not taken that college into consideration in its planning, particularly in the recommendation that BDR courses be offered only by the core colleges. Since Behrend is not a core college, Dr. Fox said, it would have little input in the determination of degree requirements for its students.

Dr. Fox also said that when the committee's report comes up for legislative action at the Dec. 6 Senate meeting, Behrend representatives will propose that Behrend not be covered by the proposal.

Speaking in favor of the BDR proposals, Senator Robert W. Frank said that he anticipated similar action being taken at other major universities over the next several years and that he would like to see Penn State in the vanguard.

President Oswald spoke briefly at the meeting, telling the senators he doesn't feel any closer to a solution of the State funding crisis now than he did when he

(Continued on page 4)

November 10, 1977

An Open Letter to the Penn State Community:

Penn State is in the midst of one of the worst financial crises in its history. With the fiscal year already in its fifth month, the University has not received one cent in State appropriations. To deal with this crisis, we need your help.

Along with instituting many internal austerity measures, the University — to continue operating — has had to borrow more than \$36 million to date. Interest costs are now running \$4,000 per day and are mounting each month. By the end of November, we will have paid approximately \$325,000 in interest charges. These interest charges — which take money away from the educational programs — will ultimately be borne by students, their families and other taxpayers.

The absence of State funding places in jeopardy the ability of Penn State to continue orderly operations of its programs and services. On November 14, the General Assembly will return from its recess to continue deliberations. Penn State has not advocated any single solution to the crisis, but we have pleaded continually for an early and equitable solution. Some believe an increase in taxes will be essential if the problem is to be solved. Others feel that at least some of the revenues can be made available from existing sources. Bipartisan cooperation is indispensable for a solution.

Because of the gravity of the situation and the stake every member of the Penn State community has in this matter, we are asking for your help.

To the students: The quality and continuation of your education are at issue. Take ten minutes out tonight or tomorrow to write your State Senator and Representative to voice your concern. While at home during the term break, ask your parents to write, call or visit their Harrisburg representatives. (A letter will also be going to your parents urging their help.)

To alumni: You have already received a letter from the Alumni Executive Board asking you to contact your legislators about Penn State's crisis. We urge you to followup on this request as soon as possible.

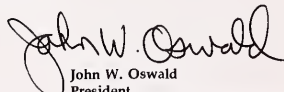

To faculty and staff members: Acting in your role as a private citizen and taxpayer and using your personal stationery, do join us in writing your legislative representatives urging them to provide the full funding needed to maintain Penn State's programs.

To people of the Centre Region: We ask you to contact your Senator and Representative. You are aware of the interdependence of the University and the local communities of which we are all a part. The University employs, full- and part-time, approximately 14,000 people from State College, Bellefonte, Tyrone, Philipsburg, Lewistown, Pleasant Gap, Milesburg, and many other communities. The magnitude of the economic impact of the University to this area is enormous. Just two figures: The annual payroll of the University Park Campus alone is \$130 million. In addition to the \$130 million payroll, the University's purchases of goods and services, along with the spending of 32,000 students, add more than \$75 million per year to the economy of the region.

Will each of you — students, alumni, faculty, staff and Centre Region citizens — take ten minutes out today or tomorrow to write your local legislators and the leadership of the House and Senate, urging them to find an early and equitable solution for full funding of Penn State's appropriation? Thank you.

William K. Ulerich
President
Board of Trustees

John W. Oswald
President
The Pennsylvania State University

(A list of Centre Region legislators and the House and Senate leadership appears on page 4.)

News in Brief

Nobel laureate to give Althouse Lecture

Dr. Baruch S. Blumberg, 1976 Nobel Prize winner in physiology or medicine, will deliver the fourth annual Paul M. Althouse Memorial Lecture at Hershey at 4 p.m. on Thursday, Nov. 17, in the hospital auditorium.

Dr. Blumberg's topic will be "Studies of Hepatitis B Virus: Scientific Method and Clinical Research." The program is open to all interested persons.

The lectureship, established in February 1974, honors Dr. Althouse, provost of the University at his death in 1972 and previously a professor of biochemistry, director of general education and vice president for academic affairs.

Dr. Blumberg, who was awarded his Nobel Prize for "discoveries concerning new mechanisms for the origin and dissemination of infectious diseases," is associate director for clinical research at the Institute for Cancer Research at Fox Chase, Pa., and professor of medicine and anthropology at the University of Pennsylvania.

Hazleton, Chapel choirs to sing

In celebration of All-University Day, the Hazleton Campus Choir will join the University Chapel Choir for a special interdenominational chapel service at 11 a.m. on Sunday, Nov. 13, in the Music Bldg. recital hall.

The Hazleton Choir will sing "Green Fields", and join with the University Chapel Choir in singing Schultz's "Alleluia" and "O Clap Your Hands", a spiritual by Vaughan Williams. Raymond Brown will direct the combined choirs.

The guest speaker at the service will be T. Vanindra Vittachi of the United Nations Fund for Population Activities. Mr. Vittachi's lecture is entitled "A View of Human Rights for a New Era," and is the final fall term lecture based on the theme of human rights in the 1970s.

The Rev. Charles L. Coleman, program director of religious affairs, will be the liturgist for the service.

More than 2,000 to graduate

Nearly 1,850 graduates will receive their degrees at commencement exercises on Saturday, Nov. 26. Students qualifying for degrees at Capitol Campus,

Middletown, and Behrend College, Erie, will bring the number of fall term graduates to more than 2,000.

J. Luther Snyder, of Camp Hill, representing the Board of Trustees, will join President John W. Oswald in conferring the degrees at the University Park exercises, scheduled for 10:30 a.m. in Recreation Bldg.

At the University Park exercises, 1,152 seniors are scheduled for baccalaureate degrees, while 212 students who will have completed two-year programs at the Commonwealth Campuses will be graduated with associate degrees. Among the 476 graduate students are 353 who will receive a master's degree, 109 who have earned a doctor of philosophy degree, and 14 who will receive a doctor of education degree.

Approximately 175 degrees will be conferred Dec. 3 at the Capitol Campus, and five seniors at Behrend College will qualify for baccalaureate degrees.

Package limits set

Because of time and space limitations on University interdepartmental mail truck routes, it has become necessary to establish a policy (AD-13) concerning the pick up and delivery of packages and

(Continued on page 4)

Penn Staters

William G. Noyes, assistant professor of music education, has reached his 25th year of service to the University.

Mr. Noyes did his undergraduate work at SUNY at Fredonia and continued his graduate training at Penn State, where he was awarded an M.Ed. degree in 1953. Before coming to Penn State in 1952, he taught general and choral music in public schools in New York state.

After completing high school in his hometown of Newburgh, N.Y., he served in the U.S. Army Air Force as a WW II pilot, flying transport missions over the "Hump" in the China, Burma, India Theater. In 1961-62 he returned to the Air Force, serving in the Berlin Wall mobilization in Germany. He is a Lt. Col., retired, in the U.S. Air Force Reserve.

While at Penn State, he has specialized in elementary and secondary general and choral music education and served on numerous committees and workshops. He is the announcer for the Penn State Blue Band.

Mr. Noyes has also arranged choral music and conducted public school choral festivals as well as community choral groups.

Dr. Fred Rapp, professor and chairman of microbiology at the Hershey Medical Center, has been awarded the first Frontiers in Biomedical Research award, established last spring by Drew University and the pharmaceutical division of Ciba-Geigy Corporation. The award, which carries a cash stipend and a plaque, was also presented to Dr. Robert C. Gallo, chief of the National Cancer Institute's cellular biology lab. Dr. Rapp serves as associate provost and dean for health affairs and as director of the specialized cancer research center at Hershey.

Dr. Robert Lindsay, professor emeritus of metallurgy, has received the 1977 Albert Easton White Distinguished Teacher Award of the American Society for Metals. The award recognizes "unusually long and devoted service in the teaching of metallurgy, which is characterized by the ability to inspire and impart enthusiasm to students as well as by metallurgy accomplishments."

Dr. Lindsay, who retired from the Penn State faculty in 1972, has contributed a great deal to the fundamental understanding of steels and cast irons, and has supervised the work of more than 40 graduate students.

Previously unpublished work from the notebooks of an early French journalist has been edited by Dr. Isabelle Armitage, assistant professor of French, and published as *Fragment des Recueils de Pierre de L'Estoire*. The book is included in the University of Kansas Humanistic Studies series.

As grand audienier of the Paris Parliament, Pierre de l'Estoire (1546 to 1611) served as notary and secretary to the king and also had a close association with the French Parliament. His descriptions of what he observed during the reigns of Henry III and Henry IV and the beginning of the reign of Louis XIII have long been

considered a lively and accurate record of the times.

Included in the manuscript fragment edited by Dr. Armitage are letters, one satire piece, four stories, a long poem and other writings, mostly of a political nature. The notebooks from which the materials were taken are part of the collection at the Kenneth Spencer Research Library of the University of Kansas.

Dr. Eugene W. White, professor of solid state science, has taken early retirement after more than 19 years on the faculty. Affiliated with the University's Materials Research Laboratory, he is the co-inventor with his nephew, Rodney A. White, M.D., and the late Dr. Jon N. Weber, professor of marine geology at Penn State, of the patented Replamineform process by which skeletal microstructures of selected marine invertebrates can be reproduced in a wide range of biomaterials for repair of and implantation in the human body.

He received a B.S. in mineralogy in 1955, an M.S. in mineralogy and petrology in 1958, and a Ph.D. in solid state science in 1965, all at Penn State.

New ruling on foreign students

Editor's note: The Office of Personnel Administration would like to direct faculty attention to a new ruling affecting foreign students.

The Immigration and Naturalization Service has issued a new ruling limiting the maximum period of practical training for alien students to 12 months. Any alien student completing his or her course work on or after Sept. 1, 1977, will be affected by the new ruling. Previously, a maximum period of 18 months had been allowed for practical training.

According to officials of both the Immigration Service and the Department of Labor, 12 months is considered sufficient time for alien students to prepare themselves for entrance level positions in their chosen fields without seriously infringing upon the employment opportunities of U. S. resident workers.

The amended regulations will permit an alien student to apply for the first six month period of practical training without first securing a letter from a prospective employer. However, when the second period is requested, school officials will be asked to state more specifically whether such employment is related to the student's field of study. When the application for the initial period of employment is approved, the period shall be deemed to commence either on the date the student enters such employment or 60 days after completion of the student's course of study, whichever is earlier.

The application for the initial period of practical training must be submitted:

1. prior to the expiration of an alien student's authorized stay,
2. not earlier than 60 days before graduation or completion of a course of study,
3. not later than 30 days after graduation or completion of such study.

The application for the first period of practical training must be submitted to the office of the Immigration Service having jurisdiction over the college or university recommending the training. For students at Penn State, the application must be prepared by the Office of International Student Affairs and submitted to the Immigration Service in Philadelphia.

The application for the second period of practical training at Penn State must be submitted via the Office of Personnel Administration to the Immigration Service in Philadelphia. The University will be required to prepare a statement describing the occupation in which the alien is employed and describing the

Calendar

Nov. 10 — 20

Special Events

Thursday, Nov. 10

FSHA, A New Orleans Creole Dinner, Maple Room, Henderson. For reservations, phone 865-7441.

Runners Night, a panel discussion of all types of running, 7:30 p.m., Room 112 Kern.

Friday, Nov. 11

Board of Trustees meeting, Room 402 Keller. Faculty Women's Club luncheon/lecture. Barbara Hackman Franklin on "The Growth of the Consumer Movement and Current Product Safety Issues," noon, Nittany Lion Inn. France-cinema, *The Sorrow and the Pity*, 7 p.m., Room 112 Kern.

U.S. Air Force Band and Singing Sergeants, 8:15 p.m., Eisenhower Auditorium.

Saturday, Nov. 12

Last date for submitting petitions to Records Officer to graduate in absentia on Nov. Sports: women's volleyball, vs. Slippery Rock, East Stroudsburg, 1 p.m.; football, vs. Temple, 1:30 p.m. France-cinema, *The Sorrow and the Pity*, 7 p.m., Room 112 Kern.

Penn State Symphony Orchestra, "Pops Concert" to benefit the Performing Arts Scholarship Fund, 8:30 p.m., Eisenhower Auditorium.

Sunday, Nov. 13

S.O.C. Hiking Division, exploration in Little Juniata Natural Area, 9 a.m., HUB parking lot. University Chapel service, T. Vandra Vittachi, United Nations, New York, 11 a.m., Music Bldg. recital hall. All University Day.

Shaver's Creek Nature Center, Winter Trees and Evergreen Walk, 2 p.m., Stone Valley.

Seminars

Friday, Nov. 11

Ceramic Science. Hiroshi Abe, Asahi Glass Company, Ltd., Yokohama, Japan, on "Corrosion of Silica Brnck by Sodium Chloride Vapor," 11 a.m., Room 301 Mineral Industries.

Analytical Chemistry. Lance Rose on "Chemical Identification and Quantitation of the Oak Leaf Roller Pheromone Complex," 11:10 a.m., Room 333 Whitmore.

Monday, Nov. 14

Speech Communication, Dianne McGrath, director of Career Information Service, Duke University Medical School, on "Applying Communication Knowledge to Communication Practice," 3:45 p.m., Room 309 Sparks Bldg.

Biochemistry and Biophysics, Britton Chance, University of Pennsylvania, on "Reaction of Cytochrome Oxidase with Oxygen," 3:55 p.m., Room 101 Althouse.

Tuesday, Nov. 15

Inorganic Chemistry, Joan Morse on "Selected Metal Ion Studies of Carboxypeptidase A," 8 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Hugh Stumbo, collages, and Jack Troy, ceramics, through Nov. 11.

Renaissance Gallery Opening Reception, 2 p.m., Kern lobby. Sports: men's cross country, Eastern USTFF Championships. France-cinema, *The Sorrow and the Pity*, 7 p.m., Room 112 Kern.

Monday, Nov. 14

Last day for signing fall term emergency loans. Room 108 Shields. Early registration, 8 a.m.-5 p.m., Room 112 Shields, through Nov. 18. French Department lecture, Andrée Chedid on "Poésie en mouvement," 7:30 p.m., Room 108 Eisenhower Chapel. Fall term classes end, 9:55 p.m.

Tuesday, Nov. 15

Final examinations. Friends of the Museum Art Gallery Talk. Edward Bryant, Picker Art Gallery, Colgate University, on "John Koch and American Art," 10:30 a.m., Museum of Art. University Senate Council meeting, 2:10 p.m., Room 101 Kern.

Wednesday, Nov. 16

Final examinations. Thursday, Nov. 17. Final examinations.

Paul M. Althouse Memorial Lecture. Dr. Baruch S. Blumberg, 1976 Nobel laureate, on "Studies of Hepatitis B Virus: Scientific Method and Clinical Research," 4 p.m., Hospital Auditorium. Hershey Medical Center France-cinema, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern. Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Friday, Nov. 18

Final examinations. Penn State Biophysics Reunion. Stan Person, PSU, welcoming statement, 1 p.m.; Ernest Pollard, Evan Pugh equestrian professor of biophysics, PSU, on "Where Do I Think Biophysics is Going?" 1:20 p.m.; Poster Session, update on activities of alumni and the present biophysics group, 2-5 p.m., Room 112 Kern. France-cinema, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern.

Saturday, Nov. 19

Final examinations (until noon). Sports: fencing, PSU Open (men and women), all day.

Symposium on Cell Biophysics. Scott Cram, Los Alamos Scientific Laboratory, on "Cell Sorting," Al Khouri, Wistar Institute, on "Tumor Virology," Bill Taylor, PSU, on "Chemical Carcinogenesis," Russ Turner, VA Hospital, Tacoma, Wa., on "Space Flight Biophysics," Marshall Edgell, University of North Carolina, on "Molecular Genetics," 9 a.m.-12:30 p.m., Room 112 Kern.

Sunday, Nov. 20

Sports: fencing, PSU Open (men and women), all day. Shaver's Creek Nature Center, Weeds in Winter, 2 p.m., Stone Valley.

Hammond Gallery: Neil Feather and Marilyn Ranker, ceramics, through Nov. 13. **HUB Gallery:** Paul O'Hara, sculpture: Joan Sonnenberg, prints.

Kern Commons Gallery: American Indian Cultural exhibit, and "Derivations," photographs, both through Nov. 12. Renaissance Gallery exhibit, mixed media, opens Nov. 12. **Museum of Art:** Lanny Sommes, poster art; Kenneth Beitel, recent works; John Koch, Models and Moments.

Museum of Art HUB Gallery: Super Mud Master Works.

Zoller Gallery: Super Mud Student Invitational, through Nov. 16.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Second-class postage paid at State College, Pa. 16801

Note: The following report was prepared by a subcommittee of the Planning and Development Committee wholly for informational purposes. The program is being implemented; this document simply describes it.

Planning and Budget Procedures An Informational Report

The Budget and Planning Office recently prepared estimates of the University's income and expense for each of the next five years, based in part on the enrollment projections reported to the Senate in May, 1977. These projections show that there will be few resources for new initiatives and programs and budgetary pressures on existing programs.

To have a rational approach for meeting changing needs within the University, President Oswald has approved new procedures for planning and budgeting. They are designed to provide a basis for resource allocation for 1978-79, and a tentative resource plan for the five-year period through 1982-83.

Major objectives of the procedures are:

1. Establishment of a regular and more rigorous process of planning for course offerings for somewhat more than one year in advance.
2. Introduction of five-year planning as an integral part of the annual budget review process. This will include expected staff levels. Estimates will be updated annually.
3. Elimination of periodic freezes or situations requiring the Provost to approve the filling of each position, as is presently the case.
4. Firm commitments on base staffing levels in advance of the fiscal year to free deans and other administrative officers

from uncertainties stemming from external financial problems. Such commitment levels will necessarily be conservative, however, to permit some flexibility.

Five year budget targets will be proposed for Colleges, Campuses, and academic support program divisions. The initial proposed targets will be based upon five-year projections of revenue and expense increases for the entire University, which indicate a probable need for adjustments to meet part of the effects of inflation. The proposed targets for Colleges and Campuses will be based in part on advice from a "targets committee" appointed by the Provost, which includes two members of the Faculty Advisory Committee. A similar planning and budgeting process will be followed in the areas of financial and business operations and University development and relations.

The initial proposed targets are intended to serve as the starting point for dialogue. A substantial process of feedback and discussion is provided for, after which final budget targets will be determined. Each dean and other administrative officer will, after appropriate review and consultation, prepare a planning and budget proposal

which will: (1) Provide a plan for implementing the overall staffing and budget target proposed for the College, Campus or other administrative division; (2) provide a discussion of the mission, values, goals and proposed operational objectives of the administrative division; (3) discuss the impact of the proposed targets on the administrative division's goals and objectives; and (4) if necessary, propose and explain the justification for an alternative set of resource targets.

Each dean and director has been requested by the Provost to involve faculty members in the planning and to report to the Provost on the type and extent of faculty involvement.

Proposed course offerings for the complete academic year will be requested with the objective of developing more efficient scheduling patterns matched to the targeted budget and available faculty. For Colleges and Campuses, the preliminary results of this activity, called instructional programming, will be one of the important considerations in planning and budget hearings, since it will provide an estimate of student credit hours, numbers of sections, information about levels of courses, and the like.

A hearing will be scheduled for each administrative officer, at which the

planning and budget proposal (and, if applicable, the preliminary instructional programming) will be discussed in depth. The hearings for individual Commonwealth Campuses will be held by the Dean of Academic Instruction for Commonwealth Campuses; hearings for the Colleges, Behrend College, Capital Campus, King of Prussia Graduate Center, and the academic-support programs, by the Provost of the University; hearings for components of the Milton S. Hershey Medical Center by the Provost and Dean of the Medical Center; and hearings for institutional support programs, by the cognizant Senior Vice President. The hearings are to be scheduled during January and February.

Feedback following the hearings will be provided by about mid-March to each dean and other administrative officer. The feedback will include responses to planning-issue discussions, as well as final target decisions, and authorized staffing levels for the five-year planning period.

In summary, the 1977-78 planning and budgeting cycle will deal with a five-year period, 1978-79 through 1982-83. It will include realistic projections of available resources so that planning can take place to deal with probable resource limits. Resource targets for each division of the University will be set only after discussion and review with the leadership of the divisions.

SPECIAL SUBCOMMITTEE

John J. Cahir
Murray S. Martin
Chalmers G. Norris

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 455-1387). Applications for these staff vacancies will be received until 5 p.m., Nov. 17. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

CONFERENCE COORDINATOR, CONTINUING

EDUCATION — University Park. Responsible for the functions of development, organization, operation, and administration of Continuing Education Programs and conferences, and services for on-campus groups using University facilities. Bachelor's degree or equivalent with one to two years of directly related experience in business, industry or education. (Degree in Business Administration preferred.)

PROGRAMMER, MANAGEMENT SERVICES —

University Park. Analyze and design program logic; code, test and document programs; keep abreast of new techniques in programming using available educational resources. Bachelor's degree or equivalent in Computer Science or related field plus one to two years of directly related programming experience. Proficiency with COBOL and/or PL/I on 3rd generation computer equipment is desired.

RECORDS, REGISTRATION AND SCHEDULING

OFFICER — Behrend. Responsible to the Assistant Dean for Undergraduate Studies for all student records, registration operations, preparation of course schedules and a variety of admissions operations. The position involves supervision of the Records' Office staff and contact with students as well as faculty and staff. Bachelor's degree or equivalent required with two to four years of directly related experience.

WPSX Highlights

The events of the Great War, the first major event to be recorded on newfilm, are recounted on **World War I**, a 26-week series which returns to Channel 3 at 7:30 p.m. on Saturday, Nov. 12. The series presents Allied and German archival footage of the war's events from the assassination of the Austrian archduke to the 1918 armistice and the establishment of the League of Nations.

President Carter's energy proposals are examined at 9 p.m. on Saturday, Nov. 12, in a special edition of **The Advocates**. The program debates the question, "Should Congress pass Carter's energy program?" Arguing in favor of the administration's stand will be John O'Leary, deputy secretary of energy, and Congressman Morris K. Udall (Dem.-Arizona). Opposing it will be Congressman Robert Krueger (Dem.-Texas).

Monday, Nov. 14, at 8 p.m., **The Age of Uncertainty** looks at the role which large corporations play in modern economic life. Using a fictitious corporation called "Unified Global Enterprises," John Kenneth Galbraith assesses the power of multi-national corporations and how that power is gained and used.

In conjunction with the National Women's Conference, WPSX is presenting a variety of special programs beginning at 9 p.m. Monday, Nov. 14, with "Pleasantville" on **Visions**. The original television drama explores a young girl's fantasies after the death of her eccentric grandmother. Immediately

following at 10:30 p.m., Nancy Miller talks with off-off-Broadway playwright Megan Terry on **Creative Women**.

Frieda Rozen of Penn State's Department of Labor Studies, hosts a conversation about the role of women in America's labor movement on **Talkabout**, at 7:30 p.m. Tuesday, Nov. 15. Her guests include Barbara Wertheimer, author of *We Were There: The Story of Working Women in America*, and Cynthia McCaughey, a coordinator of women's activities in the AFL-CIO. At 8 p.m. on Tuesday, **Georgia O'Keefe** features a rare interview with the famed American artist in her New Mexico home. The conversation is interwoven with views of O'Keefe's paintings and photographs of her past. Men's liberation is the subject of **To Be a Man**, which follows at 9 p.m. The program reveals that men also need to be liberated from widely accepted stereotypes.

Blues singer/writer Elizabeth Cotten ("Freight Train") is the subject of a 30-minute television portrait, **Me and Stella**, to be seen at 10:30 p.m. Wednesday, Nov. 16. The portrait, interspersed with songs, is hosted by Cotten's friend Taj Mahal.

The activities of a volunteer fire company are recorded in a new Penn State Television production, **A Tale of Reliance and Hope**, to be seen at 8 p.m. on Wednesday, Nov. 16. Filmed at the Hope and Reliance Companies in Philipsburg, the documentary examines both the great and serious sides of the volunteer firefighter in a small community.

Funding Sources

For further information, call 865-1372

(293-2) The IHEW Office of Education has issued closing dates for most of its FY1978 OE Direct Discretionary Grant Programs. Sixty-one programs are enumerated and 21 others will be announced later. (Ref. 42FRS4983-917, 101277)

(293-2) NSF announces a Nov. 28 deadline for NATO Post-doctoral Fellowships in Science applications. Study is supported in NATO countries or possibly in countries cooperating with NATO. (Ref. SF-587-17)

(293-2) NSF Women in Science, Science Career Workshop proposals have a Dec. 1 deadline. Designed to attract women to and retain them in scientific careers, the program awarded 67 grants in the last two fiscal years for workshops and facilitation projects. A pilot Visiting Women's Scientist Program will be funded separately from this solicitation. (Ref. NSF 78-26)

(294-1) The National Research Council Announces **ships Program** for 1978 announces a Jan. 15 deadline for applications. Recent doctoral recipients and some senior investigators are eligible for postdoctoral research in federal laboratories in atmospheric and earth sciences, chemistry, engineering, environmental sciences, life sciences, mathematics, physics, and space sciences. (Ref. NRC announcements)

(294-2) The NSF Instructional Scientific Equipment for Undergraduate Science Education program has a March 3 deadline. Both 4-year and 2-year institutions are eligible for matching funds. Eligible fields include mathematical, physical, biological, engineering, and social sciences, as well as associated interdisciplinary areas. ISEP funds are limited to \$20K proposal (proposals larger than \$10K require a cover sheet). Multiple proposals are allowed per institution. (Ref. SF-78-32)

(294-3) The Eastman Kodak Company, as part of its Educational Aid Program, provides research grants to support of graduate education and research at the masters or doctoral level. Eligible fields include chemistry, physics, engineering and related interdisciplinary fields. Grants range from \$4K to \$6K per academic year and include support for EK Scientific Awards (\$500-\$1K) and/or EK Fellowships (\$2.5K minimum). (Ref. Kodak Educational Aid Program 1977 brochure)

(294-4) The National Science Foundation has issued its FY1978 Guide to Programs which includes criteria for the selection of research projects. Major categories of research support include (1) mathematical and physical sciences, and engineering, biological, behavioral, and social sciences; (2) astronomical, atmospheric, earth, and ocean sciences; (3) science education; (4) Research Applied to National Needs (to be replaced by the Science and Engineering Application Directorate); and (5) sciences, technological, and international affairs. duties to be performed.

Employment is not authorized prior to approval of practical training and shall terminate upon the expiration date established by the Immigration Service. Unauthorized employment can result in deportation.

For additional information concerning

practical training, refer to PS-84.

Questions pertaining to employment of aliens can be directed to Robert W. Dombrowsky, Personnel Procedures Division, Room 130 Willard Bldg. (telephone 865-0423). Questions pertaining to alien students can be directed to Mrs. Ardeth Frisbey, International Student Affairs, Room 111 Kern Bldg. (telephone 865-6348).

Declaration urges legislative action

A "Declaration of Common Concern," urging the legislature to act in a prompt, non-partisan fashion to resolve the funding crisis facing Pennsylvania higher education, has been signed by more than 200 prominent Pennsylvanians.

Signers of the Declaration are among the top civic, business, labor and religious leaders in Pennsylvania. Included are:

Former governors John S. Fine and Raymond P. Shafer, and the following heads of various business, labor and religious organizations: Willard F. Rockwell, Jr., Rockwell International Corp.; W. H. Krome George, Aluminum Company of America; Robert E. Kirby, Westinghouse Electric Corp.; Harry Boyer, Pennsylvania AFL-CIO; Lloyd McBride, United Steelworkers of America; Carl E. Glock, Jr., Pennsylvania Bar Assn.; Cardinal Krol of Philadelphia; Henry W. Mathieu, Jr., Pennsylvania Association of Farmer Cooperatives; Jerry McAfee, Gulf Oil Corp.; and Edgar B. Speer, United States Steel Corp.

Also, Edward R. Book, HERCO Inc.; Harold S. Mohler, Hershey Foods; Stanley G. Schaffer, Duquesne Light Company; William K. Ulerich, The Clearfield Progress; and Quentin E. Wood, Quaker State Oil Refining Corp.

The text of the Declaration of Common Concern reads:

"We, the undersigned, representing all

walks of life throughout this Commonwealth, declare our common concern for the crisis which confronts our colleges and universities. We urge that it be resolved without further delay.

"Pennsylvania's colleges and universities are vital to our welfare. They educate our young people; they renew the skills and perspectives of our citizens; they develop new knowledge; they preserve our culture; they improve our health and our daily lives; and they contribute to our economic well-being. In short, Pennsylvania's universities and colleges serve the public purpose and deserve full public support.

"For our state-related and state-aided universities, the appropriations received from the Commonwealth are essential to their very existence. For our private colleges and universities, institutional assistance grants are crucial to their ability to continue to serve a broad cross-section of the young people of Pennsylvania. Without the passage and funding of the needed appropriation acts, the future of higher education in Pennsylvania is in jeopardy.

"We call upon members of the General Assembly to act promptly in a statesman-like, non-partisan fashion to resolve this crisis."

News in brief

(Continued from page 1)

parcels. The following package limitations are now in effect for material being sent through the interdepartmental mail system at University Park.

A. A single package cannot weigh more than 20 pounds.

B. Only one package exceeding 9" x 12" x 17" thick can be picked up per day from any one department with the same requested delivery address.

C. The maximum size package that can be picked up is 10" x 15" x 6" thick.

Anyone who has packages that exceed these limitations to be picked up and delivered elsewhere on campus should call the University Courier Service at 865-5602. There is a charge of \$2 for the first package and 50 cents for each additional package for this service. These rates will be charged to departmental budgets in the same manner as the U.S. postage bill is now handled.

This policy does not apply to U.S. Parcel Post packages or to material that is being shipped by United Parcel Service or Motor Freight. The policy applies only to interdepartmental parcels and packages.

Any questions about this new policy should be directed to Jim McKivison at 865-4051.

Guest speakers sought

The University Committee on International Programs (UCIP) is requesting nominations for guest speakers whose topics are of cross-college interest and have international thrust. UCIP is willing to work out co-sponsorship with other departments for these speakers. Contact the UCIP office, Room 306 Willard Bldg., 865-9549 between 9 a.m. and 12 noon.

Koch gallery talk Nov. 15

"John Koch and American Art" will be the subject of a gallery talk by Edward Bryant, director of the Packer Gallery at Colgate University, at 10:30 a.m. Tuesday, Nov. 15, in the Museum of Art.

Mr. Bryant's lecture has been scheduled in connection with an exhibition of Koch's works at the museum, titled "Models and Moments," which continues through Dec. 21.

An associate professor in the Department of Fine Arts at Colgate, Mr.

Bryant studied art at the University of North Carolina, Chapel Hill, and earned his M.A. in art history there in 1955. He has studied in Europe and Africa with a Ford Foundation Grant and has traveled in Italy on a Fulbright grant and a European study grant from the Brooklyn Museum.

Pattee space available

Members of the faculty who wish to obtain Faculty Study Space Assignments in Pattee Library for winter term should note that the assignments will be made on a first-come, first served basis Monday, Nov. 28, beginning at 7:30 a.m. in Room 106 Central Pattee. There are only 39 such spaces. Further questions should be directed to Cordelia Swinton, 865-5429.

STS "Great Issues" course

The Science, Technology and Society Program will offer a course on "Great Issues in Science, Technology and Society" in the winter term. The three-credit course (STS 100, TTh 14, 62 Willard) is open to all majors who may use it to become acquainted with the breadth of STS program course offerings.

Besides an orientation to the STS curriculum concept, students will learn about the nature of science and technology and differences between the two, public concerns about science and technology and their side effects, resources, energy, information technology, environment, food and health, bio-psycho-socio-technologies, effects of science and technology on human and religious values, and decisions for the future. Lecturers will be STS core faculty who cover these same areas in more depth in other STS courses.

A film series, including Bronowski's "Ascent of Man" videotapes and other audio-visuals specially chosen for their relevance to these topics, will be shown in Room 62 Willard during the 15th period Tuesdays and Thursdays, as an optional educational opportunity for those taking the course. This is open to all faculty and students.

Pattee extends hours

To assist students preparing for final examinations, Pattee Library will extend weekday hours until 12 o'clock midnight.

The 7:45 a.m. to 12 o'clock midnight

hours will start on Monday, Nov. 7, and continue on weekdays through Friday, Nov. 18.
Hours for Saturday, Nov. 12, are 7:45 a.m. to 5 p.m. with the Reserve Reading Room open until midnight; and for Sunday, Nov. 13, 1 p.m. to midnight. The Saturday, Nov. 19, hours are 7:45 a.m. to 5 p.m., and the Library will be closed on Sunday, Nov. 20.

Term break hours at Pattee, beginning Monday, Nov. 21, are 7:45 a.m. to 5 p.m. on weekdays. The building is closed on Saturdays and Sundays.

Student accident trip insurance available

Short term group trip accident insurance is available to students who are not otherwise covered. Students taking course connected trips, or taking group trips with a student organization registered with the Office of Student Activities, may obtain around-the-clock coverage for accidental death and dismemberment, as well as blanket accidental medical expenses.

This insurance is available for the duration of the trip, and a person has been designated in each College or at each campus to collect premiums for class-related trips.

Student registered groups may remit the appropriate premium directly to the Risk Manager in one cash sum, or request a check from their Associated Student Activities checking account. A list must accompany the premium, showing the student name and number, destination and duration of the trip and class or group affiliation.

Current premiums for this insurance are: 35 cents per student for 24 hours, 65 cents per student for 48 hours, 90 cents per student for 72 hours, and 25 cents per student for each additional 24 hours.

Information about coverage and

premiums is available from the College Financial Officers, Campus Business Offices or the University Risk Manager.

Senate

(Continued from page 1)

addressed the Senate early in September. "I still believe that a solution will be worked out," Dr. Oswald said, but he added that at the moment the issue has become highly political.

The University has now borrowed \$5 million, he reported, and as of Nov. 1 averages about \$4,000 a day in interest costs.

Dr. Oswald told the Senators that Penn State has been working closely with the other State-related universities through joint alumni meetings and other efforts. He also said a letter signed by the heads of the alumni council has been sent to all Penn State graduates living in Pennsylvania asking them for their support.

Senator Stuart Mann, referring to a recent news story about Temple University, asked Dr. Oswald if it were possible that Penn State employees might have to go without paychecks in the near future. Dr. Oswald said he didn't foresee any possibility of that happening.

Following Dr. Oswald's remarks, the Senate approved revised entrance requirements for the College of Agriculture proposed by the Committee on Admissions, Records and Scheduling.

Under the new requirements, entering students will need three units of secondary school English, three units of math, one unit of science and eight other courses. Previously, applicants were required to have three units of English and 12 other courses.

In other action, the Senate approved proposed implementation procedures for undergraduate common courses in independent studies and special topics, under the course numbers 296, 297, 496 and 497.

Proposed minor changes in the Senate election procedures were also approved.

Dr. James B. Bartoo, a senator and dean of the graduate school, presented an oral informational report on the Graduate School. A summary of his text will be reprinted in a later issue of INTERCOM.

Anita H. Thies, manager of special projects in the Office of Public Information and Relations, briefly outlined some of the major objectives of that office. Her presentation was made at the invitation of the Senate Committee on External Affairs.

Mrs. Thies said public information currently stresses three main objectives: supporting the University's fund-raising efforts, promoting its academic excellence and assisting with the recruitment of students.

She noted that Penn State had joined with the other Pennsylvania colleges and universities in an editorial support campaign, supplying key newspapers and radio and television stations with fact sheets and economic impact statements regarding the State funding crisis. As of the end of October, she said, 47 newspapers and two radio and television stations had printed or broadcast editorials urging legislators to vote for the appropriations bill.

To publicize faculty accomplishments, press contacts directory listing faculty members with expertise in areas of popular concern has been sent to about 1,000 editors and reporters, Mrs. Thies said. She added that faculty members are being asked to write opinion pieces, commenting on current affairs, that have been carried by such media as the Associated Press, the New York Times and the Washington Post during the past year.

Mrs. Thies also said public information staff members have recently completed new recruitment film to be shown to high school students by campus recruiters during their visits to high schools.

Penn State Intercom

From the Trustee Docket

Trustees urge prompt legislative action

The Board of Trustees urged members of the General Assembly of Pennsylvania from both political parties "to act promptly to resolve the financial crisis facing the Commonwealth and to fund fully the appropriations necessary for the continued operation of The Pennsylvania State University and other unfunded colleges and universities of the Commonwealth."

William K. Ulerich, of Clearfield, president of the Board, transmitted a copy of the resolution, adopted by the full Board, with a personal letter to each of the 250 members of the General Assembly.

The resolution reads:
"We, the members of the Board of Trustees of The Pennsylvania State University, carry the legal responsibility and authority to govern and hold in trust the University. The Pennsylvania State University has a fundamental responsibility to provide the citizens of Pennsylvania and the nation with programs of teaching, research and service, and to underpin the scientific, social and economic strength of the Commonwealth. As trustees and as citizens, we are dedicated to fulfilling these legal and ethical responsibilities on behalf of all citizens of the Commonwealth of Pennsylvania.

"An appropriation from the Commonwealth is essential to Penn State's very existence as a public university. The lack of a funded appropriation for the current fiscal year which began last July 1, 1977, has created severe financial problems for the University, requiring the borrowing of millions of dollars and the payment of

sizable interest on these loans. Further delay is placing in jeopardy Penn State's ability to continue the orderly operation of its educational programs and services.

"The Board of Trustees of The Pennsylvania State University therefore urges members of the General Assembly of both political parties to act promptly to resolve the financial crisis facing the Commonwealth and to fund fully the appropriations necessary for the continued operation of The Pennsylvania State University and other unfunded colleges and universities of the Commonwealth."

Academic Policy Plan to be revised, updated

The trustees approved a recommendation calling for a revision and updating of the University's Academic Policy Plan, adopted by the Board in 1972.

They requested that President Oswald work with appropriate faculty, administrative and student groups, and report regularly to the Trustee Committee on Educational Policy, the committee charged with the effort, on the progress of the revision. The revised plan is expected to be ready for final consideration by the full Board of Trustees by September 1979.

When first approved by the trustees, the Academic Policy Plan was described by President Oswald as an effort to reaffirm the University's priorities, clarify the roles of the 22 Penn State Campuses, and set forth enrollment policies and projections for the 1970s. The enrollment information was updated in 1974.

The revised plan will contain a review of University priorities, reflect changes in societal needs, and consider findings of

the University program reviews and projections of future enrollments.

The State of Pennsylvania is in the process of updating its Master Plan for Higher Education, a project expected to be completed by the fall of 1978. The University plan will take into account the priorities, observations and policies of the State's Master Plan.

McKeesport names building for Frable

The academic building at the McKeesport Campus will be named the Milton F. Frable Bldg. in honor of the founder of the Campus Advisory Board.

Mr. Frable, who died last March, served as president of the board for 17 years. He was a 1969 recipient of the Penn State Medal for distinguished service to higher education in Pennsylvania.

"Milton Frable was an instrumental force in the development of the McKeesport Campus through his leadership of the Advisory Board," President Oswald said, "and it is appropriate that the academic building be named in his honor."

A native of Latrobe, Mr. Frable was graduated from Bucknell University with a B.S. in mechanical engineering. He entered the Duquesne Company engineering training course in 1928 and retired as manager of area development after 43 years with the company.

Design going forward for new Berks building

An architectural firm has been appointed to design the proposed Human Resources Bldg. of the Berks Campus.

The firm also will provide estimates and possible site selection for the structure to be financed through a capital fund-raising campaign entitled "Partners in Progress." Appointed was Muhlenberg Greene, of Reading, Pa.

Dr. Harold W. Perkins, Berks Campus director, said the building will accommodate health and physical education needs and will serve, alternatively, as a convocation area.

"If sufficient funds can be obtained beyond those required for physical education and assembly needs," Dr. Perkins said, "consideration will be given to additional learning resources and adaptable academic space."

Material Sciences renamed

The name of the Department of Material Sciences in the College of Earth and Mineral Sciences has been changed to the Department of Materials Science and Engineering.

At the same time, the Ceramic Science Section within the Department has become the Ceramic Science and Engineering Section.

These changes have been made, explains Dean Charles L. Hosler, to reflect more accurately the overall nature of the department's two undergraduate majors, ceramic science and metallurgy, which are accredited nationally by the Engineers' Council for Professional Development. In

(Continued on page 4)

News in Brief

Allentown Campus moving

The University's Allentown Campus will move to a new location on Nov. 21, 22 and 23.

The Continuing Education program, previously located at 725 Ridge Ave., Allentown, and the resident instruction program, previously located in the Fogelsville School Bldg., will move into the new Allentown Campus Academic Bldg.

The new mailing address for all University functions at Allentown will be: Allentown Campus, The Pennsylvania State University, Fogelsville, Pa.

New telephone numbers will be (215) 285-4811 and Network 378-6567.

Christmas toys needed

State College area faculty and staff members who would like to donate toys for money for Christmas gifts for underprivileged central Pennsylvania youngsters can take their contributions to four pick-up points before Dec. 15.

They are the Marine Recruiting Office, Fraser St.; the Dutch Pantry Motel, South Atherton St.; and the two McDonalds locations, College Ave. and the Hills Shopping Plaza.

Toys may be new or used but should be in good condition, according to members of the Marine Corps Reserves and the State College Elks Club, sponsors of the toy drive.

United Way behind schedule

This year's United Way campaign is lagging behind in its effort to reach a \$90,000 goal.

"Considering the financial stress our community is experiencing, we can understand our present condition," states College of Agriculture Dean James Beattie, campaign chairman. "Slightly more than \$70,000 has been pledged or donated."

"One factor leads us to believe that we can reach our goal soon after Thanksgiving," he adds. "We know that about 450 people who gave last year have not yet done so this year. If all of them were to give the same amount that they gave in the 1977 campaign, we would easily achieve our 1978 goal."

Persons needing information about United Way or the method for giving can contact their dean or administrative officer for the name of their campaign subchairperson.

Terrace Room schedule

Following the evening meal on Friday, Nov. 18, the Terrace Room will close for two days and will be open for lunch only, from 11:30 a.m. to 1:15 p.m. on Monday, Tuesday, and Wednesday, Nov. 21, 22, and 23.

It will be closed from Thursday, Nov. 24, through Saturday, Nov. 26, and will open for regular business with the evening meal on Sunday, Nov. 27.

Beginning with the winter term, the Terrace Room will be closed on Saturdays. The Lions Den will continue to offer Saturday service from 7 a.m. to 1:30 p.m.

(Continued on page 3)

Penn Staters

Elton Atwater, professor of political science, is marking his 25th year of service to the University.

After receiving his B.A. degree from the University of Rochester, he was awarded an M.A. from The American University. He then studied at the Academy of International Law, The Hague, and the Graduate Institute of International Studies, Geneva, Switzerland, from which he received a Diploma. Following his return to the United States, he took his Ph.D. in international affairs at The American University.

Before Dr. Atwater joined Penn State in 1950 as associate professor of political science, he taught at Elmira College, Elmira, N.Y., and The American University. He also directed a foreign service training program for The American Friends Service Committee, Philadelphia, and served as a consultant to the U.S. Department of State. In 1957-59 he served as associate director of the Quaker Program at the United Nations in New York City.

At Penn State, Dr. Atwater has specialized in teaching American foreign policy and courses on the United Nations, including a course on the economic, social welfare and decolonization functions of the U.N., a direct outgrowth of his work and experience with the international organization. He is in charge of a U.N. intern program under which Penn State graduate students work as research aides for various national delegations to the U.N.

Dr. Atwater has served on many committees in the College of the Liberal Arts as well as University Senate committees and was head of the Department of Political Science in 1956-57 and again from 1960-63.

Dr. Atwater is the author of numerous scholarly articles as well as the book, *American Regulation of Arms Exports*. He co-authored two books, *World Affairs, Problems and Prospects* and *World Tensions: Conflict and Accommodation*.

Dr. William Spackman, professor of paleobotany and director of the Coal Research Section, has received the 1977 Gilbert H. Cady Award for outstanding leadership in the field of coal geology. The award was presented Nov. 5 at the national meeting of the Geological Society of America in Seattle, Wash.

Dr. Spackman is directing a major research effort under contract with ERDA and NSF to characterize the nation's coal resources and relate compositional characteristics to preparation, liquefaction, and gasification behavior.

Dr. Charles S. Prebish, associate professor of religious studies, was recently selected to serve on the National Advisory Board and Educational Standards Committee of the North American Association of Buddhist Schools and Colleges.

Dr. Harry R. Alcock, professor of chemistry, recently presented invited lectures at the Macromolecular Institute at the University of Michigan and at the University of Massachusetts. He spoke on the synthesis of new macromolecules with potential uses in chemotherapy.

Dr. John H. Pazur, professor of biochemistry, recently presented an invited lecture at the chemistry department of the University of Delaware. His lecture was titled, "Chemistry and Immunology of Glycosyl Antigens and Anti-Glycosyl Antibodies from Bacteria and Tumors."

The board of directors of the Optical Society of America has elected **Herschel W. Leibowitz** a Fellow of the Society in recognition of his service in the advancement of optics. Dr. Leibowitz, an Evan Pugh professor of psychology, is well known for his extensive research in the fields of vision and perception.

Dr. Harrison T. Meserole, professor of English, recently returned from the University of Leeds in Great Britain where he received the Cecil Oldman Medal for 1977. The award is presented annually to a distinguished bibliographer and textual critic.

As part of his acceptance, Dr. Meserole presented the Cecil Oldman Memorial Lecture, speaking on "Three Bibliographical Problems from Seventeenth-Century America: Edward Taylor, William Wood, and David Dunster." His lecture was timed to coincide with the annual meeting of the trustees of the Brotherton Library at Leeds.

Dr. Frederick F. Weiner, associate professor of speech pathology in the University's Speech and Hearing Clinic, was named editor of the National Student Speech and Hearing Association Journal at a meeting of the American Speech and Hearing Association (ASHA) held Nov. 2-6 in Chicago.

Dr. Weiner will serve a four-year term as editor of the annual journal, which publishes professional papers of student interest. The position carries with it a membership on the ASHA editorial board.

Bookshelf

Mihailo Dordevic, professor of humanities and literature at Capitol Campus, has written a book, *Serbian Poetry and Milutin Bojic*. The book was published by Columbia University Press.

Prof. Dordevic describes the work as "an academic analysis of Bojic's poetry." It is designed for use in Serbian literature courses.

Prof. Dordevic, a native of Yugoslavia, received his M.A. from the University of Belgrade in 1949. He earned his Ph.D. in modern comparative literature in 1958 from the Sorbonne. He has taught at Ohio Wesleyan University, Converse College, Western Washington State College, and the Cours Duitelle in Paris.

Dr. William P. Graham III, professor of surgery and chief of plastic and reconstructive surgery at the Hershey Medical Center, is co-editor of a new medical textbook, *The Hand: Surgical and Non-Surgical Management*. His collaborator on the volume is Dr. Eugene S. Kilgore Jr., of the University of California Medical School in San Francisco.

The book, published in October by Lea and Febiger of Philadelphia, includes chapters by Drs. Graham and Kilgore and 19 other contributors, including Dr. Stephen Miller, associate professor of surgery (plastic and reconstructive) at Hershey.

A revised Ph.D. comprehensive

Editor's Note: The following comprehensive Ph.D. examination appeared mysteriously on the desk of a department head in the College of Science. Perhaps even a few faculty may find it challenging.

Instructions: Read each question carefully. Answer all questions. Time limit: 4 hours. Begin immediately.

History: Describe the history of the papacy from its origins to the present day, concentrating especially but not exclusively on its social, political, economic, religious and philosophical impact on Europe, Asia, America, and Africa. Be brief, concise, and specific.

Medicine: You have been provided with a razor blade, a piece of gauze, and a bottle of Scotch. Remove your appendix. Do not suture until your work has been inspected. You have 15 minutes.

Public Speaking: 2,500 riot-crazed aborigines are storming the classroom. Calm them. You may use any ancient language except Latin and Greek.

Biology: Create life. Estimate the differences in subsequent human culture if this form of life had developed 500 million years earlier, with special attention to its probable effect on the English parliamentary system. Prove your thesis.

Music: Write a piano concerto. Orchestrate and perform it with flute and drum. You will find a piano under your seat.

Psychology: Based on your knowledge of their works, evaluate the emotional stability, degree of adjustment, and repressed frustrations of each of the following: Alexander of Aphrodisias, Ramses II, Gregory of Nicea, and Hammurabi. Support your evaluation with quotations from each man's work, making appropriate references. It is not necessary to translate.

Sociology: Estimate the sociological problems which might accompany the end of the world. Construct an experiment to test your theory.

Engineering: The disassembled parts of a high-powered rifle have been placed in a box on your desk. You will also find an instruction manual, printed in Swahili. In ten minutes a hungry Bengal tiger will be admitted to the room. Take whatever action you feel appropriate. Be prepared to justify your decisions.

Economics: Develop a realistic plan for refinancing the national debt. Trace the possible effects of your plan in the following areas: Cubism, the Donatist controversy, the wave theory of light. Outline a method for preventing these effects. Criticize this method from all possible points of view. Point out the deficiencies in your point of view, as demonstrated in your answer to the last question.

Political Science: There is a red telephone on the desk beside you. Start World War III. Report at length on its socio-political effects, if any.

Epistemology: Take a position for or against truth. Prove the validity of your position.

Physics: Explain the nature of matter. Include in your answer an evaluation of the impact of the development of mathematics on science.

Philosophy: Sketch the development of human thought; estimate its significance. Compare with the development of any other kind of thought.

General Knowledge: Describe in detail. Be objective and specific.

Faculty Affairs committee seeking input on promotion, tenure policies

Last September, President Oswald addressed the University Faculty Senate on promotion and tenure policies and procedures. As a result, the Faculty Affairs Committee of the Senate has been charged by the Senate Chairman with consideration of the following questions:

1. What are the best intervals for tenure reviews? 1, 3, 5, 6 years (as at present) or some other schedule such as 2, 4, 6 years.
2. Should the justification for promotion be stronger for a particular individual if the time in rank is short (e.g., less than five years as an assistant or associate professor)?
3. Should tenure decisions be made and tenure granted in outstanding cases prior to the sixth year? If so, what policy should be followed? Should promotion from assistant to associate professor before the end of six years be accompanied by tenure or should the two items be considered separately as is now the case? Should the policy be the same for a rapid promotion of

a person hired as an associate professor?

4. Presently no written explanation is given in cases of tenure denial. Should this procedure be modified?
5. What procedures should be followed when a higher level review committee disagrees with a lower level committee (e.g., College committee disagreeing with department or Campus committee or University committee disagreeing with Dean and/or DAICC)?

The Faculty Affairs Committee would welcome comments and suggestions on these matters from the faculty. These may be addressed to the committee through its chairman, Prof. Philip Klein, Room 516 Kern, or Vice-Chairman Peter Gold, Room 1504 Davey, or through the Senate Office. A complete transcript of the President's remarks may be found in the Senate Record for Sept. 8, 1977; copies are available in libraries, in offices of departments, Colleges, and Campus directors, and from Senate members.

(295-1) NASA unsolicited proposals may now be submitted directly to NASA field installations in certain cases. NASA installations are listed on the letter announcement (Ref. 41d)

(295-2) The Harry S. Truman Scholarship Foundation has announced a Dec. 8 deadline. Regulations were published last July (261-2). Students must be nominated by their home institution. (Ref. 42FR57746, 11/477)

(295-3) The Fund for the Improvement of Postsecondary Education (FIPSE) has announced the following deadline dates for FY 1978 pre-applications—Jan. 16; final applications—March 21; and non-competing continuation applications—Feb. 1. Guidelines will be available later this month. (Ref. 42FR57753-4, 11/477) CFDA 13.925

(296-4) The National Institute of Education announces three upcoming deadline dates for its Program of Research Grants on Organizational Processes in Education: Dec. 15, April 13, and Aug. 15. The program includes small grants up to \$7500 and 12 months and regular grants up to 3 years. Regular grants require preliminary proposal. About 20 to 30 grants will be awarded from the \$1 million available including 15 small grants. (Ref. 42FR57992-3, 11/777) (CFDA) 13.950

Calendar

Nov. 17 - Dec. 1

Special Events

Thursday, Nov. 17

Final examinations.
france-cinema, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern.
Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Friday, Nov. 18

Final examinations.
france-cinema, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern.

Saturday, Nov. 19

Final examinations (until noon).
Sports fencing, PSU Open (men and women), all day.

Sunday, Nov. 20

Sports fencing, PSU Open (men and women), all day.
Shaver's Creek Nature Center, Weeds in Winter, 2 p.m., Stone Valley.

Monday, Nov. 21

Fixed date for meetings involving Commonwealth Campus faculty.
Color Slide Club meeting, 7:30 p.m., Room 112 Kern. Competition topics, "Open" and "In the Woods." Leslie P. Greenhill on "Australia Revisited."

Tuesday, Nov. 22

Fixed date for meetings involving Commonwealth Campus faculty.

Thursday, Nov. 24

Thanksgiving Day, holiday.

Saturday, Nov. 26

Commencement, 10:30 a.m., Rec. Bldg.

Monday, Nov. 28

International orientation, 3 p.m., Room 101 Kern.

Tuesday, Nov. 29

Registration for winter term, 8 a.m.-5 p.m., IM Bldg.

Wednesday, Nov. 30

Registration for winter term, 8 a.m.-5 p.m., IM Bldg.

Commonsplace Theatre, *First Circle*, 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, Dec. 1

Winter term classes begin, 8 a.m.

Exhibits

HUB Gallery: Paul O'Hara, sculpture; Joan Sonnenberg, prints, both through Nov. 30.
Kern Commons Gallery: Renaissance Gallery exhibit, mixed media, through Nov. 26.

Appointments

Wesley F. Alles as assistant professor of health education at University Park. B.S., West Chester State; M.S., Ph.D., U. of Illinois. Formerly assistant professor, U. of New Mexico.

Steven M. Baskin as instructor of psychology at Behrend College. B.A., M.Ed., U. of Virginia; Ph.D. candidate, North Texas State U.

David S. Bender as assistant professor of educational psychology at Berks Campus. B.A., Bucknell U.; M.A., Ph.D., Cornell U.

Barry G. Cline as instructor of public administration at Capitol Campus. B.S., U. of South Carolina; M.A., U. of Wisconsin-Madison; Ph.D. candidate, Wisconsin.

Susan E. Gerweck as instructor of social science and psychology at Capitol Campus. B.S., M.S., Penn State; Ph.D. candidate, Penn State.

Halbert H. Holloway as instructor of speech at Mont Alto Campus. B.A., San Jose State U.; M.A., San Francisco State U.; Ph.D. candidate, Wayne State U. Formerly teacher, San Bruno, Cal.

Seminars

Friday, Nov. 18

Penn State Biophysics Reunion. Stan Person, PSU, welcoming statement, 1 p.m.; Ernest Pollard, Evan Pugh emeritus professor of biophysics, PSU, on "Where Do I Think Biophysics is Going?" 1:20 p.m., Room 112 Kern.

Saturday, Nov. 19

Symposium on Cell Biophysics. Scott Cram, Los Alamos Scientific Laboratory, on "Cell Sorting;" Al Khoury, Wistar Institute, on "Tumor Virology;" Bill Taylor, PSU, on "Chemical Carcinogenesis;" Russ Turner, VA Hospital, Tacoma, Wa., on "Space Flight Biology;" Marshall Edgell, University of North Carolina, on "Molecular Genetics;" 9 a.m.-12:30 p.m., Room 112 Kern.

Monday, Nov. 21

Semi-Annual Genetics Symposium, "The Diversity of Biochemical Genetics." Bernard May, PSU, on "Applications of Isozyme Electrophoresis: Introgression in Overlapping Starfish Populations and Biochemical Genetics of the Fungus *Entomophthora*," 11 a.m.; Richard Craig, PSU, on "Significance of Biochemical Markers in Geranium Breeding," 11:40 a.m.; Stephen O'Brien, Laboratory of Viral Carcinogenesis, National Cancer Institute, on "Somatic Cell Genetics as an Approach to the Analysis of Cellular Genes which Control Expression of Endogenous Type-C Viruses," 1:30 p.m.; Timothy Carter, Hershey Medical Center, on "Regulation of Human Adenovirus Gene Expression," 2:40 p.m.; Kathleen Rose, Hershey Medical Center, on "Polyadenylic acid Polymerases from Rat Liver and a Hepatoma," 3:45 p.m.; Ronald Yasbin, PSU, on "Aspects of Biochemical Genetics of *Neisseria gonorrhoeae*," 4:25 p.m.; Room 112 Kern.

Tuesday, Nov. 22

Inorganic Chemistry, Edward Steifel, Kettering Research Laboratory, on "The Role of Molybdenum in Enzymes," 8 p.m., Room 333 Whitmore.

Thursday, Dec. 1

Chemistry, Lennard Wharton, University of Chicago, on "Mechanisms of Gas-Metal Surface Reactions," 12:45 p.m., Room 333 Whitmore.
Physics, Michael Wortis, University of Illinois, "Through a (Spin) Glass Darkly," 3:30 p.m., Room 117 Osmond.

Museum of Art: Lanny Sommes, poster art; Kenneth Beittel, recent works; John Koch, Models and Moments.

Museum of Art HUB Gallery: Super Mud Master Works.

Thomas G. Johnson as instructor of electrical engineering at Shenango Valley Campus. B.A., Oberlin College; M.S., Youngstown State U. Formerly with Westinghouse Electric Corp.

Jeanne Kostas as assistant professor of psychology at York Campus. B.S., U. of Maryland; M.S., U. of Kentucky; Ph.D. candidate, Kentucky.

Isoroku I. Kubo as research associate, Applied Research Laboratory at University Park. B.S., Yokohama National U., Japan; Ph.D., Cornell U. Formerly research engineer, Komatsu Ltd., Tokyo.

Philippus J. Loukissas as assistant professor of urban and regional planning at University Park. Dipl. Arch. Eng., National Technical U. of Athens, Greece; M.C.P., U. of Pennsylvania; Ph.D., Cornell U. Formerly research analyst, Delaware Valley Regional Planning Commission.

Margaret P. Mandrillo as associate professor of nursing at University Park. B.S., U. of Pittsburgh; M.Ed., Ed., Teachers College, Columbia U. Formerly associate professor, U. of Virginia.

Julian D. Maynard as assistant professor of physics at University Park. B.S., U. of Virginia; M.A., Ph.D., Princeton U. Formerly adjunct assistant professor, UCLA.

WPSX Highlights

A special edition of *World in Action*, Monday, Nov. 21, at 7:30 p.m., reports on the death of Steve Biko, the 20th person to die in police custody under South Africa's 90-day detention law. The report provides exclusive coverage of events in South Africa since Biko's death. Among those interviewed are Biko's widow and leaders of the Black People's Convention which Biko founded.

A troubled Vietnam veteran works out his anger towards his family and society in a street theatre group in Brother Jonathan's *You Can Run, But You Can't Hide*, presented Monday, Nov. 21, at 9 p.m. on *Visions*.

Talkabout explores the relationship of aging and sexuality in a two-part series entitled *The Loving Years*, beginning Tuesday, Nov. 22, at 7:30 p.m. Among those appearing on the programs are Elaine Young, instructor in health education, and Edward Wickersham, associate professor of biology.

Focusing on facilities in New York City, a special two hour report, *Health Care: Your Money or Your Life*, assesses the availability of health care facilities in 1977. The program, to be seen Tuesday, Nov. 22, at 9 p.m., begins with a documentary illustrating the vast differences in public health care in America. Experts in the health field and government representatives join Jim Lehrer on the second part of the program to explore alternatives for improving health care services.

Special programming presented in conjunction with the National Women's Conference, continues on Channel 3 Wednesday, Nov. 23, beginning at 9 p.m. with *Union Maids*. The hour-long program tells the story of three women who were part of the Chicago rank and file of the labor movement in the 1930s. At 10 p.m., *National Women's Conference 1977* presents highlights of the conference held Nov. 18-21 in Houston.

News in brief

(Continued from page 1)

Charity Ball tickets on sale

The ticket sale campaign for the 30th annual Charity Ball is now in progress in Centre County. Volunteers are contacting residents and businessmen to invite them to purchase tickets for the semi-formal dance in one of these three categories: patron, a contribution of \$15 or more; sponsor, \$25 to \$50; and benefactor, \$50 or more.

Sponsored by the College Area Auxiliary to the Centre Community Hospital, the dance will be held from 9 p.m. to 1 a.m. on Friday, Dec. 2, at the Elks Country Club in Boalsburg.

All contributions are tax-deductible and each ticket will admit one couple to the dance. A limited number of general admission tickets may be available, at \$10 apiece, at a later date.

Contributions will be used to purchase an echocardiogram for the Mountainview unit of Centre Community Hospital. The ultrasonic device provides diagnostic information about the heart.

Dr. and Mrs. Stanley O. Ikenberry are co-chairmen of the ticket sales to University personnel.

Library hours changed

Because of changes in the final examination schedule, Pattee Library will close at 10 p.m. on Friday, Nov. 18, and will remain closed on Saturday and Sunday, Nov. 19 and 20. The library will be open until midnight this evening (Nov. 17).

New divisions at Hershey

Two divisions - respiratory and intensive care and clinical anesthesia - have been established in the Department of Anesthesiology at Hershey.

Named to head the new divisions are Dr. Kermit R. Tantom, associate professor of anesthesiology, who will head respiratory and intensive care; and Dr. Timothy Foley, assistant professor of anesthesiology, who has been appointed as clinical director of the operating rooms.

Staff Vacancies

Staff vacancies in this publication generally require at least a baccalaureate degree or equivalent as a minimum educational qualification. Staff vacancies requiring less than the baccalaureate degree as well as those announced in INTERCOM may be found in the Penn State REPORTER. All University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Nov. 25, 1977. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

WRITER, VICE PRESIDENT FOR RESEARCH AND GRADUATE STUDIES - University Park. Responsible to the Science Editor for interviewing faculty and staff about their research activities and translating the interview data plus technical reports and theses into publications that the general public can understand. Bachelor's degree, preference in journalism or English, plus one to two years of directly related experience in science writing or related field. Some magazine experience is desirable. Applicant will be judged on portfolio of samples and prior work experience.

Trustee docket

(Continued from page 1)

addition, many of the faculty in the department maintain affiliations and are active in various professional engineering societies, and most of the graduates take engineering positions.

Findings of Facilities Planning group reported

A report on Penn State's facilities needs and the development of recommendations for the capital budget program for 1978-79 to 1983-84 were presented to the Physical Plant Committee of the Board.

The report outlined the work of the Physical Facilities Planning Review Commission appointed by President Oswald last January. The findings were presented by Dr. Stanley O. Ikenberry, senior vice-president for University development and relations, who was chairman of the commission.

"Much of the time of the commission was spent in reviewing the needs of each of the academic units at Penn State," Dr. Ikenberry said.

"The report considers facility needs of academic programs as well as the implications of governmental regulations, energy conservation measures, and containment of escalating costs of maintenance and operations," he added.

Included in the commission's purview were such areas as adequate provision of faculty office space, improvement of classroom and laboratory space for student and faculty use, the need for additional library facilities, and the replacement of older facilities.

These were considered in context with other needs of the University such as requirements of governmental regulations, conserving energy, and keeping maintenance and operating costs to a minimum.

Dr. Ikenberry explained that the commission felt that new buildings should not be added until other avenues to meet space needs have been exhausted.

"In several cases renovation and reassignment of space can adequately meet space needs without the construction of new buildings," Dr. Ikenberry noted.

The commission based its recommendations on eight broad assumptions, developed in part from the initial charge to the committee by President Oswald, and also on reports received from the deans of the undergraduate Colleges and other key administrative personnel from all divisions of the University.

The basic assumptions were:

1. As a result of stabilization of enrollment and the prospect of moderate enrollment decline during the coming decade, additional physical facilities will not be required for general enrollment expansion purposes.

2. Additional physical facilities may be required to accommodate changing program needs, including highly specialized graduate, professional, research, and public service programs and a balanced cadre of facilities essential to the educational programs at each of the University's Campuses.

3. State appropriations for capital budget expenditures have declined sharply in recent years and are expected to remain at a very modest level. Also, federal facilities programs have all but disappeared. New and different programs for funding must be developed.

4. The sharp reduction in available support for capital construction purposes, paired with the burden of increased operational costs, requires the University to become as rigorous and selective as possible in setting and pursuing capital program priorities.

5. In framing the capital program for the decade ahead, increased emphasis should be placed on (a) renovation and major

maintenance of existing facilities; (b) compliance with State and federal regulations, including the Pennsylvania Department of Labor and Industry, the federal Department of Health, Education and Welfare, the federal Environmental Protection Agency, the Pennsylvania Environmental Protection Agency, Industrial Risk Insurers, and provisions for the handicapped; (c) increased investment in long-term energy conservation; and (d) investment essential to reduce or at least control escalating operating costs.

6. Decreased emphasis should be given to the construction of new facilities. Construction of new facilities should be considered only after all other alternative ways to meet the need have been thoroughly explored.

7. Physical facilities — space — constitute one of the University's major resources, along with the operating budget and human resources of the University. As in the case of the financial and human resources of the University, Penn State's physical facilities, including the nature and priorities of use, should reflect its mission and its long-range plans and programs. Policies and procedures for reallocation of space should be strengthened immediately so that the allocation or reallocation of space may be accomplished more effectively, fairly, and in proper accord with changing program needs.

8. The University's physical facilities needs, priorities, and plans must receive continuing review in light of changing conditions and circumstances.

BFA, MFA name changes

The Bachelor of Fine Arts degree with a major in music has been changed to the Bachelor of Music degree. At the same time, the Master of Fine Arts in Music degree has been redesignated as the Master of Music degree.

The changes, explains Dean Walter H. Walters, are in keeping with the accepted degree titles identifying the professional degree programs used by the National Association of Schools of Music.

Enrollment stable

Fall term enrollment at the University totals 52,881 resident instruction students. In reporting figures last Thursday, Dr. Robert E. Dunham, vice president for undergraduate studies, said enrollment was essentially stable, down nine tenths of a percent from the total of 53,363 a year ago.

Enrollment at University Park is 31,885, a gain of three tenths percent over the 31,777 figure for last fall.

Current enrollment totals 16,261 at the Commonwealth Campuses: 1,605 at Behrend College; 344 at the King of Prussia Graduate Center; 480 at Hershey; and 2,306 at Capitol Campus.

The fall enrollment includes 38,542 baccalaureate degree candidates; 3,682 associate degree students; 6,676 graduate and medical students; 1,515 non-degree students; and 2,466 provisional students.

On-campus job recruiting undergoing a revival

On-campus recruiting by employers is undergoing a revival, according to a report covering the activities of the Career Development and Placement Center for 1976-77, presented to the trustees by Dr. Raymond O. Murphy, vice president for student affairs.

"After two successive years of decreasing college recruiting activity, this past year produced evidence that increasing numbers of employers are beginning to return to college campuses for recruiting visits," Dr. Murphy said.

He noted that 628 employers sent recruiters to the University Park Campus during the year, an increase of approximately 19 percent over the previous year. He added that 13,635 job interviews were held on campus. Most of

Senate asks faculty to write legislators

The University Faculty Senate officers urge all faculty to support the campaign to impress upon the State Legislature and its leadership the urgency of solving the State budget crisis immediately. If you have not already done so, please write to your State senator and representative and the leadership of both parties today to express your concerns for higher education in Pennsylvania and especially for Penn State. Resolution of both the funding and revenue issues is essential for all of us. Please help all you can as a citizen and member of the faculty.

Unless a solution is reached prior to the Dec. 6 Senate meeting, the Faculty Senate will be considering possible actions which could be taken to assist in solving this fiscal crisis.

Please inform your senators if you have any innovative ideas on what the faculty should be doing. Thank you.

Thomas E. Daubert, Chairman
Lee W. Saperstein, Chairman-Elect
Evelyn A. Hovanec, Secretary
John J. Coyle, Immediate Past-Chairman

these interviews went to prospective graduates in the technical disciplines.

Dr. Murphy stressed that the on-campus interview program is only one way in which the Career Development and Placement Center attempts to aid students with their job search. The Center offered 140 group programs on career planning and job search issues to more than 4,000 students last year. These programs were presented in residence halls, classrooms, fraternities and sororities.

The center also cooperated with three Colleges of the University to offer credit-bearing courses dealing with career related issues.

Continuing Education report presented

In his 1976-77 report to the Board, Floyd B. Fischer, vice president for Continuing Education, said that Penn State is the only institution to have received three major awards for innovative Continuing Education programming from the American College Testing Program and the National University Extension Association.

"Although these award-winning programs in 1974, 1975, and 1977 gained national attention, many other innovative programs through Continuing Education are originated each year by the Colleges and Campuses of the University," Mr. Fischer emphasized.

In 1976-77, these innovative programs included a seven-course series by the College of Human Development to train persons to manage volunteer programs and organizations; a series of courses by the Colleges of Business Administration and Arts and Architecture in financial management of arts organizations; an extended Human Development baccalaureate degree program in law enforcement and corrections for part-time adult students; expansion of teleconference programs in the health care field by the Colleges of Medicine and Science to more than 40 hospitals in the State; and, in response to the energy crisis, a series of more than 25 short courses, workshops, and conferences in the mineral industries by the College of Earth and Mineral Sciences.

Although enrollments in credit courses through Continuing Education were down from the previous year, reflecting the national trend toward decreasing enrollments in programs for teachers, Mr. Fischer explained that programs in the specialized noncredit category served a record high of 79,631 individuals during the fiscal year, up nearly six percent over the 1975-76 enrollment figure of 75,366.

These programs include primarily the workshops, conferences, institutes, and short courses offered at some 148 locations in the Commonwealth and through the Conference Center at University Park. Many of these programs are specialized instructional offerings designed for the continuing education of persons in the professions.

Student enrollments through Continuing Education last year totaled 126,743, Mr. Fischer concluded.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed although names will be withheld on request.

Q. In the Faculty Senate report on indirect research costs, the University speaks of a total administrative overhead indirect cost rate of 57 percent figured on the total grant (each dollar received). Are fringe benefits for faculty stipends included in the base on which the indirect cost is calculated? For instance, if a faculty person received a \$10,000 grant with separate items for travel, for postage, for computer time and a faculty stipend, including fringe benefit payments, upon what would the University calculate this 57 percent indirect cost? Name Withheld

A. Indirect costs may elect to recover indirect costs on either one of two bases: (a) using modified total costs as the basis, where "modified" refers to the deletion of major equipment items in the budget and (b) using salaries and wages (S&W) as the basis. The latter method is used at Penn State, i.e., the 57.61 percent is applied to S&W.

If we were to shift to a modified total cost base, the resulting rate would be lower (approximately 48 percent) because this rate would be multiplied times a larger base number to arrive at the indirect costs in dollars. Indirect costs recovered (on an average over the span of a year) using a total cost base would not differ significantly from our present method.

As indicated in the table on page 4 of the Oct. 20, 1977, INTERCOM, the indirect cost rate of 57.61 percent covers nine allowable cost elements; three are related to administrative indirect costs.

Fringe benefits (the current rate is 19 percent) are not included in the indirect cost rate, as revealed by the table in the INTERCOM article. R. G. Cunningham, Vice President for Research and Graduate Studies

Tickets available for "The Nutcracker"

Some tickets still remain for the Pittsburgh Ballet Theatre's production of *The Nutcracker* at 8:30 p.m. on Saturday, Dec. 3, and at 2 p.m. on Sunday, Dec. 4. Both performances, which are under the auspices of the Artists Series, will be in Eisenhower Auditorium.

Tchaikovsky's *Nutcracker* has become a Christmas classic among American ballet companies. It tells the story of a little girl, Clara, who is given a magic nutcracker which comes to life and transports her to a marvelous fantasy world, complete with a Sugar Plum Fairy, snow princes and princesses, toy soldiers and dancing flowers. Its charm appeals to audiences of all ages.

Founded in 1969 by Nicholas Petrov, the Pittsburgh Ballet Theatre is under the artistic direction of John Gilpin. Mr. Gilpin began his career with the Ballet Rambert and later performed with Roland Petit's Ballet de Paris. He joined the London Festival Theatre in 1950 when that company was founded and remained its principal dancer for the rest of his dancing career, partnering such famous ballerinas as Margot Fonteyn, Alexandra Danilova and Violetta Verdy.

Tickets for the Dec. 3 and 4 performances of *The Nutcracker* will be on sale at the Artists Series HUB Booth and Eisenhower Auditorium today (Dec. 1) and Friday, Dec. 2, from 9 a.m. to 4 p.m.

News in Brief

Winter snow removal plans announced

To help reduce snow removal costs this winter, snow will not be cleared from faculty-staff parking lots, except in cases of a major snowfall, according to Ralph E. Zilly, vice president for business. Parking in the lots will therefore not be restricted between the hours of 2:30 and 6 a.m. from Dec. 1 to March 15, as in the past. Snow will be removed from parking lots only when three or more inches accumulate.

"For this program to work, the cooperation of the entire University community is needed," Mr. Zilly said. "When there is a heavy snowfall, all vehicles will still need to be moved from the parking lots in the early hours for the snow removal crews to operate efficiently."

Mr. Zilly noted that additional savings will be achieved through eliminating the need for posting the areas with parking restriction signs and for enforcing the restriction.

The priority for snow removal will be roadways, sidewalks and then parking areas. Anti-skid materials will be utilized as necessary to help to prevent accidents.

Social Security deductions to rise next year

As of Jan. 1, 1978, earnings up to \$17,700 will be subject to Social Security withholding. This is a \$1,200 increase from the current base of \$16,500. The rate of contribution for all earnings under \$17,700 will also be increased from 5.85 percent to 6.05 percent.

The maximum Social Security tax an employee will pay in 1978 under current legislation will be \$1,150.50. However, legislation is presently under consideration in Congress which would further increase the 1978 tax. Should the proposed legislation become law, an update on the 1978 Social Security tax structure will appear in this publication.

Christmas mail schedule

During the period that offices are closed at University Park for the Christmas holiday, from 5 p.m. Wednesday, Dec. 21, to 8 a.m. Wednesday, Dec. 28, interdepartmental mail service and U.S. mail service will be suspended.

If any department has a special need for delivery of incoming U.S. mail on Dec. 22, 23, 26 and 27, University Mail Service should be notified at 865-5602 before 5 p.m. on Friday, Dec. 16, so that arrangements can be made with the U.S. Postal Service.

A department requesting this service must assign an employee to be at work in the building at a specified time to receive not only the department's mail but also all incoming mail for the building in which the department is housed. This is necessary because the U.S. Postal Service sorts incoming mail by building and not by department.

Senate to debate 8-week drop rule at Dec. 6 meeting

A University Faculty Senate subcommittee will recommend that Senate Policy 34-89 — the "eight-week drop rule" — be maintained in its present form, when the Faculty Senate meets on Tuesday, Dec. 6.

Critics of the policy have charged that it lowers the University's academic standards by serving as an escape for students whose performance in a course has not been good.

But following a review of the rule, the Subcommittee on Academic Standards of the Senate Committee on Academic and Athletic Standards has concluded that allowing students to drop courses late in the term does not appear to have lowered standards.

The subcommittee will recommend that the present policy be maintained unless subsequent review indicates that it has been detrimental.

In its report, the subcommittee will point out that before the current policy was enacted in spring 1976, students were allowed to drop courses up to three weeks into the term. After the third week, students could drop a course when there were "extenuating circumstances."

The subcommittee will argue that the policy was inequitable since decisions were made on a College or Campus basis, and it was therefore easier for some students than for others to drop courses.

Under the current policy, students are allowed to drop courses with a WF, WN, or W (Withdraw — Failing, Withdraw — No grade, or Withdraw — Failing) on their transcripts from the beginning of the fourth through the end of the eighth week of any term. If a student withdraws before the fourth week, there is no notation on the transcript.

The subcommittee will also recommend that the Provost consider raising the filing fee for course drops between the fourth and eighth weeks and that he consider abolishing the administrative fee waiver for the period.

Currently, there is a \$2 fee for dropping a course, but according to the subcommittee, that fee does not cover administrative costs and does not call attention to the difference between late drops and conventional drops.

During the portion of the meeting devoted to forensic business, the senators will discuss possible actions by senators and other faculty members that might be helpful in the University's current fiscal crisis.

The Senate will also hear two extensive informational reports, one on the progress of basic skills programs in English and mathematics and one on the distribution of grades within the University for the past academic year.

In other action, the Senate will receive a recommendation that future legislative proposals involving major new programs be accompanied by documented cost estimates. That proposal will be presented by the Senate Committee on Planning and Development.

The committee will point out that the proposal is being made to ensure that

(Continued on page 5)

Dr. Mueller honored posthumously with the National Medal of Science

The late Dr. Erwin W. Mueller, Evan Pugh professor emeritus of physics, was honored Nov. 22 with the National Medal of Science, presented by President Jimmy Carter in ceremonies in the Old Executive Office Bldg. in Washington, D.C.

He is the first Penn State faculty member to be so recognized.

The Nation's highest award for distinction in science and engineering, the medal was accepted by Dr. Mueller's daughter, Mrs. Richard Schwab of Harrisburg, Pa. Dr. Mueller's widow, Klara, died on Aug. 6, 1977, three months after her husband's death.

One of the University's most distinguished faculty members, Dr. Mueller passed away on May 17, 1977, in Washington, D.C., after suffering a stroke on April 27 at a meeting of the National Academy of Sciences.

Dr. Mueller was internationally known for his discoveries of field desorption, field ionization at surfaces, field evaporation of metals and fundamental effects in electron and atomic physics.

He was the inventor of the field ion microscope that enabled him in 1955 to be the first person to see an atom by imaging the individual constituents of a crystal. The instrument is still the world's most powerful microscope.

Earlier, he had invented the field emission microscope and the atom probe, the most sensitive microanalytical tool ever devised.

In 1975, Dr. Mueller was elected to both the National Academy of Sciences and the National Academy of Engineering.

Dr. Mueller joined the Penn State faculty in 1952, was appointed Evan Pugh professor of physics in 1968, and retired in 1976 with emeritus rank.

Penn Staters

Dr. George W. Gokel, assistant professor of chemistry, recently presented invited lectures at the University of Maryland and at Grace Chemical Company, Columbia, Md. He lectured on the subject, "Chemistry, in Mixed-Phase Media."

Dr. A. Daniel Frankforter, assistant professor of history at Behrend College, is the author of a book which explores the integration of the Christian church with the historical evolution of European society. Published by Nelson-Hall and titled *A History of the Christian Movement: The Development of Christian Institutions*, the work discusses the growth of Christian organizations from the perspective of their historical causes.

Dr. Frankforter develops a model for the study of church history which explains changes in ecclesiastical structures, liturgy, and dogma as reactions to the larger social phenomena which have governed the evolution of European and American societies. The conclusion of the text is that the churches have tended to follow the general course of western history more than they have sought to resist or direct it. The primary service of the church to the state, therefore, has not been to inspire change, but to encourage stability by helping societies integrate new developments with sacred traditions.

John Balaban, associate professor of English, has been awarded a Creative Writing Fellowship for 1978 by the National Endowment for the Arts.

Dr. Jean MacCluer, associate professor of biology, has been elected to a three-year term on the Board of Directors of the Society for the Study of Social Biology. Earlier this fall, she presented an invited lecture in the Department of Biological Anthropology, Oxford University, England.

Dr. Philip S. Skell, Evan Pugh professor of chemistry, recently presented invited lectures at the University of Delaware, Carnegie Mellon University, Marquette University, Union Carbide Corp., and the IBM Thomas Watson Research Center. He discussed his new work with succinimide radicals.

Last month Dr. Skell was also elected to Fellowship in the New York Academy of Sciences.

Dr. Margaret A. Newman has been appointed professor of nursing, and will serve as professor-in-charge of the graduate programs in nursing. A graduate of Baylor University, Dr. Newman received the bachelor of nursing degree at the University of Tennessee and an M.S. in medical-surgical nursing at the University of California at San Francisco. Her Ph.D. in nursing science and rehabilitation nursing was granted by New York University.

Dr. Geoffrey L. Wilson, associate professor of engineering research at the Applied Research Laboratory, has been elected to the Board of Governors of the Audio Engineering Society and appointed chairman of its Education Committee.

R. Thomas Berner, assistant professor of journalism, recently conducted a newspaper layout seminar at the American Press Institute, Reston, Va. Editors from 35 daily newspapers published in the United States participated. Prior to that, Mr. Berner conducted a seminar on writing for 20 editors at the first Pennsylvania Press Institute, held at University Park.

Andrew D. Lunzi has been promoted to assistant professor of accounting in the College of Business Administration, effective Nov. 1. Dr. Lunzi received his Ph.D. from the University of Kansas last month.

Dr. Adam Anthony, professor of zoology, recently marked his 25th year of service. He joined the University as an assistant professor in 1952, was promoted to associate professor in 1957 and to professor in 1961.

One of the organizers of the College of Science's program in biophysics, he was also instrumental in establishing the interdisciplinary doctoral programs in physiology, bioacoustics, and bioengineering. He served as program director for bioacoustics research from 1956 to 1962, for altitude physiology from 1956 to 1970, and for various analytical histochemistry projects from 1965 to the present. He was also vice chairman of the physiology program from 1965 to 1970 and chairman from 1970 to 1973.

A specialist in the physiological and histochemical aspects of environmental stresses such as noise, oxygen lack and toxicants, he has directed or co-directed 50 master's degree and 30 doctoral theses. He is the author of more than 80 research papers published in scholarly journals.

A graduate of the State University of New York at Buffalo, he earned the M.S. degree at Marquette University and the Ph.D. at the University of Chicago, where he received the John M. Prather Award, a special research fellowship.

In 1966, 1968 and 1969, he won the Darbaker Awards in microscopical science from The Pennsylvania Academy of Science for research involving use of microscopic cytophotometry to investigate adaptive endocrine, lymphatic, and hemal responses to oxygen.

In 1971, he served as a participant in the World Health Organization Symposium on Environmental Pollution in Atlanta, Ga.

Active in University affairs, he has been a member of the Faculty Senate and numerous other University, College and department committees.

Obituaries

Dr. Bruce V. Moore, 86, who retired in 1952 as professor emeritus of psychology and as the first head of the Department of Psychology, died Nov. 14.

The first person in the country to receive a degree in industrial psychology, Dr. Moore earned his Ph.D. in 1921. A member of the faculty from 1920 to 1952, Dr. Moore was honored by Penn State in 1972 with the naming of Moore Bldg.

Dr. Moore's doctoral thesis, completed under the direction of Dr. E. K. Strong, resulted in the development of the Strong Vocational Interest Blank, the most widely used instrument of its kind in the country. He was also the author or co-author of several books and monographs.

Harold R. McCulloch, professor emeritus of agricultural extension and retired assistant director of the Cooperative Extension Service, died Nov. 17 at the age of 76. He had retired in 1963 after 39 years at Penn State.

A 1924 graduate of the University in animal husbandry, he earned his M.S. in that discipline at Ohio State. From 1947 to 1969, Mr. McCulloch served as secretary of the Pennsylvania Farm Show Commission.

Dr. William H. Gotolski, professor of civil engineering and assistant dean for resident instruction in the College of Engineering, is marking his 25th year at the University.

Dr. Gotolski joined the Penn State faculty as an instructor in 1952 after serving as an instructor at Ohio University. A graduate of Columbia University, where he earned B.S. and M.S. degrees in civil engineering, Dr. Gotolski received his Ph.D. in civil engineering from Penn State. His research interest lies in the areas of the durability of asphalt concrete pavements and in methods for predicting the occurrence and effects of scour and fill on ocean bottom structures and foundations.

A Fellow of the American Society of Civil Engineers, Dr. Gotolski is a past president of the Central Pennsylvania section of that society. Since 1965 he has served as the University's liaison to the National Academy of Sciences' Transportation Research Board. He has also been a consultant to various companies and State agencies and is the author of numerous research articles.

Dr. Edwin L. Herr, professor and head, Division of Counseling and Educational Psychology, has received the first annual Outstanding Practitioner Award of the Pennsylvania Association for Counselor Education and Supervision. The presentation was made at the annual convention of the Pennsylvania Personnel and Guidance Association in Pittsburgh on Oct. 28.

Faculty Club News

Alumni eligible for Faculty Club membership

Members of the Faculty Club, by a vote of 278 to 51, have agreed to open the membership to eligible alumni. To be eligible, a candidate must have received a degree from the University and belong to the Penn State Alumni Association. Dues for alumni members have been set at \$90 a year.

Holiday banquets Dec. 9, 12

The Penn State Singers, directed by Raymond Brown, will provide the music for two Christmas programs to be held at the Faculty Club.

The traditional Wassail Bowl will be offered Friday, Dec. 9, at 6:30 p.m., followed by dinner at 7:30 p.m. Monday, Dec. 12, has been set aside for families who will be welcomed to a 7 p.m. banquet.

The Singers, a select group of about 25 members chosen from 350 candidates, have prepared a varied program, which includes: *Gloria by Dufay*; *Hodie Christus Natus Est*, *Gabrieli*; *Break Forth*, *O Bounteous Heavenly Light* and *Gloria Sei Dir Gesungen*, Bach; *The Blessed Son of God*, *Wassail Song* and *No Sad Thought Has Soul Affright*, Vaughan Williams; *The Holly and the Ivy*; *In the Bleak Midwinter*, Holst; *A Boy Was Born* and *A Shepherd's Carol*, Britten; *A Song Against Bore*, Kruehenbuehl; *What Choler*, Walton; and *The Shepherd's Story*, Dickinson.

Reservations may be made by phoning 865-1982.

Seminars

Friday, Dec. 2

Surface Science, Michael Wortis, University of Illinois, on "Helium Monolayers, Lattice Gases and Phase Transitions of the Triangular Ising Model," 1 p.m., Room 339 Davey.

Monday, Dec. 5

Biochemistry and Biophysics, Peter Nicholls, Brock University, on "Poisons as Probes: Ligand Binding to Cytochrome c Oxidase," 3:55 p.m., Room 101 Allhouse. Computation Center, "JCL," (4 of 5), introductory programming background suggested, 7:30 p.m., Room 110 Osmond.

Tuesday, Dec. 6

Computation Center, "Portability of Mathematical Software," 2:20 p.m., Room 110 Comp. Bldg. Plant Pathology, Samuel H. Smith on "Active and Passive Mechanisms of Plant Disease Resistance," 3:55 p.m., Room 213 Buckhout.

Thursday, Dec. 8

Chemistry, John E. Bercaw, California Institute of Technology, on "Recent Advances in Biological Nitrogen Fixation," 12:45 p.m., Room 333 Whitmore. History, Dan P. Silverman on "Financial Crisis in Post-War Europe, 1918-1922. Bad Theory, Bad Practice, or Bad Luck?" 2:30 p.m., Room 124 Sparks.

Physics, Robert Griffiths, Carnegie Mellon University, on "An Introduction to Multicritical Points," 3:50 p.m., Room 117 Osmond. Philosophy, Thomas Seeshorn on "On the Deduction of Categories," 4 p.m., Room 69 Wilard.

Computation Center, "JCL," (5 of 5), introductory programming background suggested, 7:30 p.m., Room 110 Osmond.

Friday, Dec. 9

Chemical Engineering/Catalysis, Dane C. Grenoble, Exxon, on "The Kinetics of the Water Gas Shift Reaction Over Group VIII Metals," 3:45 p.m., Room 101 Allhouse.

New computer research seminar series set up

A new seminar series on the research applications of computers has been established by the Department of Computer Science and the Computation Center. It will be held on Tuesdays at 1 p.m. in Room 235 Whitmore Laboratory.

According to the series organizer, Dr. Paul A. D. Delaine, professor of computer science, the seminars will be interdisciplinary in nature and speakers will be drawn from universities and industry.

Dr. Delaine will be the first speaker on Dec. 6. He will discuss "Automatic Deductive Systems for the Physical Sciences." Other dates, speakers and topics scheduled so far are: Dec. 13, Dr. Gerald G. Johnson, associate professor of computer science, "Image Processing"; Jan. 10, Charles Forney, assistant director of the Computation Center, "Contrasts Between MVT and MVS"; Jan. 17, Dr. Peter Jurs, associate professor of chemistry, "Computer Assisted Studies of Chemical Structures Related to Biological Activities"; Jan. 24, Dr. Francis Vastola, professor of fuel science, "Mini-Micro Computer Network Systems"; and Jan. 31, Dr. E. Gudes, assistant professor of computer science, "Research Problems in the Database/Operating System Interface."

Department of Public Information and Relations

Telephone: (814) 865-7517

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Items to be included in the calendar should be sent to the Calendar Editor, Room 312 Old Main, by Thursday of the week preceding publication.

Second-class postage paid at State College, Pa. 16801

University Park Calendar

WINTER TERM 1977-78

Thursday, Dec. 1
Winter term classes begin, 8 a.m.
france-cinema, *Truffaut, Small Change*, 7 and 9 p.m., Room 112 Kern.

Friday, Dec. 2
College of Education lecture, Beverly Rowe on "Software for the Social Sciences," 2:30 p.m., Room 112 Kern.
france-cinema, *Small Change*, 7 and 9 p.m., Room 112 Kern.
Sports: men's swimming and diving relays, 8 p.m.; wrestling, Penn State Invitational. Artists Series, Pittsburgh Ballet Theatre, *The Nutcracker*, 8:30 p.m., Eisenhower Auditorium.

Saturday, Dec. 3
Sports: wrestling, Penn State Invitational: men's swimming and diving relays; men's fencing, vs. Maryland, 1 p.m. Artists Series, Pittsburgh Ballet Theatre, *The Nutcracker*, 8:30 p.m., Eisenhower Auditorium.

Sunday, Dec. 4
University Chapel service. Mr. Charlie "Tremendous" Jones, author, businessman, Harrisburg, 11 a.m., Eisenhower Chapel.
Faculty Club brunch/theatre party, 12:30 p.m., Faculty Club.
Ice U registration, 1-6 p.m., HUB ballroom.
Sports: men's and women's bowling, vs. Maryland, 1 p.m.

Artists Series, Pittsburgh Ballet Theatre, *The Nutcracker*, 2 p.m., Eisenhower Auditorium.
Shaver's Creek Nature Center, Wreaths and Other Holiday Decorations workshop, 2 p.m., Stone Valley.
Phi Beta Kappa annual Founder's Day sherry party, spouses included, 3-5 p.m., Fireside Room, Nittany Lion Inn.
SA, John Jackson, In Concert, 8 p.m., Room 112 Kern.
Late Livingston, bantone, 8:30 p.m., Music Bldg. recital hall.

Week of Dec. 5

Monday, Dec. 5
Vashekiv Galleries print sale, through Dec. 9, 9 a.m.-6 p.m., HUB gallery.
Intramural sports: women's racquetball (single elimination) entry open. Entry close, noon, Dec. 8.
france-cinema, *Truffaut, Small Change*, 7 and 9 p.m., Room 112 Kern.
Sports: men's basketball, vs. Delaware, 7:30 p.m.
Ice U course initiators meeting, 8 p.m., HUB reading room.

Tuesday, Dec. 6
Last date for meetings involving Commonwealth Campus faculty.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Ice U classes begin.
Journals of the Museum of Art Gallery Talk, Kenneth Beittel, PSU, on "Potters East and West," 10:30 a.m., Museum of Art.
Penn State Outing Club meeting, 7:30 p.m., HUB ballroom.

Phi Beta Kappa, Dr. Obaid will speak, 8 p.m., Room 101 Kern.

Wednesday, Dec. 7
Last date for registering with foreign language departments (other than French and Spanish) for written language examinations.
Sports: men's swimming, vs. St. Bonaventure, 4 p.m.; men's basketball, vs. Virginia Tech, 8:30 p.m.
Commonplace Theatre, *The Eiger Sanction*, 7:30 and 9:30 p.m., Room 112 Kern.
Artists Series Film Festival, American Film Theatre, Anton Chekhov, *Three Sisters*, 8 p.m., Eisenhower Auditorium.
Symphony Quintet, 8:30 p.m., Music Bldg. Recital hall.

Thursday, Dec. 8
Used Ministry, panel discussion of "Penn State as a Community Beyond the Academy," with Walter E. Freeman, Division of Community Development, and George R. Hudson, Division of Counselor Education and Educational Psychology, 7:30 p.m., Room S-205 Henderson.

Friday, Dec. 9
Sports: wrestling, vs. Buffalo, 4 p.m. (EWL meet).
Raymond Brown and the Penn State Singers, wassail bowl, holiday banquet, 6:30 p.m., Faculty Club.
france-cinema, *Carne, Bizarre, Bizarre*, 7 and 9 p.m., Room 112 Kern.
East Halls Residence Association concert, Steve Wyncopp, HUB ballroom.
Raymond Page, viola, 8:30 p.m., Music Bldg. recital hall.

Saturday, Dec. 10
Sports: coed rifle, vs. Youngstown, 10 a.m.; women's basketball, vs. Immaculata, 1 p.m.; men's fencing, vs. Montclair State, 1 p.m.; wrestling, vs. N.C. State, 4 p.m.; men's basketball, vs. N.C. State, 7:30 p.m.
OTIS Casino Night, 7:30 p.m., HUB ballroom.

Sunday, Dec. 11
University Chapel service. Dr. Joseph E. O'Donnell, Jr., Andover Newton Theological School, 11 a.m., Eisenhower Chapel.
Sports: men's and women's bowling, vs. Montgomery, 1 p.m.
Shaver's Creek Nature Center, Natural Materials Crafts workshop, registration necessary - 865-1851, 2 p.m., Stone Valley.
Messiah Sing-In, 3:30 p.m., Eisenhower Auditorium.
Brent Wissick, 'cello, 3:30 p.m., Music Bldg. recital hall.

Week of Dec. 12

Monday, Dec. 12
Add deadline.
Intramural sports: men's graduate student and faculty/staff racquetball (round robin) entry open. Entry close, noon Dec. 15.
Eco-Action film, "Living the Good Life," 10 a.m.-3 p.m., HUB assembly hall.
Focus on Sweden folk dancing, noon, HUB gallery: Lucia Celebration, 7:30 p.m., HUB reading room.
france-cinema, *Bizarre, Bizarre*, 7 and 9 p.m., Room 112 Kern.
Raymond Brown and the Penn State Singers, family holiday banquet, 7 p.m., Faculty Club.
Penn State Percussion Ensemble, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Dec. 13
Eco-Action film, "Living the Good Life," 10 a.m.-3 p.m., HUB assembly hall.
Hetzl Union Board, Trim the Tree workshop, 11 a.m.-2 p.m., HUB north lounge.
Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club, Olga Ragusa, Columbia University, on "On Being an Editor."
Sports: wrestling, vs. Florida, 7:30 p.m.
Artists Series Film Festival, Keaton, *One Week: The Boat; Steamboat Bill, Jr.*, 8 p.m., Eisenhower Auditorium.
Department of Spanish, Italian and Portuguese lecture, Olga Ragusa on "Ghosts, Spirits and Characters in Search of Pirandello," 8 p.m., Room 112 Kern.

Wednesday, Dec. 14
Last date for March graduates to activate diploma cards in Registrar's Office and pay thesis fees at Bursar's Office.
Hetzl Union Board Christmas Craft demonstration, 11 a.m.-2 p.m., HUB main lounge.
Africa Studies Forum, Gerald Moser, PSU, on "The Lusophone (Portuguese Language) Literature of Africa Since Independence," 7:30 p.m., Room 101 Kern.
Commonplace Theatre, *Lenny*, 7:30 and 9:30 p.m., Room 112 Kern.
Sports: wrestling, vs. Cal Poly, 7:30 p.m.
Composer's Concert, 8:30 p.m., Music Bldg. recital hall.

Thursday, Dec. 15
Christmas Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.
Hetzl Union Board Holiday Fireside Chat, 7:30 p.m., HUB reading room.
Japanese language and literature films, 7:30 p.m., HUB assembly hall. "Our Ancestor The World of 'Jomon'." "Culinary Art of Japan." "Noh, Medieval Lyric Drama," and "Kabuki, Classic Theatre."

Friday, Dec. 16
Christmas Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.
Hetzl Union Board film, *Oliver*, 7:30 p.m., HUB assembly hall.
Sports: gymnastics, vs. Michigan State, 8 p.m.
David Vogel, viola, 8:30 p.m., Music Bldg. recital hall.

Saturday, Dec. 17
Hetzl Union Board film, *Oliver*, 1 and 7:30 p.m., HUB assembly hall.
Sports: women's swimming, vs. Rutgers, 1:30 p.m.; men's swimming, vs. Rutgers, 4 p.m.
Graduate Commons Madrigal Dinner, 6:30 p.m., Room 102 Kern.
france-cinema, *Demy, Donkey Skin*, 7 and 9 p.m., Room 112 Kern.
Faculty Club, Winter Holiday Ball, 9 p.m., Faculty Club.

Sunday, Dec. 18
University Chapel service. Christmas Concert, All Faith Choir, 11 a.m., Music Bldg. recital hall.
Hetzl Union Board film, *Oliver*, 1 and 7:30 p.m., HUB assembly hall.
Shaver's Creek Nature Center, Birdhouse and Feeder Building workshop, registration necessary - 865-1851, 2 p.m., Stone Valley.
Penn State Glee Club, 3 p.m., Eisenhower Auditorium.
Graduate Commons Madrigal Dinner, 6:30 p.m., Room 102 Kern.
france-cinema, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.

Week of Dec. 19

Monday, Dec. 19
Passfall deadline.
John Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, Dec. 20
Winter term recess begins, 9:55 p.m.
Passfall deadline.
ARL Awards Day program, 3:30 p.m., Room 112 Kern.

Thursday, Dec. 22
Holiday, University offices closed.

Friday, Dec. 23
Holiday, University offices closed.

Sunday, Dec. 25
Christmas Day, holiday.

Week of Dec. 26

Monday, Dec. 26
Holiday, University offices closed.

Tuesday, Dec. 27
Holiday, University offices closed.

Week of Jan. 2

Wednesday, Jan. 4
Winter term classes resume, 8 a.m.
Drop deadline.
Passfall deadline.
Course repeat deadline.
Pre-registration deadline (spring term 1978).
Commonplace Theatre, *Five Easy Pieces*, 7:30 and 9:30 p.m., Room 112 Kern.
Sports: men's basketball, vs. Rutgers, 7:30 p.m. (EAA game).

Thursday, Jan. 5
Last date for written foreign language examinations (other than French and Spanish) for advanced-degree candidates.

Friday, Jan. 6
Sports: women's basketball, Penn State invitational.
Artists Series, Tokyo String Quartet, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 7
Last date for March graduates to deliver doctoral theses to Committee.
Shaver's Creek Nature Center, Cross-Country Ski workshop, 9 a.m.-noon; How Plants Were Named, 8 p.m., Stone Valley.
Sports: women's basketball, Penn State invitational; men's basketball, vs. Duquesne, 7:30 p.m. (EAA game).

Sunday, Jan. 8
University Chapel service. Dr. Robert L. Cohn, PSU, 11 a.m., Eisenhower Chapel.
Sports: men's and women's bowling, vs. Drexel, 1 p.m.
Shaver's Creek Nature Center, Winter Discovery Walk, 2 p.m., Stone Valley.
france-cinema, *Truffaut, Day for Night*, 7 and 9 p.m., Room 112 Kern.

Week of Jan. 9

Monday, Jan. 9
france-cinema, *Day for Night*, 7 and 9 p.m., Room 112 Kern.
Robert Trehy, baritone, all Schubert recital, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Jan. 10
Fixed date for meetings involving Commonwealth campus faculty.
University Faculty Senate meeting, 1:10 p.m., Room 112 Kern.
Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Robert Hume, English, on "The Coke Papers: New Light on the Introduction of Italian Opera to England."

Wednesday, Jan. 11
Commonplace Theatre, *Harold and Maude*, 7:30 and 9:30 p.m., Room 112 Kern.
Sports: men's basketball, vs. Syracuse, 7:30 p.m.
Artists Series Film Festival, American Film Theatre, Simon Gray, *Butley*, 8 p.m., Eisenhower Auditorium.
Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, Jan. 12
Sports: wrestling, vs. Oklahoma, 7:30 p.m.
Artists Series, Orchestra Camerata of Salzburg, 8:30 p.m., Eisenhower Auditorium.

Friday, Jan. 13
Board of Trustees meeting, Room 402 Keller.
Hillel films, *Harold and Maude* and *Star Trek Bloopers*, 7 p.m., HUB assembly hall.
Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.
Shaver's Creek Nature Center, Owl Prowl, 8 p.m., Stone Valley.
Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. Recital hall.

Saturday, Jan. 14
Last date for final oral doctoral examinations for March graduates.
Last date for March graduates to deliver master's theses or papers to adviser.
Board of Trustees meeting, Room 402 Keller.
Faculty Women's Club, Mid-Winter Coffee, honoring Trustees' wives, 9:30-11:30 a.m., Faculty Club.

Sports: men's and women's bowling, vs. Penn State-Capitol, 1 p.m.; wrestling, vs. Cleveland State, 2 p.m. (EWL meet).
Shaver's Creek Nature Center, Children's Story Hour, 2 p.m., Stone Valley.
Hillel films, *Harold and Maude* and *Star Trek Bloopers*, 7 p.m., HUB assembly hall.

Sunday, Jan. 15
University Chapel service. Dr. David Shannon, Luther King, Jr. Service, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Ice Fishing and Fly Tying, 2 p.m., Stone Valley.
france-cinema, *Tati, Playtime*, 7 and 9 p.m., Room 112 Kern.

Hill) films, *Harold and Maude* and *Star Trek* Bloopers, 7 p.m., HUB assembly hall.

Week of Jan. 16

Monday, Jan. 16

Deadline for completed applications for IAHS Research Fellowships for summer and fall terms; Ishbel Cottage.

france-cinema, *Playtime*, 7 and 9 p.m., Room 112 Kern.

PSU Baroque Ensemble, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Jan. 17

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. John Kaser, Libraries, on "An Actress: On Paper, On the Stage and In Brazil."

Artists Series Film Festival, Lloyd, *Never Waken and Why Worry?* 8 p.m., Eisenhower Auditorium.

Wednesday, Jan. 18

Commonplace Theatre, *Steppenwolf*, 7:30 and 9:30 p.m., Room 112 Kern.

Friends of the Museum of Art Gallery Talk. Fredenck R. Matson, PSU, on "The Pottery of Ancient Egypt and Their Present-Day Descendants: The Importance of Pottery in Human History," 8 p.m., Museum of Art.

University Theatre, student preview, *The Runner Stumbles*, 8 p.m., Pavilion Theatre. Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, Jan. 19

Central Pa. Society of the Archeological Institute of America, Arielle Kozloff, Cleveland Museum of Art, on "International Politics and Art of Tutankhamen's Egypt," 8 p.m., Room 101 Kern.

University Theatre, Milan Stitt, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Friday, Jan. 20

Sports: men's basketball, vs. Massachusetts, 7:30 p.m., (EAA game).

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Artists Series, New York Renaissance Band, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 21

Sports: men's fencing, vs. William Patterson and Ohio State, 9 a.m.; men's and women's bowling, vs. Bloomsburg, 1 p.m.; women's fencing, vs. Ohio State, 1 p.m.; women's swimming, vs. Pittsburgh, 1:30 p.m.; men's swimming, vs. Pittsburgh, 4 p.m.

Phi Who Folies, 11 a.m.-6 p.m., HUB ballroom. france-cinema, International Animation Festival, 7 and 10 p.m., and *Last Year at Marienbad*, 8:15 p.m., Room 112 Kern.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Sunday, Jan. 22

University Chapel service. Dr. Theodore Kiefer, PSU, 11 a.m., Eisenhower Chapel. Shaver's Creek Nature Center, Family Nature Movies, 2 p.m., Stone Valley.

Cynthia Schade, Dute, 3:30 p.m., Music Bldg. recital hall.

france-cinema, International Animation Festival, 7 and 10 p.m., and *Last Year at Marienbad*, 8:15 p.m., Room 112 Kern.

Sports: men's volleyball, Nittany Lion Invitational.

Week of Jan. 23

Monday, Jan. 23

Coaly Society Speaker's Contest, 6:30 p.m., HUB assembly hall.

Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, Jan. 24

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Peter Lewis, Geography, on "Signs on the Land."

Sports: women's swimming, vs. West Chester, 4 p.m.; women's basketball, vs. Pittsburgh, 7 p.m.

Coaly Society Speaker's Contest, 6:30 p.m., HUB assembly hall.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Wednesday, Jan. 25

Coaly Society Speaker's Contest, finals, 6:30 p.m., HUB assembly hall.

Commonplace Theatre, *Engorged of the North*, 7:30 and 9:30 p.m., Room 112 Kern.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Thabia Trio, 8:30 p.m., Music Bldg. recital hall.

Thursday, Jan. 26

Last date for submission of spring term reserve reading lists, Room W2, Pate.

Japanese language and literature films, 7:30 p.m., HUB assembly hall.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Friday, Jan. 27

Campus 4-H Club Square Dance, 8 p.m., HUB ballroom.

Sports: gymnastics, vs. York (Canada), 8 p.m. University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Saturday, Jan. 28

Shaver's Creek Nature Center, Adventure Series, for children 7 and older, 10 a.m.-3 p.m.; Fireside Reading, 8 p.m., Stone Valley.

Sports: women's basketball, vs. Rutgers, 2 p.m.; men's basketball, vs. Pittsburgh, 7:30 p.m., (EAA game).

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Jan. 29

University Chapel service. The Rev. Charles L. Coleman, PSU, 11 a.m., University Chapel.

USG Flea Market, noon-9 p.m., HUB ballroom.

Shaver's Creek Nature Center, History Walk, 2 p.m., Stone Valley.

france-cinema, Robert, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern.

Week of Jan. 30

Monday, Jan. 30

Last date for March graduates to deliver theses to Graduate School.

Last date for Departments to certify to Graduate School completion of required papers for March graduates.

First day for signing spring term NDLS and University Long Term Loans, Room 108 Shields.

USG Flea Market, 11 a.m.-5 p.m., HUB ballroom.

france-cinema, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern.

Nancy Ackerman, organ, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Jan. 31

USG Flea Market, 11 a.m.-5 p.m., HUB ballroom.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. James Swency, History, on "The Life and Letters of Innocent III."

Sports: women's basketball, vs. Cortland, 7 p.m.

Wednesday, Feb. 1

USG Flea Market, 11 a.m.-9 p.m., HUB ballroom.

Afro-American Studies Forum, Beverly Lindsay, PSU, will speak, 7:30 p.m., Room 101 Kern.

Commonplace Theatre, *High Sierra*, 7:30 and 9:30 p.m., Room 112 Kern.

Claremont Quintet, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 2

Sports: men's and women's bowling, ACU Region 1 Tournament; men's basketball, vs. Marquette, 7:30 p.m.

Friday, Feb. 3

Sports: men's and women's bowling, ACU Region 1 Tournament.

Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Artists Series. Pittsburgh Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Saturday, Feb. 4

Sports: men's and women's bowling, ACU Region 1 Tournament; women's fencing, vs. J. Madison and Cornell, 9 a.m.; coed rifle, vs. N.Y., 10 a.m.; men's fencing, vs. Cornell, 1 p.m.; men's volleyball, vs. Nyack, 1 p.m.

(ECVL game); women's basketball vs. Shippensburg, 2 p.m.; men's swimming, vs. Temple, 2 p.m.; wrestling, vs. Navy, 2 p.m.; gymnastics, vs. So. Connecticut, 7:30 p.m.

Shaver's Creek Nature Center, Winter Stars, 8 p.m., Stone Valley.

Artists Series. Pittsburgh Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Feb. 5

University Chapel service. Miss Mary Marks, Pittsburgh Theological Seminary, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Snow and Ice, 2 p.m., Stone Valley.

france-cinema, Jaecquin, *The Story of O*, 7 and 9 p.m., Room 112 Kern.

Week of Feb. 6

Monday, Feb. 6

Sports: women's basketball, vs. East Stroudsburg, 7 p.m.

france-cinema, *The Story of O*, 7 and 9 p.m., Room 112 Kern.

Philip Detton, piano, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Feb. 7

Fixed date for meetings involving Commonwealth Campus faculty.

Bloodmobile, HUB ballroom.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Alegria Bendaek, Comparative Literature, Schuykill, will speak.

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Black Studies film, Xala by Senegal's Ousmane Sembene, 7 p.m., Roberts Cultural Center.

IAHS/French Dept., Theatre du Double. Diderot, *Le Sarpement au voyage de Bougainville*, 8:30 p.m., Eisenhower Auditorium.

Wednesday, Feb. 8

Lat drop deadline.

Last day for signing winter term NDLS and University Long Term Loans, Room 108 Shields.

Bloodmobile, HUB ballroom.

Commonplace Theatre, *Key Largo*, 7:30 and 9:30 p.m., Room 112 Kern.

Sports: men's basketball, vs. Temple, 7:30 p.m.; men's swimming, vs. Bucknell, 7:30 p.m.

Artists Series Film Festival, American Film Theatre, Eugene O'Neill, *The Iremas Cometh*, 8 p.m., Eisenhower Auditorium.

University Theatre, student preview, *Thieves' Carnival*, 8 p.m., The Playhouse.

Artists Series, La Chambre du Roy, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 9

Faculty Women's Club Lecture. Polly Eddy on "Is There Still a Job for the Volunteer?" 1:15 p.m., Memorial Lounge, Eisenhower Chapel.

University Theatre, Jean Anouilh, *Thieves' Carnival*, 8 p.m., The Playhouse.

Friday, Feb. 10

University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Penn State Brass Choral, 8:30 p.m., Music Bldg. recital hall.

Saturday, Feb. 11

Sports: coed rifle, vs. Army and Lehigh, 10 a.m.; men's volleyball, vs. Cornell, 1 p.m., (ECVL game); women's basketball, vs. Ursinus, 2 p.m.

Shaver's Creek Nature Center, Nature Series for Children, 1-3 p.m., Stone Valley.

University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Sunday, Feb. 12

University Chapel service. The Rev. Ernest Hawk, PSU, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Insects in Winter, 2 p.m., Stone Valley.

france-cinema, Duras, *Destroy, She Said*, 8:30 p.m., Room 112 Kern.

Week of Feb. 13

Monday, Feb. 13

france-cinema, *Destroy, She Said*, 8:30 p.m., Room 112 Kern.

Rebecca McKee, viola, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Feb. 14

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Vickie Ziegler, German, will speak.

Artists Series Film Festival, Keaton, *Grand Slam Over, The Palace; The Electric House; Sherlock Jr.* 8 p.m., Eisenhower Auditorium.

University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Wednesday, Feb. 15

Fourth Annual Penn State Film Festival.

Sports: men's swimming, vs. Bloomsburg, 4 p.m.; men's basketball, vs. West Virginia, 7:30 p.m., (EAA game).

5 O'Clock Playwright's Theatre, 5:30 p.m., Pavilion Theatre.

Commonplace Theatre, *They Drive by Night*, 7:30 and 9:30 p.m., Room 112 Kern.

University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Thursday, Feb. 16

Fourth Annual Penn State Film Festival.

Sports: men's swimming, vs. Bloomsburg, 4 p.m.; men's basketball, vs. West Virginia, 7:30 p.m., (EAA game).

5 O'Clock Playwright's Theatre, 5:30 p.m., Pavilion Theatre.

Commonplace Theatre, *They Drive by Night*, 7:30 and 9:30 p.m., Room 112 Kern.

University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Friday, Feb. 17

Fourth Annual Penn State Film Festival.

5 O'Clock Playwright's Theatre, 5:30 p.m., Pavilion Theatre.

Commonplace Theatre, *They Drive by Night*, 7:30 and 9:30 p.m., Room 112 Kern.

University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Artists Series, Paul Taylor Dance Company, 8:30 p.m., Eisenhower Auditorium.

Composer's Concert, 8:30 p.m., Music Bldg. recital hall.

Saturday, Feb. 18

Last date for submitting petition to Records Officer to graduate in absentia in March.

Sports: women's fencing, vs. Brockport, 9 a.m.; men's fencing, vs. Pace, 1 p.m.; women's swimming, vs. West Virginia, 1:30 p.m.; men's swimming, vs. West Virginia, 4 p.m.; wrestling, vs. Pittsburgh, 7 p.m., and vs. Syracuse, 9 p.m.

University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Artists Series, Paul Taylor Dance Company, 8:30 p.m., Eisenhower Auditorium.

Sunday, Feb. 19

University Chapel service. The Rev. Michael Scrogin, University Baptist Church, Stone Valley, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Animal Tracks and Traces, 2 p.m., Stone Valley.

Week of Feb. 20

Monday, Feb. 20

Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Steven Smith, piano, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Feb. 21

Sports: women's swimming, vs. East Stroudsburg and Clarion, 4 p.m.

Wednesday, Feb. 22

Last day for signing winter term Emergency Loans, Room 108 Shields.

Commonplace Theatre, *The Idiot*, 7:30 and 9:30 p.m., Room 112 Kern.

Winter term classes end, 9:55 p.m.

Thursday, Feb. 23

Final examinations.

Friday, Feb. 24

Final examinations.

Saturday, Feb. 25

Final examinations. Sports: men's volleyball, vs. Rochester, 1 p.m.

Week of Feb. 27

Monday, Feb. 27

Final examinations.

Thursday, March 2

Fixed date for meetings involving Commonwealth Campus faculty.

Sports: women's swimming, EIAIW Championships.

Friday, March 3

Fixed date for meeting involving Commonwealth Campus faculty.

Sports: women's swimming. EIAIW Championships.

Saturday, March 4

Commencement, 10:30 a.m., Rec. Bldg.

Sports: women's swimming. EIAIW Championships.

Exhibits

Chambers Gallery

David Van Dommelen and Karen Roth, fibers, Dec. 1-20.

Molly Terrill, paintings on paper, and PSU undergraduate and graduate Art students, glass, Jan. 9-25.

PSU Art Education graduate students, all media, Jan. 30-Feb. 21.

Earth and Mineral Sciences Museum

Open Tuesday - Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m., and by appointment. Mineral Industries Bldg.

Frost Entomological Museum

Open weekdays, 9 a.m.-noon and 1-4:30 p.m., Room 102 Patterson. Architecture of insects and related arthropods.

HUB Gallery

Jinx Webster, hand built pottery, Dec. 1-31.

Denise Cassie, candles, Dec. 1-31.

Model Railroad Club exhibit, Dec. 1-31.

Ukrainian Club exhibit, Dec. 1-31.

Kern Commons Gallery

International Christmas artifacts, Dec. 3-22.

Lim Byung Jin, Japanese paintings, Dec. 3-22.

Mary Cadu Rubenstein, prints, Jan. 3-14.

Lori Baldwin and Geza Tekeli, photos, Jan. 3-14.

Catholic Pa. Scholastic Art Awards, Jan. 14-48.

Harley Strunk, photographs, Jan. 28-Feb. 11.

Glenn Ziemke, glass, Jan. 28-Feb. 11.

African fabrics, Feb. 11-25.

Museum of Art

Open Tuesday - Sunday, noon-5 p.m. Tours, 2:30 p.m. on Sundays.

Lanny Sommes, poster art, through Dec. 21.

Kenneth Bettel, recent works, through Dec. 21.

John Koch, Models and Moments, through Dec. 21.

The First Five Years, anniversary show of selections from the permanent collection, opens Jan. 8.

Bill Dole, collage, Jan. 8-Feb. 26.

Robert Kulicke, jigsaw/junk paintings, opens Jan. 8.

Zoller Gallery

Open weekdays 8 a.m.-5 p.m., Saturday and Sunday, noon-5 p.m.

Student Holiday Exhibition and Sale, Dec. 13-18.

Major Contemporary Photographers, a traveling photo exhibition available through funding from the National Endowment for the Arts, Feb. 4-22.

BDR — Differing positions on the best way to prepare students

Editor's Note: INTERCOM offers the following comments as background while the Faculty Senate considers the report of its BDR Committee.

The report of the BDR Review Committee, if adopted, with exceptions similar to those listed, will not greatly affect the courses students take or redistribute teaching loads. It does, however, perpetuate an approach to general education that is counter to what some faculty feel is wise.

We seem to spend a great deal of effort attempting to assure quality through organization, exercises in taxonomy, promulgation of rules and regulations and many levels of review and approval. I am open to having it demonstrated to be otherwise, but I feel that the things that really count are the quality of the faculty and the quality of our students. Quality education does not emerge from lists of courses or partitioning of the faculty into boxes. In my opinion a high level of ordering or prescribing of electives that can be taken to fulfill requirements for graduation tends to foster dependence upon authority rather than a higher level of scholarship and responsibility for one's own scholarly development. The

assumption that students and faculty advisors are not capable of making wise decisions can be a self-fulfilling prophecy. There are those who would maintain that having been awarded a degree from a university should imply something more than having fulfilled the requirements for a scout merit badge in rock collecting after having gathered the prescribed number and types of rocks. Many people feel that the learning experience should include the right to make wrong decisions. The knowledge that the decision, as well as the consequences, rest with the individual and the exercise of making choices is also an enriching and maturing experience.

The report of the Ad Hoc Committee acknowledges the fact that there are courses that fulfill the BDR requirements scattered throughout the University by including a list of exceptions to the general principle they advocate. Their resolution states:

"BDR courses shall be offered only by the core colleges; exceptions must be approved by the Curricular Affairs Committee."

Some faculty object to the approval of a statement that is not true in fact at the present time and is not likely to be true in the future. The implication that if biology were to return to the College of

Agriculture it would not fulfill the BDR requirements or that fewer biology offerings would be suitable, or that if geosciences were to move to the College of Science all of its courses would be acceptable but now they are not seems to defy logic. Many of our curricula are highly structured in order to achieve proficiency in a profession. Do we need to further structure the education of students by limiting their choices of general education requirements? It would be wrong if a student in economics decided that a course in electrical engineering covering the theory of analog computers and taught by an inspired scholar interested him and he were to be dissuaded from enrolling because he could not do so and satisfy the BDR requirements. Would it really be better for the student to choose a less challenging elementary course in another field taught by a graduate assistant because it is on the "list"? Inspiring and thoughtful courses and faculty capable of enriching the life of students exist within all units of the University. I do not feel that the quality of the program a student follows is necessarily any better if we decide where those enriching courses are than if the student and his advisor decide. The knowledge and experiences that shape

our lives sometimes are acquired in unlikely places.

C. L. Hosler, Dean
College of Earth and Mineral Sciences

I strongly feel that at least three credits of Engineering and Technology should be required as a part of BDR. Some of the major engineering decisions (e.g., supersonic transport, nuclear energy, etc.) are undertaken by non-engineers. In view of this, it is essential to expose the university graduates to rudiments of technology. Engineering courses (Engr) 110, 111, 112, 113, 114, 120, 124, 125, 129, 200, 410, 450 and Aersp 126, 200 would serve the purpose. I would like to see a separate category, i.e. Engineering and Technology (3 credits), included in the BDR.

In a technological society such as ours a well-rounded citizen should be exposed to some aspects of technology (energy, transportation, engineering, medicine, power generation, etc.).

Budugur Lakshminarayana,
Professor of Aerospace Engineering

Not too long ago I was part of a small group who were entertaining a visiting Nobel scientist by buying him (and ourselves) dinner at the Corner Room. During a lull in the conversation, one of our number asked him what the mission of a university is. It took him several seconds to realize that his questioner wasn't kidding and one or two more to frame a reply. "The mission of a university," he said, "is to serve as a place where those who wish to work with the intellect may assemble for this purpose and train others who have the same goal." I have already had a number of occasions to borrow his statement of mission; it will permeate the following paragraphs, and I will continue to use it until I hear a better one.

Although at a large university many things are done, it is our supposition that all will make high-level use of the intellect. We will, as a natural consequence, be expected to turn out automotive engineers rather than car mechanics, agronomists rather than field hands, and industrial accountants rather than bookkeepers. What exactly is it that separates the one from the other? It is not necessarily native intelligence but the extent to which the intellect has been conditioned for the role it is to assume. There is, indeed, hardly any career in which the brain can function

with maximum effectiveness unless it has been adequately prepared for such activity. Also, because a university is not a v-tech school, it does not devote its attention exclusively to the career requirements of its students. College graduates, instead of spending every "off duty" minute viewed to a TV set or at the bowling alley, engage (don't they?) in citizenship and leisure-time activities which make at least modest demands of the intellect. The person who knows something, for example, about psychology, economics, physics, philosophy, biology, and history is, to my mind, a better bet to perform well as a voter, a member of a school board, a reader of novels, a vacationing sightseer, or an amateur breeder of roses than the person who does not. In short, it almost always profits the thinker to know something of the thoughts of thinkers who have been there before him.

Identifying what constitutes adequate preparation for intellectual activity is not nearly so troublesome as persuading some students that they ought to have this preparation. If math were not required of budding engineers, not a few would try to avoid it completely; and if English composition were not specified for biology majors, the average teaching load in the

Department of English would decrease markedly. All this is by way of saying that even within their own majors students will not automatically enroll in courses that are absolutely essential. But if we are appalled at the thought of the engineer who knows no math and the biologist who cannot arrange his thoughts in an orderly fashion on paper, what may we expect students to select when it comes to choosing subjects which do not touch in a direct way on their majors? What may we surely expect is that some, and especially those for whom high grades are imperative (such as premedical students), will elect courses that will be easy for them and yet not raise too many eyebrows. Still others, though not intimidated by rigor, will, when confronted by a seemingly endless menu of possibilities, make their selections for reasons which will not stand up under close scrutiny.

The Senate ad hoc Committee on BDR Review, in essence, is reaffirming the University's earlier position that not every conceivable combination of courses available at Penn State is calculated to condition the intellect for dealing with the many matters, career-related and other, that inevitably confront the thoughtful adult. Having decided that certain combinations are better suited to the purpose than others, the committee has

prepared a categorized listing of those subjects which traditionally have formed the foundation for activity in virtually every branch of human thought and recommended that no baccalaureate student leave Penn State without at least minimal exposure to several of the categories.

It should come as no surprise that much of the subject matter the committee feels should be used to satisfy the BDR requirements will be found in the core colleges. It is in these three colleges that the bulk of the "service load" for students in the professional colleges resides. These service courses, by and large, are the stepping stones to intellectual accomplishment in every subject matter represented at Penn State. It is for this reason that the committee's second recommendation, that "BDR courses should be offered only by the core colleges," would seem to be an entirely appropriate rule of thumb. Ample provision is made for exceptions, which must certainly be anticipated. Among the requests for exceptions, incidentally, will be one from me recommending that certain courses in the College of Science not appear on the final listing of approved BDR courses.

Thomas Wartik, Dean
College of Science

Funding Sources

For further information, call 865-1372

(296-1) The HEW Office of Education has announced a Jan. 12 deadline for new grant applications under its Women's Educational Equity Act (WEEA) Program. Continuation applications have an April 14 deadline. The program is twofold: (1) to develop the capacity of responding to nationwide problems, and (2) to develop products that can be used by others. It will not provide direct services to institutions, agencies or individuals. Both small grants (\$15K) and general grants (\$35-\$175K) will be funded. (Ref: WEEA guidelines) (CFDA 13.565)

(296-2) Grants for dissertation research in the area of health services are supported by the HEW/PHS National Center for Health Services Research (NCHSR). Eligible applicants must be enrolled in a doctoral degree program in the social, medical, management or health sciences and be planning dissertation research on an aspect of health care delivery. The total direct costs for the proposed research budget must not exceed \$25K. The next deadline is Feb. 1. (Ref: NCHSR Solicitation)

PSU ranks seventh in fund return

Penn State ranks seventh among 123 college and university endowment fund pools in average annual total return from endowments.

With an average total return of 13.12 percent for the year ending June 30, 1977, Penn State's results were only slightly below the gain reported for the endowment fund showing the highest return, according to information provided to Robert A. Patterson, senior vice-president for finance and operations.

The preliminary report on returns received was made by the National Association of College and University Business Officers, which is composed of 107 colleges and universities with an endowment that exceeds one billion dollars.

Penn State has two basic endowment funds. The June 30 market value of The Milton S. Eshesky Medical Center endowment was \$15,312,000 and the fund

produced \$1,054,000 in income. The Associated Trust Fund, which consists of money supporting about 200 University scholarships, had a market value of \$8,948,000 and the income was \$633,000.

The Penn State return of 13.12 percent during the past year included an income yield of more than 7 percent plus capital gains. The return was 15 percent greater than the 5.14 percent average for all of the reported endowment pools, and 27.52 percent greater than the Standard and Poor 500 Index of 0.46 percent for the year. Dow Jones Industrial Averages for the year showed a 4.45 percent loss.

During the three-year period which ended on June 30, 1977, Penn State's funds showed a total return of 1251 percent, and for the five-year period, 5.62 percent.

The funds have a five-year compound annual growth rate of about 5 percent and income has grown at the compound annual rate of 8.3 percent.

Senate

(Continued from page 1)

adequate attention is given to the fiscal impact of new proposals. Committee spokesmen will emphasize, however, that they do not want to imply that new proposals should be dropped from Senate consideration on the basis of cost. The Senate Committee on Committees and Rules will propose a change in the wording of the duties of the Senate Committee on Research. The editorial change has been requested by the latter committee.

In addition, the Senate Committee on Admissions, Records, and Scheduling will propose revisions, primarily editorial, to the Academic Policies and Procedures for Undergraduate Students. The changes are proposed in light of legislation passed last May on the retention and transfer of students in baccalaureate program majors.

News in brief

(Continued from page 1)

Kern Madrigal Dinner

The Graduate Commons will present its annual Madrigal Dinner/Concert at 6:30 p.m. on Saturday and Sunday, Dec. 17 and 18, in Room 102 Kern Graduate Bldg. The setting will be a 16th century English castle, replete with banners, shields, coats-of-arms, pine boughs, and shimmering candles. The King and his Court will preside over the feast, and court rules will be observed.

The menu will include the traditional Wassail Cup, fruit bowl and nuts, relish tray, rock cornish hen with chestnut stuffing, new potatoes, cranberries, oat cakes and jam, baked apples, and flaming plum pudding. Entertainment will be provided by the King's retinue of Madrigal Singers, court jesters, roving minstrels, brass and recorder quintets and trumpeters.

Tickets are \$6.50 adult and are available at the Kern Information Desk, or reservations may be placed by telephoning 865-1878. Early reservations are advised since this event is an annual sell-out.

HUB Christmas dinner

The HUB Terrace Room will offer its annual Christmas Candlelight Dinner on Thursday and Friday, Dec. 15 and 16, from 4:45 to 7 p.m. The menu features stuffed chicken breasts with walnut dressing, roast tip beef with Yorkshire pudding, golden fried fennel shrimp, pork with cranberry relish, veal paprika on noodles, and grilled chopped steak with mushrooms. For vegetables, diners have a choice of fresh winter or baked potatoes, sweet potato casserole, buttered peas and onions, French cut carrots and corn pudding.

Payroll deduction of local earned income tax

For many years, the University has deducted the local earned income tax for University Park employees residing in most areas of Centre County. These are the borough and township taxes assessed at 1 percent or less of earned income, except for certain large city areas.

The University is now extending this payroll deduction to cover all employees throughout the State, effective Jan. 1, 1978.

Commencing with the first paychecks issued in January, local earned income taxes will be deducted from all paychecks each pay period for transmittal to local tax collectors. The deductions will appear in the "Wage Tax" block of paycheck stubs, and will also be listed on each W-2 form at year-end as part of the total earnings statement.

New W-4 forms have been sent to all departments and Campuses of the University to be filled out completely by all employees who do not now have this tax deducted. The new forms are necessary to insure that the proper taxing districts are designated, and that all exemptions for federal tax withholding are current.

Your area or Campus business office or personnel representative will coordinate this effort to insure successful implementation of this State-wide deduction as scheduled.

Holiday gift certificates for Saturday art classes

Gift certificates for winter term art classes at University Park are now available. By contacting Holly Ping, secretary, at 865-5601, a special holiday gift certificate, complete with the names of the student, donor and art class will be mailed to any specified address in time for holiday giving.

The Division of Art and Music Education is offering 14 courses for children, teenagers and parents this term,

starting Jan. 7 and continuing for seven Saturdays.

Inquiries and registration for each course may be made Monday through Friday from 1 to 5 p.m. by calling Ms. Ping or in Room 270 Chambers Bldg.

Is Penn State a community?

"Penn State as a Community Beyond the Academic" will be the theme of a panel discussion on Thursday, Dec. 8, at 7:30 p.m. in Room 5-209 Henderson Bldg. The panel will feature Dr. Walter E. Freeman, professor and director of the Division of Community Development, and Dr. George R. Hudson, professor of education.

The purpose of the dialogue is to highlight the results of a recent survey on the theme of community. The audience will also have an opportunity for discussion led by the Rev. David C. Rich, State director of United Ministries in Higher Education. The meeting is sponsored by the United Ministry at Penn State and is open to the public. Inquiries may be addressed to 865-7627.

Teaching award deadline extended by Education

The Committee for the 1978 Outstanding Teaching Award in the College of Education has extended the deadline for nominations for the award to Dec. 20. At the same time, the period during which data on the nominees may be collected will be extended through the first four weeks of the spring 1978 term. All the required information from students, advisees and colleagues must reach the committee no later than April 10.

Nomination forms and information may be obtained from the committee at Room 220 Carpenter Bldg., University Park, or by telephoning (814) 865-8303.

Recycle envelopes

Because recycling of interoffice envelopes at the University Park campus can save many dollars, departments and individuals are urged to send excess supplies of used envelopes to Mailing Service, Room 108 Business Services. Every type of envelope which might conceivably be reused should be sent — letter size; No. 10 lined or unlined, manila or white; even those as large as 11- by 15-inches. These envelopes will then be routed to departments which have expressed a need for them. Presently, the expressed need is far greater than the supply.

Special holiday gift sale of "Pennsylvania 1776"

Pennsylvania 1776, the University's Bicentennial book, is now available at the 1975 price of only \$10 to all University employees and students. Anybody desiring a copy may obtain it at the University Press offices, Room 215 Wagner Bldg., Mondays through Fridays from 8 a.m. to 5 p.m.

Faculty exchange information

The University Committee on International Programs of Penn State (UCIP) announces that it will accept proposals for exchange of faculty between this university and institutions in France. Anyone wishing further information about this program should contact Prof. Wirth McCoy, 865-0444, or the UCIP office, 865-9549. The office is open Monday through Friday, from 9 a.m. to noon.

Phi Beta Kappa Sherry Party Dec. 4

Phi Beta Kappa invites all members and their spouses to its annual Founders' Day Sherry Party from 3 to 5 p.m. on Sunday, Dec. 4, in the Fireside Room of the Nittany Lion Inn.

UNICARE concepts explained

Editor's note: The following article, explaining the concept on which the University's health insurance plan is based, was prepared by staff of the Office of Personnel Administration.

Of all the University's fringe benefits, one directly affects more faculty and staff members than any other. Retirement benefits, life insurance, and educational assistance programs provide vital assistance to some, but UNICARE, the group health insurance plan, has an almost universal appeal. Nearly everyone uses it sometime.

Because UNICARE is heavily used and medical care costs are increasing rapidly, the University's expense in providing health insurance coverage has increased substantially in recent years. New maternity benefits, the \$750 surgical schedule, and the new \$5,000 major medical stop-loss provision have all added to the load.

To meet these rising costs and still provide a comprehensive plan of benefits at a reasonable cost to employees, the University tries to provide maximum benefits for serious accidents or illnesses and somewhat smaller benefits for more manageable medical expenses. That is the philosophy behind the UNICARE plan, and its effectiveness is demonstrated in the following hypothetical situations.

Employee A underwent surgery for removal of her appendix. She was in the hospital for five days. In addition, she made several trips to the doctor's office and had a number of prescriptions filled at the drugstore. Her expenses and UNICARE benefits looked like this:

Type of expense	Amount	UNICARE payment	Excess
Hospital confinement	\$1,065.00	\$1,065.00	None
Surgical	325.00	275.00	\$50.00
Office calls	40.00	None	40.00
Prescriptions	52.75	None	52.75
Totals	\$1,482.75	\$1,340.00	\$142.75

The excess expenses (\$142.75) were sufficient to satisfy the major medical deductible (\$100) and produced a major medical benefit of \$34.20 (\$142.75 - \$100.00 X 80 percent). When the \$34.20 was added to the basic plan UNICARE payments, a total of \$1,374.20 was paid on expenses totalling \$1,482.75. Employee A paid only \$108.55.

Employee B had a more serious problem. He had renal failure, the failure of the kidneys to perform properly. Three times a week, in a hospital, he had to undergo a treatment called hemodialysis. He also had to visit his doctor regularly and take medication. His expenses for the year were as follows:

Type of expense	Amount
Outpatient hospital	\$20,750.00
Physicians charges	3,360.00
Prescriptions	180.00
Total	\$24,290.00

All of Employee B's expenses could be included under UNICARE's major medical plan. The major medical plan reimbursed him for 80 percent of the first \$5,000 of out-of-pocket expenses, minus the \$100 major medical deductible. That amounted to \$3,920. In addition, under the stop-loss provision, Employee B was reimbursed for 100 percent of all remaining expenses (\$19,290). His total major medical benefit was \$23,210, which was 95.5 percent of his expense (\$24,290).

In both of these cases, the UNICARE philosophy was realized. Employee A could manage the expenses not covered by UNICARE, and Employee B avoided financial ruin in his catastrophic claim.

But as helpful as UNICARE is, it can't help the faculty or staff member who doesn't understand the plan or take time to learn about its provisions, especially when major medical questions or expenses partially covered by another group policy are involved.

All questions concerning UNICARE benefits can be answered. Personnel representatives and business managers are qualified to answer routine questions and to refer complex ones to the Employee Benefits Division in the Office of Personnel Administration. Employee Benefits, in turn, will refer highly technical questions to the University's insurance carrier to assure correct answers. The best advice is to seek advice. If you don't know, ask somebody. Don't miss out on a benefit that is rightfully yours.

WPSX Highlights

The Jewish immigrant experience is the subject of *Destination America*, Friday, Dec. 2, at 9 p.m.

Comedian Steve Allen hosts a nostalgic tribute to the first 50 years of broadcasting, Saturday, Dec. 3, at 9 p.m. on *The Good Old Days of Radio*. The program features Edgar Bergen and Charlie McCarthy, Fibber McGee (Jim Jordan), Helen O'Connell, and other performers from radio's golden age. Other radio pioneers are remembered through rare films and audiotapes.

A new season of *National Geographic Specials* begins Monday, Dec. 5, at 8 p.m. with "Yukon Passage," an adventure of four men retracing the trail of the Klondike goldseekers.

Nancy Miller talks with Philip Young, research professor of English and author of *Revolutionary Ladies*, on *Talkabout*, Tuesday, Dec. 6, at 7:30 p.m.

The career of Chief Justice John Marshall, whose landmark decisions defined the powers of the judiciary and the federal government in America's early years, is dramatized on *Equal Justice Under Law*. The six-part series begins Wednesday, Dec. 7, at 7:30 p.m. with *Marbury vs. Madison*, a case which established the Supreme Court's responsibility to review the constitutionality of acts of Congress.

Staff Vacancies

All University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Dec. 8.

PROGRAMMER, UNIVERSITY LIBRARIES — UNIVERSITY PARK Responsible for analysis, program design, coding, documentation, and other programming tasks required to develop an operation on-line bibliographic data-base. Bachelor's degree or equivalent in computer science or related field, plus one to two years of directly related experience, preferably in bibliographic database design or on-line multi-access computer systems.

ADMINISTRATIVE ASSISTANT FOR ACADEMIC SERVICES — NEW KENSINGTON Responsible for the Associate Director for Academic Affairs for the registration function and procedures for liaison with the Registrar's Office at the University Park Campus and for the coordination of residence education registration. Duties include processing change of major, drop-add, withdrawal and other forms; insuring the faculty and staff obtain all necessary registration materials; coordinating the scheduling of courses, room assignments, class lists and course lists; maintaining student academic records and submitting required reports, recruiting part-time faculty for the evening program; serving as the public relations officer and performing other duties as assigned. Bachelor's degree, plus 1-2 years of experience or master's degree plus 6-12 months' experience.

COOPERATIVE EDUCATION SPECIALIST — CAPITOL CAMPUS Responsible to the Coordinator, Career Planning and Placement, for the development of Cooperative Education positions for Capitol Campus students and for assisting in the overall administration of the program. A bachelor's degree or equivalent, plus over one and up to and including two years of directly related experience in higher education, cooperative education or business and industry is required. At this time, this position is funded only until Aug. 30, 1978.

Penn State Intercom

"A's" made up 28.3% of '77 spring grades

Concern over the number of "A" grades being awarded in both resident instruction and continuing education courses at the University was expressed in a report of the Senate Committee on Undergraduate Instruction presented to the Senate Dec. 6.

"A's" constituted 28.3 percent of the grades given in resident instruction courses and 43 percent of those in continuing education during spring term 1977.

The committee pointed out, however, that these percentages are not readily comparable since the distributions for continuing education contain associate as well as graduate grades.

The report also noted that, "After two consecutive years of a drop in 'grade inflation,' the all-University distribution appears to have stabilized. However, the percentage of 'W's' continues to increase — this year by 35 percent over spring term 1976."

A wide disparity between Colleges in the percentage of "A's" assigned still continues, and the same disparity holds true between Commonwealth Campuses.

Faculty interested in obtaining more detailed information than is contained in the following tables should contact the Chairman of the Committee on Undergraduate Instruction, George W. Franz, assistant professor of history at Delaware County, Network: 335-6772.

News in Brief

206 Scholars enroll

More than 200 high school students who participated in the Penn State Scholars Program in spring 1976 have enrolled at 16 Penn State campuses this year.

Initiated in 1975, the Scholars program is designed to recognize and encourage excellent academic scholarship and achievement among Pennsylvania high school students. The 644 students who attended the program were nominated by their high school principals as the top academic students in the junior class of their respective schools and were invited to visit University Park for a weekend with their parents.

During their visit, students had an opportunity to sample college life and meet with Penn State faculty members and students to discuss academic programs and career opportunities at Penn State.

All participants receive an early offer of admission to the University. Of the 206 students that enrolled during summer and fall 1977, 42 chose to attend a Commonwealth Campus or Behrend College. The others enrolled at University Park.

Holiday energy conservation urged

The Executive Energy Conservation Committee wishes to remind faculty and staff of the standing policy prohibiting the use of electric holiday decorations in University buildings.

Also the committee has again instructed the Office of Physical Plant to lower thermostat settings in various areas which will be vacated by students during the holiday break. These areas, in selected academic buildings, include classrooms, lobbies, entries, corridors, and stairwells.

Areas occupied by faculty and staff, such as offices and research labs, will be the direct responsibility of the occupants, and their cooperation is requested in adjusting thermostats during holiday and vacation periods. In special program areas, such as Eisenhower Auditorium, the Natatorium, Keller Conference Center, and Special Education, it will be the responsibility of the administrative officers to insure that the temperature is reduced.

The lowered setting is to be 55°F; all occupants are requested to keep office and lab doors closed so as to preserve the approved comfort level of 68°F in occupied areas.

This cutback program will be initiated at 5 p.m. on Tuesday, Dec. 20, and will continue to Jan. 2.

Any questions should be addressed to J. C. Dean, manager, Energy Conservation Program, 863-0538.

United Way campaign still \$10,000 short

The United Way campaign is still short of its \$90,000 goal, according to campaign chairman James Beattie, dean of the College of Agriculture.

"By count of the United Way office," Dean Beattie reports, "some 320 persons who gave last year have not contributed this year. If all of these individuals were to pledge the same amount as last year, the total would be \$14,336, allowing the University to surpass its goal. To date, slightly less than \$80,000 has been raised."

Persons wishing to contribute to the campaign either directly or through payroll deductions should contact their dean or administrative office for the name of their campaign contact. They may also call the United Way office at 238-8362.

Moser to discuss African literature

"The Lusophone (Portuguese Language) Literature of Africa since Independence" will be discussed by Dr. Gerald M. Moser Wednesday, Dec. 14, at the African Studies Forum.

Dr. Moser is professor of Romance languages at Penn State. His talk will begin at 7:30 p.m. in Room 101 of the Kern Graduate Bldg.

"Age of Uncertainty" available from Audio Visual Services

Audio Visual Services has recently acquired John Kenneth Galbraith's controversial film series on the history of economic thought. The series, which was produced by the BBC and aired over PBS, consists of 12 60-minute programs on the following topics:

The Prophets and Promise of Classical Capitalism, The Manners and Morals of High Capitalism, Karl Marx — The Massive Dissent, The Colonial Idea, Lenin and the Great Unruling, The Rise and Fall of Money, The Mandarin Revolution, The Fatal Competition, The Big Corporation, Land and the People, The Metropolis, and Democracy, Leadership and Commitment.

Faculty members interested in scheduling the films should contact Mrs. Alwine at 865-6314.

New phone numbers for New Kensington

A new telephone switchboard system has been installed at the New Kensington Campus. The numbers for the Campus are (412) 339-7561, (412) 362-1012, 1013; network numbers 565-7520, 7521, 7527, 7528.

"Steady state" enrollment projection of 52,200 for 1980 called very realistic figure by planning director

With enrollment at the University having held fairly stable for the past three years, Penn State has now entered the "steady state" period predicted for higher education.

This was indicated in a report on issues impacting on long range enrollment trends and enrollment planning recently

prepared for the Committee on Educational Policy of the Board of Trustees.

The revised Academic Policy Plan projections for 1980, indicating 52,200 resident instruction students, appear very realistic, explained Chalmers G. Norris, director of planning and budget office of

the University, in spite of a drop of more than 1,100 students from the 53,363 enrolled in 1976.

This 1976 peak was the result of greater enrollment of part-time and non-degree students than was projected and also a temporary change in rates of acceptance on admissions offers and retention rates,

Mr. Norris said. Both apparently reflected unforseen socioeconomic conditions of 1974 and 1975, he noted, adding:

"Present indications are that those factors now have returned to the earlier, longer-range trends."

He said that substantial efforts will be

(Continued on page 4)

Penn Staters

Dr. Irwin Feller, professor of economics, has been appointed director of the Institute for Research on Human Resources.

Since 1969, Dr. Feller has been program director for the Institute's Center for the Study of Science Policy. He succeeds Dr. Jacob Kaufman, who has left the University.

A member of the faculty since 1963, Dr. Feller is a magna cum laude graduate of the City University of New York and holds a Ph.D. in economics from the University of Minnesota. He is the author or co-author of many professional papers and monographs and has contributed chapters to several books. He has served on advisory committees and as a consultant to the National Science Foundation, the National Governors Association, the National Conference of State Legislatures and the National Association of State Budget Officers.

Dr. Peter Gould, professor of geography, has been elected to the board of directors of the Social Science Research Council. A nonprofit organization, the Council is one of the largest funding agencies for research in the human and behavioral sciences. Its directors are drawn from the whole spectrum of the social sciences.

Dr. William R. Schmalstieg, professor and head of the Department of Slavic Languages, has been awarded a Fellowship for Independent Study and Research by the National Endowment for the Humanities. The award will enable him to complete a book on the phonology and morphology of the Indo-European languages.

Dr. Warren C. Robinson has been appointed to the National Academy of Sciences' Panel on Population, Health and Nutrition. The panel is a newly-created group to help in a NAS study on Science and Technology for Development for the United Nations. Dr. Robinson is director of the Population Issues Research Office and professor of economics.

Eugene N. Borza, associate professor of history, recently served as a Jacobus Lecturer in History at the University of Virginia. The Jacobus Fund enables the history department at Virginia to invite special lecturers to the Charlottesville campus to address undergraduates on historical problems. Dr. Borza lectured on the Classical tradition in the West and on Athenian democracy.

Dr. John E. Baylor, professor of agronomy extension, has been elected a Fellow of the American Society of Agronomy.

The Rev. Charles Coleman, program director for the Office of Religious Affairs, has been elected vice president of the Association for the Coordination of American Religious Affairs. He will plan the association's next annual meeting in Memphis, Tenn., and will co-edit the association's quarterly newsletter, Dialogue on Campus.

Dr. Winfred M. Phillips, associate professor of aerospace engineering, was invited lecturer for the Houston Area Fluid Mechanics Seminar. The lecture is sponsored by a consortium of universities in the Houston, Texas, area. Dr. Phillips spoke on blood rheology and the role of erythrocyte deformability in hemodynamics.

Dr. Robert F. Schmalz, professor of geology, recently gave two lectures at Syracuse University at the invitation of the department of geology. Titles of his talks were "Syngenetic Sulfide Deposits" and "Aesthetics and Natural Selection."

A 25-year service award was added recently to the honors paid this year to Dr. Philip S. Skell, Evan Pugh professor of chemistry.

One of the University's most distinguished faculty members, he was named a member of the National Academy of Science in April for his continuing achievements in basic research. In May, the College of Science Student Council chose him for the 1977 C. I. Noll Outstanding Teacher Award.

Internationally known for his work in carbene, carbonium ion, free radical, and single atom chemistry, Dr. Skell has been characterized by one of his colleagues at the National Academy as "a true original (who) strikes out into new virgin areas and opens these up for further exploration by the chemical world." His research on reactions of metal atoms has led to a whole new basic chemistry of free atoms.

The author of nearly 200 research papers, he has taught undergraduates at all levels and also trained more than 50 doctoral degree candidates and over 30 postdoctoral students.

He earned his own doctorate in organic chemistry at Duke University and later held postdoctoral positions at the University of Illinois and the University of Chicago. From 1947 to 1952 he was a faculty member at the University of Portland. He came to Penn State as an assistant professor in 1952.

Vilma R. Hunt, associate professor of environmental health, has been appointed executive secretary and principal staff officer of the new Toxic Substances Subcommittee of the Environmental Protection Agency's Science Advisory Board.

Dr. W. Channing Nicholas, associate professor of applied physiology, recently presented an invited paper and participated as a workshop member at the Second Purdue Cardiac Defibrillation Conference. The paper was on "Performance Characteristics of Three Commercial Defibrillators in Trans thoracic Ventricular Defibrillation of Sheep, Dogs and Calves" and the workshop was on electrical requirements for defibrillation.

Dr. J. Cordell Hatch, coordinator of Extension radio-TV-studio visual services and professor of agricultural communications, has been elected national vice president of Epsilon Sigma Phi, an 8,000-member honorary fraternity of Cooperative Extension Service workers. During his two-year term, Dr. Hatch will chair the organization's program and activities committee.

Dr. H. L. Barnes, professor of geochemistry and director of the Ore Deposits Research Section, recently gave an invited lecture at a Stanford University workshop on "Flow-through Rock-Solution Reactions."

Correction

The maximum Social Security tax an employee will pay in 1978 was incorrectly stated at \$1,150.50 in last week's issue. The correct amount for the maximum deduction is \$1,070.85.

Gerontology Center offering grants

A second Developmental Grant Program to improve gerontological research and instructional capacity of University faculty members has been announced by the Gerontology Center in the College of Human Development.

According to Dr. Joseph H. Britton, center chairman, grants of up to \$2,500 will be made to faculty members throughout the University to help them develop projects in aging.

Under the program, faculty and administrators of academic units are invited to propose activities which produce curricular designs, instructional materials, and research-related products for professional and career education, continuing education, and research in new areas of gerontology.

Funds for the program are being made available under a second-year operational grant to the Gerontology Center by the Administration on Aging of the U.S. Department of Health, Education and Welfare.

Research proposals, including "pilot" proposals, will be judged through peer review on criteria that include prospects that the work will contribute to the University's permanent capacity in gerontology; possibility of subsequent funding; the soundness of the project; its contribution to a "new" area in gerontology at Penn State; the possibility for rapid development and completion; and the possibility for presentation of project description, results or application during the center's 1978 Summer Series on Aging.

The Developmental Grant Program is being directed by Dr. Robert B. Mitchell, associate professor of biology and associate chairman of the Gerontology Center.

Further details on the grant program may be obtained by contacting Dr. Mitchell, Dr. Britton or Jean Wald, center staff member.

From the Press

Ts'ai Yuan-p'ei: Educator of Modern China, by William J. Duiker. 124 pages. \$3.95 (paperback).

Dr. Duiker, an associate professor of history at Penn State, examines the life of Chinese philosopher and educator Ts'ai Yuan-p'ei, particularly as it illuminates the synthesis of traditional Confucian thought and later radical reform in China. In its struggle to meet the challenge of the apparently superior culture of the Western world, China was forced to abandon its traditional sense of cultural identity and to construct another in its place. Ts'ai Yuan-p'ei, the most prominent educator in the period of the early Chinese republic, reflected these conflicts in his own life and thought. Born in 1868, he was educated in Confucian schools and received the highest degree possible under the old system. Later he lost his faith in the old values, became a revolutionary, and studied in Europe. On his return in 1912, he attempted, as first Minister of Education in the new Chinese republic and then as Chancellor of China's most prestigious university, to achieve a synthesis of the best values of both China and the West in a new philosophy for modern China — combining the humanistic values of the Confucian system with a vision of life fashioned by the scientific advances and democratic values of the West.

Ultimately Ts'ai Yuan-p'ei failed, for of the two major strains in the Chinese cultural revolution — the drive for national revival and the humanistic urge to build a democratic society — the former proved to be the more powerful.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, PA 16802-7517. Letters should be signed although names will be withheld on request.

Q. What determines whether or not a campus policeman is on duty during the morning and evening traffic rush hour at the corner of Shortidge and Pollock roads? Some days no one at all is there and the traffic jams are terrible. NAME WITHHELD

A. A Community Service Officer is assigned to this intersection each morning at 7:40 a.m. and each evening at 4:40 p.m., Monday through Friday. We attempt, within our resources, to provide this service routinely. However, during fall quarter, there were two or three untimely emergencies which were given a higher priority and our commitment to routine traffic control could not be met. These occurred primarily during the evening traffic hour.

Between quarters, when morning traffic is minimal, the officer may not take a position within the intersection as he would not facilitate the movement of vehicles or pedestrians.

DAVID E. STORMER,
Director, University Safety

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 805-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Dec. 13. DD NDT CONTACT THE AREA THAT HAS THE VACANCY.

ASSISTANT PLANNING ANALYST, OFFICE OF BUDGET & PLANNING — University Park. Responsible to Division Head or other designated supervisor for assistance in University planning and analysis functions and for preparing special reports and studies as assigned. A master's degree or equivalent in business administration, higher education, economics, or public administration, plus 6 to 12 months of directly related experience in planning and analysis activities. Some knowledge of, and exposure to, university administration is desirable. Position available Jan. 1, 1978 — June 30, 1978.

(297-1) Studies related to an agenda for the August 1979 UN Conference on Science and Technology for Development (UNCTSD) are being supported by NSF's Division of International Programs. The program will consist of preparation of study papers, a small workshop to discuss paper(s), and final manuscript suitable for publishing. NSF expects to make 10 to 20 awards. The subject area includes technology transfer, mechanisms for exchange, and utilization of the existing UN system. Problem areas are enumerated. Proposal due date is Dec. 30. (Ref. NSF 77-77)

(297-3) Applications for administration, training, or research grants under the DE Cooperative Educational Program have a Jan. 16 closing date. (Ref. DE guidelines) (CFDA 13.510)

Special Events

Thursday, Dec. 8
United Ministry, panel discussion of "Penn State as a Community Beyond the Academic," with Walter E. Freeman, Division of Community Development, and George R. Hudson, Division of Counselor Education and Educational Psychology, 7:30 p.m., Room 5-205 Henderson.

Friday, Dec. 9
Waskevich Gallery print sale, 9 a.m.-5 p.m., HUB gallery.
Sports: wrestling, vs. Buffalo, 4 p.m. (EWL meet).
Raymond Brown and the Penn State Singers, wassail bowl, holiday banquet, 6:30 p.m., Faculty Club.
france-cinema, *Carne, Bizarre, Bizarre*, 7 and 9 p.m., Room 112 Kern.
Raymond Page, viola, 8:30 p.m., Music Bldg. recital hall.

Saturday, Dec. 10
Sports: coed rifle, vs. Youngstown, 10 a.m.; women's basketball, vs. Immaculata, 1 p.m.; men's fencing, vs. Montclair State, 1 p.m.; wrestling, vs. N.C. State, 4 p.m., men's basketball, vs. N.C. State, 7:30 p.m.
OTIS Casino Night, 7:30 p.m., HUB ballroom.

Sunday, Dec. 11
University Chapel service, Dr. Joseph E. O'Donnell, Jr., Andover Newton Theological School, 11 a.m., Eisenhower Chapel.
Sports: men's and women's bowling, vs. Montgomery, 1 p.m.
Shaver's Creek Nature Center, Natural Materials Crafts Workshop, registration necessary, 8:00-10:51, 2 p.m., Stone Valley.
Messiah Sing-In, 3:30 p.m., Eisenhower Auditorium.
Brent Wissick, 'cello, 3:30 p.m., Music Bldg. recital hall.

Interlana Folk Dance Club, introductory folk dancing workshop for faculty and families, 7:30 p.m., Room 133 White.

Monday, Dec. 12
Add course.
Intramural sports: men's graduate student and faculty-staff racquetball (round robin) event open. Entry close, noon, Dec. 15.
Eco-Action film, "Living the Good Life," 10 a.m.-3 p.m., HUB assembly hall.
Focus on Sweden folk dancing, noon, HUB gallery.
Lucia Celebration, 7:30 p.m., HUB reading room.

Shakespeare film, *Henry V*, 6:30 p.m., Room 101 Chambers.
france-cinema, *Bizarre, Bizarre*, 7 and 9 p.m., Room 112 Kern.
Raymond Brown and the Penn State Singers, family holiday banquet, 7 p.m., Faculty Club.
Penn State Percussion Ensemble, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Dec. 13
Eco-Action film, "Living the Good Life," 10 a.m.-3 p.m., HUB assembly hall.
Hetzel Union Board, Train the Tree workshop, 11 a.m.-2 p.m., HUB north lounge.
Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club.
Olga Ragusa, Columbia University, on "Trials and Tribulations of an Editor."

Shakespeare film, *Henry V*, 6:30 p.m., Room 101 Chambers.
Sports: wrestling, vs. Florida, 7:30 p.m.
Artists Series Film Festival, Keaton, *One Week; The Boat; Steamboat Bill*, Jr., 8 p.m., Eisenhower Auditorium.
Department of Spanish, Italian and Portuguese lecture, Olga Ragusa on "Ghosts, Spirits and Characters in Search of Pirandello," 8 p.m., Room 112 Kern.
English, Eric R. Birdsall, Shenango Valley, on "Tracking Down Wordsworth," 8 p.m., Room 101 Kern.

Wednesday, Dec. 14
Last date for March graduates to activate diploma cards in Registrar's Office and pay the fees at Bursar's Office.
Hetzel Union Board Christmas craft demonstration, 11 a.m.-2 p.m., HUB main lounge.
African Studies Forum, Gerald Moser, PSU, on "The Lusophone (Portuguese Language) Literature of Africa Since Independence," 7:30 p.m., Room 101 Kern.

Commonspace Theatre, *Lenny*, 7:30 and 9:30 p.m., Room 112 Kern.
Sports: wrestling, vs. Cal. Poly., 7:30 p.m.
Composer's Concert, 8:30 p.m., Music Bldg. recital hall.
New Kensington House film, *A Night at the Opera*, 7:30 and 9:30 p.m., FUB rec. room.

Thursday, Dec. 15
Christmas Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.
Hetzel Union Board Holiday Fireside Chat, 7:30 p.m., HUB reading room.
Japanese Language and Literature films, 7:30 p.m., HUB assembly hall.
The World of Jomon, "Culinary Art of Japan," Noh, Medieval Lyric Drama, and "Kabuki, Classic Theatre."
New Kensington House film, *A Night at the Opera*, 7:30 and 9:30 p.m., FUB rec. room.

Friday, Dec. 16
Christmas Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.
Hetzel Union Board film, *Oliver*, 7:30 p.m., HUB assembly hall.
Sports: gymnastics, vs. Michigan State, 8 p.m.
David Vogel, viola, 8:30 p.m., Music Bldg. recital hall.

Saturday, Dec. 17
Hetzel Union Board film, *Oliver*, 1 and 7:30 p.m., HUB assembly hall.
Sports: women's swimming, vs. Rutgers, 1:30 p.m.; men's swimming, vs. Rutgers, 4 p.m.
Graduate Commons Madgaln Dinner, 6:30 p.m., Room 102 Kern.
france-cinema, *Demy, Donkey Skin*, 7 and 9 p.m., Room 112 Kern.
Faculty Club, Winter Holiday Ball, 9 p.m., Faculty Club.

Sunday, Dec. 18
University Chapel service Christmas Concert, All Faith Choir, 11 a.m., Music Bldg. recital hall.
Hetzel Union Board film, *Oliver*, 1 and 7:30 p.m., HUB assembly hall.
Shaver's Creek Nature Center, Birdhouse and Feeder Building Workshop, registration necessary, 8:00-10:51, 2 p.m., Stone Valley.
Penn State Glee Club, 3 p.m., Eisenhower Auditorium.
Graduate Commons Madgaln Dinner, 6:30 p.m., Room 102 Kern.
france-cinema, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Dec. 8
Computation Center, "JCL," (5 of 5), introductory programming background suggested, 7:30 p.m., Room 110 Osmond.

Monday, Dec. 12
Biochemistry and Biophysics, Carlton F. Hazelwood, Baylor University, on "Structure of H₂O in Cells," 3:55 p.m., Room 101 Alt-house.

Computation Center, "RJE," (1 of 5), suggested for users of research accounts, 7:30 p.m., Room 108 Forum.

Tuesday, Dec. 13
Food Science, Jim-Wen Liu on "Effects of Processing and Storage on Peanut Flavor," 11:10 a.m., Room 211 Borland.

Computer Research Applications, Gerald G. Johnson on image processing, 1 p.m., Room 325 Whitmore.
Water Pollution Control, Charles A. Cole, engineering, Capitol Campus, on "The Potential for Water Conservation," 2:20 p.m., Room 128 Sackett.
Plant Pathology, R.T. Sherwood on "A Physiologist's View of Disease Resistance," 3:55 p.m., Room 213 Buckhout.

Wednesday, Dec. 14
Inorganic Chemistry, Mark G. Bradley on "Photochemistry of Transition Metal Hydride Complexes," 8 p.m., Room 333 Whitmore.

Thursday, Dec. 15
Surface Science, Michael Lubell, Yale University, on "Review of Techniques for Production and Detection of Polarized Electron Beams," 11 a.m., Room 339 Davey.
Chemistry, Christopher T. Walsh, MIT, on "Suicide Inhibitors — A Novel Approach to Drug Design," 12:45 p.m., Room 333 Whitmore.
Physics, Michael Lubell, Yale University, on "The World of Polarized Electrons," 3:50 p.m., Room 117 Osmond.
Computation Center, "RJE," (2 of 5), suggested for users of research accounts, 7:30 p.m., Room 108 Forum.

Friday, Dec. 16
Surface Science, H. Froitzheim, Bell Laboratories, on "High Resolution Spectroscopy of Energy Loss at Surfaces," 3 p.m., Room 339 Davey.

Exhibits

Chambers Gallery: David Van Dommelen and Karen Roth, fibers.
HUB Gallery: Jim Webster, hand pottery; Denise Gossie, candles; Model Railroad Club exhibit; Ukrainian Club exhibit.
Kern Commons Gallery: International Christmas artifacts; Lim Byung Jin, oriental paintings.

Museum of Art: Lanny Sommesse, poster art; Kenneth Beittel, pottery; Recent Works; John Koch, paintings; Models and Moments.

Zoller Gallery: Student Holiday Exhibition and Sale, Dec. 13-18.

Arts Roundup

Page, Smith to present viola, piano sonatas

Raymond Page, violist, will be joined by Steven Smith, pianist, for a program of sonatas for viola and piano, to be presented at 8:30 p.m. Friday, Dec. 9, in the Music Bldg. recital hall. Both Mr. Page and Mr. Smith are members of the music department faculty.

Highlighting the program will be the performance of a viola sonata by Dimitri Shostakovich that is seldom heard in this country. Mr. Page explains that the composer completed the piece only days before his death in 1975 and that it is the first major work for viola written in many years.

He adds that American audiences have few opportunities to hear the piece because it has not yet been published in this country. Mr. Page acquired the score in Switzerland when he was performing there this summer as a member of the University's chamber orchestra, Musica da Camera, during its first European tour.

The Shostakovich work will be followed by Six Studies in English Folk Songs by the English composer Ralph Vaughan Williams, a sonata by the Swiss composer Carl Holler and the F Minor Sonata of Johannes Brahms.

"Messiah Sing-in" Dec. 11

Faculty and staff are invited to join in the third annual "Messiah Sing-in" to be held at 3 p.m. on Sunday, Dec. 11, in Eisenhower Auditorium.

Sponsored by the Office of Religious Affairs and the State College Symphony Orchestra, the informal concert is open to anyone interested in singing the Christmas portion and the "Halleluia Chorus" of Handel's oratorio.

The conductor for the event will be Raymond Brown, director of the University Chorus. The orchestra is being organized under the auspices of the State College Symphony Orchestra. Those who would like to attend the event just to listen are also welcome. Singers should bring musical scores if they have them. Scores will also be available at the door for purchase at cost.

"Three Sisters" being shown

The Artists Series Film Festival will continue with a film from the "Eight from American Film Theatre" when Anton Chekhov's *Three Sisters* is screened at 8 p.m. on Wednesday, Dec. 7, in Eisenhower Auditorium.

The film revolves about the three daughters of a deceased Russian general, who are stranded in a provincial garrison town and long for the time when they can return to the glittering Moscow of their youth. This production features a brilliant cast from the National Theatre Company of England, including Laurence Olivier, Alan Bates and Joan Plowright. Tickets will go on sale at the door beginning at 7:30 p.m. the evening of the showing. Prices for non-students are \$1.50.

Percussion concert

The Penn State Percussion Ensemble will present its first concert of the season at 8:30 p.m. on Monday, Dec. 12, in the Music Bldg. recital hall.

The group, which is under the direction of music graduate student Don Schade, is made up of 14 percussion students.

Among selections to be performed are Antiphon for Double Percussion Choir by Michael Combs, Three Brothers by Michael Colgrass, and The Devil's Herald by Richard Peaslee.

New regulations issued by State Employees' Retirement System

Richard L. Witmer, Secretary of the State Employees' Retirement System (SERS), has issued the following information regarding some recently changed administrative requirements and important tax information connected with SERS membership.

Proof of age required at retirement

"Age" is one of the most important factors used in determining both eligibility for retirement benefits and the amount of those benefits. Therefore, beginning Jan. 1, 1978, all retirement applications must be accompanied by a satisfactory proof of age document. A certified copy of either a birth certificate or baptismal certificate will be acceptable.

If neither a birth certificate nor a baptismal certificate is available, certified copies of any two of the following may be substituted:

- Physician's or Midwife's Record of Birth
- Selective Service Record
- Armed Forces Discharge
- Passport
- School Record
- Marriage Record
- Bible or other Family Record
- Life Insurance Policy
- Naturalization Record
- Alien Registration Record
- Census Record (taken as close to age 5 as possible)

(If you cannot submit originals of the documents required, then a statement from a Notary Public attesting that he or she has seen the originals will be acceptable.)

Satisfactory proof of age is required from the applicant under all forms of retirement. In addition, in the case of a joint and Survivor annuity (Option 2 or 3), similar proof must be submitted for the designated survivor (beneficiary). This is necessary because the survivor's age is used in determining the amount of your benefits under these options.

Finally, in the event of your death, if your beneficiary is eligible for and elects an "annuity" type of payment, proof of age will be required from the beneficiary.

As noted above, this policy becomes effective Jan. 1, 1978. Advance notice is being given to allow sufficient time for those who plan to retire in the near future to obtain the required documents. Certified copies of birth certificates can be obtained from the Department of Health, Division of Vital Statistics, P.O. Box 1528, New Castle, PA 16130. If you were born in another state, contact the Division of Vital Statistics in the state or county of your birth.

Social security numbers required on beneficiary forms

Earlier this year the SERS revised the Nomination of Beneficiary form (OA-402) used by all members. One of the requirements of the new form which seems to be causing some difficulty is that the Social Security number of any named beneficiary must be listed. This often becomes a problem when you may not know your beneficiary's number or, more particularly, when children are named as beneficiaries.

Federal tax regulations require that a Social Security number must be provided before any payments can be made from the SERS. You should, therefore, provide your beneficiaries' numbers when naming them on the form. Social Security account numbers can be obtained for anyone, including children, by applying at a local Social Security office. Providing Social Security numbers on the beneficiary form will avoid delays in payment in the event of your death.

Taxability of payments from SERS

If you leave employment before becoming eligible for retirement, you may withdraw your contributions plus accumulated interest. Since you already pay Federal Income Tax on your contributions while you are working, only the interest is taxable when you withdraw your money. Because Federal Income Tax on your interest may be due when you receive the payment, you are urged to contact the Internal Revenue Service (IRS) when you receive the money to determine your tax liability. It may be necessary to file an estimated tax return using IRS form 1040ES. IRS will help you in completing this form.

Also, if, when you retire, you elect to receive a lump sum payment under Option 4, the contributions which you withdraw are tax exempt. However, any interest that you elect to receive will be fully taxable for Federal Income Tax purposes. Failure to pay any income tax due at the time you receive payment under Option 4 could result in penalties assessed by IRS. Again, contact the IRS for assistance in determining the taxes you may owe. The Retirement System is unable to provide this information.

The retirement law specifically excludes payments received for the SERS from any Pennsylvania state or local taxes.

New annuity tables

The retirement law requires that the Actuary examine the mortality, service, and compensation experience of all the members of the SERS every five years. The annuity tables, option factors, early retirement factors, etc. used by the SERS are developed from these examinations and are subject to change whenever the experience of the system changes.

Based on a recently completed examination, the Board has adopted new tables and factors to take effect Jan. 1, 1978. Therefore, if you plan on retiring after that date and have received an estimate of your retirement benefits, the amounts are subject to change. You should contact your Retirement Counselor before you actually retire so you can get an updated estimate.

WPSX Highlights

Julie Harris re-creates her Tony Award-winning role as Mary Todd Lincoln Saturday, Dec. 10, at 3 p.m. when **Hollywood Television Theatre** presents *The Last of Mrs. Lincoln*. Playwright James Pridemore has focused on the difficult years after Abraham Lincoln's assassination to reveal the complex character of Lincoln's wife.

Monday, Dec. 12, at 9:30 p.m., **Visions** presents *A Secret Place*, an original 90-minute teleplay about a 12-year-old boy who discovers the Jewish religion and

begins to study it in earnest. The boy's devotion is viewed with surprise and dismay by his liberal, nonreligious parents.

Tax reform in Pennsylvania is the subject for **Talkabout** Tuesday, Dec. 13, at 7:30 p.m. Scheduled to appear are Craig Lewis, chairman of the Senate's local government committee; State College Municipal Council member Ingrid Holtzman; and J. Doyle Corman, State Senator and former Centre County Commissioner.

Two Swedish documentarians take a look at growing old in America in **Those Golden Years**, to be seen Tuesday, Dec.

Appointments

William A. Bauer as instructor of wildlife technology at DuBois. B.S., U. of Wisconsin-Madison; M.S., Michigan Technological U.

Donald J. Caputo as computer science instructor at Beaver. B.S., B.A., Geneva College; M.E., U. of Pittsburgh. Formerly instructor, Lawrence County Vo/Tech School and Beaver County Community College.

David E. Cunningham as assistant professor of radiology at Hershey. B.S., St. Bonaventure U.; M.S., Ph.D., U. of Delaware. Formerly assistant professor of physics, Chicago State U.; high school teacher, Wilmington, Del.

Richard D. Cupelli as instructor in business administration at Fayette. B.S., West Virginia U.; M.B.A., Marshall U. Formerly instructor, Marshall U.

James W. Dunn as assistant professor of agricultural economics at University Park. B.S., M.S., South Dakota State U.; Ph.D., Oklahoma State U.

S. Christopher Ellis as assistant professor of anesthesiology at Hershey. L.R.C.P., M.R.C.S., M.B., B.S., Medical College of St. Bartholomew's Hospital, London. Formerly Locum Consultant in Anesthesia at Northern Regional Health Authority, England, and Grafton Private Clinic, N.S.W., Australia; anesthesiologist at Dunedin Hospital, New Zealand, Barones Erlanger Hospital, Chattanooga, Tennessee, and Mt. Sinai Hospital, New York; house physician, Delaware State Health Dept.

William G. Engelbert as assistant professor of accounting and Q.B.A. at Altoona. B.A., Thiel College; M.B.A., U. of Pittsburgh; C.P.A. Formerly an accountant with Price Waterhouse and Company.

Steven G. Greier as assistant professor of history at Behrend College. B.A., St. Olaf College; M.A., Ph.D., Duke U. Formerly part-time instructor, Duke U.

Mary A. Hamilton as instructor in journalism at University Park. B.A., St. Bonaventure U. Formerly editor, Magazine Management Co.; editor, Sterling Group, Inc.; staff writer, Guardian; reporter, The Gazette and Daily, York, Pa.

Judith I. Hornblum as assistant professor of human development in the Division of Individual and Family Studies at Ogontz. B.A., M.A., Temple U. Formerly part-time instructor, Temple U.

Lee E. Lanyon as assistant professor of agronomy at University Park. B.S., Iowa State U.; M.S., Ph.D., Ohio State U. Formerly research associate, Ohio State U. and Ohio Agricultural Research and Development Ctr.; soil scientist, Soil Conservation Service.

Angela Lewis as Undergraduate Studies Adviser/Consultant, Division of Undergraduate Studies, at Delaware County. Dip. di Abil. Magistrate, Mag. di Letters, U. of Florence; Dip. de Langue Francaise and English, Alliance Francaise and British Institute (Milan Campus). B.A., Sarah Lawrence College; M.A.,

13, at 9 p.m. Focusing on America's working class poor, the two-hour special visits older Americans, many of whom were immigrants.

Great Performances begins a new season of **Dance in America** Wednesday, Dec. 14, at 9 p.m. with the first of two programs featuring choreographer George Balanchine and the New York City Ballet. The rare television appearances by Balanchine are introduced by Edward Villella and include performances of Balanchine's "Jewels," as well as "Tzigane," "Four Temperaments," and the "Stravinsky Violin Concerto."

UC-Berkeley. Formerly instructor, Stanford U.; lecturer, academic adviser and assistant dean, College of Letters and Science, UC-Berkeley.

Daniel A. Montgomery as instructor of landscape architecture at University Park. B.S., U. of Cincinnati; M.R.P.L., U. of Michigan. Formerly architect-director, City of Ann Arbor; adjunct assistant professor, U. of Michigan.

Leila V. Moore as assistant professor of counselor education at University Park. B.S., Carnegie Mellon U.; M.A., Syracuse U.; Ed.D., State U. of New York at Albany. Formerly assistant professor, State U. of New York at Albany.

Jan M. Mutmansky as associate professor of mining engineering at Fayette. B.S., M.S., Ph.D., Penn State U. Formerly associate professor, West Virginia U.; associate professor, U. of Utah.

John S. Nichols as assistant professor of journalism at University Park. B.S., M.A., doctoral candidate, U. of Minnesota. Formerly assistant to editor, Mayo Clinic; reporter, Rochester Post-Bulletin.

L. Allen Phelps as assistant professor of vocational education at University Park. B.S., M.A., Central Michigan U.; Ph.D., U. of Illinois. Formerly post-doctoral intern, U. of Kansas; assistant professor, U. of Illinois.

Albert J. Reinschmidt as assistant professor of railway engineering. B.S., M.S., Ph.D. candidate, U. of Illinois. Formerly lecturer, U. of Illinois at Urbana-Champaign.

James J. Richter as assistant professor of anesthesiology at Hershey. A.B., Franklin and Marshall College; M.S., Ph.D., Wake Forest U.; M.D., U. of Connecticut School of Medicine. Formerly assistant professor, U. of Wisconsin Center for the Health Sciences.

Arless A. Ridgway as research assistant, Intercollegiate Programs at University Park. B.S., Penn State U.; M.B.A. candidate, Ursinus College.

Charles P. Romaine as assistant professor of plant pathology at University Park. A.A.S., Farmingdale Agr. & Tech. College; B.S., M.S., Ph.D., Cornell U.

W. Murray Small as assistant professor of metallurgy at Shenango Valley. B.A.Sc., U. of Ottawa; M.S.E., Ph.D., U. of Michigan.

"Steady state"

(Continued from page 1)

required to achieve the projected 1980 distribution of enrollments among the Campus segments. These totals are estimated at 15,350 for the Commonwealth Campuses; 31,320 for University Park; 2,600 for Capitol Campus; 2,180 for Behrend College; 500 for The Milton S. Eisenhower Medical Center and 250 for the King of Prussia Graduate Center — with a grand total of 52,200.

Emphasizing that the University must set realistic goals and consciously work to achieve the kind of future it desires, Mr. Norris said that:

- Enrollment levels should be planned not just happen.
- The adjustment process should be gradual.
- There must be flexibility in use of resources — human, physical, fiscal.
- There must be adaptability and flexibility in the academic programs of the University.
- The expectations of students, society and the University must be brought into congruence.
- The character of the University is the scope and quality of its programs and services must be made apparent to the public it serves.
- Efficiency of operation and the ability to reallocate resources must be further enhanced.
- Financial support must continue to grow even though enrollments are stable.

Senate decides 8-week drop rule will be retained

The eight-week drop rule, under fire from some faculty members, will be maintained in its current form unless it is shown in the future to have been detrimental to the University's academic standards.

That decision was made at the Dec. 6 meeting of the University Faculty Senate and was based on a recommendation by the Senate Subcommittee on Academic Standards, which had reviewed the rule.

Under the eight-week drop, students can drop courses from the fourth through the eighth week of the term with the notation WP (Withdrawn-Passing), WN (Withdrawn-No Grade), or WF (Withdrawn-Failing) on their records. Previously, there was a three-week limit on course drops except for cases with extenuating circumstances.

Senator Barton Browning, associate professor of German, said the subcommittee had not found any evidence at this time to support claims that the extended drop period had lowered the University's academic standards. He added, however, that because the rule is only one year old, it should come under continuing review.

Senator Henry Albinski, professor of political science, said he thought the subcommittee should consider recording the grade earned in the course up to the time of withdrawal in the student's transcript.

"If we report that a student has withdrawn with an 'F,' we should also report other levels of performance," Dr. Albinski said.

He added that course requirements unfulfilled up to the point of withdrawal should be regarded as assignments failed.

According to the subcommittee, the previous three-week drop rule was unfair because some Colleges and Campuses were more lenient than others in extending the drop period.

In line with a second proposal of the subcommittee, the Senate voted to ask the Provost to consider raising the filing fee, currently two dollars for late course drops.

The action on the eight-week rule was preceded by a forensic session in which senators discussed the continuing financial crisis of Pennsylvania's State-related colleges and universities.

Senior Vice President for Development and Relations Stanley O. Ikenberry said Penn State's primary concern over the last several months has been to communicate the seriousness of the problem to all Pennsylvania residents.

He noted that the University has been strongly supported by groups from all segments of society, including bankers, farmers, labor, and religious organizations. He also urged senators to "categorically deny" any rumors that the University is going to close.

Provost Edward D. Eddy reminded the senators that the University's current five-year planning effort is not a spinoff of the problems in Harrisburg and was conceived long before those problems developed.

The five-year plan, Dr. Eddy said, is not an attempt to restructure the University or "to add more students to already heavy

(Continued on page 4)

News in Brief

Merry Christmas, Happy New Year

This is the last issue of INTERCOM for 1977. Publication will resume on Thursday, Jan. 5. Items for the Jan. 5-15 calendar should be sent to Room 312 Old Main by Thursday, Dec. 29.

Charter bus available for Chicago MLA meetings

Faculty interested in attending the Modern Language Association meetings in Chicago after Christmas may wish to take advantage of bus transportation being provided through the College of the Liberal Arts. Some spaces are still available on the bus, which will leave at 6 a.m. on Tuesday, Dec. 27, from behind Sparks Bldg. There will be a lunch stop during the trip, which is expected to take about 12 hours, and the bus will make stops at the larger hotels in the city. Passengers will begin the return trip at noon on Friday, Dec. 30. Further information and reservations are available at 865-9555.

Children's Christmas party

A highlight of Holiday Festival IV, the inter-cultural holiday celebration at the University Dec. 11-18, will be a Children's Christmas Party from 12:30 to 3:30 p.m. on Saturday, Dec. 17, at the Paul Robeson Cultural Center, 101 Walnut Bldg.

The party is free and open to children of University employees — and their parents.

The program will include a play, "Nonsensical Robots," performed by the Children's Theatre at the University. Refreshments will be offered, and two celebrities — Santa Claus and the Nittany Lion — will take part in the festivities.

The party is sponsored by the Paul Robeson Cultural Center.

Bookstore sale Dec. 21

The University Park Bookstore, located in McAlister Bldg. and the IUB, is having a special sale for all Penn State employees and their families. From noon to 9 p.m. on Wednesday, Dec. 21, all items will be sold at 20 percent off. Included are clothing; gift items; engineering, art, and general supplies; and all books, except for texts. The bookstore has a large selection of calendars, ranging from J.R.R. Tolkien to the Italian Ponte-Vecchio art calendars — all of which will be on sale.

Eddy to address AAUP

Provost Edward D. Eddy will address a meeting of the American Association of University Professors at 7:30 p.m. on Thursday, Dec. 15, in Room 101 Kern Bldg. Dr. Eddy will share some of the impressions he has gained during his first months at the University.

The meeting, which is open to the public, will also include a discussion of the status of part-time and non tenure-track faculty at Penn State.

If winter comes, can funding be far behind?

The University's appropriation for the 1977-78 fiscal year moved closer to reality last Monday after passage by the State Senate, following earlier approval by the House of Representatives.

As INTERCOM went to press Tuesday, the House still had to act on two Senate-passed measures: (1) A tax on utilities exported from Pennsylvania to other states, and (2) a reduction by approximately \$80 million in the general State budget approved last August. Once these measures are passed, the appropriation bill can go to the Governor for his signature, and University officials are hopeful that funding will not be long delayed.

MBA Program rated in top 20 by college deans

The Master of Business Administration Program at the University rates very well in a recent poll of business school deans taken by MBA Magazine. Of the 130 accredited programs assessed, Penn State ranks in the top 20 in overall quality and seventh in academic improvement over the last year.

The top ten programs in terms of overall academic quality are Stanford, Harvard, University of Chicago, MIT, University of Pennsylvania, Carnegie-Mellon, Northwestern, UCLA, Dartmouth and University of Michigan.

Rated on academic quality improvement over the last year, the top ten schools are Cornell, Stanford, UCLA, University of North Carolina, Northwestern, Dartmouth, Penn State, Virginia, Ohio State, and University of Pennsylvania.

In noting changes in the ratings over the last four years, the editor of MBA Magazine commented: "The top schools are being challenged by schools such as Cornell, Penn State, the University of Virginia, the University of North Carolina, and Indiana University."

New to the survey this year is a ranking of schools whose students are drawn primarily from a given region. Eliminated from this ranking are many of the private institutions such as Harvard and MIT which recruit on a national basis. In the heavily competitive Northeastern region, Penn State ranked number one in academic quality. The Northeastern rankings are presented below. The scale used by the deans in assessing the schools ranged from marginal (1) to distinguished (5).

Penn State University	3.71
University of Rochester	3.64
New York University	3.61
University of Pittsburgh	3.17
University of Maryland	3.10
SUNY Buffalo	2.92
University of Massachusetts	2.85
Syracuse University	2.75
Rutgers	2.64
Boston University	2.50

Dr. Eugene J. Kelley, dean of the College, notes, "This external ranking of Penn State's MBA Program is recognition of the progress being made by the faculty toward CBA's goal of building the strength and stature of Penn State in management education."

Psychology 14th in productivity

Penn State's Department of Psychology ranks 14th in productivity (and 19th in reputation) among 76 graduate departments of psychology in the United States, according to an article in the October issue of the American Psychologist.

The article, written by W. Miles Cox and Viola Catt, describes their attempt to find a more objective method of measuring the quality of graduate departments than that of relying on assessments by fellow academics.

(In a 1970 study by Kenneth D. Roose —

(Continued on page 4)

Penn Staters

Dr. Donald F. Moores has been named head of the Division of Special Education, effective Jan. 1.

Dr. Moores, who holds the rank of professor of education, is a graduate of Amherst College. He received his M.S. in education of the deaf at Gallaudet College and M.A. in secondary school administration and supervision at California State University. His Ph.D. in psycholinguistics, learning theory and deafness was awarded by the University of Illinois. Prior to his appointment, Dr. Moores was professor of educational psychology at the University of Minnesota and director of that University's Research, Development and Demonstration Center in Education of Handicapped Children.

He is the author of a recent book, *Educating the Deaf: Psychology, Principles and Practices*, and of more than 85 papers. He also serves as a member of the editorial board of the *Journal of Rehabilitation of the Deaf*.

Dr. Ram P. Kanwal, professor of mathematics, has been chosen to participate in the 1977-78 Visiting Lectureship Program of the Society for Industrial and Applied Mathematics (SIAM). Lecturers give formal talks at universities and colleges throughout the U.S. and Canada at the undergraduate or advanced level, confer with students and faculty members and discuss problems of concern such as teaching methodology, curricular matters and employment.

Dr. Dorothy V. Harris, professor of physical education, was elected to a second four-year term on the Managing Council of the International Society of Sport Psychology at the society's fourth World Congress in Prague. Dr. Harris presented an invited plenary address, "A New Way to Look at Personality in Sport," at the Congress. Following the Prague meeting, she gave the keynote address, "Motivation in Sport," at the International Symposium on Behavioral Assessment in Sport held at Wingate Institute of Sport and Physical Education, Israel. Dr. Harris was also honored recently for her contributions to physical education with the presentation of the Professional Honor Award for meritorious and unselfish service to the profession at the Pennsylvania Association for Health, Physical Education and Recreation Conference held at Seven Springs.

Dr. John Waldhausen, professor and chairman of surgery at Hershey, presented a paper last month at the International Cardiorespiratory Symposium in Bombay, India. His paper was titled "The Role of Surgery in Coronary Artery Disease." Dr. Waldhausen also served as a visiting professor in surgery at the University of Munich in November.

Dr. A. K. Blackadar, professor and head of the Department of Meteorology, was recently appointed chairman of the U.S. National Committee for the International Association of Meteorology and Atmospheric Physics (IAMAP).

Marshall E. Wilcher has been promoted to assistant professor of political science at New Kensington.

Dr. Gregory L. Geoffroy, assistant professor of chemistry, is one of 16 U.S. teacher-scholars honored by the Camille and Henry Dreyfus Foundation for outstanding ability as a chemical educator and researcher.

One of the most prestigious prizes in its field, the Dreyfus Teacher-Scholar Grant consists of \$35,000 to be used to carry out teaching and research plans submitted by the winners at the time of their nomination. Only one nominee is allowed per institution. Dr. Geoffroy is the first Penn State faculty member to be honored in the eight-year-old program.

He plans to apply the grant to research on the photochemistry of organometallic compounds and studies of transition metal cluster chemistry. The work has potential applications in the development of alternative energy sources and new industrial catalysts.

He also plans to use part of the grant to try a new self-paced approach to the freshman general chemistry course. Each

student will be able to advance at his or her own pace and the course will also feature specially designed tutorial sessions for the highest and lowest achievers.

Dr. Geoffroy points out that since freshman general chemistry enrollments often exceed 200, the course must be tailored to the level of the average student. As a result, "some of the students with the highest potential can lose interest because of what appears to them to be a slow pace," he says, "while students at the low end of the background ability scale may find the pace too rapid."

In addition, the course may benefit some students who aren't enrolled since Dr. Geoffroy hopes to use senior and junior chemistry majors as tutors. He believes the experience as teachers will aid the tutors in their own educational development.

Dr. Geoffroy has been a member of the Penn State faculty since 1974 when he received his doctoral degree from the California Institute of Technology. A graduate of the University of Louisville (Kentucky), he won awards there in his junior and senior years as the outstanding science major.

He is the author of more than 35 research papers published in scholarly journals and the book, *Organometallic Photochemistry*, to be published in 1978 by Academic Press. In addition, he is National Program Chairman of the American Chemical Society Division of Inorganic Chemistry.

Also included among this year's Dreyfus Award winners is Penn State alumnus Dr. Harold Kohn, University of Houston, Texas. Dr. Kohn earned his doctorate in chemistry at Penn State in 1971.

James J. McKeehen, left, and Allen R. Keniston, center, receive 25-year awards from College of Agriculture Dean James M. Beattie.

Allen R. Keniston and James J. McKeehen of the University's county Cooperative Extension staff are marking their 25th year at Penn State. Mr. Keniston is Cameron County Extension director and Mr. McKeehen, Delaware County agent.

A native of Oil City, Mr. Keniston has been a member of Penn State's staff since graduating from the University in 1952. Before assuming his present post in 1974, he was an agent in Bedford and Cameron Counties. His work in Cameron has focused on full- and part-time farmers, homeowners and absentee landowners. During his tenure, he initiated a county

4-H fair which attracted sufficient attention to warrant the development of a Cameron County Fair with a permanent 4-H building.

Mr. McKeehen holds a B.S. in dairy science and his M.A. in horticulture from Penn State. He began his career in Erie County, moving to Delaware in 1958. He has twice won the National Association of County Agricultural Agents' Search for Excellence Award for innovative programs in multi-county and urban Extension work. He also received a Distinguished Service Award from the National Association.

Four visiting professors are currently serving on the faculty of the College of Earth and Mineral Sciences.

Dr. Raicho G. Raicheff, associate professor at the High Institute of Chemical Technology in Sofia, Bulgaria, is spending two terms as visiting professor of metallurgy. His special interests are corrosion and metal protection.

Dr. Allan J. R. White, chairman of the Department of Geology at La Trobe University, Melbourne, Australia, is spending a year as visiting professor of petrology.

Dr. Thomas C. G. Falk, an instructor of economic geography at the Stockholm School of Economics, Sweden, will be here until late summer, serving as visiting associate professor of geography. His primary interests are in urban development and retail location.

Dr. Lawrence Hudson will be at Penn State throughout this academic year, as visiting assistant professor of mineral economics. He is associate professor of economics at St. Lawrence University, Canton, N.Y.

Dr. Anton Schoolwerth, assistant professor of medicine and physiology at Hershey, presented a paper, "The Role of Glutamate Metabolism in Ammonia Formation by Rat Kidney Mitochondria," at the fourth International Symposium on Biochemical Aspects of Kidney Function in Reimsburg, Germany. The paper was coauthored by **Barry Nazar**, research technician in medicine, and **Dr. Kathryn LaNoue**, associate professor of physiology.

Dr. Daniel W. Pfaff, associate professor of journalism, has been named to the board of corresponding editors of *Journalism History*, a quarterly journal devoted to research in journalism and mass communication.

Bookshelf

England's incomparable Rossettis are the subject of a major biographical work by **Dr. Stanley Weintraub**, research professor of English and director of the Institute for the Arts and Humanistic Studies. Entitled *Four Rossettis: A Victorian Biography*, the book was published last week by David McKay under its Weingraber and Talley imprint.

It chronicles the lives of Dante Gabriel Rossetti, the writer and artist whose name is synonymous with the Pre-Raphaelite movement; his sister, Christina, a poetess; another sister, Maria, author of a major literary study; and a brother, William, the family historian.

Dr. Weintraub, a leading biographer of Victorian and early 20th century English writers and artists, is the author or editor of some 25 books. His biography of artist James McNeill Whistler, a contemporary of the Rossettis, was widely acclaimed, and his study of Aubrey Beardsley, published in 1967, was a National Book Award nominee.

Retirement

Robert F. Fletcher, professor of vegetable crops extension, will retire Jan. 1 with 28 years of service. He has been granted emeritus rank.

Prof. Fletcher earned B.S. and M.S. degrees in horticulture from Penn State. During his years as an Extension vegetable crops specialist, he has received many awards for his leadership in working with the Pennsylvania vegetable industry.

Appointments

Harold M. Frost as research associate, intercollegiate programs, at University Park. B.A., M.S., Ph.D., U. of Vermont. Formerly research physicist, Bureau of Radiological Health, Rockville, Md.; resident research associate, Air Force Cambridge Research Lab, Bedford, Mass.; research associate, U. of Vermont.

Marilyn S. Gardner as instructor of physical education at McKeesport. B.S., Penn State U.; M.Ed., U. of Pittsburgh. Formerly instructor, Penn State U. at McKeesport Campus; teacher, Serra High School, McKeesport.

Patricia A. Gracy as instructor of nursing at Behrend College. B.S., Villa Maria College; M.S., State U. of New York. Formerly coordinator, St. Vincent Health Center, Erie, and Franklin Hospital, Franklin, Pa.

Robert D. Hume as professor of English at University Park. B.A., Haverford College; Ph.D., U. of Pennsylvania. Formerly associate professor at Cornell U.

Robert H. Jacoby as associate professor of petroleum and natural gas engineering at University Park. B.S., U. of Pennsylvania; M.S.E., U. of Michigan. Formerly research associate, Gulf Research & Development Co., Pittsburgh; engineer, Amoco Production Co., Tulsa, Okla.

(Continued on page 6)

Obituary

Nancy L. Kalin, who retired as an assistant professor of English in 1975, died Dec. 2. Mrs. Kalin earned a B.A. at Penn State and her M.A. in English at the University of Pittsburgh. She began teaching at the University in 1958 and became a full-time faculty member in 1965.

Joseph R. Cardenuto

William L. Kjelgaard

The College of Agriculture has awarded 25-year chairs to nine faculty members. They are: **Joseph R. Cardenuto**, professor of rural sociology extension; **William H. Folwell**, associate professor of extension information; **John F. Hokanson**, professor of veterinary science; **Carroll L. Howes**, assistant professor of agricultural extension; **William L. Kjelgaard**, associate professor of agricultural engineering; **Jerome K. Pasto**, professor of agricultural economics and associate dean for resident education; **C. Marshall Ritter**, professor of pomology; **Robert E. Swope**, professor of veterinary science and assistant dean for resident education; and **Robert G. Wingard**, professor of wildlife management extension.

Prof. Cardenuto holds an Ed.B. in physical education and recreation from the University of Buffalo and an M.S. in recreation administration from Indiana University. His experience in the field of recreation has been utilized by researchers in the U.S. Forest Service, the U.S. Department of Agriculture and academicians throughout the Northeast. Active in the Pennsylvania Recreation Parks Society, he has served as an officer of the group. In the area of resident education, he has counseled numerous students concerning vocational opportunities.

Mr. Folwell began working for Penn State in 1947 as assistant Indiana County agent, then farmed for a while in Chester County, returning to campus in 1956 as a television editor. He has a B.S. in

William H. Folwell

Jerome K. Pasto

agronomy from Penn State and an M.A. in the psychology of visual communication from the University of Pennsylvania. He has held his present post as an Extension visual aids specialist since 1963 and in 1968 won a Farm Film Foundation Award for his work in producing a 20-minute color film, "Milk and the Multitudes."

Dr. Hokanson has a B.S. in animal husbandry from Virginia Polytechnic Institute and a D.V.M. from Cornell's Veterinary College. Before coming to Penn State, where his primary responsibility has been to serve as University Veterinarian, he was associate professor at the Veterinary College of Auburn University and then engaged in private veterinary practice. He has trained many veterinary school graduates in the clinical services and recently has devoted much of his time to advising students in the animal science major.

As associate State 4-H leader, Mr. Howes' major responsibilities are in livestock program liaison and the coordination of publications and the national awards program. Prof. Howes earned a B.S. in agricultural education at Penn State and received his M.S. in extension administration from the University of Wisconsin. He served as associate county agent in Washington County for five years before joining the University Park staff.

Prof. Kjelgaard is another Penn State alumnus; his B.S. and M.S. degrees are both in agricultural engineering, and he served as an instructor at West Virginia University before coming back to the University. His research emphasis has been in the area of forage and tillage machinery, and he was recently granted a patent as co-inventor of a "Method and Apparatus for the Adiabatic Expansion of Liquid Anhydrous Ammonia."

Dean Pasto earned three degrees from Cornell University—a B.S. in agronomy, M.S. in farm management and Ph.D. in land economics. He has been active far beyond the confines of Pennsylvania agriculture, serving from 1957-59 as a farm management specialist with the United Nations Food and Agricultural Organization. He headed a three-man exploratory mission to study agricultural potential in Venezuela and also studied farming practices in Asian countries during a six-month leave in 1965-66. In recognition of his leadership in helping revise the College's curriculum and in

John F. Hokanson

C. Marshall Ritter

providing graduate study opportunities in agriculture for black Americans, Dean Pasto was named an Outstanding Educator of America in 1971. He has served as president of the National Association of Colleges and Teachers of Agriculture and as chairman of the Resident Instruction Section, Division of Agriculture, National Association of State Universities and Land-Grant Colleges.

The nutrition of tree fruits, the evaluation of growth controlling rootstocks of apples and the maintenance of a collection of fruit varieties have been the primary research interests of Dr. Ritter. He earned his B.S. in vocational agriculture and M.S. in horticulture at West Virginia University and a Ph.D. in horticulture at Ohio State. Since 1969, Dr. Ritter has served as an Extension specialist in pomology. Last year he was a co-recipient of the Carroll R. Miller Award for excellence in research relating to improved production and use of peaches. He also received the Outstanding Teacher Award from the State Horticultural Association in 1967.

Dr. Swope attended Gettysburg College and received a D.V.M. at the University of Pennsylvania. He served as a captain in the U.S. Army Veterinary Corps and worked as a field veterinarian and research pathologist at the University of Maryland for four years. From 1958-60, he was a member of Kansas State University's veterinary education project in India. Appointed assistant dean at Penn State in 1964, he served with the Rockefeller Foundation as advisor to the University of Chile School of Veterinary Medicine and the Ministry of Agriculture Experiment Station in 1966-67. He was Chief of Party from 1969-71 for the Penn State Agricultural University Development Project in India and was the coordinator of International Agricultural Programs for the College from 1971-73.

Prof. Wingard helped conduct a deer management educational program to win public understanding and acceptance of the scientific harvesting of deer. He won an Award of Merit from the American Association of Conservation Information for developing 4-H wildlife conservation materials. The author of the book, *Urbans Planning in Rural America*, he is presently involved in wildlife pest management and aquatic plant control using herbicides. Prof. Wingard received his B.S. in forestry and M.S. in wildlife management from Penn State.

Funding Sources

For further information, call 865-1372

(297-2) The Office of Water Resources has announced a Jan. 27 deadline for FY 1978 Title II "Research Project Proposals." A unit of the U.S. Department of the Interior, OWR emphasizes solutions to important water problems of national interest. This emphasis covers areas such as, resource management alternatives, anticipation and preparation for droughts, and ground water management systems. Past projects have ranged from \$10K to \$250K with a \$70K median. (Ref. OWR Synopses No. 301)

(298-2) The National Research Council announces a Jan. 15 deadline for **Postdoctoral Research Associateships in Federal Laboratories**. Stipends of \$17K are provided. Call (202) 386-6554 for application material. (Ref. C&U Rept. 652)

(298-3) Proposals for the **NSF Antarctic Research Program** have a June 1 deadline. Research areas supported include: glaciology, biology, earth sciences, upper atmosphere physics, meteorology, and ocean sciences. Exchange scientist proposals are also supported relating to one of the USSR stations. (Ref. NSF 77-63)

(298-4) The Office of Education has announced deadlines for five projects under its **Right to Read Program**: Jan. 17 for **State Leadership Training**; Feb. 3 for **Reading Improvement Projects** (new applications); and April 3 for **Reading Academies**; **Reading Improvement Projects** (continuation applications); and **Special Emphasis**. The overall program purpose is to fund projects which will contribute to the improvement of reading skills throughout the country. (Ref. OE Application CFDA 15.533)

(298-5) NSF programs in **Information Dissemination for Science Education** have a Feb. 15 closing date. This program offers school system representatives and other teachers at the pre-college level the opportunity to learn about new and alternative instructional materials, classroom practices, and research findings. (Ref. SE 78-33)

(298-6) The HEW Office of Education has published final regulations for its **Career Education and Career Development Programs**. (Ref. 42FMR1225-30, 121/77) (CFDA 15.554)

Additional comments on BDR

There is something very deeply wrong with the present processes of American education in all matters pertaining to science and technology. The results are all around us. A citizenry, its political leaders and, alas, its intellectual leaders, who have become tourists in their native land, in their own culture suffused with, and dominated by, the science-technology motif. The damage to the socio-political fabric of society is only now beginning to be felt. The widespread anomie felt by such a large fraction of the population and the resulting petulance and impotent anger expressed in irrational voting in national and state legislatures on many political issues colored by technology bodes ill for the future.

Surely many individuals, societies, institutions must share the blame for this state of affairs. But in this article I focus only on the role of the requirements for the typical college degree in the U.S. — the BDR of Penn State (and of course most other institutions). I hang my head in shame when I consider the lack of concern shown by departmental faculties for the total content of their own curricula. Surely

every department should be required to turn in to the BDR committee its considered collegial judgement — open to scrutiny by the students and the outside world — regarding *ALL the subject matter*, (not courses) a student should have to be a functioning, well-educated citizen. I submit that this was the one thing that would rock the BDR concept in the science and technology area to its very foundation. I believe that the BDR concept provides the worst of both worlds due to egregious errors in educational theory. The first error is that everything — including all about science — is learned better from a cafeteria of 12 credits of unrelated courses. We lose thereby the entire benefit of pyramiding and synergizing knowledge. The alternatives of one (possibly two or three) carefully integrated set(s) of four courses, would multiply by one order of magnitude the total learning of science-technology of the average student.

The second error is to imply that science-technology is better taught by starting with general principles and abstract concepts and moving to the particular and the concrete. For the vast majority of students, nothing could be further from the truth. We proceed from experience and empirical data to first

principles; from applied to basic.

J. C. Slater, long-time head of M.I.T.'s physics department, wrote about this matter of the proper sequence of applied and abstract in learning about science even for the science major as follows:

"If the coming generation of chemists or physicists could receive training, in the first place, in empirical chemistry, in physical chemistry, in metallurgy, and in crystal structure and in the second place in theoretical physics, including mechanics, and the structure of atoms and molecules, and finally in thermodynamics, statistical mechanics, . . ." (emphasis added).

Most importantly, as someone intimately involved in the public (including college students) understanding of science, I find that it borders on the criminal, for a university faculty of scientists (many in the College of Science, some in EMS, Ag, Engg) and engineers (many in Engineering, some in other colleges) to fail to teach all students about the interrelation and mutual impacts of Science, Technology and Society. Here is what Einstein said once: *"It is not enough that you should understand about applied science in order that your work may increase man's blessings. Concern for man himself and his fate must always form the chief interest of all technical endeavors, concern for*

the great unsolved problems of the organization of labor and the distribution of goods — in order that the creations of our mind shall be a blessing and not a curse to mankind. Never forget this in the midst of your diagrams and equations."

We as the PSU faculty are responsible for the basic education of citizens who will spend more than half their professional lives in the 21st century. To continue old patterns unexamined fearlessly would be unconscionable. What in PSU-BDR requirements helps a student relate the science he learns to humankind's goals?

My alternative for the BDR S-T Requirement:

12 (or possibly 15) credits of an integrated set of courses covering Science and Technology (and its interaction with Society) taught by an intercollege, interdepartmental faculty group specifically interested in such courses drawn from the Colleges of Science, Engineering, E&MS, and Agriculture. The details of one such approach have been successfully worked out by a NSF-funded team of prominent scientists and engineers, and it has been tested in many universities.

Rustum Roy,
Professor of the Solid State,
Director, Materials Research Laboratory

Senate

(Continued from page 1)

teaching loads. Instead, he characterized it as an attempt to provide planned reallocation of resources to ensure quality in the future.

"Its purpose is simply to ask, 'What should we do, what can we do well, recognizing that for the foreseeable future, we'll have to do with less,'" he said.

Faculty Senate Chairman Thomas E. Daubert briefly outlined the Senate's activities related to the crisis and noted that a group of faculty senators had attended a breakfast meeting in Harrisburg with several members of the General Assembly in mid-November.

Senator Sally Small, associate librarian at the Berks Campus who was a member of that group, said the University needed to renew its efforts to sell itself to legislators from all counties and especially those with Penn State Campuses.

Representing the Senate Committee on External Affairs, Senator Philip A. Klein, professor of economics, presented a letter to the Senate which was mailed to all members of the General Assembly. The letter is signed by Dr. Daubert.

"Interest is currently running at the rate of about \$5,000 a day — a sum which is considerably in excess of the total costs for one student attending Penn State for an entire academic year," the letter states.

Senate also heard an informational report on the basic skills program. Representing the Special Committee on Basic Skills, Senator George McMurry, professor of electrical engineering, presented the following figures:

During summer and fall terms of 1977, 11,275 students took entrance exams to determine proficiency in math and writing. Some 647 or 6 percent were deficient in both writing and math, and 2,228 (20 percent) were deficient in either one or the other.

In all, 2,875 incoming degree candidates, about 25 percent of all incoming students, were deficient in one or both of the areas.

A total of 2,365 students (82 percent of total deficiencies) are at Commonwealth Campuses and Behrend College while 510 are at University Park.

On Aug. 30, the first retake exam was offered. Of the 710 students deficient in math who took the exam, 478 passed the exam. Those students had not taken any course specifically designed to help them, since Math 198B, the basic skills course, was not offered during summer term.

Some 170 students removed their deficiency in writing by passing English 4,

either through Resident Instruction or Continuing Education. Another 246 students did not take the course but did take the retake exam on Aug. 30. Of that group, 52, or about 21 percent, passed.

Dr. McMurry noted that a second retake exam was offered in mid-November and that its results will be reported to the Senate soon.

In other action, the Senate passed a proposal by the Committee on Planning and Development making the committee responsible for calling for the preparation of cost estimates to accompany major Senate proposals.

Psychology

(Continued from page 1)

former dean of Penn State's College of the Liberal Arts — and Charles J. Andersen, Penn State's graduate program in psychology was ranked 19th in the country by the academics polled.)

To compile productivity ratings, the researchers tallied the number of articles which were published by each department's faculty between 1970-75 in 13 journals of the American Psychological Association.

Penn State's faculty published 111.9 articles during the five year period, according to the study. Professors at the University of Wisconsin at Madison published the most articles — 260.4. Wisconsin had previously been ranked eighth in reputation by the Roose-Andersen survey.

Some 37 percent of the institutions measured in both surveys received higher rankings for reputation than for productivity, according to Cox and Catt. Among universities with the largest discrepancies were Brown (12th place in reputation; 70th, in productivity), Cornell (20, reputation; 59, productivity), Carnegie-Mellon (30 reputation; 68, productivity), Princeton (28 reputation; 60, productivity) and Harvard (4, reputation; 28, productivity).

Conversely, Purdue was ranked 40.5 in reputation in 1970 when its department was still fairly new, but is now 11th in productivity. The University of Missouri at Columbia and the University of Maryland were both ranked 62.5 in reputation seven years ago. Currently, Missouri stands 22nd in productivity and Maryland, 23rd.

The researchers cautioned that journal production is obviously only one measure of quality among graduate departments and noted that their findings might best be used by schools to assess their faculty's relative standing in quality journal-level productivity.

The new Center — before the snow fell.

York dedicates Student/Community Center

Speaking at the dedication of York Campus's new Student/Community Center on Dec. 4, Provost Edward D. Eddy expressed the hope that the building might become a force "for the enrichment and extension of education."

"Today offers a special opportunity for York," Dr. Eddy said, "because it might be a day when we add a major, missing dimension to higher education."

The missing element, according to Dr. Eddy, is "the art of conversing with much substance or meaning." He recalled that higher education once provided a milieu where "men and women had the time and inclination to discuss and argue some of the bigger issues of the world and of human existence."

Dr. Eddy cited several reasons for the decline of conversation. He noted studies showing that a typical pre-school American child spends 50 hours a week watching television, and declared, "If [television] has made us prisoners of trivia. We introduce it to the pre-schooler for seven hours a day, and it slowly eats into large chunks of the . . . free time available to the adult. And, in the process, we never learn to converse or discuss. . . ."

A second factor is over-emphasis on career education, Dr. Eddy said.

"One of our great faults," he continued, "has been to put such a heavy job orientation on higher learning that we ignore those far larger chunks of time when one isn't job-oriented or when one is doing something other than that for which he or she prepared."

"If careers and professionalism control

the form as well as the substance of the major thrusts of higher education, we will succeed in equipping the student to talk only about his or her job — and what that student will be."

Dr. Eddy cited still another deterrent to the art of conversation — the fear of admitting one's ignorance.

"And yet," he said, "that is the whole rationale for higher education: Somebody does know something more than we do — and we are here to find it out. I am pleading with the students, if not the faculty, then, to begin by admitting the limits of our knowledge. A campus exists because we want to share information and points of view. And that's what the art of conversation is all about."

"I hope this Center provides the missing element at Penn State/York: over a snack, around a lounge, in the office and Community Room, and wherever honest people talk together."

The new \$750,000 center was built with funds raised through a community drive initiated in 1975 by the Campus Advisory Board and led by William T. Wolf, past Advisory Board chairman.

The building is linked to the Campus gymnasium by a sky-lighted, brick-lined hallway and contains a multi-purpose Community Room where students can study and informal campus events are held. Student and staff office space is also included in the structure, as well as a new lunch room and student activity room.

The center provides long needed space for York's 900-plus day students, most of whom are commuters and consequently need a facility to use between classes.

University Park Calendar

Dec. 15-Jan. 5

Special Events

Thursday, Dec. 15

Tis the Season Candlelight Dinner, 5-6:45 p.m., HUB Terrace Room.
Hetzl Union Board Holiday Fireside Chat, Rev. Dale S. Bringham, Grace Lutheran Church, State College, "Herod's Magus," 7:30 p.m., HUB reading room.

Japanese Language and Literature films, "Our Ancestor: The World of Jomon," "Culinary Art of Japan," "Noh, Medieval Lyric Drama," and "Kabuki, Classic Theatre," 7:30 p.m., HUB assembly hall.

New Kensington House film, *A Night at the Opera*, 7:30 and 9:30 p.m., FUB rec room.
University Park AAUP meeting, Provost Edward D. Eddy will speak; a discussion about part-time and other non-tenure track faculty will follow, 7:30 p.m., Room 101 Kern.
University Readers, readings with special Christmas flavor and feeling, 8 p.m., Room 112 Kern.

Friday, Dec. 16

Christmas Crafts workshop, 11 a.m.-1 p.m., Kern lobby.
Traditional Christmas carols led by Phi Mu Alpha and Mu Psi Epsilon, noon-1:30 p.m., Kern lobby.

Tis the Season Candlelight Dinner, 5-6:45 p.m., HUB Terrace Room, international music featured.

Astronomy Open House, 7-10 p.m., 6th floor, Davey Lab. See Jupiter, first quarter moon, Great Nebula in Orion. Cloud date, Dec. 17, same time.

Hetzl Union Board film, *Oliver*, 7:30 p.m., HUB assembly hall.

Sports: gymnastics, vs. Michigan State, 8 p.m.

Saturday, Dec. 17

Children's holiday party, for 10-15 year olds, 12:30-3:30 p.m., Robeson Cultural Center, Walnut.

Hetzl Union Board film, *Oliver*, 1 and 7:30 p.m., HUB assembly hall.

Sports: women's swimming, vs. Rutgers, 1:30 p.m.; men's swimming, vs. Rutgers, 4 p.m.
Graduate Commons Madrigal Dinner, 6:30 p.m., Room 102 Kern.

france-cinema, Demy, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.
Faculty Club, Winter Holiday Ball, 9 p.m., Faculty Club.

Sunday, Dec. 18

University Chapel service. Christmas Concert.

All Faith Choir, 11 a.m., Music Bldg. recital hall.

Hetzl Union Board film, *Oliver*, 1 and 7:30 p.m., HUB assembly hall.

Shaver's Creek Nature Center, Birdhouse and Feeder Building Workshop, registration necessary, 8:05-10:15, 2 p.m., Stone Valley, Penn State Glee Club, 3 p.m., Eisenhower Auditorium.

Graduate Commons Madrigal Dinner, 6:30 p.m., Room 102 Kern.

france-cinema, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.

Monday, Dec. 19

Pass/fail deadline.
Donald Taylor, Social Welfare Dept., Melbourne, Australia, on "Changes in the Adult Corrections System of Australia," 1:15 p.m., Room 207 HUB.

Color Slide Club meeting, Xmas party: competitions, "Open" and "Abstract," 7:30 p.m., Room 112 Kern.

Tuesday, Dec. 20

Pass/fail deadline.

ARI Awards Day program, 3:30 p.m., Room 112 Kern.

Winter term recess begins, 9:55 p.m.

Thursday, Dec. 22

Holiday, University offices closed.

Friday, Dec. 23

Holiday, University offices closed.

Monday, Dec. 26

Holiday, University offices closed.

Tuesday, Dec. 27

Holiday, University offices closed.

Wednesday, Jan. 4

Winter term classes resume, 8 a.m.

Drop deadline.

Pass/fail deadline.

Course repeat deadline.

Pre-registration deadline (spring term 1978).

Commonplace Theatre, *Five Easy Pieces*, 7:30

and 9:30 p.m., Room 112 Kern.

Sports: men's basketball, vs. Rutgers, 7:30 p.m.

(EAA game).

Thursday, Jan. 5

Last date for written foreign language examinations (other than French and Spanish) for advanced degree candidates.

Seminars

Thursday, Dec. 15

Computation Center, "RJE," (2 of 5) suggested for users of research accounts, 7:30 p.m., Room 108 Form.

Friday, Dec. 16

Surface Science, H. Froitzheim, Bell Laboratories, on "High Resolution Spectroscopy of Energy Loss at Surfaces," 3 p.m., Room 339 Davey.

Physical Chemistry, Gerd M. Rosenblatt, PSU, on "Transitional and Internal Energy Accommodation in Gas-Surface Collisions," 4 p.m., Room 333 Whitmore.

Monday, Dec. 19

Computation Center, "RJE," (3 of 5), suggested for users of research accounts, 7:30 p.m., Room 108 Form.

Tuesday, Dec. 20

Food Science, Jeanne Hoskin on "Chemistry of Bread Flour," 11:10 a.m., Room 201 Borland.

Water Pollution Control, Walter A. Lyon, Bureau of Water Quality Management, DER, Harrisburg, on "Case Studies in Water Quality Management," 2:20 p.m., Room 128 Sackett.

Wednesday, Jan. 4

Fuel Science, Zigmund Frompovich on "Optical Characterization of Coals," 4 p.m., Room 301 Mineral Industries.

Thursday, Jan. 5

Chemistry, Allen J. Bard, University of Texas, Austin, on "Solar Energy Conversion at Semiconductor Electrodes," 12:45 p.m., Room 333 Whitmore.

Agronomy, Richard Fox, PSU, on "Nitrogen Fertility Research in Pennsylvania," 3:35 p.m., Room 111 Tyson.

Exhibits

Anthropology Museum: open Tuesday, 9 a.m.-noon; Wednesday and Thursday, noon-5 p.m.

Chambers Gallery: David Van Dommelen and Karen Roth, fibers, through Dec. 20.

Earth and Mineral Sciences Museum: open Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m., and by appointment, Mineral Industries Bldg.

Frost Entomological Museum: open weekdays, 9 a.m.-noon and 1-4:30 p.m., Room 102 Patterson. Architecture of insects and related arthropods.

HUB Gallery: Jinx Webster, hand built pottery, Dennis Gascio, candles, Model Railroad Club exhibit, Ukrainian Club exhibit, all through Dec. 31.

Kern Commons Gallery: International Christmas artifacts; Lim Byung Jin, oriental paintings; wall hangings and batiks, all through Dec. 23. Mary Cady Rubenstein, prints, opens Jan. 3.

Museum of Art: open Tuesday-Sunday, noon-5 p.m. Toun, 2:30 p.m., Sunday.

Lanny Sommers, poster art; Kenneth Beittel, pottery; John Koch, paintings, Models and Moments, all through Dec. 21.

Zoller Gallery: open weekdays, 8 a.m.-5 p.m., Saturday and Sunday, noon-5 p.m. Student holiday exhibition and sale, through Dec. 18.

News in brief

(Continued from page 1)

Affirmative Action review

The Committee to Review the Affirmative Action Office would appreciate hearing in writing from University employees who wish to communicate with them regarding their perceptions of the operations of the office.

The main functions of the Affirmative Action Office could be described under the following three categories: (1) To help activate the Affirmative Action Plan of the University in terms of the various departments in terms of meeting goals and timetables and helping departments recognize the policies to which this University is committed in the employment of minorities, women, the handicapped, and Viet Nam veterans; (2) to serve as the office which hears complaints and grievances in the area of discrimination and to follow these with appropriate investigatory actions; (3) to be the office that encourages program development in the areas of affirmative action, such as helping departments to provide awareness activities, specialized training, and other techniques that would help the University appreciate fully the problems of women and minorities.

The committee would appreciate receiving these communications no later than Jan. 15. Address correspondence to Robert S. Friedman, Room 112 Burrows Bldg., University Park, PA 16802.

New Centrex phone system starts Dec. 21

The telephone service at Penn State will be changed to the new Centrex System beginning at 6 a.m. on Dec. 21. Instructions for use of the new system have been mailed to all faculty, staff and clerical personnel. Any questions regarding use of the new system should be referred to Telephone Services at 865-8311.

Telephone numbers will not change as a result of the new service. The only exception to this is Campus Information. The 116 number will be disconnected, and all calls should now be placed to 4-4700.

University policy on nondiscrimination revised

The University has submitted assurances of compliance with Section 504 of the Rehabilitation Act, Title IX of the Education Amendments of 1972, Title VII and VIII of the Public Health Service Act, and Title VI of the Civil Rights Act of 1964, as amended. In order to bring the University into full compliance with these acts, a revision of the University Policy on Nondiscrimination was enacted by the Board of Trustees at their November meeting.

The revised policy reads as follows: "RESOLVED, THAT THE BOARD OF TRUSTEES HEREBY AFFIRMS THE

UNIVERSITY'S POLICY ON NONDISCRIMINATION IN ALL OF ITS EDUCATION PROGRAMS OR ACTIVITIES AS DEFINED BY LAW. The Board further reaffirms the University's policy of maintaining programs of affirmative action IN RECRUITMENT, HIRING AND PROMOTION OF ALL EMPLOYEES TO AVOID DISCRIMINATION. The officers of the University are directed to continue to administer all policies without regard to race, religion, color and national origin; and without regard to handicap, age, sex or status as a disabled or Vietnam era veteran, except as provided by law. The officers are further directed to review periodically all programs of affirmative action to ensure compliance with the policy of nondiscrimination."

New Kensington phone numbers changed

The New Kensington Campus announces a change in the telephone numbers published in last week's issue. The only Pittsburgh number to be used is (412) 339-7561. The network numbers have been changed to 645-7520, 7521, 7527, 7528.

WPSX Highlights

WPSX-TV, Channel 3, has scheduled a variety of holiday specials this year. Prime among them is a two-part *Evening at Symphony* program with the Boston Symphony Orchestra in a complete performance of Handel's *Messiah*. Part one of the classic work will be presented at 8 p.m. on Sunday, Dec. 18. Parts two and three will be featured at 8 p.m. on Monday, Dec. 19.

The children in the family will have their turn at the TV set on Tuesday, Dec. 20, at 8 p.m. with *Christmas with Mister Rogers*. The popular children's television host tells the story of a young ballena who is afraid her family will not be able to spend Christmas with her. This special will be followed at 9 p.m. with Andre Kostelanetz and the National Symphony Orchestra performing Tchaikovsky's *The Nutcracker* on In Performance at Wolf Trap.

Arthur Fiedler, the Boston Pops Orchestra, and the Tanglewood Festival Chorus present a yuletide concert on *Christmas at Pops* at 8 p.m. on Wednesday, Dec. 21.

Two holiday specials are scheduled on Thursday, Dec. 22. At 8:30 p.m., Richard Kiley explores the history of Christmas traditions on *A Christmas Celebration*, (continued on page 6)

Nominees sought for Campus positions

President Oswald is appointing advisory search committees to assist him in identifying candidates for the position of director at three Commonwealth Campuses. The positions will become available because of the retirements of Donald S. Hiller as director at DuBois; Charles J. Smith, at Osgontz; and Henry I. Herring, at Schuylkill.

Mr. Hiller will retire on Sept. 1, 1978; Mr. Smith on Jan. 1, 1979; and Mr. Herring on July 1, 1978.

Mr. Hiller joined Penn State's faculty in 1941 as an instructor in political science and economics at DuBois. Both his bachelor's and master's degrees were granted by Penn State, and he assumed the office of director at DuBois in 1951. Mr. Smith is also a Penn State alumnus, with a B.S. in civil engineering. His M.S. was granted by the Carnegie Institute of Technology. A member of the civil engineering faculty since 1947, he has been the director at Osgontz since 1966. Mr. Herring's tenure as director at Schuylkill dates back to 1949. He holds bachelor's and master's degrees from Penn State.

The advisory search committees will identify those candidates who possess the ablest possible academic leadership and competent administration for the three Campuses. Candidates should possess a doctoral degree or equivalent and several years' experience in teaching at the University level. Experience in higher education administration is especially desirable.

Letters of nomination or application should be directed to Dr. Robert G.

Quinn, dean of academic instruction for Commonwealth Campuses, Room 111 Old Main, University Park, PA 16802, by Feb. 21.

Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses, has appointed an advisory search committee to assist him in selecting an individual for the position of Associate Dean of Academic Instruction for Commonwealth Campuses.

The advisory search committee is chaired by Dr. Michael Cardamone, associate professor of physics (Schuylkill) and chairman of the Schuylkill Campus faculty organization. Other committee members are Michael Barendse, assistant professor of sociology (Worthington Scranton) and a member of the University Faculty Senate; Patricia Overdeer, professor of mathematics (Osgontz) and Senate member; Albert Skoma, assistant professor of English (Fayette) and chairman of the Senate Committee on Extended Degrees; Dr. Walter Severs, associate professor of pharmacy (Hershey) and chairman of the Intra-University Relations Committee; Dr. Kent Forster, professor and head, Department of History; Edward Elias, director of the York Campus; Dr. James Gallagher, associate dean for Commonwealth Campus Programs, College of Health, Physical Education, and Recreation; and Norman Aamodt, chairman of the Council of Branch Campus Student Governments.

The advisory search committee will be asked to identify qualified candidates

from within the University. The committee will receive nominations and applications effective immediately. These should be forwarded to Dr. Cardamone, Room 111 Old Main, no later than Feb. 21.

Dr. Carson Veach, director of the Altoona Campus; Dr. Robert Buckle, director of the New Kensington Campus; and George Bierly, director of the Wilkes-Barre Campus, announce the availability of the position of Associate Director for Academic Affairs at each of these Campuses.

The Associate Director for Academic Affairs will serve as the chief academic officer of the Campus. This individual will, under the supervision of the Campus Director, be responsible for providing leadership and developing and maintaining academic programs in resident and continuing education. Other areas of responsibility include assessing local community academic needs; academic planning and development; recruitment, assignment, evaluation, and development of faculty; course scheduling and records; and participation in other Campus and University activities.

Applicants for this position are expected to have a doctoral degree and a minimum of five years of experience in teaching and administration of higher education.

Advisory search committees are being established to assist the directors in this process. Letters of nomination or application should be forwarded to the Campus Director no later than Feb. 21. Two copies of a resume should accompany letters of application.

Appointments

(Continued from page 2)

William I. Lindley as assistant professor of agricultural education at University Park. B.S., M.S., Penn State U.; Ph.D., Cornell U. Formerly special consultant, U.S. Peace Corps; project manager, UNESCO; director of instructional material service, Dept. of Education, Cornell U.; instructor, W. Virginia U.; instructor, U.S. Agency for International Development.

Brian T. Keen as assistant professor of chemistry at Hazleton. B.S., S. Dakota State U.; Ph.D., U. of Wyoming. Formerly visiting assistant professor, U. of Wisconsin.

Augustus M. Kolich as assistant professor of English at University Park. B.A., Rutgers U.; M.A., Ph.D., U. of Chicago. Formerly instructor, Chicago State U.; assistant professor, Wabash College.

Ellen C. Marbach as associate professor of education at University Park. A.B., Hood College, M.S., Indiana State U.; Ed.D., U. of Houston. Formerly assistant professor, U. of Houston-Victoria Center; assistant professor, Mt. Mercy College, Texas; assistant professor, Arkansas State U.

Janice M. Mangle as assistant professor of engineering at Osgontz. B.S., M.S., Penn State U. Formerly project engineer, Pa. Power and Light Co.

Thomas F. Massaro as assistant professor of nutrition. A.A.S., State U. of New York at Canton; B.S., State U. of New York at Plattsburgh; M.N.S., Ph.D., Cornell U. Formerly research associate, Cornell U.

Yash P. Mehra as assistant professor of economics at University Park. B.A., D.A.V. College, Amritsar, Punjab, India; M.A., Delhi School of Economics, Delhi, India; Ph.D., U. of Minnesota. Formerly assistant professor, Illinois State U.

James L. Monroe as assistant professor of physics at Beaver Campus. B. Arch., Miami U.; B.A., U. of California; M.A., Ph.D., Columbia U. Formerly instructor, State U. of N.Y. at Stony Brook.

John S. Nichols as assistant professor of journalism at University Park. B.A., M.A., U. of Minnesota. Formerly teaching associate and research associate, U. of Minnesota.

Diana M. Papademas as assistant professor of sociology at Shenango Valley. B.A., M.A., Ph.D., Syracuse U. Formerly visiting faculty member, Syracuse U.; director, The Learning Center, Inc., Lebanon, Pa.; core faculty, Goddard College; program director, Tri-County Head Start and Community Action, Berlin, N. H.

Harriet J. Rudolph as assistant professor of speech communication at Hazleton. B.S., M.A., U. of Arkansas; Ph.D., Ohio State U. Formerly instructor, Ohio State U.

WPSX

recorded at New York's Cloisters Museum. At 9 p.m., Sir Michael Redgrave narrates A Christmas in Wales, the classic story by Dylan Thomas. Actors from the National Theater of the Deaf add scenes from the tale.

Christmas Eve Festivities begin at 8 p.m. with Christmas Around the World, an international celebration featuring a Christmas Eve mass from Bethlehem, the Westminster Abbey Cathedral Choir of London, the Tolz Boys' Choir from the Bavarian village of Bichl, a 17th century musical performance from France, and music from New Zealand, Jamaica, and the United States. At 9 p.m., the focus shifts back to America for an hour of Christmas At Our House with the Shro

Staff Vacancies

All University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these vacancies will be received until 5 p.m., Dec. 21.

DD NOT CONTACT THE AREA THAT HAS THE VACANCY.

FINANCIAL AID COUNSELOR (STUDENT AID), STUDENT AFFAIRS — University Park. Responsible to the Director of Student Aid for the management and coordination of the Federal College Work Study Program. A master's degree or equivalent in student personnel services, counselor education or higher education, plus up to one year of directly related experience is required.

ASSISTANT FOOD SUPERVISOR, HOUSING & FDD SERVICE OPERATIONS — University Park. Responsible to Supervisors for all phases of Terrace Room operations. Bachelor's degree in food and nutrition, hotel and restaurant management, institutional management, or equivalent.

RESEARCH AIDE, (DAIRY AND ANIMAL SCIENCE), COLLEGE OF AGRICULTURE — University Park. Collect semen from experienced bulls with artificial vagina according to prescribed procedures. Assemble sterile artificial vaginas for semen collection. Collect and record sexual behavior data and perform other tasks associated with semen collection. Measure and record body weights and measurements weekly and testis measurements quarterly. Summarize and statistically analyze data. Observe animal health and feeding behavior daily. Assist veterinarian in treatment of animals and during experimental surgery. Bachelor of science degree in animal industry, animal or dairy science, or related areas, its equivalent, plus one year of directly related experience with the management and feed of cattle.

EMPLOYMENT SPECIALIST, OFFICE OF PERSONNEL ADMINISTRATION, EMPLOYMENT DIVISION — University Park. Duties include recruitment, interviewing and placement of applicants for employment requiring a wide variety of backgrounds and experiences. Assist in filling job vacancies through internal programs of promotion from within. Assist in determining starting salaries for new employees and salaries for employees promoted. Provide information regarding employment policies, procedures and regulations to applicants, employees and supervisors. Prepare reports and records reflecting the activity of the Division. Assist with special assignments as necessary. Involves interaction with many levels of administrative, academic and professional staff members. Bachelor's degree, or equivalent, preferably in personnel administration or related fields, plus a minimum of two years of directly related administrative experience.

The Tokyo String Quartet

Arts Roundup

Tickets on sale Jan. 5-6 for Tokyo String Quartet

The young and talented Tokyo String Quartet will present the second program of the year on the Artists Series Fine Arts Series with an all-Bethoven program at 8:30 p.m. on Friday, Jan. 6, in Eisenhower Auditorium. They will present quartets Opus 18, No. 1; Opus 59, No. 2; and Opus 132.

Quartet members Kochiro Harada, Kikuei Ikeda, Kazuhide Isomura and Sadao Harada burst onto the musical scene by winning the Coleman String Competition in Pasadena, Cal., in April 1970 and four months later won the famous Munich Competition. During the last two years, the quartet has presented more than 150 concerts in Europe, North America and the Far East.

Tickets for the concert will be on sale only at the HUB Booth Wednesday and Thursday, Jan. 5 and 6, from 9 a.m. to 4 p.m. There will be no tickets on sale at the Eisenhower Auditorium Box Office.

Glee Club, Brass Choral to present joint concert

Two popular University musical groups will combine talents for a joint concert of Christmas music at 3 p.m. on Sunday, Dec. 18, in Eisenhower Auditorium.

Sharing the program will be the Penn State Glee Club, under the direction of Bruce Trinkle, and the Penn State Brass Choral, directed by James Benshoff.

Glee Club offerings will include carols and other Christmas songs spanning a range of several centuries, including two early works, Dufay's "Gloria" and "Hodie Christus natus est" by G. M. Nanino.

Tenor Dean Heblley will be featured in "Bethlehem," a traditional French carol arranged by Robert Barrow. Brahms' "The Hunter" and the Spanish carol, "La Virgen lava panes," will be sung by mezzo-soprano Kathleen Beck. Miss Beck will also perform a solo part in "In the bleak mid-winter."

A tenor trio, made up of Spurgeon Davis, Winthrop Cashdollar and Dean Heblley, will highlight an arrangement of the spiritual "Go Tell It to the Mountain."

The entire Glee Club will be heard again in the "Wassail Song," "Lo, how a rose e'er blooming" and "Good King Wenceslas."

The H.L.-Lo's, a smaller group taken from the Glee Club, will perform four songs from Benjamin Britten's A Ceremony of Carols, Op. 28.

The Brass Choral will follow the Glee Club with five seasonal offerings, including two medleys, Christmas in Brass by David Uber, and Sounds of Christmas, arranged by James Burden.

"Variations on an Advent Hymn," a major work by Fisher Tull, and a Richard Peaslee arrangement of "Deck the Halls" make up the rest of the Brass Choral's program.

The two groups will combine for a Barrow arrangement of the 16th century German carol, "Christ Was Born in Bethlehem" and for another medley that includes many favorite children's songs of the season.

Penn State Intercom

"The Shy People," a collection of 59 color photographs by Rowan P. Smolcha, is on exhibit in the HUB gallery through Jan. 28.

News in Brief

Bulletin board system set up at University Park

Five enclosed outdoor bulletin boards have been set up on the University Park campus and are available for use by registered student organizations and by academic and administrative departments.

Boards are located at the corner of Fraser and Curtin Roads, the corner of Curtin and Shortridge Roads, the bus stop shelter at Parking Lot 80, along Shortridge near Hibbs Hall, along Pollock Road west of Grange Bldg., and at the south entrance to the HUB.

Announcements will be restricted to University-sponsored activities, and display size is limited to a maximum of 14" x 22". Notices will be posted on a first received basis, with last priority given to permanent or long-term service announcements, which will be displayed for no longer than two weeks.

Persons interested in using the bulletin boards should send ten (10) copies of their announcement to Sally Johnston, Room 203 HUB. Further information regarding use of the boards may be obtained by calling 865-2563.

PSU to provide training in Venezuela

University personnel will assist the government of Venezuela in an extensive program designed to provide occupational and vocational training to the working class of Venezuela.

A \$1,034,154 contract, providing more than \$200,000 for each of five years, has been signed by Dr. Homero Parra Bravo, president of The National Institute for Cooperative Education (INCE), which will administer the program. President John W. Oswald and Floyd B. Fischer, vice-president for Continuing Education, signed for the University.

The initial program objectives, Mr. Fischer explains, will include conducting management development programs for INCE staff and teaching INCE personnel how to adapt techniques and procedures used by Penn State in its Continuing Education operations.

It is expected that later phases of the program may involve work in agricultural education, vocational agriculture, and possibly other areas.

Reserve lists due

Reserve reading lists for spring term 1978 should be submitted to the Reserve Reading Room, W11 Pattee, on or before Jan. 26 to allow ample time for processing. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes; all reserve lists will be processed strictly in order received.

Only required readings, which will circulate either for a two-hour period or for an overnight loan period, will be placed on reserve.

Typewritten lists should be submitted on reserve forms, which are available by mail or in person from the Reserve Reading Room, W11 Pattee.

Affirmative Action reference data available

The Employment Division has set up a small library of Affirmative Action and Equal Opportunity reference material to assist University personnel who are seeking recruitment and affirmative action information. Such information may prove helpful in ascertaining availability of minorities and women for specific job categories, for example, or in locating recruiting sources in fulfillment of affirmative action, good faith efforts. Some examples of the kinds of data available in the library are:

- (1) A directory for reaching minority groups,
- (2) A directory of resources for affirmative recruitment,
- (3) A handbook for recruiting at the traditionally black colleges,
- (4) A directory of organizations interested in the handicapped.

While the reference material is not available for overnight loan, it may be used in the Employment Division, Room 117 Willard, between 8 a.m. and 12 noon and from 1 p.m. to 5 p.m., Mondays through Fridays.

(Continued on page 2)

Senate to discuss changes in academic drop rules

Proposed changes to the academic drop rules will be the main legislative business to come before the University Faculty Senate when it meets on Tuesday, Jan. 10.

The meeting will be held at 1:10 p.m. in Room 112 Kern Bldg.

According to a report prepared by the Senate Committee on Admissions, Records, and Scheduling, current academic policies recognize three categories of students: degree, nondegree, and provisional.

Degree and provisional students who are dropped from their programs because of poor scholarship may become nondegree students. In addition, students who have been dropped from other institutions for academic reasons may enroll at Penn State as nondegree students.

However, the committee will point out, students must maintain a 2.00 cumulative grade point average in all nondegree courses or be dropped permanently from the University, even if they hold nondegree status for reasons other than poor scholarship.

In its report, the committee isolates three problem areas in the current policy: — Only three groups of students are recognized, but since some students of high academic standing hold nondegree status, a fourth group should be established to account for the two types of nondegree students.

— Nondegree students dropped for poor scholarship can never again take credit courses at the University. Last year, from fall through spring terms, there were 467 students permanently dropped for academic reasons.

— Students may not understand the seriousness of the academic drop action until it is too late.

The committee will recommend

adoption of two proposals. Under the first, the number of student groups would be increased from three to five: degree, provisional, nondegree, probationary, and restricted.

Students who choose nondegree status but had not previously been dropped from other programs would continue to be designated nondegree. Those who had been dropped from other programs would be probationary students, and probationary students who failed to maintain a 2.00 cumulative average would be dropped to the restricted category.

Restricted students would be allowed to register for only one course per term, but both restricted and provisional students could move back up to degree, nondegree, or provisional status by following reinstatement procedures.

Under the second proposal, students dropped from probationary to restricted status would not be allowed to register for course work at the University for at least one year.

The Senate will also hear an informational report identifying primary responsibilities related to research and scholarly activity of groups within the University.

The meeting will conclude with a forensic session on the delegation of responsibility by the Senate to appropriate faculty bodies.

Although the Senate's bylaws provide for delegation of some authority to Colleges, Campuses, and other bodies, it has not been clear in the past what responsibilities could be delegated.

Last summer the Intra-University Relations Committee was asked to provide guidelines and information on the subject, and the forensic session will provide input for that committee's study.

Minorities enrolled have increased from 1,394 to 1,905 during past year

The total number of identified minorities in Penn State's resident instruction program increased to 1,905 last fall from 1,394 in the fall of 1976, according to final fall term enrollment statistics.

The largest gain came in the number of black non-Hispanics, which increased to 1,294 this fall from 963 last year. This fall's total is the highest number of blacks recorded since the fall of 1972 when 1,300 were enrolled. The 1,294 blacks currently enrolled comprise 2.4 percent of the resident instruction population, equal to the 1973 percentage and slightly lower than in 1972, when blacks comprised 2.8 percent of the student population.

This fall's statistics also showed gains in identified American Indians and Alaskan natives (up to 124 from 106), Asian or Pacific Islanders (up to 243 from 134) and Hispanics (up to 244 from 191).

While noting that part of the increase in identified minority students could be due to improved reporting techniques, Thelma Price, assistant vice president for student affairs, said she believes the

increase reflects the success of concerted University efforts to increase minority recruiting and enrollments.

"I believe these statistics reflect the momentum which has been mounting in the past two years in response to the recommendations of the President's Task Force on Increasing Black Student Enrollment," Mrs. Price commented.

Among the efforts initiated by the University have been the opening of Community Centers in Pittsburgh and Philadelphia to facilitate recruitment and admission of regularly admissible black students.

Mrs. Price noted, however, that the increase in black students last fall was accomplished "even though our two Community Centers were not in operation until the late fall of 1976 and the winter of 1977, which is after the peak recruitment season for fall of 1977. Since the centers are in full operation now, I'm optimistic that we'll see continued increases in black enrollment."

Penn Staters

Dr. Robert S. Bond, professor of resource economics at the University of Massachusetts, has been appointed director of the School of Forest Resources and professor of forest science, effective Dec. 15.

He succeeds Dr. Wilber W. Ward, who, after filling the position for 11 years, elected to return full-time to teaching and research.

Dr. Bond, who has served on the Massachusetts faculty since 1956, earlier had spent two years as a forester with the Massachusetts Department of Natural Resources, and two years as a forester in Arkansas with Fordyce Lumber Co.

He is a graduate of the University of Massachusetts with a B.S. in forestry. His M.F. degree was conferred by Yale, and his Ph.D., by SUNY-Syracuse.

In 1961-62, while working for his doctorate, he held a science faculty fellowship of the National Science Foundation.

His most recent research has been concerned with Canadian bonded laborers in New England's logging industry, use and management policies of municipal resources-based lands in Massachusetts, trends in land values, ski area marketing studies and an analysis of campground markets.

Dr. Heinz K. Henisch, professor of physics and of the history of photography, has been awarded a Doctorate of Science by the University of Reading, England, where he obtained his doctor of philosophy degree in 1949. British universities are empowered to confer the Doctorate of Science upon recipients for distinguished post-doctoral research contributions to their field, upon the advice of internal assessors and at least two external examiners from other universities. The University of Reading has conferred fewer than 12 of these degrees.

Dr. Henisch received his degree on the basis of having published three scholarly books and approximately 100 research papers. He also founded and edits *History of Photography*, a research quarterly.

Dr. Cyril Griffith, associate professor of history, served as consulting editor for a special 69-page commemorative issue on black history in Pennsylvania, published by *Pennsylvania Heritage*, the magazine of the Pennsylvania Historical and Museum Commission.

Two staff members have been elected to key positions in the National Association of State Universities and Land-Grant Colleges. **Dr. James M. Beattie**, dean of the College of Agriculture, was elected chairman of the Division of Agriculture. **Floyd B. Fischer**, vice-president for Continuing Education, was elected chairman of the Council on Extension and Continuing Education.

Phyllis Miller, R.N., assistant director of nursing service for staff development at Hershey, has been appointed to a three-year term on the Statewide Health Coordinating Council by Governor Milton Shapp.

Thomas Rogers, professor of English, recently gave readings at the University of New Mexico, the University of Arizona, and Texas A&M.

Dr. Shih-Chuan Chen, professor of humanities and oriental civilization at Capitol Campus, retired Jan. 1 after nine years of service. He had previously taught at the University of Pittsburgh, Seton Hall University, Georgetown Court College and National Central University. While at Capitol, he published a book, *Confucian Analects: A Revised Text and New Commentary*.

Helmut J. Golatz, professor and head of the Department of Labor Studies, is marking his 25th year of service to the University.

Mr. Golatz received both the A.B. and M.A. degrees in history from Temple University. He has done additional graduate work at the University of Pennsylvania and Penn State in economics, industrial relations and higher education.

He taught at Muhlenberg College before joining Penn State in 1952 as an instructor in industrial relations, promoting, planning and conducting programs of short courses, conferences and institutes with labor organizations, as well as teaching undergraduate courses. In 1957 he became assistant professor of industrial relations; in 1959 he was appointed associate professor in the newly created Department of Labor Education, and in 1964 he assumed his present duties.

During his career at Penn State, Mr. Golatz has taught a variety of courses, in addition to organizing and supervising a Statewide labor education program. He has served as consultant to the Steelworkers Legislative Education Committee and has been an officer of the Pennsylvania Federation of Teachers, the Labor Education Section of the Adult Education Association of the United Steelworkers, the Governor's Committee of 100 for Better Education and the National Institute of Labor Education. He has been a member of several ad hoc program evaluation teams and currently is adjunct instructor at the AFL-CIO Labor Studies Center, ad hoc arbitrator for the Pennsylvania Bureau of Mediation and the Pennsylvania Labor Relations Board, and co-chairman of the Legislative Committee of the University and College Labor Education Association.

Mr. Golatz has published numerous technical articles in the field of labor studies and has written, with J. J. Kaufman, the following books and reports: *Chronic Unemployment in Pennsylvania, A Study of Four Areas of Unemployment in Pennsylvania, and Readings in Pennsylvania Economic Growth*. He has edited the *Guide to Pennsylvania Labor Legislation - 1967*.

Dr. George W. Gokel, assistant professor of chemistry, is co-author of the monograph, *Phase Transfer Catalysis in Organic Synthesis*, the first book on this subject. Prof. Gokel spoke on this topic at a colloquium at Syracuse University on Dec. 9.

Dr. Graham B. Spanier, associate professor of human development and sociology, is co-author, with Henry A. Bowman, professor emeritus at the University of Texas, of *Modern Marriage*, 8th edition, published by McGraw Hill. The book is intended for use by undergraduates in courses in marriage.

Dr. James H. Mortensen, assistant professor of agricultural education, was elected secretary of the American Association of Teacher Educators in Agriculture at the association's annual meeting held recently in Atlantic City.

Dr. G. P. Patil, professor of mathematical statistics, spoke in New Delhi last month at the Statistical Ecology Society for Mathematical Statistics and Probability. He also presented invited talks at the University of Warwick, England, and at the University of Parma, Italy.

Dr. Frank Dachille, professor of geochemistry, presented an invited lecture to the Geology Department of Stanford University. The title of his talk was "Large Meteorite Collisions — a Primary Determinant of Geology."

Dr. William E. DeMuth Jr. has been appointed assistant dean for continuing education at Hershey. He will continue to serve as professor of surgery, the post he has held since coming to the Medical Center in 1971.

Robert H. Farson, associate professor of journalism, is the author of a new book about the first public works project ever proposed in the New World. Entitled *The Cape Cod Canal*, it was published this month by Wesleyan University Press in both hardback and paperback editions.

The canal, which joins Buzzards Bay and Cape Cod Bay off the coast of Massachusetts, was completed in 1914, just a few weeks before the opening of the Panama Canal. It was financed by August Ferry Belmont, a vigorous New York millionaire who socialized with Theodore Roosevelt, directed the Metropolitan Museum of Art, and bred thoroughbred horses, the most notable being Man O'War.

Intended to provide a safer route for merchantmen and to offer a means of navigating the U.S. coastline in times of war, the toll canal was a fiscal disaster and, ultimately, was taken over by the federal government. It is operated today by the Army Corps of Engineers as the widest artificial waterway in the world.

News in brief

(Continued from page 1)

International Dinner Jan. 12-13

An International Candlelight Dinner will be held from 4:45 to 7 p.m. Thursday and Friday, Jan. 12-13, at the HUB Terrace Room.

The menu features Shepherd's Pie, Peking Pork, Prime Ribs of Beef, Seafood Marquetry, Chicken Breast Marengo and Wiener Schnitzel — along with appropriate vegetables, salads and desserts. There will also be live entertainment.

Meats Lab opens Friday

Retail sales will resume at the Meats Lab, located across from the open end of Beaver Stadium, on Friday, Jan. 6. The meat is from the University's herds and is slaughtered and cut by students in animal industry classes.

The store carries all the retail cuts of beef, pork and lamb, including steaks, chops, hamburger and sausages, at prices competitive with those in the area. Hours are from 1:30 to 4 p.m. on Fridays, and the store is only open during the academic term. Customers draw a number before shopping, and those with the lowest numbers are waited on first. There is generally a \$50 limit on purchases.

Arts Roundup

Chamber group to play

The Camera Orchestra of Salzburg, on its first United States tour, will present a concert at 8:30 p.m. on Thursday, Jan. 12, in Eisenhower Auditorium. The program is sponsored by the Artists Series.

A chamber ensemble of 21 musicians, the orchestra was founded in 1952 to specialize in Renaissance and Baroque music. It has also incorporated many of Mozart's works into its repertoire.

Thursday evening's program will include Handel's Concerto grosso, Opus 6, No. 6; Double Concerto for Oboe and Violin by Bach; Scarlatti's Symphony No. 6; and Haydn's La Passion Symphony No. 49.

Tickets for the program will go on sale from 9 a.m. to 4 p.m. Tuesday, Jan. 10, and Wednesday, Jan. 11, at the Artists Series HUB Booth.

"Butley" to be shown Jan. 11

The Eight from the American Film Theatre series continues with the screening of Simon Gray's *Butley* at 8 p.m. on Wednesday, Jan. 11, in Eisenhower Auditorium.

The film depicts one harrowing day in the life of Ben Butley, a lecturer in English at a London university. Alan Bates repeats his stage successes in both London and New York as Butley. Supporting roles are performed by Jessica Tandy, Michael Byrne and Richard O'Callaghan.

Tickets will be sold at the door the evening of the screening, beginning at 7:30 p.m. They are \$1.50 apiece.

French films scheduled

france-cinema is sponsoring the first State College showing of Jacques Demy's *Peau d'Ane* (*Donkey Skin*) Friday and Saturday, Jan. 6 and 7, at 7 and 9 p.m. in Room 112 Kern Bldg. Based on the Charles Perrault fairy tale, Demy tells the story of a king (Jean Marais) who promises his dying wife that he'll only remarry if he finds a bride who surpasses her in beauty. His daughter (Catherine Deneuve) turns out to be the only woman who qualifies, which naturally creates a problem. The movie, with music by Michel Legrand,

Jan. 5-15

Special Events

Thursday, Jan. 5

Last date for written foreign language examinations (other than French and Spanish) for advanced-degree candidates.

FSHA, Ancient Roman dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.

Friday, Jan. 6

france-cinema, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.

Sports: women's basketball, Penn State Invitational, 7 p.m.

Artists Series, Tokyo String Quartet, all-Beethoven program, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 7

Last date for March graduates to deliver doctoral theses to committee.

Shaver's Creek Nature Center, Cross-Country Ski Workshop, 9 a.m.-noon. How Plants Were Named, 8 p.m., Stone Valley.

Sports: women's basketball, Penn State Invitational, 2 p.m.; men's basketball, vs. Duquesne, 7:30 p.m., (EAA game).

france-cinema, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.

Sunday, Jan. 8

University Chapel service. Dr. Robert L. Cohn, PSU, 11 a.m., Eisenhower Chapel.

Sports: men's and women's bowling, vs. Drexel, 1 p.m.

Shaver's Creek Nature Center, Winter Discovery Walk, 2 p.m., Stone Valley.

france-cinema, *Truffaut, Day for Night*, 7 and 9 p.m., Room 112 Kern.

Monday, Jan. 9

Shakespeare film, *Macbeth* (Evans/Schaefer), 6:30 p.m., Room 1001 Chambers.

france-cinema, *Day for Night*, 7 and 9 p.m., Room 112 Kern.

Comp. Lit. film series, Kenneth Clark, "Civilization, The Hero as Artist," 8 p.m., Room 112 Kern.

Robert Trehy, baritone, all Schubert recital, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Jan. 10

Fixed date for meetings involving Commonwealth Campus faculty.

University Faculty Senate meeting, 1:10 p.m., Room 112 Kern.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Robert Hume, English, on "The Coke Papers: New Light on the Introduction of Italian Opera to England."

FSHA, Ancient Greek dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.

Shakespeare film, *Macbeth* (Wells), 6:30 p.m., Room 1001 Chambers.

ERM Club, Earl Mallick, vice-president, U.S. Steel, on "U.S. Steel Corporation and the Environment," 7:30 p.m., Room 301 Ag. Admin. Bldg.

English colloquium, Robert N. Hudspeth, PSU, on "Margaret Fuller: An American Life," 8 p.m., Room 1001 Kern.

Wednesday, Jan. 11

Commonsplace Theatre, *Harold and Maude*, 7:30 and 9:30 p.m., Room 112 Kern.

Sports: men's basketball, vs. Syracuse, 7:30 p.m.

Artists Series Film Festival, American Film Theatre, *Butley*, 8 p.m., Eisenhower Auditorium.

Alard String Quartet, all-Beethoven program, 8:30 p.m., Music Bldg. recital hall.

Thursday, Jan. 12

International Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.

FSHA, Ancient Spanish dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.

Comp. Lit. film series, *Nahami*, Japanese with English subtitles, 7 and 9 p.m., Room 112 Kern.

Sports: wrestling, vs. Oklahoma, 7:30 p.m.

Artists Series, Orchestra Camerata of Salzburg, 8:30 p.m., Eisenhower Auditorium.

Friday, Jan. 13

Board of Trustees meeting, Room 402 Keller.

International Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.

Hill films, *Harold and Maude* and *Star Trek Bloopers*, 7 p.m., HUB assembly hall.

Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Shaver's Creek Nature Center, Owl Prowl, 8 p.m., Stone Valley.

Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, Jan. 14

Last date for final oral doctoral examinations for March graduates.

Last date for March graduates to deliver master's theses or papers to adviser.

Faculty of Trustees meeting, Room 402 Keller.

Faculty Women's Club, Mid-Winter Coffee, exhibit of handwork done by members, 11:30 a.m.-a.m., Faculty Club.

Sports: men's and women's bowling, vs. Penn State Capital, 1 p.m.; wrestling, vs. Cleveland State, 2 p.m. (EJWL meet).

Shaver's Creek Nature Center, Children's Story Hour, 2 p.m., Stone Valley.

Hill films, *Harold and Maude* and *Star Trek Bloopers*, 7 p.m., HUB assembly hall.

Sunday, Jan. 15

University Chapel service. Dr. David Shannon, Pittsburgh Theological Seminary, Martin

Luther King, Jr. Service, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Ice Fishing and Fly Tying, 2 p.m., Stone Valley.

france-cinema, *Tabi, Playtime*, 7 and 9 p.m., Room 112 Kern.

Hill films, *Harold and Maude* and *Star Trek Bloopers*, 7 p.m., HUB assembly hall.

Seminars

Monday, Jan. 9

Biochemistry and Biophysics, J. A. McCammon, Harvard University, on "Large Scale Solvent Damped Motions of Proteins," 3:55 p.m., Room 101 Althouse.

Computation Center, "RJE," (4 of 5), suggested for users of research accounts, 7:30 p.m., Room 102 Forum.

Tuesday, Jan. 10

Applied Science, J. C. Johnson, PSU, on "Noise in Ships," 10:45 a.m., Walker conference room, Applied Science Bldg.

Biochemistry and Biophysics, J. A. McCammon, Harvard University, on "Internal Dynamics of Proteins," 11:10 a.m., Room 101 Althouse.

Food Science, Joseph Salji on "Development of Bitter Flavor in Cheddar Cheese," 11:10 a.m., Room 201 Borland.

Computer Science/Computation Center, Charles Forney, PSU, on "Contrasts Between MVT and MVS," 1 p.m., Room 325 Whitmore.

Water Pollution Control, James E. Erb, Bureau of Water Quality Management, DER, Harrisburg, on "Municipal Wasteload Management in Pennsylvania," 2:20 p.m., Room 128 Sackett.

Population Issues Research Office, Charles B.

Keely, Fordham University, on "U.S. Immigration Policy and Its Demographic Effects," 2:30 p.m., Room 158 Willard.

Genetics, Stephen Hanson, PSU, on "Mutation Breeding in *St. Paulia*," 3:55 p.m., Room S2 Fear.

Plant Pathology, Stylianos Tavantzis on "Recognition Specificity in Plant-Parasite Systems - An Introduction to Disease Defense Elicitors," 3:55 p.m., Room 213 Buckhout.

Wednesday, Jan. 11

Fuel Science, Philip Goldberg on "Use of the Stirred Reactor for the Study of Coal Dust Explosion Flames," 4 p.m., Room 301 Mineral Industries.

Thursday, Jan. 12

Chemistry, R. F. Porter, Cornell University, on "Reactions of Metal Atoms with Proton Donors," 12:45 p.m., Room 333 Whitmore.

Physics, R. J. Donnelly, University of Oregon, on "Turbulence," 3:50 p.m., Room 117 Osmond.

Agronomy, Nate Hartwig, PSU, on "Effect of Soil pH on Triazine Herbicide Activity and Resulting Quackgrass and Fall Pannum Control," 3:55 p.m., Room 111 Tyson.

Philosophy, Joseph Kockelmans, PSU, on "Some Reflections on Categories," 4 p.m., Room 101 Kern.

Computation Center, "RJE," (5 of 5), suggested for users of research accounts, 7:30 p.m., Room 102 Forum.

Exhibits

Anthropology Museum: open Tuesday, 9 a.m.-noon; Wednesday and Thursday, noon-5 p.m.

Chambers Gallery: Molly Terrill, paintings on paper, and PSU undergraduate and graduate art students, glass, both open Jan. 9.

Earth and Mineral Sciences Museum: open Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m., and by appointment. Mineral Industries Bldg.

Frost Entomological Museum: open weekdays, 9 a.m.-noon and 1-4:30 p.m., Room 102 Patterson. Architecture of insects and related arthropods.

HUB Gallery: Rowan P. Smolcha, The Shy People, photographs.

Kern Commons Gallery: Mary Cady Rubenstein, prints, and Lord Baldwin and Java Telaki, photographs, both through Jan. 14.

Central Pa. Scholastic Art Awards, opens Jan. 8.

Museum of Art: open Tuesday-Sunday, noon-5 p.m., Tours, 2:30 p.m., Sunday, The First Five Years, anniversary show of selections from the permanent collection, opens Jan. 8.

WPSX Highlights

The major battles of World War II, as experienced by soldiers who fought on both sides, are documented on *Battle Line*, a 13-week series beginning Friday, Jan. 13, at 9 p.m. Written and introduced by Jim Bishop, the series uses archive film to show how the war was perceived and experienced by both sides. *Battle Line* begins with the German invasion of Poland, in which the blitzkrieg was used for the first time.

The accomplishments and influence of the late Louis S. B. Leakey, an anthropologist and archaeologist, are surveyed on "The Legacy of L. S. B. Leakey," a National Geographic Special to be seen Monday, Jan. 9, at 8 p.m. The hour-long documentary shows Leakey at work in Tanzania's Olduvai Gorge, where he and his wife discovered *Zinjanthropus*—fossil remains of a hominid dating back 1.75 million years. In other segments, Jane Goodall and other scientists who were inspired and supported by Leakey, discuss the implications of his work. The program can also be seen Sunday, Jan. 15, at noon.

Walter H. Walters, dean of the College of

Arts and Architecture, discusses the problems of funding the arts on *Talkabout* Tuesday, Jan. 10, at 7:30 p.m. Also appearing on the program is Douglas Cook, head of the Department of Theatre and Film, who reports on an exhibit of contemporary stage design recently on view at Penn State. *Talkabout* may also be seen Saturday, Jan. 14, at 6:30 p.m.

The Ascend of Mount Fuji, a contemporary Russian play that was a controversial success when it premiered in the Soviet Union, has its American television debut on Hollywood Television Theatre

Tuesday, Jan. 10, at 8 p.m. Joseph Campanelle and Jeanette Nolan star in the drama, which focuses on a group of friends whose reunion is dominated by memories of a missing comrade—a poet who has been arrested as a subversive. The drama may also be seen Saturday, Jan. 14, at 3 p.m.

The unusual powers of plants are examined on "The Green Machine," a Nova documentary to be seen Wednesday, Jan. 11, at 8 p.m. The hour-long program describes such feats as the ability of plants to make food from solar power and the natural plumbing system that allows some trees to pump nutrients 300 feet into the air. It also views

Arts roundup

(Continued from page 2)

also stars Jacques Perrin and Delphine Seyrig.

Monday and Tuesday, Jan. 8 and 9, france-cinema will offer Francois

Truffaut's ode to the passing of the French studio film system, *Day for Night*. It will be shown at 7 and 9 p.m. in Room 112 Kern.

Alard presenting all-Beethoven program

The Alard Quartet will present its third concert of the season at 8:30 p.m. Jan. 11 in the Music Bldg. recital hall.

The quartet has chosen an all-Beethoven program for the Wednesday evening concert and will perform Opus 18, No. 4; Opus 95; and Opus 127.

Violinist Joanne Zagst explains that the Alard's decision to devote this program, and its remaining performances of the current concert season, exclusively to Beethoven's works was based on the University's Artists Series' booking of all-Beethoven programs by the Vermeer, Tokyo and Cleveland Quartets.

"These will give area audiences an

opportunity to hear in one season virtually all the Beethoven string quartets," Ms. Zagst says.

Other quartet members are Donald Hopkins, violinist; Raymond Page, violist; and Leonard Feldman, cellist.

Trehy to offer Schubert songs

The second in a three-part series of Schubert songs will be offered by baritone Robert Trehy at 8:30 p.m. on Monday, Jan. 9, in the Music Bldg. recital hall.

He will be accompanied by the well-known pianist John Wustman in a program commemorating the 150th anniversary of the composer's death.

In this recital, Mr. Trehy will perform the *Winterreise* or "Winter Journey," a cycle consisting of 24 songs. The text for the cycle is taken from the poetry of Wilhelm Muller.

"*Winterreise* is considered to be one of the greatest song cycles ever written," Mr. Trehy explains.

Mr. Wustman, whose appearance with Mr. Trehy is supported by a grant from the Institute for the Arts and Humanistic Studies, is a professor of music at the University of Illinois.

Implementation of The Copyright Act of 1976 on January 1, 1978, has created the need for interim actions by the University and its authors to clarify copyright ownership of journal articles.

The Copyright Act of 1976 became effective on January 1, 1978. Many of the provisions of this statute will affect the University community. The interim procedure set forth below will be effective only until a revision of the University Copyright Policy has been completed and implemented by the University's Board of Trustees.

The University has had an established University Copyright Policy which has provided that all works categorized as "scholarly"—including all works created by University authors either on their own initiative or as an assigned

Another aspect of the new copyright act is its impact on the photocopying of materials for classrooms. The University and the Faculty Senate Committee on Libraries are developing information on this subject to communicate to the faculty in the near future.

University duty without the execution of a written Agreement prior to the creation of the work—shall belong to the authors. The Copyright Act of 1976 provides that the ownership of the copyright in a work prepared by an employee within the scope of his or her employment belongs to the employer unless a written instrument is signed by both the employee and the employer, setting forth that the parties have expressly agreed otherwise. To enable University authors to continue to own any right in their works which are created within their "scope of employment", a written instrument must be signed by each faculty member. Specific sections of the Copyright Act of 1976 and their relationship to University authors and their copyrightable works are set forth below:

IMMEDIATE STATUTORY FEDERAL

COPYRIGHT—The Copyright Act of 1976 preempts the state common law with respect to copyright and provides for the first time immediate statutory federal copyright protection for the author of a work from the instant the work is fixed in any tangible medium of expression (before publication).

WORKS MADE FOR HIRE—A significant limitation concerning copyright ownership is set forth with respect to works created by employees in 17 USC 201:

—(b) **Work Made for Hire**—In the case of a work made for hire, the employer—
is considered the author for purposes of this title, and, unless the parties have expressly agreed otherwise in a written instrument signed by them, owns all of the rights comprised in the copyright.

DEFINITION OF WORK MADE FOR HIRE—The definition of the term "work made for hire" is set forth in 17 USC 101:

- (A) "work made for hire" is—
1) a work prepared by an employee within the scope of his or her employment; or
2) a work specially ordered or commissioned for use as a contribution to a collective work, as a part of a motion picture or other audiovisual work, as a translation, as a supplementary work, as a compilation, as an instructional text, as a test, as an answer material for a test, or as an atlas, if the parties expressly agree in a written instrument signed by them that the work shall be considered a work made for hire. For the purpose of the foregoing sentence, a "supplementary work" is a work prepared for publication as a secondary adjunct to a work by another author for the purpose of introducing, concluding, illustrating, explaining, revising, commenting upon, or assisting in the use of other work, such as forewords, afterwords, pictorial illustrations, maps, charts, tables, editorial notes, musical arrangements, answer material for tests, bibliographies, appendices, and indexes, and an "instructional text" is a literary, pictorial, or graphic work prepared for publication and with the purpose of use in systematic instructional activities.

CONTRIBUTIONS TO COLLECTIVE WORKS—Further, the Copyright Act of 1976 has a separate provision for "Contributions to Collective Works", 17 USC 201(c):
—Copyright in each separate contribution to a collective work is distinct from

copyright in the collective work as a whole, and vests initially in the author of the contribution. In the absence of an express transfer of the copyright or of any rights under it, the owner of copyright in the collective work is presumed to have acquired only the privilege of reproducing and distributing the contribution as part of that particular collective work, any revision of that collective work, and any later collective work in the same series.

TRANSFERS—Further, the transfer of copyright ownership is formalized in 17 USC 204:

—(a) A transfer of copyright ownership—
is not valid unless an instrument of conveyance, or a note or memorandum of the transfer is in writing and signed by the owner of the rights conveyed or such owner's duly authorized agent.

Since the University desires to continue the present University Copyright Policy with respect to "Contributions to Collective Works" created by University authors, such as journal articles, and since many of these works are prepared within the scope of employment, clear title to the copyright will not be transferred to the University unless a written instrument is signed by the University and the author. Until the existing University Copyright Policy can be revised in light of the new Act, the University upon request will provide and execute the necessary written instrument covering contributions to collective works for any faculty member. A sample copy of this Interim Written Instrument Covering Contributions to Collective Works is set forth below.

"INTERIM WRITTEN INSTRUMENT COVERING CONTRIBUTIONS TO COLLECTIVE WORKS [In Compliance with the Copyright Act of 1976, 17 USC 201.(b)]"

This instrument executed this _____ day of _____, 19____, by and between

hereinafter called **AUTHOR**, and **THE PENNSYLVANIA STATE UNIVERSITY, University Park, Pennsylvania** (hereinafter called **UNIVERSITY**).

Recitals

- (1) Prior to the Copyright Act of 1976, UNIVERSITY had an established University Copyright Policy which provided that all works categorized as "scholarly" including all works created by University authors either on their own initiative or as an assigned University duty without the execution of a written Agreement prior to the creation of the work—shall belong to the authors.
- (2) The Copyright Act of 1976 provides that the ownership of the copyright in a work prepared by an employee "within the scope of his or her employment" belongs to the employer unless a written instrument is signed by both the employee and the employer, setting forth that the parties have expressly agreed otherwise.
- (3) UNIVERSITY desires to maintain the relationship set forth in Recital (1) above with respect to contributions to collective works, and to comply with said Act.
- (4) **AUTHOR** desires to execute this Interim Written Instrument Covering Contributions to Collective Works in compliance with the provisions of said Act referenced in Recital (2) above.
- (5) **AUTHOR** desires to own the copyright in all of his or her contributions to collective works and to comply with said Act.

Agreement

IT IS THEREFORE AGREED AS FOLLOWS:

The copyright in copyrightable works fixed in a tangible medium of expression on or after January 1, 1978, and classified by the "Copyright Act of 1976" as "Contributions to Collective Works" created by **AUTHOR** (a) categorized by University Copyright Policy as "scholarly", or (b) categorized as "sponsored", but which are created as "scholarly" under University Copyright Policy, shall belong entirely to the **AUTHOR**.

This Interim Written Instrument Covering Contributions to Collective Works shall remain effective until such time as UNIVERSITY's Board of Trustees adopts a new University Copyright Policy.

IN WITNESS WHEREOF, and intending to be legally bound hereby, the parties have hereunto set their hands and seals the day and first written above.

Signed in the Presence of:

THE PENNSYLVANIA STATE UNIVERSITY

By: _____

Title: _____

AUTHOR

"Within the scope of employment is understood to mean "in the course of assigned University duties".

"This Interim Written Instrument Covering Contributions to Collective Works covers only a restricted category of creative works, and:

- (1) Does not cover the ownership of copyright in works by authors which are created "outside the scope of employment", which belong entirely to the authors;
- (2) Does not cover the ownership of copyright in works by authors which are created "within the scope of employment", unless they are contributions to a "collective work", i.e., does not cover books, audio-visual materials, computer programs, etc.; and
- (3) Does cover the ownership of copyright in works by authors which are created "within the scope of employment", and which are contributions to a "collective work" as defined in the "Copyright Act of 1976" to include "a periodical issue, anthology, or encyclopedia", i.e., scholarly journals.

JOURNAL ARTICLE COPYRIGHT TRANSFER FORMS—The first contact with the Copyright Act of 1976 for most faculty authors will be the execution of new forms which are required by scholarly journals before publication of contributions to faculty authors by the journals are to be executed by (a) faculty authors as

individuals; or (b) an authorized University representative; or in some cases, (c) both of the above.

In order to comply with this Act, for works fixed in a tangible medium of expression on or after January 1, 1978, the following types of works will require the execution of "Copyright clearance and transfer forms" as follows:

- (1) The forms covering works classified as scholarly under the University Copyright Policy which have been (a) created outside the scope of employment or (b) created within the scope of employment after the signing of an Interim Written Instrument Covering Contributions to Collective Works (as set forth above) should be signed by faculty authors.
 - (2) The forms covering works classified as scholarly under the University Copyright Policy which have been created within the scope of employment before the signing of an Interim Written Instrument Covering Contributions to Collective Works should be signed by an authorized University representative.
 - (3) The forms covering works covered by a standard or modified Contributed or Compulsory Copyright Agreement between the authors and the University should be signed by an authorized University representative.
- The Dean or Administrative Officer is the authorized University representative for these forms.

Where the work classified as scholarly was first fixed in a tangible medium of expression prior to January 1, 1978, the forms should be signed by faculty authors.

ing the right for the authors and their employing organization to make reproductions "not-for-sale"; and
(b) a second, and "special handling" type, requiring that the authors place "their own copyright notice and limited release to the journal" on the first page of their contribution, thereby preserving their individual copyright for later disposition and permitting the journal to "publish in all forms", but by their "prior consent", rather than as owner of the copyright.

Faculty authors must determine whether their contributions require "special handling". The ownership of the copyright may subject the authors to repeated requests for copies and permissions.

WRITTEN INSTRUMENT AVAILABILITY—Deans and Administrative Officers will provide Interim Written Instruments Covering Contributions to Collective Works to faculty and staff upon request. The Office of the University Provost will provide for execution of Interim Written Instruments Covering Contributions to Collective Works on behalf of the University after execution by authors.

REVISION OF UNIVERSITY COPYRIGHT POLICY—The University is preparing revisions required by the Copyright Act of 1976 to University Copyright Policy, University Copyright Procedure, and University Copyright Agreement Forms. The objectives in these revision are: (a) to preserve the authors' rights to their own scholarly works as has been the case in the past, (b) to accommodate the 1976 Law with as little change and form signing as practical, and (c) to protect the faculty and the University from the undesirable consequences of conflict between the 1976 Law and the present University Copyright Policy. These revisions will be reviewed by appropriate representatives of the faculty and University administrators and will become effective when approved by the University Board of Trustees.

Dr. Robert F. Custard, University patent counsel, (865-1765) will assist faculty and staff who have University-related copyright problems concerning the implementation of the Copyright Act of 1976.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, or those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotional may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Jan. 12. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

RESEARCH AIDE, POULTRY SCIENCE, UNIVERSITY PARK—Perform chemical analysis for various mineral elements in sewage sludge, plant and animal tissues. Perform biochemical analysis for various animal tissue, tissue fraction and body fluids. Collect tissues and body fluids and properly prepare for analysis. Summarize and report the results obtained. Bachelor of science degree in science, preferably in chemistry or biochemistry, plus 6-12 months of directly related experience is required.

AUDITOR, CONTROLLER'S OFFICE, UNIVERSITY PARK—Responsible to the Audit Manager for performing audits to appraise: extent of compliance with University policies and procedures, adequacy and reliability of records and management information reports, soundness and adequacy of accounts, financial, and other operating controls, and safeguarding of assets within any of the diverse operating, financial and administrative functions or organizations of the University as directed by and under the general supervision of the Audit Manager. Bachelor's degree (or equivalent) in accounting or related field plus 12 to 18 months of directly related experience.

"Lotus" by the 17th century Chinese painter Chu Ta.

Museum show highlights acquisitions

"The First Five Years," an exhibition of works from the permanent collection of the Museum of Art, will be featured at the Museum during January and February. The exhibition will highlight works acquired by the Museum since its opening in the fall of 1972, including some recent major gifts that have not previously been shown. Among these are "Bathers in a Cove, Maine," an oil by the American painter Maurice Prendergast, a gift to the University from the painter's

sister-in-law, Eugenie Prendergast, and a massive Buddha Head dating from the Liao dynasty of China, a gift from Dr. Ralph C. Marcove, a prominent collector of Chinese art. "The First Five Years" will occupy the whole of the Museum, with one gallery devoted to oriental art, another to European pieces and the third to American art, all from the permanent collection.

News in Brief

Calendar information available by phone

A University Park daily calendar of events will be available by dialing 863-1100 after Jan. 15. This new calendar, a part of the University TIPS (telephone information programs), can be heard around the clock. Any events of general interest to be included in the calendar may be sent to Lee Morrill, calendar editor, Room 312 Old Main, or telephoned to 865-2501.

Black Studies seeking academic director

The University is seeking an academic director for its Black Studies Program, effective July 1, 1978. The Black Studies Program is an important intercollege academic program within the University. The director must be highly qualified academically and have a regular, standing faculty appointment with a department. This normally requires a doctorate, teaching experience and research publications. In addition, the director should have a strong interest in continuing the development of a sound academic program in Black Studies and should have academic administrative skills. Nominations and applications with current resumes and academic references should be sent by Feb. 2 to The University Black Studies Director Search Committee, Box 908, Room 117 Old Main, The

Pennsylvania State University, University Park, PA 16802.

Trustees meeting Jan. 13-14

The Board of Trustees has scheduled the following meetings which are open to the public. They will be held in Room 403, J. Orvis Keller Bldg. Friday, Jan. 13 1:30 p.m. — Committee on Educational Policy. 3:15 p.m. — Committee on Physical Plant. Saturday, Jan. 14 9:30 a.m. — Committee on Finance. 10:30 a.m. — Board of Trustees.

University Council asked to help revise policy plan

University Council will be one of the groups asked to play an active role in constructing an agenda for a Presidential Commission to revise and update the University's academic policy plan, Provost Edward D. Eddy told Council at its Jan. 5 meeting. The current plan was approved by the Trustees in 1972, and enrollment information was updated in 1974. It is expected that a commission will be appointed by April, and the target date for presentation of the new plan to the Trustees is September 1979.

A special interdenominational service in memory of the Rev. Martin Luther King Jr. (Continued on page 4)

Bartoo discusses graduate education

The Graduate Council's program review effort has been its major contribution to the well-being of the entire University, Graduate School Dean James B. Bartoo told the University Faculty Senate in a recent talk on the Graduate School. Dean Bartoo pointed out that by next summer a five-year cycle of program review will have been completed for the University's 128 graduate programs, and the remaining reports will be presented to the Graduate Council for action sometime in 1978. He also observed in passing that program review is an open process and that the reports are accessible to faculty for study. "The process of program review, which has been fundamentally a peer review process, has shown itself an effective means of quality assurance in our graduate programs . . .," Dean Bartoo said. " . . . it has not resulted, as many people initially thought, in some dramatic discontinuation of graduate programs. . . ." "The positive benefits," Dean Bartoo continued, "have been that in the overwhelming majority of cases, reviewed programs have responded to the recommendations of evaluating teams by taking steps to implement many of those recommendations. . . ." Dean Bartoo also discussed several issues which he believes the Graduate Council will need to address. Among these is the question of what form program review should take in the future and also the question of whether the

Graduate School should offer an extended graduate degree for qualified persons with an interest in professional education. "In this area, one response might be an extended master's degree in professional studies," he said. "I personally have some reservations about an extended doctorate. There are several available models for this in the country, including some poor ones. If we were to offer an extended doctoral degree, one model that might be investigated is the one used by the University of London, which has had about 50 years' experience in offering this extended degree." Another issue, this one of common concern to the Graduate Council and the Senate, is that of offering 400-level courses for graduate credit. "There seems to be a growing feeling that 400-level courses are graduate courses," Dean Bartoo explained. "The Graduate School makes the distinction that they are undergraduate courses made available to graduate students to remedy deficiencies in their preparation for graduate work or to provide entry into 500-level courses." Dr. Bartoo also dealt with the issue of the meaning of membership in the graduate faculty, observing that some faculty seem to perceive this membership as "an honorary concept." "I'd like to make it clear that we do not consider this membership as an award. Membership in the graduate faculty is a functional concept," he stressed. "People are recommended, or not recommended, (Continued on page 4)

Penn Staters

Dr. Eugene S. Lindstrom, a specialist in bacteriology and formerly associate dean for resident instruction, College of Science, has been appointed head of the Department of Biology.

Dr. Lindstrom, who is marking his 25th year of service to Penn State, came to the University as an assistant professor in 1952 after a year as an Atomic Energy Commission postdoctoral fellow in enzyme chemistry at the Institute for Enzyme Research at the University of Wisconsin. In 1957, he was promoted to associate professor and in 1964 to professor. In 1960, he went on leave to the University of Minnesota, where he was a National Science Foundation senior postdoctoral fellow. He was named an assistant dean of the College of Science in 1966 and became an associate dean in 1970.

His research interests include bacterial photosynthesis, bacterial nitrogen fixation, and aquatic microbiology; and he is a Fellow of the American Academy of Microbiology.

A native of Ames, Iowa, Dr. Lindstrom earned all three of his advanced degrees in bacteriology at the University of Wisconsin, Madison.

Dr. Norman Freed, associate professor of physics, has been appointed assistant dean for resident instruction in the College of Science.

Dr. Freed joined the Penn State faculty in 1965, having previously served as a Ford Foundation Fellow at the Bohr Institute, Copenhagen, Denmark; a Nordita Fellow at the Institute of Theoretical Physics, University of Lund, Sweden; and as a research associate at the University of Nebraska.

Currently, he is an adjunct professor at the University of Lund. He has also held guest appointments at the University of Helsinki, Finland; the Center for Nuclear Studies of the French Atomic Energy Commission at Saclay, Paris, France; the Institute for Nuclear Sciences at the University of Grenoble, France; and the University of Paris, Orsay, France.

A specialist in theoretical nuclear physics, Dr. Freed is also a member of an external scientific advisory committee for the Bates Linear Accelerator at the Massachusetts Institute of Technology.

Dr. Freed earned his B.S. degree at Antioch College and M.S. and Ph.D. degrees at Western Reserve University.

Dr. David B. Geselowitz, professor and head of bioengineering, has been elected a Fellow of the Institute of Electrical and Electronics Engineers (IEEE) "for contributions to the application of electromagnetic theory in electrocardiography".

Dr. Thomas M. Seebohm, professor of philosophy, is the author of a new book, *Ratio Undi Chasmas: Ansätze und Ausbildung einer philosophischen und wissenschaftlichen Weltverständnis im Moskau Russland*. The publisher is Bouvier Verlag of Bonn.

Medieval Islamic and Hebrew scientific and philosophical literature which was translated in 15th century Kiev had a

profound influence on the struggle between the Judaizers and Orthodoxy in Muscovite Russia, and the book is the first analysis to be based on the philosophical positions in those translations and in Orthodox patristic literature.

Dr. Seebohm concludes that the heretical movement of the Judaizers, and the Orthodox Church's reaction to it, cannot be understood unless the philosophically relevant aspects are taken into account.

Dr. Louis C. Perez, professor of Spanish, is the author of a book, *La apologia en defensa de las comidias que se representan en España de Francisco Ortiz*, published recently by the University of North Carolina Press as part of its *Estudios de Hispanofilia* series.

The book is a study of a manuscript of previously unknown authorship which defends the theatre in seventeenth-century Spain. Never before edited or published, the manuscript was found in the National Library in Madrid.

Dr. Perez identifies the author as Francisco Ortiz Lucio, a Franciscan friar, and then goes on to demonstrate the importance of Ortiz's courageous defense of the theatre, which had come under attack for its bad influence on audiences. The entire text of Ortiz's treatise, transcribed by Dr. Perez from the original manuscript, is included in the book, with detailed notes and an index.

William E. Sharpe, instructor in Forest Resources Extension and associate of the Institute for Research on Land and Water Resources, has been named to a 14-member Review Panel to consider water research policy options for President Carter.

Theatre World Publishing Company has accepted for publication a new one-act play by **Dr. Lillian E. Preston**, associate professor of speech communication. *Last Weekend at High Ridge*, a comedy, will be available for production in the company's 1978 catalogue of plays. It is Dr. Preston's 15th published play.

Dr. Manfred Kroger, associate professor of food science, recently lectured on the "Pros and Cons, Costs and Benefits of Food Additives" at Temple University, at the invitation of the health education department, and at Trenton State College, at the invitation of the department of health and physical education.

Appointments

Joseph N. Fady as assistant professor of mathematics at Wilkes-Barre, B.A., M.S., Ph.D., Lehigh U. Formerly lecturer, Berks Campus; instructor, LaSalle College.

Steven F. Fenwick as assistant professor of film at University Park, A.B., Princeton U.; M.A., Cornell U.; Ph.D. expected in January from U. of Michigan. Formerly instructor, Harvard U.

Margaret R. Fete as assistant professor of arts and humanities at Behrend College, B.A., U. of Colorado; M.A.T., Wesleyan U.; M.A., Middlebury College; Ph.D., Ohio State U. Formerly instructor, Ohio Wesleyan U.

Greg N. Frederickson as assistant professor of computer science, A.B., Harvard U.; M.S., Ph.D., U. of Maryland. Formerly instructor, U. of Maryland.

Peter M. Jogo as assistant professor of art at University Park, B.A., M.A.,

SUNY-Albany; M.F.A., Cornell U. Formerly assistant professor, Kalamazoo College.

Thomas M. Kando as associate professor of recreation and parks at University Park, B.S., U. of Amsterdam; M.A., Ph.D., U. of Minnesota. Formerly assistant professor, UC-Riverside; associate professor, California State U.

Joel M. Lee as assistant professor of health planning and administration at University Park, B.S., Southern Illinois U.; M.P.H., U. of Texas; doctoral candidate, U. of Texas.

Beth R. Molomon as assistant professor of human nutrition, Extension specialist, at University Park, B.S., U. of Michigan; M.S., Ph.D., Kansas State U.

Joan M. Rinehart as associate professor of nursing at University Park, B.S.N., U. of Virginia; M.S.N., Catholic U. of America; Ph.D., U. of Maryland. Formerly assistant professor, Catholic U.; associate professor, West Virginia U.

William G. Skillen as instructor in mining engineering at Altoona, B.S., PSU. Formerly sales representative, Quaker Sales Corp., Johnston.

Martha L. Starling as instructor of human development at University Park, B.S., Kansas State U.; M.S., Ph.D., Penn State.

David A. Stern as assistant professor of theatre arts at University Park, B.F.A., U. of Connecticut; M.A., Ph.D., Temple U. Formerly assistant professor, Wichita State U.

Elizabeth J. Susman as assistant professor of nursing at University Park, B.S., Ph.D., PSU. Formerly NIH Visiting Fellow; psychiatric nurse.

Interdisciplinary cross-checking is a necessity

Editor's note: This is the third in a series of articles about interdisciplinary education. The author is professor emeritus of sociology.

The thesis of this essay is that any single one of the social "sciences", psychology and sociology and the rest, cannot validly develop in scope and depth within each discipline itself. The physical sciences have been practicing such cross-borrowing in their development without too much fuss; so has psychology, especially in the case of sensory processes (e.g., psychophysics in the study of vision and audition, psycho-chemistry of stimulus correlates in the study of olfaction and gustation; and borrowing so much from physiology about the neuro-muscular system). It is the immature ethnocentrism of social disciplines that is responsible for the debate about cross borrowing, which is a fully contemporary. The failures of cross-disciplinary scientific projects and enterprises for grappling with urgent matters (like intergroup problems) are due to the ill-conceived and incorrect applications of these undertakings. The major Do's and Don'ts for the effective application of interdisciplinary borrowing and cross-validation of realistic hypotheses, and generalizations will be presented in a capsule form in a special section at the end.

The necessity of interdisciplinary coordination in the social disciplines is not diminishing, in spite of the feverishly thriving comings and goings, and the research and publication boom of unprecedented proportions. In fact, this necessity is being acutely accentuated because of the unsettling crisis that is mounting seriously in the social sciences proportional to the research and publication boom — and ironically because of it! I shall attempt to illustrate. Irreconcilable controversies are raging over the fundamentals without which a discipline can only shoot erratically in all directions. The fundamentals over which irreconcilable controversies rage include even the very conception of the nature of

the human psychological system. Especially, what makes humans tick? That is the basis of their very motivation. Their unsettled fundamentals include the very nature of the human social system.

In view of this crisis situation and the impasse the social disciplines have gotten themselves locked into, it is highly unrealistic even to approach the staggering problem of their coordination without a sober recognition of the prevailing crisis; without at least an elemental conception of its nature; without taking due note of the fact that the causes of the crisis lie outside the traditional ivory covered walls of academia; without sufficient realization that the causes lie in the hitherto unprecedented changes and upheavals that have been taking place all over the world not excluding the United States, as duly underscored by so many analysts within and outside academia. Therefore, the most sensible thing one can do within the limits of this one shot essay is to concentrate on the crisis in which the social disciplines are engulfed. Even such a quick analysis of the crisis situation may be helpful in pointing to some practical Do's and Don'ts to be observed for coordinating social disciplines. Such a coordination is essential for the shaping of a commonly shared paradigm, on whose validated grounds each discipline can develop without the monopolistic claims of the single disciplines and leading factions therein.

Some specific steps that will be referred to briefly in this essay towards coordinating social disciplines will be expanded in a long chapter being prepared for publication in the near future. The chapter will be an expansion and documentation of the paper written, and first published in Japanese upon the joint invitation of Professor Tsujimura, chairman of the Social Psychology Department of Tokyo University, and Professor Yasubei Oguchi, professor of engineering, both officers of Honda Memorial Foundation. I am not bringing in the names of the colleagues in vain in the way of dropping names. The implied

point here is very much related to the task assigned to me in this one shot symposium. The Honda Foundation sponsors and funds International Association of Traffic and Safety Sciences — a very much down to earth vital area for humans all over — Tokyo, New York, Shanghai, or Paris. The majority of the members of this Safety Sciences Association are hard boiled engineers of electronics, industrial machine engineering, engineering design and so on. These top drawer technocratic experts don't take a supercilious technician's attitude to solve even such down to earth practical problems as urban congestion and crowding and traffic safety as jobs that can only be handled by technicians with engineering or electronics training. Evidently their perspective has sufficiently matured to include, in the job to be done, the concerted deliberation of experts trained in social disciplines. They include experts trained in political science, economics, urban problems, physiology, psychology, psychiatry, traffic psychiatry and so on.

There is nothing as compelling as learning things the hard way. These engineers did learn it the hard way in enlarging their perspective to include others not from within their own exclusive fold within engineering for tackling problems. The social problems like poverty, intergroup, international problems and the developing versus developed nations are hardly any less complicated, any less multi-faceted than the problems of traffic safety or crowding in Tokyo or New York subways. One single war causes more death, dislocation and misery than all that in a dozen multi-million cities. Therefore, the conviction is growing in me that the experts in the social disciplines will have no choice but to come out of their ivory ethnocentric castles to converge towards paradigms that all can stand on and engage, on those common grounds, in dialogues in which they can effectively talk with one another rather than talk at each other.

University Park Calendar

Jan. 12 — 22

Special Events

Thursday, Jan. 12

International Candlelight Dinner, live entertainment, 4:45-7 p.m., HUB Terrace Room.
FSHA, A Spanish/Mexican Experience, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.

Comp. Lit. film series, *Nahami*, Japanese with English subtitles, 7 and 9 p.m., Room 112 Kern.

Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Sports: wrestling, vs. Oklahoma, 7:30 p.m.
Artists Series, Orchestra Camerata of Salzburg, 8:30 p.m., Eisenhower Auditorium

Friday, Jan. 13

Board of Trustees meeting, Room 402 Keller.
International Candlelight Dinner, live entertainment, 4:45-7 p.m., HUB Terrace Room.
Astronomy Open House, 7-10 p.m., 6th floor Davey Lab. See Mars, Jupiter and the moon.

Cloud date, Saturday, Jan. 14.

Hillel films, *Harold and Maude* and *Star Trek* Bloopers, 7 p.m., HUB assembly hall.
Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Shaver's Creek Nature Center, Owl Prowl, 8 p.m., Stone Valley.

Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, Jan. 14

Last date for final oral doctoral examinations for March graduates.

Last date for March graduates to deliver master's theses or papers to adviser.
Board of Trustees meeting, Room 402 Keller.
Faculty Women's Club, Mid-Winter Coffee, exhibit of handwork done by members, 9:30-11:30 a.m., Faculty Club.

Sports: men's and women's bowling, vs. Penn State-Capitol, 1 p.m.; wrestling, vs. Cleveland State, 2 p.m. (EWL meet).

Shaver's Creek Nature Center, Children's Story Hour, 2 p.m., Stone Valley.
Hillel films, *Harold and Maude* and *Star Trek* Bloopers, 7 p.m., HUB assembly hall.

Sunday, Jan. 15

University Chapel service, Dr. David Shannon, Pittsburgh Theological Seminary, Martin Luther King Jr. Service, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Ice Fishing and Fly Tying, 2 p.m., Stone Valley.
france-cinema, *Tati*, *Playtime*, 7 and 9 p.m., Room 112 Kern.

Hillel films, *Harold and Maude* and *Star Trek* Bloopers, 7 p.m., HUB assembly hall.

Monday, Jan. 16

Deadline for completed applications for IAHS Research Fellowships for summer and fall terms, Hilseng Cottage.

Two Cultures Dialogue, Robert Price, philosophy, on "Energy Problem: Background and Ethical Issues," noon, State College Hotel.

Shakespeare film, *Hamlet* (Williamson/Richardson), 6:30 p.m., Room 101 Chambers.
Comp. Lit. film series, Kenneth Clark, "Civilization/Protest and Communication—Rise of Protestantism, Invention of Printing Press, and the Art of Holbein and Durer," 7 p.m., Room 102 Kern. Free admission.

france-cinema, *Playtime*, 7 and 9 p.m., Room 112 Kern.

PSO Baroque Ensemble, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Jan. 17

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. John Keiser, libraries, on "An Actress: On Paper, On the Stage and In Bronze."

FSHA, Victorian England dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.

Shakespeare film, *Hamlet* (Olivier), 6:30 p.m., Room 101 Chambers.
University Readers, stories by William Tenn, 7:30 p.m., HUB assembly room.
International Council Lecture, 7:30 p.m., Room 112 Kern.

Artists Series/Film Festival, *Lloyd, Never Weaken and Why Worry?*, 8 p.m., Eisenhower Auditorium

The New York Renaissance Band will perform Jan. 20.

Wednesday, Jan. 18

Commonplace Theatre, *Steppenwolf*, 7:30 and 9:30 p.m., Room 112 Kern.

Friends of the Museum of Art Gallery Talk, Fedorick R. Matson, PSU, on "The Pottery of Ancient Egypt and Their Present-Day Descendants: The Importance of Pottery in Human History," 8 p.m., Museum of Art.
University Theatre, student preview, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.
Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, Jan. 19

College of Education faculty luncheon, 12:30 p.m., Room 101 Kern.

FSHA, French dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.
Comp. Lit. film series, *Ugetsu*, Japanese with English subtitles, 7 and 9 p.m., Room 112 Kern.

University Readers, stories by William Tenn, 7:30 p.m., HUB assembly room.

Central Pa. Society of the Archeological Institute of America, Anette Kozliff, Cleveland Museum of Art, on "International Politics and Art of Tutankhamen's Egypt," 8 p.m., Room 101 Kern.

University Theatre, Milan Sitt's *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Friday, Jan. 20

Quarterback Club annual banquet, 6:30 p.m., HUB ballroom

Chinese Student Association film, 7 p.m., Room 112 Kern.

Jewelry and Metal Smithing workshop, David M. LaFantz, Kent State University, 7:30 p.m., Room 101 Chambers. Free admission.

Sports: men's basketball, vs. Massachusetts, 7:30 p.m. (EAA game).

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Artists Series, New York Renaissance Band, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 21

Sports: men's fencing, vs. William Paterson and Ohio State, 9 a.m.; men's and women's bowling, vs. Bloomsburg, 1 p.m.; women's fencing, vs. Ohio State, 1 p.m.; women's swimming, vs. Pittsburgh, 1:30 p.m.; men's swimming, vs. Pittsburgh, 4 p.m.

Phi Who Folies, 11 a.m.-6 p.m., HUB ballroom.
france-cinema, *International Animation Festival*, 7 and 10 p.m., and *Resnais, Last Year at Marienbad*, 8:15 p.m., Room 112 Kern.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

David Vogel, viola, 8:30 p.m., Music Bldg. recital hall.

Sunday, Jan. 22

Sports: men's volleyball, Nittany Lion Invitational.

University Chapel service, Dr. Theodore Kiffer, PSU, 11 a.m., Eisenhower Chapel.

Central Pa. Scholastic Art Awards, noon, Rooms 101 and 112 Kern.

Shaver's Creek Nature Center, Family Nature Movies, 2 p.m., Stone Valley.

france-cinema, *International Animation Festival*, 7 and 10 p.m., and *Last Year at Marienbad*, 8:15 p.m., Room 112 Kern.

Seminars

Thursday, Jan. 12

Computation Center, "RJE," (5 of 5), 7:30 p.m., Room 102 Forum.

Monday, Jan. 16

University Chapel and Biophysics, Ben Ware, Harvard University, on "Laser-Doppler Light-Scattering Methods in Biochemistry and Cell Biology," 3:35 p.m., Room 101 Althouse.
Computation Center, "Text Processing," (1 of 4), introductory programming, 7:30 p.m., Room 102 Forum.

Tuesday, Jan. 17

Biochemistry and Biophysics, Ben Ware, Harvard University, on "Electrokinetic Studies on Suspended Mammalian Cell Surfaces," 11:10 a.m., Room 101 Althouse.

Biology, W.A. Dunsen, biology, on "The Physiological Ecology of Snakes in the Sea and the Deserts: Studies on the Permeability of the Skin to Water and Salt and the Search for New Salt Glands," 11:10 a.m., Room 111 Life Sciences.

Food Science, Geraldine Dorsett, on "Warmed-over Flavors of Cooked Meats," 11:10 a.m., Room 201 Borland.

Computer Science/Computation Center, Peter Jurs, chemistry, on "Computer Assisted Studies of Chemical Structures Related to Biological Activities," 1 p.m., Room 325 Whitmore.

Water Pollution Control, Richard L. Speece, Drexel University, on "Aeration Alternatives and Energy Considerations," 2:20 p.m., Room 128 Sackett.

History, James H. Brucker, PSU, on "Reform and Regalism: Francisco Leandro de Viana, Count of Tepa, and Spanish Colonial Administration under the Bourbons," 3:30 p.m., Room 101 Kern.

Genetics, Roberta Miller, physical education, on "Human Dermatology," 3:55 p.m., Room 52 Frear.

Plant Pathology, Alan Biggs on "Phytoalexins as Determinants of Disease Response — Phaseolin," 3:55 p.m., Room 213 Buckhout.

Nuclear Engineering, Dr. Lee Bettenhausen, Environmental Protection Agency, on "Radiation and the Environment: Radiation Levels from Coal Plants," 4 p.m., Room 225 EE West.

Wednesday, Jan. 18

Fuel Science, Norman C. Deno, chemistry, on "The Structure of Coal," 4 p.m., Room 301 Mineral Industries Bldg.

Thursday, Jan. 19

Chemistry, Charles P. Casey, University of Wisconsin, on "Studies of the Olefin Metathesis Reaction," 12:45 p.m., Room 333 Whitmore.

Anthropology, Daniel Kosk-Karrel, Catholic University, on "Archeological Excavations of Colonial Sites on Costal Haiti," 3:30 p.m., Room 112 Kern.

Physics, D.O. Edwards, Ohio State University, on "The Free Surface of Liquid Helium," 3:50 p.m., Room 117 Osmond.

Agronomy, David Welner, University of Maryland, on "Heat Tolerance Studies on Kentucky Bluegrass and Perennial Ryegrass," 3:55 p.m., Room 111 Tyson.

Computation Center, "Text Processing," (2 of 4), introductory programming, 7:30 p.m., Room 102 Forum.

Exhibits

Chambers Gallery: Molley Terrill, paintings on paper, and PSU undergraduate and graduate art students, glass.

HUB Gallery: Rowan P. Smoltha, The Shy People, photographs.

Kern Commons Gallery: Mary Cady Rubenstein, prints, and Rod Baldwin and Geza Telcki, photographs, both through Jan. 14. Central Pa. Scholastic Art Awards, opens Jan. 14.

Museum of Art: open Tuesday — Sunday, noon-5 p.m., tours, 2:30 p.m., Sunday. The First Five Years, anniversary show of selections from the permanent collection.

Zoller Gallery: student ceramic exhibition, through Jan. 18.

WPSX Highlights

For 70 years, Greenwood Furnace, Pennsylvania, was a thriving community centered around the manufacture of pig iron. Overnight the community died and vanished. Tuesday, Jan. 17, at 7:30 p.m.,

Talkabout presents a 30-minute documentary series, "Pieces of Greenwood," which recalls the early days of this community through the work of archaeologist Paul Heberling of Juniata College.

"The American least likely to be invited to a D.A.R. meeting" is the way one critic described longshoreman-philosopher Eric Hoffer. On Tuesday, Jan. 17, at 8 p.m., Eric Hoffer: The Crowded Life combines a portrait of this unusual philosopher with a glimpse of his ideas. Selections from Hoffer's writings are read by actor Richard Basehart.

On Wednesday, Jan. 18, at 8 p.m., Nova foresees a new era of preventive medicine when doctors will be able to predict each individual's susceptibility to diseases and immune against them at an early age. The 60-minute science documentary, "Blueprints in the Bloodstream," focuses on the body's *human leukocyte antigens* (HLA) system, which determines its tissue type according to the genes carried by Chromosome 6.

The first year of President Carter's administration is reviewed Thursday, Jan. 19, at 8:30 p.m. in a 30-minute public television special, **The 365th Day of the Carter Administration.**

Arts Roundup

N.Y. Renaissance Band to perform Jan. 20

Using instruments of the period, the New York Renaissance Band will perform music from the Middle Ages, Renaissance and early Baroque eras at 8:30 p.m. on Friday, Jan. 20, in Eisenhower Auditorium.

The musicians play a wide range of instruments, including recorder, cornetto, sackbut, shawm, dulcian, krumphorn, viol and lute. They place particular emphasis on the dance and instrumental literature written for renaissance winds.

Tickets for the performance will be on sale from 9 a.m. to 4 p.m. on Wednesday and Thursday, Jan. 18 and 19, at the HUB Booth.

Matson to speak on ancient potteries

Dr. Frederick R. Matson, research professor of archaeology, is presenting a gallery talk at 8 p.m. on Wednesday, Jan. 18, at the Museum of Art. His subject is "The Pottery of Ancient Egypt and Their Present Day Descendants: The Importance of Pottery in Human History."

Archaeology lecture

A lecture, "International Politics and Art of Tutankhamen's Egypt," will be presented by Anielle Kozloff, associate curator in charge of ancient art at the Cleveland Museum of Art, at 8 p.m. on Thursday, Jan. 19, in Room 101 Kern Bldg. The lecture is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Ms. Kozloff, an expert on painting and relief styles of the Eighteenth Dynasty in Egypt, will discuss literary sources describing Egypt's political relationships with Crete, Anatolia and the Levantine coast just preceding and during the reign of Tutankhamen. Foreign influences on the styles and motifs of the works of art found in the tomb will also be discussed.

"The Runner Stumbles" premieres Jan. 19

The third production of the 1977-78 University Theatre season will be Milan Stitt's *The Runner Stumbles*, opening in the Pavilion Theatre on Thursday, Jan. 19.

The Runner Stumbles is based on an actual case in rural Michigan in 1911 involving a Catholic priest accused of murdering a nun.

Rather than a traditional courtroom trial drama, *The Runner Stumbles* flows from the present to the past in a series of flashbacks portraying a relationship between Father Rivard and Sister Rita that was indeed out of the ordinary for a priest and a nun.

The Runner Stumbles will be produced in the Pavilion Theatre Jan. 19-21 and 24-28 with a student preview on Jan. 18. Curtain time for all performances is 8 p.m.

Further information and ticket reservations are available at the Playhouse Theatre box office from 1 to 6 p.m., Monday through Saturday, 865-1884.

Musica da Camera concert on Jan. 18

Three well known works will make up the third program of Musica da Camera, the University's chamber orchestra, to be presented at 8:30 p.m. on Wednesday, Jan. 18, in the Music Bldg. recital hall.

Opening the program will be Haydn's Concerto Grosso, Op. 6, No. 4. This baroque work will be followed by Handel's Symphony No. 31, *Horn Signal*, and Bartok's Divertimento for Strings.

Musica da Camera is under the direction of Dr. D. Douglas Miller, associate professor of music. The group is made up largely of music graduate students.

Harold Lloyd films to be shown

Two Harold Lloyd films will be screened as part of the Artists Series "Comic Geniuses of Lloyd and Keaton," at 8 p.m. on Tuesday, Jan. 17, in Eisenhower Auditorium.

Newer Woked, Lloyd's last short comedy, filmed in 1921, is a classic example of his skill at combining comedy and thrills. In the second film, *Why Worry?*, made in 1923, Lloyd plays a wealthy hypochondriac who goes to South America to rest and finds himself in the midst of a banana republic revolution.

Tickets for the films will be available at the Eisenhower Auditorium box office the evening of the screening, beginning at 7:30 p.m.

Wind Ensemble offers varied concert program

The Symphonic Wind Ensemble, a group of about 45 student and faculty musicians, will present its second concert of the season at 8:30 p.m. on Friday, Jan. 13, in the Music Bldg. recital hall.

The group is under the direction of Smith Toulson III, associate professor of music.

The program will open with a march from *Symphonic Metamorphosis* by Paul Hindemith, followed by Vincent Persichetti's *Parable for Band*. Christopher Callahan, assistant professor of music, will join the group as French horn soloist for Mozart's Second Horn Concerto, Mozart for Handel by Alfred Reed and *La Procession du Rocio* by Joaquin Turina make up the remainder of the evening's offerings.

Baroque concert Jan. 16

The Baroque Ensemble, a group consisting largely of Penn State graduate and undergraduate students in music, will offer a program of music of the 17th and 18th centuries at 8:30 p.m. on Monday, Jan. 16, in the Music Bldg. recital hall.

Brent Wissick, a graduate student majoring in cello at the University, conducts the ensemble. Mr. Wissick, along with a fellow student, Brian Stewart, helped found the group last year.

The repertoire includes French, Italian and German music. Two of the numbers to be included in the Monday concert are Corelli's Trio Sonata, composed in 1690, and Telemann's Concerto for the Recorder, written in 1750.

The ensemble consists of a viola da gamba, baroque cello, baroque violin, harpsichord and recorder. The string instruments use gut string and are played with an arched, or baroque, bow instead of the concave bow characteristic of modern string instruments.

Funding Opportunities

For further information, call 865-1372

(299-1) A brochure, "An Opportunity for College and University Involvement in HUD Research," has been published by HUD. Major investigative avenues include: cost of housing, alternative housing finance mechanisms, urban economic development and public finance, special users elderly and handicapped, neighborhood reinvestment and revitalization, and site selection/integration. (Ref. *ibid.*)

(299-2) The NSF Guide to Program FY 1978 has been published. Included are criteria for the selection of research projects and a summary of NSF programs of scientific research and education in the mathematical, physical, environmental, biological, social, behavioral, and engineering sciences. Projects are not supported in clinical medicine, the arts and humanities, business areas or social work. (Ref. *ibid.*)

(299-3) The new NSF Grants Policy Manual has been issued to implement OMB circular A-110 and to standardize and simplify accountability and reporting requirements among federal granting agencies. Chapters include: proposal submission, evaluation, and award; grantee standards; payment and financial re-

Graduate education

(Continued from page 1)

to the graduate faculty by their departments or programs, not only based on the relative quality of their credentials or scholarly achievement, but also on the program's perception of its need for their services — their specific competencies or specialty areas — in carrying out its graduate affairs. These would include its need in graduate course offerings, in the advising of graduate students, in the directing of theses, and in serving on graduate committees. Consequently, faculty members, whether at University Park or at one of the Commonwealth Campuses, should follow the normal routes to determine if their departments have a need for their services in graduate affairs."

Turning to the future of graduate education at Penn State, Dean Bartoo observed that some persons think there will be a return to the situation which existed from the mid-thirties to the late fifties when graduate study was a kind of "add-on," in that faculty members handled large undergraduate teaching loads and provided graduate training almost on their own initiative, as a labor of love.

"I'm not sure that that is going to be the case," he said. "I have given a talk that some of you may have heard on what I consider the ebb-and-flow theory. I think that there is some need occasionally in a university like ours, especially at the graduate level — especially at the research level, where we tend to become narrower and narrower in our specialization and

become reductionists — to reverse that trend. I see this as the ebbing period. At this time one attempts to bring fields together where they can interact in a healthy fashion, to emerge later with branches, new bodies of knowledge, and the like. I would hope to some extent that we see that occurring in our undergraduate programs, our graduate programs, and our research programs. Just what mechanisms we are going to develop to facilitate this ebb and flow I am not quite sure."

Concluding with a plea to maintain academic quality, Dean Bartoo said:

"Given the prospect of declining enrollments, which would result in a still further lowering of Penn State's already low ratio of graduate to undergraduate students, we will accept those losses which we cannot remedy in order to maintain the quality and viability of our graduate programs. At both the graduate and undergraduate levels, we must do everything we can to avoid the prospect of becoming program-rich and quality-poor. Although it is critical that the graduate fields that are represented in the University be maintained to fulfill the University's mission as a land-grant institution, it is equally essential that the Graduate School function to protect the value and integrity of the graduate degrees it grants. I am confident that in the ensuing budgetary discussions, the strong faculty interests and expertise in the area of graduate education will be adequately represented, and that the allocations of our resources will adequately recognize the role and function of graduate education."

News in brief

(Continued from page 1)

will be held at 11 a.m. Sunday, Jan. 15, in the Helen Eakin Eisenhower Chapel. Dr. David Shannon, dean of the Pittsburgh Theological Seminary, will speak on the topic, "Man Sent from God."

Other events in honor of the Rev. Dr. King include a memorial dinner at 6 p.m. Saturday, Jan. 14, in the Holiday Inn, State College, co-sponsored by the University's Forum on Black Affairs, and a community service at 3 p.m. Sunday in Grace Lutheran Church, State College. Details are available from the Rev. Charles Coleman, 865-6548.

Readers to present William Tenn stories

The University Readers will present dramatized readings of stories by William Tenn at 7:30 p.m. on Tuesday and Thursday, Jan. 17 and 19, in the HUB assembly room. William Tenn is the pen name of Philip Klass, professor of English.

AVS has new public affairs series

An important new series of public affairs discussions has recently been added to the media library at Audio Visual Services.

The series, entitled FOCUS, deals in depth with significant public policy issues facing the United States and the world. Issues under discussion in the series include energy conservation, Israel and the Palestinians, South Africa, national health insurance, and national priorities. Each discussion includes experts from the producing agencies and outside authorities on the topic. Each of the discussions runs one hour in length, although three of the total 16 different discussions are also available in 30 minute versions.

The series has been produced jointly by Brookings Institution, The Carnegie Endowment for International Peace, and Resources for the Future.

Anyone wishing to obtain a brochure describing the individual discussions or to book any of the individual programs in the FOCUS series should call Audio Visual Services at 865-6314. All of the discussions are available only on U-Matic videocassettes.

Faculty input asked on issues facing Senate

Editor's Note: Faculty Senate chairman Thomas E. Daubert prepared the following article to bring faculty up-to-date on major items under Senate consideration during winter and spring terms.

In the Sept. 22 issue of INTERCOM, many Senate activities for the year were listed for your information and input. Such input is still welcome. The ten precs below note some of the major issues currently being considered, and faculty input is again requested — the name of the individual to contact is listed. Additional items of importance to the University, which you feel should be considered by the Senate, should be relayed to the Senate Chairman, Thomas E. Daubert, Birch Cottage, for consideration.

1. **Delegation of Authority** — IRC Committee (Walter B. Severs, Hershey Medical Center)
The committee is considering areas under

the Senate's jurisdiction which may be appropriate to delegate to College and/or Campus faculty organizations. An informational report on this work is now being prepared.

2. **Part-Time Faculty** — Faculty Affairs (Edward H. Klevans, 231 Sackett)
The committee is preparing a report on two aspects of this question — the workload problems associated with too large a proportion of part-time faculty within a location or department, as well as benefits, obligations, and quality-of-performance evaluations for such personnel.

3. **Baccalaureate Degree Requirements** — Special (Thomas D. Larson, Research Building "B")
An in-depth study of the nature, purpose, and desirability of general education requirements leading to a possible change in their structure.

4. **Retention and Transfer** — Undergraduate Instruction (E. W. Miller, 101 Mineral Sciences)
Senate legislation in June 1977 established a plan for academic transfer and retention criteria for limiting enrollment in Colleges and programs. Implementation policies, including the academic criteria to be used, are currently being formulated.

5. **Climate for Research and Scholarly Activity** — Research (Thomas D. Larson, Research Building "B")
A general report including recommendations for improvement of the research climate is being prepared. A preliminary report was presented to the University Faculty Senate in January. Current effort involves addressing the problems of accountability in maintaining an atmosphere of scholarly excellence on the part of the faculty, academic unit head, and general administration, as well as the

differences between individual faculty in assignments and expectations for research and scholarly activities.

6. **Long-Range Planning** — Planning and Development (John J. Cahir, 620 Walker)
A long-range planning study on the quality of Penn State's offerings in the mid-1980s and beyond. Included are research, teaching, and public service. The objective is to identify factors which are likely to affect the quality of our offerings and alert the Senate to them so that debate and rational planning decisions can be made. Examples might be: changes in the State Master Plan; changes in the numbers and makeup of undergraduate and graduate student bodies; changes in population and job market characteristics; and changes in the faculty, such as tenure status and age.

Penn State Intercom

Senate discusses delegation of responsibility to faculty groups

The University Faculty Senate should delegate responsibility to College and Campus faculty groups when appropriate, Dr. Arthur O. Lewis, associate dean of the College of the Liberal Arts and professor of English, said at the Jan. 10 Senate meeting.

But, he added, "We should never forget that we are one university, even though geographically dispersed."

Dr. Lewis also warned against trying to be symmetrical or uniform in the delegation of responsibility.

"We should take each request on its merits," he said.

Dr. Lewis's remarks introduced a forensic session convened because, although the Senate Bylaws include a provision for delegation of responsibility to faculty bodies, it has never been widely used. The original plans to implement the delegation mechanism go back to the early 1970s.

Last summer, the Intra-University Relations Committee was asked to investigate the situation and to list possible appropriate functions for delegation to College and Campus faculty groups. The chairman of the IRC is Dr. Walter B. Severs, professor of pharmacology at Hershey Medical Center.

President Oswald spoke briefly, saying that the interests of students should be a governing principle in the delegation of responsibility. Students should be able to move within the University without encountering problems related to the transfer of credits, he said.

In its regular monthly meeting, the Senate heard an informational report on responsibility for research and scholarly activity. It was presented by Dr. Thomas Larson, director of the Pennsylvania Transportation Institute and chairman of the Committee on Research.

Following Dr. Larson's presentation, Dr. Edward H. Klevans, professor of nuclear engineering, said he was concerned about the future of the research environment at Penn State, in view of expected funding cutbacks.

Dr. Klevans said he feared a gradual

erosion of the scholarly environment at the University through increased teaching, advising, and committee workloads for faculty. If research activity is reduced because of heavier teaching loads, he said, graduate student support and salary and overhead cost support associated with research funding would be lost.

"If cuts were to lead to such effects, the cost savings for which we are striving might not be savings at all, but might make the financial situation at the University even worse," he said.

In other action, the Senate approved two proposals, one in amended form, for changing the academic drop rules.

Presented by the Committee on Admissions, Records and Scheduling, they distinguish between students who hold nondegree status because they have been dropped from other programs and those who do so by choice.

In the past, the committee pointed out, three groups of students have been recognized: degree, provisional, and nondegree. Degree and provisional students who were dropped from their programs because of academic failure were allowed to become nondegree students. In addition, students who enrolled at Penn State after being dropped from other institutions for academic reasons held nondegree status.

But nondegree students who did not maintain a 2.00 cumulative average were dropped permanently from the University, whether they were nondegree by choice or necessity.

Under the new provisions, there will be five student categories: degree, provisional, nondegree, probationary, and restricted. Students who are dropped from their programs will become probationary students and will not be allowed to register for credit coursework for one term (Summer Term can not be counted) after the drop action.

Probationary students who perform poorly will be dropped to the restricted level and will not be permitted to register for coursework for one term.

"International Politics and Art of Tutankhamen's Egypt" will be discussed by Arielle Kozloff of the Cleveland Museum of Art tonight at 8 p.m. in Room 101 Kern Bldg.

University to hold five spring term commencements

The University will have five commencements on Saturday, May 27, because Beaver Stadium, where spring term exercises traditionally are held, will not be available.

Construction to enlarge the capacity of the stadium is not scheduled for completion until September.

Awards normally presented at the spring ceremonies will be made at a 10:30 a.m. program in Recreation Bldg., where graduates of the Colleges of Business Administration, Education, and Human Development will receive their diplomas.

Two other 10:30 a.m. programs are scheduled, the first in Eisenhower Auditorium, for students in Agriculture, Arts and Architecture, and Earth and Mineral Sciences; and the second in the HUB ballroom for the Graduate School.

Exercises at 1:30 p.m. will be held in Recreation Bldg. for Engineering, Science, and Health, Physical Education, and Recreation; and in Eisenhower for Liberal Arts.

Penn State asks 8.6 percent raise in State aid

In an effort to cope with inflation, to offset the serious effects of no increase in this year's State appropriation and to avoid further tuition increases, Penn State has requested an appropriation of \$125,807,000 from the State for the 1978-79 fiscal year.

The Board of Trustees approved the request at its Jan. 13-14 meeting.

"Penn State received absolutely no increase in State support during the current year," President Oswald pointed out. "Because of the delay in passage and payment of the State appropriation, we will run an estimated deficit of \$1 million in unanticipated and unbudgeted interest charges."

"Taking into account the two-year period, the appropriation requested for next year represents an average increase of 8.6 percent per year over the 1976-77 appropriation level."

"When adjusted for inflation," Dr. Oswald noted, "this is practically a zero increase."

Other news of Trustee actions is reported on pages 3 and 4.

Dr. Oswald told the Trustees that approximately one-third of the requested increase is specifically related to avoiding further tuition rate increases for 1978-79. Tuition was increased by \$114 per undergraduate student in May and increased again by an additional \$35 for the spring term.

Emphasizing the importance of holding the line on tuition, Dr. Oswald reported that tuition at Penn State has increased more than 180 percent in the last 10 years. "Penn State's current tuition rate," he added, "is the second highest for all public Land-Grant universities in the nation — over 70 percent above the average rate of comparable institutions."

The University submitted an administrative draft of its 1978-79 State appropriation request in October 1977 to

Penn Staters

Dr. Howard Morgan, Evan Pugh Professor and chairman of physiology, has been elected national vice president of the American Heart Association.

Dr. Gerard J. Brault, professor of French, is serving as one of five consultants in a Survey of Research Tool Needs in French Language and Literature funded by the National Endowment for the Humanities. The committee will poll approximately 3,800 college professors of French about basic reference works and assist the Research Materials Program of the NEH in establishing a general order of priority.

Dr. Warren T. Morrill, professor and head of the Department of Anthropology, is one of 32 professors in the fields of anthropology, foreign languages, and physics to be featured in a national report on effective teaching, published this month by *Change Magazine*.

Dr. Morrill's contribution is a description of the revision of Anthropology I, Penn State's introductory anthropology course. Over the past few years, the format has been shifted from mass to individualized instruction, and there has also been a change in the course content. (For more complete information, see the Aug. 12, 1976, issue of INTERCOM.)

The report is part of a semiannual series financed by a grant from the federal government's Fund for the Improvement of Postsecondary Education.

Revolutionary Ladies, by Dr. Philip Young, research professor of English and a Fellow of the Institute for the Arts and Humanistic Studies, has been selected by the American Revolution Round Table as the best book published on the Revolution in 1977. It was cited for the depth and originality of its research.

The book, which was published last September by Alfred A. Knopf, tells the stories of several Revolutionary-era women, most of whom have been virtually unknown, despite the fact that their lives were significant, complex, and dramatic.

Edward J. Diefenbach, assistant director of the Northern Tier Region on the University's Cooperative Extension Service, staff, has also been appointed assistant director of the North Central Region, effective Jan. 1.

In this post he will supervise county and regional Extension programs in Cameron, Clearfield, Elk, Jefferson, McKean, and Potter counties. He will also continue to work in Bradford, Sullivan, Susquehanna, Tioga, and Wyoming counties.

A member of the Extension staff since 1951, he has a B.S. from Iowa State University and an M.Ed. from Colorado State University.

Obituaries

Edwin S. Roscoe, professor emeritus of industrial engineering, died Jan. 8 at the age of 81. He served on the faculty from 1947 until his retirement in 1961. The author of two textbooks, *The Organization for Production and Project Economy*, Prof. Roscoe had a B.S. degree from the University of Rochester.

Roy M. Decker, a member of the Agricultural Extension staff from 1916 to 1946, died Jan. 8 at the age of 89. Mr. Decker was a Penn State alumnus with a B.S. degree in animal husbandry obtained in 1916. He also earned an M.S. in marketing from the University in 1936.

Catherine E. Holt, assistant Extension director in the North Central Extension Region, retired Dec. 31 following 19 years of service. Miss Holt had supervised Extension programs in McKean, Potter, Elk, Cameron, Jefferson and Clearfield counties since 1972. From 1960 to 1972 she served as assistant State home economics leader in the former Northwest Extension Region. She was Extension home economist in Indiana County for two years prior to 1960.

A native of Marion Center, she received a B.S. from Indiana University of Pennsylvania and an M.Ed. from Penn State. In 1975 she was recognized as the outstanding home economics alumnus of Indiana University on its 100th anniversary.

Bookshelf

Dr. Nancy M. Tichler, professor of English and humanities at The Capitol Campus, is the author of a book, *Legacy of Eve*, published recently by John Knox Press. It is a study of women in scripture, from Genesis through Revelations, emphasizing patterns of imagery in their presentation.

Tracing the stories of Old Testament women, Dr. Tichler finds that most are presented as facets of man's life — wives, mothers, or temptresses. The New Testament personalities, however, reveal significant changes in the recognition of woman's total humanity, especially through the words and actions of Jesus.

Legacy of Eve is intended for use as a text and a study guide. Dr. Tichler is also the author of *Tennessee Williams: Rebellious Partisan and Black Masks: Negro Characters in Modern Southern Fiction*. She is editor-at-large for Christianity Today.

For further information,
call 865-1372

(300-1) The National Endowment for the Humanities (NEH) 1977-1978 Program. Announcement contains application information, program deadlines and descriptions, and a staff directory. Deadlines for education programs, state programs, public programs, research grants, fellowships and youth grants range from January through September 1978. (Ref. 10d.)

(300-2) The National Endowment for the Arts (NEA) Guide to Programs 1977-1978 contains application information, descriptions of program areas, deadline dates, and a telephone/mailing directory. Deadlines range from December 1978. Programs include the areas of architecture, dance, education, folk arts, literature, museums, theatre, and work experience. (Ref. 10d.)

(300-3) Public Understanding of Science is an NSF program that has three deadlines each year — April 1, Aug. 1, and Dec. 1. Preliminary proposals (5 pp.) must be submitted and are accepted at any time. Projects may include radio and TV programs, newspaper and magazine reporting, museum and science center activities, dramatic and film presentations; and lectures, forums, conferences, and workshops. (Ref. SE77-40)

(300-4) NSF has set up a new program of *Science Resources Analyses*. It includes studies on scientific and technical personnel activities, manpower forecasting activities, and development of new output measurements, especially indicators of technological innovation. Doctoral candidates may be principal investigators. Awards will range from \$25 to \$50K. The FY1978 deadline is March 15. (Ref. 43FR1016, 15/78)

(300-5) The NSF Information Science Research program has a Jan. 31 submission date for FY1978 funding. Included for support are fundamental and applied information science research and descriptive and analytical studies. (Ref. C&I/59) (NSF 77-77)

News in Brief

Major medical claims due by March 31

March 31, 1978, is the last date on which the Employee Benefits Division will accept charges for a 1977 major medical claim for University employees or their dependents. A major medical claim is established if an employee reports \$100 of eligible, out-of-pocket medical expenses incurred during the calendar year 1977.

Charges that are acceptable for a major medical claim include doctors' office calls, prescribed drugs, private duty nursing (if medically necessary), local ambulance service, oxygen, physiotherapy, insulin, and special equipment and appliances. Among charges not covered are routine physical exams, dental work, eye exams and lenses.

Itemized receipts should be obtained for eligible charges and submitted to the Employee Benefits Division with a claim form. In order to avoid delay of payment by the insurance company, all questions in the employee's section of the claim form should be fully completed. Cancelled checks and cash register receipts are not acceptable evidence of charges incurred.

Claim forms and additional information on how to report a major medical claim are available at the Employee Benefits Division, Room 133 Willard Bldg., the Business Offices at locations other than University Park, and the Personnel Office at the Hershey Medical Center.

GSA sponsoring Financial Aid Workshop

The Graduate Student Association will sponsor a Financial Aid Workshop at 7:30 p.m. on Thursday, Jan. 26, in Room 101 Kern Bldg. For the first time, information on most types of aid will be pulled together in one place. Benjamin F. Howell Jr., associate dean of the Graduate School, and a representative from the Office of Student Aid will speak at the workshop and be available to answer questions.

Credit Union annual meeting

The annual meeting of members of the Penn State Federal Credit Union (PFCU) will be held at 7:30 p.m. on Wednesday, Jan. 25, in Room 101 Kern Bldg. The Credit Union, established at Penn State in 1959, has current net assets of \$3 million and in September 1977 loans made exceeded \$10 million. The Credit Union's office is open from 10 a.m. to 3:30 p.m. Mondays through Fridays in the Telephone Bldg.

United Way giving falls short of goal

University Park employees contributed \$88,821 to the United Way campaign for 1978, which ended Jan. 6.

Dr. James M. Beattie, campaign chairman, noted that the amount was a thousand dollars short of the campus's goal of \$90,000.

"I am disappointed that our goal was not reached as part of our contribution to the United Way campaign in Centre County," he said. "However, I am delighted to know that the county did reach its goal of \$301,000."

At University Park, 1,238 people, or 18 percent of those solicited, contributed to the 1978 campaign. Included were 216 new contributors from among the faculty and staff, but 230 people who gave in 1977 did not donate this year. The average contribution was \$71.75, up from \$67.57 in 1977.

"On behalf of the campaign workers, I thank all members of the faculty and staff who contributed to this year's campaign," Dr. Beattie said. "Their contributions will be put to good use in aiding 77 United Way agencies sorely in need of financial support."

Thalia Trio to perform

The Thalia Trio will present its second concert of the current season at 8:30 p.m. Wednesday, Jan. 25, in the Music Building recital hall.

The trio, Joanne Zagst Feldman, violinist, Robert Baisley, pianist, and Leonard Feldman, cellist, will perform Haydn's Trio in C Major, Faure's Trio in B flat, and four fantasy pieces by Schumann entitled "Romance," "Humoresque," "Duet," and "Finale-March," which were chosen because they are "delightful little pieces that aren't heard very often," explains Dr. Baisley.

The concert is sponsored by the Music Department, and is free and open to the public.

Aliens must register

The Office of Personnel Administration reminds aliens at all Penn State campuses that each year during the month of January aliens are required to register with the Immigration Service, regardless of their current visa status. They can obtain the necessary forms at their local post office. Failure to comply with this requirement is considered a serious offense and could result in arrest and deportation.

Faculty input

Continued from page 1)

7. The Academic Adviser — Undergraduate Instruction (Richard L. McCarl, 303 Althouse Lab)

This study is to evaluate the desirable role, responsibilities, reward system, and importance of this function.

8. Future of Undergraduate Instruction — Undergraduate Instruction (George W. Franz, Delaware County Campus)

This report will parallel much of the work of Item 6, but will be more specific with regard to its focus.

9. Admissions Standards — Admissions, Records and Scheduling (John E. Ayers, 211 Buckhout Lab)

Currently a five-year statistical study of degree admissions standards by College and Campus, including SATs, high school averages, and Categories I-VI, is being prepared. A longer-range study is in progress and will also include provisional-degree and non-degree students. Upon completion of the study, recommendations for changes in admissions standards will probably result.

10. Promotion and Tenure — Faculty Affairs (L. Peter Gold, 150 A Davey Lab, or Philip A. Klein, 516 Kern Bldg.)

The charge to this committee is to consider modification of PS-23 without change in its basic structure. The Committee is considering (1) changes in tenure review years, (2) stronger justification necessary for shorter time in rank, (3) early tenure decisions, (4) coupling of tenure and promotion to associate professor, (5) written notifications of negative sixth year tenure reviews, and (6) policy of higher level review committees when they disagree with a lower level committee.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

From the Trustee Docket

Revisions in current budget approved

Revisions in Penn State's current operating budget, necessitated by the Governor's cut of \$2.2 million from the University's State appropriation, that had been approved by the Legislature, were acted upon Saturday by the Board.

As revised, the budget, which was initially based upon the Governor's recommendation of \$109.7 million and adopted by the Trustees in May 1977, deals with the problem of a \$3 million reduction in anticipated State funding for this fiscal year. About \$2 million of this amount will be made up by cutbacks in expenditures, President Oswald said, adding: "Most regrettably, the University had to make a second, mid-year increase in tuition for this school year, which will bring in approximately \$1 million."

In his budget report to the Trustees last May, Dr. Oswald had foreseen the possibility of a second tuition increase. Quoting from a letter he sent to parents of students May 6, he noted that if the \$3 million increase in the State appropriation recommended by the Governor "is, for some reason not achieved, the University would be forced to make further cutbacks in many programs, and in all likelihood a second increase in tuition would be needed in mid-year, beginning in either winter or spring term."

Also in May, President Oswald indicated that the University had developed contingency plans for operating, if necessary, during 1977-78 at a State appropriation level even less than that recommended by the Governor. The contingency plans, however, did not include an estimated \$1 million in interest charges resulting from a six-month delay in receiving approval of the State appropriation, and the deferred schedule of payments developed by the State.

Dr. Oswald told the Trustees that the University will seek reimbursement from the State for the interest charges.

"Concerned members of the General Assembly," Dr. Oswald said, "have indicated that every possible effort will be made to obtain relief from the General Assembly to cover the interest costs which presently represent an operating deficit for 1977-78."

The tuition was increased \$35 for the spring term for Pennsylvania students at University Park, graduate students at Hershey, and non-Pennsylvania students at all locations. The increase will be \$15 for State residents at the Commonwealth Campuses, Behrend College and Capitol Campus and graduate students at all locations other than University Park and Hershey.

Dr. Oswald emphasized that a combination of efforts would be necessary to close the \$3 million gap in anticipated income brought about by the reduction in the State appropriation. He reported that the tuition increase is expected to provide only about one-third of the needed amount, or approximately \$1.1 million. Another \$2.2 million will be made up in budget reductions and expenditure savings.

"A contingency plan was put into effect last August," Dr. Oswald commented. "We saw difficult days ahead. This plan will make it possible to achieve budget savings of \$1.4 million. We must make further savings prior to June 30, the end of this fiscal year, to achieve an additional \$800,000."

Referring to the \$1 million interest cost, Dr. Oswald said: "The exact amount of the interest cost will depend on the timing of the State payments of the appropriation." As of Dec. 31, the University had borrowed \$54 million and had incurred \$456,000 in interest charges. Interest costs up to \$1 million may result if the proposed plan of the State to delay payments to the

University is followed. One payment of \$15.5 million was received on Dec. 29.

Dr. Oswald, in commenting on the difficulties faced by the University over the last six months, said, "I want to express my deep appreciation to the many legislators, alumni and citizens who worked so diligently on behalf of Penn State. I also want to express my appreciation to the many faculty members, staff members, students and to the broader University community for their support and understanding during this difficult period."

Ulerich re-elected as Board president

William K. Ulerich, of Clearfield, newspaper publisher and broadcasting executive, has been re-elected to his third one-year term as president of the Board of Trustees. J. Lewis Williams, a dairy farmer from Uniontown, was also re-elected to a third term as vice-president.

Mr. Ulerich has served as a trustee from 1951 to 1957 and since 1964, while Mr. Williams has been a Board member since 1955.

Dr. John W. Oswald, as president of the University, continues as secretary; and Robert A. Patterson, senior vice-president for finance and operations and treasurer, as treasurer. Other University staff personnel named again to one-year terms last Saturday were: Dr. Richard E. Grubb, associate secretary; Patricia L. Rosdill and Mary Lou McCorkle, assistant secretaries; and Richard H. Baker, assistant treasurer.

Mr. Ulerich is chairman of the board of Progressive Publishing Co., Inc., which publishes *The Progress* in Clearfield and the *Danville News* in Danville, and operates four community AM radio stations and four community FM stations. He is a 1931 graduate of Penn State and in 1969 was named a Distinguished Alumnus. Last June, Dickinson School of Law conferred on him the honorary doctor of laws degree.

Mr. Ulerich in 1969 was appointed to the Pennsylvania State Board of Education, and he served until 1974 on the Board's Council of Higher Education. He is a past president of the Pennsylvania Newspaper Publishers Association.

Mr. Williams, who has been a dairy farmer and farm machinery dealer, is a 1927 graduate of Penn State's two-year course in agriculture and in 1970 was designated a Distinguished Alumnus of the University. He was named a "Master Farmer" by the "Pennsylvania Farmer" in 1955.

He is an honorary member of the Pennsylvania County Agents Assn. and had been president of both the Fayette County Holstein Breeders' Assn. and the Southwestern Pennsylvania Holstein Breeders' Assn. He has also served as president of the Fayette County Agricultural Extension Assn., Pennsylvania Dairymen's Assn., and the Atlantic Breeders' Cooperative. For 19 years he was secretary-treasurer of the Pennsylvania Assn. of Artificial Breeding Cooperatives and was chairman of the State's Brucellosis Eradication Committee.

Trustees elected Saturday to one-year terms on the Executive Committee of the Board are: Marian U. Barash, State College; Edward R. Book, Hershey; Walter J. Coit, Doylestown; Charles W. Shaeffer, Baltimore; J. Luther Snyder, Camp Hill; Mr. Williams; and Quentin E. Wood, Oil City.

The President of the Board and the President of the University serve as ex officio members of the Executive Committee.

Donated funds allocated

The Trustees approved the allocation from undesignated funds of \$168,318 for cultural, campus environmental, student aid, instructional, and research projects. The funds were made available by alumni and friends of the University to meet needs that could not be met within the current stringent operating budget.

The Alumni Memorial Scholarship program received a \$50,000 allocation. This program was established "to recognize and attract outstanding undergraduate students who demonstrate exceptional academic achievement or promise."

To strengthen cultural offerings, \$30,948 was approved by the Trustees. This includes: \$10,000 in matching funds for a Ford grant to the Department of Art; \$2,500 for a corporate-art-on-campus project in the College of Business Administration; \$5,000 of matching funds for a National Education Association grant to the Museum of Art; \$5,558 for travel by the University Chorus to perform with the Pittsburgh Symphony Orchestra; \$3,690 for a display case for the Boehm Bird Collection at the Altoona Campus; \$200 for additions to the art collection at Behrend College; and \$4,000 for the Ethnic Cultural Center in New Kensington.

Campus improvement projects received \$29,370. Included were \$5,000 for landscape beautification at Hershey; \$2,550 for renovation of the lobby of Osmond Laboratory; \$5,000 for tree replacement on Pollock Road; \$3,400 for directional signing at Beaver; \$2,620 for roadside signs at DuBois; \$5,000 for grounds improvements at Fayette; \$3,000 for a rock garden at New Kensington; and \$2,800 for restoration and development of the Arboretum at Wilkes-Barre.

Toward stimulation of faculty research and scholarship, \$18,500 was designated. Projects receiving funding include re-evaluation of exercise/heart disease status at the Laboratory for Human Performance Research; \$7,000; cumulative Shakespeare Bibliography in the College of the Liberal Arts; \$6,000; the papers of Martin Van Buren at Ogonitz; \$5,000; and a mission to the International Olympic Committee from the College of Health, Physical Education and Recreation, \$500.

The Helen Eakin Eisenhower Chapel was allocated \$20,000 to help repay construction costs for a recent addition. The reference library in the Department of Food Science was awarded \$4,000; a Mini-Observatory at Behrend College, \$3,500; Campus Parcours at Allentown, \$2,000; publication of the journal, *Minority Voices*, by the Paul Robeson Cultural Center, \$2,800; computerized student-employer matching program at the Career Development and Placement Center, \$5,700; publication of "Proceedings: Sociolinguistic Problems" by the Department of Slavic Languages, \$800; and communication improvements at DuBois, \$700.

Funds for these projects come from private monies contributed by alumni and friends of Penn State to help enrich the programs of the University. Tuition, State, and federal funds are not available for these purposes.

Phys ed facility to be built at stadium

The awarding of contracts for construction of an intercollegiate athletic and physical education facility under the stands being built at the south end of Beaver Stadium was authorized by the Trustees.

The facility was one of the alternates bid as a part of the total Beaver Stadium expansion project, but was not included in the final contract. The bid price, however, was effective until Jan. 31, 1978.

Construction of the south stands, it is explained, provides the site for the room, which is expected to be used extensively throughout the year for the physical

education program, as well as meet needs for team room facilities for football games and other sports.

Dr. Robert J. Scannell, dean of the College of Health, Physical Education, and Recreation, emphasized the need for such a facility in the total physical education and athletic program of the University. He pointed out that certain classes for physical education majors who work with the teaching and coaching of sports which utilize fields in the stadium area are handicapped by the lack of convenient classroom facilities. The provision of the space under the south stands will help to solve this problem.

The Trustees also authorized an expenditure not to exceed \$200,000 for the project with the funds coming from gate receipts and television revenues received from football games. No tuition, State, or federal funds will be used for the facility.

"This is another example," said Dean Scannell, "of how proceeds from our football program benefit not only that program, but intercollegiate athletics and physical education programs as well."

Dean Scannell noted that all physical education majors must complete a basic lecture/laboratory course in the prevention and care of athletic injuries. Also, students seeking certification as professional trainers complete additional elective courses of this type. None of the current training rooms has been designed with teaching in mind, and none offers the convenient training room/classroom relationships this new facility will offer.

While the new facility will provide needs for football game days, it also will provide needed locker space for other teams and classes using the stadium area. At present, several teams and classes using the stadium area must dress in Recreation Bldg. or White Bldg. and be transported to and from the stadium area. Track, baseball, soccer, and lacrosse classes will be able to utilize the facility.

Eight Distinguished Alumni selected

Eight graduates of the University have been named as Distinguished Alumni. There were recommended for the honor by a special committee chaired by Mrs. Marian U. Barash, of State College, a trustee.

The alumni to be honored are: Dr. John M. Chemszky '35, Rahway, N.J., executive director of process chemistry, Merck Sharp & Dohme;

Catherine Lewis Eftimiadi '42, New York, N.Y., top designer and consultant in textiles and head of Kay Lewis, Inc.;

Dr. Joseph P. Kriss '39, Palo Alto, Cal., director, Division of Nuclear Medicine, Stanford Medical School;

Norman C. Miller '56, Washington, D.C., chief, Washington Bureau, Wall Street Journal;

Dr. James Herbert Robinson '49, Havertown, associate dean-director of minority affairs, Jefferson Medical College;

Gerard C. Romig '27, Fort Washington, former chairman of the Board, Amchem Products, Inc.;

Robert H. Rumler '36, Brattleboro, Vt., executive chairman, Holstein-Friesian Assn. of America; and Judge G. Harold Watkins '24, Frackville, president judge, Superior Court of Pennsylvania.

They will be invited to return to the University June 2 and 3 for the annual Alumni Institute and Class Reunions program when they will be honored by fellow alumni and presented a bronze medal by the President of the Board of Trustees and the President of the University.

The Distinguished Alumni Awards are the highest awards conferred on alumni by the University. They were established in 1951 to recognize and salute the achievements of outstanding alumni and to date 215 graduates have been named.

Capitol library plans win approval

Final plans for the construction of a temporary annex to the library at the Capitol Campus were approved, and the asking of bids and the awarding of contracts authorized.

The library is located in the Olmsted Bldg., the main building at the Campus. The annex will be built to the north and east of the library location, adjoining the Olmsted Bldg. It will be built of pre-engineered metal and provide approximately 5,000 square feet of floor space, all on one level.

The Capitol Campus library presently has a collection of 130,000 books and journal volumes crowded into an area of 17,000 square feet and has reader space for only 125 students from an enrollment of some 2,500.

Dr. Robert E. McDermott, provost, explains that present space allocation is about 30 per cent deficient, according to American Library Association Standards for college libraries.

Expenditures, not to exceed \$280,000, were authorized for the project, which includes changes required by Labor and Industry in the Olmsted Bldg. Funds are available for this purpose from Insurance, OSHA, and Labor and Industry Compliance Reserves.

West Chester and PSU set up 3-2 program

West Chester State College and Penn State have established a 3-2 program of collegiate education in the liberal arts and engineering. It will enable students from West Chester to qualify for appropriate dual baccalaureate degrees, normally at the end of five years. Dr. N. J. Palladino, dean of the College of Engineering, explains.

Three years, or the equivalent, will be spent at West Chester, studying liberal arts subjects along with pre-engineering courses in the basic sciences. Upon satisfactory completion of this part of the program, the student will spend two years, or the equivalent, at Penn State, completing specified engineering courses.

Other Pennsylvania colleges with similar cooperative programs with Penn State include Albright, Elizabethtown, Gettysburg, Juniata, Lycoming, Saint Vincent, Seton Hill, and Westminster; Lincoln University; and eight of the State Colleges: California, East Stroudsburg, Edinboro, Lock Haven, Mansfield, Millersville, Shippensburg, and Slippery Rock.

"The program," Dean Palladino said, "is particularly useful to students undecided about their future, particularly those who feel not ready for a large institution. If, at the smaller, non-engineering college, the student finds college mathematics and engineering uncongenial, he or she can shift to a program with less emphasis on science, without the need of transferring elsewhere."

"In general," Dean Palladino continued, "the student who wishes a taste of life in a smaller college, and who is willing to devote five years to an undergraduate education, may well find the plan suited to his or her needs."

Advantages to students, Dean Palladino explained, are that there is a planned course sequence which guarantees acceptance at an engineering college; students undecided about career direction save educational time; and living expenses are reduced because students very often can study near their homes for the first three years.

The engineering colleges benefit as well. Dean Palladino continued, because the 3-2 program provides mature, highly-selected students who have had a chance to determine their career choice; because these students sometimes help fill vacancies caused by attrition of freshmen and sophomores; and because the transfer

students have a broadening effect on regular engineering students.

Despite these advantages and the fact that more colleges are interested in participating, Penn State is not now actively seeking more 3-2 arrangements, Dean Palladino said. He explained that the University is experiencing a large upsurge in engineering enrollments and has neither the funds nor the laboratory facilities to handle more students.

1979 meeting dates approved

Dates for Trustees' meetings to be held in 1979 have been approved. Except where noted otherwise, the meetings will be held at University Park.

Meetings are scheduled for Jan. 19 and 20; March 23 and 24 at Hershey; May 24 and 25, July 20 and 21 at New Kensington; Sept. 20 and 21; and Nov. 15 and 16.

The 1978 schedule, approved a year ago, includes meetings on March 17 and 18 at Hershey; May 25 and 26; July 21 and 22 at Hazleton; Sept. 21 and 22; and Nov. 9 and 10.

The Board on Saturday also designated May 25, 1978, as the date for the delegate election of trustees and for counting the ballots in the alumni election. The Board will meet on May 25 and 26 and spring term commencement exercises will be held on May 27. The charter of the University specifies the election of trustees shall be held commencement week, and on such day prior to the exercises as the Board may determine.

Gas Lab addition go forward

The Trustees approved final plans for the construction of an addition to the High Pressure Gas Laboratory at the University Park Campus and authorized the asking of bids and awarding of contracts for work to be done by the Office of Physical Plant. An allocation, not to exceed \$154,300, from funds available in the Risk Insurance Reserve, has been authorized for the project.

The plans and allocation had been presented to the Board last July, but design changes necessitated a second presentation.

1978-79 appropriation

(Continued from page 1)

The Pennsylvania Department of Education, based on the recommended increase for the University in the Governor's 1977-78 Executive Budget. The actual 1977-78 State appropriation is \$3,002,000 less than the amount recommended by the Governor.

Dr. Oswald said the University must ask for restoration of this \$3,002,000 in addition to the funds sought to cover inflationary cost increases for 1978-79.

Penn State has trimmed back its expenditures by nearly \$15 million over the last six years, cutting back \$4.6 million in the current year.

Primary emphasis in the appropriation request has been put on provisions to cope with continued inflation. These include the need for salary adjustments to maintain current purchasing power for employees, as well as the need to cover the increased costs of supplies and services, fuel and utilities.

Noting that the cumulative impact of inflation between 1972-73 and 1976-77 is estimated to be 41.6 percent, Dr. Oswald said Penn State's appropriation increased by only 28.9 percent during this four-year period, with no increase for the current year.

An increase in the per capita appropriation was requested for Doctor of Medicine students from the present level of \$7,465 to \$11,348. The per capita appropriation for medical education has not changed since 1971-72, while during the same period tuition has increased by 300 percent.

Also an increase in appropriated funds for student aid is requested to offset partially the impact of recent tuition increases. The appropriation for student aid has not changed since 1973-74.

Haskins and Sells designated as accountants

The Trustees have authorized the employment of Haskins and Sells, of Philadelphia, certified public accountants, to perform an annual audit of the accounts of the University for the year ending June 30, 1978.

In addition to this audit, University accounts are examined and audited on a continuing basis by federal government and State government auditors, as well as by the internal auditing staff of the University.

Senate discusses

(Continued from page 1)

The reason for the one-term wait, according to Warren R. Haffner, director of the Division of Admissions, Records, and Scheduling, is that many students dropped from their degree programs do not understand the seriousness of the action.

"At least 20 percent of those dropped from degree status last term didn't know what had happened to them," he said. "I personally feel we have to do something to let these people and their parents know that they're in academic difficulty."

New Social Security taxes shown below

Congress has approved Social Security financing legislation which will substantially increase the Social Security tax over the next decade and will maintain parity between the employers' and employees' payments.

The table below lists the tax rates and salary bases in the new law:

	Tax Rate	Salary Base	Maximum Withheld
1978	6.05%	\$17,700	\$1,071
1979	6.13	22,900	1,404
1980	6.13	25,900	1,588
1981	6.65	29,700	1,975
1982	6.70	31,800	2,131
1983	6.70	33,900	2,271
1984	6.70	36,000	2,412
1985	7.05	38,100	2,486
1986	7.15	40,200	2,874
1987	7.15	42,600	3,046

Changes in Rules on Academic Dishonesty

The University Faculty Senate, after appropriate study, recommended changes in Academic Policies and Procedures for Undergraduate Students. These changes affect not only the Academic Policies and Procedures for Undergraduate Students but also the Discipline System. The academic policies and Discipline procedures with regard to Academic Dishonesty are listed below with the changes in capital letters. The President has approved the changes for immediate implementation.

1. Changes in Rules on Academic Dishonesty
 - 47-00, 48-00, and 49-00 GRADES
 - 47-20 Basis for Grades
 - Grades shall be assigned to individual students solely on the basis of the instructor's judgment as to a student's scholastic achievement as set forth in Policy 47-60 (FOR THE ASSIGNMENT OF GRADES IN CASES OF ACADEMIC DISHONESTY, SEE POLICY 49-20).
 - 48-20 Failure to Complete a Course
 - When a student officially drops a course within the first twenty-one days of a term, no symbol or grade of any kind is to be reported.
 - When a student officially drops a course after the first twenty-one days of a term, a symbol of WF, WF, or WN, according to the policies of Section 34-89, is to be reported.
 - When a student registers for a course but ceases to attend class without officially dropping the course, the student is to be given a grade of F in the course.
 - When a student officially withdraws from the University in accordance with Section 56-30, the symbol W shall be reported for each course, UNLESS AN ACCUSATION OF ACADEMIC DISHONESTY HAS BEEN MADE AGAINST THE WITHDRAWING STUDENT. IN SUCH A CASE, POLICY 49-20 SUPERSEDES THE ASSIGNMENT OF THE SYMBOL "W" IN THAT COURSE.
 - A symbol of W shall be recorded for unsatisfactory attendance in an audited course in accordance with Section 48-80.

CHANGE POLICY 49-20 TO READ AS FOLLOWS:

IF A STUDENT DOES NOT CONTEST AN ACCUSATION OF ACADEMIC DISHONESTY, THE INSTRUCTOR MAY DROP THE STUDENT FROM THE COURSE. IF THE STUDENT DROPPED FROM THE COURSE, THE GRADE WILL BE RECORDED AS "F." IF A STUDENT IS ACCUSED OF ACADEMIC DISHONESTY AND DOES NOT CONTEST THE ACCUSATION, THE STUDENT WILL NOT BE ALLOWED TO DROP THE COURSE UNDER POLICY 34-89, NOR WILL THE SYMBOL "W" BE REPORTED FOR THE COURSE IF THE STUDENT WITHDRAWS FROM THE UNIVERSITY UNDER POLICY 56-30. IF A STUDENT IS ACCUSED OF ACADEMIC DISHONESTY AND DECIDES TO APPEAL, IF THE INSTRUCTOR THROUGH THE UNIVERSITY APPEAL PROCEDURE, THE STUDENT WILL NOT BE ALLOWED TO DROP THE COURSE UNDER POLICY 34-89, NOR WILL THE SYMBOL "W" BE REPORTED FOR THE COURSE IF THE STUDENT WITHDRAWS FROM THE UNIVERSITY UNDER POLICY 56-30. IF THE APPEAL PROCEDURE HAS NOT BEEN COMPLETED BY THE END OF THE TERM, THE SYMBOL OF "DF" SHALL BE ENTERED ON THE STUDENT'S TRANSCRIPT UNTIL THE APPEAL PROCEDURE IS COMPLETED. FOLLOWING THE PROCEDURES FOR ADJUDICATION OF CASES OF ALLEGED VIOLATIONS OF UNIVERSITY REGULATIONS, IF THE INSTRUCTOR TAKES ACTION OTHER THAN THAT RECOMMENDED BY THE UNIVERSITY HEARING BOARD, THE STUDENT MAY APPEAL TO THE DEAN OF THE COLLEGE IN WHICH THE VIOLATION OCCURRED. IF NOT RESOLVED AT THAT LEVEL, THE UNIVERSITY PROVOST SHALL MAKE THE FINAL DECISION.

UNIVERSITY HEARING BOARD

A. JURISDICTION

When a discipline board recommends an academic sanction, the director of the Office of Conduct Standards shall transmit the recommendation(s) to the INSTRUCTOR OF THE COURSE in which the alleged violation occurred. IF THE INSTRUCTOR OF THE COURSE takes action other than that recommended by the board, the student may appeal TO THE DEAN OF THE COLLEGE IN WHICH THE VIOLATION OCCURRED. IF NOT RESOLVED AT THAT LEVEL, THE UNIVERSITY PROVOST SHALL MAKE THE FINAL DECISION.

F. ACADEMIC SANCTIONS

Academic sanctions are actions which affect the student's grade and/or enrollment in a course in which an act of academic dishonesty was committed. When a discipline board recommends an academic sanction, the director of the Office of Conduct Standards shall forward the recommendation TO THE INSTRUCTOR OF THE COURSE in which the alleged violation occurred. IF THE INSTRUCTOR takes action other than that recommended by the board, the student may appeal to the DEAN OF THE COLLEGE IN WHICH THE VIOLATION OCCURRED. IF IT IS NOT RESOLVED AT THAT LEVEL, THE UNIVERSITY PROVOST SHALL MAKE THE FINAL DECISION.

University Park Calendar

Jan. 19 — 29

Special Events

Thursday, Jan. 19

HUB Craft Center course registration for classes to begin week of Jan. 23. Information: 863-0641

FSHA, French Dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.

Comp. Lit. film series, *Ugetsu*, Japanese with English subtitles, 7 and 9 p.m., Room 112 Kern.

University Reads, dramatized readings of William Tenn stones, 7:30 p.m., HUB assembly hall.

Central Pa. Society of the Archeological Institute of America, Arielle Kozloff, Cleveland Museum of Art, on "International Politics and Art of Tutankhamen's Egypt," 8 p.m., Room 101 Kern.

Colloquy, "Visions of Tomorrow," Brian O'Leary, Princeton University, on "Exploring New Worlds and Living in Outer Space," 8 p.m., HUB ballroom.

University Theatre, Milan Stitt, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Friday, Jan. 20

Colloquy, "Visions of Tomorrow," Ronald Abler, geography, on "Communications and Cities in the Future," 11 a.m., HUB main lounge; Philip Klass, English, on "The Clouded Crystal Ball — Unexpected Futures and Crazy Tomorrows," 1 p.m., HUB main lounge.

Quaker Club annual banquet, 6:30 p.m., HUB ballroom.

Jewelry and metalsmith workshop, David M. LaPlantz, Kent State University, 7:30-9:30 p.m., Room 101 Chambers. Free admission.

Sports: men's basketball, vs. Massachusetts, 7:30 p.m., (EAA game), main gym, Rec. Bldg. University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Artists Series, New York, Renaissance Band, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 21

Sports: men's fencing, vs. William Paterson and Ohio State, 9 a.m., Rec. Bldg.; men's and women's bowling, vs. Bloomsburg, 1 p.m., Rec. Bldg.; women's fencing, vs. Ohio State, 1 p.m., White Bldg.; women's swimming, vs. Pittsburgh, 1:30 p.m., and men's swimming, vs. Pittsburgh, 4 p.m., both at Natatorium. Eco-Action recycling, 10 a.m.-3 p.m., parking lot K83 (behind flower gardens) and Boalsburg Fire Hall.

france-cinema, "International Animation Festival," 7 and 10 p.m., and Resnais, *Last Year at Marienbad*, French with English subtitles, 8:30 p.m., Room 112 Kern.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

David Vogel, viola, 8:30 p.m., Music Bldg. recital hall.

Sunday, Jan. 22

Sports: men's volleyball, Nittany Lion Invitational, 9 a.m., Rec. Bldg.

University Chapel service, Dr. Theodore Kiffer, FSU, 11 a.m., Eisenhower Chapel.

Central Pa. Scholastic Art Awards, noon, Rooms 101 and 112 Kern.

Shaver's Creek Nature Center, Family Nature Movies, 2 p.m., Stone Valley

france-cinema, "International Animation Festival," 7 and 10 p.m., and *Last Year at Marienbad*, 8:30 p.m., Room 112 Kern.

Monday, Jan. 23

Coaly Society Speaker's Contest, 6:30 p.m., HUB assembly hall.

Shakespeare film, *King Lear* (Kozintsev), 6:30 p.m., Room 317 Willard.

Comp. Lit. film series, Kenneth Clark, "Civilization, Grandeur and Obedience — Rome in the 17th Century, Center of Counter Reformation and the Baroque Style," 7 p.m., Room 101 Kern. Free admission.

Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Sports: women's gymnastics, vs. Southwest Missouri State, 8 p.m., Rec. Bldg.

Tuesday, Jan. 24

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Peirce Lewis, geography, on "Signs on the Land."

Sports: women's swimming, vs. West Chester,

4 p.m., Natatorium; women's basketball, vs. Pittsburgh, 7 p.m., White Bldg. FSHA, American Dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441. Coaly Society Speaker's Contest, 6:30 p.m., HUB assembly hall.

Shakespeare film, *King Lear* (Brook/Scofield), 6:30 p.m., Room 101 Chambers.

English colloquium, Judd B. Arnold, English, on "Troilus's Betrayal of Cressida: Another Reading of Shakespeare's *Troilus and Cressida*," 8 p.m., Room 101 Kern.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

ERM Club lecture, Peter Harnik, Environmental Action, on "Energy, Environment and Jobs," 7:30 p.m., Room 301 HUB.

E&MS Student Council lecture, Robert E. Newnham, solid state science, on "Gemstones," 7:30 p.m., Room 112 Walker.

Wednesday, Jan. 25

Coaly Society Speaker's Contest, finals, 6:30 p.m., HUB assembly hall.

Commonplace Theatre, *Emperor of the North*, 7:30 and 9:30 p.m., Room 112 Kern.

Penn State Federal Credit Union annual meeting of members, 7:30 p.m., Room 101 Kern.

SILP/LAN American Studies, Cuban film, *Memories of Underdevelopment*, Spanish with English subtitles, 8 p.m., Room 101 Chambers. Free admission.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Thalia Trio, 8:30 p.m., Music Bldg. recital hall.

Thursday, Jan. 26

Last date for submission of spring term reserve reading lists, Room W2, Patten.

FSHA, Chinese Dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441.

Comp. Lit. film series, *Open City*, Italian with English subtitles, 7 and 9 p.m., Room 112 Kern.

GSA, Financial Aid workshop, 7:30 p.m., Room 101 Kern.

Japanese language and literature films, "Japan in the Winter," "Shikuo Nakata — Master of Wood Block Prints," "Noh Play — Aoi No Ue," and "An Introduction to Kabuki Theatre," 7:30 p.m., HUB assembly hall.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Friday, Jan. 27

Campus 4-H Club Square Dance, 8 p.m., HUB ballroom.

Sports: gymnastics, vs. York (Canada), 8 p.m., Rec. Bldg.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Saturday, Jan. 28

Shaver's Creek Nature Center, Adventure Series, for children 7 and older, 10 a.m.-3 p.m.; Fireside Reading, 8 p.m., Stone Valley.

Sports: women's basketball, vs. Rutgers, 2 p.m., White Bldg.; men's basketball, vs. Pittsburgh, (EAA game), 7:30 p.m., Rec. Bldg.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Jan. 29

University Chapel service, The Rev. Charles L. Coleman, religious affairs, 11 a.m., University Chapel.

USG/Flea Market, noon-9 p.m., HUB ballroom.

Shaver's Creek Nature Center, History Walk, 2 p.m., Stone Valley.

france-cinema, Robert, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Jan. 19

Computation Center, "Text Processing," (2 of 4), introductory programming background suggested, 7:30 p.m., Room 102 Forum.

Computation Center, "Graphics," (2 of 4), no prerequisite, 7:30 p.m., Room 110 Osmond.

Monday, Jan. 23

Biochemistry and Biophysics, Larry Ewing, Johns Hopkins University, on "The Control of Spermatogenesis by Steroid Filled, Subdermal, Polydimethylsiloxane Implants," 3:55 p.m., Room 101 Althouse.

Computation Center, "Text Processing," (3 of 4), introductory programming background suggested, 7:30 p.m., Room 102 Forum.

Computation Center, "Graphics," (3 of 4), introductory programming background suggested, 7:30 p.m., Room 110 Osmond.

Tuesday, Jan. 24

ARL, D. R. Stinebrink on "Cavitation Damage," 10:45 a.m., Walker conference room, Applied Science Bldg.

Biochemistry and Biophysics, Larry Ewing, Johns Hopkins University, on "Androgen Secretion by *In Vitro* Perfused Testes," 11:10 a.m., Room 101 Althouse.

Food Science, Susan Freas on "The Effect of Skin Contact Time on the Quality of White Wines," 11:10 a.m., Room 201 Boland.

Computation Center/Computer Science, Francis Vastola, fuel science, on "Mini-Micro Computer Network Systems," 1 p.m., Room 325 Whitmore.

Water Pollution Control, Joseph V. Radziul, Philadelphia Water Department, on "Trace Organics and Carcinogenicity," 2:20 p.m., Room 128 Sackett.

Genetics, Allan A. Grunder, Animal Research Branch, Dept. of Agriculture, Ottawa, Canada, on "Genetic Control of Electrophoretic Variants of Enzymes in Pigs, Chickens and Turkeys," 3:55 p.m., Room S2 Frear.

Meteorology, Frank Dachtile, geochemistry and mineralogy, on "Meteoritic Impact — A Factor in Climatic Changes," 3:55 p.m., Room 112 Walker.

Plant Pathology, Barry Nolt on "Host Derived Nucleic Acid Degrading Enzymes in a Resistant Plant-Pathogen Interaction — Ribonuclease," 3:55 p.m., Room 333 Whitcomb.

Nuclear Engineering, Frank Schweornt, Standardized Nuclear Utility Power Plant System, on "The Role of the Standardized Nuclear Plant in Accelerating the Licensing Process," 4 p.m., Room 225 EE West.

Thursday, Jan. 26

Chemistry, William H. Miller, University of California, Berkeley, on "The Semicalical Nature of Atomic and Molecular Collisions," 12:45 p.m., Room 333 Whitcomb.

Agronomy, Rahmatullah on "Magnesium Availability to Corn from Several Pennsylvania Soils," 3:55 p.m., Room 111 Tyson.

Microbiology and Cell Biology, Stephen L. Barclay, MIT, on "Genetic Analysis of the Cyclic AMP Catabolism System in *Dictyostelium discoideum* and Its Role in Morphogenesis," 4 p.m., Room S2 Frear.

Philosophy, John Anderson, Ewen Pugh Professor of Philosophy, on "Why Categories?" 4 p.m., Room 69 Willard.

Computation Center, "Text Processing," (4 of 4), introductory programming background suggested, 7:30 p.m., Room 102 Forum.

Computation Center, "Graphics," (4 of 4), introductory programming background suggested, 7:30 p.m., Room 110 Osmond.

Exhibits

Chambers Gallery: Molly Terrill, paintings, and FSU art students, glass, both through Jan. 25.

HUB Gallery: Rowan P. Smolcha, "The Shy People," photographs.

Kern Commons Gallery: Central Pa. Scholastic Art, through Jan. 28. Harley Straus, photographs, and Glenn Ziemke, glass, both open Jan. 28.

Museum of Art: "The First Five Years," an anniversary show of selections from the permanent collection.

Zoller Gallery: student painting exhibit, opens Jan. 24.

WPSX Highlights

The significance of the Nazi party and the Ku Klux Klan in the United States and media coverage of extremists groups are explored Saturday, Jan. 21, at 8 p.m. on **The Extremists: American Nazis and the KKK**. The special hour-long program is moderated by Roger Wilkins of The New York Times and includes excerpts from a recent controversial edition of **Black Perspective on the News**, as well as segments from a film on alleged Nazi activity at a Houston high school.

Members of the panel include: Seymour Martin Lipset, author of *The Politics of Unreason*; Irwin Sussell of the B'nai B'rith's Anti-Defamation League; and Bruce Ennis of the American Civil Liberties League.

Talkabout begins a two-part look at the problem of rape in Central Pennsylvania, Tuesday, Jan. 24, at 7:30 p.m. State College psychologist JoAnn Farr considers the causes, impact, and frequency of rape in rural areas and small towns on the first program, **Rape: The Aggressive Crime**.

On Tuesday, Jan. 24, at 8 p.m., Terence Knapp stars in **Damien**, a powerful one-character drama about the work of Father Damien de Veuster, who went to Hawaii in the late 1800s to work with the lepers of Molokai Island. Written by Honolulu playwright Aldyth Morris, the play is a monologue delivered by Damien as he watches his own funeral procession, which was ordered by King Leopold of Belgium as a kind of hero's welcome — 50 years after the priest's death.

The events leading to and surrounding the 1970 terrorist crisis in French Canada are recreated Tuesday, Jan. 24, at 9:30 p.m. in a special 90-minute program, **Action: The October 1970 Crisis**, produced by the National Film Board of Canada. The program delves into the controversial issue of martial law, which was declared by the Canadian government after British attaché James R. Cross and Quebec Minister of Labor Pierre Laporte were kidnapped by the FLQ (*Le Front de Liberation du Quebec*).

In the first of two programs on the "space age," **Nova** examines the 12-year struggle to get a man on the moon after Sputnik started the race in 1957. Its history of the moon race, **Nova: One Small Step**, can be seen Wednesday, Jan. 25, at 8 p.m.

Sissy Spacek stars on **Great Performances** Wednesday, Jan. 24, at 9 p.m. in Paul Gallico's *Vern: U.S.O. Girl*. The play is a warmhearted and realistic portrait of a stage-struck but not very talented U.S.O. performer who wants a career in show business.

Public television's award-winning public affairs series, **The Advocates**, returns to Channel 3 Thursday, Jan. 26, at 9 p.m. Using a mock-trial debate format, the series will see live every other week. The first question to be debated is "Should the federal government end programs of preferential treatment for women and minorities?"

1978-79 Leaves of Absence Approved

College of Agriculture

Robert C. Bealer, professor of rural sociology, to develop a monograph on the relationship between sociological theory and rural sociology.

Robert B. Beelman, associate professor of food science, to study aspects of grape culture, fermentation, and wine production at UC-Davis.

James E. Brewer, associate professor of ornamental horticulture, to study outstanding horticultural education programs in England.

Samuel M. Curtis, associate professor of agricultural education, to serve as a Visiting Scholar at the National Center for Vocational Education at Ohio State University.

Donald D. Davis, associate professor of plant pathology, to study the effects of sulphur dioxide on vegetation at the Institute of Plant Protection, Wageningen, The Netherlands.

David R. DeWalle, associate professor of forest hydrology, to study watershed problems and practices in New Zealand.

John L. George, professor of wildlife management, to study the effects of DDT on whitetail deer and to develop written reports on elk, the bald eagle, and the osprey in Pennsylvania.

James S. Holt, professor of agricultural economics, to study labor-management conflict avoidance and resolution mechanisms within agriculture.

Frederick A. Hughes, project leader — farm management Extension coordinator of agricultural programs, to research manuscript development and prepare educational materials in the areas of estate planning and farm appraisal.

Gerald L. Jubb Jr., associate professor of entomology, to complete research and manuscript on insects injurious to grapes in eastern United States.

Nuri N. Mohsenin, professor of agricultural engineering, to conduct research on physical properties of food and agricultural materials in Israel, Germany and England.

Charles W. Rutschky III, professor of entomology, to investigate new developments in entomology with particular emphasis on their implications for undergraduate instruction.

L. Dwight Schwartz, professor of veterinary science Extension, to develop health related materials on important livestock and poultry diseases in conjunction with the Federal Extension Veterinarian.

College of Arts and Architecture

John A. Cook, professor of art, to develop a series of outdoor monumental sculptures.

Gideon Golany, professor urban and regional planning, to study urban and regional planning at Hebrew University.

William G. King, associate professor of landscape architecture, to study the design and construction of three greenbelt towns.

George S. Zoretich, professor of art, to develop paintings, drawings, and prints.

College of Business Administration

Sumer C. Aggarwal, professor of management science, to pursue studies on productivity.

Joseph F. Bradley, professor of finance, to study pollution abatement revenue bonds issued in Pennsylvania.

Gary A. Kochenberger, professor of management science, to study network theory at the University of Colorado.

Capitol Campus

Elmer N. Lear, professor of social science and education, to examine the theoretical undercurrents in the establishment of Israel.

The Commonwealth Campuses

Luis F. Gonzalez-Cruz, associate professor of Spanish, New Kensington, to study African influences in Latin American culture and literature.

Evelyn A. Hovane, associate professor of English, Fayette, to develop an anthology of modern literature with bibliography.

Kenneth M. Kuhn, associate professor of art, Altoona, to develop a creative application of the more pattern as a source of visual movement on relief surfaces.

G. Fred Riemann Jr., assistant professor of philosophy, Ogontz, to translate the *Mo Ching* and compare this work to Western semantics and logic.

Eugene R. Slaski, assistant professor of history, Allentown, to complete a biography of Thomas Willing and a study of the Waldens of the Port of Philadelphia.

James B. Uhl, associate professor of engineering, York, to study remote sensing, with particular application to agriculture.

Narayanansamy Viswanathan, associate professor of chemistry, Fayette, to study the electrolytic deposition of silicon on metal substrates and the role of time in a new process for converting coal to clean fuels and chemical feedstocks.

College of Earth and Mineral Sciences

Richard C. Bradt, professor of ceramic science, to study at the National Defense Academy of Japan in areas related to ceramic science.

Rosa G. de Pena, associate professor of meteorology, to study aspects of atmospheric chemistry at Johann Wolfgang Goethe University and Max Planck-Institute, Germany.

Roger M. Downs, associate professor of geography, to study cognitive mapping and spatial thinking.

John A. Dutton, professor of meteorology, to study nonlinear atmospheric dynamics and statistical formulations of wind characteristics at two Danish institutions.

R. H. Essenhigh, professor of fuel science, to study fuel efficiency and reaction characteristics of coal and carbon at the University of Newcastle, England.

Laxman N. Mulay, professor of solid state science, to study the theory and applications of intense magnetic fields and use of SQUID technique for measuring magnetic properties of various materials and processes at the Naval Research Laboratory, Washington, D.C.

Robert E. Newnham, professor of solid state science, to study applications of piezoelectric materials at Oxford University.

Karl E. Spear, associate professor of ceramic science, to study thermochemical property calculations using the exact relationship between phase diagrams and thermodynamics at Oxford University.

College of Education

William Bradley, associate professor of art education, to study the role of visual memory in the training of artists.

J. David Boyle, professor of music education, to study the environmental and sociological influences on the development of musicality in England.

Ralph T. Heimer, professor of education, to study the problems and prospects of employing a Plato-like technology for instructional improvement in selected Australian universities.

Sebastian V. Martorano, professor of education and research associate, to study cross-cultural relationships in decentralization of post-secondary education.

Robert M. Smith, assistant provost and professor of special education, to study the reciprocal influences of handicapping conditions.

Yoshimitsu Také, associate professor of education and sociology, to pursue an institutional analysis of the Malaysian school system.

College of Engineering

Robert M. Bamoff, professor of civil engineering, to study the relationship between the ultimate strength and modulus of elasticity of concrete at early ages.

J. L. Duda, professor of chemical engineering, to study mass transportation in polymer blends at Taiwan National University.

David B. Geselowitz, professor of bioengineering, to study the quantitative relationship between electrical sources in heart muscle cells and the body surface electrocardiogram at Duke University.

Inyoung Ham, professor of industrial engineering, to study group technology in Japan and Europe.

Budgur Lakshminarayana, professor of aerospace engineering, to study the Boundary Layer, Wake, an unsteady flow measurement in high speed compressors, at two West German universities.

Joseph Stach, associate professor of electrical engineering, to study the utilization of advance process technology to achieve specific device characteristics at the University of Michigan.

James C. Wambold, associate professor of mechanical engineering, to study ride characteristics using the amplitude-frequency distribution method at the Federal Highway Administration.

College of Health, Physical Education and Recreation

Chauncey A. Morehouse, professor of physical education, to study traction and torque developed by different types of footwear on artificial turf at the Institut fur Bromechanik, West Germany.

College of Human Development

Paul B. Baltes, professor of human development, to study areas related to life cycle and problems of aging at the Center for Advanced Study in the Behavioral Sciences.

Daniel Katkin, associate professor of law, to study the social history of the rehabilitative ideal of penology at Yeshiva University.

Marshall W. Raffel, professor of health planning, to pursue studies in selected European countries on the planning, organization, and financing of health services.

Hugh B. Urban, professor of human development and psychology, to complete a manuscript concerned with the principles of human service system design and development.

University Libraries

Catherine Ann Carter, associate librarian, cataloging, to study the effectiveness of two systems of bibliographical subject analysis: Library of Congress subject headings and precis indexing.

Wasyli Orest Luciv, librarian, Slavic library program, to develop original manuscripts in the area of American studies and to update the annotated bibliography of *History of Rus Ukraine*.

College of the Liberal Arts

Henry S. Albinski, professor of political science, to pursue studies in Australia on the United States-Australian alliance.

Thomas W. Benson, professor of speech communication, to develop a theoretical model for the rhetorical criticism of nonoratorical forms.

Elmer W. Borklund, associate professor of English, to develop a critical monograph on contemporary criticism in the United States and England.

Eugene N. Borza, associate professor of history, to do research on ancient Macedonia and Alexander the Great.

Barton W. Browning, associate professor of German, to do research at the Dircal Library, West Germany.

Napoleon A. Chagnon, professor of anthropology, to continue the Yanomamo research project at Cambridge University.

Herman Cohen, professor of speech communication, to pursue a systematic study of how the focus and emphasis of research in speech communication has changed.

Gordon F. De Jong, professor of sociology, to perform research on the development of a non-economic theory of migration.

Grant N. Farr, professor of economics, to pursue studies in American economic history.

Harvey R. Gilbert, associate professor speech communication, to study factors contributing to poor intelligibility in hearing impaired speech at University College, London.

James B. Herendeen, professor of economics, to do research on the theory of the banking firm, the theory of investment, and stabilization policy.

Robert LaPorte Jr., professor of public administration, to research the basic needs quality of life approach in three South Asian countries.

Robert F. Lima Jr., professor of Spanish and comparative literature, to develop the translation of *La lampara maravillosa* and publication of a new edition of *An Annotated Bibliography of Ramon del Valle-Inclan*.

Leon F. Lyday III, professor of Spanish, to prepare a manuscript on the theatre of the Brazilian Alfredo Dias Gomes.

Robert K. Murray, professor of American history, to complete a manuscript entitled, *Death in a Hole; The Story of Floyd Collins*.

Robert E. O'Connor, associate professor of political science, to pursue studies on the implementation and impact of the Voting Rights Acts of 1965, 1970 and 1975.

Charles S. Prebish, associate professor of religious studies, to do research in Japan and at the University of California on the problem of Buddhist ethics in the modern world.

Joseph G. Price, professor of English, to complete a manuscript which investigates Shakespeare's concept of tragedy.

John H. Riew, professor of economics, to research the role of fiscal policy on the industrialization process in a rapidly expanding economy.

William R. Schmalstieg, professor of Slavic languages, to develop a manuscript on comparative Indo-European linguistics.

Dan P. Silverman, associate professor of history, to study in London and Paris on Britain and France in the aftermath of World War I.

Alfred A. Triolo, associate professor of Spanish and Italian, to pursue research at the Cornell University Library and at the Vatican Library on the application of the capital sin system in Dante's *Purgatorio*.

Donald P. Verene, associate professor of philosophy, to develop a manuscript on *Vico's* philosophy of imagination.

Patricia A. Ward, associate professor of French and comparative literature, to develop a manuscript comparing the thematics of time and the stylistic implications of the theme of time in the Romantic Lyric.

College of Medicine

Cheston M. Berlin Jr., professor of pediatrics and pharmacology, to study drug distribution in human breast tissue and milk at the University of Pennsylvania.

John D. Connor, professor of surgery, to study the cellular and molecular pharmacology of psychoactive drugs at the University of London.

Stanley L. Gordon, associate professor of surgery, to study hand surgery at the Institute De La Main, France.

David M. Leeman, associate professor of medicine, to study at the Thorax Center, Erasmus University, Rotterdam, The Netherlands.

Rodrigue Montel, professor of obstetrics and gynecology, to study progesterone receptors in human endometrial adenocarcinoma at the University of Paris.

James R. Neely, professor of physiology, to do research on the recovery of ischemic heart muscle at Erasmus University, Rotterdam, The Netherlands.

College of Science

George E. Andrews, professor of mathematics, to study the theory of partitions at the University of New South Wales, Stanford University, and The University of Aberdeen.

Frank Deutsch, associate professor of mathematics, to study the relationships between the geometry of a branch space and approximation-theoretic properties of certain of its subsets at Johann Wolfgang Goethe University, Germany.

Thomas E. Feuchtwang, professor of physics, to study spin polarization electron emission from 3-d transition metal ferro-magnets and electron tunneling phenomena in the presence of a nonlocal effective interaction at the Israel Institute of Technology.

Gordon N. Fleming, professor of physics, to study the Mill Plane Formulation at the Massachusetts Institute of Technology.

Moses Glasner, associate professor of mathematics, to study function theory and potential theory at UC-San Diego.

Peter H. Maserick, associate professor of mathematics, to study choquet theory and harmonic analysis at the University of Copenhagen.

Roy A. Olofin, professor of chemistry, to study the physical organic chemistry of the bonding in Group IVa elements attached to carbon at UC-San Diego.

Paul Todd, professor of biophysics, to study intercellular links at the Institute for Medical Oncology, Moscow; Gade Institute for Pathology, West Germany; and the Institute of Biochemistry, Sweden.

Joseph J. Villafra, associate professor of chemistry, to study the application of synthetic inorganic techniques in synthesizing substitution-inert metal-substrate complexes at Oxford University.

James E. Wright Jr., professor of genetics, to serve as a Senior Scientist-Visiting Professor at the School of Fisheries, Kitasato University, Japan.

Berttram Yood, professor of mathematics, to study operator theory at Tel-Aviv University.

Penn State Intercom

News in Brief

Faculty Club invites visitors to drop in Feb. 3

The Faculty Club invites the University community to visit the club on Friday, Feb. 3. For those who are interested in joining the club, this visit will enable them to find out about the facilities and services offered.

Lunches are available from 11:30 a.m. to 1:30 p.m., costing between 75 cents and \$4. A reception for prospective members will be held between 4 and 7 p.m. Tea or coffee can be had in the library, wine and cheese will be served in the Fireside Lounge, and beer and pretzels will be available in the Speakeasy Lounge.

Dinner will be served in the dining room between 6 and 8 p.m. The meals range in price between \$4 and \$8.

USIA official to talk on US and Eastern Europe

John D. Scanlan, deputy assistant director for Europe of the United States Information Agency, will present a public lecture at the University at 2:30 p.m. on Friday, Jan. 27.

His topic will be "The United States and Eastern Europe," and he will speak in Room 124 Sparks Bldg.

Mr. Scanlan, who recently returned from a tour of Moscow, Leningrad, Warsaw, Budapest and Prague, has been a Foreign Service officer with the Department of State for 22 years. He is currently posted to Washington, where he is on detail to the U.S. Information Agency and is responsible for USIA programs in the Soviet Union, Eastern

Europe, the Balkans, and Turkey.

A native of Minnesota and a graduate of the University of Minnesota (B.A. in history and M.A. in Russian Area Studies), Mr. Scanlan has spent most of his Foreign Service career working on Soviet and Eastern European affairs. He served for ten years in posts in Moscow, Warsaw, and Poznan.

Among his most recent assignments have been political counselor in Warsaw (1973-75), and special assistant to the director general of the Foreign Service (1975-76). He is a graduate of the Department of State's Senior Seminar in Foreign Affairs.

State's black collegians hold caucus this week

Black students and State legislators will convene this week at University Park for the Caucus of Pennsylvania Black Collegians, the first known statewide meeting of black students in the history of the Commonwealth.

A political symposium, the caucus will bring together members of black student organizations from all over the State from Jan. 26 through Jan. 28. Pitt, Dickinson, Bucknell, and Susquehanna are among the colleges and universities who are sending representatives, and many of Pennsylvania's black legislators will attend.

The symposium will include discussion workshops on such topics as black politics, higher education in Pennsylvania, student involvement in political struggle, communications, leadership, and racism at home and abroad.

(Continued on page 4)

President issues letter on energy plan

President John W. Oswald Monday released to University officials the following letter:

"The Pennsylvania Public Utility Commission has ordered that all utilities file an Emergency Energy Conservation Plan because of the current coal strike and the resulting dwindling reserve of coal for electric generation. West Penn Power and all other Pennsylvania utilities serving the University have now acted on this plan. In accordance with this, Step No. 1 of their emergency plans has been officially activated.

"In accordance with this first step, I have instructed the Office of Physical Plant to work through the building coordinators to take all appropriate steps with students, faculty and staff to eliminate immediately

all nonessential use of electricity. No new additional electrical equipment will be connected during the emergency unless approved by the University's Executive Energy Conservation Committee.

"Under Step No. 2, as outlined for the West Penn Power Company by the Public Utility Commission, and estimated to be effective on Jan. 30, the University is setting a goal to reduce consumption of electricity by 10 percent. Appropriate guidelines will be forthcoming.

"In the event, however, that the University cannot voluntarily reach the 10 percent goal, there will be specific directions issued on how and where activities will be curtailed.

"I appreciate your cooperation in this situation."

All employees to get benefits report

In the near future, each regular, full-time faculty and staff member appointed prior to Jan. 1, 1977, will receive a personal statement highlighting the major provisions of the comprehensive benefits program provided to faculty and staff members and their families by The Pennsylvania State University. Each individual's statement will be mailed to his or her home address and will provide basic information on the group life and health insurance programs, retirement, social security, accidental death and dismemberment insurance, disability benefits and worker's compensation. Also, an estimated dollar value of the benefits will appear on each statement.

President Oswald requested that these

statements be provided to faculty and staff members to describe more fully the benefits coverages for which they are eligible either currently, at retirement, or after death.

The information shown on the statements reflects data as of July 1, 1977, and includes salaries as increased effective that date. However, any changes in information since that date will not be reflected in the statement. For example, if an individual subsequently changed the amount of accidental death and dismemberment insurance, the change would not show.

In a few cases, the designated date of appointment may not be accurate. This

Pittsburgh Symphony to perform Feb. 3-4

Michael Tilson Thomas will conduct the Pittsburgh Symphony Orchestra during its sixth Artists Series residency at Penn State from Jan. 31 through Feb. 4.

Mr. Tilson Thomas, the music director of the Buffalo Philharmonic, will conduct the orchestra and the University Choirs in performances of Mahler's Symphony No. 2 in C minor. The concert will be performed at 8:30 p.m. on Friday and Saturday, Feb. 3 and 4, in Eisenhower Auditorium.

Diana Hoagland and Claudine Carlson will be the soloists.

The first performance of the Pittsburgh Symphony Orchestra concert on Feb. 3 is part of the Music Series and is sold out by subscription. However, there are tickets available for the Feb. 4 concert, and they will be on sale on Wednesday, Feb. 1, and Thursday, Feb. 2, at the Artists Series HUB booth and the Eisenhower Auditorium from 9 a.m. to 4 p.m. Phone orders on Master Charge and VISA cards may be phoned in by calling 863-0255 from 9 a.m. to 4 p.m. on the days of the sale only.

□

The Music Department has announced several public programs in connection with the week's residency on campus of the Pittsburgh Symphony Orchestra.

Leonard Feldman, associate professor of music and chairman of the Music

Department's special events committee, explains that in order to make best use of the orchestra, it will be utilized both as a full orchestra and as two smaller units, a chamber and an opera orchestra.

All events, unless otherwise indicated, will take place in Eisenhower Auditorium. No admission will be charged, and tickets will not be required.

From 3:30-6 p.m. on Tuesday, Jan. 31, the chamber orchestra will perform with student conductors and soloists.

From 8-10:30 p.m. Tuesday, the opera orchestra under the direction of Donald Johanos, associate conductor of the Pittsburgh Symphony, will hold an open, one-to-one rehearsal with the University Symphony. In this kind of event, members of the two orchestras are matched and sit next to each other during the performance.

From 10 a.m.-12:30 p.m. Wednesday, Feb. 1, student soloists will perform with the opera orchestra, under the direction of Mr. Johanos. From 2-4:30 p.m. on Wednesday, student soloists and conductors will work with the chamber orchestra. That evening at 7 p.m., Michael Tilson Thomas, who will be conducting the symphony orchestra in its Artists Series performances, will lecture on the Mahler symphonies, and at 8:30 p.m., Philip Meyers, the Pittsburgh's third horn player, will present a recital of French

(Continued on page 4)

Michael Tilson Thomas (above) will conduct the Pittsburgh Symphony Orchestra and the University Choirs in two performances of Mahler's Symphony No. 2 in C minor. Soloists are Diana Hoagland (top right) and Claudine Carlson (bottom right).

Penn Staters

Dr. John S. Nisbet director of the Ionosphere Research Laboratory, visited India from Dec. 28 to Jan. 13 as a guest of the Indian Committee for Space Research. He lectured at the Physical Research Laboratory, Ahmedabad; the National Physical Laboratory, New Delhi; and presented the keynote address on "The Dynamics of the Thermosphere" at the Space Sciences Symposium at Ahnra University, Waltair.

Three faculty members in the College of Arts and Architecture are currently having one-man shows.

David Rubello, assistant professor of art, is having a show of his paintings at the University of Michigan's Slusser Gallery, located in Ann Arbor. The invited show opened Jan. 7 and will continue through Feb. 4. Mr. Rubello's works were also featured recently in a one-man invitational at Albion College.

Steve Sherman, instructor in the Department of Art, has a one-man show of his paintings at the Landmark Gallery, Inc., in New York City. The show opened at the gallery, which is located at 469 Broome Street, on Jan. 14 and will continue there through Feb. 2. Mr. Sherman joined the University faculty last fall after serving as artist in residence at the Bronx Museum of Art.

An exhibition of 20 architectural drawings by **Julian Weiss**, assistant professor of architecture, opened at the A and A Gallery of Yale University's School of Architecture on Jan. 16. His one-man show will continue through Jan. 27. Mr. Weiss attended the Yale school in 1963 after receiving a degree in architecture from Penn State in 1962.

Provost Edward D. Eddy is among some 30 educational leaders called upon to contribute to the exchange of views published in a new book, *Leadership for Higher Education*. The volume was edited by Roger W. Heyns and published by the American Council on Education. Other prominent educators who share their practical experiences and reflections about the role of leadership in the volume are Theodore M. Hesburgh, Terry Sanford, Harold Howe II, Mary F. Berry, Patricia A. Graham and Stephen Horn.

Dr. Ray Wahl, professor of vocational education, has been elected a Fellow of the American Academy of Safety Education for outstanding service and contributions to safety education.

Dr. Gerd M. Rosenblatt, professor of chemistry, has been appointed to a three-year term on an Oak Ridge National Laboratory advisory committee established to plan a new high temperature materials facility. In addition, he has been re-appointed to a second three-year term as chairman of the review committee for the Chemical Engineering Division of the Argonne National Laboratory.

During winter term, Dr. Rosenblatt was an invited speaker at the University of Kentucky, the High Temperature Science and Solar Thermal Test Facilities Operators Workshop, Bell Telephone Laboratories, and the Los Alamos Scientific Laboratory.

Dr. Richard H. Heindel has retired from Capital Campus with the title professor emeritus of international relations. Dr. Heindel came to Capital in 1967 as its first Dean of Faculty and served in that capacity until 1973 when he assumed full-time teaching and research duties.

He had previously served Pratt Institute

Dr. Heindel

Dr. Hale

and Wagner College as president, and the University of Buffalo as vice-chancellor. His government service included posts with the U.S. Embassy in London, the Library of Congress, the U.S. Department of State, the U.S. National Commission for UNESCO, and the staff of the Senate Foreign Relations Committee. Wagner College bestowed on him the Litt.D. in 1957, principally for his contributions to the intercultural relations field and U.S. information libraries.

Dr. Heindel is editor of the international affairs section of the magazine, *Intellect*, and president of the Foreign Policy Association of Harrisburg. He plans to continue writing and will develop consulting services for overseas business and education.

Dr. Edgar B. Hale, professor of animal behavior and former assistant dean of the Graduate School, has retired after nearly 29 years of service.

A native of Tulsa, Texas, Dr. Hale joined the faculty at Penn State in 1949 as assistant professor of poultry husbandry and psychology research. In 1956 he was named associate professor of animal behavior and, five years later, earned his full professorship in animal behavior.

In 1964 Dr. Hale was named assistant to the vice-president for research and was primarily concerned with obtaining grants and expanding the University's research program in the area of biology. A year later he was promoted to assistant dean of the Graduate School, a position he held for three years before resuming his duties as professor of animal behavior.

Dr. Hale received his B.S. in dairy husbandry at Texas A&M. His M.S. in dairy cattle nutrition was conferred by Michigan State, and his Ph.D. in zoology and animal behavior was awarded by the University of Chicago in 1950.

His research was initially directed at determining the rate of digestion in the rumen of cattle. Later, he studied the role of physiology and dominance behavior in fish, chickens and turkeys and the sexual behavior of bulls.

Appointments

Alice M. Rethinger as assistant professor of English at Shenandoah Valley, B.A., Mary Mansie College; M.A., Ph.D., Bowling Green State U. Formerly instructor, Slippery Rock State College; assistant professor, Bethune-Cookman College; instructor, Bowling Green State U.

Ronald R. Rubenfield as instructor of accounting at Beaver, B.S., Penn State U.; M.B.A., Shippensburg State College. Formerly part-time instructor, Community College of Allegheny Co.; self-employed accountant.

Prem D. Satsangi as assistant professor of chemistry at Fayette, B.S., M.S., Ph.D., U. of Allahabad, India. Formerly post officer and assistant professor, U. of Allahabad, India.

David J. Sheller as assistant professor of entomology at University Park, B.S., M.S., U. of Oklahoma; Ph.D., Penn State U.

Richard M. Smaby as assistant professor of linguistics at University Park, B.A., Yale U.; M.A., Ph.D., U. of Pennsylvania. Formerly assistant professor, U. of Pennsylvania.

Suzanne C. Striedieck as chief, serials department, University Libraries at University Park, B.A., Penn State; M.L.S., U. of Pittsburgh.

James E. Swanson as assistant professor of educational psychology at Delaware County, B.S., Illinois State U.; M.S., Ph.D., U. of Wisconsin. Formerly teacher, Marshall Middle School, Ill.

Glenn F. Thiel as instructor of physical education and head coach of men's lacrosse at University Park, B.S., Penn State; M.S., U. of Massachusetts. Formerly head lacrosse coach and instructor, U. of Virginia.

Donald M. Tombasco as instructor in engineering at Worthington-Scranton, B.M.E., General Motors Institute. Engineer, General Motors Corp.; high school teacher in Hazleton and Tamaqua, Pa.

Michael J. Wasylenko as assistant professor of economics at University Park, B.S., St. Joseph's College; M.A., Ph.D., Syracuse U. Formerly assistant professor, U. of Wisconsin-Madison.

William C. Weary as instructor of physical education at University Park, B.S., Penn State.

Nancy A. Wentzler as assistant professor of economics at University Park, B.S., Penn State; M.A., U. of Wisconsin-Madison; Ph.D. candidate, Wisconsin.

Stephen R. Williams as assistant professor of biology at New Kensington Campus, B.A., Rutgers U.; M.S., Ph.D., U. of New Mexico. Formerly visiting assistant professor, U. of New Mexico.

Jerry L. Wircenski as associate professor, Division of Occupational and Vocational Studies at University Park, B.S., M.A., Ph.D., Ohio State U. Formerly assistant professor, Purdue U.

Dawn C. Wooderson as assistant professor of music education at University Park, B.M.E., Lee College; M.M.E., Ph.D., Florida State U.

Michael A. Yahr as instructor of business administration at Beaver, B.A., M.B.A., U. of Pittsburgh. Formerly instructor, Allegheny Community College.

Lakshman S. Yapa as assistant professor of geography at University Park, B.A., U. of Ceylon; Ph.D., Syracuse U. Formerly assistant professor, Boston U., U. of Pennsylvania.

Thomas D. Yawkey as associate professor of early childhood education at University Park, B.S., Indiana U. of Pa.; M.Ed., Duquesne U.; M.S., Ph.D., U. of Illinois. Formerly academic coordinator, Early Childhood Education Division, and director, Wisconsin Early Childhood Study Center, U. of Wisconsin at Madison.

Faculty women sponsor three service groups

Three groups sponsored by the Faculty Women's Club offer services which might be useful to Penn State faculty, staff and administrators. They are Housing Referral, the Penn State Greeters and Reading for the Blind.

Faculty and staff whose houses will be vacant for a period of time may list their homes either by going to the Housing Referral Office, Room 313 Willard Bldg., or by phoning 865-1538. (The HR office is open Tuesdays from 9:30 to 11:30 a.m. and Thursdays from noon to 2 p.m.)

The HR office lists an average of 40 houses per year and receives several hundred inquiries.

Penn State Greeters are available to host guests of individual departments and to work at registrations, luncheons, receptions and tours for alumni groups. Volunteers with a varied background of skills and interests are available. For further information, call Marie Leath, 238-1436, or Joyce Chelius, 238-5789.

Members of the Reading for the Blind service group volunteer their time at home to tape record textbooks required for classroom use by blind and partially-sighted students at Penn State. Copies of the tapes are sent to the Free Library in Philadelphia, where they are catalogued and placed on loan for students around the country. The Faculty Women's Club not only wishes to inform faculty that this service is available but also suggests that retired staffers might consider volunteering for this activity. Information may be obtained by calling Mary Schmidt, 238-3877.

Obituaries

Dr. William C. Grasley, adjunct professor of physiology and the athletic team physician from 1962 to 1972, died Jan. 18. Born Feb. 21, 1918, in Allentown, Dr. Grasley earned his medical degree from Hahnemann Medical College. After resigning as athletic team physician, he served as an emergency room physician at Centre Community Hospital. He was also associated with the Noll Human Performance Laboratory at the University.

Anne R. Free, 76, former assistant professor of home-community relationships, died Jan. 14. A 1940 graduate of the University in home economics, Mrs. Free taught a course in social usage from 1947 until 1965 and was the author of a textbook, *Social Usage*. Her husband, George J. Free, formerly professor of secondary education at Penn State, died in 1973.

John F. Friesse, 83, who retired in 1960 as professor emeritus of industrial arts education, died Jan. 19 in Hales Corners, Wis.

Mr. Friesse held an M.S. from the University of Wisconsin. He authored numerous magazine articles and several books, and publication of one of his books, *The Role of Industrial Arts in Education*, was made possible by contributions from 50 of his former Penn State students. In 1954 the American Council on Industrial Arts Teacher Education selected him as one of 12 "National Leaders in Industrial Arts Education."

University Park Calendar

Jan. 26-Feb. 5

Special Events

Thursday, Jan. 26

Last date for submission of spring term reserve reading lists, Room W2 Pattee.

FSHA, Chinese Dinner, 5:30 p.m., Maple Room, Henderson. Reservations: 865-7441. Comp. Lit. film series, *Open City*, Italian with English subtitles, 7 and 9 p.m., Room 112 Kern.

GSA, Financial Aid workshop, 7:30 p.m., Room 101 Kern.

Japanese language and literature films, "Japan in the Winter," "Shiko Munakata — Master of Wood Block Prints," "Noh Play — Aoi No Ue," and "An Introduction to Kabuki Theatre," 7:30 p.m., HUB assembly hall. University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Friday, Jan. 27

Public lecture, John D. Scanlan, deputy assistant director for Europe, U.S.I.A., on "The United States and Eastern Europe," 2:30 p.m., Room 124 Sparks. France-cinema, *Coteau, Beauty and the Beast*, 7 and 9 p.m., Room 112 Kern. Campus 4-H Club Square Dance, 8 p.m., HUB ballroom.

Sports: gymnastics, vs. York (Canada), 8 p.m., Rec. Bldg.

University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Saturday, Jan. 28

Shaver's Creek Nature Center, Adventure Series, for children 7 and older, 10 a.m.-3 p.m., Fireside Reading, 8 p.m., Stone Valley. Sports: women's basketball, vs. Rutgers, 2 p.m., White Bldg.; men's basketball, vs. Pittsburgh (EA A game), 7:30 p.m., Rec. Bldg. France-cinema, Robert, *Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern. University Theatre, *The Runner Stumbles*, 8 p.m., Pavilion Theatre.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Jan. 29

University Chapel service, The Rev. Charles L. Coleman, religious affairs, 11 a.m., University Chapel.

USG Flea Market, noon-9 p.m., HUB ballroom. Shaver's Creek Nature Center, History Walk, 2 p.m., Stone Valley.

France-cinema, *Beauty and the Beast*, 7 and 9 p.m., Room 112 Kern.

Monday, Jan. 30

Last date for March graduates to deliver theses to Graduate School.

Last date for Departments to certify to Graduate School completion of required papers for March graduates.

First day for signing spring term NDSL and University Long Term Loans, Room 108 Shields.

USG Flea Market, 11 a.m.-5 p.m., HUB ballroom.

France-cinema, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern. ARHS film, Alex Haley, *Roots*, Part I, 7:30 p.m., Room 106 Forum; Part III, 7:30 p.m., Pollock rec room.

Tuesday, Jan. 31

USG Flea Market, 11 a.m.-5 p.m., HUB ballroom.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. James Sweeney, history, on "The Life and Letters of Innocent III," FSHA, Italian Renaissance Dinner, 5:30 p.m., Maple Room, Henderson. For reservations, phone 865-7441.

Sports: women's basketball, vs. Cortland, 7 p.m., White.

ARHS film, Alex Haley, *Roots*, Part II, 7:30 p.m., Room 106 Forum; Part III, 7:30 p.m., Friday rec room, East Halls.

Wednesday, Feb. 1

USG Flea Market, 11 a.m.-9 p.m., HUB ballroom.

ARHS film, Alex Haley, *Roots*, Part III, 7:30 p.m., Room 106 Forum. Commonsplace Theatre, *High Sierra*, 7:30 and 9:30 p.m., Room 112 Kern.

Michael Tison Thomas, Pittsburgh Symphony conductor, lecture on the Mahler symphonies, 7 p.m., Music Bldg. recital hall.

Freshman Patti Spisak will be at Rec. Bldg. for Jan. 27 and Feb. 4 meets.

Photo by Patrick Little

Phil Myers, Pittsburgh Symphony Orchestra, French Horn, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 2

College of Education luncheon, 12:30 p.m., Room 101 Kern.

Afro-American Studies Forum, Edmond Keller, political science, Indiana University, on "The Impact of Black Mayors on Urban Policy," 7:30 p.m., Room 101 Kern.

Sports: men's and women's bowling, ACU Region 1 Tournament; men's basketball, vs. Marquette, 7:30 p.m., Rec. Bldg.

Friday, Feb. 3

Sports: men's and women's bowling, ACU Region 1 Tournament.

Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Artists Series, Pittsburgh Symphony Orchestra and the University Chorus, Mahler's Symphony No. 2 in C minor, 8:30 p.m., Eisenhower Auditorium.

Saturday, Feb. 4

Shaver's Creek Nature Center, cross-country ski workshop for beginners, by registration only — 865-1851, 9 a.m.-noon: Winter Stars, 8 p.m., Stone Valley.

Sports: men's and women's bowling, ACU Region 1 Tournament; women's fencing, vs. J. Madison and Cornell, 9 a.m., White; coed rifle, vs. Navy, 10 a.m., White; men's fencing, vs. Cornell, 1 p.m., Rec. Bldg.; men's volleyball, vs. Nyack (ECVL game), 1 p.m., Rec. Bldg.; women's basketball, vs. Shipensburg, 2 p.m.; White men's swimming, vs. Temple, 2 p.m.; Natatorium: wrestling, vs. Navy, 2 p.m., Rec. Bldg.; gymnastics, vs. So. Connecticut, 7:30 p.m., Rec. Bldg. Eco-Action, Recycling, 10 a.m.-3 p.m., Parking Lot 83 (behind flower gardens) and Boalsburg Fire Hall.

Artists Series, Pittsburgh Symphony Orchestra and the University Chorus, Mahler's Symphony No. 2 in C minor, 8:30 p.m., Eisenhower Auditorium.

Sunday, Feb. 5

University Chapel service, Mary Marks, Pittsburgh Theological Seminary, 11 a.m., Eisenhower Chapel. Shaver's Creek Nature Center, Snow and Ice, 2 p.m., Stone Valley.

Susan Fischel, Dan Joffe, and Carol Mattis, oboe, 3:30 p.m., Music Bldg. recital hall. France-cinema, Renoir, *Little Theatre of Jean Renoir*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Jan. 26

Computation Center, "Text Processing," (4 of 4), introductory programming background suggested, 7:30 p.m., Room 102 Forum. Computation Center, "Graphics," (4 of 4), introductory programming background suggested, 7:30 p.m., Room 110 Osmond.

Friday, Jan. 27

Physical Chemistry, William G. Haseltine, chemistry, on "NMR of Liquids at High Pressure," 4 p.m., Room 333 Whitmore.

Monday, Jan. 30

Biochemistry and biophysics, Donald Wet-lauer, Delaware University, on "Protein Folding Pathways: Chemical Evidence and Biological Significance," 3:55 p.m., Room 101 Althouse.

Computation Center, "APL," (1 of 4), suggested for users of research accounts, 7:30 p.m., Room 102 Forum.

Tuesday, Jan. 31

Biology, Neil Brister, physiology program, on "The Cytochemical Bioassay of Corticotropin (ACTH)," 11:10 a.m., Room 111 Life Sciences.

Food Science, Jonathan Hoskin on "The Chemistry of Black Tea Flavor," 11:10 a.m., Room 201 Borland.

Computer Science/Computation Center, E. Guides, computer science, on "Research Problems in the Database/Operating System Interface," 1 p.m., Room 325 Whitmore. Water Pollution Control, Ernest Giovanitti, Industrial Wastes Division, DER, Harrisburg, on "Water Pollution Abatement in the Steel Industry," 2:20 p.m., Room 128 Sackett. Genetics, Raynaldo Villareal on "Slow Blasting in Rice: A Thesis Proposal," 3:55 p.m., Room S2 Fear.

Plant Pathology, Dave Beyer on "Phenoloxides and Their Role in Plant Disease Resistance — Peroxidases," 3:55 p.m., Room 213 Buckhout. Nuclear Engineering, Harold Denton, Nuclear Regulatory Commission, on "Regulation Processes and the Steps NRC Is Taking to Speed Up This Process," 4 p.m., Room 225 EE West.

Wednesday, Feb. 1

Computation Center, "APL," (2 of 4), suggested for users of research accounts, 7:30 p.m., Room 102 Forum.

Thursday, Feb. 2

Chemistry, F. M. Richards, Yale University, on "Various Views of the Structure of Proteins,"

12:45 p.m., Room 333 Whitmore. Physics, Raymond Dingle, Bell Labs, Murray Hill, on "Physics of Monolayer Man-Made Crystals," 3:50 p.m., Room 117 Osmond. Agronomy, Robert Mathewson on "Applications of Remote Sensing to Agriculture," 3:55 p.m., Room 111 Tyson. Meteorology, William W. Dovic on "Classification and Prediction of Snow Storm Severity," 3:55 p.m., Room 112 Walker.

Friday, Feb. 3

Physical Chemistry, Clarence I. Hisatsune, Chemistry, on "Some Unsolved Problems in the Chemistry of CO₂," 4 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: PSU art education graduate students, mixed media, opens Jan. 30.

Frost Entomological Museum: Architecture of Insects and Related Arthropods.

Kern Commons Gallery: Central Pa. Scholastic Art, through Jan. 28; Harley Straus, photographs, "Rules, Roles, Rituals: II," and Glenn Ziemke, glass, both open Jan. 28.

Museum of Art: "The First Five Years," anniversary show of selections from the permanent collection.

Pattee: Ukrainian children's toys and books, Room 324 Pattee Library, through Jan. 31.

Zoller Gallery: student paintings, through Feb. 1; Photo Invitational, opens Feb. 4.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

News in brief

(Continued from page 1)

Eco-Action centers receiving materials

Eco-Action is operating two recycling centers, one in Parking Lot 83 behind the University's flower gardens and the other at the Boalsburg Fire Hall. The centers will be open Saturday, Feb. 4, from 10 a.m. to 3 p.m. and again on Feb. 18.

The centers will accept newspapers which have been tightly bundled or packed in brown bags. Glass, aluminum and tin cans will also be recycled. Labels may be left on the glass — which can be brown, clear or green — but metal rings should be removed and bottles rinsed. Only all-aluminum cans should be brought in. Bimetal cans are not accepted — bimetals are usually soda or beer cans and have dull bottoms and seams.

Eco-Action asks that lids be removed from tin cans, and the cans flattened. (The lids should also be brought in.)

the tall blond man with one black shoe

PG

The French Department is sponsoring two showings of *The Tall Blond Man with One Black Shoe* at 7 and 9 p.m. on Jan. 28 and 30. Accordingly, the film chronicles the unwitting involvement of its hero in the machinations of two opposing factions within the French secret service. Showings are in 112 Kern.

Symphony concert Jan. 28

The Penn State Symphony Orchestra, under the direction of Dr. D. Douglas Miller, associate professor of music, will present a program featuring student soloists and conductors at 8:30 p.m. Saturday, Jan. 28, in Eisenhower Auditorium.

Included in the program are *Night on Bald Mountain* by Moussorgsky, the first movement of *Bert's Flute Concerto*, *Aprile un Poqueglucchi from The Marriage of Figaro* by Mozart, *De Misi Bolenti Spirito from La Traviata* by Verdi, the first movement of the Cello Concerto by Dvorak, *Roméo and Juliet* by Tchaikovsky, and Piano Concerto by Khachaturian.

Campus maps available

Individuals needing supplies of campus maps can obtain them by calling the Office of Campus Relations, 865-2501. In the past, those who needed more than 100 maps were sent to Publications.

Other items available from this office are Fact Cards, Walking Tour Maps, Travel to/from Penn State brochures, Faces of Penn State, and Speakers Bureau brochures.

Hershey sets up new division

A division of maternal-fetal medicine has been established in the Department of Obstetrics and Gynecology at Hershey. It

Elsewhere in Academe

Public confidence in higher ed grows

Public confidence in higher education has increased substantially during the past year, according to a Louis Harris and Associates survey. Forty-one percent of those polled expressed "a great deal of confidence" in the people in charge of higher education. The figure was 31 percent in 1976; ten years earlier, however, in 1966, it was 61 percent.

Women students increase

Fall enrollment statistics show 4.7 percent more full-time women students in colleges and universities nationwide this year. The number of male students, however, decreased by 1 percent. Enrollment figures for part-time students showed 8.9 percent more women, compared to 3 percent more men. The statistics were compiled by the National Center for Education Statistics, which also reported that last year total enrollments at both graduate and undergraduate levels, grew by 366,541 students, 341,043 of whom were women. And the U.S. Census Bureau reports that last spring 13.2

percent of all 18- and 19-year old women had completed one year or more of college, as compared with 10.9 percent of the men in this age group.

Academic calendar survey

The most popular academic calendar in 1976-77 was an "early semester" system. Forty-eight percent of nearly 2,500 colleges and universities surveyed used this calendar, with first-semester classes held from mid-August until just before Christmas, and a second semester from mid-January to early May. The survey was made by Loyd C. Oleson of Doane College. The traditional semester calendar — with classes beginning in mid-September and commencement ceremonies in early June — was used by only 7 percent of the schools queried. Ten years ago, 83 percent of them operated under this system. The second most popular calendar, used by 24 percent of the institutions surveyed, was the quarter system, similar to Penn State's. Thirteen percent of the schools used a 4-1-4 system, with four-month fall and spring terms and a one-month winter term, usually in January. The least popular calendar was the trimester variety.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Feb. 2. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

WRITER, PUBLIC INFORMATION AND RELATIONS, University Park. Responsible for Head, Internal Communications, for covering a variety of writing assignments for Intercom. The Reporter, and Faces of Penn State, and also, in cooperation with the News Bureau, cover several Colleges of the University on a "beat" basis. Bachelor's degree or its equivalent in journalism or liberal arts, with two years of experience on newspapers or magazines in writing positions. Must have specialized knowledge of the communications media and how they function, with an ability to write well, fast and accurately. An interest in educational programs is desired.

ASSISTANT TO THE DIRECTOR, OPERATIONS AND BUSINESS-AIDS, CONTINUING EDUCATION, University Park. The position is responsible to the Director, Audio-Visual Services, for providing the following activities and others: development and

maintenance of forecasting, circulation, income, expenses, trend; budget planning and control; work measurement; methods improvement; physical facilities planning; organization planning; quality control; materials handling and packaging; forms control and design. Minimum qualifications include bachelor's degree or equivalent, with emphasis on administration, business or education, and two to three years of directly related experience in analysis of data and design of programs for operations and financial control.

In addition to the above vacancies, there are positions in certain work units which, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interests known now to the Employment Division for future consideration when such vacancies occur. These positions are:

Position	Area
Staff Nurses	Hershey
Licensed Practical Nurses	Hershey
Radiology Technicians	Hershey
Medical Technologists	Hershey
Assistant Food Supervisors	H&S
Residence Hall Coordinators	Student Affairs
Assistant Coordinators	Student Affairs
Nutrition Assistants	Ag Extension (various counties)
Psychiatric Assistants	Hershey

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

Auditorium. The program will include works by Wagner, Webern, Bach, Ravel and Brahms.

Benefits report

(Continued from page 1)
may be true especially for individuals who terminated from the University and were later reappointed, or for individuals who have been on fixed-term appointments. Anyone who feels that there is an error in his or her case may verify the appointment date by contacting the Employee Benefits Division. The University payroll records contain very accurate information regarding earnings and length of service for retirement purposes, even though this source may not always reflect dates of original appointment.

Questions about the statements should be referred to the Employee Benefits Division, Room 133 Willard Bldg. (865-1473).

The statements have been prepared for the University by BENEFACETS, Inc., of Baltimore, Md.

It is planned that statements similar to these will be issued again in future years provided funding permits.

WPSX Highlights

Four series premieres are scheduled on WPSX-TV, Monday, Jan. 30, beginning at 8 p.m. with *Turnabout*, which focuses on issues of particular concern to women.

The topic for the first program is "Juggling" — dealing with careers and families. Among those appearing on the program is Beverly Sills. At 9 p.m. a new nine-week series, *Royal Heritage*, uncovers the art treasures of the British monarchy. Immediately following at 10 p.m., another new art series premieres, *The Originals: Women in Art* begins with a look at 19th century American impressionist Mary Cassatt of Philadelphia. At 10:30 p.m., *Anyone for Tennyson?* returns for its third season with selections from the light verse of Ogden Nash, Dorothy Parker, Phyllis McGinley, and Yip Harburg. Jack Lemmon guest stars.

Tuesday, Jan. 31, at 7:30 p.m., *Talkabout* continues its examination of rape in Central Pennsylvania with a discussion on prevention and prosecution. Appearing on the program are Darlene May, crime prevention specialist for the State College police department; Mary Jo Reeves, president of the Centre County Rape Crisis Center; and former Assistant District Attorney C. Kent Price of Centre County.

The New York City Ballet, under the direction of George Balanchine, is featured in a live performance of *Coppelia* on *Live From Lincoln Center*, Tuesday, Jan. 31, at 8 p.m. Patricia McBride dances the title role.

By 2177, more people will live in space than on earth, according to scientists appearing on "The Final Frontier," a Novu documentary to be seen Wednesday, Feb. 1, at 8 p.m. Space colonization and the promise of untapped sources of energy and raw materials are considered in light of NASA's successful space shuttle testing this summer.

On Thursday, Feb. 2, at 9 p.m., veteran news correspondent Daniel Schorr hosts the premiere program of *World*, a new biweekly series on international affairs. Mr. Schorr will introduce viewers to international news gathering, comparing reports of a given event as it is covered in different countries.

Great Decisions, a new eight-part series on America's foreign affairs, begins Thursday, Feb. 2, at 10:30 p.m. Each week, government, academic, and business leaders consider a major platform of the Carter Administration's foreign policy, beginning with human rights abroad. Produced in conjunction with the Foreign Policy Association and the Rochester Association for the United Nations, *Great Decisions* is being broadcast as part of a community service project of Penn State's College of the Liberal Arts.

Funding Sources

For further information, call 865-1372.

(901-2) The National Science Foundation has announced a program of extramural research interest for its Division of Policy Research and Analysis (IPRA). Proposals are encouraged in four areas: socioeconomic effects of science and technology; innovation processes and their management; environmental resources; and technology assessment. A letter of interest, a preliminary proposal, and finally a formal proposal are required for application. Quarterly deadlines are established for formal proposals. The next two are March 1 and June 1. (Ref. NSF-77-77-29)

(901-2) The NSF Research in Science Education Program has a March 17 deadline. Proposals in the natural and social sciences and mathematics and engineering are solicited. Eligible topics include research evaluation and synthesis in early adolescent motivation and learning. About 20 projects will be funded. (Ref. NSF-78-55) (C&U 659)

(391-3) Study abroad programs (scholarships) at 10 English Universities in summer 1978 are offered by the Institute for International Education (212-863-8200). The application deadline is March 1. (Ref. IIE-77-79)

Penn State Intercom

A letter to all employees:

As cleanup of the most recent winter storm continues at the University, I want to express my personal appreciation to all employees for their dedication to duty during some most difficult times. It took a very special effort for many of you to get to work, sometimes on snow-covered roads, and all of us appreciate your willingness to do your part to keep the University in operation.

I am especially grateful — and I am certain that our students are also — to those of you in essential services who responded so effectively during the storm. Without your excellent cooperation, it would not have been possible to provide the many services required by our faculty, staff and students.

Last but not least, I would like to add a special note of thanks to those of you who worked extra hours to stay ahead of the snow. The work still goes on, and you continue to do your share to make life safer and easier for the rest of us.

Your contributions to Penn State are recognized and appreciated.

Sincerely,

John W. Oswald
John W. Oswald
President

Conservation guidelines listed

President Oswald's memo of Jan. 23 on the electrical emergency caused by the continuing coal strike called for everyone to work toward the elimination of non-essential uses of electricity.

The following guidelines previously approved by the Executive Energy Conservation Committee are listed to assist in the conservation of electrical power. In addition to the specific items listed, any action which conserves energy in general will indirectly reduce the electrical consumption.

A. All Areas

1. Insure that radiators, heating units, and ventilation registers are not obstructed by shelving, plants, furniture or other objects. On those heating units containing fans, turn the fan to the lowest speed.

2. Thermostats in occupied spaces should be set no higher than 68° unless an exception has been approved by the Executive Energy Conservation Committee. Storage or other unoccupied spaces should be set no higher than 55°. Turn back thermostats to 55° at the end of the work day and for weekends. Portable electric heaters are not permitted unless

installed by Maintenance and Operations (see "D" below).

3. Windows should be kept closed at all times. Shades and blinds should be closed overnight and weekends, except on ground floors.

4. All exterior doors, including those in garages and at loading docks, should be kept closed as much as possible. Office, laboratory, and shop doors should be kept closed to reduce loss of heat to corridors.

5. The use of domestic hot water should be curtailed as much as possible, especially if provided by an electric heater.

6. Insure that copy machines are completely turned off when not in use; the use of such machines should be reduced as much as possible.

7. All room lighting should be kept to a minimum and natural light should be used when possible in lieu of artificial light.

8. Curtail use of all elevators.

9. Consolidate activities; close and winterize areas or buildings not essential to current need.

10. Eliminate the use of non-research hot plates; consolidate use of coffee makers (use one large one rather than several individual ones).

(Continued on page 2)

Senate committee to report on promotion, tenure

A University Faculty Senate committee studying promotion and tenure policies will present its tentative findings when the Senate meets at 1:10 p.m. on Tuesday, Feb. 7, in Room 112 Kern Bldg.

The report, which is preliminary, will be accompanied by a request for faculty input before a final legislative report is prepared later this year.

The Senate will also hear an oral information report from the Ad Hoc Committee to Review Baccalaureate Degree Requirements. That committee was convened a year ago to study BDR requirements at the University.

Although President Oswald told the Senate several months ago that he thought it was premature to consider fundamental changes in P-23, the two-year-old promotion and tenure policy, he added that several lesser questions deserved more immediate attention. Since then, a number of such questions have been identified by the Faculty Affairs Committee and Promotion Subcommittees on Rank and Tenure.

Those questions, and the committee's preliminary responses based on faculty input, are as follows:

(Q) What are the proper intervals for tenure reviews — one, three, five and six years or two, four and six years?

(R) Mandatory tenure reviews should be made in years two, four and six. Faculty members receiving an unsatisfactory review in the fourth year but not given notice of termination should, upon their request, receive a fifth year review also.

(Q) Should the justification for promotion be stronger if the time in rank is short (for example, less than five years as an assistant or associate professor)? Also, should tenure decisions be made and tenure granted prior to the sixth year in outstanding cases? Should promotion from assistant to associate professor before the end of six years be accompanied by tenure or should the two be considered separately, as is now the case?

(R) Promotion should be determined by ability and achievement rather than by the calendar. Rapid advance should take place only in cases of remarkable achievement, but no arbitrary time limits should hinder the progress of outstanding faculty.

Tenure decisions should be kept separate from promotion decisions. Credit toward tenure for previous service at another university should be granted only after careful consideration and should ordinarily not exceed three years.

Provision should be made, however, for hiring with tenure an outstanding scholar who is already a tenured full professor at another university.

(Q) What policy should be followed in the written notification of a negative sixth year tenure decision? (The current policy is to give no written explanation for legal reasons.)

(R) A faculty member should be given written explanation of a negative tenure decision.

(Q) What should be the policy of higher level review committees when they

(Continued on page 2)

News in Brief

Four Diamonds fund raiser

A fund raising dinner for leukemic children will be held for Penn State faculty and staff at 7:30 p.m. on Thursday, Feb. 9, at the Elks Country Club in Boalsburg.

A nationally known sports figure will be the guest speaker for the evening. Tickets are \$20 per person, and the menu will feature London broil.

Proceeds from the dinner will go to the Four Diamonds Fund, which helps defray medical expenses for families who have children stricken with leukemia. The funds go to the Hershey Medical Center.

Campus positions open

Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses, reminds faculty that the following positions are available within the University.

Associate Dean of Academic Instruction for Commonwealth Campuses: The advisory search committee will identify qualified candidates from within the University. Nominations and applications should be forwarded to Dr. Michael Cardamone, Room 111 Old Main, by Feb. 21.

Commonwealth Campus Director at the DuBois and Schuylkill Campuses: Nominations and applications should be sent to Dr. Robert Quinn, Room 111 Old Main, by Feb. 21.

Associate Director for Academic Affairs at the Altoona, New Kensington and Wilkes-Barre Campuses. Nominations and applications should be forwarded to the respective Campus director by Feb. 21. Two copies of a resume should accompany letters of application.

Photograph by Jerry Uelsmann from Zoller Gallery exhibit opening Saturday.

Penn Staters

Chalmers G. Norris, director of planning and budget officer at the University, has been named executive coordinator of the Council for Postsecondary Education for the State of Washington.

He has resigned from his position at the University, effective May 1.

"We at Penn State are deeply grateful to Gail Norris for his 10 years of loyal and productive service, President John W. Oswald said. "He will be sorely missed by all of his friends, but especially by those of us who, through the years, have relied on him for guidance in planning and budgeting."

"I wish him much success, both personally and professionally, with his new, most challenging position."

As executive coordinator, Mr. Norris will have responsibility for staff direction and program administration of the Council, which was established by the State of Washington in 1969 "to facilitate planning, articulation, and coordination among the parts of a complex system of post-secondary education."

Appointed as planning liaison officer at Penn State in 1968, Mr. Norris was named to his present position in 1970. He has had responsibility for conducting analyses and making recommendations on program proposals, and for recommending major fund transfers during the fiscal year. He also has had responsibility for the preparation of five-year plans and subsequent budget requests.

From 1963 until 1968, Mr. Norris served with the U.S. Office of Education, holding positions as director of the Division of College Facilities, chief of the College Facilities Grants Branch, and as special assistant to the Deputy Commissioner.

A native of Muncy, Pa., he is a 1957 graduate of Shippensburg State College with a B.S. in education. His M.A. in government was conferred by George Washington University.

Leon Gorlow, professor of psychology, is marking his 25th year with the University.

After receiving his A.B. degree from the City College of New York, he studied at Columbia University, where he earned both the A.M. and Ph.D. degrees in psychology.

Dr. Gorlow taught at Syracuse University and served as a clinical psychologist for the U.S. Veterans Administration before 1952, when he was appointed an assistant professor at the University. In 1954 he became an associate professor, and in 1968 he was appointed professor of psychology.

In 1962 Dr. Gorlow accepted a Fulbright Visiting Professorship in Finland where he lectured in the field of personality theory at the School of Social Studies at Tampere and at the University of Helsinki.

He has published on a wide variety of subjects in clinical psychology and is the co-author of a book, *The Psychology of Adjustment*. In addition to acting as a consultant to Laurelton State School, Centre County Counseling Service, and the Pennsylvania Association of Retarded Children, Dr. Gorlow has served as a visiting scientist for the National Science Foundation and the American Psychological Association.

Dr. Martin Quinn, assistant professor of English at Beaver Campus, has been invited to speak at the University of Shiraz in Iran on the subject, "William Archer and Henrik Ibsen." Dr. Quinn is currently a Fulbright Professor at the University of Teheran, also in Iran. Archer, drama critic, playwright, and first English translator of Ibsen, is the subject of Dr. Quinn's research, which has been partly supported by the Institute for the Arts and Humanistic Studies.

The name of **Dr. Harlan Hoffa**, professor of art education and head of the Division of Art and Music Education, was

inadvertently omitted from the list of leaves of absence published Jan. 18. Dr. Hoffa will use his sabbatical to study the ways in which various social institutions intervene between artists and their public.

Obituary

Dr. Carroll D. Champlin, 91, who retired in 1953 as professor emeritus of education, died Jan. 23.

Dr. Champlin was graduated in 1906 from Bloomsburg State College, where he was honored in 1951 as a Distinguished Alumnus. He received B.A. and M.A. degrees from Haverford College and a Ph.D. from the University of Pittsburgh. In 1919, he was appointed an instructor at the University of Pittsburgh, and two years later was named professor of education at California State College. He joined Penn State in 1926.

In 1932, Dr. Champlin went to the University of Puerto Rico for a year as an exchange professor, and he returned there in 1954 after his retirement for an 18-month appointment. He taught also at the University of Hawaii. He was a visiting professor in 1950-51 at the University of Utah. He had served on the faculty of various institutions for summer programs, among them, the University of Pennsylvania, George Washington University, Cornell University, East Stroudsburg State College, Haverford College, Syracuse University, and San Jose College.

Guidelines

(Continued from page 1)

1. Turn off lighting of displays, display cabinets, murals, etc. if not part of an instructional museum or gallery. Consider the restriction of hours of public access to museums, etc.

B. Laboratories, Shops, Kitchens, etc.

1. Consolidate where possible storage in refrigerators, deep freezers, and growth chambers.

2. Insure that autoclaves and sterilizers always contain a full load when operating. Use steam units in lieu of electric units where possible.

3. Insure that food hoods and ovens are operating only when required. Avoid use of hoods for storage.

4. Curtail the use of process steam and compressed air, whether locally generated or from the campus systems, to the maximum possible extent.

5. Monitor the use of tap water for equipment cooling and reduce use to maximum extent possible; be alert to the improper functioning of automatic valves.

6. Curtail the use of distilled water where possible.

7. Curtail the use of machinery to the maximum possible extent.

8. Insure that exhaust fans operate only when absolutely necessary.

C. Athletic Areas and Gyms

1. Insure that all lighting is off immediately after use, even where automatic timers are installed.

D. Repairs

1. Insure that the individual responsible for the area is made aware of malfunctioning equipment, fixtures, controls, valves, switches, timers, thermostats, etc.; that individual should promptly call Maintenance and Operations at 865-4731.

The modification of their energy use habits by faculty, staff, and students is fundamental to the success of this emergency plan, and their assistance is required to emphasize the need in each area to reduce electrical consumption.

A telephone "hot line" has been installed at University Park (863-1517) to answer questions and provide individual advice on how reduction goals can be met.

Policy analysis proposals requested

A request for proposals for policy analysis research in environmental-energy related topics has been issued by Dr. Richard G. Cunningham, vice president for research and graduate studies.

Preliminary proposals based on the document, "Policy Analysis for the Commonwealth: Social and Behavioral Science Perspectives on Energy, Environmental, and Resource Issues," should be submitted to Dr. Cunningham prior to March 15. Copies of the document have been distributed through the Administrative Committee on Research and may be obtained from the deans for research, intercollege directors, or the vice president for research and graduate studies, Room 207 Old Main.

An oversight panel chaired by Dr. Cunningham will sift the preliminary proposals and will issue invitations before April 1 for formal proposals. The awards, which will be announced June 1, will be made from the two-year Ford Foundation block grant administered by the Center for Study of Environmental Policy.

Dr. Terry A. Ferrar, director of the center, notes that topics in energy, land use and waste disposal, air quality and water management, and the public's role in energy/environmental policy are appropriate. Questions such as how the conflicting objectives of cleaner air and increased coal production can be reconciled or what administrative structures are necessary for the formulation and implementation of State policies in that area are typical of the kinds of research to be supported. Policies relating to sewage sludge disposal and what mechanisms are best for obtaining public input for siting of such disposal sites are other examples.

Additional Pennsylvania-related research topics of high priority are: (a) regulatory procedures or incentives that

might increase water conservation practices and their subsequent impact on water revenues, (b) governmental barriers to the operation of a waste oil recycling program, plus location and ownership of recycling centers, (c) renovation of abandoned hydroelectric facilities and the impact of facility interconnects on power grids, and (d) social science issues raised by adoption of residential solar energy devices.

Grant of up to \$10,000 for single investigator projects, and grants of up to \$25,000 for interdisciplinary projects, which are encouraged, will be awarded.

In addition to application of the usual proposal criteria (a clearly stated plan, appropriate methodology and staffing, etc.), the oversight panel will consider: (a) the likelihood that project results will prove useful to State policy officials, (b) potential for establishing continuing relationships between faculty and Commonwealth officials, and (c) scholarly merit and potential for publication.

Oversight panel members include Deans Eugene J. Kelley and Stanley F. Paulson; Dr. Donald Ford; and Pennsylvania government officials William Haral, William Middendorf and Edward Seladone. Mr. Haral is executive director of the Governor's Energy Council, and Mr. Middendorf and Mr. Seladone are deputy secretaries of the State's Department of Environmental Resources.

Preliminary proposals are to consist of not more than two double spaced, typed pages describing objectives, research plan, approximate cost and anticipated results. The investigator's vita is to be attached as an appendix. Ten copies are required.

Before writing these proposals, faculty are encouraged to contact State officials; Dr. Ferrar will assist them.

Senate

(Continued from page 1)

disagree with a lower level committee (for example, when the College committee disagrees with the department or campus committee)?

(R) Disagreements should be discussed in conference among representatives of each committee before a final recommendation is made to the next level.

The only proposal concerning promotion and tenure to be presented for legislative action at this meeting will be a recommendation for a change of wording in Section 12 of PS-23, as it now appears in the University Policy Manual.

That section currently states that a tenured faculty member may be dismissed for adequate cause. The Committee on Faculty Affairs will recommend that a sentence be added stating that tenure-eligible faculty may also be dismissed, without adherence to current guidelines for non-reappointment notice, when adequate cause exists.

In both cases, adequate cause is determined on the basis of four criteria: lack of competence, excessive absenteeism, moral turpitude, or grave misconduct.

The Senate Committee on Student Affairs, Awards, and Scholarships will present an informational report on the types, sources, and administration of student aid.

The committee will commend the Office of Student Aid for its efficiency, but will express concern about the limited amount of institutional aid now available to students.

According to the committee's report, full-time undergraduate Pennsylvania residents paid \$421 for the current term's tuition at University Park and \$378 at the Commonwealth Campuses. Room and

board charges in the residence halls would have added \$503 to the term bill.

However, in 1952-53, according to the report, the University charged all students a general fee of \$50 per semester, plus an incidental fee of \$60. The charge for sharing a double room was \$100, while \$220 would have covered a semester's board in the dining halls.

On an academic year basis, the committee will point out, a Pennsylvania resident enrolled as an undergraduate student would have paid \$860 in 1952-53. A 1977-78 counterpart can expect to pay \$2,772, which does not take into account spring tuition hike.

The Senate will also hear an informational report from the Senate Elections Commission. The commission will report that the annual Faculty Census is now being conducted.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Feb. 2 — 12

Special Events

Thursday, Feb. 2

Afro-American Studies Forum, Edmond Keller, political science, Indiana University, on "The Impact of Black Mayors on Urban Policy," 7:30 p.m., Room 101 Kern.
Sports: men's and women's bowling, ACU Region 1 Tournament; men's basketball, v.s. Marquette, 7:30 p.m., Rec. Bldg.
HPER colloquium, Kenny Moore, *Sports Illustrated* journalist, Olympic Marathoner, on "Sports and Politics," 7:30 p.m., Room 123 Chambers.
University Readers, dramatized reading of William Tenn stories, (rescheduled because of weather), 7:30 p.m., HUB assembly hall.

Friday, Feb. 3

Sports: men's and women's bowling, ACU Region 1 Tournament.
Faculty Club reception for prospective members, 4-7 p.m., Faculty Club.
Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.
Artists Series, Pittsburgh Symphony Orchestra and the University Chorus, Mahler's Symphony No. 2 in C minor, 8:30 p.m., Eisenhower Auditorium.
Careers in Music, panel discussion by members of the Pittsburgh Symphony, 2:15 p.m., Room 115 Music Bldg.

Saturday, Feb. 4

Shaver's Creek Nature Center, cross-country ski workshop for beginners, by registration only—865-1851, 9 a.m.-noon; Winter Stars, 8 p.m., Stone Valley.
Sports: men's and women's bowling, ACU Region 1 Tournament; women's fencing, v.s. J. Madison and Cornell, 9 a.m.; White; coed rifle, v.s. Navy, 10 a.m.; White; men's fencing, v.s. Cornell, 1 p.m.; Rec. Bldg.; men's volleyball, v.s. Nyack (ECVL game), 1 p.m.; Rec. Bldg.; women's basketball, v.s. Shipensburg, 2 p.m.; White; men's swimming, v.s. Temple, 2 p.m.; Natatorium; wrestling, v.s. Navy, 2 p.m.; Rec. Bldg.; gymnastics, v.s. So. Connecticut, 7:30 p.m.; Rec. Bldg.; hockey, v.s. Delaware, 7:30 p.m.
Eco-Action, Recycling, 10 a.m.-3 p.m., Parking Lot 83 (behind flower gardens) and Boalsburg Fire Hall.
Student Film Organization, Sci Fi Film Festival, *The Day the Earth Stood Still*, 7:30 and 9:30 p.m., Room 102 Forum.
Artists Series, Pittsburgh Symphony Orchestra and the University Chorus, Mahler's Symphony No. 2 in C minor, 8:30 p.m., Eisenhower Auditorium.
Pittsburgh Symphony Orchestra, Young Peoples Concerts, 10 a.m. and 11 a.m., Eisenhower Auditorium.
Sunday, Feb. 5
University Chapel service, Mary Marks, Pittsburgh Theological Seminary, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Snow and Ice, 2 p.m., Stone Valley.

Susan Eisehold, Dan Joffe, and Carol Mattis, oboe, 3:30 p.m., Music Bldg. recital hall.
france-cinema, Renoir, *Little Theatre of Jean Renoir*, 7 and 9 p.m., Room 112 Kern.
Sports: hockey, v.s. Upsala, 2:30 p.m.

Monday, Feb. 6

Commonsplace videotape, "Human Rights Abroad: Reality or Illusion for U.S. Foreign Policy?" noon, Kern Commons.
Shakespeare film, *A Midsummer Night's Dream* (Rigg/Hall), 6:30 p.m., Room 101 Chambers.
france-cinema, Renoir, *Little Theatre of Jean Renoir*, 7 and 9 p.m., Room 112 Kern.
Sports: women's basketball, v.s. East Stroudsburg, 7 p.m., White.
Comp. Lit. film series, *The Light of Experience*, 8 p.m., Room 101 Kern. Free admission.
"An Evening of Music by Franz Schubert," with Philip Dettra, Robert Trehy and the Alard Quartet, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Feb. 7

Bloodmobile, HUB ballroom.
Fixed date for meetings involving Commonwealth Campus faculty.
Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Alegria Bendale, comparative literature, Schuylkill, on "Problems of the South."
University Faculty Senate meeting, 1:10 p.m., Room 112 Kern.
History colloquium, William J. Duker, history, on "In Search of Ho Chi Minh," 2:30 p.m., Room 101 Kern.
Shakespeare film, *A Midsummer Night's Dream* (Rigg/Hall), 6:30 p.m., Room 101 Chambers.
Black Studies film, *Xala* by Senegal's Ousmane Sembene, 7 p.m., Robeson Cultural Center (Walnut).
English colloquium, Howard Moss, poetry editor, *The New Yorker*, on "Work in Progress," 8 p.m., Room 101 Kern.
IAHS/French Department, Theatre du Double, Diderot, *Le Supplément au voyage de Bougainville*, 8:30 p.m., Eisenhower Auditorium.

Wednesday, Feb. 8

Last drop deadline.
Last day for signing winter term NDSL and University Long Term Loans, Room 108 Shields.
Bloodmobile, HUB ballroom.
Commonsplace Theatre, *Key Largo*, 7:30 and 9:30 p.m., Room 112 Kern.
ERM Club lecture, Earl Mallick, vice president, U.S. Steel, on "The U.S. Steel Corporation and the Environment," 7:30 p.m., Room 301 Ag. Admin. Bldg.
Sports: men's basketball, v.s. Temple, 7:30 p.m.; Rec. Bldg.; men's swimming, v.s. Bucknell, 7:30 p.m.; Natatorium.
Artists Series Film Festival, American Film Theatre, Eugene O'Neill, *The Iceman Cometh*, 8 p.m., Eisenhower Auditorium.
University Theatre, student preview, *Thieves' Carnival*, 8 p.m., The Playhouse.
Artists Series, *La Chambre du Roy*, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 9

Faculty Women's Club lecture, Polly Eddy on "Is There Still a Job for the Volunteer?" 1:15 p.m., Memorial Lounge, Eisenhower Chapel.

Sigma Xi meeting, 1:30 p.m., Room 101A Kern.
Comp. Lit. film series, *Paisan*, Italian with English subtitles, 7 and 9 p.m., Room 112 Kern.
University Theatre, Jean Anouilh, *Thieves' Carnival*, 8 p.m., The Playhouse.

Friday, Feb. 10

World Future Society lecture, Jerry H. Reyburn, forestry resources extension, on "The Delphi Technique," 4 p.m., Room E-34 Pattee.
University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.
Penn State Brass Choral, 8:30 p.m., Music Bldg. recital hall.
Saturday, Feb. 11
Sports: coed rifle, v.s. Army and Lehigh, 10 a.m.; White; men's volleyball, v.s. Cornell, (ECVL game), 1 p.m.; Rec. Bldg.; women's basketball, v.s. Ursinus, 2 p.m.; White.
Shaver's Creek Nature Center, Nature Stories for Children, 1-3 p.m., Stone Valley.
New German Cinema, Werner Herzog, *Aguirre, the Wrath of God*, 7 and 9 p.m., Room 112 Kern.
University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Sunday, Feb. 12

University Chapel service, The Rev. Ernest Hawk, PSU, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Insects in Winter, 2 p.m., Stone Valley.
PSU Percussion Ensemble, 3:30 p.m., Music Bldg. recital hall.
New German Cinema, *Aguirre, the Wrath of God*, 7 and 9 p.m., Room 112 Kern.
Student Film Organization, Sci Fi Film Festival, *The Time Machine*, 7:30 and 9:30 p.m., Room 102 Forum.

Seminars

Thursday, Feb. 2

Philosophy (rescheduled). John Anderson on "Why Categories?" 4 p.m., Room 69 Willard.

Friday, Feb. 3

Remote Sensing, David P. Gold, geology, on "Structural Geology and Remote Sensing," 11 a.m., Room 173 Willard.

Monday, Feb. 6

Biochemistry and Biophysics, Paul Wrede, MIT, on "Structure and Function of 5S and 5.8S Ribosomal RNA," 3:55 p.m., Room 101 Althouse.

Computation Center, "ALP" (3 of 4), suggested for users of research accounts, 7:30 p.m., Room 102 Forum.

Tuesday, Feb. 7

Biology, F.M. Williams, biology, on "Dynamical Analysis of Microbial Populations," 11:10 a.m., Room 111 Life Sciences.

Food Science, Gordon Duke on "Theories of Taste and Odor Perception," 11:10 a.m., Room 201 Borland.

Computer Science/Computation Center, M.J. Irwin, computer science, on "Improving the Speed and Accuracy of Arithmetic in Micro-computer Systems," 1 p.m., Room 325 Whitmore.

Water Pollution Control, Donald Tennant, West Penn Power Co., on "Water Pollution Abatement in the Power Industry," 2:20 p.m., Room 128 Sackett.

Genetics, Robert Eckhardt, anthropology, on "Inbreeding Coefficients in American Primate Colonies," 3:55 p.m., Room 52 Freat.
Plant Pathology, Mike Seibert on "Phenolic Compounds as Phytoalexins and Preformed Substances — Hydroxyphenols and Protocatechuic Acid," 3:55 p.m., Room 213 Buckhout.
Nuclear Engineering, William Higginbotham, Oak Ridge National Laboratory, on "Weapons Proliferation and Safeguards," 4 p.m., Room 225 EE West.

Wednesday, Feb. 8

Fuel Science, Eugene H. Shull, fuel science, on "Holography Applications for the Study of Material Behavior Combustion Problems," 4 p.m., Room 301 Mineral Industries.

Thursday, Feb. 9

Ceramic Science, Tom Facey on "Investigation of the Si-B Layer Formed during Solid Source Doping of Semiconductor Silicon," 11 a.m., Room 301 Mineral Industries.
Chemistry, Malcolm H. Chisholm, Princeton University, on "Some Aspects of the Chemistry Surrounding Compounds Containing Triple Bonds Between Molybdenum and Tungsten Compounds," 12:45 p.m., Room 333 Whitmore.

Physics, W. S. Benedict, University of Maryland, on "Spectroscopy of Planetary Atmospheres," 3:50 p.m., Room 117 Osmond.
Agronomy, William Templeton, USDA Pasture Laboratory, on "Exploitation of Legumes in Livestock Production," 3:55 p.m., Room 111 Tyson.

Ecology, Samuel C. Mozley, North Carolina State University, on "Benthic Ecology of Thaw Ponds and Lakes in the Alaskan Arctic," 4 p.m., Room 101 Althouse.

Philosophy, Carl R. Hausman, philosophy, on "Value and the Perceivable Categories," 4 p.m., Room 101 Kern.

Computation Center, "APL" (4 of 4), suggested for users of research accounts, 7:30 p.m., Room 102 Forum.
Microbiology and Cell Biology, Daniel Vapnek, University of Georgia, on "Molecular Studies on Antibiotic Resistance Plasmids in *E. coli*," 4 p.m., Room 52 Freat.
Computer Science, Janos Simon (UNICMP) "Random Numbers, Probabilistic Computations, and Models of Helping," 4 p.m., Room 325 Whitmore.

Exhibits

Anthropology Museum: open Tuesday, 9 a.m.-noon; Wednesday and Thursday, noon-5 p.m. Central American Pre-Columbian and Ethiopian artifacts.

Chambers Gallery: mixed media by art education graduate students.

Kern Commons Gallery: Harley Straus, photographs, "Rules, Roles, Rituals: IL," and Glen Ziemke, glass, both through Feb. 11.

Museum of Art: "The First Five Years," anniversary show of selections from the permanent collection.

Zoller Gallery: Major Contemporary Photographers, opens Feb. 4.

Faculty who will be representing "An Evening of Music by Franz Schubert" at 8:30 p.m. Monday, Feb. 6, in the recital hall are, from left, Robert Trehy, baritone; Philip Dettra, pianist; and the Alard String Quartet: Joanne Zagst, Donald Hopkins, Leonard Feldman and Raymond Page.

Arts Roundup

Musical and theatrical troupes to appear

La Grande Ecurie et La Chambre du Roy, a music group, and the Theatre du Double, a theatrical troupe, will present programs of 18th century French music and theatre at the University next week.

The theatrical presentation, *Le Supplément au Voyage de Bougainville* by Diderot, will take place Tuesday, Feb. 7, in Eisenhower Auditorium. Both programs begin at 8:30 p.m.

The musical program, featuring works of Rameau, Marin-Marais, Charpentier and Boismortier, will be performed Wednesday, Feb. 8, in the Music Bldg. recital hall.

Patrick Guinand of the Theatre du Double will direct his company in *Le Supplément au Voyage de Bougainville* by the philosopher, critic and encyclopedist Diderot.

The play, which will be performed in French, is a dramatization of Diderot's pamphlet, written in response to the journal of Louis Bougainville, who recorded his voyage to the Pacific in the mid 18th century. It is set in Tahiti and is constructed as a series of conversations that pit the natural virtues and happiness of the primitive life against the misery engendered by civilization.

The scenic design of the production has received considerable attention from European theatre critics. The principal set piece is a large tilted mirror that reflects a brightly patterned carpet, producing on the stage an illusion of a lush tropical setting.

Jean-Claude Malgoire, an oboe virtuoso and expert on French baroque music, conducts the music group, which has been critically acclaimed for the authenticity of its sound. This quality is achieved by the use of replications of baroque instruments, researched and designed by M. Malgoire. Included in the instrumentation are baroque versions of the violin, cello, flute, oboe and harpsichord.

The two companies, which together form the French Association Theatre et Musique, will begin an American tour with their appearance at the University. They operate under the auspices of l'Association Française d'Action Artistique of the Government of the

M. Malgoire

French Republic, with patronage of the Cultural Services of the French Embassy in the United States.

Their appearance at Penn State is sponsored in part by the Institute for the Arts and Humanistic Studies, the Department of French and the research offices of the Colleges of the Liberal Arts and Arts and Architecture. The Chambre du Roy performance is part of the Wednesday Night Music Series, a joint offering of the Artist Series and the Department of Music.

Tickets for the Theatre du Double are on sale at the Eisenhower box office from 9 a.m. to 4 p.m.

La Chambre du Roy tickets will be on sale at the HUB Artist Series booth from 9 a.m. to 4 p.m. Feb. 7 and at the recital hall box office for one hour before the performance.

'Thieves Carnival' to open

Guest director Richard Edelman of New York will direct the up-coming University Theatre Production of Jean Anouilh's *Thieves' Carnival* playing in the Playhouse Theatre on Feb. 9-11 and 14-18 at 8 p.m.

Mr. Edelman originally came to Penn State in 1967 to develop the acting program. For seven years he directed the touring Arts Company of the Department of Theatre and Film, and for five years he was artistic director for the Summer Festival Theatre.

Thieves' Carnival is a farce about three barely competent pickpockets who invade the summer holiday of a rich, noble family. Confusion and comedy reign, and names and disguises abound.

Tickets and reservations are available at the Playhouse Theatre box office Monday through Saturday from 1 to 6 p.m. or by calling 865-1884.

New Yorker poet to talk

Howard Moss, poet and poetry editor of *The New Yorker*, will give a public reading of his own work at 8 p.m. on Tuesday, Feb. 7, in Room 101 Kern Bldg. The program will be a part of the English Colloquium.

Mr. Moss, whose visit to University Park is sponsored by the Institute for the Arts and Humanistic Studies, will also attend a coffee hour for faculty and students at 9:30 a.m. on Wednesday, Feb. 8, in the Department of English office. A National Book Award winner (1971 for *Selected Poems*), he has also written on Edward Lear and Marcel Proust.

Evening of Schubert Feb. 6

Members of the music faculty will present "An Evening of Music by Franz Schubert" at 8:30 p.m. Monday, Feb. 6, in the Music Bldg. recital hall.

The program, the third in a series commemorating the 150th anniversary of the composer's death, will feature Philip Dettra, pianist, Robert Trehy, banjo, and the Alard String Quartet.

Mr. Dettra will open the concert with "Moussa musicaux, Opus 94," a series of short pieces for piano. The Quartet will then perform String Quartet in A Minor, Opus 29. The final portion of the program will be given over to Mr. Trehy, who will perform five Schubert songs: "Die Forelle," "Nacht und Traume," "An die Leier," "Im Fruhling" and "An die Musik."

Staff Vacancies

All University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387).

Applications for these staff vacancies will be received until 5 p.m. Feb. 7.

DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

FLEET TRAINING SPECIALIST, CONTINUING EDUCATION, University Park. Outlets include planning, promoting and conducting workshops for motor fleet supervisors in the areas of personnel, training, safety, maintenance, security and general supervisory principles and practices. Travel (extensive) travel in the United States and Canada to host institutions to conduct these workshops. Research and develop related instructional materials. Coordinate and communicate with industry representatives in all aspects of these workshops. Direct and instruct workshops. Bachelor's degree or equivalent. Master's preferred. Must be an experienced supervisor with demonstrated capabilities. Must have a comprehensive understanding of the motor fleet industry. Must be an experienced instructor.

LEAD PROGRAMMER, MANAGEMENT ENGINEERING, University Park. Analyze and design computer logic development, test, document, and maintain programs; keep abreast of the state of the art techniques in system design and development. Bachelor's degree or equivalent in computer science or related field, plus three to four years of directly related experience in programming and system design. Proficiency in COBOL and/or PL/I on third generation computer equipment is desired.

MANAGER, ADMISSIONS DEPARTMENT, COLLEGE OF MEDICINE, Hershey. Responsible to the Associate Hospital Director/Director of Financial Affairs for carrying out the admissions and financial counseling policies of the hospital and for the supervision of the Admitting Office. A bachelor's degree in business or equivalency and two to three years of directly related experience are required.

WPSX Highlights

Masterpiece Theatre will present Leo Tolstoy's *Anna Karenina* on public television with a ten-episode dramatization, beginning Sunday, Feb. 5, at 9 p.m. Nicola Pagett and Eric Porter star.

How fit are most American women? Tennis player Billie Jean King talks about keeping fit, Monday, Feb. 6, at 8:30 p.m. on *Turnabout*. Marathon runner Joan Ulyot also appears on the program to offer tips for beginning joggers. Ms. Ulyot is the author of *Women's Running*.

Monday, Feb. 6, at 10 p.m., *The Originals: Women in Art* profiles sculptor Louise Nevelson, whose innovative environmental art is constructed of "found junk" which has been abandoned in the streets of New York. Ms. Nevelson's technique is dramatically demonstrated as she creates two sculptures on camera.

The dancing and music of the New Orleans Mardi Gras come to *In Performance at Wolf Trap* with "Fat Tuesday and All That Jazz," Tuesday, Feb. 7, at 8 p.m. The hour-long special includes West African dances, a traditional Mardi Gras parade, and an original jazz ballet with Haitian voodoo dancing and an old-style New Orleans funeral. Featured performers are the Arthur Hall Afro-American Dance Ensemble and the Dejan Olympia Brass Band from New Orleans' famed Preservation Hall.

Before World War II and their internment in detention camps, Japanese families in America shared a common dream — to earn enough money in the United States to enable them to return to a comfortable life in their homeland. The experiences of two Japanese families, eking out a living in California's Imperial Valley during the Depression, are the focus of *And the Soul Shall Dance*, a new Hollywood Television Theatre drama to be seen Tuesday, Feb. 7, at 9:30 p.m. Members of the Los Angeles' East West Theater are featured.

'Sports and Politics' lecture

Kenny Moore, Sports Illustrated journalist, Olympic marathoner and member of the President's Commission on Olympic Sports, will present a public lecture on "Sports and Politics" at 7:30 p.m. this evening (Feb. 2) in Room 123 Chambers Bldg.

The lecture is part of the College of Health, Physical Education and Recreation Colloquium Series and is co-sponsored by the Department of Journalism.

Funding Sources

For further information, call 865-1372

(302-1) The National Science Foundation has released information and instructions for researchers who wish to apply for research equipment during FY 1973. Important Notice No. 69 details information about eligibility and proposal preparation, proposal review equipment management, and special NSF requirements involving equipment. There is no application deadline.

(302-2) The new NSF Applied Science and Research Applications (ASRA) Directorate will replace the Directorate for Research Applications and the Research Applications Directorate. The new directorate is charged with strengthening links between applied research and basic research in the federal government, private industry, and educational institutions. High quality applied research proposals consistent with the 1966 Amendments to the NSF Act of 1950 will be funded. (Re: NSF Staff Memo OIO-78-2)

FELLOWSHIPS
For further information inquire at 320 Kern, 865-1372.
302-31 OE Vocational Ed Teacher Certificate Fellowships — new date Feb. 17 (202-245-9793).

302-41 OE Vocational Ed Graduate Leadership Development Awards (graduate study) (202-245-9793).

302-51 American Sociological Association — doctoral fellowships — Feb. 28 (202-433-5410).

302-61 Law Enforcement Assistance Administration — graduate research fellowships (202-376-5560).

Renoir film Feb. 5-6

france-cinema has scheduled *The Little Theatre of Jean Renoir* at 7 and 9 p.m. on Sunday and Monday, Feb. 5 and 6, in Room 112 Kern Bldg. The film is comprised of three vignettes on the theme of obsession. Domestic bric-a-brac, sumptuous dinners and the intricacies of a *menage a trois* are fondly captured by the vibrant color art of Renoir's master cinematographer, Georges Leclerc. The film is sponsored by the Department of French.

'XALA' screening Feb. 6

XALA (pronounced "Hala"), a feature-length film by Senegalese novelist and filmmaker Ousmane Sembene, will be shown at 7:30 p.m. on Monday, Feb. 6, in the Paul Robeson Cultural Center in Walnut Bldg.

Based on Sembene's novel of the same title, the film is an attack on capitalism and urban polygamy in contemporary West Africa. The word "XALA" means impotence.

The film was featured at the New York Film Festival in 1975 and New York Times reviewer Richard Eder described it as "cutting, radiant and hilarious." The film is in French with English subtitles.

Sponsors are the French Department, Comparative Literature Program, Black Studies Program, Paul Robeson Cultural Center, Institute for the Arts and Humanistic Studies, and Liberal Arts Undergraduate Studies Office.

Seven leading photographers to be exhibited at Zoller

"Photography: The Selected Image," an exhibition of the work of seven well known professional photographers, will have its national opening at the Zoller Gallery Saturday, Feb. 4, and will continue there through Feb. 22.

Included in the show, which is being funded by a grant from the National Endowment for the Arts, will be works by Harry Callahan, Laura Gilpin, Ray Kiskind, Arnold Newman, Aaron Siskind, Jerry Uelsmann and Garry Winograd.

The exhibition has been organized by Gerald Lang, associate professor of art at Penn State, and James Baker, instructor in art at Edinboro State College and a former student of Mr. Lang's.

Mr. Lang explains that the show has been designed to demonstrate the development of a photographic idea from initial concept to final exhibition, and that the seven artists selected for inclusion were chosen because of the diversity of their individual approaches to the medium.

Zoller's hours for the exhibition are 8 a.m.-5 p.m. weekdays and noon-5 p.m. weekends.

Penn State Intercom

President gives planning highest priority

Planning, both short-term and long-term, is his highest priority, President John W. Oswald said at a Feb. 1 press conference. "Consider the revision of the Academic Policy Plan the most important single thing the Trustees have directed me to do in some time," the President said. A revised plan is scheduled to be presented to the Board in October 1979.

"An emphasis in the next plan," according to Dr. Oswald, "will not be on numbers — other than to what extent they will stay level and to what extent they will drop — but on the mix of these numbers."

"Even more important, we must find ways to maintain the quality of our offerings so that we can continue as a major research university, as well as a teaching institution. To put it another way: How can we maintain balanced offerings at a somewhat lesser level of size and fiscal expenditure with accessibility to those we serve?"

Penn State's first Academic Policy Plan was formulated in 1972.

"When I came here in 1970," the President recalled, "Penn State was at the tag end of about as rapid a period of growth as an institution could absorb. It was clear that much of this growth — and I'm not being critical — had been ad hoc in nature, in the sense that there had been Campuses established here and there, a medical center had been set up, and graduate and undergraduate enrollment had increased greatly at University Park, without all of these pieces necessarily fitting together."

"Accordingly, a deliberate effort was made to define not only the mission of the University but also its magnitude in the 1972 plan."

At this stage in the revisions of the policy plan, an effort is being made to keep planning unstructured, Dr. Oswald emphasized.

"Rather than appoint immediately a commission of students, faculty and administrators," he said, "we want to try during the next two or three months to get as many ideas as possible into the process, whether they are popular or unpopular, far out or highly traditional. How do individuals who are part of this University see it going in terms of relationships with our Campuses, relationships with Hershey, future problems with research, with tenure, with tuition and other such issues?"

"We are asking people to write white papers about where they feel the University is headed, what are the areas, given some hard choices we'll have to make, that may have to be eliminated or vastly reduced. I hope that in the next three to four months, as a result of these papers, some rather fundamental questions will come out before the entire University community, and I suspect that there will be a lot of discussion about them."

Turning to the months he has spent trying to resolve Penn State's crucial fiscal problems, Dr. Oswald noted that he was not very optimistic about the appropriation recommendation which

will be contained in the Governor's budget message (due Feb. 7).

He does not expect another tax struggle this year, however, since this is an election year. He feels the situation will be similar to that four years ago when there was a very early budget solution — perhaps by some time in July. He also expects that it will be a "very tight solution."

"On the bright side," he continued, "are the Federal budget recommendations presented to the Congress by President Carter. The provisions for education in the budget of the Department of Health, Education and Welfare were increased 18 percent, most of this in student aid."

"This is so crucial for our institution as tuition goes up," Dr. Oswald pointed out. "Last year, nearly 9,000 of our students received Federal Basic Educational Opportunity Grants and nearly 16,000 received Pennsylvania Higher Education Assistance Agency grants. Some received monies from both sources. An unspecified HEW contingency fund of \$700,000 has also been proposed to relieve pressure on middle income families, and the family assets allowance is proposed for increase."

In addition, the new Carter budget, the President said, includes increases in research and development funds — from \$26.3 billion to \$27.9 billion. Basic research funds are increased 10.9 percent.

The University, Dr. Oswald pledged, will make every effort "to live within the realities of its income. By far the greatest increase in new income must come from

within the University itself."

To better enable Penn State to make short run reductions, the Provost is currently conducting daily budget hearings, and a group of six University administrators has visited every Commonwealth Campus, querying them in depth about their operations and programs.

"What makes it particularly difficult is that we have some areas of the University which are still growing while others are falling off," Dr. Oswald said.

"Enrollments at some Campuses are tending to fall off somewhat, whereas University Park will have a slight growth next year. Enrollment pressures will again be very heavy percentage-wise at the Colleges of Business Administration, Engineering and Agriculture."

Last year, the President noted, \$5,413,000 was reallocated from various units of the University to put into new salaries and to meet mandated contributions to Social Security and higher energy costs.

Of that amount, 43 percent came from the Office of Physical Plant; 23 percent from non-College, administrative divisions at University Park, such as Student Affairs, Admissions and other support agencies; 22 percent from the Colleges; 7 percent from staff benefits contributions for persons no longer employed by the University; 4 percent from the Commonwealth Campuses; and 2 percent from Behrman College, Capitol

News in Brief

Ag College to train Venezuelan personnel

The College of Agriculture is playing a major role in an extensive effort by Venezuela to achieve agricultural self-sufficiency.

Officials of the University and Venezuela's National Institute for Cooperative Education (INCE) have signed a five-year, \$3.6 million contract aimed at improving agricultural education in the South American country.

Primary objective of the cooperative program, officials said, is to assist INCE in the development of an expanded and improved professional education base for training instructors and, ultimately, agricultural workers for national self-sufficiency in agricultural production.

The contract is the second five-year program developed by Penn State and the National Institute. The initial \$1,034,154 contract, signed in December, provides for occupational and vocational training to the working class of Venezuela.

Dr. Robert H. McAlexander, coordinator of international programs in Penn State's College of Agriculture, and Dr. Gene M. Love, head of the Department of Agricultural Education, are co-managers of the agricultural education project.

A number of College of Agriculture faculty members will go to Venezuela to assist in the training. At the same time, qualified INCE personnel will enroll in

master's and doctoral degree programs at Penn State. Besides the degree training programs, Institute instructors will take non-degree training at Penn State and at other locations in the United States. Another major aspect of the project will be the development of a high quality agricultural educational institution at San Carlos, Venezuela.

Calendar news due

Information for the spring term INTERCOM calendar should be sent by Friday, Feb. 17, to Lee Morrill, calendar editor, Room 312 Old Main, 865-2501.

Motor vehicle auction Feb. 10

The University will auction 30 vehicles, both vans and sedans, manufactured between 1970 and 1975, beginning at noon Friday, Feb. 10, at the Salvage and Surplus Warehouse, north of the test flower gardens.

Valentine's Day dinner at HUB

The HUB Terrace Room will offer its annual Valentine's Day Candlelight Dinner from 4:45 to 7 p.m. on Monday, Feb. 13, and Tuesday, Feb. 14. There will be live entertainment both evenings.

The menu will feature veal paprika, prime rib of beef au jus, sautéed shrimp and scallops on a bed of rice, baked chicken with fruit sauce, roast leg of lamb bouquet, and double pork chop stuffed with herb dressing.

Identification cards issued to handicapped

Identification cards are now available for handicapped students who need help in getting around the University Park campus.

Issued by Dr. John A. Hargleroad II, director of Ritecure's Health Service, the cards offer students with either permanent or temporary disabilities such assistance as the use of non-public elevators, special keys, and permission to obtain seats in the front of classrooms or to move to the head of a line.

Cards are issued for a specific time period, which is marked on them. Dr. Hargleroad will make a determination for each case, depending on the type of handicap the student has and the length of time he or she will be at Penn State.

Dr. Daniel R. Leasure, assistant vice president for student services, asks faculty and staff not only to help students holding the cards but also to advise eligible students that they are available.

Charter groups forming for AAHE meeting

Charter groups are being formed to provide travel economies for persons planning to attend the American Association for Higher Education meeting March 19-22 in Chicago. The AAHE meeting will be preceded by a special session on March 18 sponsored by the Association for the Study of Higher Education. Information about charters may be obtained by contacting either

Renee Friedman, Center for the Study of Higher Education, 865-8366, or Kay Rogers, Centre for Travel, 238-4987.

Nominations again asked for Campuses associate dean

Dean Robert G. Quinn reminds faculty that Feb. 21 is the deadline for nominations and applications for the position of Associate Dean for Academic Instruction for Commonwealth Campuses.

Materials should be sent to Dr. Michael Cardamone, chairman of the advisory search committee for the position, Room 111 Old Main, University Park. Other committee members are Michael Barendse, Patricia Overder, Albert Skomra, Dr. Walter Severs, Dr. Kent Forster, Edward Elias, Dr. James Gallagher, and Norman Aamodt.

Student Phonathon seeks alumni help

Penn State's major scholarship programs, along with two special projects, are getting a boost through the efforts of some 450 students, who have been calling the University's alumni on a battery of telephones to ask their help.

The Lion Line Phonathon, which was originally conceived by the Office of Gifts and Endowments, began Jan. 23 and will continue through Feb. 9. Groups of 40 to 60 students work each night. Many of them currently receive scholarship aid; others are members of honorary societies

(Continued on page 4)

Penn Staters

Dr. Thomas A. Wiggins, professor of physics, recently marked 25 years of service to the University.

A Penn State alumnus, Dr. Wiggins earned B.S. and Ph.D. degrees at the University. He also holds an M.S. degree from George Washington University.

His research interests include atomic and molecular spectroscopy and spontaneous and stimulated scattering of laser light from gases, liquids and transparent solids. His current research is in the measurement of optical constants of semi-conductors during intense radiation. He is the author of 100 research publications and has been involved in the training of about 20 M.S. and 15 doctoral degree candidates.

Dr. Wiggins has taught at all instructional levels with an emphasis on introductory work for science and engineering students.

A consultant for the spectroscopy section of the National Bureau of Standards, he is a member of Sigma Xi, scientific honorary, and a Fellow of the American Physical Society and the Optical Society of America.

Dr. Alfred A. Triolo, associate professor of Spanish and Italian, spoke last month at the University of Pittsburgh's Center for Medieval and Renaissance Studies. His topic was "Structure and Function in Dante's Inferno: A Pause Along the Road to a New Analysis."

Dr. Julian Hecklen, professor of chemistry, has been elected a Fellow of the New York Academy of Sciences. Dr. Hecklen is internationally known for his work on the chemistry of air pollution.

An essay by **John Balaban**, associate professor of English, has been selected from among almost 4,000 nominations for inclusion in *The Pushcart Prize, III: Best of the Small Presses, 1978-79*. The book will be published in hardback by Pushcart Press this spring and in paperback by Avon next winter.

Dr. William R. Bradley, associate professor of art education, has been named a Distinguished Alumnus by his alma mater, Westmar College, in LeMars, Iowa. He will deliver a convocation address at Westmar in April.

Harold B. White Jr., associate professor of health and physical education, has been named director of the Division of Recreational Sports in the College of Health, Physical Education and Recreation. The division, which coordinates intramural athletic events, sports clubs, and student and faculty recreation programs, is one of three major areas within the College, the other two being academic programs and intercollegiate athletics.

A Penn State faculty member since 1948, Prof. White has developed the University's sports clubs program, which serves more than 7,000 students in some 25 clubs. He received a B.S. in recreation leadership and an M.S. in education from the University of Massachusetts

Imbue vocational training with liberal learning, writer says

Editor's note: The comments that follow were prepared as part of the discussion on the Baccalaureate Degree Requirement issue currently before the University Faculty Senate.

Today's concept of vocational education has been hailed both as a "model for an egalitarian future, offering equal opportunity for all," and condemned for contributing to "the future slums of higher education". While speculation continues over future enrollment and program development, vocational education is posing specific problems to administrators and faculty related to the traditional role of higher education.

Vocational education offers alternative educational goals and provides comprehensive higher education on a short-term basis. As such, the traditional four-year colleges and universities have had to incorporate these programs into the regular curriculum as the demand for them has increased. However, a majority of the students admitted to these programs have not had the same background in preparation and training as the students who are generally considered "college material". Traditional institutions that are now offering vocational programs have found that a substantial change must take place in attitudes toward new students and in the programs and services designed for them. A 1975 survey has shown that the greatest need for change was in the area of faculty-student relationships. An increasing number of faculty members have shown a willingness to experiment with new programs and methods of instruction. More individualized instruction is becoming beneficial to both teacher and student. Remedial education is now an accepted, integral part of vocational education, with a rapid increase in the use of special skills centers and audiovisual materials. Today, 61 percent of the faculty involved in vocational learning are now prepared to work with low-achieving students.

This is also becoming manifest in the liberal arts area, where students are responding to remedial and individualized instruction. In terms of enrollment, this new adaptation to the needs and backgrounds of student population is apparently a success. To add to the optimistic enrollment projections, the Department of Health, Education and Welfare appropriated \$7.5 million to aid development programs for vocational education last year. The short-term programs often associated with vocational education offer at least a partial cure to what is often called the "fear of failure" syndrome — where low-achievers fail to attempt post-secondary education for fear that they will not survive the four years of college.

However, in spite of the current trend in believing that college graduates cannot get jobs and a technically-trained student has more employment advantages, vocational education is not the ultimate answer to our inflation wracked economy. In fact, it is a misconception to perceive the economy as requiring a fixed supply of occupational skills. Rather, the economy itself responds flexibly to mixes of available skills. The most critical element in the employment situation for college graduates in the coming years will be the necessity of absorbing some college educated persons into jobs which have not been traditionally filled by persons with a college education. Will college graduates be placed in "educationally upgraded" positions, or will they be "occupationally downgraded" college graduates?

To offset this problem, all involved in higher education must begin to focus on the self-development and growth of the students themselves. Career development, then, may be understood to be an educational operation rather than a "listing and matching" office. A liberal arts education can contribute much towards the continuing development of the individual and society.

John Gardner once said, "An excellent plumber is infinitely more admirable than an incompetent philosopher. The society which scorns excellence in plumbing because plumbing is a humble activity and tolerates shoddiness in philosophy because it is an exalted activity will have neither good plumbing nor good philosophy. Neither its pipes nor its theories will hold water." General education and liberal arts are usually the losers when it comes to a debate on the relationship of education and jobs. This is harmful because potential students and budget watchers are misled into making decisions on the basis of inadequate facts. One of the problems with current surveys on the job market is that they are usually made too soon after graduation. Statistics show that given a certain time period, at least 70 percent of the college graduates will eventually find a job that suits their career potential or training. In fact, the skills employers seek are the adaptive skills of liberal education, not the specific skills of vocational training. This flexibility is an asset when graduates find that they may change jobs several times during their lifetime. It also is an asset when college graduates find that they may be suited to several different types of employment when looking for work, rather than narrowed to one category.

Let us acknowledge that there is a need and a place for vocational education, and that most students are going to enter the work force upon completing their formal training. We should not fail, however, to note a number of ironies.

First of all, most institutions, public and private, throughout the world today are seeking as leaders, broadly educated men and women who have mastered the methods of understanding and problem-solving, not the narrowly trained specialist. Secondly, the seemingly unyielding problems of our times will not be solved by vocational education any more than by good intentions alone, but will require the attention of educated and trained men and women of high moral purpose. This is not the time to interrupt the progress of our professional social service programs. The social benefits of post-secondary education, and the development of vocational education has resulted in a paradox. On the one hand, vocational education was designed to help the underdeveloped economic areas of our cities and towns through an egalitarian and easily accessible education. But at the same time, terminal programs do not allow for the development of trained personnel in social services who could contribute much to the elimination of the problems of poverty and poorly trained students.

Education contributes to the improvement of life. Therefore, those of us in higher education ought to help unite the profession by imbuing vocational training with liberal learning. A better, enriched society will be the end result.

Rebecca I. Denova,
Assistant to the Dean of Student Affairs,
Beaver Campus

From the Press

Educating for Careers: Policy Issues in a Time of Change, edited by Thomas F. Powers with the assistance of John R. Swinton. 190 pages. \$12.50.

The major questions of policy in matching the nation's educational system with its employment needs are explored by 18 educators, industrialists, labor leaders, and government officials. Among the issues examined are career planning, the effects of the economic climate on career education, the use and misuse of certification and credentialism, the interface between general and career education, and the responsibilities of various educational agencies.

The book is aimed at teachers and administrators in high schools, community colleges, colleges and universities, and vocational or trade schools. It explores ways to deliver the fullest and best education, both for work and non-work roles.

Dr. Powers is professor of organizational behavior and is in charge of the Food Service and Housing Administration (FSHA) Program at Penn State. Dr. Swinton is a research assistant in the FSHA program.

Religious Encounters with Death: Insights from the History and Anthropology of Religions, edited by Frank E. Reynolds and Earle H. Waugh. 336 pages. \$14.50.

Insights are presented into many of the ways in which people in various parts of the world have encountered death, come to terms with it, and — in some senses — transcended it.

Following a general introduction, there are two major chapters on mythic and sacramental responses by Mircea Eliade and Victor Turner. They are followed by explorations into individual and communal encounters with death in a variety of traditions: Aztec, Muslim, Zoroastrian, Buddhist, Hindu, Jewish, Bugandan, and Christian. Changes in these traditions are discussed, with attention to the impact of such events as the Nazi Holocaust and American presidential assassinations.

Dr. Reynolds teaches Buddhist Studies at the University of Chicago and has been Evans-Wentz Lecturer at Stanford. Dr. Waugh teaches religious studies at the University of Alberta.

The Ethnic Imperative: Examining the New White Ethnic Movement, by Howard F. Stein and Robert F. Hill. 301 pages. \$14.50.

The authors argue that the new ethnicity is characterized more by a cutting of roots than by cultivation of them, particularly among descendants of recent European immigrants to America. The American Dream, they contend, was sought by immigrants from Ireland or eastern, central and southern Europe, not imposed upon them. The book is partly a rejoinder to apologists for the New White Ethnic movement, partly a sympathetic critique of the movement.

Dr. Stein and Dr. Hill distinguish between current ideological ethnicity and earlier un-self-conscious behavioral ethnicity. For the study, they draw upon their own extensive research among Slovak-Americans and Polish-Americans.

The authors were both Maurice Falk Medical Foundation Fellows at the University of Pittsburgh. Dr. Stein is a member of the Department of Psychiatry at Meharry Medical College. Dr. Hill is in the Department of Family Practice, Community Medicine and Dentistry at the University of Oklahoma Health Sciences Center.

University Park Calendar

Feb. 9 — 19

Special Events

Thursday, Feb. 9

Comp. Lit. film series, *Paisan*, Italian with English subtitles, 7 and 9 p.m., Room 112 Kern. International Council slide show, "The Struggle for Palestine," 7:30 p.m., Room 101 Kern. University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Friday, Feb. 10

World Future Society lecture, Jerry H. Reyburn, forestry resources extension, on "The Delphi Technique," 4 p.m., Room E-304 Pattee. University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Penn State Brass Chorale, 8:30 p.m., Music Bldg. recital hall.

Saturday, Feb. 11

Sports: coed rifle, vs. Army and Lehigh, 10 a.m.; White: men's volleyball, vs. Cornell (ECVL game), 1 p.m., Rec. Bldg.; women's basketball, vs. Ursinus, 2 p.m., White. Shaver's Creek Nature Center, Nature Stories for Children, 1-3 p.m., Stone Valley. France-cinema, *The Marquis of O*, 7 and 9 p.m., Room 112 Kern. University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Sunday, Feb. 12

University Chapel service, The Rev. Ernest Hawk, PSU, 11 a.m., Eisenhower Chapel. Shaver's Creek Nature Center, Insects in Winter, 2 p.m., Stone Valley. PSU Percussion Ensemble, 3:30 p.m., Music Bldg. recital hall. France-cinema, *The Marquis of O*, 7 and 9 p.m., Room 112 Kern. Department of Theatre and Film, *Godfather II*, 7 p.m., HUB Assembly hall. Student Film Organization, Sci Fi Film Festival, *The Time Machine*, 7:30 and 9:30 p.m., Room 102 Forum.

Monday, Feb. 13

Valentine's Day Candlelight Dinner, 4:45-7 p.m., live entertainment, HUB Terrace Room. France-cinema, *The Marquis of O*, 7 and 9 p.m., Room 112 Kern. Comp. Lit. film series, *The Pursuit of Happiness*, 8 p.m., Room 112 Kern. Free admission. Rebecca McKee, viola, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Feb. 14

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Vickie Ziegler, German, on "Upstairs, Downstairs, Across the Channel." Valentine's Day Candlelight Dinner, live entertainment, 4:45-7 p.m., HUB Terrace Room. FSBA French Dinner, "St. Valentine's Day at Maxim's," 7 p.m., Maple Room, Henderson. Reservations: 865-7441. France-cinema, *Duras, Destroy, She Said*, 7 and 9 p.m., Room 112 Kern. American Society for Metals lecture, C.W. Tinkle, *Glidden Metals Co.*, Johnston, on "From Powder to Parts," 7:30 p.m., Room 301 Mineral Industries Bldg. Artists Series Film Festival, Keaton, *Grand Slam* (1926), *The Palace*, *The Electric House*, *Shellock*, 8 p.m., Eisenhower Auditorium.

Wednesday, Feb. 15

Sigma Delta Epsilon meeting, noon, Room 101 Kern. Sports: men's swimming, vs. Bloomsburg, 4 p.m.; Natatorium; men's basketball, vs. West Virginia (EAA game), 7:30 p.m., Rec. Bldg. 5 O'Clock Playwright's Theatre, Harry Zimber, *Straight Joints*, 5:30 p.m., Pavilion Theatre. Commonsplace Theatre, *They Drive by Night*, 7:30 and 9:30 p.m., Room 112 Kern. University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse. Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 16

College of Education faculty luncheon, 12:30 p.m., Room 101 Kern. Economics faculty meeting, 3 p.m., Room 101 Kern. 5 O'Clock Playwright's Theatre, Zimber, *Straight Joints*, 5:30 p.m., Pavilion Theatre. Dance meeting, 7:30 p.m., Room 101 Kern. University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Friday, Feb. 17

5 O'Clock Playwright's Theatre, Zimber, *Straight Joints*, 5:30 p.m., Pavilion Theatre. Folk and Square Dance Roundup, 7:30 p.m., Room 133 White. Shaver's Creek Nature Center, Fireside Reading, 8 p.m., Stone Valley. University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse. Artists Series, Paul Taylor Dance Company, 8:30 p.m., Eisenhower Auditorium. Composers' Concert, 8:30 p.m., Music Bldg. recital hall.

Saturday, Feb. 18

Last date for submitting petition to Records Officer to graduate in absentia in March. Sports: women's fencing, vs. Brockport and Indiana (Pa.), 9 a.m.; White: men's fencing, vs. Pace, 1 p.m.; Rec. Bldg.; women's swimming, vs. West Virginia, 1 p.m.; and men's swimming, vs. West Virginia, 4 p.m., both at Natatorium; wrestling, vs. Pittsburgh (EWL meet), 7 p.m.; and vs. Syracuse, 9 p.m., Rec. Bldg. Eco-Action, Recycling, 10 a.m.-3 p.m., Parking Lot 83 (behind food gardens) and Boalsburg Fire Hall. Student Film Organization, Sci Fi Film Series, *Death Races 2000*, 7:30 and 9:30 p.m., Room 102 Forum. University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse. Artists Series, Paul Taylor Dance Company, 8:30 p.m., Eisenhower Auditorium.

Sunday, Feb. 19

University Chapel service, The Rev. Michael Scrogin, University Baptist Church, State College, 11 a.m., Eisenhower Chapel. Shaver's Creek Nature Center, Animal Tracks and Traces, 2 p.m., Stone Valley. Karen Eckenroth, soprano, and Gretchen Lucas, mezzo-soprano, 3:30 p.m., Music Bldg. recital hall. Quarterback Club banquet (rescheduled because of weather), 6 p.m., HUB ballroom. Department of Theatre and Film, *Men Struts*, 7 and 9 p.m., HUB assembly hall. Sports: hockey, vs. Lehigh, 7:30 p.m., Ice Pavilion.

Exhibits

Anthropology Museum: Central American, Pre-Columbian and Ethiopian artifacts.

Chambers Gallery: mixed media by art education graduate students.

Frost Entomological Museum: Architecture of Insects and Related Arthropods.

HUB Gallery: "History of Fraternities and Sororities at Penn State," exhibit from the Penn State Room, through Feb. 15; metal sculptures by Haitian artist Murat Benne.

Seminars

Thursday, Feb. 9

Computation Center, "APL," (4 of 4), suggested for users of research accounts, 7:30 p.m., Room 102 Forum.

Friday, Feb. 10

Remote Sensing, Donald N. Thompson, research associate, forestry, on "Mapping the Vegetation of Asateague Island from Color IR Photography," 11 a.m., Room 173 Willard. Physical Chemistry, David Drachon, on "Vaporization and Thermodynamics of Ti_2Co_2 ," 4 p.m., Room 333 Whitmore.

Monday, Feb. 13

Biochemistry and Biophysics, Gary Shepherd, PSU, on "Fluorescence Energy Transfer: A Method to Determine Distances within Macromolecular Complexes," 3:35 p.m., Room 101 Althouse.

Tuesday, Feb. 14

Biology, M.E. Sanders, biology, Mont Alto, on "Colchicine-Induced, Diploid, True Breeding, Complex Mutants in Sorghum and Exploitations of Other Species for Similar Effects of Colchicine," 11:10 a.m., Room 111 Life Sciences.

Food Science, Silva Mayer, on "Flavor Formulation for the Developing Countries," 11:10 a.m., Room 201 Borland.

Computer Science/Computation Center, H.D. Knoble, computation center, on "Public Privacy Transformations, An Overview," 1 p.m., Room 325 Whitmore.

Ceramic Science, Kelly McHenry, on "Subcritical Crack Growth in SiC Ceramics as a Function of P/O and Temperature," 11 a.m., Room 301 Mineral Industries.

Chemistry, J. L. Koenig, Case Western Reserve University, on "Applications of Fourier Transform Infrared Spectroscopy to Chemical Systems," 12:45 p.m., Room 333 Whitmore.

Physics, Charlotte F. Fischer, computer science, on "Hartree-Fock Method for Atoms: A Numerical Approach," 3:30 p.m., Room 117 Osmond.

Agronomy, Harold Marshall, USDA-PSU, on "Breeding for Winter Hardiness in Small Grains in the USSR," 3:35 p.m., Room 111 Tyson.

Computer Science, Robert Daley, University of Pittsburgh, on "A Survey of Minimal Program Complexity," 4 p.m., Room 325 Whitmore.

Friday, Feb. 17

Remote Sensing, Larry Garnezy, on "The LANDSAT Expression of the 38th Parallel Lineament," 11 a.m., Room 173 Willard.

Higher Education, Ernest J. Bartell, C.S.C., director, Fund for the Improvement of Post-secondary Education, Washington, D.C., on "The Fund for the Improvement of Post-secondary Education: Its Present and Future," 1 p.m., Room 101 Kern.

Computer Science, Robert Daley, University of Pittsburgh, on "A New Solution to Post's Problem," 2:20 p.m., Room 316 Whitmore.

WPSX Highlights

Highlights of the Penn State-Lehigh wrestling meet to be held in Recreation Building Feb. 11 will be presented in a two and one-half hour special. **Wrestling: Penn State Versus Lehigh** is scheduled for Sunday, Feb. 12, at 11:30 a.m.

Anyone for Tennyson? begins a three-part dramatization of the lives and works of three English romantic poets on Monday, Feb. 13, at 10:30 p.m. The programs recreate the literary world of London's Regency period and portray Byron, Keats, and Shelley. Jean Marsh and Rachel Gurney of **Upstairs, Downstairs** make guest appearances.

After World War II, the American army confiscated thousands of paintings, drawings, and etchings ordered by Adolf Hitler to support his theory of the superiority of the "Aryan Race." This collection of propaganda art, one of the world's largest, is the subject of **Of Race and Blood**, a 90-minute documentary to be seen Thursday, Feb. 14, at 8 p.m.

Pennsylvania Secretary of Health Leonard Bachman, among those scheduled to appear on **Pennsylvania Hotline: The Rights and Needs of Older People**. The live, call-in program, to be seen Thursday, Feb. 16, at 7 p.m., reviews Pennsylvania's services to its older residents and gives viewers the opportunity to ask specific questions.

People are only beginning to understand the whale, a remarkable creature whose struggle for survival has concerned many environmentalists. In a new **National Geographic Special**, Thursday, Feb. 16, at 8 p.m., public television explores the life of the world's oldest living mammal in light of old whaling tales and some recent scientific research. "The Great Whales" is narrated by Alexander Scourby.

Japan is now the third richest nation in the world, with remarkably high per capita production. In an unusual personal essay, "Holy Growth," English filmmaker Anthony Thomas looks at the price Japan is paying for its postwar growth — a mixture of decay and affluence. The documentary is part of the biweekly series, **World**, and can be seen Thursday, Feb. 16, at 9 p.m.

Arts Roundup

Brass Choral winter concert

The Penn State Brass Choral, conducted by James Benshoof, will present its winter concert at 8:30 p.m. Friday, Feb. 10, in the Music Building recital hall.

The program will include three works by contemporary American composers, two of which will have their European premieres when the Choral makes its first concert tour abroad at the end of February.

"Sinfonia for Brass and Battery" was written by Byron McCulloch, a member of the Pittsburgh Symphony Orchestra. The other modern American works are "Three Episodes for a Brass Choir" by John J. Daye, of Old Dominion University, and "Pridarus and Suzanne" by Penn State student Frank Yannet.

The program also includes "Music for a Tournament" by Vaclav V. Nelhybel, "Ouverture Pour Une Ceremonie" by Eugene Bozza, and "Fanfare, Scherzo and Allegro" by Leonard Wagner.

Alard to play all-Beethoven program

The Alard String Quartet, will perform an all-Beethoven concert at 8:30 p.m., Wednesday, Feb. 15, in the Music Building recital hall.

The program is the second of the Quartet's all-Beethoven offerings, which they are presenting to augment the Beethoven programs which are being performed this year by visiting quartets in the Artist Series' Fine Arts Series.

Included on the program are Quartet in D Major, op. 18, No. 3 (1779), Quartet in E-flat Major, op. 74 "Harp" (1809) and the Quartet in C-sharp Minor, op. 131 (1826).

Members of the Quartet are Joanne Zagst and Donald Hopkins, violinists, Raymond Page, violist, and Leonard Feldman, cellist.

Rohmer's "Marquise of O" to be shown Feb. 11-13

Eric Rohmer's *The Marquise of O*, which won the special jury prize at the 1976 Cannes Film Festival and near unanimous praise from the New York critics when it was screened at the New York Film Festival that same year, will be shown at 7 and 9 p.m. Saturday, Sunday and Monday, Feb. 11-13, in Room 112 Kern Building. The film is being sponsored by the French Department and replaces *Agurru, the Wrath of God*, which has been rescheduled for April 7 and 10.

Rohmer, the French director of *Clair de lune*, uses an 1808 novella by Heinrich von Kleist as the basis of his film. It is the story of a mysteriously impregnated young woman (Edith Clever), who won't accept the courtship of the man who secretly seduced her (Bruno Ganz). Rohmer's sets evoke the neoclassical paintings of Ingres and David.

Lincoln plaster model by George Grey Barnard is currently on display in Room 116 Arts Bldg.

Paul Taylor dancers in "Aureole."

Dancers to appear Feb. 17-18

The Paul Taylor Dance Company will be appearing in Eisenhower Auditorium on Friday, Feb. 17, and again on Saturday, Feb. 18, at 8:30 p.m. under the auspices of the Artists Series.

The Friday night concert, which is part of the Theatre/Dance Series, is completely sold out. Tickets for the Saturday performance will be on sale at the HUB Booth and Eisenhower Auditorium from 9 a.m. to 4 p.m. Wednesday, Feb. 15, and Thursday, Feb. 16.

Paul Taylor, who has been called a "giant among dance choreographers" by Time magazine, has choreographed over 75 dances for his company. Born in Pennsylvania, he attended Syracuse University where he studied painting. He later went to New York where he started his dance career by studying with Martha Graham, Margaret Craske and Anthony Tudor. He is a recipient of many awards, including a Guggenheim Fellowship and a Festival of Nations International Award.

Now in its 21st year, the company has danced in more than 200 cities in the United States, has completed 23 overseas tours and has represented the United States in art festivals in 35 different countries.

For their Saturday evening performance, the company will dance "Aureole," "3 Epithets," "Polans" and "Cloven Kingdom."

Art ed students exhibit

An exhibit of art work by graduate students in art education is open in Chambers Gallery. The show, including both two-dimensional and three-dimensional works, represents the varied artistic interests and talents of 13 current master's and doctoral students.

The exhibit will continue through Feb. 25. Chambers Gallery is open Monday through Friday from 8 a.m. until 5 p.m.

Dickson to discuss lost Lincoln shrine

Harold Dickson, professor emeritus of art history, will present an illustrated lecture on "A Lost Lincoln Shrine" at 4 p.m. Sunday, Feb. 12, in the HUB assembly room.

Mr. Dickson's talk will deal with the Lincoln works of sculptor George Grey Barnard, who created many works of the martyred president, including the bronze full figure Lincoln that stands in the HUB lounge and the Lincoln head in the Alumni Lounge in Old Main.

Specifically, Mr. Dickson will talk about a Lincoln shrine that Barnard designed but which was never built. The talk will be illustrated with slides of Barnard's work, including one of the shrine that has never before been seen publicly.

Funding Sources

For further information, call 865-1372

(003-2) The National Science Foundation has set March 1 as the deadline for preliminary proposals under the Joint NIE-NSF Program of Research on Cognitive Processes and the Structure of Knowledge in Science and Mathematics. The focus will be learning activities for students ranging from elementary school to introductory college level. Settings outside the conventional school environment are also included. (NSF Important Notice No. 70)

(003-2) The National Endowment for the Humanities (NEH) supports a program of Higher Education Curriculum Materials for the development, testing, and dissemination of exemplary curriculum materials in the humanities. Awards range from \$1K to \$350K. The annual deadline is April 1. (Ref. OEP Deadline Dates)

(003-2) NEH Young Grants in the Humanities will support projects developed and conducted by students and other young people. These awards have ranged from \$500 to \$100K. The next deadline is April 15. Contact Ms. Marion Blackley at NEH (202-724-0396). (Ref. OEP Deadline Dates)

News in brief

(Continued from page 1)

and service organizations, and students from the Colleges of Business Administration, Engineering and the Liberal Arts are also participating.

Engineering students are calling alumni of their College to ask support for an Engineering Activities Center, which is being planned at University Park as an area for more personal contact between students, alumni and faculty members.

Liberal Arts students are asking alumni to support their College's internship-career development program.

Last year, callers obtained more than \$60,000 in pledges from alumni for University programs, including the Penn State Scholars Program, Ridge Riley Fund, Renaissance Fund, Alumni Memorial Fund and the National Merit Fund, among others.

The Phonathon is being coordinated by Cynthia Tiff and George A. Moellenbrock of the Office of Gifts and Endowments.

Rev. Bartlett to speak on postsecondary education

The Rev. Ernest J. Bartlett, C.S.C., director of the Fund for the Improvement of Postsecondary Education in Washington, D.C., will present a seminar at 1 p.m. Friday, Feb. 17, in Room 101 Kern Graduate Building. He will discuss the Fund's present and future. His talk is sponsored by the Center for the Study of Higher Education and the Higher Education Student Association.

President

(Continued from page 1)

Campus and the King of Prussia Graduate Center. Hershey's budget is considered separately.

"Sixty six percent or two-thirds of the amount cut was taken from non-direct teaching and research sources in the institution," Dr. Oswald said.

Commenting on the constitutional amendment proposed by State Senator J. Doyle Corman calling for the State-related appropriations to be made a part of the general appropriations bill and thus prevent the legislature from separating them as it did last summer, Dr. Oswald said, while commending Senator Corman on his efforts, that the possible results of such an amendment must be studied.

"We are trying to get legal opinions," he explained, "to determine if such an amendment might enable the legislature to make Penn State a direct part of State government."

"These are only 'for instances,' and I don't say they would happen, but could Penn State employees be made part of the State personnel system? Could Penn State's purchasing be taken over by the State purchasing department? Could Penn State's ability to deal with its own finances and write its own checks be moved to the State treasury?"

"I think many legislators felt a little uncomfortable that in order to get at the tax fight, the State-related universities had to become 'the hostage.' I hope this problem can be resolved, but it must be resolved in such a way that Penn State doesn't lose its autonomy — not its accountability but its autonomy."

The President also acknowledged the efforts that Rep. Helen Wise is putting in on this same issue.

In response to other questions, the President said:

— He hopes tuition increases, if they come next year, will be only minimal.

— The Trustees have not decided on new fees for students living in the residence halls. Although some increase will probably be necessary, he hoped it will not much exceed last year's. He is also concerned about the recently announced rent increases for downtown State College apartments.

— The University has not dropped its admissions standards. Certain of the Commonwealth Campuses, in areas where no community colleges are located, are taking a number of "provisional" students. These students do not meet University admissions standards. However, if they are able to develop 18 units of "C" work or better, they can be admitted to the University.

— The costs of snow removal have been particularly heavy at the Commonwealth Campuses, which do not have a significant resident Physical Plant staff.

He has written all of Pennsylvania's legislators asking for help in recovering the money spent on interests costs. Although some of the legislators have been encouraging, the State Budget Officer has not, and, in Dr. Oswald's experience, such expenditures have never been reimbursed.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

News in Brief

1,807 to graduate at end of winter term

More than 1,660 graduates will receive degrees at winter term commencement at University Park on Saturday, March 4.

Stanley G. Schaffer, of Pittsburgh, a trustee of the University, will join President Oswald in conferring the degrees at the exercises scheduled for 10:30 a.m. in Recreation Bldg. Dr. Edward D. Eddy, provost, will address the graduates.

There are 1,248 seniors scheduled to receive baccalaureate degrees, and 135 students who completed two-year programs at the Commonwealth Campuses will be graduated with associate degrees. The 283 graduate students listed for advanced degrees include 218 for the master's degree, 58 for the Ph.D., and seven for the D.Ed.

Nine seniors who have completed the Reserve Officers Training Corps programs are scheduled to receive commissions in the Army, Navy, or Air Force.

In addition to the 1,666 listed for degrees at University Park, Capitol Campus has 136, and Behrend College, five.

Bookstore adds magazines

The Penn State Bookstore in McAllister Bldg. is now carrying a number of special interest magazines, which are sometimes difficult to obtain locally. Among them are Art Forum, Architectural Digest, Horizon, Film Comment, Chess Life, History Today, Wildlife, and a number of others. Suggestions for additional titles can be sent to Harry Whitesell, 863-0205, in the Bookstore.

Book donations asked

Book donations are being requested by the State College Branch of the American Association of University Women for its 17th annual used book sale, which will be held April 24-28 at the Wesley Foundation. Paperbacks and hard-covers of all kinds are welcome — reference books, crafts, gardening, cookbooks, mysteries or classics — as well as sheet music, 33-1/3 recordings, and the National Geographic Society's maps. There is always a great demand for good children's books and collector's items. Books may be left in special boxes in the rear foyer of Schlow Library or inside Ziff's. Information about pick-up service for larger donations is available from Judy Todd, 237-1347.

University marks Black History Month

An exhibit, "20 Contemporary Afro-American Print Makers," has been hung in the HUB Gallery through Feb. 26 as part of Black History Month at the University.

The prints, which were previously exhibited at the Metropolitan Museum of Art in New York City, include work by Robert Blackburn, Eldzier Cortor and Norman Lewis, as well as by Richard Mayhew, an associate professor of art at Penn State.

Among other exhibits marking Black History Month are a show of primitive

Financial aid, PS-23 discussed at Senate

Faculty members should be aware of their opportunities to secure funds for student financial aid, the University Faculty Senate was told at its Feb. 7 meeting.

Dr. Arthur E. Goldschmidt Jr., associate professor of history, presented a report by the Committee on Student Affairs, Awards, and Scholarships on the types, sources, and administration of student aid.

In that report, the committee concluded that since all segments of the University share an interest in maintaining the academic quality of the student body, all should pull together to secure student financial aid.

"Few faculty members realize that their contacts with corporations, foundations, and government agencies might enable the University to obtain additional funding for scholarships, grants, loans, and employment opportunities," the committee reported.

Dr. Goldschmidt expressed concern about the limited amount of institutional aid now available and said that in this period of financial stringency, he hoped budget cuts could be minimized for the Office of Student Aid (OSA) and its Commonwealth Campus counterparts.

"If it should become possible to increase allocations to the OSA," the committee reported, "special attention might be given to strengthening the Student Employment Office as a coordinator and disseminator of information to students about job opportunities on and off campus, both at University Park and at the Commonwealth Campuses."

In other action, the Senate discussed proposed changes to PS-23, the promotion and tenure policy. Those changes, while not fundamental in nature, would alter University guidelines for such things as the time interval between tenure reviews and the relationships between review committees at various levels.

Dr. Philip A. Klein, professor of economics, and Dr. L. Peter Gold, associate professor of chemistry, presented a list of five questions and tentative responses to them. (The questions and responses were published in the Feb. 2 issue of INTERCOM). Dr. Klein was representing the Faculty Affairs Committee and Dr. Gold, its Subcommittee on Rank and Tenure.

Dr. Klein noted that the committee and subcommittee had solicited faculty input on possible promotion and tenure changes earlier this year, primarily through an appeal in the Nov. 17 issue of INTERCOM. The response, he said, was smaller than anticipated.

One question that prompted lengthy discussion was whether written notification should be given to a faculty member in the case of a negative six-year tenure decision.

President Oswald said he thought evaluations at the end of the first, third, and fifth years should include guidance to the faculty member so that he or she could improve his or her performance if necessary. The six-year review, however, was different, he said.

"I have some very strong reservations,

mostly, but not entirely, legal in nature, about this proposal," he said.

In the past, written notification of tenure denial has not been given at Penn State, partly because of the possibility that such written documents might become fuel for legal disputes.

Dr. Gold was asked if he had consulted with other universities on the possible legal ramifications. He said he had contacted the national office of the American Association of University Professors and was told that an estimated two-thirds to three-fourths of major American universities do give written notification when it is requested. AAUP spokesmen told Dr. Gold there was no noticeable increase in litigation at those schools.

AAUP guidelines on the subject specify that candidates be told why they were refused tenure and be given a written explanation if they request it.

Dr. Richard G. Cunningham, vice president for research and graduate studies, suggested that oral but not written communication be given. He said written notifications prepared by a committee would tend to be done in such a vague style that they would be of little help to the recipient.

In the only legislative action of the meeting, the Senate approved a guideline for the dismissal of tenure-eligible faculty when adequate cause exists, adequate cause being lack of competence, excessive absenteeism, moral turpitude, or grave misconduct.

(Continued on page 4)

Haitian sculpture, also at the HUB, by Murat Briere and a display in Pattee Library and the Pollock Undergraduate Library of books, plays, poems, and letters by outstanding black novelists such as Richard Wright, Ralph Ellison, James Baldwin, and John A. Williams; playwrights LeRoi Jones and Lorraine Hansberry; and poets Julian Bond, Nikki Giovanni and Gwendolyn Brooks.

Next INTERCOM March 9

INTERCOM will not be published during the term break. The next issue will appear on Thursday, March 9, and will carry the Spring Term Calendar. Calendar information should be sent by Friday, Feb. 17, to the Calendar Editor, Room 312 Old Main, 865-2501.

Deadline for Pattee study spaces is March 6

Members of the faculty who wish to obtain faculty study space assignments in Pattee Library for the spring term should note that the assignments will be made on a first-come, first-served basis Monday, March 6, beginning at 7:30 a.m. in Room 106 Central Pattee. There are only 39 such spaces. Further questions should be directed to Cordelia Swinton, 865-5429.

Penn Staters

Dr. Joseph Jordan, professor of chemistry, will receive the 1978 Benedetti-Pichler Award of the American Microchemical Society.

According to the Society, "Selection of the award recipient is based on service to microchemistry in its broadest meaning, which includes research, application, administration, teaching or other means of promoting the advancement of microchemistry."

Dr. Jordan will receive the award, a plaque, at the Society's national meeting next fall. He will deliver an address, "Enthalpic Analysis: The Case History of a General Principle in Search of Specificity," at a symposium honoring him.

An analytical chemist, Dr. Jordan is internationally known for pioneering enthalpic analysis and bioelectrochemistry, two important new fields. Active as a scientific ambassador, he has established and fostered exchange programs in electrochemistry between the University of Strasbourg in France and Penn State's Chemistry Department. He has also been active on the international scene as chairman of the Commission on Electrochemistry of the International Union of Pure and Applied Chemistry (IUPAC).

Dr. Robert K. Murray, professor of American history, has been named a Distinguished Alumnus for 1978 by The Ohio State University. During his visit to accept the award in May, Dr. Murray will also be a guest of the History Department, presenting two seminars on his current research and past contributions to the interpretation of modern American history. He will also deliver a public lecture, "The Historian's Dilemma: Ranking American Presidents." A member of the University faculty since 1949, Dr. Murray received B.A., M.A. and Ph.D. degrees from Ohio State, as well as a B.S. in education. He is the author of four books: *The 103rd Ballot: Democrats and the Disaster in Madison Square Garden, The Red Scare: A Study in National Hysteria 1910-1920, The Harding Era: Warren G. Harding and His Administration, and The Politics of Normalcy.*

Paul West, professor of English and Fellow of the Institute for the Arts and Humanistic Studies, gave readings recently, at Cornell University and the University of Cincinnati, from his new novel-in-progress, *Stauffenberg*, in which Klaus von Stauffenberg recounts his attempts to assassinate Hitler. A long excerpt from the book will appear shortly in *The New Directions International Literary Anthology*.

Dr. Michael Danahy, assistant professor of French, presented an invited lecture at Guilford College Feb. 2. His topic was the urbanization of Paris as reflected in Balzac's novel, *Old Goriot*. While at Guilford, Prof. Danahy also served as a consultant on curriculum planning and development.

Dr. Bruce M. Siegenthaler, director of the Speech and Hearing Clinic, has been appointed to the Implementation Review Committee of the Developmental Disabilities Planning Council. The group is responsible for developing a model to evaluate existing programs for the developmentally disabled within the State under the auspices of the Governor.

Two professors from the Department of Chemistry were invited speakers at the Gordon Research Conference on Metals in Biology in Santa Barbara, Cal., Jan. 23-27. **Dr. Gordon A. Hamilton** discussed "Oxygen in Biochemistry." **Dr. William DeW. Horrocks Jr.** spoke about "Lanthanide Ion Probes."

Steven L. Deutsch has been promoted to assistant professor of speech pathology in the College of Education, effective March 1. He received his Ph.D. degree from the University of Iowa.

The Institute for the Arts and Humanistic Studies has announced the following Faculty Research Fellowships for summer/fall 1978: **Dr. Hugh Chapman**, professor of Romance languages, preparation of a computer-aided concordance of La Rochefoucauld's *Maximes*; **Dr. Richard Frautschi**, professor and head of the Department of French, preparatory research for a supplement to *A Bibliography of Enlightenment Prose Fiction*; **Kenneth Holamon**, assistant professor of theatre arts, to study and record production designs used in European children's theatre; and **Gerald Lang**, assistant professor of art, for experimental photographic platinum printing.

Also, **Dr. Christiane Makward**, assistant professor of French, research on francophone Swiss women writers; **Dr. Helen Manfull**, associate professor of theatre arts, research on the use of serious themes in European children's theatre; **Dr. Jeanne Chenault Porter**, associate professor of art history, preparation of a book on Neapolitan painting of the 17th century; **Stephen Porter**, assistant professor of art, to develop a series of large sculptures for outdoor/indoor installation; and **Dr. James Smith**, assistant professor of English at the Ogontz Campus, to complete research and begin a manuscript about media personality Jean Shepherd.

Also, **Dr. John Smith**, associate professor of English, to relate computational techniques to structuralist and semiotic theory; **Steven Smith**, assistant professor of music, auditions, interviews and discussions with Antoine Tisne, noted French composer, in preparation for American premiere performance of Tisne's Third Piano Concerto; **Dr. Emily Toth**, assistant professor of English, research for a book, "Peyton Place": *The Legacy of Grace Metalious*; **Dr. Donald Verene**, associate professor of philosophy, research for a book, *Vico's Philosophy of Imagination*; and **Dr. Donald Wharton**, assistant professor of English at the Altoona Campus, research for a book, *Literature, Art, and Humanism in the Works of American Naturalists, 1610-1850*.

Dr. Gideon Golany, professor of urban and regional planning, recently presented lectures at two southwestern universities. He spoke at the University of New Mexico on "Energy Free Cooling Systems for Desert Houses." At the University of Arizona, his topic was "Policy Trends in and Proposed Strategies for Arid Zone Development."

Dr. Thomas J. Jech, professor of mathematics, presented invited colloquia last month at the University of Washington, Seattle, and Simon Fraser University, Burnaby, British Columbia.

Don W. Grieve is serving as a visiting scholar in the Biomechanics Laboratory January through March. He is a reader in biomechanics at the University of London, Royal Free Hospital of Medicine.

Dr. Edwin L. Herr, head of the Division of Counseling and Educational Psychology, is co-author with Dr. Rupert Evans, former dean of the College of Education at the University of Illinois, of *Foundations of Vocational Education*, published by Charles E. Merrill.

Robert E. Andreyka, head, Division of Occupational and Vocational Studies, and director of Vocational Teacher Education, has been appointed to the Pennsylvania Department of Education's Office of Higher Education Advisory Committee for Project 81. Project 81 is a program to better equip students with the competencies they need to function successfully as adults. The core of the program will be 12 model school districts, which will release coordinators for a year to work with the PDE in helping their schools convert to competency programs.

Richard E. Zindler

Two members of the staff of the Applied Research Laboratory are marking their 25th year at the University. They are **Dr. Richard E. Zindler**, professor of electrical engineering research, and **Clinton H. Fitzgerald**, associate professor of engineering research.

Dr. Zindler, a native of Benton Harbor, Mich., received B.S., M.S. and Ph.D. degrees in mathematics from Michigan State University. He has taught in the Department of Mathematics and currently teaches courses and supervises graduate students in the Department of Industrial and Management Systems Engineering.

Clinton H. Fitzgerald

His research has been concerned with weapons' effectiveness, trajectories and transducer design.

Prof. Fitzgerald has B.S. degrees in both mechanical engineering and electrical engineering from Penn State. He has taught engineering graphics, and his research has centered around the design of mechanical systems and testing of systems and subsystems for underwater application. A U.S. Navy lieutenant before coming to Penn State, he also worked as a senior designer for Glenn L. Martin Co. in Baltimore and the Chicago Pneumatic Tool Co. in Franklin, Pa.

Advisory search committees named

President Oswald has appointed three advisory search committees to assist him in identifying candidates for the position of Director at the DuBois, Ogontz and Schuylkill Campuses.

Harry J. Charlesen, associate professor of accounting at DuBois, will chair that Campus's committee. DuBois

representatives include Esther Y. Nelson, instructor in mathematics; Sherwood S. Stutz, assistant professor of wildlife technology; and Ronald Cuneo, president, Student Government Association. University Park members are

Dr. James M. Beattie, dean of the College of Agriculture; Dr. Stanley P. Mayers Jr., professor of health care planning; and Dr. Barnes W. McCormick Jr., professor and head of aerospace engineering. Dr. Vernon L. Shockey, director of the Mont Alto Campus, is also a committee member.

Chairing the Ogontz search committee is Dr. Robert A. Bernoff, professor of science and general chemistry at Ogontz. Other Ogontz representatives are Annette L. Caruso, assistant professor of health, physical education and recreation; Dr. Jeanne L. Smith, professor of psychology; and Frank J. Sein, president, Student

Government Association. University Park members are Dr. Kent Forster, professor and head of history; Dr. Joe A. Miller, associate professor of community development; and Dr. Richard L. Mortill, executive assistant to the Provost. Irvin H. Kochel, director of Behrend College, will also serve.

James W. Beach, associate professor of music at Schuylkill, is chairman of his Campus's committee. Other Schuylkill representatives are Dr. Michael J. Cardamone, associate professor of physics; Stephen L. Littell, instructor in mathematics; and Arthur D. Kaplan, president, Student Government Association. From University Park, the members are Gifford H. Albright, professor and head of architectural engineering; Frederick M. Cietti, special assistant to the President for governmental affairs; Dr. Anthony J. Curley, professor of finance; and Dr. Arthur O. Lewis Jr., associate dean, College of the Liberal Arts.

Applications or letters of nomination should be sent by Feb. 21 to Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses, Room 111 Old Main, University Park, PA 16802.

Shapp recommendation 'tragically short-sighted'

Gov. Milton J. Shapp, in his Feb. 7 budget message, recommended an appropriation of \$106,759,000 for Penn State—the same amount that the University has received for the past two fiscal years.

Commenting on the recommendation, President John W. Oswald said:

"The Governor's budget recommendation of no increase in funding for Penn State next year is tragically short-sighted. What it does, in effect, is to continue to place the burden of inflation almost entirely on the student and family. As the Commonwealth prices the State university beyond the reach of hundreds of talented youths, it penalizes itself. Pennsylvania's economy needs educated people in all walks of life.

"During the current year, State agencies and State-owned colleges did receive increases in their budgets. Penn State received no such increase. The Legislature had approved an increase of \$2 million in Penn State's appropriation, but the Governor eliminated it entirely. In addition, Penn State will have to pay an estimated \$1 million in interest charges on money borrowed as a result of the delay in the passage of this year's appropriation bill.

"To meet mandated increases in costs for next year, Penn State has only three alternatives: reallocation of internal funds from academic and administrative budgets, further tuition increases, or increased State support.

"Internal cutbacks and reallocation of funds from academic and administrative budgets totalling \$15 million have been made over the past five years to cover unavoidable costs, such as general inflation and energy charges. During the past year alone, shifts of \$5 million in funds were made.

"For the first time in Penn State's history tuition was increased two times in one academic year, and is now higher than every other public land-grant university in the country. As a result, an increasing number of Pennsylvania's young people cannot afford to attend their State university.

"We are hopeful that the General Assembly will approve an appropriation above the level initially recommended by the Governor. During the coming weeks we will do everything possible to help members of the Legislature to understand our needs, and we will ask for their support in increasing Penn State's appropriation to an adequate level."

University Park Calendar

Feb. 16- March 9 Special Events

Thursday, Feb. 16
5 O'Clock Playwright's Theatre, Zimber.
Straight Joints, 5:30 p.m., Pavilion Theatre.
Dames meeting, 7:30 p.m., Room 101 Kern.
University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.
Dr. Leroy Walker, head coach U.S. Track and Field Team, Montreal Olympics, on "The Olympic Games and the Olympic Movement," 7:30 p.m., Room 123 Chambers.

Friday, Feb. 17
5 O'Clock Playwright's Theatre, Zimber.
Straight Joints, 5:30 p.m., Pavilion Theatre.
Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.
Shaver's Creek Nature Center, Fireside Reading, 8 p.m., Stone Valley.
University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Artists Series, Paul Taylor Dance Company, 8:30 p.m., Eisenhower Auditorium.
Composers' Concert, 8:30 p.m., Music Bldg. recital hall.

Saturday, Feb. 18
Last date for submitting petition to Records Office to graduate in absentia in March.
Sports: women's fencing, vs. Brockport and Indiana (Pa.), 9 a.m.; White men's fencing, vs. Pace, 1 p.m.; and men's swimming, vs. West Virginia, 4 p.m., both at Natatorium; wrestling, vs. Pittsburgh (EWI meet), 7 p.m.; and vs. Syracuse, 9 p.m., Rec. Bldg.
Ice-Action, Recycling, 10 a.m.-3 p.m., Parking Lot 83 (behind flower gardens) and Boalsburg Fire Hall.

france-cinema, Jacques Demy, *The Umbrellas of Cherbourg*, 7 and 9 p.m., Room 112 Kern.
Student Film Organization, Sci Fi Film Series, *Death Races 2000*, 7:30 and 9:30 p.m., Room 102 Forum.
University Theatre, *Thieves' Carnival*, 8 p.m., The Playhouse.

Artists Series, Paul Taylor Dance Company, 8:30 p.m., Eisenhower Auditorium.
Sunday, Feb. 19
University Chapel service, The Rev. Michael Scrogin, University Baptist Church, State College, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Animal Tracks and Traces, 2 p.m., Stone Valley.
Quarterback Club banquet (rescheduled because of weather), 6 p.m., HUB ballroom.
Department of Theatre and Film, *Mean Streets*, 7 and 9 p.m., HUB assembly hall.
france-cinema, *The Umbrellas of Cherbourg*, 7 and 9 p.m., Room 112 Kern.
Sports: hockey, vs. Lehigh, 7:30 p.m., Ice Pavilion.

Monday, Feb. 20
Cold Side Club meeting, 7:30 p.m., Room 112 Kern.
Steven Smith, piano, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Feb. 21
Sports: women's swimming, vs. East Stroudsburg and Clarion, 4 p.m.; Natatorium; men's basketball, vs. Massachusetts (rescheduled due to weather), 7:30 p.m., Rec. Bldg.
Central Pennsylvania Society of the Archaeological Institute of America illustrated lecture, Heinz Henrich, physics and history of photography, PSU, on "Science in Art History," 8 p.m., Room 101 Kern.

Wednesday, Feb. 22
Last day for signing winter term Emergency Loans, Room 108 Shields.
Commonsplace Theatre, *The Idiot*, 7:30 and 9:30 p.m., Room 112 Kern.
Winter term classes end, 9:55 p.m.

Thursday, Feb. 23
Final examinations.

Friday, Feb. 24
Final examinations.

Saturday, Feb. 25
Final examinations.
Sports: men's volleyball, vs. Rochester, 1 p.m., Rec. Bldg.

"The Prevalence of Ritual: Baptism" by Romare Bearden from HUB Gallery exhibit.

Monday, Feb. 27
Final examinations.

Thursday, March 2
Fixed date for meetings involving Commonwealth Campus faculty.
Sports: women's swimming, EIAIW Championships, 8 a.m.-9 p.m., Natatorium.
Commencement, 10:30 a.m., Rec. Bldg.

Sunday, March 5
New student arrival date.

Monday, March 6
Orientation and Advising.
Videotape, "International Development: Can Rich North and Poor South Cooperate?" noon, Kern Commons.
International Students orientation, 3 p.m., Room 101 Kern.

Tuesday, March 7
Spring Term Registration, 8 a.m.-5 p.m., IM Bldg.
Continuing Education Registration, 1 p.m., Room 101 Kern.

Wednesday, March 8
Spring Term Registration, 8 a.m.-5 p.m., IM Bldg.
Continuing Education Registration, 9 a.m., Room 101 Kern.

Thursday, March 9
Spring Term classes begin, 8 a.m.

Exhibits

Anthropology Museum: Central American Pre-Columbian and Ethiopian artifacts.

Chambers Gallery: mixed media by art education graduate students, through Feb. 21.

Frost Entomological Museum: Architecture of Insects and Related Arthropods.

HUB Gallery: metal sculptures by Haitian artist Murat Briere, through Feb. 28.

Kern Commons Gallery: Arab Club, "Highlights of Arab Culture," multi-media exhibit, through Feb. 25.

Museum of Art: "The First Five Years," anniversary show of selections from the permanent collection.

Museum of Art HUB Gallery: "Twenty Contemporary Afro-American Print Makers," through Feb. 26.

Fattee: Rare Books Room, Black History exhibit.

Room 401 Sackett: Richard Alden, colored pencil drawings.

White Bldg: Penn State's Greatest Black Athletes, photographs.

Zoller Gallery: Photography: The Selected Image," through Feb. 22.

WPSX Highlights

Wall Street Week analyzes the prospects for the international investor, Friday, Feb. 17, at 8:30 p.m., with Landon Thomas, executive vice president and director of Fiduciary Trust Company of New York. Mr. Thomas discusses the foreign securities market and explains how investors can increase their earnings through global diversification.

In a rare television appearance, jazz and blues singer Phoebe Snow joins musician/entertainer David Bromberg on Soundstage, Saturday, Feb. 18, at 8 p.m.
Sunday, Feb. 19, at 6:30 p.m., Dr. James T. Willerson of the University of Texas Health Science Center at Dallas demonstrates cardiopulmonary resuscitation (CPR) on Daniel Foster, M.D. The program, which investigates major causes and treatment of coronary artery disease, also demonstrates other procedures such as the arteriogram and the electrocardiogram.

"We uncovered some extraordinary and very disturbing stories," says BBC Outlook reporter Tom Mangold about his three-nation investigation in the Far East into the increasing traffic in babies from east to west. "Our film report shows a baby being sold for cash with no questions asked in the slums of Bangkok."

"Traffic in Babies" can be seen Sunday, Feb. 19, at 11 p.m.

Since the Laurel Run Dam disaster in Cambria County last July, there has been increased concern over the safety of Pennsylvania's existing dams and the State's safety inspection program. Dam safety is the subject of a **Talkabout** discussion Tuesday, Feb. 21, at 7:30 p.m. when John Grant talks with Senator Louis Coppersmith and William B. Middendorf, deputy secretary for Environmental Protection in Pennsylvania's Department of Environmental Resources.

Herschel Bernardi and Georgia Brown star in *Actor*, Tuesday, Feb. 21, at 8 p.m. on **Hollywood Television Theatre**. The musical play, written by Jerome Lawrence and Robert E. Lee, is based on the early life of Paul Muni and his family of "tangle-tangle" players, performing in eastern Europe and later in America's Yiddish theatres.

"The Behavioral Revolution," a five-part Penn State Television series on behavior modification, returns to Channel 3 Wednesday, Feb. 22, at 7:30 p.m. as part of **The Pennsylvania State University of the Air**. Featured on the first program is B. F. Skinner, whose discovery of operant conditioning techniques established a basis for current behavioral theory.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Seminars

Friday, Feb. 17
Remote Sensing, Larry Garney on "The LANDSAT Expression of the 38th Parallel Lineament," 11 a.m., Room 173 Willard, Higher Education, Ernest J. Bartell, C.S.C., director, Fund for the Improvement of Post-secondary Education, Washington, D.C., on "The Fund for the Improvement of Post-secondary Education: Its Present and Future," 1 p.m., Room 101 Kern.
Computer Science, Robert Daley, University of Pittsburgh, on "A New Solution to Post's Problem," 2:30 p.m., Room 316 Whitmore.
Physical Chemistry, R. Simonaitis, chemistry, on "Pteroylnic Acid: A New Stratospheric Species," 4 p.m., Room 333 Whitmore.

Monday, Feb. 20
Biochemistry and Biophysics, Andrea Mastro, life sciences, on "Tumor Promoters and Lymphocyte Stimulation," 3:55 p.m., Room 101 Althouse.

Tuesday, Feb. 21
Biology, Emerson Hibbard, biology, on "I. Restoring the Vision of Kinetically Eyeless Axolotls. 2. Intergenic Eye Grafts in Birds," 11:10 a.m., Room 111 Life Sciences Bldg.
Food Science, Rodger Jones on "Preservation of Milk Testing Samples by Chemical Means," 11:10 a.m., Room 201 Berland.

Water Pollution Control, Charles Kleeman, Water Supply Branch, EPA, on "The Safe Drinking Water Act — The First Three Years," 2:20 p.m., Room 128 Sackett.
Genetics, James Wright Jr., biology, on "Breeding and Genetics of Trout," 3:55 p.m., Room S2 Frear.

Plant Pathology, Fred C. Morgan on "Saporins as Potential Protectants — Tomatoes," 3:55 p.m., Room 233 Buckout.
Nuclear Engineering, Lee Bettenhausen, regional radiation representative, EPA, on "Radiation and the Environment and Radiation Levels from Coal Plants," 4 p.m., Room 225 EE West.

Thursday, March 2
Neutron Activation Analysis Workshop, 8:30 a.m.-5 p.m., Breazeale Nuclear Reactor.

Friday, March 3
Neutron Activation Analysis Workshop, 8:30 a.m.-5 p.m., Breazeale Nuclear Reactor.

Thursday, March 9
Chemistry, A. Schnesheim, Exxon Research and Engineering Co., on "Energy — The Heart of Chemical Research," 12:45 p.m., Room 333 Whitmore.

Minority Voices due this month

Articles about Eldridge Cleaver and Gwendolyn Brooks are featured in the second issue of *Minority Voices*, a new national journal which explores literature and the arts as they relate to Afro-Americans, Chicanos, Native Americans and Puerto Ricans.

Published semiannually at The Paul Robeson Cultural Center, *Minority Voices* will include eight scholarly articles and four book reviews when it appears at the end of February.

The articles include: "Gwendolyn Brooks: Tradition in Black and White," "Pocho and the American Dream," "Revolution and Myth: Kelley's 'A Different Drummer' and Gaines' 'The Autobiography of Miss Jane Pittman,'" "Black Dance: Its African Origins and Continuity," "Eldridge Cleaver: From Savior to Saved," "Blacks Alone: Theatre in Search of an Identity," "Working Class and Lower Class Origins of Black Culture: Class Formation and the Division of Black Cultural Labor," and "Hacia La Nada: O La Religion En Pocho."

Saute Roundup

Steven Smith to give piano recital Feb. 20

Pianist Steven Smith, assistant professor of music, will present a recital at 8:30 p.m. Monday, Feb. 20, in the Music Bldg. recital hall.

The program will include Haydn's *Fantasia in C*; Chopin's *Polonoise in F*; Sharp Minor, Opus 44; Alberto Ginastera's *Sonata for Piano*; and Schubert's *Sonata in B Flat*, Opus Posthumous.

The Schubert piece was the composer's last work for solo piano, composed shortly before his death in 1828. This is the 150th anniversary of Schubert's death, and musicians throughout the world are commemorating the event.

The Ginastera piece, written in 1951, has become a classic of contemporary piano music.

Mr. Smith joined the University faculty in 1972. He recently completed studies leading to a doctor of musical arts degree at the Eastman School of Music.

Musica da Camera tour benefit concert

Musica da Camera, Penn State's chamber orchestra, will present a Tour Benefit Concert at 7:30 p.m. Sunday, Feb. 19, in the Museum of Art.

Included on the program will be *Concerto Grosso*, Opus 6, No. 1 by Corelli; *Sonata Representativa* by Heinrich Biber; *Duo for Violin and Viola in G Major* by Mozart; *Capriccio Sinfonico* by Peter Warlock; and *Divertimento for Strings* by Bela Bartok.

Dr. D. Douglas Miller, associate professor of music and director of Musica da Camera, explains that the concert will benefit the group's tour fund, which supports biennial concert tours abroad. A tour is planned for the summer of 1979.

Tickets may be obtained by writing Dr. Miller, Room 218 Music Bldg.

"Science in Art History" to be discussed Feb. 21

Dr. Heinz Henisch, professor of physics and professor of the history of photography, will present an illustrated lecture, "Science in Art History," at 8 p.m. Tuesday, Feb. 21, in Room 101 Kern Building.

His talk is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Student composers' concert

Original works by Penn State music composition students will be featured in a Composers' Concert at 8:30 p.m. Friday, Feb. 17, in the Music Bldg. recital hall.

The concert will include three pieces for organ by Lowell Knauper, a flute-violoncello work by Robert Passow, a trio for three violas by Debbie Drattell, *Sonata for Percussion* by Frank Yannetti and *Four Songs* by George Dube.

Musica da Camera will perform a work for chamber orchestra by student composer Tad Mark.

All the students represented in the concert have studied with either or both of Penn State's composition teachers, Bruce Trinkley and Bert Fenner.

Affirmative Action for the handicapped

Editor's note: The following notice, which was provided by the University's Affirmative Action Officer, appeared last fall and is reprinted as a reminder.

The Pennsylvania State University is a government contractor subject to Section 503 of the Rehabilitation Act of 1973, which requires government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals.

We need your help in assuring compliance with the affirmative action guidelines established by Section 503 of the Rehabilitation Act of 1973. If you have a physical or mental impairment, or are regarded as having an impairment that substantially limits your ability to secure, retain or advance in employment, we would like to include you under the Affirmative Action Program.

It will assist us in proper placement and appropriate accommodations if you tell us about (1) any special methods, skills, or procedures which qualify you for jobs that you might not otherwise be able to do because of your handicap, so that you may

be considered for any positions of that kind, and (2) possible accommodations which could be made which would enable you to perform the job properly and safely.

Submission of this information is voluntary and refusal to provide it will not subject you to discharge or disciplinary treatment. Information obtained concerning individuals shall be kept confidential, except that (1) supervisors and managers may be informed regarding restrictions on the work duties of handicapped individuals and regarding necessary accommodations, (2) first aid and safety personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment, and (3) government officials investigating compliance with the Act shall be informed.

The Affirmative Action Officer is responsible for coordination of compliance with the requirements of Section 503.

To be included in the Affirmative Action Program, call 863-0473 and additional data will be sent to you.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 863-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Feb. 23. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

CLINICAL NURSING SPECIALIST, COLLEGE OF MEDICINE, Hershey Responsible to the Director of Nursing for providing expertise in a clinical specialty to the various patient units. Function as a model to other nursing personnel and students and improve clinical decision making and nursing practice. Master's degree in one of the defined nursing clinical specialties, plus one to two years of directly related experience.

COORDINATOR OPERATING ROOM SUPPORT SERVICE, COLLEGE OF MEDICINE, Hershey Responsible to the Patient Unit Coordinator for the efficient and effective purchasing and handling of all OR instrument, equipment and supplies, as well as the administrative details and supervisory responsibilities related to this activity. Bachelor's degree in business administration or equivalent and one to two years of directly related experience. Experience in central supply is highly desirable.

ADMINISTRATIVE ASSISTANT, COLLEGE OF MEDICINE, Hershey Responsible to the Assistant Hospital Director/Chief of Nursing Services for the business and administrative functions of the Department of Nursing Services, as well as serving as a liaison with other Medical Center departments. A bachelor's degree in business administration, a related field or equivalent, plus one to two years of directly related experience is required.

ADMINISTRATIVE AIDE, STUDENT AFFAIRS, University Park Responsible to the Director of Student Aid for providing administrative assistance with the Basic Educational Opportunity Grant (BEOG) program, to include all aspects of application processing, and program interpretation to students and parents and external agencies. A bachelor's degree or

equivalent, plus more than one year and up to and including two years of directly related experience required.

MECHANICAL AND ELECTRICAL ENGINEER, TRAINING, OFFICE OF PHYSICAL PLANT, University Park Responsible to senior engineering personnel for a wide variety of mechanical and electrical engineering projects. This is an entry level engineering position, working in a well defined program to develop the overall goal of obtaining effective mechanical and electrical experience in all assigned areas in physical plant. Employees will work toward obtaining professional engineering registration in the State of Pennsylvania. Bachelor's degree in mechanical electrical engineering required. Some experience desirable but not essential to being considered for the position.

PROGRAMMER/ANALYST B, COLLEGE OF AGRICULTURE, University Park Confer with project personnel to determine the objectives of the study, anticipated results, degree of confidentiality and use of project data. Develop new computer programs and upgrade, maintain and adapt existing programs. Advise and assist researchers in the efficient execution and debugging of programs. Analyze projects with large data sets to arrive at reliable time estimates. A bachelor's degree with a major in mathematics, statistics or computer science or equivalent, and from one to two years of directly related programming experience are required. Course work in linear algebra, numerical analysis, calculus, statistics, computer languages and system programming are particularly desirable.

ADMINISTRATIVE ASSISTANT, COLLEGE OF MEDICINE, Hershey Responsible to the Chairman of the Department of Surgery for business and administrative functions of the department including budgetary responsibilities, personnel administration, purchasing, departmental operational policies, and liaison with other departments and outside organizations. Bachelor's degree in business administration or a related field or equivalent experience, plus one to two years of directly related administrative experience. Must have accounting experience.

STAFF PHARMACIST, COLLEGE OF MEDICINE, Hershey Responsible to the Assistant Manager of Pharmacy Supervisor to perform pharmaceutical functions of inpatient and outpatient dispensing, intravenous admixture and hyperalimentation preparation, extemporaneous compounding, providing drug information to physicians, students, nurses and patients. Maintain inpatient and outpatient drug profiles, enforce Formulary regulations, and maintain required pharmaceutical records and inventory levels. Bachelor of science in pharmacy, plus one to two years of directly related experience. Pennsylvania registration in pharmacy or eligibility required.

News in brief

(Continued from page 1)

will be offered during spring term.

The interdisciplinary course, which includes lectures by faculty drawn from throughout the University, will be offered Tuesday evenings from 6:45 to 8 p.m.

Designed to introduce students to basic issues in gerontology, the course has been coordinated by Michael Smyer, assistant professor of human development, and was initially conceived by and developed under the auspices of the Gerontology Center through Continuing Education.

Registration will be held in Room 101, Kern Bldg. on Tuesday, March 7, from 1 to 8 p.m. and Wednesday, March 8, from 1 to 5 p.m. for part-time students. Full-time students should register on March 8.

Neutron Activation Analysis workshop

A two-day workshop on the use of Neutron Activation Analysis will be conducted Thursday and Friday, March 2 and 3, at the Breazeale Nuclear Reactor Facility. The workshop is open to faculty, staff and students who have a desire to learn more about this method of analysis.

The workshop will consist of one day of lectures and one day of laboratory experiments to enable participants to become familiar with the instrumentation and facilities available for use at the Breazeale facility.

There is no charge for this workshop, but those who are interested in attending should contact Dale C. Raupach at 865-6352.

Help wanted advertising policy reminder

The Office of Personnel Administration would like to remind faculty and staff of the University policy regarding the placement of help wanted advertising.

The Manager of the Employment Division is responsible for reviewing the wording of all help wanted advertisements to assure that they are in compliance with State and federal legislation and conform to University standards. (See PS-33, Help Wanted Advertising, in the University Policy Manual.)

Anyone wishing to place classified advertisements for faculty or staff vacancies should contact Robert L. Kidder, manager, Employment Division, 865-1387 (Network number 475-1387) before taking any formal action.

Bookstore asks for identification on IDTs

The Penn State Bookstore at University Park requests that Interdepartmental Transfers (IDTs) for the payment or ordering of merchandise include a phone number and the name of a person to contact regarding the order. Sometimes information on color, size, etc. is omitted from an order. When this occurs, it is helpful to bookstore personnel to have a quick means of checking back to obtain the information.

Senate

(Continued from page 1)

Dr. Thomas Larson, professor of civil engineering, said the Ad Hoc Committee to Review Baccalaureate Degree Requirements is working on a report based on faculty input to its earlier study. He said he expects to present it to the Senate within a month or two and that it will offer some significant revisions to current BDR guidelines.

Judd Mull, a student senator from the College of Science, reported on the reorganization of the student government which is now in progress.

Funding Sources

For further information, call 865-1372

004-1 The Center for the Study of Environmental Policy has several grants from the Rockefeller, Ford, and National Science Foundations addressing issues of social science importance concerning the siting of major energy complexes. Further, it has several ongoing projects with the Governor's Energy Council concerning problems of energy and environmental policy. Faculty and graduate students interested in participating are encouraged to contact Dr. Terry Ferrai, director of the Center, 225 Pond Lab. 865-1442.

004-2 The U.S. Department of Transportation has issued a call for papers for a conference on Women's

Travel Issues: Research Needs and Priorities. Both commissioned and responding papers will be presented. Researchers that evaluate and synthesize existing literature or research are invited as well as those that present new research into transportation needs of various women's groups. An abstract (2-4 pages) is required by Feb. 24, a draft by April 1, and final version by May 12. A June conference is anticipated. (Ref. 004)

004-3 The National Endowment for the Humanities announces a new experimental program called NEH Youth Projects. These provide out-of-classroom opportunities for young people to develop skills in the humanities. Two deadlines for these institutional grants have been established: March 17 and Oct. 15. Planning grants (\$2500) are also made and these have a June 1 deadline (Ref. ACEHNEA, 23/78). NEH Youthgrants were announced last week (30-3).

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Penn State Intercom

News in Brief

Research proposals asked

Faculty from all University campuses are invited to submit proposals to the Penn State 1978-79 Research Initiation Grants Program, established to support research and other creative work in the sciences, technology, social sciences, and arts and humanities. The RIG program is limited to new faculty on continuing appointments and with a service accumulation of two calendar years or less by September 1978. The 12-month awards will range from \$2,000 to \$5,000 and will be announced following a preliminary screening by the Colleges and final recommendations from a subcommittee of the Administrative Committee on Research (ACOR). Further information may be obtained from ACOR deans or Commonweath Campus directors. The proposal deadline is March 23; awards will be announced by April 10.

Campus search bodies extend nomination period

The advisory search committees for Directors at the DuBois, Ogontz, and Schuylkill Campuses announce the extension of the deadline date for receipt of applications and nominations to March 31. The advisory search committees will identify those candidates who can provide the ablest academic leadership and most competent administration for the three

Campuses. Candidates should possess a doctoral degree or equivalent and several years' experience in teaching at the university level. Experience in higher education administration is especially desirable. Letters of nomination or application should be directed to Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses, Room 111 Old Main, University Park, PA 16802.

Tax guide available

Now that income tax time is here again, the Penn State Bookstore is selling copies of a book which should be of particular interest to the University community. The book, *1978 Tax Guide for College Teachers and Other College Personnel*, is published by Academic Information Service, Inc.

Creative drama courses for children to be offered

Two creative drama courses for children will be offered during spring term. Classes will be held on Mondays and Wednesdays, beginning April 3, for a period of seven weeks. The first class, for children who are attending morning kindergarten, will run from 2:30-3:15 p.m. The second class, for children in fifth and sixth grades, is from 3:45-4:45 p.m. Parents may enroll their children by calling 865-7586. The course will be taught by Dr. Helen Manfull, coordinator of children's theatre and creative drama.

Energy conservation measures to continue during spring term

Measures to reduce electrical and other energy consumption on the University Park Campus will continue at a modified level during spring term. In announcing the changes, President Oswald expressed his deep appreciation to those University faculty and staff members who for the past two weeks have worked under difficult and uncomfortable conditions in office areas of 55 degrees. "Every member of the University community has been most cooperative in this emergency effort to conserve energy in campus buildings," he said. Given the continuation of careful conservation measures, Dr. Oswald said, further changes in the academic schedule are not anticipated. "I am pleased with the excellent cooperation we have had from all personnel of the University in our efforts to reduce sharply our consumption of electrical energy on the University Park Campus," Dr. Oswald said. "As all citizens are aware, there is a need for continued conservation because of the limited supplies of coal available for generation of electricity, and therefore we must ask for continued cooperation. "Temperatures in most campus buildings will continue to be below normal, although not at the severely low levels of the last two weeks. We must continue to reduce lighting and other

electrical consumption in all buildings. "I am grateful to all personnel for their willingness to work in less than comfortable conditions and know we can count on their continued cooperation," Dr. Oswald concluded. Temperatures in student rooms and dining halls will be set at 68 degrees, with temperatures at the Ritenour Health Center. Temperatures in all other buildings will be set for 62 degrees. Temperatures will be lowered during the night and other periods when the buildings are not occupied. The revised program calls also for some curtailment of activities in Recreation Bldg. and White Bldg., with scheduled events only, such as classes, practice sessions and other events. Informal recreation activities will be limited to the two-hour period before or after scheduled events. Ralph E. Zilly, vice-president for business, reports that the stringent measures taken during the two weeks between terms enabled the University to reach its goal of a 25 percent reduction in purchased electrical power. Under the new program in which temperatures will be at 62 degrees, a reduction of 10 to 15 percent in electrical power consumption is anticipated.

President asks legislators to give higher education equitable treatment

Pennsylvania legislators were urged to "reassess the priorities set forth in the Governor's budget and to provide equitable treatment to The Pennsylvania State University and other colleges and universities." Without reassessment of priorities set forth in the Governor's budget, President John W. Oswald said, "higher education in the Commonwealth will continue to decline in quality and in opportunity." Dr. Oswald addressed the House Appropriations Committee in Harrisburg on March 10. "Three straight years at the same level of support could result in irreparable damage to Penn State and to other institutions which are the principal source of the highly trained men and women so desperately needed to restore the economic health of the Commonwealth." Penn State received no increase in State support this year and the Governor has recommended no increase for the coming year. The overall State budget, however, increased by 7.3 percent this year and, as recommended by the Governor, will increase another 7.2 percent next year. "We ask that serious consideration be given to equitable treatment for Penn State," President Oswald continued. He noted that Penn State faces two critical problems and seeks the help and understanding of the members of the General Assembly. "First," he explained, "there is the immediate and urgent need to repair the damage caused by the traumatic experience of the past year. "Elimination by the Governor of the

\$2,135,000 in the present year's appropriation from the amount passed by the Legislature came as a complete surprise not only to the University but to many if not most members of the Legislature. The removal of this very minimal increase (some 2 percent) caused Penn State severe problems in dealing with absolutely unavoidable cost increases. "In the absence of any increase in State appropriation support, internal budget cutbacks of over \$5 million were made along with an unprecedented second round of tuition increases. The problem was and still is compounded by the huge interest costs — estimated at over \$1 million — which are resulting from the delay in the passage of the 1977-78 appropriation in late December and the delayed payment schedule. "Secondly," Dr. Oswald continued, "Penn State must cope with the severe financial pressures it faces in the year immediately ahead, 1978-79. The problems of inflation and mandated cost increases are as unavoidable for the University as they are for agencies of State government and for every other sector of our society. "Penn State has been losing ground in the fight against inflation. The cumulative impact of inflation on Penn State has been some 51 percent over the last six years. Support from State appropriations would have increased less than 30 percent over this same period if the Governor's recommendations for the next year were followed. To keep the University operating and solvent, it has been

Lunch in the main dining room (above) and Speakeasy Lounge will be available from 11:30 a.m. to 1:30 p.m. during Faculty Club Open House Friday, March 17. Visitors can also partake of free wine and beer beginning at 4 p.m. in the Fireplace Lounge, and dinner will be served from 5:30 p.m.

Faculty Club membership growing

June will be the month of decision for Penn State's Faculty Club. By then, its success or failure under the present format should be established, club President Marjorie East told the membership in a recent letter. Dr. East, professor of home economics education, is optimistic. "I think the most successful development in recent months," she said in an interview, "is the Friday night party. Each week a different host buys and gives away a keg of beer. Members can — and do — invite their friends, and attendance has ranged from 30 to 150 people. I'd say we average at least 60. "We're mixing faculty and administrators from different departments

Penn Staters

Dr. Robert Stefanko, professor of mining engineering and associate dean for continuing education in the College of Earth and Mineral Sciences, has been designated as president-elect of the Society of Mining Engineers. He will become president of the 24,500-member international professional organization early in 1979 for a one-year term. Dr. Stefanko has been active in the SME for more than 20 years, having served on its board of directors from 1975 to 1978, as chairman of its coal division in 1974, and as chairman, at various times, of many of its committees.

Dr. Anthony Cutler, professor of art history, was recently elected vice-president of the U.S. National Byzantine Studies Conference. Last month, as part of the Speaker's Choice Lecture Series of the Medieval and Renaissance Studies Program of the University of Pittsburgh, he spoke on "The Psalter as a Vehicle of Byzantine Culture." He also spoke on "The Psalter in Byzantine Book Production" as part of the evening lecture series of the Walters Art Gallery in Baltimore.

Dr. Peirce F. Lewis, professor of geography, recently delivered the keynote address at a four-day symposium on "Planning and Managing the City: Neighborhood Conservation" at Macalester College, St. Paul, Minn. His topic was "The Spirit of Places: Spatial Personalities and the Preservation of Landscape."

Three College of Science faculty members are among the 79 outstanding young scientists from 46 universities in the United States and Canada chosen to receive Sloan Fellowships for basic research this year. They are: **Dr. Gregory L. Geoffroy**, assistant professor of chemistry; **Dr. David A. Sibley**, associate professor of mathematics; and **Dr. Julian D. Maynard**, assistant professor of physics.

According to the Sloan Foundation, the fellowships are designed to permit added freedom and flexibility for the most creative young researchers. The fellowships are among the most prestigious grants of their type. This year, Penn State's College of Science has the highest number of Sloan Fellows in Pennsylvania.

Dr. Geoffroy, who was honored recently with a Dreyfus Teacher-Scholar Grant, is a specialist in the photochemistry of organometallic compounds and transition metal cluster chemistry. He holds a doctorate from the California Institute of Technology and is the author of more than 35 research papers and of a forthcoming book, *Organometallic Photochemistry*. Dr. Sibley also joined the faculty in 1974. A specialist in research on representation theory of finite groups, he is co-author of the monograph, *Finite Linear Groups of Relatively Small Degree*. He, too, holds a Ph.D. from Cal Tech. Dr. Maynard came to Penn State last year. A Princeton Ph.D., he specializes in superfluid helium research and acoustics.

Dr. S. V. Martorana, professor of higher education, is one of 15 members appointed to the national advisory panel for the Brookings Institutions' national study of community college finance. Dr. Martorana, who also is research associate at the University's Center for the Study of Higher Education, served for seven years as vice chancellor for community colleges and provost for vocational and technical education with the State University of New York.

Dr. Thomas Jech, professor of mathematics, presented a colloquium at Princeton University last month.

Three faculty members received awards for outstanding service in the fields of minerals and metals at the annual meeting of the American Institute of Mining, Metallurgical, and Petroleum Engineers in Denver this month. **Dr. Frank F. Aplon**, professor of metallurgy and mineral processing, received the AIME's Robert H. Richards Award; **Dr. William S. Vogely**, professor and head of the Department of Mineral Economics, was presented the AIME's Mineral Economics Award; and **Dr. H. Beecher Charnbury**, assistant dean emeritus for planning and development in the College of Earth and Mineral Sciences, received the Percy M. Nicholls Award of the Society of Mining Engineers, an AIME constituent society.

Dr. Aplon was cited for his "many contributions to the mineral industry by his excellence in education and research, integrating theory and practice, covering metallic ores, industrial minerals, and coal."

Dr. Vogely was cited "for outstanding professional accomplishment in his government, industry, and university teaching careers and for leadership in all aspects of the objectives of the Council of Economics, AIME."

Dr. Charnbury's citation reads in part: "Educator, author, scientist, consultant to government and industry, and former Secretary of the Department of Mines and Mineral Industries of the State of Pennsylvania, he has served in all these capacities with enthusiasm and success. Fortunately for the coal industry, he has remained active since his retirement in 1973. Equal devotion to the advancement of science and for the beauty and integrity of his country uniquely qualify him for this award."

Charles H. Ness, assistant dean of the University Libraries, has been reappointed for a three-year term to the President's Committee on Employment of the Handicapped. The national committee is dedicated to improving and promoting employment of the handicapped. Mr. Ness was formerly director of the U.S. Regional Library for the Blind and Physically Handicapped in Philadelphia.

Dr. Gerard J. Brault, professor of French, and **Dr. Glyn P. Norton**, associate professor of French, have been named editors of a new monograph series in Romance languages sponsored by Purdue University.

Dr. John A. Lucas, professor of physical education, has been named chief of the U.S. mission to the 1978 International Olympic Games in Olympia, Greece. The academy is a two-and-a-half-week program of lectures, practice, and training for young athletes, designed to foster support for the philosophy of amateur athletics on which the Olympics are based.

Dr. Martin W. Sharp Jr., assistant professor of education at Delaware County, has been named a member of the Museum-School Commission of The Smithsonian Institution for 1978. He will work with the Smithsonian on curriculum development associated with its program for public school systems and will advise institutions in Pennsylvania, Delaware and New Jersey regarding national programs of the Smithsonian available to them.

Edmundo Bendezu, professor of literature at Universidad Nacional de San Marcos, is a Visiting Fellow of the Institute for the Arts and Humanistic Studies during the spring term. He will present guest lectures in a number of Latin American history and political science classes and will also teach a class in Spanish American literature.

Margaret S. Bastuscheck, assistant to the dean for Continuing Education, College of Human Development, was the recipient of an award from the Pennsylvania

Association for Adult Education for "exemplary service and leadership to Adult Education as a President and Board Member — 1974-1978." The presentation was made at the annual Mid-Winter Adult Education Conference held at the Hershey Motor Lodge last month.

Dr. Stanley F. Gilman, professor of architectural engineering at the University, received an award for outstanding service and achievement in teaching at a recent meeting of the American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE). The E. K. Campbell Award of Merit and a stipend are given annually by ASHRAE's Life Members Club. Dr. Gilman, whose main teaching and research areas are air conditioning, energy conservation in buildings and solar energy, received the award Jan. 30 in Atlanta.

Albertas Steponavicius, associate professor of linguistics at the University of Vilnius in the USSR, will teach and present informal talks on Soviet linguistics and literature at the University during the spring term. Prof. Steponavicius's visit is being sponsored by the International Research and Exchanges Board. Persons desiring to contact him may call the Department of Slavic Languages.

Dr. Vernon V. Aspaturian, Evan Pugh professor of political science, delivered the annual James A. Gathings Lecture at Bucknell University on March 14. His topic was "Implications of USSR-US SALT Talks."

Bookshelf

An unusual analysis of values and objectives in American education is presented in a new book, *The Same Chance to Fail*, written by **Dr. Herbert S. Eisenstein**, associate professor of education at Capitol Campus.

Published by University Press of America, the book is a report on a mini-school project conducted by Dr. Eisenstein to see if a group of teachers could "work with kids during 'losers' by the system and get them to reach a level where they were eager to learn." Dr. Eisenstein also wanted to see whether his faculty of five could shed its dependence on structure and supervision.

An "open space" classroom where the children could move about easily was used, but the students' freedom of movement was restricted by their teachers' inability to break with academic formulas, Dr. Eisenstein reports.

A member of the faculty since 1968, Dr. Eisenstein holds a doctorate in higher education from SUNY-Buffalo.

A new book of poetry by **Dr. Rio Preisner**, professor of German, has been published by Konfrontace, a Zurich publishing house that handles the works of Czechoslovakian exiles. The book is entitled *ODSTUP*, which means distance, and is written in Czech. It is the third book of poetry Dr. Preisner has published, and the second written since he left his homeland in 1968.

The poems deal with distance on several levels — distance from the world in the biblical sense, alienation in the existential sense, and distance from one's homeland. The illustrations are by Jan Koblasa, and the poems were written in State College during 1974 and 1975.

Dr. Preisner, who spent two and a half years in a work camp because of his political affiliations, left Czechoslovakia during the Soviet crackdown in 1968. He went first to Austria, and a year later came to Penn State.

Dr. Barry Voight, associate professor of geology, is the editor of the first volume of a two-volume work, *Rockslides and*

Avalanches, just published by Elsevier Scientific Publishing Company, New York, N.Y. The first volume is entitled *Natural Phenomena*.

In addition to editing the first volume, Dr. Voight also authored the chapter, "Lower Gros Ventre Slide, Wyoming, U.S.A.," and co-authored two others, "Rockslides and Avalanches: An Introduction" and "Transported Rocks of the Taconite Zone, Eastern North America."

Dr. John W. Slocum Jr., professor of organizational behavior, and **Dr. Don Hellriegel**, of Texas A & M, have published a revised edition of their book, *Management: Contingency Approaches*. The book was published by Addison-Wesley and is intended for use in introductory management courses.

Obituaries

Adrian Osborn Morse, who retired in 1956 as provost emeritus, died Jan. 28.

Mr. Morse was appointed executive secretary of the University in 1929 by then-president Ralph Dorn Hetzel. In 1935, he was named assistant to the President in charge of resident instruction, and in 1951, he became provost of the University. He served also from 1951 to 1954 as assistant secretary of the Board of Trustees.

Born in New Haven, Conn., Mr. Morse received a B.A. from Yale University in 1918 and ten years later an M.A. from the University of New Hampshire, where he was executive secretary and dean of men. Temple University in 1956 awarded Mr. Morse the honorary doctor of laws degree.

Following his retirement from Penn State, Mr. Morse was named chief cultural affairs officer of the U.S. Information Agency in India. Returning to New Hampshire in 1958, he spent seven years teaching at New England College in Henniker, N.H., and nine more years as an administrator at Notre Dame College in Manchester, N.H.

Don A. Trumbo, professor of psychology, died March 5 at the age of 49. A member of the faculty since 1967, he was a native of Grand Leach, Mich. He earned his B.A. at Western Michigan University, and his M.A. and Ph.D. from Michigan State. His research interests lay in the field of applied experimental psychology, particularly in the area of skills performance. He was also interested in industrial-organizational psychology and was co-author of the book, *The Psychology of Work Behavior*. He was named an H. Thomas Hallows fellow in 1975 and was a NATO senior scientist faculty fellow in England and the Netherlands in 1971 and a NATO visiting lecturer in the Netherlands in 1972-73. Prior to coming to Penn State, he was a professor of psychology at Kansas State University.

Jesse L. McManes, associate director of student aid at the University, died March 1. A native of Mather, Pa., he was 47 years old. Mr. McManes began working at Penn State as assistant to the director of student aid in 1966.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

◀SPEAKEASY

A buffet lunch is available daily in the Club's Speakeasy Lounge (above left), and the hallway leading to it (top left) offers a quiet spot to talk. Upstairs (top right) there are books and newspapers in the lounge. Members use the semicircular Fireplace Lounge on the first floor (above right) for both private parties and University functions.

Faculty Club

(Continued from page 1)

and different colleges, and that's what this club is all about. A faculty club should be a place where people in the University community get to know each other across ranks and colleges. It should take people out of their disciplines and enlarge their intellectual breadth by bringing them into contact with exciting discussions in fields other than their own.

"And I think these parties are helping to accomplish this."

Dr. East has been especially heartened by a recent growth in the club's membership rolls. The decision to institute a sliding scale for dues has brought in more young faculty.

"We need 700 members to be viable, and we already have 608," she noted.

"With 700, we can generate enough dues income to cover overhead items such as heat, light and clerical expenses.

"At the same time, we must also generate an average monthly income of \$12,000 from food service. That means our spring and fall volume must be higher because during winter and summer terms we do less business.

"It's only going to work out if the present members of the club use it. We have a number of members who joined because they believed in the concept of a faculty club but who don't take advantage of its facilities."

One persistent problem for the club has been the lack of a liquor license — a problem which its officers and board have now decided to turn into an advantage.

"The Faculty Club is a more economical place to entertain," Dr. East explained. "If you're holding a party — large or small — in a rented facility, supplying your own liquor will save you money. There's absolutely no markup."

Dr. East recalled a recent phone call from a professor whose daughter was

being married and who wished to know what it would cost to hold a wedding reception at the Faculty Club. When he found out, he joined.

Indeed, the catering service has proved to be the club's greatest financial success.

There are at least two or three parties weekly in the building. In addition, a group of University retirees has regular Monday luncheon meetings at the club, and the Comp Lit luncheon and talk is held there Tuesdays.

"The location is convenient, there's free parking, and the club is attractive," Dr. East pointed out.

To assure that the club lives within its means, the officers and board are taking a hand in its running. (The present manager is only in charge of food and beverage service.) Club vice-president Robert L. Clewett is a professor emeritus of business administration, and he devotes three to four hours of his time each day to the club. Dr. East estimates she is currently

spending 50 percent of her time on club business.

"But consistent management is essential right now," she explained. "We have brought the club's finances under the board's control."

What impels Dr. East — and many other devoted persons — to put so much time and effort into Faculty Club Affairs?

"I don't know how this will look in print," she said, "but basically I feel that there is both a dignity and a responsibility in being a member of the Penn State faculty. Belonging to the Faculty Club intensifies that feeling."

"And when you talk to people who use the club, most of them feel pretty good about it. I hope enough people who feel that way will come forward to keep it going."

University Park Calendar

SPRING TERM 1978

Thursday, March 16

'Tis the Luck of the Irish Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.
Colloquy film, *All the President's Men*, 7 and 9:30 p.m., HUB assembly hall.
Artists Series, Goldovsky Grand Opera Theatre, *La Boheme*, 8:30 p.m., Eisenhower Auditorium.

Intarnatural sports: women's and coed basketball (round robin), coed bowling (round robin), women's badminton singles, doubles, and coed doubles (single elimination); men's graduate student and faculty/staff handball doubles (round robin), badminton (round robin), entry open. Entry close, noon, March 17.

HUB Craft Center class registration, through March 19, noon-5 and 7-10 p.m., except Saturday, 10 a.m.-6 p.m., Room 312 HUB.

Friday, March 17

Board of Trustees meeting, at Hershey.
'Tis the Luck of the Irish Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.
Astronomy Open House, 7-10 p.m., Davey Lab. Cloud date, March 18. See Saturn, Jupiter and the first quarter moon.

Colloquy film, *All the President's Men*, 7 and 9:30 p.m., Room 111 Forum.

International Council Lecture. Dr. H. Barakat on "Palestinian People in Occupied Territory," 7:30 p.m., Room 112 Kern.

University Model United Nations, "The Problem of Southern Rhodesia," 8 p.m., HUB assembly hall. Ambassadors James Murray, deputy permanent representative of the United Kingdom to the U.N. and Kasuka Mutukwa, deputy permanent representative of Zambia to the U.N. will speak.

Saturday, March 18

Board of Trustees meeting, at Hershey.
University Model U.N., "The Problem of Southern Rhodesia," general debate, 9 a.m.-noon and 2-5 p.m., Rooms 225 and 323 HUB.

Synchronized Swimming meet, 1 p.m., Natsatorium.

Colloquy film, *All the President's Men*, 7 and 9:30 p.m., Room 111 Forum.

New German Cinema, Werner Herzog, *The Enigma of Kasper Hauser*, 7 and 9 p.m., Room 112 Kern.

Pennsylvania Vocal Ensemble, 8:30 p.m., Eisenhower Auditorium.

Sunday, March 19

University Chapel service. Jack Lewis, Cornell United Religious Work, Cornell University, 11 a.m., Eisenhower Chapel.

Free U Registration, 1-6 p.m., HUB ballroom. Shaver's Creek Nature Center, Maple Sugaring Program, 1:30-4 p.m., Forestry Camp, Stone Valley.

University Model U.N. "The Problem of Southern Rhodesia," concluding session, 2-5 p.m., Rooms 225 and 323 HUB.
Colloquy film, *All the President's Men*, 7 and 9:30 p.m., Room 111 Forum.
Artists Series, Jerry's Irish Cabaret of Dublin, 8:30 p.m., Eisenhower Auditorium.
Penn State Glee Club and Women's Glee Club of Lehigh University, 8:30 p.m., Music Bldg. recital hall.

Week of March 20

Monday, March 20

Intarnatural sports: coed softball (single elimination), entry open. Entry close, noon, March 23.
Last date for May graduates to activate diploma cards in Registrar's Office and to pay these fees at Bursar's Office.
STS Graduate School Public Lecture. Bishop John A. T. Robinson, Trinity College, Cambridge, on "Truth is Two-Eyed: A Model for Holding Together Insights of East and West," 4 p.m., Room 112 Kern.
Shakespeare film, *Richard III* (Oliver), 6:30 p.m., Room 101 Chambers.
Cinematheque, Hawks, *Red River* (1948), 7 and 9 p.m., HUB assembly hall.
New German Cinema, *The Enigma of Kasper Hauser*, 7 and 9 p.m., Room 112 Kern.
Colloquy Lecture, Henry Kyemba, author, on "The Inside Story of Idi Amin," 8 p.m., Eisenhower Auditorium.

Tuesday, March 21

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Kimon Friar, translator of Nikos Kazantzakis, on "The Stone Eyes of Medusa."

History Colloquium, Edward Murray Peters, University of Pennsylvania, on "The Societal Implications of the Medieval Concept of Infamy," 2:30 p.m., Room 124 Sparks.

Human Development Lecture. Sulak Sivarakas, University of Toronto, on "The Influence of Buddhism and Non-Violent Action on Social Change in Thailand," 3:30 p.m., Room S-131 Henderson.

Engineering, Honorary Lecture. John J. McKetta, University of Texas, Austin, on "The U.S. Energy Problem — America's Achilles Heel," 4 p.m., Room 105 Forum.

English Colloquium, Kimon Friar, Ohio State University, on "The Spiritual Odyssey of Nikos Kazantzakis," 8 p.m., Room 101 Kern.

Shakespeare film, *Richard III* (Oliver), 6:30 p.m., Room 101 Chambers.

Comp. Lit. film, *Loneliness of the Long Distance Runner*, 7 and 9 p.m., Room 112 Kern.

English Colloquium, Kimon Friar, Ohio State University, on "The Spiritual Odyssey of Nikos Kazantzakis," 8 p.m., Room 101 Kern.

Wednesday, March 22

Commonsplace Theatre, *Spartacus*, 7:30 and 9:30 p.m., Room 112 Kern.

Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, March 23

Proposal deadline for Penn State 1978-79 Research Initiation Grants Program. For information, telephone your Administrative Committee on Research Dean.

Friday, March 24

Add deadline.
Sports: men's gymnastics, NCAA Midwest Regionals.

Saturday, March 25

france-cinema, Truffaut, *Wild Child*, 7 and 9 p.m., Room 101 Kern.
Free U Spring Play, James Thurber, *Many Moons*, 8 p.m., Room 101 Kern.

Sunday, March 26

University Chapel service. Easter Concert by All-Faith Choir, Tommie Irwin, director, 11 a.m., Music Bldg. recital hall.

Free U Spring Play, *Many Moons*, 1 p.m., Room 112 Kern.

Shaver's Creek Nature Center, Weather With-out Instruments, 2-4 p.m., Mineral Industries Camp, Stone Valley.

france-cinema, *Wild Child*, 7 and 9 p.m., Room 112 Kern.

Week of March 27

Monday, March 27

Intarnatural sports: men's graduate student and faculty/staff tennis doubles (single elimination), slow pitch softball (round robin), 5 man soccer teams (round robin), entry open. Entry close, noon, March 30.

IAHS Illustrated Lecture. Jane Fawcett, architectural historian, on "The Philosophy of Restoration: Changing Attitudes 1550-1977," 4 p.m., Room 302 Engineering Unit D.

Shakespeare film, *A Midsummer Night's Dream* (Riggall), 6:30 p.m., Room 101 Chambers.

Cinematheque, Stevens, *Shane* (1953), 7 and 9 p.m., HUB assembly hall.

france-cinema, *Wild Child*, 7 and 9 p.m., Room 112 Kern.

Tuesday, March 28

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Jane Fawcett, architectural historian, on "Queen Victoria's Taste."

Shakespeare film, *A Midsummer Night's Dream*, 6:30 p.m., Room 101 Chambers.

Faculty Newcomers Women's Club Fashion Show and Reception, 7:30 p.m., HUB north lounge.

German Department Lecture. Theodore Anderson, Stanford University, on "Niebuhrigenheit," 7:30 p.m., Room 101 Kern.

Comp. Lit. film, *The Leopard*, 8 p.m., Room 112 Kern.
Artists Series. Lloyd Mills, *A Sailor Made Man and Grandma's Boy*, 8 p.m., Eisenhower Auditorium.

Wednesday, March 29

Commonsplace Theatre, *Harry and Tonto*, 7:30 and 9:30 p.m., Room 112 Kern.

Claremont Woodwind Quintet, 8:30 p.m., Music Bldg. recital hall.

Friday, March 31

Pass/fail deadline.
Shaver's Creek Nature Center, Timberdoode Walk, 6 p.m., Mineral Industries Camp, Stone Valley.

france-cinema, Polanski, *The Tenant* (in English), 7 and 9 p.m., Room 112 Kern.

A. Dixon Johnson Memorial Lecture in Science Communication. Carl Sagan, Cornell University, on "Public Understanding of Science," 8 p.m., place to be announced.

Saturday, April 1

Last date for May graduates to deliver doctoral theses to committees.

france-cinema, Bunuel, *Discreet Charn of the Bourgeoisie*, 7 and 9 p.m., Room 112 Kern.

Sunday, April 2

University Chapel service. Thomas W. Courtney, speaker and author, State College, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Reptiles Program, 2 p.m., Mineral Industries Camp, Stone Valley.

france-cinema, Polanski, *The Tenant* (in English), 7 and 9 p.m., Room 112 Kern.

Artists Series, New York Renaissance Band, (rescheduled), 8:30 p.m., Eisenhower Auditorium.

Week of April 3

Monday, April 3

Pass/fail deadline.
London Bus tours start, 1:30 and 2:30 p.m., weekdays throughout term, HUB main entrance.

Cinematheque, Wellman, *Orson Incident* (1943), 7 p.m.; Peckinpah, *The Wild Bunch* (1968), 9 p.m., HUB assembly hall.

france-cinema, *Discreet Charm of the Bourgeoisie*, 7 and 9 p.m., Room 112 Kern.

Philip Pettra, piano, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 4

Drop deadline.
Pass/fail deadline.
Course repeat deadline.

Pre-registration deadline for summer term 1978.

Last date for written foreign language examinations (other than French and Spanish) for advanced-degree candidates.

Fixed date for meetings involving Commonwealth Campus faculty.

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Algeria Bendelac, French, Schuyllink Campus, on "Problems of the South."

france-cinema, *The Tenant*, 7 and 9 p.m., Room 112 Kern.

English Colloquium, Kenneth Thigpen, English, on "Killing the Fatted Calf: Critical Problems in the Study of Folk Narrative," 8 p.m., Room 101 Kern.

Wednesday, April 5

Commonsplace Theatre, *The Last Detail*, 7:30 and 9:30 p.m., Room 112 Kern.

Artists Series, American Film Theatre, *Pinter, The Homecoming*, 8 p.m., Eisenhower Auditorium.

Thalia Trio, 8:30 p.m., Music Bldg. recital hall.

Friday, April 7

New German Cinema, Werner Herzog, *Aguirre, the Wrath of God*, 7 and 9 p.m., Room 112 Kern.

Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Artists Series, Speculum Musicae, 8:30 p.m., Eisenhower Auditorium.

Saturday, April 8

Last date for final oral doctoral examinations for May graduates.

Last date for May graduates to deliver master's theses or papers to advisers.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 9

University Chapel service. Dr. Gayraud S. Wilmore, Colgate Rochester/Bekley Hall, Crozer, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, History Program, 2 p.m., Mineral Industries Camp, Stone Valley.

Artists Series, Lynn Harrell, "cellist, 8:30 p.m., Eisenhower Auditorium.

Week of April 10

Monday, April 10

Cinematheque, Penn, *Little Big Man* (1970), 7 and 9 p.m., HUB assembly hall.

New German Cinema, *Aguirre, the Wrath of God*, 7 and 9 p.m., Room 112 Kern.

Ezra Laderman Festival, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 11

Friends of the Museum of Art Gallery Talk. John Cushion, Victoria and Albert Museum, London, on "English Tin-Glazed Earthenware," 10:30 a.m., Museum of Art.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Edmund Bendure, literature, Universidad Nacional de San Marcos, on "APRA Literary Connections."

Comp. Lit. film, *Rules of the Game*, 7 and 9 p.m., Room 112 Kern.

Gallery Talk. William Christenberry, Corcoran School of Art, Washington, D.C. will discuss his own work, 8 p.m., Zoller Gallery.

Ezra Laderman Festival, 8:30 p.m., Music Bldg. recital hall.

Wednesday, April 12

African Studies Forum. Dr. Okete J. E. Shiroya, Kenyatta University College, Nairobi, Kenya, on "The Development of Modern Education in East Africa: Problems and Prospects," 7:30 p.m., HUB assembly hall.

Commonsplace Theatre, *Paton*, 7:30 and 9:30 p.m., Room 112 Kern.

PSU Percussion Ensemble, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 13

History Colloquium, Okete Shiroya, Jomo Kenyatta University College of Nairobi, Kenya, on "The Development of Nationalism in Colonial Kenya," 2:30 p.m., Room 124 Sparks.

Let's Have a Spring Fling Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.

Central Pa. Society of the Archaeological Institute of America, Rev. John Wilkinson, Lehigh, England, on "A New Temple: The Church of the Holy Sepulchre in Jerusalem," 8 p.m., Room 101 Kern.

Friday, April 14

Let's Have a Spring Fling Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.

Un-Common Theatre, *Pierre Pathelin*, 8 p.m., Room 102 Kern.

Artists Series, Cleveland Quartet, 8:30 p.m., Eisenhower Auditorium.

Saturday, April 15

Shaver's Creek Nature Center, Youth Leaders Workshop (by registration only — 865-1851), 9 a.m.-noon, Stone Valley.
College of Earth and Mineral Sciences Open House, 1-5 p.m., Jobbes of Mineral Industries Bldg., Dike and Walker.
Un-Common Dinner Theatre, *Pierre Pathelin*, 6:30 p.m., Room 102 Kern.
france-cinema, *Bergman, The Magic Flute*, 7 and 9 p.m., Room 112 Kern.

Sunday, April 16

University Chapel service, Dr. Joseph Sittler, Lutheran School of Theology, Chicago, 11 a.m., Eisenhower Chapel.
College of Earth and Mineral Sciences Open House, 1-5 p.m., Jobbes of Mineral Industries Bldg., Dike and Walker.
Shaver's Creek Nature Center, Spring Ecology Walk, 2-4 p.m., Mineral Industries Camp, Stone Valley.
Un-Common Dinner Theatre, *Pierre Pathelin*, 6:30 p.m., Room 102 Kern.
france-cinema, *The Magic Flute*, 7 and 9 p.m., Room 112 Kern.

Week of April 17

Monday, April 17

Intamaral sports: women's golf (single elimination), women's track and field (open), entry open. Entry close, noon, April 20.
E. A. Day Memorial Lecture in Food Science, Georg Borgstrom, Michigan State University, on "Neglected Aspects of the World Food Problem," 11 a.m., Room 112 Kern.
Shakespeare film, *Hamlet* (Oliver), 6:30 p.m., Room 101 Chambers.
Cinematheque, Huston, *The Maltese Falcon* (1941), 7 and 9 p.m., HUB assembly hall.
Color-Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, April 18

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. James A. Brundage, University of Wisconsin, Milwaukee, on "The Church's Attitude Towards Sex and Pornography," france-cinema, Robert, *War of the Buttons*, 7 and 9 p.m., Room 112 Kern.
Artists Series, Keaton films, *The Blacksmith and Our Hospitality*, 8 p.m., Eisenhower Auditorium.

English Colloquium, Augustus Kolich, English, on "Uses of Autobiography in the Contemporary Novel: Fictionalized Recall and Frank Conroy's *Stop-Time*," 8 p.m., Room 101 Kern.

Wednesday, April 19

5:00 o'clock Playwright's Theatre, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.
Nads Synchronized Swim Show, student preview, 7 p.m., Natatorium.
Commonplace Theatre, *The Conversation*, 7:30 and 9:30 p.m., Room 112 Kern.
Musica da Camera, chamber music, 8:30 p.m., Music Bldg. rectal hall.

Thursday, April 20

Faculty Women's Club Spring Luncheon, 11:30 a.m., HUB. Barbara McKibben, Distinguished Alumna, editor of *Vogue Magazine*, on "Report on What to Wear with What and a Look at Summer's New Clothes."
5:00 o'clock Playwright's Theatre, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.
Nads Synchronized Swim Show, 8 p.m., Natatorium.

Friday, April 21

5:00 o'clock Playwright's Theatre, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.
Nads Synchronized Swim Show, 8 p.m., Natatorium.
PSU Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. rectal hall.

Saturday, April 22

Shaver's Creek Nature Center, Adventure Series (by registration only — 865-1851), for children ages 7 and up, 10 a.m.-3 p.m., Stone Valley.
Phi Psi 500, noon.
Nads Synchronized Swim Show, 8 p.m., Natatorium.

Sunday, April 23

University Chapel service, Dr. George Jones, Office of Religious Programs, Ball State University, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Streams and Valleys, 2-4 p.m., Stone Valley.
france-cinema, Malle, *Elevator to the Gallows*, 7 and 9 p.m., Room 112 Kern.

Week of April 24

Monday, April 24

Last date for May graduates to deliver theses to Graduate School Office.
Last date for Departments to certify to Graduate School completion of required papers for May graduates.

Shakespeare film, *Hamlet*, 6:30 p.m., Room 101 Chambers.
Cinematheque, Dmytryk, *Murder, My Sweet* (1944), 7 and 9 p.m., HUB assembly hall.
france-cinema, *Elevator to the Gallows*, 7 and 9 p.m., Room 112 Kern.

Tuesday, April 25

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Archy Allen, classics, will speak.
Comp. Lit. film, *Long Day's Journey into Night*, 7 and 9 p.m., Room 112 Kern.
English Colloquium, John Bellamy, Carleton University, Ottawa, on "The Medieval Literature of Crime," 8 p.m., Room 101 Kern.

Wednesday, April 26

france-cinema, *The Death, Blue Water, White Death*, 7:30 and 9:30 p.m., Room 112 Kern.
Artists Series, Barry Snyder, pianist, 8:30 p.m., Music Bldg. rectal hall.

Thursday, April 27

History Colloquium, Gerald G. Eggert, PSU, on "Historians, Liars, and Damned Statistics," 2:30 p.m., Room 101 Kern.
Phi Kappa Phi annual banquet and initiation, 5:30 p.m., HUB ballroom.
Shakespeare film, *Hamlet* (Williamson/Richardson), 6:30 p.m., Room 101 Chambers.

Saturday, April 29

Little International Livestock Show, 8 a.m.-4 p.m., Ice Pavilion.
Shaver's Creek Nature Center, Youth Leaders Workshop (by registration only — 865-1851), 9 a.m.-noon, Stone Valley.
france-cinema, Robert, *The Return of the Tall Blond Man*, 7 and 9 p.m., Room 112 Kern.
Penn State Singers, 8:30 p.m., Music Bldg. rectal hall.

Sunday, April 30

University Chapel service, Dr. Samuel DeWitt Proctor, education, Rutgers University, and pastor, Abyssinian Baptist Church, New York, 11 a.m., Frizzell Room, Eisenhower Chapel.
Shaver's Creek Nature Center, Spring Wildlife Walk, 2-4 p.m.; Bees, 3-4:30 p.m., Mineral Industries Camp, Stone Valley.

Week of May 1

Monday, May 1

First day for signing summer term NDGL and University Long Term Loans, Room 108 Shields.
Cinematheque, Lang, *The Big Heat* (1953), 7 p.m.; Hawks, *The Big Sleep* (1946), 9 p.m., HUB assembly hall.
Priestly Lecture, Paul Berg, Stanford University Medical Center, will speak, 8 p.m., place to be announced.
Faculty Wind Ensemble, 8:30 p.m., Music Bldg. rectal hall.

Tuesday, May 2

Fixed date for meetings involving Commonwealth Campus faculty.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Leon Lyday, Spanish, on "Flores y Papel."

English Colloquium, Elmer Borklund, English, on "Some Modern Critical Myths," 8 p.m., Room 101 Kern.

History of Photography Week Lecture. Gail Buckland, former archivist of the Royal Photographic Society of Great Britain, on "William Henry Fox Talbot, Inventor of Photography," 8 p.m., Room 101 Kern.
Priestly Lecture, Paul Berg, Stanford University Medical Center, will speak, 8 p.m., place to be announced.

Wednesday, May 3

Commonplace Theatre, *Mean Streets*, 7:30 and 9:30 p.m., Room 112 Kern.
Artists Series, American Film Theatre, Genet, *The Maids*, 8 p.m., Eisenhower Auditorium.
History of Photography Week Lecture. Nachum T. Gidal, writer and photojournalist, on "My Life in Photojournalism," 8 p.m., Room 101 Kern.

Priestly Lecture, Paul Berg, Stanford University Medical Center, will speak, 8 p.m., place to be announced.

University Theatre, Euripides, *Electra*, student preview, 8 p.m., The Playhouse.
Alard String Quartet, 8:30 p.m., Music Bldg. rectal hall.

Thursday, May 4

Priestly Lecture, Paul Berg will speak, 3 p.m., place to be announced.
University Theatre, *Electra*, 8 p.m., The Playhouse.
Penn State University Chorus, 8:30 p.m., Eisenhower Auditorium.

Friday, May 5

Last day for signing spring term NDGL and University Long Term Loans, Room 108 Shields.

Shaver's Creek Nature Center, Evening Pond Walk, 7 p.m., Stone Valley.
University Theatre, *Electra*, 8 p.m., The Playhouse.

Saturday, May 6

53rd Penn State Dairy Exposition, 8 a.m.-5 p.m., University Dairy Barns.
Shaver's Creek Nature Center, Early Morning Bird Walk, 8-9:30 a.m.; Wildlife Identification Workshop (by registration only — 865-1851), 9:30 a.m.-noon, Stone Valley.
france-cinema, Molinaro, *Male Hunt*, 7 and 9 p.m., Room 101 Kern.
University Theatre, *Electra*, 8 p.m., The Playhouse.

Sunday, May 7

University Chapel service, Dr. Badr Ateya, PSU, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, What's New — Young Wildlife in the Spring, 2-4 p.m., Stone Valley.
PSU Wind Ensemble, "Pop's Concert," 3:30 p.m., Arts Courtyard.
france-cinema, *Male Hunt*, 7 and 9 p.m., Room 101 Kern.

Week of May 8

Monday, May 8

Cinematheque, Yates, *Bullitt* (1968), 7 and 9 p.m., HUB assembly hall.

Tuesday, May 9

Late drop deadline.
Last date for prospective graduate students to submit completed application materials for admission to summer term.
Last date for graduate students to apply for permission to resume study in summer term.
Friends of the Museum of Art Gallery Talk. Robert Kulicke, New York designer and craftsman, will talk about jewelry, 10:30 a.m., Museum of Art.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Eric H. McCormick, Auckland University, on "Fanny Burney and Her Circle."

History of Photography Week Lecture. Heinz K. Hennich, physics and history of photography, on "Photography and Its History," 8 p.m., Room 101 Kern.
University Theatre, *Electra*, 8 p.m., The Playhouse.

Wednesday, May 10

Commonplace Theatre, If: 7:30 and 9:30 p.m., Room 112 Kern.
History of Photography Week Lecture. Lucien Goldschmidt, editor and bookseller, on "The Truthful Lens," 8 p.m., Room 101 Kern.
University Theatre, *Electra*, 8 p.m., The Playhouse.

Composers' Concert, faculty presentation of music students' compositions, 8:30 p.m., Music Bldg. rectal hall.

Thursday, May 11

History Colloquium, Roul C. van Caenegem, University of Gent, Belgium, on "Some Urban Legislation of Philippe de Alsace, Count of Flanders," 2:30 p.m., Room 124 Sparks.
It's the End of Another Year Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.
University Theatre, *Electra*, 8 p.m., The Playhouse.

Friday, May 12

It's the End of Another Year Candlelight Dinner, 4:45-7 p.m., HUB Terrace Room.
Folk and Square Dance Roundup, 7:30 p.m., Room 123 White.
Philosophy Department Dorrer Lecture. Wilfrid Sellars, University of Pittsburgh, 8 p.m., Laurel Room, Nittany Lion Inn.
University Theatre, *Electra*, 8 p.m., The Playhouse.

Saturday, May 13

Last date for submitting petition to Records Office to graduate in absentia in May.
Shaver's Creek Nature Center, Nature Workshop for Preschoolers and Parents (by registration only — 865-1851), 9:30 a.m.-noon, Stone Valley.
france-cinema, *The Sex Shop*, 7 and 9 p.m., Room 112 Kern.
University Chorus and PSU Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.
University Theatre, *Electra*, 8 p.m., The Playhouse.

Sunday, May 14

University Chapel service, Raymond Brown directs a special musical program, 11 a.m., Music Bldg. rectal hall.
Shaver's Creek Nature Center, Spring Wildlife Walk, 2-4 p.m., Stone Valley.
Penn State Glee Club, 3 p.m., Eisenhower Auditorium.

Week of May 15

Monday, May 15

Cinematheque, Friedkin, *The French Connection* (1972), 7 and 9 p.m., HUB assembly hall.

White Band concert, 7 p.m., Fisher Plaza.
Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Wednesday, May 17

Shakespeare film, *King Lear* (Brook/Scofield), 6:30 p.m., Room 101 Chambers.
Commonplace Theatre, *First Circle*, 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, May 18

Shakespeare film, *King Lear*, 6:30 p.m., Room 101 Chambers

Friday, May 19

Shaver's Creek Nature Center, Ghoules and Beasts and Things That Go Bump in the Night, 8 p.m., Stone Valley.

Saturday, May 20

Last day for signing spring term Emergency Loans, Room 108 Shields.
Shaver's Creek Nature Center, Early Morning Bird Walk, 8-9:30 a.m.; Spring Wildlife Walk, 2-4 p.m., Stone Valley.
Spring term classes end.

Sunday, May 21

Shaver's Creek Nature Center, History in the Rocks, 2-4 p.m., Stone Valley.

Week of May 22

Monday, May 22

Final examinations.

Tuesday, May 23

Final examinations.

Wednesday, May 24

Final examinations.

Thursday, May 25

Board of Trustees meeting, Room 402 Keller.

Friday, May 26

Board of Trustees meeting, Room 402 Keller.

Saturday, May 27

Commencement, 10:30 a.m. and 1:30 p.m.

Exhibits

Chambers Gallery

Donna Pavlosky, weavings, and prints by Gettysburg College students, through March 28.
Terry L. Bowie, paintings, April 3-19.
PSU Art Education Undergraduate Student exhibition, mixed media, April 24-May 16.

Earth and Mineral Sciences Museum
Open Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m. Mineral Industries Bldg.

Frost Entomological Museum

Open weekdays, 9 a.m.-noon and 1-4:30 p.m., Room 102 Patterson. Architecture of insects and related arthropods.

HUB Gallery

Jim Baker, recent photography, through March 31.
Central Pa. Elementary and Secondary School Art, May 1-20.

Kern Commons Gallery

Bud Gibbons, paintings; Grace Pilato, ceramics and porcelain; Joyce Stover, jewelry; PSU Ukrainian Club exhibit, all through March 25.
Nads ceramics, paintings and BFA print exhibit, March 25-April 8.
Jill Crowley, ceramics, March 27-April 14.
USN Combat Art of WW II, paintings, April 6-20.
Ed Leos, photographs, April 8-29.
Lydia Rodgers, patchwork and David Strineberg, jewelry, April 14-29.
Bob Bott, wall ceramics, April 22-May 6.
Susan Canavan, Esther DeRosso and Suzanne Glascock, prints and drawings and Mahin Ghanbari, ceramics, April 29-May 13.

Museum of Art

Open Tuesday-Sunday, noon-5 p.m. Tours, 1:30 p.m. on Sundays.
Faces of Spain: Goya exhibition, through May 28.

Pattee Galleries

Lending Services Lobby, Stanley Miller, photographs, through March 22.
East Corridor Gallery, Donald Brown, Rural Farm Scenes, watercolors, through March 23.

Sackett Gallery

Architectural Component of Space, architecture student drawings, photos and models, through March 23.
Basic Design and Color, 2nd year architecture students, March 24-April 7.
Richard Alden, Colored Pencil Drawings, 11:30 a.m.-1:30 p.m., Wednesdays and Thursdays, Room 401 Sackett, through mid-April.

Zoller Gallery

Sculpture student exhibition, March 18-29.
Drawing and printmaking exhibition, April 1-12.

Delayed spring term is off to a busy start

Carl Sagan to deliver Dixon Johnson lecture

Dr. Carl Sagan, author, astronomer, and seeker of extraterrestrial life, will present the first A. Dixon Johnson Memorial Lecture in Scientific Communication at the University at 8 p.m. Friday, March 31.

He will discuss "Public Understanding of Science." Tickets are required and will be available free at the Hetzel Union Bldg. March 27 and 28. The location of the lecture will be announced March 29.

A practicing astronomer as well as a science communicator, Dr. Sagan is director of the Laboratory for Planetary Studies and David Duncan Professor of Astronomy and Space Sciences at Cornell University, where he also serves as associate director of the Center for Radiophysics and Space Research. His principal research activities are in the physics and chemistry of planetary atmospheres and surfaces, in space vehicle exploration of the planets, and on the origin of life on earth. He is also known for his studies in exobiology, the emerging discipline which deals with the possibility of extraterrestrial life and the means for its detection.

Dr. Sagan has played a leading role in the Mariner, Viking, and Voyager missions to the planets, for which he received the NASA Medal for Exceptional Scientific Achievement in 1972; the international astronautics prize, the Prix Galabert, in 1973; and the NASA Medal for Distinguished Public Service in 1977. He has served as chairman of the Division for Planetary Sciences of the American Astronomical Society and as chairman of the Astronomy Section of the American Association for the Advancement of Science. Since 1968, he has been editor-in-chief of ICARUS: International Journal of Solar System Studies.

The author of more than 400 scientific and popular articles and several contributions to the *Encyclopedia Britannica*, Dr. Sagan is co-author or author of more than a dozen books. His latest book, *The Dragons of Eden: Speculations on the Evolution of Human Intelligence*, was on the New York Times best seller list for eight months.

The bicentennial A. Dixon Johnson Lecture honors the memory of the late A. Dixon Johnson, science writer and director of public information at Penn State from 1960 until his death in 1974. It is supported by a fund established by the family and friends of Mr. Johnson and the College of Science Alumni Society.

Herzog film to be shown

University Park will get its first direct exposure to the work of the young German filmmaker Werner Herzog with the screening of *The Enigma of Kaspar Hauser* on Saturday and Monday, March 18 and 20, in Room 112 Kern Bldg. Showings are at 7 and 9 p.m.

The film, which captured the Special Jury Prize at the 1975 Cannes Film Festival, recounts the story of Kaspar Hauser, who mysteriously appears one day in the 1820s in a small town in Germany after having been confined to a cellar for his first 18 years. This German "Wild Child" quickly finds his way to a philosopher-teacher and after a rapid, if bizarre, education is playing the first jazz versions of Mozart.

The film is part of the series sponsored by the Department of French.

Gibbons' show at Kern

Kern's Commons Gallery is presenting an exhibit of paintings by Charles W. Gibbons through March 25. Mr. Gibbons, an assistant professor of art at New Kensington, received his B.F.A. from the Maryland Institute College of Art and his M.F.A. from Penn State. He has exhibited in numerous galleries and at arts festivals throughout Pennsylvania and Maryland.

The Contemporary Dance Company will present its annual concert Saturday, March 18, at 8:30 p.m. in Eisenhower Auditorium. Tickets are on sale at the auditorium box office.

Glee Club presents Schubert Mass

The Penn State Glee Club and the Lehigh University Women's Choir will present a joint concert at 3:30 p.m. Sunday, March 19, in the Music Bldg. recital hall.

Featured on the program will be Schubert's Mass in A Flat Major, to be performed by the two vocal groups, soloists and members of the State College Symphony.

Performing alone, the Penn State Glee Club will sing "Hallelujah, Amen" from *Judas Macabaeus* by G. F. Handel and "Das Dörchen" and "Widerspruch" by Schubert.

The Lehigh Women's Choir will perform "Petites Voix" by Francis Poulenc.

Bruce Trinkle, associate professor of music, directs the Glee Club.

Alard concert March 22

The Alard String Quartet will present a public concert at 8:30 p.m. Wednesday, March 22, in the Music Bldg. recital hall.

Included on the program are Quartet in G Major, Opus 18, No. 2 by Beethoven; Quartet No. 2, *Intimate Letters*, by the Czech composer, Janacek; and Sextette in B Flat Major, Opus 18 by Brahms.

For the Brahms piece the Quartet will be joined by Rebecca McKee, violinist, and Bernd Wissick, cellist, both graduate assistants in the Department of Music.

Alard members are Joanne Zagst and Donald Hopkins, violinists; Raymond Page, violist; and Leonard Feldman, cellist. All are associate professors of music at Penn State.

Energy problem is engineer's topic

"The U.S. Energy Problem — America's Achilles' Heel" will be the topic of a talk by John J. McKetta at 4 p.m. on Tuesday, March 21, in Room 105 Forum Bldg. Dr. McKetta is R. P. Schuch Professor of Chemical Engineering at the University of Texas at Austin and the 1978 honorary lecturer of engineering at the University.

A member of the National Academy of Engineering, Dr. McKetta has published more than 255 articles. He is the co-author

of the 24-volume *Encyclopedia of Chemical Technology* and has authored or co-authored 17 other technical books, including the 10-volume reference, *Advances in Petrochemicals and Refining*.

He was the recipient in 1975 of The National Society to Society Award for his efforts in informing the public on the topics of energy and sensible environmental balance. In 1976, he received The Lamm Award, presented by the American Society for Engineering Education to "The Outstanding Engineering Educator in the U.S.A. for 1976."

Two UN delegates to discuss Rhodesia

Two United Nations delegates will be at the University Friday, March 17, to discuss the problem of Rhodesia and the feasibility of the recent internal settlement reached there. They will speak at 8 p.m. in the HUB auditorium at the opening session of the University Model United Nations General Assembly. The meeting is open to the public.

The delegates are Ambassador James Murray, Deputy Permanent Representative of the United Kingdom to the UN, and Dr. Kasuka Mutukwa, Deputy Permanent Representative of Zambia to the UN.

Greek author visiting

Kimón Friar, Greek translator, editor, and poet, will visit the University Park Campus as a guest of the Institute for the Arts and Humanistic Studies from Monday, March 20, to Friday, March 24. He will speak on "The Spiritual Odyssey of Nikos Kazantzakis" at an English Colloquium lecture on Tuesday, March 21, at 8 p.m. in Kern Bldg. and will talk to the Comparative Literature Luncheon group the same day.

Goya show at Museum

Twenty prints and two drawings by Francisco Jose de Goya y Lucientes are on display in the Museum of Art through May 28. The exhibition commemorates the 150th anniversary of the artist's death.

Among the prints are several from

Goya's most popular series, "Los Caprichos," published in 1799. Examples from two other print series are also represented. They are "Disasters of War," produced from 1810-1823, but first published in 1863; and "Los Disparates" or "Los Proverbios" (follies or proverbs), from the years 1815-1821.

The brush and India ink wash drawing are "Two Women Embracing" and "You Make a Mistake if You Marry Again," on loan from Princeton and Harvard Universities, respectively.

Bishop Robinson to speak

Bishop John A. T. Robinson, Dean of the Chapel and Lecturer in Theology at Trinity College, Cambridge, will deliver a public lecture at 4 p.m. Monday, March 20, in Room 112 Kern Bldg. His topics "Truth Is Two Eyed, A Model for Holding Together Insights of East and West."

Bishop Robinson captured the attention of both the secular and religious worlds some ten years ago with his book, *Honest to God*. More recently, he is the author of *The Human Face of God*, *Redating the Old Testament* and *Can We Trust the New Testament?*

His lecture is sponsored by the Science, Technology and Society Program and by the Graduate School.

Experimental group offering "The Dybbuk"

An English adaptation of *The Dybbuk* will be presented by the Experimental Theatre Company in the Pavilion Theatre March 22-25.

This adaptation by Leon Katz is a world premiere performance. It is taken from the play written in 1914 by S. Ansky and deals with the exorcism of a *dybbuk*, or dead man's spirit, from the body of a living person.

The production is under the direction of Dan Ronen, assistant professor of theatre arts.

"The purpose of the Experimental Theatre Company," explains Mr. Ronen, "is to expose the students, faculty and the general public to non-traditional theatre and plays which are not usually performed in educational or commercial theatre. It explores alternative acting techniques, new uses of space in theatre, and the active participation of the audience in productions."

Tickets will be available at the Playhouse Theatre box office starting today March 16, from 1 to 6 p.m., Monday through Saturday. Tickets are 50 cents for non-reserved seating. For further information, call the box office at 865-1884.

Seminars

Monday, March 20
Computation Center, "Document Prep./SCRIPT," (1 of 4), 7:30 p.m., Room 201 Bus Admin. Bldg.

Tuesday, March 21
Food Science, E. Mott, "Use of Enzymes in the Tenderization of Meat," 11:10 a.m., Room 201 Borland.
Computer Science/Computation Center, James Elshoff, General Motors, Warren, Michigan, on "The Use of Undefined Data Values," 1 p.m., Room 111 Boucke.
Computation Center, "Graphics," (1 of 4), 7:30 p.m., Room 105 Osmund.

Wednesday, March 22
Computation Center, "Document Prep./SCRIPT," (2 of 4), 7:30 p.m., Room 201 Bus Admin. Bldg.

Thursday, March 23
Chemistry, Larry R. Faulkner, University of Illinois, on "Electrochemical and Photochemical Processes in Organic Thin Film Layers," 12:45 p.m., Room 333 Whitmore.
Agronomy, John Grace on "Breeding for Drought Resistance in Small Grains," 3:35 p.m., Room 111 Tyson.
Computation Center, "Graphics," (2 of 4), 7:30 p.m., Room 105 Osmund.

The Committee on Admissions, Records and Scheduling is asked to prepare an informational report summarizing available admissions data and to present this information to the University Faculty Senate. The Division of Admissions, Records, and Scheduling compiled the data shown in the tables. The purpose of the report is to give the University community an indication of the type of students enrolling in Penn State.

When individuals apply for admission as freshmen to Penn State, high school grade point averages and SAT scores are used to predict the grade point average that individual will have at the end of his/her freshman year. The predicted grade point averages are then categorized into admissions categories 1 through 10 (Table 1). The equations used to predict the grade point averages in the following tables are as follows:

Nonscience: $PGPA = .61813 (HSGPA) + .00137 (SAT V) + .00063 (SAT M) - 1.9787$
 Science: $PGPA = .72227 (HSGPA) + .00114 (SAT V) + .00156 (SAT M) - 1.12926$

where PGPA = predicted grade point average, HSGPA = high school grade point average, SAT V = verbal SAT score, and SAT M = mathematics SAT score. Individuals indicate either a science or nonscience college on their application. The appropriate equation is then used to calculate that individual's PGPA.

The data in Tables 2 through 5 summarize information on baccalaureate degree freshmen entering the fall terms of 1973-1977. The number and percent of students within a range of high school grade point averages are shown in Table 2. The data suggest that the percent of students in the higher ranges of HSGPAs has increased over this five-year period. Verbal and math SAT scores are presented in Table 3. Mean scores for both sets of SAT scores have declined since 1973. The national averages for SAT V and SAT M are shown also. The numbers of baccalaureate degree freshmen entering each fall term from 1973 to 1977 in each admissions category are shown in Table 4. The data are converted to percents in Table 5. The numbers in each category are the total number for that category regardless of the prediction equation used.

Two conclusions are readily apparent. First, potential students predicting into the highest categories tend to attend University Park. Second, based on the percent of baccalaureate freshmen entering in each admissions category, the quality of PSU students has remained reasonably constant over this period. (Table 4 and 5). However, the average SAT scores over this period have declined. Since the same prediction equation was used throughout this period, the increasing HSGPA averages would tend to make the percent in each admissions category remain relatively constant.

COMMITTEE ON ADMISSIONS, RECORDS, AND SCHEDULING

Judd B. Arnold
 Brian A. Axtell
 John E. Ayers (Chairman)
 Marcus K. Davis
 William S. Decker
 E. Emory Ensore Jr.
 Warren R. Huffner
 Richard M. Lerner
 Jacqueline Schoch
 James G. Staudenmeier

Freshmen Admissions, 1973-1977

A Senate Informational Report

Table 1. The relationship of admissions category to predicted grade point average.

Admissions Category	Range of Predicted Grade Point Average
1	3.50-4.00
2	3.00-3.49

The New Copyright Law: A Senate Informational Report

Congress took 13 years to complete its revision of the nation's copyright laws. Jan. 1, 1978, was the date it became effective, although it was enacted 15 months previously. Many questions about how the law is to be enforced are unresolved, but the University will certainly endeavor to abide by its provisions.

Because of the many ambiguities in the new law, it is impossible to prepare specific uniform guidelines to cover all aspects of the law. Therefore, the University Libraries will operate for the present under some broad, general interpretive practices. A copy of the statement regarding them is appended to this report.

The faculty should understand clearly that many practices of the past may be modified. It may no longer be possible to provide certain conveniences. Teaching and research practices related to library services of the past may have to be changed to avoid liability. Every effort will be made to make this as painless as possible, but it must be understood that we are not "above the law" and must live with that fact.

This brief report cannot possibly address it all. The many questions members of the Senate and the rest of the faculty may have, now

and in the future. Faculty are invited to submit questions about the new law, as it pertains to library services, to Assistant Dean of Libraries Charles H. Ness. If signed, they will ultimately elicit an answer based on the best information available to him.

SENATE COMMITTEE ON LIBRARIES

Interim Statement for Librarians Concerning the Handling of Photocopying under the New Copyright Law (Title 17, United States Code)

The Copyright Act of 1976, a general revision of the Copyright Law of 1909, became fully effective on Jan. 1, 1978. The new law, with which we intend to comply fully, is meant to bring about a balance between the interests of

copyright owners and copyright users. It is not intended to prohibit existing practices if they are permissible under the doctrine of fair use.

The interpretation of what constitutes "fair use" as it applies to the reproduction of copyrighted materials by institutions and individuals is not entirely clear. Perhaps fair use would be violated if copies of copyrighted works or a substantial portion of such works were reproduced as a substitute for purchasing the copyrighted materials. The University Libraries acting in compliance with the law will not knowingly permit such practices. At the same time, the University Libraries will endeavor to meet the legitimate needs of the University community and will consider the following in doing so:

I. Coin-operated Photocopyers

Coin-operated photocopying machines are available to the University community as in the past. Users are cautioned that they as individuals are responsible for any infringement of the law. The following notice has been affixed to each coin-operated machine in the University Libraries: "The Copyright Law of the United States (Title 17 U.S. Code) governs the making

of photocopies of copyrighted material. The person using this equipment is liable for any infringement."

II. Copying of Copyrighted Materials by University Libraries

A. *Interlibrary Loans:* Those responsible for the operation of the whole national ILL network, including our colleagues at PSU, are faced with myriad problems which, at present, are unresolved. To date, national efforts to achieve agreement on what the law means, how it will affect universities and colleges, and how both copyright owners and users will be affected have been only of limited help to us, but it is likely that whatever happens some further inconvenience to users may be anticipated, although it is also likely that the basic purpose of the inter-library loan system will continue to be fulfilled.

B. *Reserve Use:* The University Libraries are carefully monitoring all photocopy requests for articles from copyrighted journals and portions of copyrighted books. The University Libraries may also seek to acquire reprints of assigned articles as indicated in the revised version of

(Continued on page 8)

Computation Center spring term seminars

Because many persons have stated that they were unable to attend the fall and winter term seminars of their interest, the Center will offer another series of evening seminars during the spring term. The sessions provide an informal method of learning more about the Center's services and are open to the University community. All sessions start at 7:30 p.m., and those intending to participate should notify the Center by calling 863-0422. The schedule is:

Equitable treatment

(Continued from page 1)

necessary to make a total of over \$16 million in internal budget cutbacks and reallocations.

"There has also been a sharp escalation of tuition charges to students and their families by some 60 percent over the last six years.

"For the first time in Penn State's history, we have had to raise tuition two times in an academic year, making Penn State's new tuition rate the highest of any public land-grant university in the nation.

"Penn State has the lowest State appropriation per student of any four-year public college or university in Pennsylvania. As a result, students and their families, as well as the programs offered by the University, are being hurt."

Penn State has, in effect, only three options as it attempts to deal with its critical financial problems: (1) Increased revenue from additional State appropriation support; (2) Further internal budget cutbacks; and (3) Another increase in tuition rate that already is the highest of any public land-grant university in the United States.

"We recognize the serious financial problems facing the Commonwealth," Dr. Oswald continued. "Difficult priority decisions must be made. Holding Penn State's appropriation at the same level for three consecutive years is not only harmful to the University and to those it serves, but it fails to protect the long-term investment of the Commonwealth. Higher education must remain a high priority. Other states continue to recognize this priority, despite the fact that they face many of the same economic problems."

Dr. Oswald justified the need for the Penn State appropriation request of \$125,907,000 for 1978-79. Gov. Milton J. Shapp, in his budget message on Feb. 7, recommended a State appropriation of \$106,759,000, the same amount as was appropriated for the current year and also for the 1976-77 fiscal year.

Dr. Oswald also expressed hope that considering priorities for next year the legislators would reorganize the recommendations in the Governor's budget so that higher education would receive at least the 7.2 percent increase that the Governor recommended as an average for other State operations.

WPSX Highlights

F. W. Murnau's classic film *Nosferatu*, based on Bram Stoker's book *Dracula*, will be presented Sunday, March 19, at 8 p.m. The 1922 silent picture moves the original vampire story to Germany and changes the time to the 1830s.

Turnabout offers some advice on surviving your job Monday, March 20, at 8:30 p.m. In addition to outlining the warning signs of stress on the job and identifying the ten most stressful jobs, the program also looks at the day-to-day routine of the air traffic controller, the waitress, and some factory workers.

Louis Winkler, Penn State astronomer, discusses actual sightings of unidentified flying objects that have not been explained on Tuesday, March 21, at 7:30 p.m. on **Talkabout**. In another portion of the program, J. Allen Hynek, director of the Center for UFO Studies in Evanston, Ill., discusses his research into "close encounters."

In a live, international satellite broadcast, **Terrorism: The World at Bay**, government leaders, psychologists, political scientists, and journalists from key nations assess the continuing threat of terrorism. The two-hour special can be seen Tuesday, March 21, at 9 p.m.

Work being done in artificial intelligence, a branch of computer science, has shown that some day — perhaps within the next hundred years — machines may outpace their human creators. Nova investigates the future of the "mind machines" Wednesday, March 22, at 8 p.m. Among those featured is science fiction writer Arthur C. Clarke, author of 2001: A Space Odyssey.

In 1976, Cuban athletes at the Montreal Olympics held an unofficial eighth place at the medal tables. British sportscaster Ron Pickering looks at Cuba's national sports program on Thursday, March 23, at 9 p.m. on **World**.

Copyright

(Continued from page 7)

Reserve Lists: Guidelines for Faculty. The number of articles should be kept at a minimum.

C. Entire Books: The University Libraries will not copy an entire book if copyright ownership is in doubt. In such cases, it is the responsibility of the requester to ask the U.S. Copyright Office to conduct a search of the title. Individuals are required to present documentary evidence that doubtful materials are not copyrighted when asking for an entire book to be photocopied.

D. Portions of Books: These may be copied for individual use if the amount to be copied is not "substantial." Since there is no authoritative definition of "substantial," appropriate librarians are responsible for deciding whether copying can or cannot be permitted.

E. Single Articles: Single articles from journals required for use of an individual will be copied or borrowed in photocopy form as was the practice in the past. Copyright warning notices have been included on appropriate forms and posted in areas throughout the University Libraries where photocopying is performed. There may be problems in acquiring articles through Interlibrary Loan if it appears that articles or copies of articles from any specific journal are requested so frequently that the need for a subscription is indicated. In this context, it is necessary to realize that the University Libraries at University Park and the Commonwealth Campuses represent one borrowing entity and that all requests for photocopies of a single journal article are cumulative.

Summary: The University Libraries will strive to be fair to the University Community and will continue to provide and obtain photocopies whenever such practice appears allowable. The University Libraries, however, reserve the right to refuse to photocopy any material if such action would appear to constitute an infringement of copyright under the law. A copy of the law (Title 17 United States Code) is available for use in the Document Section of the University Libraries. Neither the Library staff nor the Copyright Office is qualified to advise on definitive interpretations of the law. Questions or serious problems should be referred initially to Dean Ness.

Funding Sources

For further information,
call 865-1372

0305-10 PENNTAP has issued a request for proposals for the 1978-79 program year which begins July 1. Priority has been given to the following assistance in handling toxic substances, application of polio technology, energy conservation assistance, solid waste technology, and application of cold bottom and flyash. Mandatory 50/50 matching is no longer in force. Priority will be given to sequential proposals to augment PENNTAP funding. The proposal deadline is March 24. Contact George Speerly Jr. for details at 501 Keller, 865-0453 (Ref. F.B.F. Memo 2/9/78).

0305-21 The National Science Foundation plans to expand its support of University Industry Cooperative Research aimed at both basic and applied investigations. These cooperative projects will be encouraged throughout NSF's programs. Jointly prepared proposals with competitive proposals, jointly prepared proposals with NSF programs. Jointly prepared proposals will be given priority (Ref. NSF IRN-5).

0305-31 The Ford Foundation and the Rockefeller Foundation jointly announce a **Research Program on Population and Development Policy** with a July 1 deadline. In its eighth year, the program is aimed at closing the gap between research and policy planning. Research topics should be relevant to current population and development policy issues in the proposed country of study. The program is open to researchers at various points in their careers (Ref. FR announcement).

0305-41 The HEW National Institute of Education has announced "proposed rules" for an **Experimental Program for Opportunities in Advanced Study and Research in Education**. All grants are to be made to institutions. There are two types of projects: institutional grants for research, advanced study, and special projects for workshops, seminars, short courses, and short-term residencies for minority persons. Comments must be received by March 30 (Ref. 43FR623-38, 327878).

Meat sales begin March 24

Retail sales will resume at the Meats Lab Friday, March 24. The store carries all the retail cuts of beef, pork and lamb, butchered by students in animal industry classes. Hours are from 1:30 to 4 p.m., and the store is open each Friday during the academic term.

Pittsburgh Press applauds Choirs

For those who missed it, we reprint part of an article by Pittsburgh Press Music Editor Carl Apone, which was published in that paper Sunday, Feb. 12. It was written in connection with the appearance of the University Choirs at Heinz Hall, where they performed with the Pittsburgh Symphony Orchestra, Andre Previn conducting, in *Belshazzar's Feast*.

"For many Pittsburghers, Raymond Brown — not Joe Paterno — is the finest coach at Penn State.

"Audiences at Syra Mosque and Heinz Hall consider Brown as No. 1 because of the outstanding performances of his Penn State University Choirs. They have taken part in some of the most memorable Pittsburgh Symphony Concerts in recent years.

"These include a towering performance of Bruckner's *Te Deum* in 1969 with William Steinberg conducting and an electrifying Verdi's *Requiem* in 1975 with James Levine.

"Steinberg called the Penn Staters 'the finest I have ever conducted.' Previn said, 'The choir is sensational — a knockout, I adore working with them.' Levine, now music director of the Metropolitan Opera, rated them 'the best trained choir I have ever conducted.'"

And in his actual review of the performance, Apone added: "The contribution of this superbly trained choir last night should not be underestimated. They were a significant factor in this stirring performance. What a capacity for hurling thunderbolts. And on the other side, how expertly they mold soft phrases, express reverence and awe."

Staff Vacancies

In accordance with the University's guidelines of employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promoting may apply by calling the Employment Division, 865-1287, University, 475-1287. Applications for these staff vacancies will be received until 5 p.m., Mar. 21. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

ASSISTANT DIRECTOR (DEVELOPMENTAL PROGRAMS), STUDENT AFFAIRS — University Park. Responsible to the Director of Residential Life Programs for the overall administration and coordination of the Developmental Programs Division of Residential Life Programs. A master's degree in student personnel services or equivalent plus two to four years of directly related experience is required.

STAFF DEVELOPMENT INSTRUCTOR, COLLEGE OF MEDICINE — Hershey. Responsible to the Service Program Coordinator for planning and teaching various nursing service educational programs. Strive to increase the level of knowledge among professional staff through various programs of orientation, skill training, continuing education, and leadership training. Bachelor's degree with 1-2 years of directly related hospital nursing experience, preferably with 1 year as an instructor or diploma graduate with 2-4 years of directly related hospital nursing experience with a minimum of 2 years as an instructor preferred.

ACCOUNTANT, UNIVERSITY ARTS SERVICES — University Park. Responsible to the Manager, Eisenhower Auditorium, and Financial Officer of University Arts Services for general accounting administration of Eisenhower Auditorium, Schwab Auditorium, Recreation Hall, and used for other events. Outlets include responsibility for auditorium budgets, ticket accountability, billing auditoriums or events, ticket orders, financial reports, wage payments, petty cash fund and daily accounting operations. Bachelor's degree in business administration or equivalent and one to two years' directly related experience.

JANITOR FOREMAN — Behrend College. Responsible to the Supervisor of Maintenance and Operations for the supervision and coordination of all janitorial and custodial employees in performing required duties to meet University standards. High school education or equivalent, demonstrated competency in janitorial field, two to four years of experience in janitorial or housekeeping work. Supervisory experience highly desirable.

Penn State Intercom

President appoints awards committee

President Oswald has appointed a general committee chaired by Richard E. Grubb to coordinate the solicitation of nominations for three all-University awards — the McKay Donkin Award, the John E. Wilkinson Award for Administrative Excellence, and the Barash Award for Human Service.

As in previous years, three subcommittees will screen nominations and develop recommendations for the respective awards. Members of the Wilkinson Award Subcommittee are Doris M. Seward, chairperson, Richard E. Grubb, and Harry D. Zook. Members of the Donkin Award Subcommittee are Ray T. Fortunato, chairperson, Stuart Forth, and Philip A. Klein. Serving on the Barash Award Subcommittee are Della Durant, chairperson, Sidney Friedman, Jay Claster, Robert Hackel, Charmaine Kowalski, and Henry L. Yeagley, Jr.

Nominations for the 1978 awards are encouraged from either organizations or individuals in both the University and community, and are to be sent to Richard E. Grubb, 203-C Old Main no later than April 10. The supporting information which accompanies nominations should be as brief as possible and must emphasize those qualifications and activities relevant to the particular award for which the individual is being nominated.

A brief description of the qualifications for each award follows.

The McKay Donkin Award
The McKay Donkin Award was established in 1969 in honor of the late McKay Donkin who served as vice president for finance and treasurer of the University from 1957 to 1968. The award, which consists of a \$500 stipend and a certificate, is presented to the full time member of the faculty or staff or the retiree who has contributed most to the "economic, physical, mental, or social welfare of the faculty" of the University.

Eight faculty members to serve on Evan Pugh Selection Committee

Eight faculty members appointed by President Oswald will serve as members of the Selection Committee for Evan Pugh Professorships. They are Dr. Stuart Patton, professor of agriculture, Dr. Vernon V. Aspaturian, professor of political science, and Dr. Howard E. Morgan, professor and chairman of the College of Medicine, all current Evan Pugh Professors; Dr. Frank Danchile, professor of geochemistry, Dr. George L. Mauner, professor of art history, and Dr. Helen A. Guthrie, professor of nutrition, who were nominated by the Senate Committee on Research; and Dr. Raymond G. Ayoub, professor of mathematics, and Dr. David B. Geselowitz, professor and head of bioengineering, who were recommended by the Graduate Council. Dr. Patton is serving as chairman of the committee.

Evan Pugh Professors are appointed by the President on the recommendation of the selection committee. In addition to Drs. Patton, Aspaturian, and Morgan,

Eight a.m.

The contribution of the nominee should be for duties or services which are above and beyond his or her regularly assigned duties. Previous recipients are William G. Mather, Ernest B. McCoy, Samuel C. Blazer, Eugene Wettstone, Kenneth L. Holderman, Patricia Farrell, Lawrence Perez, and Michael R. Lynch.

The John E. Wilkinson Award for Administrative Excellence
The John E. Wilkinson Award for Administrative Excellence was established in 1970 by friends of Mr. Wilkinson, a lifelong Centre County businessman. The award, which carries a stipend of \$500, is made annually to a

(Continued on page 2)

Faculty Senate recommends tenure policy revisions

The University Faculty Senate voted at its March meeting to recommend to President Oswald that sixth-year faculty members being denied tenure be told why the negative decision was made, if they so request.

The action was taken during consideration of seven proposals submitted by the Faculty Affairs Committee and its Subcommittee on Rank and Tenure. All are in the form of recommendations to the president, and all deal with PS-23, the promotion and tenure policy.

In addition to the decision on notification of faculty members, the Senate voted to recommend that a paragraph be added to the General Criteria section of PS-23, stating that promotion and tenure are separate decisions, with promotion being based on recognized performance and tenure additionally considering long-run potential.

The Senate also voted to recommend that:

— A paragraph be added on the frequency of reviews, stating that tenure reviews will be conducted in the second year and no less often than biennially thereafter. When a faculty member receives a negative fourth-year review but no notice of termination, a special fifth-year tenure review may be requested, and in every case, there will be a sixth-year review.

— An addition be made to the section on academic appointments in the provisional period stating that, in the sixth-year reviews, department heads, at their discretion, may inform faculty members informally of the departmental recommendations during the course of the

sixth-year review. They would emphasize that no decisions reached are either final or official until the review process has been completed.

— Add to the section on provisional or pre-tenure period a paragraph stating that decisions to promote should be based on performance and scholarly achievement, rather than on time in rank. It would also state that, although the provisional appointment period is seven years, up to three years of service at another university could be granted.

The Senate returned to committee a proposal dealing with relationships among tenure review committees at the departmental, college, and university levels.

Provost Edward D. Eddy spoke against the proposal to cite reasons for negative sixth-year tenure decisions, calling it "over-regulation of what should be an individualized and human process." If periodic tenure reviews made before the sixth year included the kind of open and courageous discussion they should, Dr. Eddy said, there would be no question about the sixth year decision. He also noted that at the University of Wisconsin, which does cite reasons for final tenure denials, most of the reasons given boil down to "You didn't measure up."

"I hope we can be more honest than that, but do it before the sixth year," Dr. Eddy said.

Senator Irvin Feller, director of the Institute for Research on Human Resources, disagreed, calling the proposal a "modest effort to provide a minimum of information" to faculty members. Dr. Feller said that, currently, it is possible for a faculty member to have favorable tenure

(Continued on page 2)

Dr. Robert O. Blanchard named School of Journalism director

Dr. Robert O. Blanchard, dean and professor of the School of Communication at The American University, Washington, D.C., has been named director and professor of the University's School of Journalism, effective July 1.

He will succeed Dr. Arthur M. Barnes, who has held the position since 1969 and who will continue with the School of Journalism, engaged in instruction and research.

In announcing the appointment Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, said Dr. Blanchard has had broad experience not only in the academic field but also with newspapers and other areas of communications.

Dr. Blanchard has been at The American University since 1965, serving initially as assistant professor in the Department of Journalism, Public Relations, and Broadcasting, later as chairman of the Department of Communication, and finally as dean of the School of Communication. In 1974-75, he was president of the American Society of Journalism School Administrators.

At The American University, he was founder and chairman of the Faculty

Forum and the Urban Communication Workshop, and director of the Urban Journalism Project in District of Columbia City. He was president of the local chapter of the American Assn. of University Professors.

Prior to his appointment at The American University, Dr. Blanchard served as assistant to the dean of the Maxwell School of Citizenship and Public Affairs at Syracuse University, where he also had served two years as a teaching assistant.

Dr. Blanchard attended the University of Wyoming and completed work leading to his B.S. and M.S. in journalism at Northwestern University. His Ph.D. was conferred by Syracuse University.

Dr. Blanchard's journalistic experience has included positions with the Salt Lake City, Utah, Tribune; Helena, Mont., Independent-Record; Cheyenne, Wyo., State Tribune; and the Denver bureau of the Associated Press. He was a freelance correspondent for the Christian Science Monitor. He has been a staff member of the Office of Senator Lee Metcalf, of Montana, and a Congressional Fellow of the American Political Science Assn.

University begins new budget presentation

Editor's note: This is the first of a five-part series of excerpts from Penn State's 1978-79 Budget Presentation booklet, prepared for the state Appropriations Committee. President Oswald appeared before the House of Representatives Committee on March 10 and will appear before the Senate Committee on March 31.

INTRODUCTION

We come before the General Assembly of the Commonwealth in the midst of the most serious financial crisis in Penn State's recent history. I will not recount the traumatic events of the State budget struggle of last summer and fall, except to report that as of this writing in March, 1978, Penn State continues to carry a debt of \$47 million, resulting from the delay in payment of the 1977-78 State appropriation on a regular monthly basis. The University faces an estimated \$51 million in interest charges on these borrowed funds, an expense which represents a probable operating deficit in 1977-78. We have made cutbacks and internal reallocations of funds from academic and administrative budgets totaling over \$5.4 million in this year alone. This has placed a critical strain on Penn State's ability to continue to provide the quality programs and services to which the citizens of the Commonwealth are entitled. Moreover, for the first time in Penn State's history, we have had to raise tuition two times in one academic year, making Penn State's new tuition rate the highest of any public Land-Grant university in the nation. We have reached the point where an increasing number of Pennsylvania's young people cannot afford to attend their state university.

The Legislature attempted to recognize the need for additional funds for Penn State when it passed an appropriation bill (House Bill 1252) in December, 1977, containing an increase of two percent, or \$2,135,000. This was done in spite of one of the most difficult budget struggles in Pennsylvania history. As you are now aware, the Governor vetoed this \$2.1 million dollar legislative appropriation increase, thus making our fiscal predicament even more serious and necessitating an unprecedented second round of tuition increases and further serious program cuts.

Following two years at the same appropriation level, the Governor's budget for 1978-79 recommends continuation of that level for a third straight year. As we speak of the Governor's proposed budget we are, of course, aware of Pennsylvania's overall situation and fiscal limitations, and we are not proposing any increase in the overall magnitude of the State budget. Our basic and over-riding position throughout this document relates to the need for reassessing the priorities and for reasonable equity within this budget.

The recommended General Fund Budget for the State contains a 7.2 percent increase for the operations of State government, with none of this increase devoted to our colleges and universities. During the present year, State agencies and State-owned colleges did receive increases in their budgets. Penn State received no such increase. The cumulative two-year increase in the General Fund Budget over 1976-77 based on the Governor's budget recommendation is 15.0 percent — yet Penn State would receive absolutely none of this increase.

We believe that the current budget recommendations providing for no increase in funding for Penn State next year are tragically short-sighted. What they do, in effect, is to continue to place the burden of inflation almost entirely on the student and family. As the Commonwealth presses the state university beyond the reach of hundreds of talented youth, it penalizes itself. The present and future economy of Pennsylvania is dependent upon educated people in all walks of life.

At a time when neighboring states and the Federal government are providing substantial increases for higher education, the situation in Pennsylvania creates the mistaken public image (particularly after the passage of last year that the Commonwealth is not interested in the future of its colleges and universities and that it places a low priority on the highly trained individuals and expertise that Penn State and other institutions of higher education provide for our state. We believe that the people of this state and those who represent them in the General Assembly want to keep Penn State and other colleges and universities strong, and to keep our priorities as a Commonwealth in

balance. Every citizen recognizes the serious budget problems the Commonwealth currently faces. We are also confident, however, that the Legislature is concerned about priorities and is prepared to work toward equitable funding for the State's colleges and universities.

MEASURES TAKEN TO DEAL WITH THE FINANCIAL PROBLEM

The University has in effect only three options in dealing with its critical financial problems: 1) increased revenue through additional State support; 2) Budget cutbacks and internal reallocations; and 3) Increased revenue through tuition increases. Lacking adequate State support, the University has made extensive internal cuts in departmental budgets in order to limit tuition increases as much as possible while at the same time attempting to maintain Penn State's quality programs and services.

Increased teaching loads have been absorbed by the faculty at the same time the number of faculty members has actually decreased. Increased administrative workloads, caused in part by growing Federal and State Government regulations and reporting requirements, have for the most part been absorbed. There were 145 fewer academic personnel on Penn State's payroll in January, 1978, than there were in January, 1977.

The actual number of University employees and budget provisions in many areas have been reduced so that resources could be shifted to meet mandated cost increases and to areas of even greater need. Included are the increased costs of fuel, utilities, and other supplies and services, growing social security and retirement costs, and essential salary and wage adjustments. For example, the amount Penn State has been required to pay the State Employees Retirement System (SERS) has more than quadrupled since 1970-71. In that year, retirement costs were \$4.6 million. In 1977-78, we estimate that we will be required to pay nearly \$21 million in retirement. While the rate of increases in State Retirement costs have tapered off due to a slight reduction in the employer's contribution rate, we are now faced with significant increases in Social Security costs.

Penn State has worked to gain the fullest possible measure from every available

resource, and the history of budget cutbacks and reallocations demonstrates that commitment. In six of the last seven years, Penn State has pulled back \$16.5 million from operating budgets for allocation to areas of even greater need.

Faced with a bleak financial outlook for the current year, a hiring freeze was placed on all classes of employees in April, 1977. As a result of this hiring freeze, 121 positions in all divisions of the University were collapsed. Internal budget reductions and reallocations of \$5.4 million were made — by far the largest single-year cutback in Penn State's history.

This internal recycling of \$5.4 million in 1977-78 — necessitated by the absence of an appropriation increase — when added on top of \$11.1 million in similar efforts over the previous six years, has strained the University's flexibility for this kind of internal management. In January and February 1978, extensive planning and budgeting reviews were conducted with each administrative division of the University. The findings of these reviews show that the budget cutbacks are having severe programmatic effects. In some instances, an erosion of the quality of the University's academic programs is becoming evident. Services to students and the general public have been diminished. It is becoming increasingly difficult to attract and retain outstanding faculty — not only because recent salary adjustments have not kept pace with inflation, but also because in many cases the University is no longer able to provide appropriate levels of supporting services, including modern laboratory equipment, current library materials, and necessary supplies.

For several years, Penn State has taken many concrete measures to achieve operating economies and to minimize costs. While the University continues to review and adjust internal operating budgets, we have reached the limits of this approach. Increased State support is urgently needed to prevent further program erosion and service cutbacks.

Copies of Penn State's Budget Presentation booklet may be obtained by contacting Arthur Ciervo, Office of Public Information and Relations, 312 Old Main (phone 865-7517).

Senate

(Continued from page 1)

reviews at the departmental level and still be denied tenure at higher levels, with no reasons given.

Penn State has not given reasons for six-year tenure denial in the past, primarily for legal reasons. It is believed that such information would become fuel for legal disputes.

Dr. Philip A. Klein, professor of economics, represented the Faculty Affairs Committee in presenting the legislative proposals. He said the main interests of the committee and its subcommittee in preparing the legislation were to provide for "procedural fairness" and to include a process of accountability for decisions made.

One recurring theme in the discussion of promotion and tenure was that the two should be maintained as separate decisions. Several senators said that PS-23, as written, is ambiguous on that point in a number of places.

In other action, the Senate approved a policy on the status of students dropped from degree candidacy for failing to demonstrate proficiency in basic skills. It was prepared by the Committee on Admissions, Records, and Scheduling.

In general, the policy states that students in baccalaureate or associate degree programs must demonstrate basic writing and arithmetic skills and that those who fail to do so must demonstrate proficiency within three terms after admission to degree candidacy. Students who fail to do that will be dropped as degree candidates, but may continue as nondegree students. They can be reinstated to degree status as soon as they demonstrate the required proficiency. The complete text of the policy will be available in the Senate Record.

Senator Ernest Bergman, professor of plant nutrition, spoke briefly, noting that he has received several complaints from students on faculty violations of the University examination policies. Dr. Bergman urged the senators to remind other faculty members to observe Senate Rules 44-10, 44-20, and 45-60, which outline the examination policies.

The Senate also received an informational report on the new copyright law from the Committee on Libraries, and a summary of admissions data from the Committee on Admissions, Records, and Scheduling.

President appoints

(Continued from page 1)

member of the University's staff whose performance methods and achievements exemplify administrative excellence. Previous recipients are Paul M. Altshouse, John B. Pezzoni, Kenneth L. Holderman, Eleanor Ferguson, Harry D. Zook, Russell E. Larson, and Wayne D. Lammie.

The Barash Award for Human Service. The Barash Award for Human Service was created in 1975 by the family of the late Sy Barash. It is an annual award to a full time member of the faculty, staff, or student body who has contributed most, apart from regular duties, to human causes, public service activities and organizations, or the welfare of fellow humans.

Any full time person at the University Park Campus who meets the criteria for the award as previously described is eligible for consideration. This award carries a stipend of \$1,000. Previous recipients are Robert Welsh, Ronald Ross, and Robert H. McCormick.

Tapes given to libraries

A series of oral history tapes, concentrating on life in the State College area before 1920, has been presented to the University Libraries.

The tapes are recordings of interviews conducted by former State College Mayor Jo Hays and Dr. C. O. Williams, dean emeritus of admissions at Penn State. More than 30 interviews have been conducted since the project began in 1970, and there are still one or two to be completed.

The oral history project was supported by the Friends of Schlow Memorial Library and has long been a special interest of that group. In the early years, volunteers typed transcripts of the tapes. More recently, staff of Town & Gown, a monthly magazine, offered to prepare the transcripts in return for the privilege of publishing shortened versions of the conversations.

The first person to be interviewed was Helen Atherton Govier, the daughter of Penn State President George Atherton. Mrs. Govier and her family arrived in State College in 1882.

The interviews include a mix of town and University history, and make it possible to locate businesses, streets, and homes that no longer exist. One of the common themes is the rapid growth of both the town and the University.

In addition to the tapes and transcripts that will be available at Pattee Library, there will be a set at Schlow Memorial Library. In the future, Mr. Hays said, there will also be a set at Centre County Library in Bellefonte.

Those interviewed for the tapes that are now available at Pattee Library are: Mr. and Mrs. William G. Edwards, William H. Murtorf, Lynn Platt, Mrs. Govier, Dewey Krumine, Mr. and Mrs. Harris Olewine,

Mrs. Marion Meyer, and Fred Hartswock. Also, Frank Shutt, Mr. and Mrs. David C. Duncan, Mrs. Helen Hill, Julia Brill, Wilbur Hoy, Helen Bortoff, Mrs. John Light, Ruth Graham, and Mrs. Maude Hussey.

Deadline announced for award nominations

March 30 is the deadline for nominations for the Award for Outstanding Contribution to Pennsylvania State University Libraries. The award, consisting of a cash stipend and a Nittany Lion statue, is presented annually to a University Libraries staff member, a benefactor of the University Libraries, or a member of the University teaching faculty, administrative or research staff. Nomination forms may be obtained from John R. Kaiser, Room E309A Pattee Library, telephone 865-1858.

INTERCOM is an internal communications medium published weekly during the four terms of the class sessions of the academic community of The Pennsylvania State University.

From the Trustee Docket

March 18, 1978, meeting

Room and board rates are approved

The increase in room and board charges for next fall at the University will be 3.8 per cent.

President Oswald told the trustees that he was very pleased the University was able to hold the recommended increase below the general inflation rate. The trustees, in approving the increase, noted that residence hall operations at the University must be self-sustaining, with no tuition or State funds available for this purpose. The residence halls have accommodations for more than 15,400 students throughout the Commonwealth.

The increase approved was necessary to enable the University to meet rising costs for labor, supplies, and food. The action changes the price of a double room in campus residence halls from \$503 to \$522 per term, an increase of \$19. The rate for an academic year of three terms will be \$1,566. Single room rates will change from \$543 to \$562 per term.

The \$19 increase, it was explained, represents an increase of \$10 per term for room rental, \$7 for board, and \$2 in the counseling fee which is a part of the overall residence hall costs.

The double-room rate for graduate students increases from \$503 to \$527 for room and board and the single-room rate will be \$567. Rooms for graduate students who do not use campus dining halls will increase from \$227 to \$242 for double rooms and from \$262 to \$282 for single rooms. The room and board rates for graduate students electing to use food coupons will be \$362 for a single room and \$322 for a double room per term.

Rates for Atherton Hall apartments for graduate students at University Park have been increased by \$10 per term, bringing rentals to \$331, \$361, or \$481 per term, depending on the type of facility. Other apartments at University Park, including Eastview Terrace and Graduate Circle, and apartments at Capitol Campus, Middletown, have increased by \$5 per month, so that the new rates will range from \$115 to \$215 per month, again depending on the type of facility.

The last increase in room and board charges at the University was effective last September, and that increase, amounting to 2.4 per cent, also was substantially below the general inflation rate.

Mineral Industries to be Edward Steidle Building

The Mineral Industries Bldg. at the University Park Campus has been named the Edward Steidle Bldg., honoring the memory of the former dean of the School of Mineral Industries, now the College of Earth and Mineral Sciences.

A native of Williamsport, Dean Steidle died at Devon Aug. 6, 1977, at the age of 90. He had retired with emeritus rank in 1953, after 25 years of service.

He joined the Penn State faculty in 1928 as dean of the School of Mines and Metallurgy, and during the next 25 years, provided strong leadership in the development of a program of resident instruction, research, and continuing education that embraced all of the earth sciences. He included such then uncommon disciplines as geochemistry, meteorology, and mineral economics. "A man of vision, great energy, and appreciation of the place of minerals in the life of the modern world," is how Dr. C. L. Hosier, dean of the College of Earth and Mineral Sciences, described him in the preface to a 1966 book, *The Creation of a College*. The book details the growth of the College under Dean Steidle's guidance.

Dean Steidle's accurate foresight with regard to mineral supplies is affirmed by his 1952 book, *Mineral Forecast*, 2000 A.D.

Predicting that America would soon be faced with a demand for oil and natural gas "far in excess of their availability," he wrote that the problem "resolves itself into one of converting coal into liquid and gaseous fuels or of developing new methods of application for coal to meet the requirements of the energy use."

Under his guidance, the first two buildings of the College of Earth and Mineral Sciences — Mineral Industries and Mineral Sciences — were constructed. He saw the undergraduate enrollment grow from 144 to 590, the graduate enrollment from zero to 170, and the staff from 15 to more than 200.

He is credited with inaugurating the program of scholarship aid in the College that is now the largest in any of the University's colleges; with establishing the Earth and Mineral Sciences Library; and with beginning the College's unique collection of art depicting the mineral industries, and furthering the growth of the Earth and Mineral Sciences Museum.

Honored in 1967 as a Distinguished Alumnus of Penn State, Dean Steidle received a bachelor of science degree in 1911 and an Engineer of Mines degree in 1914, both from Penn State. In 1943, he received the honorary doctor in science degree from Alfred University.

He worked for the U.S. Bureau of Standards, served in World War I (where he was gassed, lost an eye, and received several citations), and was a member of the Carnegie Institute of Technology faculty before coming to Penn State. After his retirement in 1953, Dean Steidle helped the Turkish government reorganize the Turkish Mining Institute and then served for 14 years as chairman of the Federal Coal Mine Safety Board of Review. President Lyndon B. Johnson in 1967 commended him for his outstanding service.

The Mineral Industries Bldg., was constructed in 1929-30. Originally, it housed the entire College which now occupies an additional three buildings —

Mineral Sciences Bldg., completed in 1948; Deike Bldg., in 1966; and the Eric A. Walker Bldg., in 1977.

Reorganization approved in College of Agriculture

Separate department status was approved for the departments of dairy and animal science, entomology, poultry science, and veterinary science. The action was taken by the board in approving an administrative reorganization plan of the College of Agriculture which had been recommended by the departmental faculty involved and the College.

The reorganization eliminates the Division of Animal Science and Industry, which was a coordinating administrative unit for the four departments.

"The change," explains Dr. James M. Beattie, dean of the College of Agriculture, "will enable the College to serve more effectively its teaching, research, and public service obligations in the animal sciences. It does not eliminate any of the programs of the four departments."

Dean Beattie notes, too, that only one major, the new major of animal bioscience, was offered by the Division and this will be continued with academic responsibility remaining with the faculty identified with the major. Administrative responsibility will be with the heads of the departments of dairy and animal science, poultry science, and veterinary science.

Funding request support was major alumni effort

Support of the University's appropriation request from the State Legislature was cited as a major effort of the University's Alumni Association during 1977.

In a report to the trustees, Edward R. Book, of Hershey, Association president, said more than 20,000 members of the Alumni Association living in Pennsylvania were asked in May to express the critical need for adequate funding from the State Legislature. In October all 110,000 alumni in Pennsylvania were urged to contact their legislators in support of Penn State's appropriation request.

"In both instances," Mr. Book said, "hundreds of letters were sent to legislators by alumni and the responses were forwarded to us."

He pointed out that the Association mobilized key alumni in various areas of the State to meet with President Oswald and the presidents of Pitt, Temple and Penn to discuss ways of impressing upon the Legislators the vital needs of the state-related and state-aided institutions.

The Association, along with alumni associations at other universities, paid for the cost of advertising the "Declaration of Common Concern for our Colleges and Universities," signed by 200 prominent Pennsylvanians, in major newspapers throughout the State.

Mr. Book, who also serves as a member of the Board of Trustees, reported that the Association had an increase of almost 2,500 Life Members during the past year, bringing the Life Member total to 24,790 or 65 per cent of the total of 38,140 paid members.

Other activities cited in his report include:

- A pilot program was undertaken by the Penn State Club of Northern New Jersey in cooperation with the University's Office of Secondary School Relations to identify and recruit outstanding students. Plans are underway to expand the recruitment program to other clubs.

- An Alumni Resource Talent Bank was initiated through the University's Career Development and Placement Center. Under this program, students with questions about careers or specific job opportunities may contact alumni who have volunteered to provide information and guidance.

Land sale authorized

The trustees authorized the sale of a small parcel of land at the Shenango Valley Campus in Sharon to Medal Distributing Co., of Sharon.

In recommending approval of the transaction, President Oswald told the trustees that satisfactory arrangements will be provided for the relocation of University facilities and that the long-range interests of the University are adequately protected.

Dr. Harold R. Sargent, director of the Campus, says the land sale was a response by the University to Sharon's efforts to retain business in the city. He said that ten acres remain for future Campus needs and that assistance of the city would be expected should additional land at some later date be required.

In authorizing the sale, the trustees listed a price of not less than 41 cents per square foot. The strip of land totals about 49,490 square feet.

The sale was requested by the Sharon City Council and the Shenango Valley Campus Advisory Board.

Dr. Ikenberry is senior VP for administration

The title of the position held by Dr. Stanley O. Ikenberry has been changed from senior vice-president for University development and relations to senior vice-president for administration. The change, effective immediately, was approved by the trustees on the recommendation of President Oswald.

Dr. Oswald explained that the change was recommended to reflect more accurately the authority and breadth of responsibilities carried by Dr. Ikenberry, who also serves as professor of higher education at the University.

As the third ranking senior administrative officer of the University, Dr. Ikenberry is a member of the President's Administrative Policy Council. Although he carries principal responsibility for interpreting the University to the public, including information programs, relationships with Penn State alumni, and the development of private gift and endowment support,

Mineral Industries Bldg. has been named for the late Dr. Edward Steidle (inset).

the scope of his responsibilities also extends to the internal operations of the institution.

He serves as the University's senior planning officer, concerned with long-range planning, and along with Provost Edward D. Eddy, works closely with the University Faculty Senate on policy issues.

Dr. Ikenberry carries principal responsibility for coordination of relationships between Penn State and the University of Pittsburgh, Temple University, and other educational institutions. Related to this effort is responsibility for development of effective working relationships with the Council of Higher Education of the State Board of Education and the Pennsylvania Department of Education.

Various administrative services are within his general area of responsibility. Administrative data processing systems, as well as the University publications, central administrative records, and supportive services for the University's Board of Trustees are under the direction of the vice president for administrative services. Dr. Richard E. Grubb, who in turn reports to Dr. Ikenberry.

Dr. Ikenberry came to Penn State from West Virginia University in 1969 and has served in his present position since 1971.

Trust Fund established

To encourage the giving of private gifts, the trustees approved establishment of a Pooled Income Trust Fund.

The Pooled Income Trust Fund, according to Robert A. Patterson, senior

vice-president for finance and operations, is widely utilized by educational and other charitable organizations to encourage small private gifts.

He explained that the procedure is for a donor to irrevocably transfer assets to a qualified charity's separately maintained pooled income fund where it is invested, together with similar transfers of others.

The donor, or other income beneficiary of the pooled income funds, receives his share of the fund's earnings each year. On the income beneficiary's death, his or her payments terminate and the charity removes the true value of the donor's gift from the pooled income fund and uses it for charitable purposes. Substantial income and estate tax charitable deductions are generated by transfer to pooled income funds.

Hershey parking expanded

Construction of an additional 531 parking spaces at the Milton S. Hershey Medical Center was approved.

The trustees authorized spending up to \$385,000 to expand the parking lot and provide landscaping, lighting, and walks to the College of Medicine and the hospital entrances. No state or tuition funds will be used for the work.

The project is subject to approval by the area health systems agency, Health Resources Planning and Development, Inc.

A continuing analysis of the parking situation over the past year has shown that parking needs have exceeded available space by 250 cars a day. If approved, the project will begin in late spring and take 60 days to complete.

March 28. That meeting will be held at the Faculty Club. Membership is not required for attendance.

Mrs. Fawcett's visit to the University is sponsored by the Institute for the Arts and Humanistic Studies. During her stay she will also be lecturing in the "Women and Creativity" course being offered this term as Liberal Arts 198.

Medieval crime examined

Crime and punishment in the Middle Ages, and their influence upon the shaping of modern court procedure, are the subject of an unusual course being offered for the first and only time this spring. Called *Crime, Courts, and Society in the Middle Ages*, it is sponsored by the Institute for the Arts and Humanistic Studies.

According to Dr. James Ross Sweeney, associate professor of history and the principle instructor, the course (History 198A/Medieval Studies 198) was designed on the theory that one of the best ways to study a society is to examine its methods of trying and punishing wrongdoers.

Several distinguished scholars, both from Penn State and from other universities, will lecture during the term. Among them will be internationally recognized medieval legal historian Raoul C. van Caenegem, of the Rijksuniversiteit in Gent, Belgium, who will visit the University Park Campus in May. Dr. Theodore M. Andersson, professor of German Studies at Stanford, will speak on "Crime in the old Norse Sagas," at 11:10 a.m. in Room 111 Boucke on Monday, March 27.

Anthropological films to be shown tonight

Two feature-length anthropological films will be shown at 7 p.m. this evening (March 23), in Room 402 Keller Bldg. There is no admission charge, and the public is invited.

The films are *Ramparts of Clay*, dealing with development of a village in the Algerian-Tunisian Maghreb, and *Wedding of Palo*, Knud Rasmussen's 1937 classic on

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (ext. 475-1387). Applications for these staff vacancies will be received until 5 p.m., Mar. 30. **DD NDT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ADMINISTRATIVE AIDE, SCIENCE — University Park. Responsible to the Dean and Assistant Head of the Department. Duties include supervision of departmental secretaries, working with budgets, extensive interactions with faculty, staff and graduate students, responsibility for the maintenance of confidential personal files, and a wide variety of other responsibilities. Position requires a person who can operate well under frequent pressure. High school education and two years of business school or equivalent, plus 2 to 4 years of directly related experience.

ASSISTANT MANAGER, HOUSING AND FOOD SERVICES — MCKEESPORT CAMPUS. Responsi-

ble to Manager, Housing and Food Services — Commonwealth Campuses for assisting in supervising the overall operation of the Housing and Food Service units. Associate degree in Institutional Management or equivalent, plus two years' directly related experience in food supervision.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS — BERKS CAMPUS. Responsible for the implementation and coordination of an ongoing student activities program, including planning of cultural and social activities, assisting student organizations to plan and implement activities and projects, scheduling of student activities and the use of facilities by student organizations. Responsible for master schedule and recruiting interviews; provide student information to recruiters; maintain confidential placement files; maintain follow-up records and conduct job placement service. Coordinate the part-time and summer student employment on and off campus, including placement of students under the College Work-Study Program and other campus jobs and referral of students to off-campus employment. Master's Degree in Student Personnel Administration counseling, or related field, plus up to one year directly related experience, or a Bachelor's Degree and equivalent job related effective experience of more than two years.

RESPIRATORY THERAPIST TECHNICIAN II, COLLEGE OF MEDICINE — HERSHEY. Responsible for setting up and adjusting the oxygen, inhalation therapy and ventilation equipment for patients as ordered by the physician. Perform pulmonary tests and calculate results. Assist at cardiopulmonary resuscitations. Measure and administer various drugs in intermittent positive pressure breathing treatment. A high school education plus completion of accredited training program and 1 to 2 years of directly related experience or eligible for certified Respiratory Therapy Technician or equivalent.

the Eastern Greenland Eskimo.

The showings are part of the University's Chautauqua short course on Visual Anthropology: Ethnography Through Film. Karl G. Heider, professor and chairman of the Department of Anthropology at the University of South Carolina, is the course instructor.

Choirs have openings

The University Choirs have openings for tenors and basses to perform Carl Orff's *Carmina Burana* with the Johnstown Symphony Orchestra in Johnstown on April 23 and for the 30th annual Spring Concert with the Penn State Symphony Orchestra on May 13 in Eisenhower Auditorium.

All University students, faculty, and staff are eligible for membership in the choirs.

Under conductors William Steinberg, James Levine, Andre Previn, and Michael Tilson Thomas, the choirs have performed 25 times with the Pittsburgh Symphony Orchestra. Programs have included Bruckner's *Te Deum*, Beethoven's *Ninth Symphony*, Verdi's *Requiem*, Rachmaninoff's *The Bells*, Mahler's *Second Symphony*, and Brahms's *Requiem*.

In February of this year, the choirs presented two performances of Mahler's *Second Symphony*, with Michael Tilson Thomas conducting, during the Pittsburgh Symphony's sixth annual residency at the University Park Campus. The following week, the choirs traveled to Walton for three performances of *Walton's Belshazzar's Feast*, with Andre Previn. One performance was videotaped and will be aired on the *Previn* and *The Pittsburgh* series on Sunday, April 2, over WPXS-TV.

For additional information about auditions for the choirs, visit the choir office at 212 Eisenhower Chapel or call 865-6548.

Students exhibit work

An exhibition of sculpture by University art students will continue at Zoller Gallery through Monday, March 29. The show opened last Sunday.

A number of different techniques are represented, including welding, figure modeling, and casting. All pieces were made in sculpture classes this year by Penn State undergraduate and graduate students.

According to John Cook, professor of art

and head of the sculpture option in the Department of Art, the show contains "some extraordinary works in terms of esthetic penetration and intense commitment from the artist."

Zoller Gallery hours are from 8 a.m. to 5 p.m. weekdays and from noon to 5 p.m. on weekends. There is no admission charge.

Bus tours available

Tours of the University Park Campus on the double decker London bus will be offered weekdays from April 3 through August 25, and then Mondays and Fridays only from next September 1 through November 13. The bus leaves the HUB at 1:30 and 2:30 p.m. for the 30-minute tour.

A trained guide briefs passengers and will answer any questions. Tickets are available at the HUB desk for a donation of 25 cents.

Alumni Fellows named

Six prominent University graduates have been designated 1978 Alumni Fellows.

They will visit the University at various times during April and May to meet both formally and informally with students, faculty and administrators to share their expertise and experiences.

The Fellows and their host Colleges are: — Willard F. Rockwell Jr., of Pittsburgh, chairman of the board and chief executive officer, Rockwell International, Engineering;

— Dr. Louis Rosen, of Los Alamos, N.M., director of the Los Alamos Meson Physics Facility and a participant in the development of the atomic bomb, Science;

— Samuel Gallu, of Solisbury, Pa., theatre and film writer, producer and director, and author of the play, *Give 'Em Hell, Harry!*, Arts and Architecture;

— Dr. Albert Hurwitz, of Newton, Mass., president of the International Society for Education through Art, a UNESCO affiliate and the only international professional association in art, Education;

— James Milholland Jr., of Cleveland, senior vice president for Harcourt, Brace, Jovanovich, Inc., Liberal Arts; and

— Richard Zimmerman, of Hershey, Pa., president of Hershey Foods Corporation, Business Administration.

The Alumni Fellows Program was established at Penn State in 1973. It is sponsored by the Office of the President.

(Continued on page 6)

News in Brief

Armenian dance to be topic

Tom Bozigan, a specialist in dance, will speak at 4 p.m. on Thursday, March 30, in Room 75 Willard Bldg. He will talk about his studies at the Sayat Nova

Choreographic School in Soviet Armenia.

Mr. Bozigan, who has worked with both of the Armenian state ensembles and traveled with the Ethnographic Institute of the University of Erevan, will also talk about his personal experiences while living in Armenia. The presentation will include the showing of a film, and there will be time for questions and answers after the lecture.

Inn offers Easter buffet

The Nuttany Lion Inn is planning a special Easter Buffet from 12:30 to 2:30 p.m. and from 6 to 8 p.m. on Sunday, March 26. The menu features top round of beef, seafood newburg, baked ham with brandy sauce, baked chicken-cao vin, steamed shrimp in the shell, and baked kolbasi and sauerkraut. There will be a wide array of salads, cheeses and desserts, and Chef Richard Jackson is preparing specially decorated centerpieces for the occasion. The dinner is available at regular buffet prices, \$5.95 for adults and \$2.75 for children under 12.

British editor to speak

Jane Fawcett, editor and lecturer and former Secretary of the Victorian Society of England, will be at the University for a residency March 27 and 28. Her visit includes two public talks.

Mrs. Fawcett, who has edited two volumes, *The Future of the Past* and *Seven Victorian Architects*, will speak on "The Philosophy of Restoration: Changing Attitudes 1550-1977" at 4 p.m. Monday, March 27, in room 302 Engineering Unit D. She will also address the Comparative Literature luncheon at noon Tuesday,

University Park Calendar

March 23-April 2

Special Events

Thursday, March 23
Visual Anthropology films, *Ranpans of Clay* and *Wedding of Pafo*, 7 p.m., Room 402 Keller. Free and public.
Experimental Theatre, *The Dybbuk*, 8 p.m., Pavilion Theatre

Friday, March 24
Add deadline.
Sports: men's gymnastics, NCAA Midwest Regionals.
Experimental Theatre, *The Dybbuk*, 8 p.m., Pavilion Theatre.
IAHS Lecture: Kimon Frar, visiting fellow, on "The Electra Legend," 2:20 p.m., The Playhouse.

The Hong Kong Society film, "Meng Lung Sha" (English subtitles), a story about China's south-west province, 7:30 p.m., HUB assembly hall.

Saturday, March 25
Sports: men's volleyball, vs. Ohio State, 1 p.m., Rec. Bldg; men's gymnastics, NCAA Midwest Regionals; men's and women's bowling, vs. Temple; men's tennis, vs. Michigan State, 1 p.m.

Little People's Players Spring Play, James Thurber, *Many Moans*, 3:30 and 8 p.m., Room 112 Kern. Free admission.
france-cinema, *Truffaut, Wild Child*, 7 and 9 p.m., Room 101 Kern.
Experimental Theatre, *The Dybbuk*, 8 p.m., Pavilion Theatre.

Sunday, March 26
University Chapel service: Easter Concert by All-Faith Choir, Tommie Irwin, director, 11 a.m., Music Bldg, recital hall.
Shaver's Creek Nature Center, Weather Without Instruments, 2-4 p.m., Mineral Industries Camp, Stone Valley.
france-cinema, *Wild Child*, 7 and 9 p.m., Room 112 Kern.

Monday, March 27
Intramural sports: men's graduate student and faculty-staff tennis doubles (single elimination), slow pitch softball (round robin), 5man soccer teams (round robin), entry open.
Entry close, noon, March 30.
STS-Two Cultures Dialogue, "Society's Perceptions of the Energy Problem," Rustum Roy, director, Materials Research Laboratory, will speak, noon, State College Hotel.
Commons Videotape, "The People and Foreign Policy," noon, Kern lobby.

IAHS Illustrated Lecture: Jane Fawcett, architectural historian, on "The Philosophy of Restoration: Changing Attitudes 1550-1977," 4 p.m., Room 302 Engineering Unit D.
Shakespeare film, *A Midsummer Night's Dream* (Rigg/Hall), 6:30 p.m., Room 101 Chambers.
Cinematheque, Stevens, *Shane* (1953), 7 and 9 p.m., HUB assembly hall.
france-cinema, *Wild Child*, 7 and 9 p.m., Room 112 Kern.
Cynthia Schade, flute, 8:30 p.m., Music Bldg, recital hall.

Tuesday, March 28
Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Jane Fawcett, architectural his-

torian, on "Queen Victoria's Taste," Shakespeare film, *A Midsummer Night's Dream*, 6:30 p.m., Room 101 Chambers.

Faculty Newcomers Women's Club Fashion Show and Reception, 7:30 p.m., HUB north lounge.
German Department Lecture: Theodore Adorno, Stanford University, on "Niebelungenlied," 7:30 p.m., Room 101 Kern.

Art History Lecture: Lionello Puppi, University of Padua, on "Expiation and Easman 'Charitas' in a 16th Century Paduan Building Corte Lando," 8 p.m., HUB assembly hall.
Comp. Lit. film, *The Legend*, 8 p.m., Room 112 Kern.

Artists Series: Lloyd films, *A Sailor Made Man* and *Grandma's Boy*, 8 p.m., Eisenhower Auditorium.

Wednesday, March 29
Commons Kaleidoscope, "Wines of Germany," noon, Kern lobby.
Commonsplace Theatre, *Harry and Tonto*, 7:30 and 9:30 p.m., Room 112 Kern.
Claremont Woodwind Quintet, 8:30 p.m., Music Bldg, recital hall.

Thursday, March 30
Public Lecture: Tom Bogizan on "Living in Soviet Armenia," 4 p.m., Room 75 Willard

Friday, March 31
Passifail deadline.
Sports: men's tennis, vs. George Washington, 3 p.m.
Shaver's Creek Nature Center, Timberdoodle Walk, 6 p.m., Mineral Industries Camp, Stone Valley.
france-cinema, *Polanski, The Tenant* (in English), 7 and 9 p.m., Room 112 Kern.
A. Dixon Johnson Memorial Lecture in Science Communication: Carl Sagan, Cornell University, on "Public Understanding of Science," 8 p.m., place to be announced.
Charles Noble, piano, 8:30 p.m., Music Bldg, recital hall.

Saturday, April 1

Last date for May graduates to deliver doctoral theses to committees.

Sports: men's volleyball, vs. Princeton, 1 p.m., Rec. Bldg.
france-cinema, *Sunaul, Discreet Charm of the Bourgeoisie*, 7 and 9 p.m., Room 112 Kern.

Sunday, April 2

University Chapel service: Thomas W. Courtney, speaker and author, State College, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Reptiles program, 2 p.m., Mineral Industries Camp, Stone Valley.

Sports: men's lacrosse, vs. Syracuse, 2 p.m.; baseball, vs. Bloomsburg, 3 p.m.
Dorothy Room, piano, 3:30 p.m., Music Bldg, recital hall.
france-cinema, *Polanski, The Tenant* (in English), 7 and 9 p.m., Room 112 Kern.
Artists Series: New York Renaissance Band, (rescheduled), 8:30 p.m., Eisenhower Auditorium.

Seminars

Thursday, March 23
Computer Center, "Graphics," (2 of 4), 7:30 p.m., Room 105 Osmond.

Monday, March 27
Computer Center, "Document Prep./SCRIPT," (3 of 4), 7:30 p.m., Room 201 Bus. Adm. Bldg.

Tuesday, March 28
Applied Research Lab, S.I. Hayek and J.M. Lawther, PSU, on "Effectiveness of Highway Noise Barriers," 10:45 a.m., Walker Conference Room, Applied Science.
Food Science, S. Bromall on "The Use of Naringinase as a Debiting Agent," 11:10 a.m., Room 201 Berland.

Higher Education. Dr. Helen D. Wise, a University trustee, also contributed a chapter.

Other contributors include Thomas F. Green, president of the Philosophy of Education Society; Nathan Glazer and Kenneth Tolleit of the Carnegie Commission; and Lester Thurow, economic adviser to Americans for Democratic Action.

George Mifflin Dallas: Jacksonian Patrician, by John M. Belohlavek, 223 pages, \$12.75.

Both politician and diplomat, George Mifflin Dallas left his name to cities, towns

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Computer Science/Computation Center, C. Wilkins, chemistry, Nebraska University, on "Fourier Transform Mass Spectrometry," 1 p.m., Room 111 Boucke.
Chemical Engineering, M.M. Coleman, polymer science, PSU, on "Fourier Transform Infrared Studies of Polymeric Systems," 3:45 p.m., Room 140 Fenske.
Plant Pathology, Lee Campbell on "Roots: The Origin of Plant Pathology," 3:55 p.m., Room 213 Buckout.

Computation Center, "Graphics," (3 of 4), 7:30 p.m., Room 105 Osmond.

Psychology, Roland Tharp, University of Hawaii, on "Teaching Reading to Hawaiian Children Who are Poor Readers," 8 p.m., Room 112 Chambers.

Wednesday, March 29

Computation Center, "Document Prep./SCRIPT," (4 of 4), 7:30 p.m., Room 201 Bus. Adm. Bldg.

Thursday, March 30

Ceramic Science, Man F. Yan, Bell Labs, on "Sintering and Grain Growth in Ferrites," 11 a.m., Room 301 Mineral Industries.
Chemistry, Perry Frey, Ohio State University, on "Stereochemical Aspects of Enzyme Action," 12:45 p.m., Room 333 Whitmore.
Agronomy, Christopher Daum on "Antagonistic Effects Between Herbicides," 3:55 p.m., Room 111 Tyson.

Pennsylvania Transportation Institute, Rail Transport, Frederick J. Beer, Transportation Systems Center, U.S. Dept. of Transportation, Cambridge, Ma., on "Railway Management and Its Relationship with Government Research," 3:55 p.m., Room 62 Willard.
Philosophy, Donald Verve, PSU, on "Categories and the Imagination," 4 p.m., Room 101 Kern.
Computation Center, "Graphics," (4 of 4), 7:30 p.m., Room 105 Osmond.

Friday, March 31

Solid State, Ronald Reifemberger, University of Toronto, on "Photoelectron Energy Distribution in Photo-Induced Field Emission," 11 a.m., Room 339 Davey.

Exhibits

Chambers Gallery: Donna Pavlosky, weavings; Gettysburg College students' prints, both through March 28.

HUB Gallery: Jim Baker, recent photographs, through March 31.

Kern Commons Gallery: Charles Gibbons, art, New Kensington Campus, paintings; Grace Pilato, comics and penicillin; Joyce Stover, jewelry; PSU Ukrainian Club exhibit, all through March 25; Nancy Straley, paintings, BFA print exhibit, both open March 25. Jill Crowley, ceramics, opens March 27.

Museum of Art: Faces of Spain: Goya prints and drawings.

Sackett Gallery: Basic Design and Color, 2nd year architecture students, opens March 24. Richard Alden, Colored Pencil Drawings, 11:30 a.m.-1:30 p.m., Wednesdays and Thursdays, Room 401 Sackett.

Zoller Gallery: Student sculpture exhibit, through March 29. Drawings and prints, opens April 1.

From the Press

Educating for Careers: Policy Issues in a Time of Change, edited by Thomas F. Powers with the assistance of John R. Swinton. 190 pages. \$12.50.

The major questions of policy in matching the nation's educational system with its employment needs are explored by 18 educators, industrialists, labor leaders, and government officials. Among the issues examined are career planning, the effects of the economic climate on career education, the use and misuse of certification and credentialism, the interface between general and career education, and the responsibilities of

various educational agencies.

Contributors include several Penn State faculty members. They are Dr. Edward V. Ellis, associate dean for continuing education in the College of Human Development; Marlowe Froke, director of the Division of Media and Learning Resources; Continuing Education, Dr. Edwin L. Herr, head of the Department of Counselor Education; Dr. Gary P. Johnson, associate professor of education; Dr. Henry C. Johnson, Jr., professor of education; Dr. Morgan V. Lewis, senior research associate, Institute for Research on Human Resources; Dr. Peter B. Meyer, associate professor of economic planning; and Dr. William E. Toombs, assistant director of the Center for the Study of

and counties in ten different states. A member of Philadelphia's social elite, Dallas controlled the Democracy of the Quaker City from the administration of James Monroe to that of Buchanan. He served as vice president under Polk and represented his country both in Russia and at the Court of St. James. Dr. Belohlavek, who teaches history at the University of South Florida, traces the successes and failures of this previously little known 19th century figure.

Penn Staters

Dr. George D. Wolf, dean of faculty at the Capitol Campus, has resigned his administrative position effective July 1, 1978, to return to full-time teaching and research. Originally appointed in 1965 as the first faculty member at Capitol, Dr. Wolf has held the position of Dean since July of 1973, following two and a half years of service as head of the Division of Humanities, Social Science and Education.

He came to the University from the Governor's Office, where he had served as a special assistant for project development to Governor William W. Scranton. The position resulted from a fellowship Dr. Wolf held with the National Center for Education in Politics while he was on leave from Lock Haven State College.

In his letter of resignation to Capitol Campus Provost Robert E. McDermott, Dean Wolf indicated that his primary reasons were related to the experience of his sabbatical leave and more regular teaching since his return from that leave a year ago. The revival of his scholarly writing interests as well as his closer contacts with students influenced him most, Dr. Wolf said.

A professor of American studies and history, he recently completed a biography of William W. Scranton. Dr. Wolf plans to write a political novel and a history of the Scranton gubernatorial years, in addition to teaching American history and politics.

Three engineering faculty members received Excellence in Teaching Awards during the recent Engineers' Week banquet. They are **Michael G. Abdalla**, assistant professor of general engineering, **Dr. Frank W. Schmidt**, professor of mechanical engineering, and **Dr. Jerry L. Goodrich**, instructor in industrial and management systems engineering. The awards were sponsored by the Penn State Engineering Society, the alumni group of the College of Engineering.

Mr. Abdalla was honored as the faculty member who has taught primarily in the first two years of the baccalaureate program; Dr. Schmidt as the senior faculty member who has been on the Penn State faculty for five years or more; and Dr. Goodrich as the junior faculty member who has taught at Penn State for at least two years.

The three were selected by a committee appointed by Dean Nunzio J. Palladino. In making its selection, the committee reviewed results of an effectiveness teaching survey conducted by the Dean's office and the recommendations of faculty and students.

Dr. Harry R. Allcock, professor of chemistry, recently presented an invited colloquium lecture at The University of Maryland. His talk was entitled "Phosphazene High Polymers — Macromolecules with a Difference."

Dr. Nuri Mohsenin, professor of agricultural engineering, recently presented a seminar at North Carolina State University on the topic, "Food Physics — A New Service Course for Agricultural and Food Scientists." It is the first of a series of seminars and short courses Dr. Mohsenin plans to present at a number of universities, both in this country and abroad, over the next several months.

Dr. Ernest A. Harrison, Jr., associate professor of chemistry at the York Campus, recently presented a lecture to faculty members and graduate students in the University of Maryland's Department of Chemistry, Organic Division. Dr. Harrison summarized his research on the preparation and chemistry of a novel class of cyclic organic compounds.

Dr. Thomas E. Daubert, professor of Chemical Engineering, has been elected national president of Phi Lambda Upsilon National Honorary Chemical Society for the 1978-1981 triennium. Dr. Daubert previously has served as national editor and national secretary and is currently national vice-president.

The society was founded in 1899 at the University of Illinois and currently consists of about 40,000 members and 50 collegiate chapters at major U.S. colleges and universities. Its major object is to promote high scholarship and original investigation in all branches of pure and applied chemistry.

Two University faculty members have been appointed by the U.S. Olympic Committee to a new Sports Psychology Committee charged with studying and refining psychological factors in American sports. They are **Dr. Michael J. Mahoney**, associate professor of psychology, and **Dr. Dorothy V. Harris**, professor of health, physical education, and recreation. The committee will meet with Olympic coaches and hopefuls for the first time this summer at the first annual National Sports Festival, to be held in Colorado Springs. In addition to providing psychological counseling during the festival, they will conduct research on topics related to sports psychology and will develop resource materials for coaches and athletes. According to Dr. Mahoney, the committee sees one of its greatest challenges as encouraging a shift of emphasis from winning to enjoyment in international competition.

Dr. Yupo Chan, assistant professor of civil engineering, has been invited by the Transportation Research Board to serve on the Committee on Energy Conservation and Transportation Demand. The Transportation Board is a branch of the National Research Council's Commission on Sociotechnical Systems.

Dr. Robert Lima, professor of Spanish and comparative literature, recently delivered the 1978 Modern Literatures lecture at Villanova University under the joint sponsorship of the departments of English and Modern Languages. Dr. Lima's lecture was entitled "Damned Souls: The Devil Pact in Dramatic Literature."

Dr. Bruce M. Siegenhalter, director of the Speech and Hearing Clinic, has been named to the seven-member Certification Board of the National Society for Crippled Children and Adults, the Easter Seal Society. The board sets standards of training preparation and experience for the Society's staff on the local, intermediate and national levels.

Dr. Julian Heicklen, professor of chemistry, presented an invited talk at the Chemistry/Chemical and Environmental Engineering Seminar at Rensselaer Polytechnic Institute on March 8. He discussed "Chemical Control of Photochemical Smog."

NCAA Midwest Regionals for men's gymnastics will take place Saturday at the Recreation Bldg.

Dr. Richard C. Bradt, professor of ceramic science, presented an invited lecture at the 16th Basic Science of Ceramics meeting of the Japanese Ceramic Society held recently in Tokyo. He discussed "Structural Aspects of Subcritical (Slow) Crack Growth in Ceramics." While in Japan, Dr. Bradt presented seminars at several universities, including Tokyo Institute of Technology, Keio University, the National Defense Academy, Tokyo University, and Nagoya Institute of Technology.

Dr. Richard D. Rodefeld, assistant professor of rural sociology, has been elected to the board of directors of Rural America, a non-profit citizens organization designed to give people in rural areas and small towns a stronger voice in Washington.

Dr. John C. Harper II, professor of agronomy extension, has been named winner of the Golf Course Superintendents Association of America's 1978 Distinguished Service Award. The first Extension agronomist ever to receive this coveted award, Dr. Harper was cited for his outstanding contributions to the golf course industry in research and Extension and as an educational writer and speaker.

Appointments

Michael A. Smyer as assistant professor of human development in the division of individual and family studies at University Park (B.S., Yale U., Ph.D., Duke U. Formerly assistant to the president, Duke U.; clinical psychologist, N. Carolina.

Ruth A. O'Brien as assistant professor of nursing at University Park. B.S.N., U. of Pennsylvania; M.S.N., Case Western Reserve U.; Ph.D. candidate, New York U. Formerly assistant professor, Case Western Reserve; team leader, Community Nursing Services, Hackensack N.J. Hospital; adjunct assistant professor, Fairleigh Dickinson.

Robert Sevinsky as assistant professor of humanities at Hershey. A.B., U. of Scranton; M.A., Ph.D., Boston College.

Jay Gold as assistant professor of humanities at Hershey. B.A., St. John's College, J.D., New York U. School of Law, M.P.H., Harvard U. School of Public Health. Formerly assistant attorney general for the Commonwealth.

Walter M. Tzikowski as assistant professor of wildlife science at University Park. B.S., U. of Pittsburgh; M.S., U. of W. Virginia, Ph.D. candidate, U. of Massachusetts.

Penn State Intercom

Summer arts fare varied

Nittany Mountain Summer, the summer arts program of the University, has received a grant from the National Endowment for the Arts for audience expansion.

According to Dr. Walter H. Walters, dean of the College of Arts and Architecture and director of University Arts Services, this is the third consecutive year such a grant has been received. Nittany Mountain Summer was inaugurated in 1974, under Dean Walters' leadership, as a means of providing quality area arts programming during the summer months.

Included in this summer's offerings will be exhibitions at the Museum of Art; Festival Theatre, the summer professional theatre of the University; and Nittany Mountain Summer Spectrum, a music and dance series.

This year's Spectrum offerings will include a week's residency of the Pennsylvania Ballet and Orchestra. The residency is scheduled for July 12-15 and will coincide with the Central Pennsylvania Festival of the Arts.

Other Spectrum events will be programs by singers Gordon MacRae and Loretta Lynn, performing on June 23 and July 28 respectively; the Erick Hawkins Dance Company, a modern dance troupe,

(Continued on page 6)

Next Senate meeting is April 4

Proposed changes to the University's retention and transfer policies, dealing primarily with changes of major and academic drops by colleges, will be presented to the Faculty Senate for action when it meets at 2:10 p.m. on Tuesday, April 4, in Room 112 Kern Bldg.

The legislation was prepared by the Senate Committee on Undergraduate Instruction and its Subcommittee on Retention and Transfer after an earlier proposal was referred to the committee last spring. The earlier proposal was part of a package of legislation on the retention and transfer of students in baccalaureate degree programs. The other recommendations in the package were approved at that time.

The main points of the proposal to be presented next week appear on page 4 of this week's INTERCOM. The complete text of the proposal and an accompanying statement are available at department offices or from the Senate Office.

In other action, the Senate Committee on Admissions, Records, and Scheduling will present an informational report on six experimental admission programs implemented last year for special groups of students who do not meet all the requirements for regular admissions. Among the six are such programs as one for exceptional high school seniors and one for veterans.

On the program for high school seniors, the one for which the most information is

available, the committee will report that 1) the programs were selective (the average high school GPA was between 3.0 and 3.5); 2) the students were not enrolling in either remedial courses or in courses likely to be duplicated in a high school curriculum; 3) the students who earned GPAs below 2.00 were either counseled out of the program or elected not to continue; 4) the local campus faculty remained actively involved in monitoring the effectiveness of the programs; and 5) a substantial proportion of the participants planned to continue their education at Penn State.

When the Senate originally approved legislation authorizing the administration to experiment with special admissions programs, it specified that such programs be reviewed by the Provost and the appropriate Senate committee prior to implementation and annually thereafter. The Senate also specified that enrollments in such programs be no more than 10 percent of the total enrollments at any location and that the Senate review and approve all such programs every year.

In addition to its informational report, the committee will present legislation to ensure that future reports on special admission programs will be complete. The proposal will outline various kinds of information that should be included in every report.

The Committee on Admissions, Records and Scheduling will also

recommend a rewording of Senate Policy 34-58, which deals with course availability. In registration for popular or overcrowded courses, priority is given to students with a high term rank.

The committee's change would strengthen the recommendation that students of lower term rank, but for whom the course is a requirement, also be given priority.

The same committee will propose a change in Senate Policy 54-20, which deals with academic warning. It would specify that a student whose grade-point average drops below the 2.00 minimum cumulative average for graduation would receive academic warning, unless drop action is taken under other policies.

Under the current policy, a student at the Capitol Campus is notified as soon as his grade point average drops below 2.00, but students at the other campuses may not receive academic warning until later. The change is an attempt to unify the policy for all campuses and to give students immediate warning of their academic difficulties.

The Committee on Curricular Affairs will recommend that its membership guidelines be revised to include one faculty senator each from Behrend College, Capitol Campus, and the College of Medicine. The purpose is to ensure that one representative from each degree-granting unit of the University is on the committee.

Enrollment mix is changing

Penn State serves more students from lower-income families than do most other universities, but the trend is changing.

Dr. Stanley O. Ikenberry, senior vice-president for administration, said that data collected on the annual freshmen survey form sponsored by the American Council on Education/University of California at Los Angeles (ACE/UCLA) Cooperative Institutional Research Program may reflect the failure of State support to keep pace with inflation and the tendency to shift more and more of the cost of a college education to the student.

The study shows that more Penn State freshmen are coming from families with incomes of over \$20,000 per year.

The ACE/UCLA survey also reveals that:

- For 80 percent of the Penn State freshmen, Penn State was the first college choice.
- The primary reason Penn State freshmen decided to attend college was to "be able to get a better job." This was noted by 79 percent of the freshmen, while a year earlier only 74 percent listed it.

- Other reasons for going to college were "to learn more about things" and "to gain a general education."

Ninety-three percent of the Penn State freshmen took the college preparatory program in high school. They felt they were best prepared in the areas of history and social sciences and in the sciences.

While Penn State freshmen felt relatively confident in their mathematics preparation, this area was checked most often as the one where remedial work would be needed.

The data show, too, that Penn State freshmen tend to be younger. Eighty-nine percent of Penn State's 10,375 freshmen are 18 years of age or younger, as compared to 83 percent of freshmen in the national norm.

The national norm is based on results from 47 colleges and universities, the institutions that had the best percentage of returns among the 548 that were surveyed.

The age of the Penn State freshmen would seem to indicate they begin their college careers soon after high school graduation, whereas freshmen at other universities may tend to delay college attendance while they review employment opportunities or other alternatives to college.

A clear majority of Penn State freshmen express concern about financing their college education, the number having increased from 54 percent last year to 56 percent this year.

Twelve percent indicate financing as a major concern, but the figure is below the national norm of 15 percent. The figures, it is believed, indicate that while finances are a major concern, a significant number of students apparently are being supported through

(Continued on page 4)

Pennsylvania Ballet will be in residence July 12-15.

Penn Staters

Two faculty members in the College of Earth and Mineral Sciences were honored at the College's recent annual student and faculty awards banquet. **Dr. Ian R. Harrison**, associate professor of polymer science, and **Dr. Earle Ryba**, associate professor of metallurgy, received the College's 1978 Matthew J. and Anne C. Wilson Outstanding Teaching Awards.

The awards, which consist of \$1,000 and a plaque, are made possible by a trust fund provided for by the will of Matthew J. Wilson, of Holland, Mich., a 1918 Penn State mining graduate. Award recipients are selected by the dean of the College, from nominations submitted by students.

Dr. Marshall H. Kaplan, associate professor of aerospace engineering, has received the College of Engineering's annual award for outstanding achievement in research. The award is sponsored by the Penn State Engineering Society, the College's alumni group.

Dr. Kaplan's teaching and research interests include astrodynamics, spacecraft autopilots, satellite design, and propulsion. He has conducted extensive research on ways to retrieve from space some of the 3,000 man-made objects now littering the galaxy hundreds of miles above the earth.

Dr. Robert F. Schmalz, professor of geology, has been elected a Fellow of the American Association for the Advancement of Science. The AAAS describes its Fellows as persons who have produced "a body of work on behalf of the advancement of science that is scientifically distinguished or socially highly significant or both."

Dr. Schmalz's selection was made for his "contributions to the field of marine sedimentation and for his efforts to inform the public about the physical environment through teaching, lecturing, and public broadcasting."

Dr. Edwin L. Cooper, professor of zoology, was installed as president-elect of the Northeast Division of the American Fisheries Society at the recent Northeast Fish and Wildlife Conference held at White Sulphur Springs, West Virginia. He will take office as president at the next annual meeting of the Society.

The American Fisheries Society is the oldest organization of professional managers and scientists dealing with natural resources in North America. It is organized into geographical divisions, discipline-oriented sections, and local chapters to deal with fisheries problems arising anywhere in the world.

Dr. Donald B. Johnson, associate professor of computer science, recently presented invited lectures at the University of Southern California and the University of California campuses at Berkeley and Santa Barbara. While in California, he also presided at a symposium, which he organized, on Computer Applications in Coatings and Plastics at the 175th meeting of the American Chemical Society.

Brant Shoemaker, associate professor of English at the Ogonite Campus, has been named to a second successive term as honorary vice-president of Centro Studi e Scambi Internazionale (International Center for the Study and Exchange of Ideas). Based in Rome, the Centro was established by the United Nations as an international group of invited poets and artists.

Prof. Shoemaker has been a frequent contributor to the organization's poetry magazine, *Quadern di Poesia*. His poems have also appeared in *Masters of Modern Poetry*, an annual anthology published by the Centro.

S. Leonard Rubinstein, professor of English, is being honored this term for his 25 years of service at the University.

He came to Penn State in 1952 after receiving the M.F.A. from the State University of Iowa. His B.A. degree is from Rutgers.

Recipient of the Christian R. and Mary F. Lindback Award for Distinguished Teaching in 1966, Prof. Rubinstein says his idea of a good teacher is "someone whose curiosity acts as a vacuum to elicit what other people think."

He wrote in the preface to one of his books that the teacher of writing, "like the student, like all men, is puzzled; he asks questions, which are pleas for help, and responds to questions, which are pleas for help. Ability to write is knowing and stating and resolving ignorance."

Professor Rubinstein is the author or co-author of six books. His novel, *The Battle-Dome*, based partly on his own World War II experiences, came out in 1954. A textbook, *Writing: A Habit of Mind*, came out in 1972. He has published short stories, articles, and translations.

With Robert G. Weaver, professor of English, he wrote two textbooks, *The Plain Rhetoric and Frameworks of Exposition*, and edited an anthology, *The Brief Essay*. The two also collaborated on *The Grave-maker's House*, published as a Harper and Row Novel of Suspense.

In addition, Prof. Rubinstein collaborated with Prof. Weaver and James Holahan, associate professor of English, on the textbook *Writing the Research Paper*.

In 1965 Prof. Rubinstein was a recipient of the Edgar Allan Poe Special Award of the Mystery Writers of America. From 1968 to 1971 he was one of three regional judges in the Book-of-the-Month Club Writing Fellowship Program.

Over the years he has helped develop several writing courses at Penn State and was formerly director of the Writing Option within the Department of English. He served with the late Professors Finch and Shelley on a committee overseeing the General Education Program in the College of the Liberal Arts. He has also served on the faculty of the NDEA Institute in English for secondary school teachers offered at the University.

Dr. Robert W. Green, professor of European history, is marking his 25th year of service to the University this year.

With a particular interest in the age of Louis XIV, he has taught more than 6,000 students, primarily in courses offered as electives. He has also supervised a number of Ph.D. and master's theses, but is, perhaps, best known for his contributions to undergraduate instruction at the University. While his more general interests are reflected in his course on Europe from the Renaissance to Waterloo and in his publications on the Weber thesis and an outline history of civilization, he teaches advanced courses on 17th century France and the French Revolution and Napoleonic era.

In 1969, Dr. Green received the Christian R. and Mary F. Lindback Award for Distinguished Teaching, and in 1963, he was the recipient of the Class of 1933 Award for Distinguished Service to the Humanities, presented for the first time the previous year.

He came to Penn State after serving for three years as instructor of history at the University of Iowa, where he earned the Ph.D. degree in history. His B.A. degree is from the University of Iowa and his A.M. from the University of Chicago. Both are in history.

Dr. Green played a major role in the development and subsequent revision of the history honors program at Penn State, and also instituted the History Roundtable, a program of student tours and historical activities, in 1954. He was a member of the University Faculty Senate for six years.

From 1959 to 1965, he handled all scheduling and registration for the Department of History, and in 1963, he served as acting head of the department. He has been active in numerous departmental and College committees, and has performed various functions for the Army R.O.T.C. program at Penn State. In the late 1960s, he and a colleague, Dr. John B. Frantz, developed a "Democracy in Crisis" lecture series as a response to the political turbulence on the nation's campuses. Dr. Green has lived and traveled extensively in France.

Clarence M. "Dutch" Sykes, "Mr. Intramurals" to thousands of Penn State students over the years, has retired. Involved with the intramural athletic program for more than 30 years, Prof. Sykes headed the division of recreational sports in the College of Health, Physical Education and Recreation. In that post, he directed one of the nation's most comprehensive intramural programs.

He earned a B.A. in 1942 and an M.S. in 1949, both from Penn State and both in physical education. A native of DuBois, Pa., he is a 1935 graduate of DuBois High School.

Mr. Sykes once served as an educational reconditioning specialist at Mayo General Hospital in Galesburg, Ill., and also spent a year in the contract cancellation department of the Westinghouse Electric Corp. He entered the U.S. Army Infantry in 1946 and served in the Philippine Islands.

Retiring with the rank of professor emeritus of physical education, he says he is proudest of the fact that "our [intramurals] program, sophisticated and extensive as it is, has been dedicated to serving the so-called 'average student,' the student who wants to take part in competitive sports on the non-varsity level."

Appointments

Jan P. Holland as senior research associate in Applied Research Lab at University Park. B.S. E.E., Iowa State U.; M.S. E.E., U. of Connecticut; Ph.D., U. of Rhode Island. Formerly with Naval Underwater Systems Center, New London, Conn.

William K. Kleystuber as assistant professor of mining engineering at New Kensington. B.S., M.S., U. of Pittsburgh. Formerly with U.S. Steel Corp. and U.S. Bureau of Mines.

Memorial fund established

Donations for the Jesse McManes Memorial Fund, which has been established to provide a commemorative award for future student use, may be sent to the Central Counties Bank, P.O. Box 19, State College, Pa. 16801. Mr. McManes, who was associate director of student aid at the University, died March 1.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

WPSX Highlights

Members of the Penn State University Chorus join the Pittsburgh Symphony Orchestra on **Previn and the Pittsburgh**, Sunday, Apr. 2, at 8 p.m. The Chorus, along with baritone John Shirley-Quirk, is featured in a performance honoring modern English composer Sir William Walton and his oratorio, *Belshazzar's Feast*.

In the 1960s, the sports world discovered the surprising talents of the runners from Kenya — the Kalerinji and Kisili peoples. Sunday, Apr. 2, at 11 p.m., **BBC Outlook** follows the training of one young runner in the grasslands of Kenya.

Small Town, PA, a five-part series of Penn State Television programs about rural and small town life in Pennsylvania, begins Monday, Apr. 3, at 9 p.m. with *A Tale of Reliance and Hope*. Members of the Phillips Hope and Reliance

Companies provide an inside look at the life of the volunteer fireman. Other programs in the series are about a small town newspaper, a small business, a community hospital, and a family farm. Novelist John Gardner, winner of the 1976 National Book Critics Circle fiction award for *October Light*, is interviewed Monday, Apr. 3, at 10 p.m. on *The Originals: The Writer in America*.

The world-famous Martha Graham Dance Company is featured Tuesday, Apr. 4, at 8 p.m. on *In Performance at Wolf Trap*. The troupe will perform three selections: *Scaphic Dialogue*, *O Thou Desire Who Art About to Sing*, and *Phaedra*.

James Levine conducts a double bill of opera on *Live From the Met*, Wednesday, Apr. 5, at 8 p.m. The performance features Mascagni's *Cavalleria Rusticana* and Leoncavallo's *Pagliacci* — two works which are often performed together.

University Park Calendar

March 31 — April 9

Special Events

Friday, March 31

Pass/fall deadline.
Sports: men's tennis, vs. George Washington, 3 p.m.
Shaver's Creek Nature Center, Timberdoodle Walk, 6 p.m., Stone Valley. Follow signs to Outdoor School.

france-cinema, Polanski, *The Tenant* (in English), 7 and 9 p.m., Room 112 Kern.

A. Dixon Johnson Memorial Lecture in Science Communication, Carl Sagan, Cornell University, on "Public Understanding of Science," 8 p.m., Eisenhower Auditorium.
Charles Noble, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 1

Last date for May graduates to deliver doctoral theses to committees.

Eco-Action Recycling stations open, 10 a.m.-3 p.m., Parking Lot 83 (behind flower gardens) and Boalsburg Fire Hall.

Model Railroad Club Model Contest, 10 a.m.-4 p.m., HUB old gallery.

Sports: men's volleyball, vs. Princeton, 1 p.m., Rec. Bldg.

france-cinema, Bunuel, *Discreet Charm of the Bourgeoisie*, 7 and 9 p.m., Room 112 Kern.

Sunday, April 2

University Chapel service, Thomas W. Courtney, speaker and author, State College, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, reptiles program, 2 p.m., Mineral Industries Camp, Stone Valley.

Sports: men's lacrosse, vs. Syracuse, 2 p.m.; baseball, vs. Bloomsburg (2), 1 p.m.

france-cinema, Polanski, *The Tenant* (in English), 7 and 9 p.m., Room 112 Kern.

Classics/History Dept. Illustrated Lecture.

N.G.L. Hammond, University of Bristol, on "The Tomb of Philip II of Macedon," 8 p.m., Room 101 Kern.

Artists Series, New York Renaissance Band, (rescheduled), 8:30 p.m., Eisenhower Auditorium.

Penn State Glee Club and Cedar Crest Glee Club, 7:30 p.m., Music Bldg. recital hall.

Monday, April 3

Pass/fall deadline.

London Bus tours start, 1:30 and 2:30 p.m.

HUB main entrance, throughout term.

Cinematheque, Weinman, *Octob Incident* (1943), 7 p.m.; Peckinpah, *The Wild Bunch* (1968), 9 p.m., HUB assembly hall.

france-cinema, Bunuel, *Discreet Charm of the Bourgeoisie*, 7 and 9 p.m., Room 112 Kern.

Philosophy Dept. Lecture, Jeanne Hersch, University of Geneva, Switzerland, on "About Finitude," 8 p.m., Room 101 Kern.

Tuesday, April 4

Drop deadline.

Pass/fall deadline.

Course repeat deadline.

Pre-registration deadline for summer term 1978.

Last date for written foreign language examinations (other than French and Spanish) for advanced degree candidates.

Fixed date for meetings involving Commonwealth Campus faculty.

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Alergia Bendelac, French.

Schuykill Campus, on "Problems of the South."

Native American Education symposium.

Gerald Gipp, Office of Indian Education, Washington, D.C., on "Politics: Federal, State and Local Relationships," noon, HUB assembly hall.

france-cinema, Polanski, *The Tenant*, 7 and 9 p.m., Room 112 Kern.

English Colloquium, Kenneth Thigpen, English, on "Killing the Fatted Calf: Critical Problems in the Study of Folk Narrative," 8 p.m., Room 101 Kern.

Wednesday, April 5

Commonplace Theatre, *The Last Detail*, 7:30 and 9:30 p.m., Room 112 Kern.

Comp. Lit. film, *Emile Zola*, 8 p.m., Room 151

Willard. Free admission.

Artists Series, American Film Theatre, *Pinter, The Homecoming*, 8 p.m., Eisenhower Auditorium.

Thalia Trio, 8:30 p.m., Music Bldg. recital hall.

Friday, April 7

College of Business Administration, William Elliott Lecture, A Haeworth Robertson, vice-president, William M. Mercer, Inc., and former chief actuary of the U.S. Social Security Administration, on "The Future of the Social Security System," 9:45 a.m., Keller Conference Center.

Sports: men's track, Nittany Lion Relays; women's lacrosse, vs. Towson, 3 p.m.

New German Cinema, Werner Herzog, *Agurre, the Wrath of God*, 7 and 9 p.m., Room 112 Kern.

Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Artists Series, Speculum Musicae, 8:30 p.m., Eisenhower Auditorium.

Saturday, April 8

Last date for final oral doctoral examinations for May graduates.

Last date for May graduates to deliver master's theses or papers to advisers.

Sports: men's track, Nittany Lion Relays; baseball, vs. Rutgers (2), 1 p.m.; men's tennis, vs. Bloomsburg, 1 p.m.

German Club Play, Brecht, *Die Kleinhändlerhuckst*, 8 p.m., Room 112 Kern.

UCC Comedy, "House of Assembly," 8 p.m., HUB ballroom.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium. Free.

Sunday, April 9

University Chapel service, Dr. Gayraud S. Wilmore, Colgate Rochester-Bellevue Hall.

Crozer, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, History Program, 2 p.m., Mineral Industries Camp, Stone Valley.

Sports: men's tennis, vs. Rochester, 2 p.m.

Lowell Knauer, organ, 3:30 p.m., Music Bldg. recital hall.

Artists Series, Lynn Harrell, 'cello, and Paul Schenly, piano, 8:30 p.m., Eisenhower Auditorium.

Seminars

Thursday, March 30

Computation Center, "Graphics," (4 of 4), 7:30 p.m., Room 105 Osmond.

Friday, March 31

Solid State, Ronald Reifenger, University of Toronto, on "Photoelectron Energy Distribution in Photo-Induced Field Emission," 11 a.m., Room 339 Davey.

Monday, April 3

Biochemistry and Biophysics, Charles Grieshaber, NIH, on "NIH Grants — The Present and the Future," 3:55 p.m., Room 101 Althouse.

Computation Center, "Bibliographic Materials," (1 of 2), 7:30 p.m., Room 105 Osmond.

Tuesday, April 4

Food Science, J. Zoller, on "The Importance of Lipolysis in Food Processing," 11:10 a.m., Room 201 Barford.

Research Applications of Computers, B. H. McCormick, information engineering, University of Illinois, Chicago Circle, on "Image Processing for Clinical Ophthalmology," 1 p.m., Room 111 Boucke.

Biology, F. Marcott Simek, Chief of Section on Bio-Medical Gerontology at Boston University Medical Center, on "Biochemistry of Aging," 2:20 p.m., Room 8, Life Science I.

Solid Waste Management, James A. Commens, JACA Corp., Fort Washington, Pa., on "Barriers to Use of Secondary Metals," 2:20 p.m., Room 128 Sackett.

Population Issues Research Office, Shannon Stokes, research on "Pronatalism and Fertility: The Case of the Military," 2:30 p.m., Room 174 Willard.

Chemical Engineering, William B. Russel, Princeton University, on "The Role of Colloidal Forces in the Rheology of Aqueous Polymer Solutions," 3:45 p.m., Room 140 Fenske.

Physics/Astronomy, Arthur Hogg, Lowell Observatory, on "The Search for Faint Emission Line Quasars," 3:50 p.m., Room 445 Davey.

Among the many ceramics on display at the Anthropology Museum are, from left, an Algerian fruit stand, and an oil lamp and jug from Fort National.

Photo by Brian Klutz

Exhibits

Anthropology Museum: open Tuesday and Thursday, 9:15-4:45 a.m. and 12:45-5 p.m.; Wednesday, 9 a.m.-noon. The World of Music: Pre-Colonial Ceramics; Ethiopian Collection.

Chambers Gallery: Terry L. Bowie, paintings, opens April 3.

Earth and Mineral Sciences Museum: open Tuesday-Friday, 9 a.m.-5 p.m.; Saturday and Sunday, 1-5 p.m., Mineral Industries Bldg.

Frost Entomological Museum: Open weekdays, 9 a.m.-noon and 1-4:40 p.m.; Room 102 Patterson. Architecture of insects and related arthropods.

HUB Gallery: Erna Yost, abstract paintings, and Model Railroad Club exhibit, both open April 1.

Kern Commons Gallery: Nancy Strailey, paintings, and BFA print exhibit, through April 8. Jill Crowley, ceramics. USN Combat Art of WW II, paintings, opens April 6. Ed Leos, photographs, opens April 8.

Museum of Art: open Tuesday-Sunday, noon-5 p.m. Tours, 1:30 p.m., Sunday. Faces of Spain: Goya prints and drawings.

Sackett Gallery: Basic Design and Color, 2nd year architecture students, through April 7. Richard Alden, Colored Pencil Drawings, 11:30 a.m.-1:30 p.m., Wednesdays and Thursdays, Room 401 Sackett, through mid-April.

Zoller Gallery: Drawing and printmaking exhibition, opens April 1.

Funding Opportunities

For further information, call 865-1372

(307-1) The National Science Foundation announces a program of Research on Selected Topics in Science and Technology Policy. Four topics are supported: Commercialization of Federal R&D; U.S. international technology position, technology indices, and effects of science and technology on employment. The closing date is May 15. (Ref. NSF 78-14)

(307-2) The NSF Science for Citizens (SFC) program has an April 24 deadline date for informal proposals (no more than five pages). Selected formal proposals will be invited; this deadline date will be June 15. The SFC thrust is to increase the knowledgeable participation of scientists and nonscientists in the resolution of public policy involving science and technology. (Ref. SE 78-64)

Editor's note: Following are excerpts from a proposal on retention and transfer policies that will be presented at the April 4 University Faculty Senate meeting. The complete text of the proposal and an attachment that deals with related questions are available in department offices and at the Senate Office.

In response to certain of the legislative actions of the University Faculty Senate in June 1977, (Appendix VI of the Senate Record for 6-7-77), the Committee on Undergraduate Instruction was charged to prepare legislation on transfer and retention of students in programs. The following legislation has been prepared for Faculty Senate action. The proposal is based on revision of Policy 37-30 Change in Major Programs of Study and 54-56 Drops by College.

A guiding principle in the development of this legislation was that all students would have equity in access to programs and retention in programs. Thus, a student will have an equal opportunity with all other students changing from one College to another, seeking entrance to a major, changing from one major to another, or transferring from the Division of Undergraduate Studies to a College or major.

The minimal academic standards proposed for entrance to a College or major are based on the student acquiring a 2.00 cumulative grade-point average. It also proposed that the dean, with the approval of the program faculty, may make exceptions for individual students where it is deemed academically appropriate. The legislation proposes that the minimal standard for retention of a student in a major is the University dismissal rule (54-52).

If more restrictive academic requirements are imposed for entrance to a College or major, retention in a program, requirements must be based on academic considerations unless enrollment ceilings have been established for the College or major by administrative actions. If a College or major wishes to impose more restrictive transfer or retention requirements the following procedure already enacted by the Senate at the June 1977 meeting is operative.

Retention and Transfer A Faculty Senate Report

The request of a program faculty for more restrictive academic requirements for transfer and/or retention will be submitted to the dean of the College. If approved by the Dean, the proposal will then be submitted to the Curriculum Recorder of the Senate for review of the Committee on Undergraduate Instruction and publication as an addendum to the Blue Sheets. Following proper faculty approval and review by the Senate Committee on Undergraduate Instruction, the Senate will then publicize the approved restrictive requirements for transfer and/or retention in a given College or major. The Committee on Undergraduate Instruction proposes the following legislation for Transfer and Retention of students in colleges and programs. . . .

Present Policy 37-30 Changes in Major Programs of Study

1. A candidate desiring to change from one College to another, or from one major to another, or from the Division of Undergraduate Studies to a College must meet the entrance requirements (Carnegie Units) and change of major requirements of the College and major which the student wishes to enter and obtain the approval of the dean of that College.

Proposed Policy 37-30 Entrance to and Changes in Major Programs of Study

1. A candidate seeking entrance to a major or desiring to change from one College to another, or from one major to another, or from the Division of Undergraduate Studies to a College may do so provided any enrollment ceilings of the College or major have not been reached and provided the candidate satisfies the following minimum

academic requirements:

- a. Meet the entrance requirements (Carnegie Units) of the College which the student wishes to enter.
- b. Demonstrate at least a C (2.00) cumulative average for all courses taken at the University subject to the conditions of section 51-50.
- c. Satisfy any additional academic requirements that have been proposed by the College or the major and approved by the dean of the College and the University Faculty Senate Committee on Undergraduate Instruction. Requirements for entrance to a College shall be those in effect at the time of the student's most recent admission to degree candidacy. The candidate must also obtain certification from the dean of the College in which the candidate desires to enroll that the candidate meets the change of College requirements have been met.
- d. The dean of the College with the approval of the program faculty may approve exceptions for individual students, for entrance to a College or major, that are deemed academically appropriate, provided no students meeting criteria a, b, and c are being denied entrance because of enrollment ceilings. . . .

Present Policy 54-56 Drops by Colleges

1. The dean of the College, subject to the review of the faculty of the College, may recommend to the President that a candidate be disenrolled from the College and be required to consult with the Division of Undergraduate Studies to determine if some other programs of studies should be under-

taken. Candidates thus referred to the Division of Undergraduate Studies may be accepted for enrollment therein with the view of later transfer to another major. If not accepted for enrollment in the Division of Undergraduate Studies, the candidate will be dropped from degree status.

Proposed Policy 54-56 Drops by Colleges

1. The dean of the College, subject to the review of the faculty of the College, may require that a candidate be disenrolled from a major in the College or from the College for failure to meet academic retention standards of the major or the College. Academic retention standards applicable to any student shall be those in effect at the time of the student's most recent admission to the major or College. A student required to disenroll from a major may transfer directly to another major subject to policy 37-00, or may be admitted to the Division of Undergraduate Studies subject to policy 39-00, with the view of later transfer to another major. If not accepted for enrollment in another major or in the Division of Undergraduate Studies, the candidate will be dropped from degree status.

Note: A candidate who is disenrolled from a major and who has previously completed the allowed enrollment time limit of the Division of Undergraduate Studies, as specified in Senate Policy 39-50, may be allowed one additional term of enrollment in that division. Failure to relocate into another major in the specified time will cause the candidate to be dropped from degree candidacy under policy 39-80 unless policy 54-52 applies.

SUBCOMMITTEE ON RETENTION AND TRANSFER POLICIES:

Michael Fisher
James S. Holt
E. Willard Miller, Chairman
Andrew Pytel
Jacqueline L. Schoch
Eloise C. Snyder
Harvey W. Wyler

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions filled completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Apr. 6. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

COUNSELOR, STUDENT AFFAIRS, University Park. Responsible for providing various services to individual students to enable them to effectively adjust to the University's policies and socially, personally, and academically to the extent at which services are indicated. A master's degree in sociology or counselor education is required. Over one year up to and including two years of directly related experience in a directly related activity is necessary.

CURATOR, PIANOS AND ORGANS — ARTS AND ARCHITECTURE, University Park. Responsible to Head of the Department of Music and the Director of University Arts Services for procurement, artistic performance and maintenance of University owned pianos and organs and other related instruments. Duties include tuning, restoration of pianos and organs; conducting lectures on piano technology; coordinating purchase of new instruments and overall responsibility for the Music Department's and University Arts Services' pianos and organs. Formal piano technician's training or equivalent in conservation of musical instruments and two to four years directly related experience. Membership in the Piano Technicians' Guild is required.

LEAD SYSTEM DEVELOPER — INTERCOLLEGE RESEARCH PROGRAMS, University Park. Responsible to the Manager of the Systems Development Group in the Computer Center for providing technical leadership and coordination of the development of major enhancements of computer operating systems, major modifications of externally available system software, and the development of complete subsystems. Generates and researches proposals for new operating system enhancement projects. Provides leadership role in group reviews of design and code in computer science or equivalent, plus five years' experience in system programming and system development on large IBM system under MVT or MVS or batchelor's degree (or equivalent) plus four to five years of directly related experience. Demonstrable technical leadership ability.

RESEARCH AIDE, COLLEGE OF AGRICULTURE, University Park. Extract hormones from blood or tissue samples, chromatograph extracts, and perform radioimmunoassays of hormones using ¹²⁵I and ³H-labeled compounds. Operate gamma scintillation spectrometer. Using aseptic techniques, remove tissue from experimental animals, prepare cell suspensions, establish and maintain cells in culture, and evaluate cultured cells both morphologically and biochemically. Perform biochemical and metabolic analyses of sperm and cultured or other cells utilizing sophisticated laboratory instruments. Develop and modify procedures in relation to data obtained. Prepare specimens for light and electron microscopic examinations by fixing, dehydrating, culting and staining tissue or cells. Bachelor of science degree in animal science, biochemistry, biology or similar field with course work in chemistry, biochemistry, microbiology, histological techniques and electron microscopy, and up to one year of directly related experience in tissue culture, microscopy, biochemical analyses, or radioimmunoassay, with demonstrated ability to conduct research with minimal supervision, is required.

SYSTEM DEVELOPER, INTERCOLLEGE RESEARCH PROGRAMS, University Park.

Responsible to the Manager of the Systems Development Group in the Computer Center for the development of significant enhancements of computer operating systems, modification of externally available system software, and the development of components of major subsystems. Bachelor's degree in computer science or equivalent, plus one year's directly related experience in system programming and system development on large IBM system under MVT or MVS.

STUDENT AID COORDINATOR, OFFICE OF FINANCIAL AID, University Park. Responsible to the Director of Student Aid for the development and maintenance of effective fiscal controls for all federal, state, private and institutional aid. Responsible for supervising the Basic Grants Program and counseling students in financial matters. Position will assist in the program administration of all aid sources. Master's degree preferably in student personnel, higher education or social sciences or equivalent plus two to four years of directly related experience in student personnel, student aid, or other related areas is required.

SENIOR SYSTEM DEVELOPER — INTERCOLLEGE RESEARCH PROGRAMS, University Park. Responsible to the Manager of the Systems Development Group in the Computer Center for the development of major enhancements of computer operating systems, modification of externally available system software, and the development of computer subsystems. Generates and researches proposals for new operating system enhancement projects. Master's degree in computer science or equivalent, plus at least two years' experience in system programming and system development on large IBM system under MVT or MVS, or bachelor's degree (or equivalent) plus two to four years of directly related experience.

Enrollment mix

(Continued from page 1)

available funding programs for Penn State.

Nearly one out of three 1977-78 freshmen live within ten miles of their Campus. More than 7,150 of Penn State's 10,375 freshmen last fall were enrolled at branch campuses.

Freshmen at the University feel high school grading is too easy, college grades are important and should not be abolished, and that students should have a voice in the evaluation of their teachers.

These were views indicated by Penn State freshmen on the ACE/UCLA survey. While Penn State freshmen seemed to be "middle-of-the-road" in political orientation and on social issues, they did express strong views on women and job quality, as did freshmen elsewhere. Ninety-three percent of the Penn State freshmen felt that there should be job equality for women.

The Penn State freshmen also think that government should do more to discourage energy use and that the government has not been successful in controlling pollution. More than 80 percent hold these views.

Fifty-four percent say that marijuana should be legalized and 55 percent favor legalization of abortion. Seventy-one percent of the Penn State freshmen hold the opinion that there are too many rights for criminals.

Comparing the Penn State figures with the national norms of the ACE/UCLA survey, Penn State freshmen do not feel as strongly about job equality for women, government's role in energy use and pollution, and legalizing marijuana and abortion as do other university freshmen.

The Penn State freshmen were more concerned about the rights of criminals, with 71 percent at Penn State expressing concern. Elsewhere, an average of 61 percent were concerned.

Overall, the Penn State freshmen have expectations from college similar to freshmen at other universities. The one out of four feel confident they will acquire a baccalaureate degree and ten in ten expects to graduate with honors. Fifty-five percent feel they will be satisfied at Penn State.

More than 45 percent at Penn State say they need a job to help pay college expenses and one in four intends to work at an outside job while attending school.

About 65 percent this year expressed confidence in finding a job in their preferred field after graduation. This was an increase of 10 percent over the freshmen who expressed this confidence a year ago.

The percentage of Penn State freshmen who feel certain personal objectives are very important seems to be distributed in relatively the same proportion as the attitude of other university freshmen.

Their primary objective, noted by 77 percent of the freshmen, was to become an authority in their respective fields. The next most important objective, said 60 percent of the freshmen, was "to help others who are in difficulty."

Other objectives that were noted as important by more than half of the Penn State freshmen were being well-off financially, developing a philosophy of life, raising a family, and obtaining recognition from colleagues.

Some objectives that Penn State freshmen felt were least important included influencing the political structure, creating an artistic work, writing an original work and achieving in a performing art.

Freshmen at other universities, according to the survey, also consider these objectives to be the least important.

Roundup

Lynn Harrell

Artists Series events

The Artists Series will present a number of events over the next several weeks, beginning with a rescheduled performance of the New York Renaissance Band at 8:30 p.m. on Sunday, April 2, in Eisenhower Auditorium. The performance was postponed due to a snowstorm, patrons may use their original tickets.

Another program is scheduled for the following Friday. Speculum Musicae, one of the most exciting chamber ensembles playing today, will present a program that will include brief commentaries on composers and their work at 8:30 p.m. on Friday, April 7, in Eisenhower Auditorium. The ensemble's unusual sound combines violin, cello, bass, flute, oboe, clarinet, piano, percussion, and vibraphone, an instrument that resembles a xylophone with electrically operated valves.

Tickets for Speculum Musicae will be on sale at the HUB booth Thursday, April 6, and Friday, April 7, from 9 a.m. to 4 p.m.

Cellist Lynn Harrell is next on the calendar, with a performance at 8:30 p.m. on Sunday, April 9, also in Eisenhower Auditorium. With Pianist Paul Schenly, Harrell will perform works by Beethoven, Bach, Mendelssohn, Schubert, and Brahms.

Although tickets for the Harrell concert are sold out through Music Series subscriptions, any returned tickets will be on sale at the auditorium box office at 5 p.m. on the day of the performance.

On Friday, April 14, the Cleveland Quartet will perform at Eisenhower Auditorium at 8:30 p.m. Violinists Donald Weierstein and Peter Salaff, violist Martha Strongin Katz, and cellist Paul Katz are particularly known for their masterful performances of Beethoven quartet cycles, and their all-Beethoven program at Penn State will include the Quartet in A major, op. 18, no. 1, Quartet in F major, op. 135, and Quartet in C major, op. 59, no. 3.

Tickets for the Cleveland Quartet will be on sale Thursday and Friday, April 13 and 14, at the HUB booth from 9 a.m. to 4 p.m.

The film version of Harold Pinter's *Homecoming* will be shown as part of the Artists Series Film Festival at 8 p.m. on Wednesday, April 5, in Eisenhower Auditorium. Directed by Peter Hall, the film is generally considered a fine example of the successful conversion of a drama written for the stage into a motion picture.

The movie is set in London and tells the story of a young man who brings his new wife home from America to meet his all-male family. It is an examination of love and hate, and of how love can sometimes lead to destruction. Tickets will be on sale at the box office beginning at 7:30 p.m. that evening.

Robertson is keynoter for Elliott conference

A. Haerworth Robertson, vice president of William M. Mercer, Inc., and formerly chief actuary of the U.S. Social Security Administration, will speak on the future of the social security system at 9:45 a.m. on Friday, April 7, in the Keller Conference Center.

He will be the keynote speaker for the University's William Elliott Invitational Conference, which will continue through the next day with seminars led by Mr. Robertson and James Ketelsen, president of Tenneco, Inc.

Mr. Elliott, chairman of the Executive Committee of Philadelphia Life Insurance Company and donor of the William Elliott Chair in the College of Business Administration, will attend the conference, which is the fourth to be held at Penn State. Invitations have been extended to senior level executives of major insurance companies, representatives of trade associations, and leading academicians in the insurance field.

Mr. Robertson joined William M. Mercer, a subsidiary of Marsh & McLennan Companies, Inc., on March 1 of this year. For three years prior to that, he was chief actuary of the U.S. Social Security Administration. While in that position, he was awarded the Commissioner's Citation, the Administration's highest honor award.

Mr. Ketelsen became president of Tenneco, Inc., in June, 1977. He was formerly president of the I.J. Case Company, a major Tenneco subsidiary.

Symposium topic is African migration and development

A one-day symposium on "Migration and National Development in Africa" will be held Saturday, April 8, at the University Park Campus. It is presented as a Continuing Education service of Penn State's Black Studies Program and the College of Education.

Featured speakers will be Dr. Elliott Skinner, professor of anthropology at Columbia University, and Dr. Robert Cummings, director of African studies and research at Howard University. Dr. Skinner, who received the doctor of philosophy degree in anthropology at Columbia University, is the former U.S. ambassador to Upper Volta. Author of five books and numerous articles in scholarly journals, his major research interests center on migration and urban development.

He serves as chairman of the Afro-American Scholars Council and is a consultant to UNESCO, the Ford Foundation, and the Social Science Research Council.

A graduate of the University of California at Los Angeles with the doctor of philosophy degree in African economic history, Dr. Cummings received a Ford Foundation Fellowship to conduct research in Kenya. His research has focused on African economic history and migration.

According to Dr. Beverly Lindsay, assistant professor of education who is serving as conference coordinator, the program should be of value to teachers at all levels, university students, and faculty from a variety of fields in the social sciences and education.

STS discussions planned

A series of Two-Culture Dialogues on "Society's Perceptions of the Energy Problem," which began this month, will continue through April at the State College Hotel.

The luncheon discussions, sponsored and conducted by the Science, Technology and Society (STS) Program, will be held Mondays at noon on the following schedule: April 10, Benjamin Nowak, State College attorney; April 24, Mrs. Robert G. McCarty, area manager, Columbia Gas Co.

Dr. Carl Sagan, who had principal responsibility for placing man's first interstellar message aboard the first spacecraft to leave the solar system, will present the first A. Dixon Johnson Memorial Lecture in Scientific Communication at the University at 8 p.m., Friday, March 31, in Eisenhower Auditorium.

Thalia Trio to play April 5

The Thalia Trio will present its spring concert at 8:30 p.m. on Wednesday, April 5, in the Music Building recital hall. Included in the program will be Beethoven's Trio in C Minor, Opus 1, No. 3, a piece with an interesting history, according to the group's pianist, Robert Baisley.

"Beethoven originally intended to dedicate the work to an admired teacher of his, Joseph Haydn," Mr. Baisley explains. "However, Haydn, when showed the work, didn't like it and refused the dedication."

Beethoven then dedicated the piece to a wealthy local patron, Carl von Lichnowsky. The decision was a financially profitable one, but "the irony of the story," Mr. Baisley says, "is that the Trio has proven to be one of Beethoven's most popular works and history has shown Haydn's judgment of this work to be wrong."

The Trio, which includes Joanne Zagst, violinist, and Leonard Feldman, cellist, will also perform Trio in B minor by Jean-Baptiste Loeillet and Trio in D minor, Opus 32, by Russian composer Antony Arensky.

Cedar Crest Concert Choir to perform with Glee Club

The Penn State Glee Club and the Cedar Crest Concert Choir will perform together at 7:30 p.m. on Sunday, April 2, in the recital hall of the Music Building.

The all women's choir from Cedar Crest College, Allentown, has been awarded second and third place honors in the Eisteddfod International Choral Competition. Appearing with the Royal Philharmonic, the choir represented the United States at the first Festival of Choral in Cardiff, Wales, in 1977. The concert is the choir's first in State College and the final stop of a western Pennsylvania tour.

The Glee Club's opening, "Songs of the Mines," arranged by Bruce Trinkle, director of the group, includes five selections originally sung by Pennsylvania coal miners in the late 19th and early 20th centuries. The special arrangement, in honor of the Glee Club's 90th anniversary, is the first of what Mr. Trinkle hopes will be a continuing series of Pennsylvania folk songs by the group. Accompanying the singers will be Jay Zimmerman, an undergraduate in music education.

The program also includes a selection of English folk songs by the Hi-Lo's, a select group of twelve singers from the Glee Club. A small group from the choir will perform two Elizabethan Madrigals by Thomas Weelkes.

Gipp to speak April 4

Dr. Gerald Gipp, former director of the Native American Administrators Program at Penn State, will speak at the University Park Campus on Tuesday, April 4. His appearance is sponsored by the Native American Education Symposium Series and the College of Education.

Dr. Gipp will speak on the topic, "Politics: Federal, State, and Local Relationships." The lecture is scheduled for 12:30 to 1:30 p.m. at the Hetzel Union Building's assembly hall.

Dr. Gipp is currently deputy commissioner in the Office of Indian Education of the Department of Health, Education, and Welfare. In addition to his work at the federal level, he has held a number of positions in secondary and higher education.

Hersch is Philosophy speaker

The Department of Philosophy will sponsor a lecture by Jeanne Hersch, professor of philosophy at the University of Geneva, Switzerland, at 8 p.m. on Monday, April 3, in Room 101 Kern Bldg. Her topic will be "About Finitude."

Prof. Hersch is internationally known for her lectures and publications in philosophy, politics, and aesthetics. In addition to her translations of Karl Jaspers, her publications include *L'Étre et la Forme*, 1946; *Ideologies et Realité*, 1956; and *Le Droit d'être un Homme*, 1968.

Since 1970, she has been a member of the Executive Council of UNESCO. She is a returning guest at Penn State, having been a visiting professor here in 1958.

Israeli architect to talk

Michael Kuhn, an Israeli architect and town planner, will talk on the "Systemic Approach to Architecture" at 7:30 p.m. on Monday, April 3, in Room 102 Forum Bldg. His talk, which is open to the public, is the third program of the Department of Architecture's Spring Lecture Series.

Mr. Kuhn frequently writes on architecture in developing nations. In Israel his main projects have included design of the Agricultural College Kanot, hotels on the Dead Sea and in Ashdod, and other public buildings. He also planned the new townships of Ofakim and Yeruham; a center for the new town, Kiryat-Gat; and housing schemes for Ashdod.

Mr. Kuhn has served as visiting professor in universities in South America, Scandinavia, and Yugoslavia. In this country he has taught at M.I.T., Virginia Polytechnic Institute and the Universities of California, Maryland and New Mexico.

French poet to speak

Jacques Roubaud, poet, mathematician, and linguist, will give a lecture on "New French Poetry" at 7:30 p.m. on Thursday, April 6, in Room 101 Kern Bldg. He is a professor at the University of Paris (Nanterre) and director of mathematics in that university's Division of Philosophy and Mathematics.

Prof. Roubaud is assistant director of the Center for Comparative Poetry at the University of Paris III, which publishes the *Cahiers de Poétique comparée*. He has published seven books of poetry and translations, including borrowings from the Iapetus, and is also interested in the Theater of the Gail, troubadour poetry, and contemporary American poetry.

The lecture will be sponsored by Beta Chapter of the Romance language honorary society, Phi Sigma Iota, and the Department of French.

(Continued on page 6)

University's Budget Presentation

Editor's note: This is the second of a series of excerpts from Penn State's 1978-79 Budget Presentation booklet, prepared for the State Appropriations Committees. President Oswald appeared before the House of Representatives Committee on March 10 and will appear before the Senate Committee tomorrow (March 31).

THE PROBLEM OF INFLATION

Like other educational institutions, public agencies, and private enterprises, Penn State increasingly has been hard-pressed to cope with the effects of inflation in recent years. Our problem was increased greatly by the lack of any increase in appropriation in 1977-78, which meant, in effect, an actual cut of approximately \$4 million in 1972-73 constant dollars. If no increase in support were to be provided for the second consecutive year, resulting in three years at the same level, it would represent an additional constant dollar cut of approximately \$5 million. Penn State is operating currently with significantly less purchasing power from the Commonwealth appropriation than was available five years ago.

To offset partially the decrease in purchasing power of the Commonwealth appropriation, we have been forced to raise tuition disproportionately higher than the rate of inflation. This included an unprecedented two-stage increase in tuition in 1977-78. With the increases already enacted this year, the 1978-79 tuition for undergraduate students at University Park will be \$1,368, giving Penn State the dubious distinction of having the highest tuition of any public land-grant institution.

A second consecutive year without an appropriation increase would set the University back even further in the battle against inflation. In the five-year period between 1972-73 and 1977-78, the cumulative impact of inflation was 41.3 percent; tuition increased 51.8 percent; and yet, Penn State's appropriation increased by only 29.1 percent.

Unmentioned to this point is the fact that Penn State experienced a significant increase in workload during this period, resulting from an 11.7 percent enrollment increase.

For the six-year period between 1972-73 and 1978-79, the cumulative impact of inflation is 51.2 percent (based on a conservative projected 1978-79 inflation rate of 7.0 percent). With a substantial tuition rate increase already in effect for 1978-79, the cumulative percent change in tuition rates is an astronomical 60.0 percent. With no increase in State support, the cumulative appropriation increase over the same period would be only 29.1 percent.

INTEREST OWED DUE TO DELAY IN STATE APPROPRIATION

In addition to coping with inflationary cost increases, the University has had to deal with a significant unanticipated expense during 1977-78 — interest charges on borrowed funds. Penn State was forced to borrow approximately \$53 million during the period of July through December, 1977, when we were operating without a State appropriation. The accumulated interest owed on these borrowed funds during this same period was \$457,000. The need to borrow funds to maintain normal University operations did not disappear, however, when the Governor signed our Appropriation Bill. Due to cash flow problems, the Commonwealth was able to pay the University only \$15.5 million in December, and Penn State has been receiving only half the regular monthly payment per month since that time.

By April 1, the total appropriation payments due to Penn State will be \$80,069,247. However, under the current

CUMULATIVE PERCENT CHANGE IN TUITION, COMMONWEALTH APPROPRIATION AND INFLATION

Cumulative % Change In	1972-73	1973-74	1974-75	1975-76	1976-77	1977-78	1978-79 Est.

Tuition	\$ 855	\$ 900	\$ 960	\$ 1 095	\$ 1 149	\$ 1 298	\$ 1 368 ^a
Comm. Approp. (thous.)	\$82,694	\$87,159	\$94,132	\$102,708	\$106,759	\$106,759	\$106,759 ^b

^a Annualization of second 1977-78 Tuition increase implemented in Spring Term 1977.

^b Based on the Governor's Recommendation for 1978-79.

payment schedule, the University will have received only \$28,904,000 by that date. We have not only been unable to pay back the funds borrowed between July and December, but we have had to continue borrowing funds to operate the University. While the Office of the Budget Secretary hopes to provide the remaining back payments in late April, at this very date the University is still incurring interest charges at an average rate of \$3,650 per day. This will result in an estimated interest expense of \$1,042,000 — an expense which could not have been anticipated and one which represents a probable operating deficit for 1977-78.

Copies of Penn State's Budget Presentation Booklet may be obtained by contacting Arthur Ciervo, Office of Public Information and Relations, 312 Old Main (phone 865-7517).

Roundup

(Continued from page 5)

Tomb of Philip II to be discussed

The recent discovery of a tomb believed to be that of Philip II of Macedonia, the father of Alexander the Great, will be the topic of a lecture by a distinguished visiting historian at 8 p.m. on Sunday, April 2, in Room 101 Kern.

N. G. L. Hammond, professor emeritus of Greek at the University of Bristol, will

be the guest of the Departments of Classics and History for an illustrated talk entitled "The Tomb of Philip II of Macedonia."

Prof. Hammond's publications include *A History of Greece* and *A History of Macedonia*, of which a second volume is expected soon. He is currently at work on a memoir of his service as a British liaison officer to the Greek underground during World War II.

Nominations requested for two student awards

Nominations for two student awards have been requested prior to April 8. They are the Eric A. Walker Award and the Ralph Dorn Hetzel Memorial Award, both top honors and both presented at the spring term commencement exercises.

The Hetzel Award, a memorial to the tenth president of the University, recognizes the achievements and potential of outstanding undergraduate students who have demonstrated the qualities of responsible leadership during their college careers and give promise of public spirited achievement in the future. It is given annually to a senior.

The Walker Award honors Dr. Eric A. Walker, 12th president of the University, and recognizes a senior student whose activities and achievements have enhanced the public esteem and renown of Penn State.

Nomination forms are available in the Office of the Vice-President for Student

Affairs, and completed forms should be returned there to the attention of Jane E. McCormick, assistant to the vice-president for student affairs.

Summer arts

(Continued from page 1)

on June 28; the Romeros, a classical-flamenco guitar trio, on July 7; and Broadway a la Carte, a company that performs musical numbers of New York productions over a seven-week schedule, on July 22.

Festival Theatre will offer four productions over a seven-week schedule, including a world premiere of a new one-character play by Sam Galt, Penn State alumnus and author of *Give 'Em Hell, Harry*. Mr. Galt's play will be performed at the University July 27-Aug. 13.

Other plays on the Festival Theatre schedule are: *The Sunshine Boys*, a comedy by Neil Simon, June 22-July 9; *Candide*, a musical by Leonard Bernstein, June 29-July 16; and *Lu Ann Hampton Lacey Oberlander*, the second of Preston Jones' *Texas Trilogy*, July 20-Aug. 6.

Museum of Art summer offerings will include a retrospective of prints and drawings by Mauricio Lasansky and a painting show selected by Paul Shanley, publisher of "Art in America." Contemporary prints from the permanent collection will also be displayed throughout the summer.

Penn State Intercom

Composer to be in residence

Ezm Laderman, the composer, will be in residence at University Park April 10 and 11 to participate in a festival of his compositions. Two public presentations are planned in conjunction with his visit.

At 8:30 p.m. Monday, April 10, in the

At 7 p.m. Tuesday, April 11, in the HUB assembly room, there will be a showing of *The Black Fox*, a film about Adolph Hitler for which Mr. Laderman composed the Oscar-winning musical score.

The remainder of the program will be

Mr. Laderman

Music Bldg. recital hall, members of the music department faculty will present a concert of Mr. Laderman's works. Included in the program will be "Elegy," for solo viola, performed by Raymond Page; "From the Psalms," a song cycle, with Karen Scott, soprano, and Steven Smith, pianist; "Double Helix," with Overda Page, flutist, Monte Bedford, oboist, and the Alard String Quartet, consisting of Mr. Page, Donald Hopkins and Joanne Zagst, violinists, and Leonard Feldman, cellist; "Meditation on Isaiah," with Mr. Feldman; and String Quartet No. 1, performed by the Alard.

given over to performances of additional compositions by Mr. Laderman.

Mr. Laderman has been the recipient of three Guggenheim grants, the Prix de Rome, a Ford Foundation commission, and, most recently, a prize from the National Endowment for the Arts for his String Quartet No. 5, which the Alard Quartet premiered at Penn State. He is a member of the faculty at SUNY-Binghamton.

His visit to Penn State is being sponsored jointly by the Departments of Music and Theatre and Film.

News in Brief

Aliens must report all address changes

All alien students and Exchange Visitors are reminded that they must report changes of address within ten days of each change using the Alien Change of Address card available at any local post office.

They are also required to report their place of residence each three months, regardless of whether or not they have changed their residence, according to Robert W. Dombrowsky, manager, Personnel Procedures Division.

These reports are in addition to the annual address report due each January.

Confusion about these requirements has arisen, according to Mr. Dombrowsky, because some postal clerks have told aliens that they are no longer in effect. However, the Immigration and Naturalization Service recently issued a notice to the effect that non-immigrants are required to complete the Alien Change of Address Card (Form AR-11) every three months and that visitors, students and Exchange Visitors are included under this requirement.

Failure to comply with the address requirement, Mr. Dombrowsky warns, could subject an alien to deportation proceedings and would be taken into consideration if the alien were to request permission to remain in the United States either in a non-immigrant or immigrant status.

Children's movement class to be offered

A children's movement class will be offered at University Park from 4 to 5 p.m.

each Monday, beginning April 17 and continuing through May 15.

Children in kindergarten through third grade are eligible to enroll. Registration will be held before the first class at 3:45 p.m. in White Bldg.

Basic movement skills, educational gymnastics and games will be taught.

Tutors sought for high school students

The State College Area High School and PTA seeks volunteer tutors for high school students at least one hour each week, according to Rodelle Weintraub, PTA co-president and an assistant professor of English. Subjects where aid is needed are algebra, modern geometry, trigonometry and business math. Those interested should contact Sherry Farrall by phoning 238-0511.

Reserve reading lists due

Reserve reading lists for summer term 1978 should be submitted to the Reserve Reading Room, W11 Pattee, on or before April 20, to allow ample time for processing. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes. All reserve lists will be processed strictly in order received.

Only required readings, which will circulate either for a two hour period or for an overnight loan period, will be placed on reserve.

Typewritten lists should be submitted on reserve forms, which are available by mail or in person from the Reserve Reading Room, W11 Pattee.

(Continued on page 5)

"Maturity" characterizes Penn State's Hazleton Campus

Editor's note: This is the first of a series of articles describing Penn State Campuses.

"Maturity" is the word Director William J. David likes to use in describing Penn State's Hazleton Campus.

"We have arrived in terms of faculty, staff and physical plant," he says firmly. "Some Campuses are still fighting a battle in their communities to rid themselves of their old extension center image. That battle was won many years ago in Hazleton. We're the Hazleton Campus. In Scranton, when they talk about 'the University,' they mean the University of Scranton. But we are The Pennsylvania State University in this area."

Dr. David believes Penn State's outstanding educational role in the Hazleton community is the result of public confidence in the quality of the Campus's educational offerings. "I think we can reinforce this image best," he says, "by 'bragging' about the quality of our faculty and their accomplishments and about the success of our alumni."

"Six members of our present faculty and 11 of our staff attended the Hazleton Campus. So did eight of the members currently serving on our advisory board."

Dr. David enjoys talking about the accomplishments of Hazleton's faculty.

The chairman of the Faculty Assembly, associate professor of history Harold W. Aurand, is a labor historian and author of the book, *From the Molly Maguires to the United Mine Workers: The Social Ecology of an Industrial Union, 1869-1897*.

Richard S. Paul, associate professor of mathematics, and Ernest F. Haessler, assistant professor of mathematics, are the authors of two textbooks just issued by Reston Publishing Co., *Algebra for College Students* and *Algebra and Trigonometry for College Students*.

"At a Campus," Dr. David says, "faculty face the problem of not only being toponotch in their own fields, but they are also called upon to broaden themselves in other fields when possible. We need 'generalized specialists' — people qualified to teach in a number of areas."

As an example of what he means, Dr. David points to Anthony V. Galanti, associate professor of engineering. Dr. Galanti ran the chemical engineering technology program at Hazleton. When it was phased out, he retraced his own path and now teaches nuclear engineering. He also is called on to teach chemistry, physics and mathematics — and is still expected to develop professionally in his original

(Continued on page 4)

Hazleton's administration building, the former Markle home.

Penn Staters

Robert O. Herrmann, professor of agricultural economics, recently served as an advisor for the U.S. delegation to a conference in Geneva to negotiate an agreement to replace the 1971 International Wheat Agreement. His advising capacity was related to consumer aspects of the agreement. The conference was under the auspices of the United Nations Conference on Trade and Development (UNCTAD). He served as one of the six non-government advisors. There were representatives from the Departments of Agriculture, State and Treasury and the Office of Special Trade.

Dr. Gerard J. Brault, professor of French, was recently elected a Fellow of the Heraldry Society of London. The honor is "in recognition of outstanding achievement in connection with the art and science of heraldry." The Heraldry Society, which currently has some 1,600 members throughout the world, was founded in 1947 to increase and extend interest in and knowledge of heraldry, genealogy, and allied subjects. The Articles of Association stipulate that the number of Fellows shall not exceed 50.

Prof. Brault is internationally known for his research in medieval French language and literature and French-Canadian culture. His book *Early Blazon*, published by Oxford University in 1972, is regarded as the standard reference work on medieval heraldic terminology.

Dr. Jeanne Kostas, assistant professor of psychology at York, presented a lecture at the University of Kentucky recently as part of the University's Institute of Psychology Colloquium Series. She discussed "Lead-Induced Behavioral Disorders: Effects of Neonatal Exposure."

Dr. Robert LaPorte Jr., professor and acting director of the Institute of Public Administration, has been elected to a two-year term on the National Advisory Committee of Amnesty International of the USA. The organization works to stop torture and to encourage humane treatment and fair trials for prisoners in all parts of the world. It also works to gain the freedom of all prisoners of conscience. Dr. LaPorte will serve as a resource person for the committee's work in Pakistan and Bangladesh.

Dr. Z. T. Bieniawski, an internationally recognized authority on rock mechanics and geomechanics, joined the University faculty on March 1 as professor of mineral engineering. He holds a B.Sc. and M.Sc. in mechanical engineering from the University of Witwatersrand and a D.Sc. in mining engineering from the University of Pretoria.

Since 1966 he has been head of the geomechanics division of the Council for Scientific and Industrial Research, South Africa's national research institution. Currently, he is vice president of the International Society for Rock Mechanics (ISRM) and co-president of the International Commission on Standardization of Laboratory and Field Tests on Rock.

Dr. Ray Wahl, professor of vocational industrial education, has been appointed a member of the Board of Examiners of the International Hazard Control Manager Certification Board. In view of increasing worldwide emphasis on safety and health in places of employment, the Certification Board has been created through the efforts of professional organizations, led by the National Safety Management Society, and charged with the responsibility of developing competent safety and health specialists by means of a certification procedure.

Lois Boe Hyslop, professor emerita of French and member of the Institute for the Arts and Humanistic Studies, has been named to the editorial board of *Nineteenth-Century French Studies*, a journal of criticism published quarterly.

Dr. Joseph Jay Rubin, professor of American literature, served as consultant and script editor for a new series of filmstrips on the life and work of poet Walt Whitman. The films, which are now available for high school and university student audiences, were produced by Coronet Media of Chicago, one of the largest of the educational film production companies. With actor Eli Wallach reading selections of Whitman's work, the series begins with the poet's childhood and continues through the Civil War — his great creative period. Filming was done at Civil War battlefields, on Long Island, and in New Orleans and Washington — places that appear frequently in Whitman's poetry.

Jane McCormick, assistant to the vice president for student affairs, has been named one of five recipients of the 1978 Alumnae Achievement Awards of Kappa Kappa Gamma sorority. The award is being made for her contributions to the field of higher education.

Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, recently delivered the keynote address at a conference on "The Rhetoric of the Chinese Revolution" at Oregon State University. The conference, which included jurists, legislators, social workers, and academicians who have visited the People's Republic of China since the Cultural Revolution, dealt with changes in Chinese policies and the way they are articulated to the people.

Dr. Betty van der Smitten, professor of recreation, has been elected chairperson-elect of the Mid-Atlantic Region of the American Camping Association. This region encompasses ACA sections in six states. As chairperson she will serve on the National Board of Directors. Dr. van der Smitten is currently a member of the National Standards Board, which administers the extensive program of standards for youth camps throughout the United States. She is also director of the research concerning validity and scoring of the standards.

At the recent convention of the Eastern District Association of Health, Physical Education and Recreation held in Baltimore, Dr. van der Smitten was honored by receiving the "Who's Who in Recreation Award" in recognition of her contributions to the recreation and leisure profession.

Bookshelf

Dr. Simon Belasco, professor of romance linguistics and French, has co-authored a second-year French grammar text. The book, entitled *Scènes et Séjours*, was published by Scott-Foresman. It uses a cognitive approach to the learning of French. The text helps the student to understand the meaning of sentence structures in French by contrasting them with English sentence structures.

Dr. L. Allen Phelps, assistant professor of education, is the major author of a recently published professional text entitled *Career Exploration and Preparation for the Special Needs Learner*. Allyn and Bacon is the publisher.

Gerontology Center funds 14 projects

Fourteen projects have been funded by the Gerontology Center in the College of Human Development as a result of the second year Developmental Grant Program announced last December by the Center.

Faculty were invited to submit proposals for up to \$2500 each in the areas of research, instruction and continuing education/community service.

The program, aimed at stimulating and improving University-wide gerontological research and instructional capacity, attracted 26 proposals. Judging was done by the intercollegiate faculty Academic Committee of the Gerontology Center. Recipients, by College, with their proposal titles, are:

Engineering: Thomas H. Cook, assistant professor of engineering mechanics, Effect of Ultraviolet Radiation on Mechanical Properties of Skin; Luis H. Summers, associate professor of architectural engineering, A Performance Language in Prescription and Assessment of Person-Environment Congruence.

Health, Phys. Ed. & Rec.: Geoffrey C. Godby, associate professor of recreation and parks, Factors Associated with Withdrawal from Leisure Activities by the Elderly; Tonya Toole, instructor in physical education, Aging and the Capacity of Immediate Motor Memory.

Human Development: Robert M. Griffin, associate professor of environmental planning, Development of Scales to Measure Behavioral Predispositions Related to Personal Well-being of Elderly People; Michael A. Smyer, assistant professor of human development, Continuing Education for Mental Health Personnel.

Liberal Arts: John M. Warren, professor of psychology, Neurobehavioral Liability in Old Mice.

Medicine: Gerard D. Kaiser, assistant professor of family and community medicine, A Proposal to Develop a Geriatrics Curriculum at Hershey Medical Center.

Science: Adam Anthony, professor of zoology, Age-related Changes in Neuronal and Glial RNA Synthesis; Edwin V. Gaffney, associate professor of microbiology and cell biology, Human Mammary Epithelial Cell Aging — Establishment of a Cell Bank; Richard L. McCarl, professor of biochemistry, Use of Cultured Cardiac Cells as a Model System of Aging in Post-mitotic Cells; Allen T. Phillips, professor of biochemistry, Neurofibrillary Changes in Senile Dementia.

Human Performance Lab: James L. Hodgson, associate professor of applied psychology, Patricia Mackeen, postdoctoral fellow in human biology, and Elsworth R. Buskirk, professor of applied psychology, Pilot Testing for a Ten-Year Follow-Up of Middle-Aged Male Participants in the Cooperative Study on Physical Activity and Cardiovascular Disease, 1966-1968.

Pennsylvania Transportation Institute: James H. Miller, assistant professor of business logistics, Yupo Chan, assistant professor of civil engineering, and Peter B. Everett, assistant professor of man-environment relations, Development of Research Expertise in Area of Methodological Frameworks for Evaluation of Mass Transportation Systems to Meet Special Needs of Elderly and Handicapped.

And let's hope there won't be any more for a while.

From the Press

About Possession: The Self as Private Property, by John R. Wikse. 156 pages. \$12.95

The author examines modern conceptions of the self with some emphasis given to existentialism and "authenticity." This work looks into the interface between political theory and political psychology. Self concepts are shown to be internalized by modern man in metaphors of private property. Other ideas examined include problems of personal identity and the "behavioral self" and a critique of the "idiot" — in the etymological meaning of a private and separate social station — integrating the ideas of Nietzsche and Marx.

Dr. Wikse is assistant professor of political science at Penn State. He earned his Ph.D. at the University of California at Berkeley and received an award from the Western Political Science Association for his doctoral dissertation.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

April 7-16 Special Events

Friday, April 7
College of Business Administration, William Elliot Lecture: A Hasworth Robertson, vice-president, William M. Mercer, Inc., and former chief actuary of the U.S. Social Security Administration, on "The Future of the Social Security System," 9:45 a.m., Keller Conference Center.
Sports: men's track, Nittany Lion Relays: women's lacrosse, vs. Towson, 3 p.m.
Art History Lecture, Walker Cahn, Yale University, on "The Masterpiece in the Middle Ages and the Renaissance," 4 p.m., Room 101 Kern.
New German Cinema, Werner Herzog, *Aguirre, the Wrath of God*, 7 and 9 p.m., Room 112 Kern.
Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.
Artists Series, Speculum Musicae, 8:30 p.m., Eisenhower Auditorium.
Saturday, April 8
Last date for final oral doctoral examinations for may graduates.
Last date for May graduates to deliver master's theses or papers to advisers.
Ice Skating Special Olympics, 9:30 a.m.-noon, Ice Pavilion.
Eco-Action Recycling Stations open 10 a.m.-3 p.m., Parking Lot 63 (behind the flower gardens) and Roalsburg Fire Hall.
Sports: men's track, Nittany Lion Relays; baseball, vs. Bloomsburg, 1 p.m.
German Club Play, Brecht, *Die Klein-burgheerzeit*, 8 p.m., Room 112 Kern.
UCC Comedy, "House of Assembly," 8 p.m., HUB ballroom.
Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium. Free.
Sunday, April 9
University Chapel service. Dr. Gayraud S. Wilmore, Colgate Rochester/Bekesy Hall/Crozer, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, History Program, 2 p.m., Mineral Industries Camp, Stone Valley.
Sports: men's tennis, vs. Rochester, 2 p.m.
Jewell Knauer, organ, 3:30 p.m., Music Bldg. recital hall.
Friends of the Museum Gallery Talk, John P. Cushion, Victoria and Albert Museum, on "English Tin-Glazed Earthenware," 4 p.m., Museum of Art.
GSA Concert, County Folk: Saul Broudy with Lew London and Dennis Gormley, 8 p.m., Room 112 Kern.
Artists Series, Lynn Harrell, 'cello, and Paul Schenly, piano, 8:30 p.m., Eisenhower Auditorium.
Monday, April 10
STS Two Cultures Dialogue, "Society's Perceptions of the Energy Problem," Benjamin Novak, State College attorney will speak, noon, State College Hotel.

Cinematheque, Penn, *Little Big Man* (1970), 7 and 9 p.m., HUB assembly hall.
New German Cinema, *Aguirre, the Wrath of God*, 7 and 9 p.m., Room 112 Kern.
Ezra Laderman Festival, 8:30 p.m., Music Bldg. recital hall.
Tuesday, April 11
Occupational and Vocational Studies Lecture. William Halloran, U.S. Office of Education, on "The Development of Career Education for Individuals with Special Needs," 9:30 a.m., Room 101 Kern.
Slide Show, "Pop Art," noon, Kern lobby.
Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club, Edmund Bendezu, Universidad Nacional de San Marcos, on "APRA Literary Connections."
Native American Education symposium. Harold Gray, education consultant, Missoula, Mont., on "Legal Definition of Equal Education Opportunity for Indian Students," 12:30 p.m., Room 112 Kern.
Comp. Lit. film, *Rules of the Game*, 7 and 9 p.m., Room 112 Kern.
Ezra Laderman Festival, 7 p.m., HUB Assembly hall.
Wednesday, April 12
Sports: men's lacrosse, vs. Franklin and Marshall, 7 p.m., Jeffrey Field.
African Studies Forum. Dr. Okete J. E. Shiroya, Kenyatta University College, Nairobi, Kenya, on "The Development of Modern Education in East Africa: Problems and Prospects," 7:30 p.m., HUB assembly hall.
Commonplace Theatre, *Pattin*, 7:30 and 9:30 p.m., Room 112 Kern.
Comparative Literature Program film, *Ezra Pound: A Poet's Poet*, 8 p.m., Room 151 Willard. Free.
PSU Percussion Ensemble, 8:30 p.m., Music Bldg. recital hall. Free.
Thursday, April 13
History Lecture. Okete Shiroya, Kenyatta University College, Nairobi, Kenya, on "The Development of Nationalism in Colonial Kenya," 2:30 p.m., Room 225 HUB.
Sports: women's lacrosse, vs. Millersville, 3:30 p.m., IM Field.
HUB Candlelight Dinner, "Let's Have a Spring Fling," 4:45-7 p.m., Terrace Room, HUB.
Central Pa. Society of the Archaeological Institute of America, Rev. John Wilkinson, London, on "A New Temple: The Church of the Holy Sepulchre in Jerusalem," 6 p.m., Room 101 Kern.
French Club/French House Play, Moliere, *Le Midecin malgre lui* (The Doctor in Spite of Himself), 8 p.m., Room 112 Kern.
Middle East Studies/UCIP Lecture. Frederick M. Denny, University of Virginia, on "Egypt and the West: Refracted Images," 8 p.m., Room 5-209 Henderson.
Friday, April 14
Sports: men's tennis, vs. Howard, 1 p.m., Nittany Courts; baseball, vs. Howard, 3 p.m., Beaver Field; men's lacrosse, vs. North Carolina, 7 p.m., Jeffrey Field; men's volleyball, vs. East Stroudsburg, 7 p.m., Rec. Bldg.
HUB Candlelight Dinner, "Let's Have a Spring Fling," 4:45-7 p.m., Terrace Room, HUB.
French Club/French House Play, *Le Midecin*

malgre lui (The Doctor in Spite of Himself), 8 p.m., Room 112 Kern.
Artists Series, Cleveland Quartet, 8:30 p.m., Eisenhower Auditorium.
Saturday, April 15
Shaver's Creek Nature Center, Youth Leaders Workshop (registration only — 865-1851), 9 a.m.-noon, Stone Valley.
College of Earth and Mineral Sciences Open House, 1-5 p.m., lobbies of Mineral Industries, Mineral Sciences, Deike and Walker Bldgs.
Sports: women's tennis, vs. Maryland, 2:30 p.m., Nittany Courts; baseball, vs. George Washington (2), 1 p.m., Beaver Field; women's lacrosse, vs. Ursinus, 2:30 p.m., IM Field.
france-cinema, Bergman, *The Magic Flute*, 7 and 9 p.m., Room 112 Kern.
Un-Common Dinner Theatre, *Pierre Pathelin*, 7 p.m., Rooms 101 and 102 Kern.
Miss Penn State Scholarship Pageant, 8 p.m., Eisenhower Auditorium.
Sunday, April 16
University Chapel service. Dr. Joseph Sittler, Lutheran School of Theology, Chicago, 11 a.m., Eisenhower Chapel.
College of Earth and Mineral Sciences Open House, 1-5 p.m., lobbies of Mineral Industries, Mineral Sciences, Deike and Walker Bldgs.
Shaver's Creek Nature Center, Spring Ecology Walk, 2-4 p.m., Stone Valley.
Sports: baseball, vs. Gettysburg, 2 p.m., Beaver Field.
france-cinema, *The Magic Flute*, 7 and 9 p.m., Room 112 Kern.
Un-Common Dinner Theatre, *Pierre Pathelin*, 7 p.m., Rooms 101 and 102 Kern.
Brent Wissick, 'cello, 8:30 p.m., Music Bldg. recital hall.

Seminars

Thursday, April 6
Computation Center, "Fortran Techniques," (2 of 3), 7:30 p.m., Room 105 Osmond.
Monday, April 10
Biochemistry and Biophysics, Andrea Mastro, life sciences, on "Protein Kinases and Phosphorylation of Mammalian Cell Plasma Membranes," 3:55 p.m., Room 101 Allhouse.
Computation Center, "Fortran Techniques," (3 of 3), 7:30 p.m., Room 105 Osmond.
Tuesday, April 11
Applied Research Laboratory, J. W. Holl, aerospace engineering, on "The Influence of Surface Irregularities on Cavitation Performance," 10:45 a.m., Walker Conference Room.
Biochemistry and Biophysics, Andrea Mastro, life sciences, on "Tumor Promoters and Lymphocyte Stimulation," 11:10 a.m., Room 101 Allhouse.
Food Science, M. Keith on "Vitamin C Retention in Home-Canned Apples," 11:10 a.m., Room 201 Borland.
Analytical Chemistry, Steve Ankabrandt on "Differential Pulse Voltammetry of Aqueous Sulfur Dioxide at the Glassy Carbon Rotated Disc Electrode," 1 p.m., Room 339 Davey.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Solid Waste Management, William Bucciarelli, Solid Waste Bureau, Harrisburg, on "Impact of RCRA on the State Solid Waste Activities," 2:20 p.m., Room 128 Sackett.
Chemical Engineering, George D. Shier, Dow Chemical Co., on "Industrial Chemistry — A Chemist's Perspective," 3:45 p.m., Room 140 Fenske.
Genetics, J. Toby Stout on "Animal Cloning," 3:55 p.m., Room 52 Frear.
Plant Pathology, Mark Bookbinder on "The Knotty Roots of Nematology," 3:55 p.m., Room 213 Buckhout.
Microbiology and Cell Biology, Richard L. Warren, Corporate Research Lab., Union Carbide Corp., on "Replication of Fil R Factor in *Proteus mirabilis*," 4 p.m., Room 8 Blythe Sciences.
ASM, Penn State Chapter, W. E. Bryatton, coke making, U.S. Steel Corp., on "Methods of Improving Coke Strength," 7:30 p.m., Room 301 Mineral Industries.
Wednesday, April 12
Rail Transport, L. K. Silcox on "Troubled Trains," 8 a.m., Room 71 Willard.
Thursday, April 13
Ceramic Science, Larry Cadoff, Westinghouse Electric Corp. Research Lab., on "Electrochemical Corrosion of MHD Electrodes," 11 a.m., Room 301 Mineral Industries.
Chemistry, Richard J. Lagow, University of Texas at Austin, on "New Synthetic Methods: Direct Fluorination, Novel Plasma Synthesis, and the Syntheses of Polythium Organic Compounds," 12:45 p.m., Room 333 Whitmore.
Physics, Robert Griffiths, Carnegie-Mellon University, on "An Introduction to Multicritical Points," 3:50 p.m., Room 117 Osmond.
Agronomy, Hung Nguyen on "Wheat Spindle Streak Mosaic Virus Disease in Pennsylvania," 3:55 p.m., Room 111 Tyson.
Meteorology, Vincent J. Oliver, National Environmental Satellite Service, Washington, D.C., on "Recent Developments in the Use of Meteorological Satellites," 3:55 p.m., Room 112 Walker.
Ecology, Eugene S. Morton, U.S. National Zoological Park, University of Maryland, on "Ecology Without Sex in the Tropics," 4 p.m., Room 101 Kern.
Philosophy, Albert Tsugawa, philosophy, on "Literary Categories," 4 p.m., Room 69 Willard.
Microbiology and Cell Biology, Carolyn M. Bergholz, Rush-Presbyterian-St. Luke's Medical Center, Rush University, on "Isolation of a Primate Oncovirus with Altered Envelope Properties," 4 p.m., Room 52 Frear.
Computation Center, "JCL Examples," 7:30 p.m., Room 105 Osmond.
Friday, April 14
Research Applications of Computers, F. T. Baker, IBM, Gathersburg, Md., on "Experiments with a Program Design Language," 1 p.m., Room 325 Whitmore.
Physical Chemistry, David Pratt, University of Pittsburgh, on "Level Anti-crossing on Cross Relaxation Effects in Molecular Crystals," 4 p.m., Room 333 Whitmore.

The Campus Library

Hazleton

(Continued from page 1)

discipline — chemical engineering.

"One of our philosophy instructors, Richard Campbell, teaches physical education sections in karate," Dr. David continues. "It's purely a donation since we don't consider it part of his regular teaching load."

"Dr. Michael Santulli, an associate professor of philosophy, is another example of a professor with a wide range of interests. He was a high school chemistry teacher and is extremely knowledgeable about the impact of technology on our society."

Hazleton is fortunate both in its faculty and its physical facilities.

It is the closest residential campus to New Jersey and eastern New York state, Dr. David points out, and the only "full fledged" residential campus in the eastern part of Pennsylvania (Schuylkill Campus only houses women in its residence halls).

Situated on a wooded hillside, the Campus was founded in 1934, in response to requests from local citizenry who couldn't afford to send their children away to school. Classes opened on the fourth floor of the Markle Bldg. in downtown Hazleton. The Campus almost closed down during World War II, but in 1949 the University was given an opportunity to purchase the estates of Alvin Markle and his son, Donald, members of a local family who had made their fortune in banking, coal mining, timber and railroading.

The son's house was torn down in 1972 — it had never been used by the Campus and M&O decided it was too expensive to maintain. But the administrative center of the present Campus is located in the senior Markle's house. Recently, the living room was restored and opened as a visitors' lounge. The original ornate dining room furniture, with hand carved dark oak sideboards and chairs, was removed from storage to grace the room.

The Campus's residence halls accommodate 220 students. There is a

total student enrollment of around 950, 200 of whom are associate degree candidates; 120, provisional students; and 630, baccalaureate degree candidates. About 500 or 600 persons enroll in Continuing Education evening programs, and the faculty numbers 43.

The Campus also has a classroom-laboratory building, a two-level library, and a dining hall. But at the moment it is proudest of its brand new physical education building, a \$3 million facility containing an Olympic size swimming pool, bowling alleys, a gym which can seat 1,500 persons and a variety of exercise and training rooms.

The building was originally approved because at one time Hazleton was slated to achieve four-year status, Dr. David explains. And trying to operate it illustrates the breadth required not just of Commonwealth Campus faculty but also of their directors. Dr. David may find himself at one minute dealing with such problems as bowling lane maintenance and the bromine content of the pool, and the next discussing basic skills programs with his English faculty or trying to resolve scheduling conflicts between residential and continuing education.

"It's helpful to have had a background in engineering," Dr. David notes. Appointed as director in 1973, he has a B.S. in mechanical engineering from Wayne State, a master of automotive engineering from Chrysler Institute of Engineering, and a Ph.D. in higher education from the University of Michigan. Before he came to Hazleton, he was an assistant dean in the College of Engineering at Wayne State.

Enrollments are holding steady thus far at Hazleton — the Campus has had no empty seats in its classrooms during the past two years, and Dr. David is hopeful that the new physical education facilities and the residence halls can be adapted for summer sports clinics and physical conditioning programs.

"Our faculty and staff are aware of what the future holds in terms of declining enrollments," he says, "but we think we're well prepared to combat them."

Resolution of Student Classroom Problems

Editor's note: Faculty are reminded of the following guidelines, which were originally prepared by the University Council and distributed by President Oswald for implementation effective Sept. 1, 1975.

Students are occasionally confronted with classroom situations (exclusive of grades and grading) which may cause them concern and/or inconvenience. These may include possible:

— Failure of a faculty member or administrator to uphold the University policies such as prohibition of smoking in classrooms, prohibition on scheduling of comprehensive examinations on the last class period, early completion of terms, and others;

— Failure of a faculty member to fulfill his or her instructional obligation, such as unjustified cancellation of classes, frequent absenteeism or late arrival, failure to keep designated office hours, inappropriate substitution of teaching assistants, and others.

A student who feels that a problem exists has several avenues of appeal. The avenue chosen by a student will depend on the type of problem encountered and the personal wishes of the student.

Resolution of most problems may be achieved by discussing the matter with the faculty member directly involved, with the department head and/or with the student's advisor.

However, a student who, because of the nature of the problem or for any other reason, feels the avenues mentioned above are inappropriate, may seek recourse through the office of the appropriate Associate or Assistant Dean of the College or Division (listed at the end of this statement) in which he or she is enrolled.

Students may use this channel of communication with assurance that confidentiality will be maintained as appropriate. That is, only information required to pursue a course of action as requested, or consented to, by the student in writing will be disclosed.

Matters dealing with course grades and grading should be dealt with between the student and his or her instructor as outlined in Faculty Senate Rule M-1.

The following College and Commonwealth Campus offices are prepared to assist students with classroom problems of the types listed:

COLLEGE OR DIVISION	DEAN TO CONTACT	OFFICE	TELEPHONE
Agriculture	Jerome F. Pato	217 Ag. Admin.	865-7521
Arts & Architecture	William J. McHale	116 Arts Bldg.	865-9523

WPSX Highlights

Liv Ullman and Erland Josephson star in the repeat broadcast of Ingmar Bergman's acclaimed film, *Scenes from a Marriage*. The six-part series, which begins Saturday, April 8, at 11 p.m., follows an "ideal" middle class marriage over a ten year period.

Firing Line features a lively exchange of opinion on the Alger Hiss case Sunday, April 9, at 5 p.m. Joining William F. Buckley Jr. for the discussion are Allen Weinstein of Smith College, who is the author of *Perjury: The Hiss-Chambers Case*, and Athan Theoharis of Marquette University.

Nova makes a year-long study of the life and rhythm of a Massachusetts pond on

"Still Waters," Wednesday, April 12, at 8 p.m. The documentary shows how the pond's creatures adapt to seasonal changes in, on, under, around and above the water.

Members of the Hartford State Company are featured in a performance of American playwright Edward Albee's *All Over*, Wednesday, April 12, at 9 p.m. on **Great Performances: Theater in America**. The play centers around a family which has gathered to await the death of its celebrated patriarch.

Superpower diplomacy is the subject for the next debate on *The Advocates*, Thursday, April 13, at 9 p.m. Participants will present views on the question, "Should the U.S. abandon detente as its strategy in dealing with the Soviet Union?"

Residence hall, foreground, dining hall at rear.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed, although names will be withheld on request.

Q. People often ask whether the University, by law, is required to recruit a certain number of minority students under Affirmative Action or any other federal programs. Could you comment?

Jane M. Singh

A. The University has an affirmative action plan approved by the Department of Health, Education, and Welfare. The plan is specifically required under federal rules and regulations. It must include specific targets for minority and female representation among the regular employees of the University where underutilization is determined. Affirmative action is required to achieve these goals and to maintain equal employment opportunity.

There is no similar requirement for minority or female representation among students. Penn State has voluntarily initiated programs to improve minority and female enrollment at the undergraduate and graduate levels. These programs are funded from within the University. Additionally, affirmative steps are in progress to assure equal access and use of facilities and education programs for disabled veterans and the handicapped.

William W. Asbury
Affirmative Action Officer
and Assistant to the Provost

Editor's note: The officers of the University Faculty Senate recently put together a list of questions dealing with non-academic policies and procedures. Since these questions are of general interest to the University community, we are running answers to them in INTER-COM.

QUESTION:

Why is a 25-30% surcharge put on materials which are departmentally produced for selling in the Bookstore when this is the only way (Policy AD-15) that such materials can be distributed? Why was it felt necessary to make so strict a policy to correct a few abuses?

ANSWER:

The Penn State Bookstore on University Park Campus is operated as an auxiliary enterprise. As such, the total expense of this service operation must be met from sales income. The expenses include: salaries, wages, fringe benefits, unemployment compensation, amortization of space and equipment, rent, utilities, freight, supplies, etc. In order to meet this expense all items sold in the bookstore are marked up over cost.

Materials which are departmentally produced for sale in the Bookstore are marked up in line with new text books received from the publishing houses. In addition to the expenses indicated above, the Bookstore also absorbs the cost of handling and coordinating shipments of these materials to the Commonwealth Campus Bookstores and provides storage between term sales. These materials are usually produced in quantities sufficient for a minimum of one academic year.

The Penn State Bookstore began handling these departmentally produced materials at the request of various academic departments shortly after it began operations in 1973. Policy AD-15 was instituted by the Office of the Provost in 1976. The intent of this policy, which also includes course fees charged by academic departments, was to ease the burden of past and present increases in tuition upon the students, as well as to attempt to provide for better cash control within the University system.

John Bischoff
Bookstore Manager

QUESTION:

What have been the changes in regulations for Fleet Operations retention and service of vehicles? A definite downward trend in the quality of the vehicles has been noted by all. However, the cooperation of the division is excellent.

ANSWER:

Budgetary constraints, increased costs, and energy conservation have caused a reassessment of the optimum service life of fleet vehicles. Vehicles formerly traded with low mileage are now utilized through higher mileage and normally sold through Surplus and Salvage. There have been no changes in the maintenance schedules for fleet vehicles except those recommended by the manufacturers. All vehicles are regularly maintained as in the past.

While this shift in operating and marketing procedures has reflected a substantial cost savings to the University, it is possible some have felt that quality has diminished. It is also quite possible that the perceived falloff in quality is associated with some of the new car purchases. The lighter, more fuel efficient cars with a variety of emission control features do not have the solid, "big car feel" to which many fleet customers have become accustomed. Domestic automobile manufacturers are attempting to correct this shortcoming while concurrently sizing down their cars and improving engine efficiency. Our goal is to have a cross section of various sized vehicles to suit the varying needs of our customers. In order to achieve this goal, lighter vehicles have been purchased for the past several years. Future purchases will include full-sized, intermediate, and compact vehicles.

Office of Business Services
Fleet Operations

Arts Roundup

Leos photos at Kern

Photographs by Edward Leos, professor of journalism, will be on exhibit at the Kern Graduate Commons Gallery April 8-29. The show is entitled "Five Prologues and an Introduction."

In 1976, Prof. Leos was named photojournalism teacher/photographer of the year by the American Association for Education in America. His interest in the "naive" photographer has led to several previous exhibits, one the result of a project involving three- and four-year-old camera users. Mr. Leos is also the discoverer of Horace Engle, an 1880s pioneer of candid photography.

Commons gallery hours are from 8 a.m. to 11 p.m. Monday through Saturday and from noon to 11 p.m. Sunday.

Kern Dinner Theatre

The Kern Dinner Theatre and the Department of Theatre and Film will present the medieval French farce, *Pierre Pathelin: A Feast of Comedy and Song*, at 7 p.m., Saturday and Sunday, April 15 and 16.

The farce describes the antics of a charming and clever rascal, Pierre Pathelin, who makes his living by outwitting his fellow men. Original music and lyrics by T. Spivey and Nancy Kelly will be performed by the cast of ten players. A company of jesters will entertain between acts.

The comedy is an original translation by Alan E. Knight, associate professor of French, and will be directed by William J. Kelly, instructor in theatre arts.

The dinner, to be prepared by members of Penn State's Hotel and Restaurant Society, will differ from previous Kern presentations in that the courses will be served between the acts of the play. The menu will consist of Vichyssoise, Beef Bourguignon, Spinach Salad, and Pears Flambee. A limited number of spectator

News in brief

(Continued from page 1)

Holy Sepulchre facade before 1914.

Church is lecture topic

"A New Temple: The Church of the Holy Sepulchre in Jerusalem" is the topic of a lecture to be given by the Rev. John Wilkinson of the Episcopal Diocese of London at 8 p.m. Thursday, April 13, in Room 101 Kern Bldg. The lecture is being sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Recent examination of the Church of the Holy Sepulchre during the course of its restoration has brought new knowledge of its origins and history. Founded by the Emperor Constantine, it was developed by the Christian community in Jerusalem as a Christian successor to the Jewish Temple.

Rev. Wilkinson has done special research and teaching on the archaeology of the New Testament and, as a result of nine years of exploration in the Holy Land, has written on the Early Christian and Byzantine periods in that area. His publications include *Egeria's Travels*, *A New Translation with Notes*; *Ancient Jerusalem, Its Water Supply and Population*; *The Streets of Jerusalem*; and *Jerusalem Pilgrims Before the Crusades*.

Denny to discuss Egypt and the West

Dr. Frederick M. Denny, assistant professor of religious studies at the University of Virginia, will speak on "Egypt and the West: Refracted Images" at 8 p.m. Thursday, April 13, in Room 5209 Human Development.

Dr. Denny spent the academic year 1976-77 in Egypt as a fellow of the National Endowment for the Humanities doing field research on Qur'an recitation and other current Islamic ritual practice. He is a director of an American Council of Learned Societies' project on teaching materials in Islamic civilization.

seats (without dinner) will also be available.

For information and reservations, contact the Information Desk at Kern 865-1878. Dinner theatre seats are \$6.50 per person, theatre seats, \$2.

Percussion ensemble to appear April 12

The University's Percussion Ensemble will present its Spring Concert at 8:30 p.m. Wednesday, April 12, in the Music Bldg. recital hall.

A small group from the Ensemble, the Percussion Quartet, will play Concert Suite for Flute and Percussion by French composer Andre Jolivet. Included in the performance by the larger ensemble of 12 members will be "Cataphenics," by Symphony No. 1 for Percussion, by

His visit to the University is sponsored by the Committee on Middle East Studies, the Department of Religious Studies and UCIP.

Former Vietnam War prisoner to speak

Col. Carlyle S. Harris, an Air Force pilot who became the sixth American prisoner-of-war in North Vietnam, will speak on "Leadership in a POW Environment" Wednesday, April 19. His talk, which is sponsored by the Penn State Air Force ROTC unit, is scheduled for 8 p.m. in Room 105 Forum Bldg. It is open to the public.

Col. Harris, who completed his master's degree at Auburn University, is presently chief of curriculum planning at the Air War College. He entered the Air Force in 1951, was shot down in North Vietnam in April 1965, and was one of the prisoners in the infamous July 1966 "Hanoi March." He was held in numerous prisoner-of-war camps, including the Son Tay Camp, which was raided by U.S. forces after the North Vietnamese had removed all prisoners.

Separate phone numbers assigned coordinators

Eight conference coordinators who previously shared a common telephone number can now be reached at separate numbers, according to Richard M. Bunnell, director of the J. Orvis Keller Conference Center.

Faculty and staff members needing to contact the coordinators are asked to make note of the new numbers. They are: Kent Addis, 865-7911; Ronald Avillion, 865-0313; Robert Beam, 865-5141; Patricia Bodman, 865-9173; Mary Kay Falck, 865-8820; Howard Finney, 865-4591; Norman Lathbury, 863-1743; and Wally Lester, 863-3211.

The coordinators had shared a common number, 865-7557, which remains in effect for all other members of the Keller Conference Center staff.

Elm spraying Monday

The annual spraying of American elm trees at University Park for control of Dutch elm disease is scheduled to begin Monday, April 10. This date may change because of weather conditions since spraying is normally done when temperatures are over 40°F and wind conditions are relatively calm.

Spraying is carried out between 5 p.m. and 6 a.m. and is usually finished within two weeks under ideal conditions. The spray materials being used have been approved by the Pesticides Committee in the College of Agriculture.

A Physical Plant spokesman said that any overspray which settles on a car should be removed promptly with soap (detergent) and water, since delay increases the removal problem.

Anthony J. Crone; "Jazz Variants," by John Beck; and "Pas de Deux," by Armand Russell.

Ceramics expert to talk at Museum

John P. Cushion, a well known lecturer on pottery and porcelain and former senior research officer of the Victoria and Albert Museum, will deliver an illustrated lecture on "English Tin-Glazed Earthenware" at 4 p.m. Sunday, April 9, in the Museum of Art. His presentation is being sponsored by the Friends of the Museum of Art.

Tin glazing is a technique that produces an opaque colored finish that is characteristic of such forms of earthenware as faience and English delftware.

The process was first discovered in Faenza, Italy, where local glazing

(Continued on page 6)

STATE APPROPRIATION SUPPORT PER EQUIVALENT FULL-TIME STUDENT (EFTS)

NOTE: Percentages are cumulative.

Penn State's 1978-79 Budget Presentation

Editor's note: President Oswald testified March 31 before the Senate Appropriations Committee, asking for a reassessment of priorities and equitable treatment for the University in the Governor's proposed budget for 1978-79. INTERCOM is reprinting excerpts from the University's Budget Presentation booklet, which was prepared for the House and Senate Committees. Dr. Oswald appeared before the House Committee on March 10. This is the third of the five-part series.

STATE APPROPRIATION PER STUDENT: PENN STATE IS LOWEST

Penn State is the largest institution of higher education in the Commonwealth. On a per student basis, however, Penn State's appropriation is the lowest of any four-year public college or university in Pennsylvania. In 1977-78, the overall average State appropriation per student for Pennsylvania's four-year public colleges and universities was \$2,100; the appropriation per student for Penn State was \$1,750, or 16.6 percent less. To increase Penn State's appropriation per student to the State average, an additional \$350 for each Penn State student would be required.

Penn State's average cost to the Commonwealth of \$1,750 per student is based upon the total appropriation, including not only Instruction but also Agricultural Research and Cooperative Extension, Other Organized Research, Student Aid, and Medical Education. Penn State carries special responsibilities for certain of these functions not carried by other institutions. If support for these special functions were excluded from the

support-per-student calculations, Penn State receives only \$1,340 per student, or 36.2 percent less than the State average.

The chart shows the extent to which Penn State is underfunded in comparison with other state-related and state-owned institutions.

A QUESTION OF PRIORITIES

Within the State:

The Governor's 1978-79 Executive Budget states that approximately 70 percent of the budget increase is directed toward "mandated" programs and, therefore, priority consideration must be given to these areas; yet no provision is made for the "mandated" cost increases facing Penn State. The Governor states that there are no provisions for salary increases for State employees; yet, within individual agency budgets, provision is made for annual Civil Service step increases (5.0%) for substantial numbers of State employees (estimated to be 45 percent of the employees). The recommended appropriation level in the Governor's budget does not allow for any salary adjustments for college and university employees. When looking at priorities it is important to note that 18 of 32 agencies/offices are listed for percentage increases higher than the overall percent increase of 7.2 percent in the General Fund Budget at the same time higher education is recommended for no increase:

1. State Police (28.4%)
2. SERS (27.8%)
3. Commerce (16.4%)
4. Treasury (15.8%)
5. General Services (14.8%)

6. Public Welfare (13.5%)
7. Transportation (12.9%)
8. Executive Offices (10.7%)
9. Historical and Museum Commission (10.6%)
10. Justice (9.7%)
11. Probation and Parole (8.9%)
12. State (8.2%)
13. Lieutenant Governor (8.0%)
14. Education (General Government only (7.9%))
15. Environmental Resources (7.9%)
16. Governor's Office (7.8%)
17. Auditor General (7.5%)
18. Tax Equalization Board (7.4%)

Higher Education (0.0%) — for second year in a row

Copies of Penn State's Budget Presentation Booklet may be obtained by contacting Arthur Cierro, Office of Public Information and Relations, 312 Old Main (phone 865-7517).

Funding Sources

For further information, call 865-1372

(08-1) Three NSF programs have a July 7, 1978, "target date" (cutoff date for review): Ecological Sciences Proposals (Dr. Robert McIntosh 202-632-7324), Population Biology and Physiological Ecology Proposals (Donald Kaufman 202-632-7317), and Systematic Biology Proposals (Dr. Jason Lillegren 202-632-5846). (Ref. NSF Bulletin March 1978)

(08-2) Experimental Projects for the Improvement of Science Education Resources are funded by the NSF. The program includes undergraduate science education, information dissemination, science and engineering resource center, and equipment. Contact Dr. Alfred F. Borg, 202-282-7777.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curbs. All employees who are interested in promotion may apply by calling the Employment Division, 380-1387 (network line 475-1387). Applications for these staff vacancies will be received until 5 p.m., Apr. 13. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT AUDITOR — CONTROLLER'S OFFICE, University Park. Responsible to the Audit Manager for performing limited scope audits and assisting in larger audits to appraise: extent of compliance with University policies and procedures; adequacy and reliability of records and management information reports; soundness and adequacy of accounting, financial, and other operating controls; and safeguarding of assets within any of the diverse operational, financial, and administrative functions or organizations of the University as directed by and under the supervision of the Audit Manager or the Auditor in charge of assigned audits. Bachelor's degree (or equivalent) in accounting or related field, plus over one year of directly related experience in auditing or accounting areas.

SENIOR SYSTEMS PROGRAMMER — INTER-COLLEGE RESEARCH PROGRAMS, University Park. Responsible to the Manager of the Maintenance and Evaluation Group in the Computer Center for maintenance of large IBM operating systems. Analyzes software system failures, generates new releases of operating systems and communication controller software, and monitors utilization of current resources. Develops and documents operating procedures. Collects and reduces information relative to system performance. Prepares, integrates, and tests operating system enhancements. A bachelor's degree in computer science, plus two years' experience in systems programming on a large IBM system. A thorough knowledge of assembler language is mandatory. The applicant must have experience in system generation/modification and a knowledge of operating system concepts.

ASSISTANT HEAD, MANAGEMENT DEVELOPMENT SERVICES — CONTINUING EDUCATION, University Park. With minimum direction from the Head of Management Development Services, initiate broad programs of management development and supervise all management development professional and clerical personnel. Develop, implement, and evaluate academic content of management development educational activities; assign faculty, observe and evaluate faculty performance; recruit full- and part-time faculty; provide leadership in promoting Management Development Services throughout the Commonwealth; develop management education proposals; prepare appropriate reports; teach in management program as time permits. A master's degree with at least five years of related experience in management education, business or industrial management. Experience in working with people, supervision and program administration necessary. Education background and experience sufficient to secure academic rank is desirable.

Arts roundup

(Continued from page 5)

materials contained tin oxides. Tin oxides produce a glaze that is opaque and this opacity distinguishes tin glazing from other kinds of surface treatment.

Mr. Cushion is the author of several books, including *Pocket Book of British Ceramic Marks*, *Animals in Pottery and Porcelain* and *Pottery and Porcelain Tableware*.

Symphony to play Beethoven's "Pastorale"

The Penn State Symphony Orchestra will present its spring concert at 8:30 p.m. Saturday, April 8, in Eisenhower Auditorium.

The program will include the Overture from Wagner's *Die Meistersinger*, Piano Concerto in C Minor by Rachmaninoff, and Beethoven's Symphony No. 6 in F Major, *Pastorale*.

D. Douglas Miller, orchestra conductor and associate professor of music at the University, says he chose *Pastorale* because its theme is appropriate for spring.

Penn State Intercom

News in Brief

Berks Campus campaign passes \$1 million mark

The Partners in Progress campaign at the Berks Campus has succeeded in raising \$1,174,631 for the construction of a new Human Resources building on the Spring Township campus.

Nearly 800 individuals, businesses and foundations in Reading and Berks County have contributed gifts and three-year pledges of support ranging from \$5 to \$100,000.

Local corporate, business and foundation pledges have been especially generous, according to Howard O. Beaver Jr., general chairman of the campaign. The chairman of the Leadership Division of the campaign, which was charged with solicitation of major industries and foundations, was Joseph Snook, chairman of the Bank of Pennsylvania Board of Directors.

Mr. Beaver, while thanking the more than 350 volunteer workers for the campaign, also urged them to continue their efforts to secure additional pledges.

"We have been trying for nearly six months to build a \$1 million physical education/convention center that will complete the basic 'core' facilities of the campus," Mr. Beaver said. "But in order to construct the best possible building, we have to surpass our \$1 million mark by a comfortable margin."

Additional pledges will cover site preparation and design costs, leaving a larger sum for "bricks and mortar."

Colloquy bringing Michener, Rudolph

Author James A. Michener will open Colloquy's week-long "Sports in America" program at 8 p.m. Monday, April 17, in Eisenhower Auditorium. His talk is free, but tickets should be obtained at the HUB desk either today or tomorrow (April 13-14).

Mr. Michener's most recent book is *Sports in America*. He is the author of a number of best-selling novels, among them *Hawaii* and *Centennial*.

Colloquy's second speaker will be Wilma Rudolph, the Olympic champion runner. Her talk is scheduled at 8 p.m. Monday, April 24, in Eisenhower, and tickets will be available at the HUB desk April 18 through 24.

Other workshops and talks planned for the program include Dr. John A. Lucas, professor of physical education, speaking on "The 1980 Olympics," at 2:15 p.m. April 17 in the HUB main lounge. Dr. Dorothy V. Harris, professor of physical education, will discuss "The Essence of Sport" at 1 p.m. April 19, also in the HUB main lounge.

APL seminars begin April 25

The Penn State Computation Center, long known for its excellent batch system, also offers one of the finest interactive programming languages, APL.

Faculty and staff having tasks which they suspect might be able to use interactive computing can find out more about APL by attending a seminar series which will be offered spring term

Tuesdays and Thursdays, April 25 and 27 and May 2, 4, 9 and 11. All sessions start at 7:30 p.m. in Room 201 Business Administration Bldg.

APL is easy to learn and use because it has simple, uniform rules of syntax, a free-form decimal input for numeric data, a large set of primitive functions, and array operations. In addition, its "user-defined" functions (programs) are straight-forward extensions to primitives. It allows easy use of a wide number of existing library functions (programs) and an immediate execution mode completely free of irrelevant key words. It also has many fewer lines; APL functions typically have 1/10 or fewer statements than other languages.

Power savings urged

Although the stringent conservation methods put into effect at the University because of the critical electrical situation have now been relaxed, University officials are requesting continuance of the restraints as a part of Penn State's overall energy and cost savings program.

The request was made in Electrical Emergency Bulletin No. 3, issued by the Executive Energy Conservation Committee. It was signed by committee chairman Ralph E. Zilly, vice-president for business.

The West Penn Power Co. on April 1 informed the University that all mandatory restrictions on electrical use have been removed.

In his letter, Mr. Zilly pointed out that the cost of fuel and energy purchased by the University continue to rise. The cost of coal recently increased 10 percent. The surcharge authorized for West Penn Power Co. by the Public Utility Commission will have a significant impact on University electrical costs during the next several months, and this probably will be followed by a rate increase.

Since the University for the most part can operate effectively at reduced levels of energy consumption, work areas and classrooms will be kept at approximately 68°F when occupied, and necessary ventilation will be supplied. Storage areas and other work areas when unoccupied should not exceed 55°F and related ventilation will not be provided.

Full cooperation from students, faculty and staff enabled the University to exceed the 25 percent electrical reduction goal during the extended term break, Mr. Zilly said, and to achieve a 10 percent reduction goal since that time.

He also asked continued cooperation in reporting any necessary repairs promptly to the Physical Plant Service Desk (865-4731).

(Continued on page 4)

Senate establishes minimum retention, transfer standards

The University Faculty Senate approved legislation setting minimum standards for the retention and transfer of students in Colleges and majors at its April 4 meeting.

Under the new legislation, the minimum standard for transfer will be a 2.00 cumulative average for all University courses. The minimum standards for retention will be those listed in the current "drop rule," Rule 54-52.

Program faculty, with the approval of their dean and the Faculty Senate, may establish more restrictive standards for transfer or retention based on academic criteria. Such standards should be submitted to the appropriate dean for approval and then to the Senate Committee on Undergraduate Instruction. Ultimately, they must be approved by the Faculty Senate.

According to Dr. E. Willard Miller, chairman of the Subcommittee on Retention and Transfer Policies, the fundamental principle behind the new legislation was equity. Dr. Miller, associate dean for resident instruction in the College of Earth and Mineral Sciences, also pointed out that the legislation includes an academic checkpoint for students entering a major that has not existed in the past.

The new legislation, as amended by Dr. George Franz, assistant professor of history at the Delaware County Campus, provides that a student enrolled in a College must gain entrance to a major prior to his seventh term to continue as a degree candidate. Dr. Franz, chairman of the Committee on Undergraduate Instruction, asked that all program faculty who intend to apply for additional restrictive standards do so as soon as possible, to assist the committee in implementing the new rule. (For more complete coverage of the new legislation, see the March 30 INTERCOM.)

President Oswald spoke briefly about what he called two of the highest priorities currently receiving his attention, the University's 1978-79 funding and Penn State's overall planning efforts. Dr. Oswald noted that during the month of March he appeared before the House of Representatives and Senate Appropriations Committees of the Pennsylvania Legislature.

Referring to the University's Budget Presentation booklet on which his appearances before those committees were based, he said the following quotation best sums up the University's position:

"As we speak of the Governor's

proposed budget we are, of course, aware of Pennsylvania's overall situation and fiscal limitations; and we are not proposing any increase in the overall magnitude of the State budget. Our basic and over-riding position throughout this document relates to the need for reassessing the priorities and for reasonable equity within this budget."

Dr. Oswald noted that the original budget proposed by Governor Shapp in February called for no increase in funding for higher education for the third year in a row, a situation he called "terribly alarming." He added, however, that he was encouraged by revisions to that budget currently being considered by the House Appropriations Committee that would add about \$5 million to the University's appropriation.

Following his remarks, Dr. Oswald was asked about a recent article in *The Daily Collegian* that referred to the possibility of a change to the semester system in the University's calendar.

He said such a change has been discussed informally by the Faculty Advisory Committee, the Senate Council, and other groups, but that there was no plan for action at this time. The finances of a change to the semester system, he said, are under consideration.

In other action, the Senate approved a proposal for rewording Senate Policy 34-58, which deals with course availability. The change strengthens the recommendation that students of lower term rank, but for whom a popular course is a requirement, be given priority in registration over students for whom the course is not required.

Also approved was a change in Senate Policy 54-20, which deals with academic warning. It specifies that a student whose grade-point average drops below the 2.00 minimum cumulative average for graduation will receive academic warning, unless drop action is taken under other policies.

In addition, the Senate received an informational report on several special admissions programs and approved a policy for regular reporting on such programs.

Dr. Eugene R. Melander, assistant vice president for undergraduate studies, and Warren R. Haffner, director of the Division of Admissions, Records, and Scheduling, presented a report on the University's registration and preregistration procedures. Dr. Melander said the most outstanding characteristic of

(Continued on page 2)

Penn Staters

Dr. Charles L. Hosler, Jr., dean of the College of Earth and Mineral Sciences, has been elected to the National Academy of Engineering. Academy membership is the highest professional distinction that can be conferred on an engineer.

The Academy is a private organization established to help advise the federal government on matters of science and engineering, and to encourage engineering research. Those honored have made important contributions to engineering theory and practice, or have demonstrated unusual accomplishments in the pioneering of new and developing fields of technology.

Dr. Hosler was among 100 new members of the Academy, whose ranks now consist of 857 U.S. members and 58 foreign associates. Dr. Hosler was chosen for his "contributions in the application of meteorology to engineering problems, such as power plant siting and cooling."

Dr. Hosler has been a member or chairman of many committees and panels of the National Academy of Sciences. Recently, he served on the National Aeronautics and Space Administration (NASA) committee charged with choosing the design and experiments for the planned space shuttle flights. He also conceived the idea for an Atmospheric Physics Laboratory, which will be part of Space Lab, scheduled to be orbited in 1979 or 1980.

Floyd B. Fischer, vice-president for Continuing Education, received the Julius M. Nolte Award of the National University Extension Association at that organization's annual meeting in Indianapolis, Ind., Monday, April 10. Mr. Fischer is a past president of N.U.E.A. He is currently chairman and a member of the Executive Committee of the Council on Extension of the National Association of State Universities and Land Grant Colleges.

The American Academy of Religion recently announced the election of **Conrad Cherry**, professor of religious studies, as the senior editor of its *Studies in Religion Monograph Series*. The academy is the major professional organization for the field of religious studies. The monograph series for which Dr. Cherry will be responsible publishes scholarly works in the field including historical, methodological, critical, and constructive approaches. Dr. Cherry is currently on leave from the University to complete work on a new book, *Nature and Religious Imagination*. From Jonathan Edwards to Horace Bushnell.

Zeljko D. Kujundzic, associate professor of art at Fayette, has been invited to exhibit one of his sculptures, along with a drawing and photos of his architectural work, at the International Sculpture Conference to be held in Toronto, Canada this spring. This is the first time this biennial event will be held outside of the United States since its inception in 1958 by the National Sculpture Center at the University of Kansas. Some 1,200 delegates will attend, but only about 50 of them have been invited to participate in the sculpture exhibit. Prof. Kujundzic's piece, a 45-inch high abstract wood carving, is titled "Ancestor."

Dr. C. Eugene Allen, professor of animal science at the University of Minnesota, is serving as visiting professor of animal science at the University through Sept. 30. Dr. Allen is working primarily with Dr. Roy J. Martin, professor of animal nutrition, shaping techniques and procedures useful in their research areas of growth and development of animals and what causes muscle versus fat tissue development. A graduate of the University of Idaho with a B.S. in animal

science, Dr. Allen received both his M.S. and Ph.D. in meat and animal science at the University of Wisconsin. Last year he was awarded the Meat Science Research Award from the American Society of Animal Science.

Bookshelf

Dr. Alan E. Kazdin, professor of psychology, is the author of *History of Behavior Modification: Experimental Foundations of Contemporary Research*, written under the auspices of the National Academy of Sciences and published by the University Park Press of Baltimore, Md. The book emphasizes the experimental findings and methods of psychology upon which behavior modification has drawn, leading to treatment programs in a broad spectrum of therapeutic, educational and health care facilities.

Dr. Kazdin, who is president of the Association for Advancement of Behavior Therapy, has co-authored another book, *Evaluation of Behavior Therapy*, with G. Terence Wilson of Rutgers University. Recently published by Boller Publishing Company, the book evaluates issues, evidence and research strategies of behavior therapy in addition to recommending future approaches to treatment evaluation.

Additionally, Plenum Publishing Company has recently released *Advances in Clinical Child Psychology*, co-authored by Dr. Kazdin and Benjamin B. Lahey of the University of Georgia. Written as a reference for specialists, the book is part of a series which each year presents an overview of new developments in the treatment of children.

Dr. John T. Neisworth, associate professor of special education, and **Dr. Robert M. Smith**, assistant provost, are the authors of two new textbooks. *Retardation: Issues, Assessment, and Intervention*, has been published by McGraw-Hill Book Company as part of the Special Education Series, for which Dr. Smith serves as editor. The book features a consistent behavioral approach and contains sections on the biology of retardation, health care management, and alternative living arrangements. Dr. Chester M. Berlin, Jr., professor of pediatrics, is the author of the chapter dealing with medical issues.

Evaluating Educational Environments has been published by the Charles E. Merrill Publishing Company. This text focuses on how one can evaluate a child's environment. The perspective expressed in this book is that assessing the child is only one source of information necessary for educational planning; equal attention must be given to evaluating the environment within which a youngster learns.

The Kosciuszko Foundation in New York has just published the third edition, revised and enlarged, of the book, *Introduction to the Polish Language*, prepared by **Dr. Sigmund S. Birkenmayer**, professor of Slavic languages, in collaboration with Dr. Zbigniew Folejewski of the University of British Columbia.

The revisions are largely the result of Dr. Birkenmayer's 1974 research leave in Poland, where he studied the changes which had occurred in written and spoken Polish between 1946-74. The new linguistic and cultural materials he collected have been incorporated into the updated edition, which consists almost entirely of conversational lessons based on everyday life and situations in Poland. The book is intended for use in first- and second-year Polish courses. All the conversations have been recorded on tape by native speakers of Polish and are available from the University's Listening-Learning Services.

Senate

(Continued from page 1)

the process is its flexibility, considering the number of people involved. He said it might be possible to design a procedure that would cost less, but that some flexibility would have to be sacrificed.

Dr. Edward H. Klevans, professor of nuclear engineering, represented an Ad Hoc Committee of Engineering Senators in presenting a proposal that the following be added to Rule 34-89, dealing with course drops:

"Use of the course drop from the beginning of the fourth to the end of the eighth week of classes is limited to a maximum of 12 credits for baccalaureate degree candidates and 6 credits for associate degree candidates. The credit limits specified apply to all courses taken prior to the awarding of a degree."

The proposal, which was discussed briefly, will be presented for action at the next Senate meeting.

A review procedure for promotion and tenure review committees was discussed, but no action was taken. The procedure, proposed by the Committee on Faculty Affairs, would provide guidelines for consultation among review committees at various levels in cases of divergent opinions.

A proposal by the Senate Committee on Curricular Affairs concerning student membership on that committee was amended and passed. Under the new membership guidelines, the committee will include one faculty senator each from Behrend College, Capitol Campus and the College of Medicine.

Arts Roundup

Concert Blue Band to perform April 23

The Concert Blue Band, under the direction of Dr. Ned C. Deihl, professor of music education, will perform in concert at 3 p.m. Sunday, April 23 in Eisenhower Auditorium.

"We're planning to unveil our Penn State Jazz Blue Band," Dr. Deihl said. The Jazz Blue Band features 21 musicians under the direction of Larry Fisher, graduate assistant with the Blue Band and doctoral candidate in music education. The jazz group will be featured in Rhapsody for Jazz Ensemble and Concert Band.

This year's Concert Blue Band contains 85 musicians. They will perform selections by Holst, Vaughn Williams, Nellyb, Sullivan and Bach. Two of the major works will be Sullivan's *The Ballet*, *Principale Polka* and Bach's *Toccata and Fugue in D Minor*.

Students will be admitted to the concert without charge. A \$1 donation will be accepted from other patrons, with the proceeds marked for the James W. Dunlop Memorial Scholarship Fund.

Chamber orchestra to play April 19

Musica da Camera, the University's chamber music orchestra, will present its spring concert at 8:30 p.m. Wednesday, April 19, in the Music Bldg. recital hall.

The program will include Brandenburg Concerto No. 5 (BWV 1050), by Johann S. Bach; Symphony No. 36 in C Major K. 425, by Wolfgang Mozart; and "Siegfried Idyll" by Richard Wagner. The Wagner work is one of the few 19th century pieces in the group's repertoire. It is also Wagner's only piece suitable for small chamber orchestras, according to D. Douglas Miller, Musica da Camera's conductor and associate professor of music.

The Bach Concerto will feature solos by violinist Richard Lohmann, the group's concert master, and two faculty guests, harpsichordist June Miller, associate professor of music, and flutist Overda Page, instructor of music.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed, although names will be withheld on request.

Editor's note: The officers of the University Faculty Senate recently put together a list of questions dealing with non-academic policies and procedures. Since a number of these questions are of general interest to the University community, we are running them and the answers in INTERCOM.

QUESTION:

What is the rationale for the auxiliary accounting system? The form of the data available does not obviate the need for unit accounting systems and merely puts more red tape into the process.

ANSWER:

The rationale for auxiliary accounting is to provide faculty and staff with current, accurate information on all general and restricted funds budgets and thereby supplant as many ad hoc systems as possible. It has been successful and works very well in the College of Arts and Architecture, and we invite faculty to visit the Financial Office there to see it in operation. In other Colleges, including Engineering and Science, development of systems to handle restricted funds is giving us problems. We hope to work out these problems with Management Services this year and thus decrease the red tape and improve the service. In short, the system is designed to improve accounting services to the faculty and administrators at the College and department level, and, in fact, it is working in Arts and Architecture. It remains to be seen if we can be completely successful as we move to other locations.

Steve A. Garban
Controller

QUESTION:

Why can certain forms only be obtained at Willard Bldg, even though anyone can get one by just asking the receptionist?

ANSWER:

The question seems to indicate a misunderstanding. Personnel representatives in all Colleges and major administrative units and business managers at the Campuses are provided with most personnel forms. There are certain exceptions — forms which require special counseling in the Personnel Office before completion. This decentralization of the distribution of forms is intended to provide ease of access to faculty and staff. However, in an effort to minimize costs the keeping of large stocks of such forms in every area is discouraged, and minimal supplies are distributed. Thus, occasionally, a Personnel Representative or Business Manager may run out of a particular form. In such cases, the form will be secured for the individual who has requested it.

James Wagner
Director of Personnel Services

Colloquy, "Sports in America," John Lucas, physical education, on "The 1980 Olympics," 2:15 p.m., HUB main lounge; James A. Michener, author, will speak, 8 p.m., Eisenhower Auditorium.

Shakespeare film, *Hamlet* (Oliver), 6:30 p.m., Room 101 Chambers.

Cinematheque, Huston, *The Maltese Falcon* (1941), 7 and 9 p.m., HUB assembly hall.

france-cinema, Robert, *War of the Buttons*, 7 and 9 p.m., Room 101 Kern.

Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Richard Lohmann, violin, accompanied by David Vogel, viola, and Jill Olson, piano, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 18

Friends of the Museum Gallery Talk, Walton J. Lord, art history, PSU, on "Reflections on Cops, Beavers and Otherwise," 10:30 a.m., Museum of Art.

The Artists Series will present the Cleveland Quartet Friday night. Members (from left) are Peter Salaff and Don Weilerstein, violin; Martha Strongin Katz, viola; Paul Katz, cello.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club; James A. Brundage, University of Wisconsin, Milwaukee, on "The Church's Attitude Towards Sex and Pornography," Native American Education symposium. Dr. William Dement, director of education programs, Bureau of Indian Affairs, Washington, D.C., on "Organization and Administration of Indian Programs," 12:30 p.m., Room 112 Kern.

france-cinema, *War of the Buttons*, 7 and 9 p.m., Room 101 Kern.
Artists Series, Keaton films, *The Blacksmith and Our Hospitality*, 8 p.m., Eisenhower Auditorium.
English colloquy, Augustus Kolich, English, on "Uses of Autobiography in the Contemporary Novel: Fictionalized Recall and Frank Conroy's *Stop-time*," 8 p.m., Room 101 Kern.

Wednesday, April 19

Commons Kaleidoscope, "Chemistry and Man," noon, Kern lobby.

Colloquy, "Sports in America," Dorothy Harris, health, physical education, on "The Essence of Sport," 1 p.m., HUB main lounge.
5 O'clock Playwright's Theatre, Nancy Patton, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.

Naiads Synchronized Swim Show, student preview, 7 p.m., Natatorium.

Sports: men's lacrosse, vs. Delaware, 7 p.m., Jeffrey Field.

Commonplace Theatre, *The Conversation*, 7:30 and 9:30 p.m., Room 112 Kern.

Air Force ROTC Lecture, Col. Carlyle S. Harris, an ex-prisoner of war, on "Leadership in a POW Environment," 8 p.m., Room 105 Forum.

Comparative Literature Program film, *Certrude Steiner: When This You See, Remember Me*, 8 p.m., Room 151 Willard.

Musica da Camera, chamber music, 8:30 p.m., Music Bldg. recital hall. Free.

Thursday, April 20

Deadline for Reserve Reading Lists for summer term to be submitted to Reserve Reading Room, Room W-11, Pattee Library.

Sports: baseball, vs. Mansfield, 3 p.m., Beaver Field.

5 O'clock Playwright's Theatre, Patton, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.

Naiads Synchronized Swim Show, 8 p.m., Natatorium.

Friday, April 21
5 O'clock Playwright's Theatre, Patton, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.

Sports: men's volleyball, ECVL Championships, 7 p.m., Rec. Bldg.

Naiads Synchronized Swim Show, 8 p.m., Natatorium.

PS Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall. Free.

Saturday, April 22

Shaver's Creek Nature Center, Adventure Series (by registration only - 865-1851), for children ages 7 and up, 10 a.m.-3 p.m., Stone Valley.

Sports: men's golf, vs. Alumni, 1 p.m., Blue Course; men's lacrosse, vs. Rutgers, 2 p.m., Jeffrey Field; men's volleyball, ECVL Championships, 7 p.m., Rec. Bldg.; women's lacrosse, vs. West Chester, 2 p.m., IM Field.
Naiads Synchronized Swim Show, 8 p.m., Natatorium.

Sunday, April 23

University Chapel service, Dr. George Jones, Office of Religious Programs, Ball State University, 11 a.m., Eisenhower Chapel.
Shaver's Creek Nature Center, Streams and Valleys, 2-4 p.m., Stone Valley.

Blue Band concert, 3 p.m., Eisenhower Auditorium.

Sports: baseball, vs. Rider (2), 3 p.m., Debra Sullivan, soprano, 3:30 p.m., Music Bldg. recital hall.

france-cinema, Malle, *Elevator to the Gallows*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, April 13

Association for Computing Machinery, Terry Baker, IBM, on "Organizing for Structured Programming," 7:30 p.m., Room 112 Buckhout.

Computation Center, "JCL Examples," 7:30 p.m., Room 105 Osmond.

Psychology, Heidi Koller, Johannes Gutenberg University, Mainz, on "Antecedents of Exploratory Behavior in Infants," 8 p.m., Room 351 Moore.

Friday, April 14

Geoscience, Frank Dachtler, geosciences, on "Large Meteorite Collisions as a Factor in Climatic Change through Geologic Time," 4 p.m., Room 112 Walker.

Monday, April 17

Biochemistry and Biophysics, Donald Wetlaufer, Delaware University, on "Protein Folding Pathways: Chemical Evidence and Biological Significance," 3:55 p.m., Room 101 Althouse.

Fuel Science, Michael Schick, Grumman Aerospace Corp., on "Kinetics of Hydrogen-Air Ignition Sensitized by NO_x Applications to a Scram Jet Combustor Test," 4 p.m., Room 301 Steidle (Mineral Industries).

Computation Center, "Job Control Language," (1 of 6), 7:30 p.m., Room 105 Osmond.

Tuesday, April 18

Engineering Science and Mechanics, B. Langenecker, director, PVL Physikalische Versuchsanstalt, Waldbach, Austria, on "The Effect of Ultrasound on the Behavior of Metals," 9:30 a.m., Room 226 EE West.

Biochemistry and Biophysics, Donald Wetlaufer, Delaware University, on "Protein Secondary Structure-Restructure: Directions for Protein Folding Simulation," 11:10 a.m., Room 101 Althouse.

Food Science, G. Dorsett, on "Effect of Slaughter-Weight on Pork Textural Quality," 11:10 a.m., Room 201 Borland.

Analytical Chemistry, Lance Rose, on "Chemical Identification and Quantitation of the Oak

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Leaf Roller Pheromone Complex," 1 p.m., Room 339 Davey.

Research Applications of Computers, Paul K. Warne, biochemistry, on "Inside View of Microcomputers," 1 p.m., Room 111 Boucke.

Solid Waste Management, Roger De Cesare, Solid Waste Division, Metals Research Center, College Park, Md., on "Research Accomplishments in Resource Recovery at U.S. Bureau of Mines," 2:20 p.m., Room 128 Sackett.

Population Issues Research Office, Thomas Falk, Stockholm School of Economics, on "Urban Turnaround in Sweden: Population Dispersal in Progress," 2:30 p.m., Room 174 Willard.

Chemical Engineering, Robert L. Laurence, University of Massachusetts, on "Diffusion of Molten Polymer Blends," 3:45 p.m., Room 140 Fenske.

Physics/Astronomy, Philip M. Stone, Center for Energy R & D Administration, on "Role of Tokamak Impurities in Fusion Plasmas," 3:50 p.m., Room 117 Osmond.

Genetics, Robert Quivy, on "Transformation in the Blue-Green Algae," 3:55 p.m., Room 52 Frear.

Plant Pathology, Dick Stevenson on "Epidemiology: To Present," 3:55 p.m., Room 213 Buckhout.

Engineering Science and Mechanics, R. C. Bradt, ceramic science, on "Structural Aspects of Fracture Mechanics Parameters in Ceramics," 4 p.m., Room 113 Sackett.

Computation Center, "Fortran-PL1 Conversion," (1 of 2), 7:30 p.m., Room 105 Osmond.

Gene Studies, Gene Derrickson, on "The Chinese Worker and His Union," 7:30 p.m., Rabe Books Room, W342 Pattee.

Wednesday, April 19

Computation Center, "Job Control Language," (2 of 6), 7:30 p.m., Room 105 Osmond.

Thursday, April 20

Ceramic Science, Low Fleischer, Westinghouse Electric Corp. Research Lab, on "Ceramics for Controlled Thermoelectric Parameters," 11 a.m., Room 301 Steidle (Mineral Industries).

Chemistry, A. J. Hopfinger, Case Western Reserve University, on "Conformational Analysis in the Design of Biogenic Compounds," 12:45 p.m., Room 333 Whitmore.

Physics, H. D. Hagstrum, Bell Laboratories, on "Ion Neutralization Spectroscopy," 3:50 p.m., Room 117 Osmond.

Agronomy, Gregory Ferguson, on "Long Term Effects of High Rate Dairy Manure Slurry Applications on Selected Soil Chemical Properties and Corn Yield," 3:55 p.m., Room 111 Tyson.

Rail Transport, M. Rugs, engineer, Bessemer and Lake Erie Railroad Company, on "Railroading: An Attraction for Young Engineers," 3:55 p.m., Room 62 Willard.

Astronomy, Paul C. Joss, MIT, on "X-ray Bursts and Neutron-star Surface Nuclear Flashes," 4 p.m., Room 445 Davey.

Microbiology and Cell Biology, Jane Gibson, Cornell University, on "Transport in Cyanobacteria," 4 p.m., Room 52 Frear.

Computation Center, "Fortran-PL1 Conversion," (2 of 2), 7:30 p.m., Room 105 Osmond.

Exhibits

Anthropology Museum: open Tuesday and Thursday, 9-11:45 a.m. and 12:45-5 p.m., Wednesday, 9 a.m.-noon. Archaeology of Mezzo-America; Ethiopian collection.

Chambers Gallery: Terry L. Bowie, paintings, through April 20.

Earth and Mineral Sciences Museum: open Tuesday-Friday, 9 a.m.-5 p.m., weekends, 1-5 p.m., Steidle (Mineral Industries).

Kern Commons Gallery: Ed Leos, photography, "Five Pedologues and an Introduction," Keith Mallitt, airbrush paintings, through April 22. Sylvia Roberts, patchwork, and David Strimbering, jewelry, opens April 14.

Museum of Art: open Tuesday-Sunday, noon-5 p.m., tours, 1:30 p.m., Sunday. Faces of Spain: Goya prints and drawings; American art from the Permanent Collection. Robert Kulicke, painter, designer, craftsman, opens April 16.

Zoller Gallery: Invisions and Christenberry exhibit, opens April 18.

Pattee, East Corridor Gallery: Kent Armstrong, photographs, "Nature of Art."

Penn State's 1978-79 Budget Presentation

Editor's note: President Oswald testified March 31 before the Senate Appropriations Committee, asking for a reassessment of priorities and equitable treatment for the University in the Governor's proposed budget for 1978-79. INTERCOM is reprinting excerpts from the University's Budget Presentation booklet, which was prepared for the House and Senate Committees. Dr. Oswald appeared before the House Committee on March 10. This is the third of the five-part series.

Contrasted With Other States:

The less-than-equitable treatment afforded higher education in the Governor's 1978-79 Executive Budget is counter to trends in many other states. We were able to analyze the state budgets for ten states in the time available for preparing this statement. Our goal was to select neighboring states; we were somewhat limited by the availability of appropriate budget documents. The results, however, show Pennsylvania's 1978-79 budget proposal varies considerably from every other state analyzed relative to higher education appropriations, as shown in Table I.

The following observations can be made relative to the state budget figures presented in Table I:

a. Of the states analyzed, Pennsylvania is the only state to limit higher education to no increase.

b. For those states where data were available for two years, every state except Pennsylvania provided increases for higher education in both years.

c. The increase in appropriations (or increase in appropriations recommended) for higher education is greater than the increase in the total state budget in eight of the ten states for at least one of the two years.

d. In seven of the ten states, the increase in appropriations (or increase in appropriations recommended) for higher education is equal to or greater than the projected 7.0 percent inflation rate for at least one of the two years.

These figures indicate in the strongest way that other states in all areas of the nation are placing a higher priority on higher education than is evidenced in the Governor's budget recommendations. Other states are continuing to recognize that higher education is an investment in the future, and that it is critically important in maintaining a sound state economy. The evidence shows that states with many of the same economic problems that Pennsylvania faces are

OBP/Budget

providing for necessary cost increases for their institutions of higher education. For example, the University of Maine will receive a 5.0 percent appropriation increase for 1978-79; the Governor has recommended a 7.9 percent increase for the University of Connecticut; Ohio State University will receive an increase of 9.0 percent; and the Governor has recommended an increase of 6.5 percent for the University of Massachusetts.

Three years at the same appropriation level in the face of a two year cumulative increase of 15.0 percent in the General Fund Budget suggests that higher education is extremely low on the list of priorities used to make up the proposed 1978-79 Pennsylvania budget prepared by the Governor. It is also clear from the

information above that within the budgets of other states, higher education is receiving much more favorable consideration. We submit that the priorities embedded in the Governor's 1978-79 Executive Budget relative to higher education funding are out of step not only with national trends but with the needs and priorities of the people of Pennsylvania. We would ask that the Legislature take these points into consideration during their deliberations on the 1978-79 budget.

Copies of Penn State's Budget Presentation Booklet may be obtained by contacting Arthur Ciervo, Office of Public Information and Relations, 312 Old Main (phone 865-7517).

News in brief

(Continued from page 1)

World food authority to present Day lecture

"Neglected Aspects of the World Food Issue" will be the topic of Dr. Georg A. Borgstrom at 11 a.m., Monday, April 17 in Kern auditorium. Dr. Borgstrom will present the annual E. A. Day Memorial Lecture in Food Science.

Dr. Borgstrom is professor of food science and human nutrition and professor of geography at Michigan State. He is a recognized authority on world food resources and the author of several books, notably *World Food Resources*, *Focal Points*, *The Hungry Planet*, *Too Many and The Food and People Dilemma*, *The Banquet*, published in Sweden in 1975 and in Norway and Denmark in 1976, is currently being prepared for publication in English. Earlier books were *Principles of Food Science* in two volumes and *Japan's World Success in Fishing*.

The lecture is sponsored through the E. A. Day Memorial Fund within the

Department of Food Science and by the Graduate Council Committee on Lecture Series.

The lecture honors the late Dr. Edgar A. Day, former executive vice president of International Flavors and Fragrances, Inc., who received his M.S. and Ph.D. from Penn State.

Stratford Festival visit part of Shakespeare course

A trip to Stratford, Ontario to the Shakespeare festival is part of the curriculum of the Summer Term Seminar in Shakespeare, English 549.

During the first six weeks of the term, June 13-July 25, Shakespeare's development as a comic dramatist will be discussed. From July 28-31, the class will adjourn to Stratford to see performances of *As You Like It*, *The Merry Wives of Windsor* and *The Winter's Tale*. They will also see *Macbeth*. While in Canada, the class will hold two meetings to discuss the performances.

Because tickets and accommodations must be reserved early, the English

information above that within the budgets of other states, higher education is receiving much more favorable consideration. We submit that the priorities embedded in the Governor's 1978-79 Executive Budget relative to higher education funding are out of step not only with national trends but with the needs and priorities of the people of Pennsylvania. We would ask that the Legislature take these points into consideration during their deliberations on the 1978-79 budget.

Stone Valley opens April 15

The Stone Valley Recreation Area will open for fishing and canoe and rowboat rentals on Saturday, April 15. The lake has been stocked with 4,000 rainbow trout, bass and pickerel. Panfish may also be taken. Persons age 16 and over must possess a Pennsylvania fishing license.

The Mineral Industries Camp Day-Use Area is open daily from 8 a.m. to sunset for picnicking, hiking and visits to the Shaver's Creek Nature Center.

Visitors are reminded of the basic park regulations: admission charges on weekends and holidays, no open fires, no camping, and no swimming. Changes in park regulations for 1978 prohibit all pets in the recreation area and require sailors and canoeists to wear life jackets until the lake water temperature exceeds 50° F.

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services to the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in Promotions may apply by calling the Employment Division, 312 Old Main (network line 475-1387). Applications for the staff vacancies will be received until 5 p.m., Apr. 20. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

TECHNICAL SUPERVISOR, ARTS AND ARCHITECTURE, University Park Responsible to the production coordinator of Department of Theatre and Film for providing supervision of University Theatre Productions in the areas of scene construction, lighting, properties and scenic painting. In addition, the candidate will supervise and train the student production crews entrusted with the execution of the above areas. A bachelor's degree in fine arts, or equivalent, plus a minimum of one year of directly related experience in either an academic or professional scenic studio is required.

FINANCIAL AID COUNSELOR, STUDENT AFFAIRS, University Park Responsible to the Director of Student Aid for counseling students on financial aid matters and for assisting in internal administration of financial aid programs. A master's degree or equivalent in student personnel services, counselor education, or higher education, plus up to one year of directly related experience is required.

SLIDE AND PHOTOGRAPH ARCHIVIST, ARTS AND ARCHITECTURE, University Park Responsible to the Head of the Department of Art History in the organization, maintenance and further development of the slide and photograph collection of the department. Responsible for the acquisition, production, cataloging and filing of slides and photographs, and the supervision of part-time employees and graduate students who assist with these duties. Requires a person who can work well with faculty and students. Bachelor's degree in art or art history or equivalent, plus up to one year of directly related experience is required.

EMEX to offer tours, displays

Tours of the University's new meteorological observatory will be one of the many highlights of EMEX 78 — the "Earth and Man Exposition" to be sponsored by the College of Earth and Mineral Sciences, April 15 and 16.

Among the observatory equipment on the sixth floor of the new Eric A. Walker Building are a minicomputer, used to analyze and display weather data; teletypes that report weather information from all over the country; and the machines that receive facsimile weather charts from the National Weather Service and satellite photos from the National Environmental Satellite Service.

The exposition, a biennial open house sponsored by the Earth and Mineral Sciences Student Council, will feature a wide variety of exhibits and demonstrations representing the College's six departments: geosciences, geography, meteorology, materials science and engineering, mineral economics, and mineral engineering.

Some of the features of wide interest will be displays on the use of ceramic materials in the space shuttle and fiber-optics in communications, the role of coal petrography in coal evaluation and waterlogging of petroleum reservoirs to improve oil recovery.

The mining engineering exhibit will include a coal mine shuttle car recently brought to Penn State for use in research on the safety and durability of mine electrical cables and an oil pumping unit of Deike, Steidle (Mineral Industries) and Walker Buildings, and visitors may begin their self-guided tours of the EMEX displays at any of these three locations. The exposition will run from 1 to 5 p.m. each of the two days.

Penn State Intercom

Tax credits, finances, planning discussed at news conference

Given a choice, he would favor extending federal aid to families of college-going students through the present Basic Educational Opportunity Grant (BEOG) program rather than an income tax credit, President John W. Oswald told a news conference last week.

The tax credit plan would give parents earning \$150,000 a year the same break as those making \$4,000, Dr. Oswald explained. By extending BEOG beyond its present limits to middle income families grants would be dispersed on need, "but need would go higher."

Turning to the two subjects to which he has been giving his highest priority — finances and planning — Dr. Oswald said he was encouraged by the bill introduced on behalf of the Democratic Caucus which would include an increase of approximately 5 percent for the University. [The House passed the bill last week.]

"It would be a 5 percent increase for our basic operations — education, research and the agricultural land-grant function," the President explained. "But it does nothing for the Medical Center or student aid, so that overall the total University would receive a 4.79 percent increase."

Responding to a question as to whether Penn State's budgetary problems may be causing a "brain drain," Dr. Oswald commented:

"The question of a brain drain is a very serious one. When we talk about quality, we're really talking about the quality of the faculty and of the student body. It's a combination of the two."

"We are concerned about our young assistant professors who are not completely established here. If they see comparable institutions receiving appropriation increases yearly and effectively relating them to salaries and working conditions, while Penn State goes three years in a row with no increase, they may well begin to wonder if their chances for long-term progression are better somewhere else."

Approval of a 5 percent increase for Penn State this year could mean the difference between a reasonably normal approach to the budget as opposed to another year of crisis, Dr. Oswald continued.

"One of our big sources of expenditures is appropriate salary increments," he noted. "That has to be considered as we put together a budget so that we remain reasonably competitive and recognize as best we can the increases in living costs our employees are facing."

Because 1978 is a key State election year, the President said he would imagine that the budget will pass without the kind of impasse which confronted the Legislature last year.

But he pointed out that Penn State is not out of the woods yet.

"It is disturbing," the President continued, "that many people still think that once the appropriation was passed last December, all of the cash problems as far as interest and debt service were over. Indeed they are not. Our interest costs are currently running at \$5,000 a day."

(Continued on page 3)

In 1970-71, Dean Palladino served as president of the American Nuclear Society and last year he was named vice-president of Argonne Universities Association.

Memorial Day to be celebrated May 29

The University will observe Memorial Day this year on Monday, May 29.

AAUW book sale to begin April 24

The American Association of University Women will hold its 17th annual used book sale April 24 through 28 at the Wesley Foundation, 256 E. College Ave. Customers may browse and/or buy from 9 a.m. to 9 p.m. each day. There will be a half-price day Thursday, April 27, and bag day will be held April 28. (On bag day, buyers may fill a grocery bag with books for \$1.50 — bags provided.) Proceeds from the sale are devoted to national educational foundations.

Kodak recalls projectors

Some Kodak Carousel and Kodak Ektagraphic slide projectors manufactured since March 1, 1977, are being recalled by Eastman Kodak Company. A manufacturing change made at that time may have resulted in a pinched wire, which could cause shorting and a potential shock hazard.

(Continued on page 7)

Artists Series announces its '78-'79 program

Opera star Beverly Sills, the Minnesota and Pittsburgh orchestras, Mummenschanz mime-mask theatre and pianist Emanuel Ax are among the leading attractions booked by the Artists Series for its 1978-79 season.

The Theatre/Dance Series will open Sept. 29 with Les Ballets Trockadero de Monte Carlo, an all-male dance company which presents devastatingly accurate satires on classical ballet, complete with toe shoes and tutus. They will be followed on Oct. 20 by the legendary Martha Graham Dance Company. On Dec. 3, audiences can "ease on down the road" as music and dance merge in *The Wiz*, a soul to rock musical based on *The Wizard of Oz*. The production won seven Tony Awards, including "Best Musical of 1975." Mummenschanz, a Swiss mime theatre, will perform in Eisenhower Auditorium on Feb. 11, and the following month will bring the Houston Ballet. They will present a full-length production of *Sleeping Beauty* on March 16. The final attraction in the series will be Derek Jacobi, who will perform *Hamlet* with the Stars of the Old Vic. Mr. Jacobi will be remembered for his title role in *Masterpiece Theatre's I, Claudius*.

The Music Series opens Sept. 13 with Emanuel Ax, winner of the Artur Schnabel World Piano Competition in 1974. Other Music Series offerings include *The Manhattan Savoyards* (Oct. 13) in Gilbert and Sullivan's *Pastime*, *Virtuosi di Roma* on Oct. 27, the Pittsburgh Symphony Orchestra on Feb. 2, and the Minnesota Orchestra on April 27. Audiences will have the chance to hear one of the last performances of Beverly Sills, who plans to retire at the end of next season. She will appear April 6.

Two evenings of "Albee Directs Albee" (Jan. 20-21) will introduce a new Drama Series, part of the Fine Arts Series. Among the Edward Albee plays to be performed will be *The Sandbox* (1959), *The American Dream* (1960), *Listening* (1970), and *Counting the Ways* (1976). One of the classical theatre's foremost actresses, Irene Worth, will present a program, "Women of Shakespeare and Chekhov," on March 30.

Also under the auspices of the Fine Arts Series, lovers of the vocal and instrumental ensemble can hear The Waverly Consort. Its singers and instrumentalists will present *Le Roman de Fauvel*, a fully-staged and costumed 14th century satire Sept. 22; a Christmas program on Dec. 13; and Music from the Elizabethan Period on April 11. The Chamber Ensemble will appear Nov. 8; Eugenia Zukerman (flute) and Charles Bonell (guitar), Jan. 12; and the Pittsburgh Chamber Orchestra, Jan. 31.

A new series for the season, The Lively Arts for Young Audiences, will present three programs, one each in music, dance and theatre.

Brochures describing the entire season will be available at Fine Cottage and numerous places on campus beginning the last week in April. For additional

News in Brief

Dr. Nunzio J. Palladino, dean of the College of Engineering, has been elected chairman of the Council of Academic Deans at the University, succeeding Dr. Charles L. Hosler, dean of the College of Earth and Mineral Sciences. He will assume the post on July 1.

The new vice-chairman is Dr. James M. Beattie, dean of the College of Agriculture.

Dean Palladino joined the Penn State faculty in 1959 as professor and head of the Department of Nuclear Engineering. He was named dean of the College in 1966. He holds B.S. and M.S. degrees, with majors in mechanical engineering, from Lehigh University, which in 1964 awarded him an honorary doctor of engineering degree.

Penn Staters

Dr. Robert E. McDermott has resigned as provost of Capitol Campus, effective no later than Jan. 1, 1979 to return to teaching.

In announcing the resignation, President Oswald thanked Dr. McDermott for providing leadership to the Capitol Campus during an important phase of its development.

"The Capitol Campus, founded in 1966, went through the second phase of its development under Dr. McDermott's leadership," Dr. Oswald said. "Staff and administrative functions were refined, faculty development was advanced and significant research programs were initiated."

The first phase at Capitol was a start-up period. During this time, curricula were conceived, faculty and staff appointed, students recruited and a library collection started.

By Jan. 1, Dr. McDermott will have completed seven years as chief executive officer at the Capitol Campus. "I feel that this will be the most advantageous time for the University and the Campus to instigate new leadership," he said in his letter of resignation.

Prior to resuming a faculty position at the University, Dr. McDermott plans on taking a year's sabbatical to pursue studies in land use management.

Dr. McDermott, a professor of forestry, had held numerous high-ranking educational and administrative positions at several universities before becoming chief executive officer at the Capitol Campus in 1972.

At Penn State he had previously served as associate dean of the Graduate School, professor of forestry, acting associate director of the Center for the Study of Higher Education, assistant director of the School of Forest Resources, and head of the Department of Forest Management.

Prior to coming to Penn State, he had been at the University of Arkansas, where he served as dean of the Graduate School, professor of botany, and coordinator of university research. He has conducted extensive research in forest ecology and physiology.

Dr. Oswald and Provost Edward D. Eddy will visit the Capitol Campus soon to discuss with faculty leaders the procedures for selecting a new provost.

Dr. John D. Martz III, professor of political science at the University of North Carolina, has been named head of the Department of Political Science, effective July 1.

He will succeed Dr. Robert S. Friedman, who has held the position since 1968 and who has chosen to return to full-time teaching and research.

A specialist in Latin American politics, Dr. Martz was editor of the *Latin American Research Review* from 1974 until this year. He directed the University of North Carolina's Graduate Studies program and was associate director of its Latin American Institute.

He was also an area studies coordinator for that University's Peace Corps Training Program for Central America and was director of a Summer Institute in International Studies jointly sponsored by the University of North Carolina and Duke University.

In the course of his teaching and research, Dr. Martz has visited 23 Latin American countries. In 1966-67, he conducted field research in Ecuador and Peru with a Guggenheim Fellowship and from 1973 to 1976, he received National Science Foundation Support for field work in Venezuela.

Dr. Martz earned his A.B. at Harvard University, his A.M. at George Washington University, and a Ph.D. at the University of North Carolina. He joined the faculty of the University of North Carolina in 1963 after completing his Ph.D.

Dr. Fred Rapp, professor and chairman of the Department of Microbiology at Hershey, has been named Evan Pugh Professor of Microbiology.

At the Medical Center, he serves also as director of the Special Basic Research Cancer Center and as associate provost and dean for health affairs.

The honor is the highest the University can confer on a member of the faculty. In making the announcement, President Oswald said that Dr. Rapp "is one of the world's leading cancer virologists. His reputation is an international one."

A committee of eight distinguished faculty members, three of them Evan Pugh Professors, reviewed nominations for the honor and made recommendations to the President for appointment.

Dr. Rapp joined the Penn State faculty in 1969 after he had served seven years on the Baylor University College of Medicine faculty and where he had been director of graduate studies in the Department of Virology. Earlier he had served at the Cornell University Medical Center and at

Dr. David B. Geselowitz, professor of bioengineering, has been awarded a Guggenheim Fellowship for "Biophysical Studies in the Field of Electrophysiology."

Dr. Geselowitz is interested in the quantitative relationship between electrical sources in heart muscle cells and the body surface electrocardiogram. Together with a former graduate student, Dr. Walter T. Miller III, he has developed a mathematical model for the human electrocardiogram. This model simulates the normal heart as well as events following a myocardial infarction or heart attack. Clinical studies of its applicability are in progress at Hershey.

The Guggenheim Fellowship will provide Dr. Geselowitz with the opportunity to work in the Division of Pediatric Cardiology at Duke University. This laboratory is active in clinical, animal and theoretical studies of the electrocardiogram.

George N. Payette, assistant director for resident instruction at Mont Alto Campus, was elected president of the Pennsylvania Association of Two-Year Colleges at the concluding session of its 35th annual convention April 6-7. He had previously been vice-president and a member of the program committee. Mr. Payette has been the assistant director at Mont Alto since 1969 after an initial assignment in 1966 as an instructor in English and political science. He has also taught for the Departments of History, General Education, and the School of Journalism. The association is comprised of community colleges, private and proprietary institutions, and Penn State's Campuses.

Dr. Louis Winkler, assistant professor of astronomy, has received a Fred Harris Daniels Fellowship from the American Antiquarian Society. Dr. Winkler will spend two months this summer studying colonial American attitudes toward home health remedies, especially blood letting and hygiene.

the University of Southern California School of Medicine.

His Ph.D. in medical microbiology was conferred by the University of Southern California and he holds an M.S. from Albany Medical College and a B.S. from Brooklyn College.

Dr. Rapp's initial research concerned the replication of measles virus which led to the development of the measles vaccine. In other early work he was instrumental in establishing how viruses convey normal cells to malignancy. His work on the surface of membrane antigens of SV40-transformed cells has led to a better understanding concerning metastases and their control or enhancement. The demonstration that unrelated viruses, such as SV40 and the human adenoviruses, can interchange genetic information in a stable manner, leading to new properties of the hybrid virus was a landmark discovery. Possibly the most important contribution made by Dr. Rapp concerns the demonstration that herpes simplex virus, and subsequently cytomegalovirus, can transform cells in vitro to malignancy.

Dr. Rapp has numerous publications and chapters in most major textbooks dealing with microbiology, virology, and oncology. He is a member of the American delegation to the Soviet Union and France on matters dealing with viral oncology, is an elected member of the Board of Directors of the American Association for Cancer Research, and a member of the Board of Trustees of the Leukemia Society of America. He was elected chairman of the Gordon Research Conference on Cancer (1975) and was one of the Organizing Committee members of the International Meeting on Herpesviruses and Oncogenesis held at Harvard University (1977).

Burt L. Fenner, associate professor of music, has been given an ASCAP Award for 1977-78. These grants, awarded annually by the American Society of Composers, Authors and Publishers (ASCAP), are intended to "encourage writers of serious music."

Mr. Fenner, who teaches composition in the Music Department, has recently completed a commissioned work for the Philadelphia Composers' Forum. The piece, scored for voice, instruments and tape and based on a poem, "I Like a Look of Agony," by Emily Dickinson, will be premiered in Philadelphia.

Dr. Edwin L. Herr, professor and head, Division of Counseling and Educational Psychology, was installed as president-elect of the National Vocational Guidance Association at the recent convention of the American Personnel and Guidance Association in Washington, DC. Founded in 1912, the association's purposes include the promotion of research and the improvement of the standards of professional service in the field of vocational guidance. The membership of NVGA is now comprised of some 9,000 theorists and practitioners in the United States and abroad.

Dr. William W. Reynolds, assistant professor of biology at the Wilkes-Barre Campus, has been awarded an \$8,000 National Science Foundation grant for support of a symposium on

"Thermoregulation in Ectothermic Vertebrates" which he is organizing for the December 1978 annual meeting of the American Society of Zoologists to be held in Richmond, Va. The symposium will be co-sponsored by the ASZ Divisions of Comparative Physiology and Biochemistry, and of Ecology.

Dr. Philip Skell, Evan Pugh professor of chemistry, recently presented a colloquium at the University of New Orleans, La. He discussed reactions of succinimidyl radicals.

New Directions 36: An International Anthology of Prose and Poetry, edited by James Laughlin, includes short fiction by Paul West, professor of English and Fellow, Institute for the Arts and Humanistic Studies. "Another Minotaur," Prof. West's contribution, is based on an incident from World War II, in which sea-crocodiles attacked Japanese troops marooned on a Pacific island.

Dr. Betty van der Smissen, professor of recreation, delivered the first annual J. B. Nash Scholar Lecture at the recent national convention of the American Alliance for Health, Physical Education and Recreation (AAHPER) in Kansas City. Dr. van der Smissen's lecture was entitled "The Dynamics of Recreation." The Scholar Lecture is sponsored by the American Association for Leisure and Recreation.

Bookshelf

Dr. David S. Palermo, professor of psychology, is the author of *Psychology of Language*, recently published by Scott, Foresman and Co. The book focuses on the formulation, testing and evaluation of theories of how people acquire and use language.

For use as a text in courses in psycholinguistics or as a supplementary text in other psychology courses, the book emphasizes development of psycholinguistics and describes researchable problems in the new and growing field.

An authority on psycholinguistics, Dr. Palermo compiled much of his research for this book while at the University of Sydney, Australia, as a participant in the Fulbright-Hays academic exchange program.

Dr. Gideon S. Golany, professor of urban and regional planning, is the editor of a new volume, *Urban Planning for Arid Zones: American Experiences and Directions*, just released by John Wiley & Sons.

According to the publishers, the book is a "pioneering study of the architectural and land use elements of urban and regional planning in desert areas." Dr. Golany, who took his doctorate at Hebrew University, Jerusalem, is the author of three other volumes and has published widely in professional journals on the subject of arid zone planning.

Dr. Richard C. Bradt, professor of ceramic science and engineering, is co-editor of volumes 3 and 4 of a series entitled *Fracture Mechanics of Ceramics*. The work was published recently by Plenum Publishing Corp., New York, N.Y.

Volume 3 is entitled *Flaws and Testing*, and Volume 4 is on *Crack Growth and Microstructure*. The two volumes are the proceedings of an international symposium on the fracture of ceramics held at Penn State last summer. The first two volumes in the series, published earlier, are the proceedings of a conference held in 1972.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Mr. Rockwell

Mr. Zimmerman

Dr. Rosen

Mr. Callu

Four Alumni Fellows to visit University

Four prominent graduates of the University will return to the University Park Campus next week to share their experiences and expertise with students, faculty, and staff as Alumni Fellows.

They are Willard F. Rockwell Jr., chairman of the board and chief executive officer, Rockwell International; Dr. Louis Rosen, director of the Los Alamos Meson Physics Facility and a participant in the development of the atomic bomb; Samuel Gallu, stage and screen writer, director, and producer; and Richard Zimmerman, president of Hershey Foods Corporation.

Dr. Rosen's visit is scheduled for April 23 through 25; Mr. Gallu's for April 23 through 26; Mr. Rockwell's for April 24 through 26; and Mr. Zimmerman's for April 26 through 28.

The Alumni Fellows program, established in 1973, is an invitation to outstanding alumni to meet formally and informally with students and others. When on campus, Fellows attend classes,

offer seminars, give lectures, and conduct question-and-answer sessions. The program is sponsored by the Office of the President, Penn State Alumni Association, and academic colleges of the University.

Mr. Rockwell, whose visit will be hosted by the College of Engineering, was elected chairman of North American Rockwell Corp. following its formation in 1967 by the merger of Rockwell-Standard Corp. and North American Aviation, Inc. The name was later changed to Rockwell International.

A registered professional engineer, he was graduated from Penn State in 1935 with a B.S. in industrial engineering. He is currently a trustee of the U.S. Council of the International Chamber of Commerce, a member of the Advisory Council on International Commerce for the Commonwealth of Pennsylvania, and director of the World Affairs Council of Pittsburgh.

Dr. Rosen, a guest of the College of Science, received B.A. and M.S. degrees from the University of Alabama and a Ph.D. from Penn State.

In 1944, he joined the Manhattan Project at Los Alamos, New Mexico, where he participated in the development of the atomic bomb. Over the years, he has made lasting contributions to the understanding of the fission process and the fusion process, and he was a pioneer in development and exploitation of techniques for neutral- and charged-particle detection. Dr. Rosen is a Fellow of the American Physical Society and of the American Association for the Advancement of Science.

Mr. Zimmerman, whose visit is sponsored by the College of Business Administration, has been associated with Hershey Foods Corp. since 1958 and assumed the presidency of the company two years ago. He was previously affiliated with Harrisburg National Bank & Trust.

A 1953 graduate of Penn State, he has been active in alumni activities and since 1975, has been a member of the board of directors of the College of Business Administration Alumni Society. Currently president-elect of the board, he will assume the presidency in 1979. He has also been elected to the Penn State Alumni Council.

Samuel Gallu, a 1940 Penn State graduate, got his start in show business with Fred Waring and his Pennsylvanians. His first play, *Give 'em Hell, Harry!*, about Harry S. Truman, had its world premiere in March 1975, and has played to rave reviews across the country. A production of it will open in Eisenhower Auditorium April 29.

Mr. Gallu has completed two screenplays, *Shooshowd at Salmon River* and *The Kennedy Mafia*, which have been optioned by major motion picture companies. His first novel, *The Emperor*, was published recently.

President

(Continued from page 1)

The University is still being forced to borrow money, he explained, because only \$33 million of the \$80 million which Penn State should thus far have received from its \$106 million total appropriation has been paid out.

"It's a question of cash flow for the State," Dr. Oswald said, "and we will catch up after income tax time."

In the area of planning, the President noted that a University Support Plan will be developed along with the Academic Policy Plan. The former will include data gathered from both academic support areas such as the library and from non-academic areas ranging from the heating plant to grounds maintenance; the two plans together will form a master plan for the University.

The University's timing is good, Dr. Oswald noted, since a first draft of a revised State master plan is just being completed.

"It is very important that Penn State's master plan be closely integrated with the overall State plan," Dr. Oswald said, adding that he was going to Harrisburg to review the State's proposals with other educators from April 12 to 14.

Dr. Oswald said that three objections which he had expressed about a plan to establish a newly reorganized university of the present State Colleges had been met.

He had been opposed to the use of the name Commonwealth University of Pennsylvania because he felt it might be confused with both Penn State and Penn. The overall system name finally selected for the State Colleges and Indiana University is the Keystone State University system.

Again, he had opposed designating the independent board of which will control the system as a Board of Regents because of

the implication that this might be a board — as in New York State — to which all of higher education would report. The name has been changed to Board of Governors.

In this regard, Dr. Oswald noted that he felt it made good educational sense to take the State Colleges out of the direct operational control of the Department of Education and set up a separate board.

"Right now, all State segments of institutions may suffer a little," he said, "because while the Department coordinates all the segments of higher education, at the same time operates one of the segments — the State Colleges."

Dr. Oswald's original objection to the new overall Keystone University, which has also been met, was the stated mission — that the State Colleges would have a graduate education, professional education and research mission similar to that of Pitt, Penn State and Temple. This has been changed.

"The important thing is the definition of the State Colleges' mission," the President said. "That mission now clearly states that they will offer a broad, comprehensive liberal arts and teacher education at the undergraduate and master's degree level, with research primarily related to their region and to the institution itself."

"Given these changes, and my feeling that it is important to have the State Colleges out from under the day-to-day control of the Department of Education, I don't object to the bill. Indeed, I think it has some pluses for our University in the long run."

"I do think there will be a great deal of argument about the bill. There are differences in Harrisburg between the various State units. Secretary of Education Caryl M. Kline supports the bill strongly. I don't think Budget Secretary Charles McIntosh does."

Among other points which the

President made at his news conference were the following:

Nothing will be done about changing the calendar from a term to a semester system until a very careful financial analysis has been made to determine the fiscal savings resulting from such a move. Dr. Oswald noted that about three-quarters of the institutions of Penn State's general type — and particularly those in the northern states — are now on an early semester system, during which they essentially close down during January.

— The University's financial officers sat down with representatives of the Association of Residence Hall Students to determine what would be an appropriate refund for the extra week's vacation between winter and spring terms. The daily room and board rate was determined to be \$6.13. From this was deducted such fixed costs as debt service, 12-month salaries, utilities and major maintenance expenses. These totaled \$3.99 a day. There were also a series of costs related to the closing — unemployment insurance, vacation time, and continuation of fringe benefits. These came to \$1.06 a day. When these were also deducted from five days of room and board charges, the total came to \$8.40.

— He has had no official word when State Representative Fred A. Trello and his committee plan to investigate expenditures at Penn State, although he has heard informally that they will come to University Park sometime in late April.

"The University is prepared to show the committee anything it would like to see," Dr. Oswald commented. "I really don't anticipate our being any kind of scapegoat. The investigation is just another form of the State's wanting to be sure that institutions receiving State monies are fully accountable. If there are rumors that need to be put down, this will give us an opportunity to do just that."

— Neither PennPIRG nor any other student organization, through his recommendation, will receive access to the University's official billing system. There are regular University rules for student organizations to follow in soliciting money, and if PennPIRG wishes to solicit funds, it should operate like any other student organization.

Funding Sources

(309-1) The National Endowment for the Arts has announced deadlines for its Media Arts Film/Radio/Television programs, ranging from May 1 through Dec. 15. Grant categories include: Regional development — media centers, film/video exhibition, workshops; Production Aid; Fellowships — independent filmmaker, video artists, film archival. Services to the Field; General Programs; and Challenge Grants. (Ref. 43FR 4635-36, 4678) (NIE Announcement)

(309-2) The Russell Sage Foundation has announced seven major new programs of research. The foundation supports social science research relevant to public policy issues. Program descriptions include: Culture — patterns of food use; Citizenship — citizens role in the democratic process; Institutions — shaping of public policy through organizations; Policy Analysis — mid and late career work, technical policy studies; NYC project, and theory of policy analysis; and Technical Policy Studies — alternative energy sources, environmental hazards, and methods of technology assessment. (Ref. RSF/RFP 1978)

(310-1) The HEW National Institute of Education has published proposed rules and set a May 31 deadline for its Educational Equity Research Grants Program. Eligible projects include: educational equity theories, desegregation, multicultural/bilingual education, and barriers to women's educational equity. (Ref. 43FR 4635-36, 4678) (NIE Announcement)

(310-2) The National Endowment for the Humanities has announced a June 1 deadline for Fellowships for Independent Study and Research. These carry a maximum stipend of \$20,000 for a 6- to 12-month tenure. Applications are accepted from both established scholars and others of ability and promise. Degree candidates are not eligible. Other NEH fellowship programs are: Fellowships in Residence for College Teachers; Summer Stipends; Resident Seminars for College Teachers; and Fellowships for the professions.

Report of the Senate Ad Hoc Review Committee on Baccalaureate Degree Requirements

Editor's note: The following report has been submitted to the University Faculty Senate for action at its May 2 meeting.

AD HOC COMMITTEE ON BACCALAUREATE DEGREE REVIEW

This report presents educational objectives and appropriate educational experiences for the general education requirements. The first four sections of the report correspond to categories of these requirements:

- I. Advanced Learning Skills:
Communications and Quantification
- II. Health Sciences and Physical Education
- III. Distribution or Breadth
Requirement: Natural Sciences,
Arts, Humanities, Social and
Behavioral Sciences
- IV. A Suggested Integrative Learning
Component: Capstone Courses or
Projects Experiences,
Interdisciplinary Programs,
Integrating Themes, Work-Study
Programs

A fifth section treats the topic of Implementation.

Appendix A describes the procedures used in the review and some of the major issues considered.

The Committee proposes two recommendations for action by the Senate.

Recommendation 1.
The Senate approves the general education requirements set forth in the report, sections I-IV.

Recommendation 2.
The Senate approves the implementation set forth in section V.

INTRODUCTION

The requirements for the baccalaureate degree at Penn State from the Calhoun report of 1954. Although the recommendations in that report were by no means fully implemented, they have had a profound influence on the curriculum. A second major study of the baccalaureate degree requirements, undertaken by the Senate in 1970, resulted in the Cunningham report. Its principal recommendation — that the colleges have autonomy in seeing that every graduate achieve seven specified objectives — was not accepted by the Senate. Another committee (chairman, V. Dupuis) was charged with continuing the task of revision, and its report, adopted in 1973, established the requirements now in force. These requirements (BDR II) are outlined in the undergraduate catalog, pp. 37-38.

The legislation creating BDR II stipulated that the program be reviewed in five years.

Accordingly, in February 1977 the chairman of the Senate appointed an ad hoc committee (chairman, T. D. Larson) to undertake a review and submit recommendations. The committee herewith offers its proposal for a substantive revision of BDR II.

A PROPOSAL FOR MODIFYING THE CURRENT BACCALAUREATE DEGREE REQUIREMENTS

This proposal responds to issues identified during our review and analysis of BDR II. (See Appendix A and The Senate Record, Vol. 11, No. 3, Nov. 1, 1977 for a summary of problems brought to the attention of the committee.) It

has been influenced by recent thinking on general education, as reflected in reports from other institutions engaged in curricular review. Finally, it has been shaped by our recognition of the opportunities and limitations imposed by our own institutional setting.

Briefly, the aim of the proposal is to preserve the flexibility of approach suitable to a large, diversified university and, at the same time, to arrest the atomization and overspecialization of the curriculum by identifying what is essential in the general education of our students.

Commonly accepted goals of baccalaureate degree requirements are (1) to provide skills for advanced study and lifelong learning; (2) to develop some understanding of ourselves, of others, and of our environment; and (3) to develop the capacity to integrate our learning with past and present experiences and so strengthen our potential for contributing to society.

To meet these goals, three categories of requirements are traditionally established: the requirement for advanced learning skills, as in writing and mathematics; the distribution, or breadth, requirement that introduces students to main areas of knowledge; and the requirement for integrative learning experiences that develop common understandings across boundaries of discipline, time, and place. Our proposal adds a fourth category with its requirement in health sciences and physical education. The total of credits for all categories is 43. The sections that follow specify objectives for each of these categories and propose either courses or kinds of academic experiences that help students achieve those objectives.¹

I. Advanced Learning Skills Requirement¹

Communications (9 cr)

The objective is for the student to communicate information clearly and set forth his beliefs persuasively both orally and in writing. In particular, he must be able to write expository prose sufficiently mature in content and proficient in form and style to meet the expectations of educated readers.

Courses designed to help students achieve these goals currently include

Speech Communications: Only 200 (200A, 200B, or 200C)

English: Only 120, 20, 30, 117, 119, 211.

Quantification (6 cr)

The objective is for the student to work with numbers so as to measure space, time, mass, forces, and probabilities; to reason quantitatively; and to apply basic mathematical processes to daily work and everyday living.

To meet the quantification requirement, three credits are selected from mathematics, applied mathematics, or statistics; three additional credits are selected from mathematics, applied mathematics, statistics, computer science, and symbolic logic. Currently approved courses that meet the quantification requirement include

Mathematics: All courses except 200, 201, 202, 203, 400, 401, 402, 413, 414, 416, 425, 426, 470, 471.

Applied Mathematics: All courses

Computer Science: All courses except 1

Statistics: All courses

Philosophy: 12, 212.

II. Health Sciences and Physical Education Requirements (4 cr)

The objective is for the student to know how to achieve and maintain good health and to achieve a degree of skill in recreational activities that will provide him with pleasure and relaxation in addition to contributing to his physical well-being.

This requirement is satisfied by one credit in health sciences and three credits in physical education. Courses that meet these objectives currently include

Health Sciences (1 cr)

Food Science: Only 205

Health Education: Only 3, 19, 43, 46, 48, 57, 60, 303, 304, 406, 443

Nutrition: Only 100, 119, 120, 150, 351, 390, 420, 421, 452, 457, 459

Physical Education (3 cr)

Physical Education: Only 5, 9, 10, 181.

III. Distribution, or Breadth, Requirement (24 cr)

For the purpose of defining the distribution component of the baccalaureate degree requirements, this report specifies four areas of knowledge: Natural Sciences, Arts, Humanities, Social and Behavioral Sciences. The primary function of the distribution, or breadth, requirement is to ensure educational balance. For example, 18 of the 24 credits will be used by students in Engineering to acquire some knowledge of the arts, the humanities, and the social and behavioral sciences.²

The remaining 6 credits permit a student to explore a field related to, but not identical with, that of his program or department. Courses that satisfy the distribution requirement within his college (or, in the case of Science and Earth and Mineral Sciences, the two colleges) must be selected from subjects outside the student's department or program. For example, a Physics major may not use courses in physics to satisfy the Natural Sciences requirement; he may use courses in astronomy, geology, biology, meteorology, and so on. A History major may not use courses in history to satisfy his Humanities requirement; he may elect courses in philosophy, literature, religious studies, foreign languages, and so on. The department or program takes the initiative in determining which courses will satisfy the 6-credit requirement; its proposals are subject to the approval of the Associate Dean for Resident Instruction in its college.

To determine the 18-credit component of the requirement, the college being served will take the initiative in a process of intercollegiate consultation. Each college will prepare plans for its departments and programs to meet the requirement and will submit those plans to the Senate for approval. An essential part of the process is that for courses in the natural sciences, the Colleges of Science and of Earth and Mineral Sciences share in the consultative process; that for courses in the arts, the College of Arts and Architecture be consulted; that for courses in the humanities and in the social and behavioral sciences, the College of the Liberal Arts be consulted. In each case, written evidence of consultation will accompany the proposed plan for meeting the distribution or breadth requirement.

In reviewing and approving plans submitted for meeting the distribution requirement, the Senate subcommittee (see Implementation) will use (1) the credit distribution specified in

Table I and (2) the statements of educational objectives for each of the four areas of knowledge.

Natural Sciences

The objective is for the student to understand the nature of science through exposure to the broad dimensions of science — physical science, biological science, earth science, and various applied sciences; to know how to acquire factual information; and to develop an appreciation of the natural world.

Educational experiences that meet these objectives focus on the facts, theories, laws, and concepts of science, on their history and on their method of discovery. Students should gain some understanding of how scientists reason and how they draw conclusions. They should do laboratory work in at least one area of science.

Arts

The objective is for the student to develop aesthetic understanding and appreciation. Educational experiences that meet this objective inform students of the nature of their aesthetic responses; acquaint them with past and present achievements in the visual arts, architecture, landscape, music, and theater; and equip them with criteria for judging those achievements. Students should participate in the creation or performance of an art work of one kind or another in order to appreciate the process of creativity.

Humanities

The objective is for the student to develop an awareness of the complexities of being human. Through the study of history, literature, philosophy, and ethics, students develop a sense of moral judgment and ethical values, of the power of language and the imagination, and of what history can tell about the nature of man and what lessons it offers for their own time.

Educational experiences that meet these objectives expose students to competing philosophies and values, to the adventures of chance and choice and history, and to varied ways of life and conduct explored by men and women, past and present, real or fictive.

Social and Behavioral Sciences

The objective is for the student to identify factors that shape patterns of personal behavior, to learn how social groups are formed and maintained, and to gain some knowledge of both the causes and effects of cultural differences.

Educational experiences that meet these objectives acquaint students with some of the intricacies of behavior patterns — their own and others' — the dynamics of group interactions, and the reasons why individuals and peoples are different from and similar to one another.

IV. Integrative Learning Experience

The committee is not recommending at this time that an integrative component be specified for the baccalaureate degree requirements. It seems reasonable, however, to expect that students will be assisted in pulling together what they learn as they move through the curriculum, and we urge departments to provide courses, programs, and projects to this end. Among the objectives to be sought by the students in the integrative process are (1) an appreciation of their heritage; (2) an understanding of how their educational experiences relate to their future work and to the complex problems confronting society; and (3) the development of an enriched set of values and principles.

Some examples of how such integration might be achieved are

1. Capstone Courses or Projects. Particularly in the professional colleges, senior projects might be developed.
2. Interdisciplinary Programs. One example is the STS program, which meets the objectives of integration through giving the history of technology, demonstrating its impact on our everyday activities, and making clear how urgently we need viable systems that will permit us to coexist with aggressive modern technology. Other thematically organized programs might be developed by interested faculty. Some topics that have been suggested are "Law, Morality, and Society," "Environmental Action and Legal Cultures," and "Language as a Human Resource."
3. Integrating Themes. In all colleges,

(Continued on facing page)

1978-79 Budget Presentation

Editor's note: This is the last in a series of five articles extracted from the University's Budget Presentation Booklet.

MEDICAL EDUCATION

Primary health care, which includes family practice, and adequate geographic distribution are the areas that the State has deemed the most essential for Pennsylvania's medical needs, and the College of Medicine has designed its policies and priorities to be responsive to these needs. In addition, contributions to the Commonwealth have rapidly expanded in other important areas. The Teaching Hospital has achieved a fully self-supporting operation (including depreciation) without any State support. It provides a high quality and wide scope of public service in patient care, and it has become a total State resource.

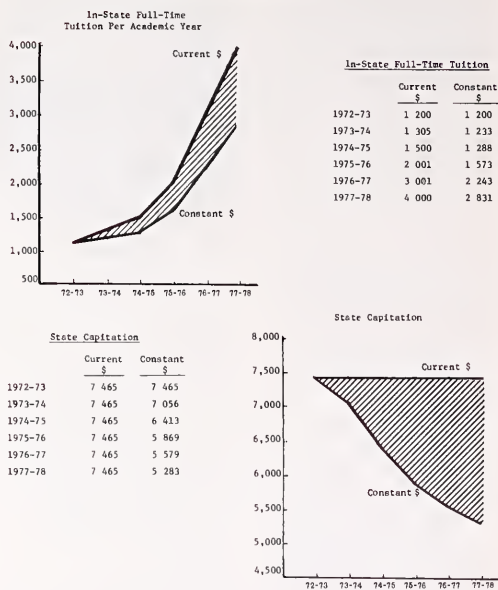

Outstanding medical research contributions have been made, particularly in respect to cancer and heart disease. Training programs for an expanding range of related health professions, including graduate medical sciences, nursing, physician's assistants, and radiologic technology have been introduced to deal with other areas of medical needs in the Commonwealth. Graduate medical education programs specifically designed to encourage new physicians to understand and consider primary care practice and to practice in areas of the Commonwealth presently experiencing a shortage of doctors have been initiated. A significant pilot facility in

Millersburg, Pennsylvania, designed to demonstrate effective new patterns for health centers to relate to rural areas in providing high quality primary health care, has already demonstrated its utility to the community. Finally, programs in continuing education, both for providers and for consumers of health care, provide a means for Pennsylvania's population to remain current in matters pertaining to health.

The per capita appropriation for medical education has not changed in seven years. As a result, the College of Medicine has been increasingly hard pressed to provide for increasing costs due to inflation. The cumulative financial pressures on the College are even greater than those experienced by the University in general.

The significant loss in purchasing power of the per capita appropriation has necessitated tuition increases totaling \$3,000 between 1971-72 and 1977-78 — from \$1,000 to \$4,000 per year. Figure 6 shows the extreme contrast between escalating tuition charges and the constant per capita appropriation. The ability of the College of Medicine to provide the programs and health services needed by the Commonwealth has been eroded to the point at which serious program damage will occur if the level of State support is not increased. This is particularly tragic in light of the College's leadership in program innovations and services in the important areas of family practice and primary health care and improvement of geographic distribution.

BDR report

(Continued from preceding page)

courses in history, philosophy, art, economics, and the sciences could be used to develop themes such as

"Characteristics of Civilizations," "Man and the Environment," and "Alternative World Views."

4. Work-Study Programs. In all colleges, alternating periods of work (perhaps in the form of internships) with regular academic activities could result in a valuable integrative experience for some students.

Through their colleges, departments and programs are asked to submit evidence that they are offering students opportunities to integrate their learning. This evidence to be reviewed periodically by the Senate Subcommittee (see Implementation).

V. Implementation

Baccalaureate degree requirements must receive continuing attention. If this proposal is adopted, we recommend that a standing subcommittee of the Senate Curricular Affairs Committee be appointed to work with the Provost in implementing it. The subcommittee will continue to study and develop the educational objectives outlined in this report, encourage and plan models for the various educational experiences identified in it, and keep abreast of national developments in general education. It will be responsible for approving all proposals relating to the baccalaureate degree requirements and will make annual reports to the Senate on the status of these programs.

Four specific conditions follow:

1. Courses taken to meet the baccalaureate degree requirements may not be taken under the pass-fail option.
2. When a student changes major, the department outside his/her new department or program taken to satisfy the distribution, breadth, requirement will be accepted by the department to which he/she is transferring. For instance, six credits in Arts taken for a student in Chemistry will be accepted as six credits in Arts by the History Department.
3. Each major will identify the 43 credits that make up the requirements for its baccalaureate degree for publication in the undergraduate catalog.
4. Through their respective colleges,

departments and programs will submit plans for meeting these baccalaureate degree requirements, together with evidence of the consultative process, to the standing subcommittee of the Curricular Affairs Committee no later than May 1, 1979.

APPENDIX A ISSUES AND PROCEDURES

An Ad Hoc BDR Review Committee was named Feb. 1, 1977 and charged with "determining whether the BDR requirements are still satisfactory in their present form or whether some changes should be made." The committee immediately engaged in a process of fact-finding and analysis. Fact-finding included examination of a sample of student transcripts to determine precisely how the BDR requirements have been met. Administrative personnel, faculty, and student representatives of the colleges were then interviewed to gain insight into both operational problems and opinions about BDR II.

The committee held intensive discussion and analysis sessions before attempting to draft recommendations. The ten issues following are illustrative of those considered.

1. The climate on higher education has changed markedly since the BDR II requirement was passed — towards more specificity in the prescription of requirements. How should PSU respond?
2. How does a diversified university give attention to the general education component, approximately one-third of the curriculum, given the pressures for specialization in every area?
3. Should the general education component be accorded a more substantial place in the curriculum and, if so, how is that to be accomplished?
4. Can we be specific regarding courses appropriate to meeting the BDR requirement?
5. Are the area coverage and credit assignment proper for all colleges? For the Commonwealth campuses?
6. How can we assure "minimum" performance in advanced learning skills, that is, in mathematics and the use of the English language?
7. In developing BDR, should we adopt the concept of stating and working towards educational objectives as opposed to counting credits?
8. Can general educational courses be provided when and where they are needed to permit students to make normal progress?
9. Do we provide students adequate opportunity to understand modern technology?
10. What should be the "process" for change in the BDR?

A first effort toward resolution of several of these issues was reported informally to the Senate on Nov. 1, 1977. The most notable item was a tentative listing of specific courses to meet the current BDR II areas. The widespread criticism of this report reinforced the committee's feeling that a substantial revision was needed. To this end, a subcommittee was charged with drafting a report responsive to the many issues under consideration by the committee. Its report was received on Jan. 23, 1978. From that time until mid-April the committee worked to refine the report, in the process engaging in extensive consultation throughout the university community.

1. Two publications particularly influential in the discussions of the committee are *Missions of the College Curriculum: A Contemporary Review with Suggestions by The Carnegie Foundation for the Advancement of Teaching* (San Francisco, CA: Jossey-Bass, Inc., Publishers, 1977) and *Educating for Survival* by Ernest L. Boyer and Martin Kaplan (New Rochelle, NY: Change Magazine Press, 1977). The Carnegie Foundation publication provides an encyclopedic review of college curricula in the United States, describes the forces of change, analyzes current needs, and proposes methods for implementation. Boyer and Kaplan argue persuasively that the curriculum must have a core and propose one that emphasizes the common aspects of human experience. They argue further that this commonality must be preserved if our society is to survive.
2. The committee has here drawn heavily on the Cunningham report, which was presented to the Senate in July 1971.
3. Competency tests should be refined and their use expanded in order to place students properly in courses designed to meet the requirement in advanced learning skills.
4. As resources permit, departments should explore ways of meeting the distribution requirement other than through using introductory courses intended for students in the major.
5. John J. Coyle, Chairman University Faculty Senate, February 1, 1977.
6. See also *The Senate Record*, Vol. 11, No. 3, Nov. 1, 1977.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Apr. 27. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

MEDICAL TECHNOLOGIST — STUDENT AFFAIRS, University Park. Responsible to Senior Medical Technologist for the performance of a variety of standardized laboratory tests and procedures. Bachelor's degree and A.S.C.F. certification or its equivalent, plus three to six months of directly related experience.

EDITORIAL ASSISTANT — CONTINUING EDUCATION, University Park. Responsible to the PENNARAMA Coordinator, the editorial assistant will assist in writing, coordination, and completing other tasks to support the operation of the PENNARAMA Continuing Education Cable Television Network. Specifically, the editorial assistant will prepare scripts and obtain graphics for program continuity, prepare program logs, coordinate program shipping, coordinate production of continuity material and PENNARAMA program package, and assist in writing reports and developing the program schedule. The editorial assistant will also support promotion and utilization components of PENNARAMA. Bachelor's degree in journalism, English or related field and 12 to 18 months of directly related experience in television production or news release writing. An associate degree and one to two years of directly related experience may be substituted for the degree.

RESEARCH AIDE — COLLEGE OF AGRICULTURE, University Park. Perform biochemical analysis upon various animal tissue, tissue fractions, and body fluids. Collect tissues and body fluids and prepare the samples for analysis. Conduct *in vitro* experiments on the metabolism of shell gland tissue. Summarize and report results obtained in investigations. Prepare histological sections of selected tissues for microscopic examinations. Bachelor's degree in medical technology, biochemistry, or related biological sciences or its equivalent and one year of directly related experience in biochemical and biological techniques required.

UNIVERSITY PHYSICIAN — STUDENT AFFAIRS, University Park. Responsible to Director, University Health Services for providing medical care to Penn State students, as well as emergency care to University faculty, staff, employees and visitors. Duties and responsibilities are performed under general direction and interpretation of University policy with regard to general objectives. Work is performed independently toward general results. Problems are rarely referred. A Doctor of Medicine degree, or its equivalent from an accredited school of medicine or osteopathy and a license to practice medicine in the Commonwealth of Pennsylvania, plus four to five years of previous directly related experience. Position available July 1, 1978.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed, although names will be withheld on request.

Editor's note: The officers of the University Faculty Senate recently put together a list of questions dealing with non-academic policies and procedures. Since a number of these questions are of general interest to the University community, we are running them and the answers in INTERCOM.

QUESTION:

There is no comprehensive listing of the various copy services and their capabilities available around the campus. This causes much unnecessary duplication of data gathering. Such a listing with costs should be made available.

ANSWER:

There are seven copy center locations now available to University users. These locations are:

- Room 20 Old Main
- Room 116 Rackley Bldg.
- Unit "C" Research Bldg.
- Room 266 Recreation Bldg.
- Room 5A Mineral Industries Bldg.
- Room 13 Whitmore Lab
- Room 101 Hostetter Business Services Bldg.

Each of these centers is designed to give customers fast and economical copies. Copies will be printed on 20# white paper in black ink. For best results, originals should be on white paper with black ink or dark typewriter ribbon. Copy can be reduced by 4, 25, or 35 percent at no additional charge.

The Centralized Copy Center price schedule is as follows:

1-10 copies of ea. original —	
\$.10 per original plus 2.0¢ per copy	
11-25 copies of ea. original —	
\$.10 per original plus 1.8¢ per copy	
26-100 copies of ea. original —	
\$.10 per original plus 1.6¢ per copy	
101-200 copies of ea. original —	
\$.10 per original plus 1.4¢ per copy	
201-300 copies of ea. original —	
\$.10 per original plus 1.3¢ per copy	
301-400 copies of ea. original —	
\$.10 per original plus 1.2¢ per copy	
EXAMPLE: 30 copies each of 6 originals	
6 originals × \$.10 ea. — \$.60	
6 originals × 30 copies ea. 180 copies	
180 copies × 1.6¢ per copy — 2.88	
Total Cost	\$3.48

Collating is also available to our customers. Multiple sheets sets can be collated for an additional charge of \$3 per 1,000 sheets collated, with a minimum charge of \$3 per job.

Departments may also use our credit card system. These cards are available by writing a memorandum to Mr. Bowman, Room 101 Hostetter Business Services Bldg. Included in this memorandum should be the department name, address, budget number, fund number, and a contact person in the event of billing problems. These cards may be used at any of the copy centers. Payment of credit card charges is made by a monthly Interdepartmental Transfer Form (I.D.T.).

Centralized Copy Center services also provide a duplication service for the reproduction of student theses. The Graduate School will provide each student with the necessary information to obtain this service.

D. Lewis Mothersbaugh

Director, Printing and Communication

Kulicke's "Book Cover with Pear Jewel."

Arts Roundup

Works by Kulicke to be shown by Museum

An exhibition of works by Robert Kulicke now at the Museum of Art will continue there through June 25.

"Robert Kulicke: Painter, Designer, Craftsman" includes paintings, frame designs and jewelry, the three areas with which the artist is most closely identified.

Mr. Kulicke is best known as the designer of the sectional metal frame and the plexibox. The plexibox was designed for the photography department of the Museum of Modern Art in 1964.

His paintings are largely still lifes and landscapes, and the outside dimensions of his works seldom exceed 10 inches on a side.

With Jean Reist Stark, Mr. Kulicke operates the Kulicke-Stark Academy of Jewelry Art. His jewelry interests include cloisonne enameling and loop-in-loop chainmaking, as well as jewelry techniques originated by the Etruscans, Visigoths and Celts.

A Philadelphia native, Mr. Kulicke studied at the Tyler School of Art in that city and later with the French painter Fernand Leger in Paris.

Two film directors will screen works

Film directors Sidney Pollack and Lamont Johnson will visit the University Park campus this week (April 20-22) to participate in a "Celebration of Film."

Mr. Johnson, director of the film *One on One*, will attend a screening of his film and participate in a question-and-answer period after its showing at 8 p.m. Thursday, April 20 in Eisenhower Auditorium.

Mr. Pollack, who directed *They Shoot Horses, Don't They?* and *Bobby Deerfield*, will be present for a screening of these films and an informal interchange with the audience at 7 p.m. Saturday, April 22 in Eisenhower.

Both events are open free to the public. They are being sponsored jointly by the University's Department of Theatre and Film, the Institute for the Arts and Humanistic Studies and the Penn State Student Film Organization.

Zindel play at Kern

And Miss Randon Drinks a Little, a play by Paul Zindel, will be presented in Room 102 of the Kern Graduate Commons at 8 p.m. on Saturday and Sunday, April 29 and 30. Tickets are \$2.50, which includes the price of a make-your-own sundae bar, lemonade, coffee or tea.

And Miss Randon Drinks a Little is a bitingly funny play about the complex family ties that bind the lives of three sisters. The play's action traces the shattering effect of the youngest sister's mental breakdown on the lives of the other two.

Tickets and reservations are available at the Kern Information Desk or by telephoning 865-1878.

"Give 'em Hell Harry" to return April 29

A newly revised version of the popular one-man dramatization, *Give 'em Hell Harry* by 1978 Alumni Fellow Samuel Gallu and starring Kevin McCarthy will come to Eisenhower Auditorium on April 29. Proceeds from the performance will benefit the Simeon and Elizabeth Gallu Scholarship Fund. The play explores the many facets of Harry Truman, a President who never hesitated to speak his mind. Tickets will be available from 9 a.m. to 4 p.m. at the auditorium box office beginning Monday, April 24. They are priced at \$5 and \$4 and may be charged to MasterCard or VISA accounts by calling 863-0255. No reservations will be taken by phone, however.

Landscape architect to talk April 24

David Streetfield, assistant professor of landscape architecture at the University of Washington, Seattle, will speak on "California's Landscape Architectural Heritage" at 7:30 p.m. Monday, April 24 in Room 26 Mineral Sciences Bldg. His talk is part of the spring lecture series of the Department of Landscape Architecture.

Kenneth Frampton, architecture critic and historian and a member of the faculty of the School of Architecture of Columbia University, will speak at 7:30 p.m. Thursday, April 27 in Room 121 Sparks. His talk is part of the spring lecture series of the Department of Architecture.

Jewelry exhibit at Kern

David Stinebrink, a research assistant at the Garfield Thomas Water Tunnel, is having an exhibit of jewelry he has made at the Kern Commons Gallery through April 29.

Mr. Stinebrink received his B.S. and M.S. degrees in aerospace engineering from Penn State. He has been working in silver for six years.

New Kensington staff display photographs

Photographs by John McNavage, William Fueller and William Bishop are on display at the New Kensington Campus through April 28.

Dr. McNavage, an assistant professor of English at the Campus, works mainly outdoors, emphasizing landscapes and wildflowers. His photographs have appeared the last three years in the Photography Joint Show of the Three Rivers Festival. He won a first prize in the slide category of "The Natural World" photo contest last year at the Carnegie Museum of Natural History in Pittsburgh.

Mr. Fueller is currently senior instructional services specialist at New Kensington. He works largely in black and white, and his subjects include figure studies, portraits and seascapes.

Mr. Bishop worked for two years as assistant media specialist at New Kensington. He is primarily a nature photographer. In 1976, he exhibited in the juried show at the Three Rivers Festival.

"Consciousness" is Black Arts Festival theme

Music, fashions, drama and political symposiums will be featured at the 10th annual Spring Black Arts Festival.

"Consciousness" is the theme for the event, scheduled from Friday, April 21 through Tuesday, April 25.

"This year's program places a strong emphasis on the African black community in an effort to create an awareness of the different aspects of black culture," according to Anita M. Thomas, of Philadelphia, and Michael Brennen, of the Bahamas, coordinators of the Black

Caucus Arts Festival Committee.

"As in the past, the Arts Festival provides a format for us to share the black experience with the University community."

The festival will open with a series of symposiums beginning at 11 a.m. April 21 in the Hetzel Union Bldg.

Scheduled to speak are:

Elizabeth Clark Lewis, research assistant to Alex Haley, on "Black Genealogy and Finding One's Roots"; John Lewis, director of VISTA, on "State of Black Politics"; L. T. Edwards, director of Congressional Liaison Office, U.S. Commission on Civil Rights, on "Civil Rights and Ramifications of the Bakke Case."

Following the symposium, a Pre-African Liberation Day Rally will be held at 3 p.m. on the lawn outside HUB. Featured speaker will be Jeff Dumo Bagwa, director of projects for the Southern African Student Movement.

Displays created by black organizations at Penn State may be seen from noon to 4 p.m. Saturday, April 22, at the Paul Robeson Cultural Center. A talent show and fashion show will be held at 7 p.m. in the Cultural Center.

The Elizabeth Graves Drama Associates, of Philadelphia, will present "The Rapture" at 3 p.m. Sunday, April 22 in the Cultural Center. Colloquy will sponsor a talk by former Olympic champion Wilma Rudolph at 8 p.m. Monday, April 24, in Eisenhower Auditorium.

Throughout the day on Tuesday, April 25, the Harlem Repertory Theatre will conduct a series of workshops in Eisenhower on dance, percussion, acting and the role of contemporary black arts. At 8 p.m. in the auditorium, the group will present "Comments on For Colored Girls Who Have Considered Suicide When the Rainbow Is Enuf."

Admission is free to all events of the Black Arts Festival, which is being planned and organized by the Black Caucus, a student organization, and the Paul Robeson Cultural Center.

Artists Series

(Continued from page 1)

information on the coming season, call the Artists Series, 865-1871.

The sale of subscriptions to new patrons will begin at Pine Cottage on Tuesday, May 2, at 9:30 a.m. and will continue daily from 9:30 a.m. to 12:30 p.m. and from 1:30 to 3:30 p.m. Phone orders cannot be accepted.

Transportation proposals asked

Any assistant professor or faculty member of similar rank who is not now affiliated with The Pennsylvania Transportation Institute is invited to submit a proposal to the Institute for a 1978 research initiation grant. The award provides a stipend that may include one month's summer support, plus continuing assistance during the 1978-79 academic year. Support provided is limited to approximately \$3,000.

The proposed research can involve any topic having to do with transportation, including safety. The grant will be awarded on the basis of relevance of the topic, intelligibility and appropriateness of the research plan, and the potential of the researcher to carry out the plan.

Further information may be obtained from the research grant committee at the Pennsylvania Transportation Institute, Research Bldg. B. The proposal deadline May 1; the awards will be announced before May 15.

News in brief

(Continued from page 1)

Departments owning an Ektagraphics (model AF-1, AF-2, AF-3, AF2K, B-2 or E-2) projector, purchased after March 1, 1977, with a silver and black Kodak emblem on the top, and with a four-letter code imprinted on the bottom of the projector near the lamp housing beginning with "Y" or "C" should call the Department of Purchasing Services (865-7561) for instructions regarding return for repair without charge.

Reminder issued on health insurance

Faculty and staff members with children are reminded that dependent children are covered under the University's health insurance program until the age of 19, unless they are full-time students. Those who are full-time students continue to be covered until age 23. Therefore, it may be desirable to seek other health insurance coverage in advance for such individuals approaching age 19 or 23, as applicable.

The University's insurance carrier does offer a hospital/surgical/major medical plan to which the group insurance program may be converted. Information and application forms for this conversion coverage may be obtained from the Employee Benefits Division, Room 133 Willard Bldg. (865-1473). Information about other, independent coverage can be obtained from commercial agencies or salespersons.

Engineer to discuss Biodynamic Modeling

"Biodynamic Modeling — the Human Spine," will be the topic of Dr. Ted B. Belytschko, Distinguished Lecturer in Mechanical Engineering. He will speak at 11 a.m. Thursday, April 27, in Room 103 Mechanical Engineering Bldg.

Dr. Belytschko, professor of civil and nuclear engineering at Northwestern University, earned his doctorate at the Illinois Institute of Technology. He holds the Phi Tau Sigma gold medal awarded by the American Society of Mechanical Engineers and the Walter Huber Research Prize of the American Society of Civil Engineers.

In his talk he will discuss the effects of such stresses as pilot ejection or frontal impact on the human spine, torso and head.

Firewood for next winter

The School of Forest Resources is taking orders for dump truck loads of freshly cut, unsplit hardwoods for summer delivery. There is a choice of four lengths, from 8-feet (\$39/standard cord) to 16-inch (\$78/standard cord). Inquiries may be made from 8 a.m. to 5 p.m. Monday through Friday at Room 106 Ferguson Bldg., or by calling 865-4237. Delivery is free within 10 miles of Pine Grove Mills.

AID executive to speak on world hunger

The Student-Faculty Board of the College of Human Development will conduct the second in its programs dealing with world hunger on Monday, April 24.

Featured speaker for the program, scheduled for 7 p.m. in Room S-209, Henderson Human Development Bldg., is Daniel E. Shaughnessy, associate and deputy coordinator of the Agency for International Development's Office of Food for Peace.

Members of Bread for the World, national citizen's lobby, will attend and participate in the program.

Mr. Shaughnessy, a graduate of John Carroll University, attended Boston College Law School and received his M.S. in government administration from George Washington University. He joined

AID in 1963 and served for four years as director of its Food for Peace Branch and Food and Nutrition Division in New Delhi. He has held numerous other positions with the agency.

Naiads show opens tonight

The annual synchronized swimming show presented by the Penn State Naiads Club opens tonight (April 20) with the first of three performances. Tickets are available at the Natatorium beginning at 7:30 p.m. for the 8 p.m. performances Thursday, Friday and Saturday. All tickets are \$1.

This year's show, "Sound Waves," features 14 routines, choreographed and swum by the 29 students members of Naiads to music ranging from jazz to classics.

Griots will offer Mandinka poetry

"An Evening of Mandinka Poetry and Song" will be presented by three griots from Mali, West Africa, at 8 p.m. Friday, April 28, in the Paul Robeson Cultural Center.

The griots, members of the West African caste responsible for keeping the oral tradition and making music, are led by Batorou Sekou Kouyate, one of Africa's best-known kora players. The kora is a 21-stringed, harp-like instrument.

Mr. Kouyate will be accompanied by two female vocalists, Dianton Toukara and Nantengwe Kamissoka. The group, which has visited West Africa and Europe, currently is on an American tour.

Charles Bird, of Indiana University, a specialist in Mandinka language and culture, will narrate and interpret the program. A discussion on West African music, history and genealogy will be held following the performance.

Americans are most familiar with the role of the griot as a genealogist. It was a griot from Gambia who told Alex Haley about his African heritage for his book *Roots*.

The "Evening of Mandinka Song and Poetry" is sponsored by the Black Studies Program, the Robeson Center, Liberal Arts International Programs Committee, Institute for the Arts and Humanistic Studies, University Committee on International Programs, and the College of Arts and Architecture.

Research Initiation Grants awarded to 24 faculty

Twenty-four faculty members have been awarded one-year Research Initiation Grants ranging from \$2,000 to \$5,500 from a fund approved by President Oswald for the encouragement and support of research and other creative work.

The 1978 Research Initiation Grants program was open to new faculty members at all Campus locations with service accumulation of two calendar years or less by September 1978. The program is organized to support lines of research by new faculty that may lead to external sponsorship, according to Dr. Richard G. Cunningham, vice president for research and graduate studies.

Sixty-five proposals were received and screened by a committee of Irwin Felton (chairman), Eugene Lindstrom, Arnulf Muan, Roland Pellegrin and F. J. Remick (ex officio).

Faculty members awarded grants and their research projects are:

William R. Beltz, assistant professor of surgery at Hershey, The role of tumor cell-endothelial cell interactions in the development of experimental metastasis; **Frederick M. Brown**, assistant professor of psychology at Worthington Scranton, Menstrual-cycle effects upon behavior; **Joe Peter Buhler**, assistant professor of mathematics, Research problems from algebraic number theory.

Clifford C. Clogg, assistant professor of

Flory to give Whitmore talks

Dr. Paul Flory, 1974 Nobel Laureate in chemistry, will present the third annual series of Frank C. Whitmore Lectures at the University April 24-27.

The four lectures, sponsored by the Department of Chemistry, are titled "Spatial Configuration on Macromolecules," "Configuration Statistics of Chain Molecules," "Stereochemical Structure and Conformational Analysis of Vinyl Polymers," and "Rigid Chains: Theory of Nematic Phase Equilibria." Each of the lectures will be held in Room 333 Whitmore Laboratory at 12:45 p.m., except the fourth which will be at 9:35 a.m. They are all open to the public.

Dr. Flory, who is J. G. Jackson-C. J. Wood professor emeritus of chemistry at Stanford University, received the Nobel Prize for his pioneering work in establishing the foundations for the modern physical chemistry of polymers.

According to one of his colleagues, Dr. Flory's more than 40 years of exacting intellectual efforts have provided the basic conceptual framework for most of polymer science. The major areas of Dr. Flory's work include polymerization mechanisms and polymer structure, physical and mechanical properties of polymers in bulk, solution properties of polymers, and conformations of polymer chains.

Besides the Nobel Prize, Dr. Flory has been honored with the National Medal of Science and six awards from the American Chemical Society.

Applications of latent structure methods; **Milton W. Cole**, associate professor of physics, Electrons and atoms at surfaces; **Robert C. Creese**, assistant professor of industrial engineering, Riser system design by geometric programming; **James W. Hatch**, assistant professor of anthropology, Measuring nutritional stress of a prehistoric American population.

Mary Jane Irwin, assistant professor of computer science, Algorithms for on-line arithmetic; **Gregory A. Kelly**, assistant professor of surgery at Hershey, The role of pancreatic secretions in radiation bowel injury; **Jeffrey S. Lannin**, assistant professor of physics, Bonding in liquid semiconductors: a laser raman study; **Antonio C. Lasaga**, assistant professor of geochemistry, Treatment of multi-component diffusion and ion pairs in diagenetic fluxes.

Thomas F. Massaro, assistant professor of nutrition, The effect of voluntary activity on food intake and body weight regulation; **Julian D. Maynard**, assistant professor of physics, New thermodynamic measurements in superfluid helium; **Yash Mehra**, assistant professor of economics, A time-series test of labor-market interdependence.

Philip J. Morris, assistant professor of aerospace engineering, The stability of heated axisymmetric boundary layers;

WPSX Highlights

Sunday, April 23, at 3 p.m., Channel 3 will broadcast the fifth annual Oscar Micheaux awards ceremony of the Black

Filmmakers Hall of Fame, held earlier this year in California. The 90-minute program pays tribute to the late actress-singer Nina Mae McKinney, Count Basie, actress-pianist Hazel Scott, composer Bennett L. Carter, Ella Fitzgerald, and the late actor-dancer Bill ("Bojangles") Robinson.

The role of a community hospital is explored Monday, April 24, at 9 p.m. on the next Small Town, PA documentary. The program was filmed at the Lewistown Hospital in 1973.

In a repeat broadcast, Tuesday, April 25, at 8 p.m., "Search for the Great Ages," a National Geographic Special, travels to the mountains of Central Africa and a rain forest in Indonesian Borneo to study the mountain gorilla and the orangutan.

The town of Hyde Park, N.Y. — home of President Franklin D. Roosevelt, as well as the Vanderbilts and Livingstons — is also the site of some of the ugliest strip zoning in the United States. An hour-long documentary, *Hyde Park*, visits residents of the old community and explores their concerns over land use in the region. *Hyde Park* can be seen Tuesday, April 25, at 9 p.m.

Sunspots — huge blemishes bigger than the earth — come and go on the sun on an 11-year cycle. Much scientific research has been done to relate the sunspot cycle to cycles of weather and climate on the earth, and recent findings suggest that when the sunspots disappear — as they are doing now — the earth goes through a cooling period. This controversial theory is the subject of the Nova documentary, *The Sunspot Mystery*, Wednesday, April 26, at 8 p.m.

East-west morals and mores are central to the theme of Tom Stoppard's new drama, *Professional Foul*, to be presented Wednesday, April 26, at 9 p.m. on Great Performances. The tragedy-comedy is set in Czechoslovakia.

The labor reform act of 1978 is debated on *The Advocates* Thursday, April 27, at 9 p.m. Advocates will present witnesses representing both sides of the question: "Should Congress provide more protection for union organizing?"

Research Initiation Grants awarded to 24 faculty

Paul C. Painter, assistant professor of polymer science, The characterization of polypeptides as novel polymeric materials; **Diane Pepe**, assistant professor of art, Research in new methods of pulping, sheet formation and lamination procedures in hand papermaking.

Reynaldo S. Resurreccion, assistant professor of veterinary science, The effect of aflatoxin on the replication, pathogenesis and virulence of viral pathogens in the chicken; **C. Peter Romaine**, assistant professor of plant pathology, On the possible involvement of a host RNA-dependent RNA polymerase in potato spindle tuber viroid replication; **Robert A. Schlegel**, assistant professor of microbiology and cell biology, Control of proliferation in human diploid fibroblasts.

Rudy L. Slingerland, assistant professor of geology, Eolian transport mechanics of sand-sized light and heavy minerals; **David A. Stern**, assistant professor of theatre arts, Accents and dialects for the stage: the development of teaching techniques through acoustic analysis; **Frederick F. Weiner**, assistant professor of speech pathology, Phonological pattern of children with unintelligible speech; **R. Dale Wilson**, assistant professor of marketing, Consumer response to comparative-type advertising messages.

University Park Calendar

April 20 — 30

Special Events

Thursday, April 20

Deadline for Reserve Reading Lists for summer term to be submitted to Reserve Reading Room, Room W-11, Pattee Library.
5 O'clock Playwright's Theatre, Nancy Patton, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.

Naiads Synchronized Swim Show, 8 p.m., Natatorium. Tickets at door.

Friday, April 21

Black Arts Festival, Symposia, 11 a.m., Hetzel Union Bldg. Elizabeth Clark Lewis, research assistant to Alex Haley, on "Black Genealogy and Finding One's Roots"; John Lewis, director, VISTA, on "State of Black Politics"; L.T. Edwards, U.S. Commission on Civil Rights, on "Civil Rights and Ramifications of the Bakke Case"; African Liberation Day Rally, 3 p.m., HUB lawn, speaker, Jeff Dumo Bagwa, Southern African Student Movement.

5 O'clock Playwright's Theatre, *Good Night and Good News*, 5:30 p.m., Pavilion Theatre.

Sports: men's volleyball, ECVL Championships, 7 p.m., Rec. Bldg.

Naiads Synchronized Swim Show, 8 p.m., Natatorium. Tickets at door.

PS Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 22

Eco-Action Recycling, 10 a.m.-3 p.m., Parking Lot 83 (behind flower gardens) and Boalsburg Fire Hall.

Black Arts Festival. Cultural exhibitions and displays, noon-4 p.m.; talent and fashion show, 7 p.m., Robeson Cultural Center.

Phi Psi 500, noon.

Sports: men's golf, vs. Alumni, 1 p.m., Blue Course; women's lacrosse, vs. West Chester, 2 p.m., IM Field; men's lacrosse, vs. Rutgers, 2 p.m., Jeffery Field; men's volleyball, ECVL Championships, 7 p.m., Rec. Bldg.

Naiads Synchronized Swim Show, 8 p.m., Natatorium. Tickets at door.

Sunday, April 23

Free U Day, HUB lawn.

University Chapel service. Dr. George Jones, Office of Religious Programs, Ball State University, 11 a.m., Eisenhower Chapel.

PS Sports Car Club Autocross, 11 a.m.-4 p.m., Parking Lot 80.

Shaver's Creek Nature Center, Streams and Valleys, 2-4 p.m., Stone Valley.

Black Arts Festival. Elizabeth Graves Drama Associates, *The Raptnar*, 3 p.m., Robeson Cultural Center.

Concert Blue Band, featuring the Jazz Blue Band, 3 p.m., Eisenhower Auditorium.

Sports: Baseball, vs. Rider (2), 3 p.m., Beaver Field.

Debra Sullivan, soprano, 3:30 p.m., Music Bldg. recital hall.

france-cinema, *Malle, Elevator to the Gallows*, 7 and 9 p.m., Room 112 Kern.

Monday, April 24

Last date for May graduates to deliver theses to Graduate School Office.

Last date for Departments to certify to Graduate School completion of required papers for May graduates.

STS/Two Cultures Dialogue, "Society's Perceptions of the Energy Problem," Robert G. McCarthy, Columbia Gas Company, will speak, noon, State College Hotel.

Whitmore Lecture: Paul Flory, Nobel Laureate, on "Spatial Configuration on Macromolecules," 12:45 p.m., Room 333 Whitmore Lab.

Shakespeare film, *Hamlet* (Oliver), 6:30 p.m., Room 101 Chambers.

Cinematech, *Dmytryk, Murder, My Sweet* (1944), 7 and 9 p.m., HUB assembly hall.

College of Human Development World Hunger Lecture. Daniel E. Shaughnessy, Office of Food for Peace, AID, will speak, 7 p.m., Room 5-209 Henderson.

france-cinema, *Malle, Elevator to the Gallows*, 7 and 9 p.m., Room 112 Kern.

Colloquy, "Sports in America," Wilma Rudolph, Olympic champion and polo victim, on "My Olympic Experiences," 8 p.m., Eisenhower Auditorium.

Rico Jacobus, flute, 8:30 p.m., Music Bldg. recital hall.

A special Jazz Blue Band will perform with the Concert Blue Band at 3 p.m. Sunday, April 23 in Eisenhower Auditorium. Jazz musicians Jeff Baker, Ed Ober and John Gallace tune up as director Larry Fisher listens.

Tuesday, April 25

College of Education Public Lectures. Donald R. Warren, American Educational Studies Association Task Force on Academic Standards, on "Directions of Academic Standards on Accreditation in Educational Studies," 10 a.m.; Dave Warren, ethnohistorian of colonial Latin America and Bureau of Indian Affairs, Santa Fe, on "New Aspects of Cultural Pluralism," 2 p.m., Keller.

Whitmore Lecture: Paul Flory, Nobel Laureate, on "Configuration Statistics of Chain Molecules," 12:45 p.m., Room 333 Whitmore Lab.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Archy Allen, classics, on "Ezra Pound and a Lot of Talk."

Comp. Lit. film, *Ulysses* (James Joyce), 7 and 9:30 p.m., Room 112 Kern.

EVMS Student Council Lecture. Dr. Eric Walker, president emeritus, on "Invention, Innovation and Entrepreneurship," 7:30 p.m., Room 112 Walker.

Black Arts Festival. Harlem Repertory Theatre, "Comments on For Colored Girls Who Have Considered Suicide When the Rainbow Is Unf," 8 p.m., Eisenhower Auditorium.

English colloquium, John Bellamy, Carleton University, Ottawa, on "The Medieval Literature of Crime," 8 p.m., Room 101 Kern.

Wednesday, April 26

Whitmore Lecture: Paul Flory, Nobel Laureate, on "Stereochemical Structure and Conformational Analysis of Vinyl Polymers," 12:45 p.m., Room 333 Whitmore Lab.

Commonplace Lecture, *Blue Water, White Death*, 7:30 and 9:30 p.m., Room 112 Kern.

Artists Series, Barry Snyder, piano, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 27

Free U. Gentle Thursday, HUB lawn, 10 a.m.-10 p.m.

Whitmore Lecture: Paul Flory, Nobel Laureate, on "Rigid Chains. Theory of Nematic Phase Equilibrium," 9:35 a.m., Room 333 Whitmore Lab.

Mechanical Engineering Distinguished Lecturer Ted B. Belytschko, Northwestern University, on "Biodynamic Modeling: The Human Spine," 11 a.m., Room 103 Mech. Eng. Bldg.

Sports: softball, vs. Lock Haven, 2 p.m., Lady Lions Softball Field; men's tennis, vs. East Stroudsburg, 2:30 p.m., Nittany Courts.

History colloquium, Gerald G. Egger, history, on "Historians, Liars, and Damned Statistics," 2:30 p.m., Room 101 Kern.

Phi Kappa Phi annual banquet and initiation, 5:30 p.m., HUB ballroom.

Shakespeare film, *Hamlet* (Williamson/Richardson), 6:30 p.m., Room 101 Chambers.

Interaction — Art and Science Lecture. William Woody, Yale University, on "Eschatology of Art: Words, Vision and Music," 7:30 p.m., Room 112 Kern.

Friday, April 28

Sports: men's tennis, vs. Columbia, 2:30 p.m., Nittany Courts.

Spring Week Carnival, 6 p.m.-midnight, IM Field.

france-cinema, *The Return of the Tall Blond Man*, 7 and 9 p.m., Room 112 Kern.

African Grots from Mali will play the 21-string kora and sing. Interpretation by Charles Byrd, researcher in oral traditions, 7:30 p.m., Robeson Cultural Center.

PSU Brass Chorale, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 29

Local International Livestock Show, 8 a.m.-4 p.m., Ice Pavilion.

Spring Week Carnival, noon-midnight, IM Field. Free concert, 1:30-5:30 p.m., featuring Johnny's Dance Band.

Sports: men's golf, Nittany Lion Invitational, Blue Course; women's lacrosse, vs. Rutgers, 2 p.m., IM Field; baseball, vs. St. Johns (2), 1 p.m., Beaver Field.

france-cinema, *The Return of the Tall Blond Man*, 7 and 9 p.m., Room 112 Kern.

Commons play, *And Miss Reardon Drinks a Little*, 8 p.m., Room 102 Kern. Ticket includes make-your-own sundae bar and beverage.

Give 'em Hell, Harry, with Kevin McCarthy, scholarship benefit, 8 p.m., Eisenhower Auditorium.

Faculty Club Big Spring Party, dancing, bridge, poker, floor show, 8:30 p.m., Faculty Club.

Penn State Singers, 8:30 p.m., Music Bldg. recital hall.

Sunday, April 30

Beta Sigma Beta/Sy Barash Regatta, 11 a.m.-6 p.m., Stone Valley. Rain date, May 7.

University Chapel service. Dr. Samuel DeWitt Proctor, Rutgers University and pastor, Abyssinian Baptist Church, New York, 11 a.m., Frizzell Room, Eisenhower Chapel.

Sports: men's golf, Nittany Lion Invitational, Shaver's Creek Nature Center, Spring Wildflower Walk, 2-4 p.m.; Bees, 3-4:30 p.m., Stone Valley.

Lois Oakes, violin, 3:30 p.m., Music Bldg. recital hall.

Commons play, *And Miss Reardon Drinks a Little*, 8 p.m., Room 102 Kern. Ticket includes make-your-own sundae bar and beverage.

Seminars

Thursday, April 20

Computer Center, "Fortran-PL/I Conversion," (2 of 2), 7:30 p.m., Room 105 Osmond.

Monday, April 24

Biochemistry and Biophysics, M. Nomura, University of Wisconsin, on "Organization and Expression of Ribosomal Genes in *E. coli*," 3:55 p.m., Room 101 Althouse.

Fuel Science, Thomas Eapen on "Mechanism of Gasification in a Fixed Bed," 4 p.m., Room 301 Steidle (Mineral Industries).

Microbiology and Cell Biology, E. Peter Greenberg, Harvard University, on "Biology of the Facultatively Anaerobic Spirochaetes with Emphasis on their Motility and Behavior," 4 p.m., Room N261 Frear.

Computer Center, "Job Control Language," (3 of 6), 7:30 p.m., Room 105 Osmond.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Tuesday, April 25

Food Science, D. Jurd on "The Effect of CO₂ on Stability of Mechanically Deboned Meat," 11:10 a.m., Room 201 Borland.

Analytical Chemistry, Alan Freyer on "Chemical Evolution," 1 p.m., Room 339 Davey.

Research Applications of Computers, L.A. Beady, IBM T.J. Watson Research Ctr., Yorktown Heights, N.Y., on "The Evolution of Large Programs and the Complexity of Modifications," 1 p.m., Room 111 Bouice.

Solid Waste Management, Benjamin Whistler, emeritus professor of civil engineering, on "Changing Perspectives for Handling Hazardous Materials," 2:20 p.m., Room 129 Sackett.

Chemical Engineering, Paul Ream, Bethlehem Steel Co., on "The Steel Industry and Ecology," 3:45 p.m., Room 140 Fenske.

Physics, Louis Rosen, LAMPF, Los Alamos, on "Some Novel Uses of Meson Factories," 3:50 p.m., Room 333 Whitmore.

Genetics, Jeffrey Stern on "Mitochondrial Gene Products," 3:55 p.m., Room 52 Frear.

Plant Pathology, Larry Madden on "From 'Rubio' to Pest Management: The History of Plant Disease Control," 3:55 p.m., Room 213 Backout.

Astronomy, Sabatino Sofia, NASA Goddard Space Flight Ctr., on "X-ray Sources in Clusters of Galaxies and Cosmology," 4 p.m., Room 445 Davey.

Engineering Science and Mechanics, P.H. Kurtz, Applied Research Laboratory, on "Probabilistic Modeling of Fatigue," 4 p.m., Room 113 Sackett.

economics, John E. Tilton, Mining Debate over the Exhaustion of Mineral Resources," 4 p.m., Room 112 Walker.

Computer Center, "Introduction to APL," (1 of 6), 7:30 p.m., Room 201 Bus. Adm.

Wednesday, April 26

Computer Center, "Job Control Language," (4 of 6), 7:30 p.m., Room 105 Osmond.

Thursday, April 27

Ceramic Science, Robert Davis, North Carolina State Univ., on "Carbon Diffusion in a SiC," 11 a.m., Room 301 Steidle (Mineral Industries).

Chemistry, W. Carl Linneberger, University of Colorado, on "Laser Spectroscopy of Negative Ions and Small Free Radicals," 12:45 p.m., Room 333 Whitmore.

Agronomy, James Griffin on "Potential Use of Brassica sp. (turnips, kale, etc.) as a Forage in the Northeast," 3:55 p.m., Room 111 Tyson.

Meteorology, Dennis G. Deaven and Robert E. Livezey, National Meteorological Center, on "Boundary and Initialization Problems in Limited Area Modeling," 3:55 p.m., Room 112 Walker.

Rail Transport, Michael R. Bonavia, British Railways Board, on "Railway Nationalization — the British Experience," 3:55 p.m., Room 62 Willard.

Geography, Dr. Jay Hayes, special assistant to Secretary of the Interior, on "Governmental and Academic Approaches to Development Assistance," 4 p.m., Room 319 Walker.

Microbiology and Cell Biology, Ronald D. Porter, Radiobiology Laboratories, Yale University School of Medicine, on "A Dual Role for Exonuclease V in Recombination during Transduction in *E. coli*," 4 p.m., Room 52 Frear.

Computer Center, "Introduction to APL," (2 of 6), 7:30 p.m., Room 201 Bus. Adm.

Chambers Gallery: Art Education undergraduate student exhibition, opens April 29.

Kern Commons Gallery: Ed Leos, photographs, "Five Prologues and an Introduction," David Sineberg, jewelry, Sylvia Belgers, quilting, "Softstuff," Erma Martin, wall paintings, "Canyon Walls," all through April 29. Bob Botti, wall ceramics, opens April 29.

Museum of Art: American Art from the Permanent Collection, through April 30. Goussins and drawings, Robert Kulicke, painter, designer, craftsman.

Pattee, East Corridor Gallery: Kent Armstrong, photographs, "Nature of Art," through April 26.

Zoller Gallery: Invisions and Christenberry exhibit, through April 27. Richard Rydell, prints, and Bruce West, photographs, opens April 29.

Exhibits

Penn State Intercom

Search committee named to seek Norris replacement

A search committee for the replacement of Chalmers G. Norris, director of planning and budget officer of the University, has been appointed by President John W. Oswald.

Named co-chairmen of the committee are Dr. Stanley O. Ikenberry, senior vice president for administration, and Robert A. Patterson, senior vice president for finance and operations. Other committee members are:

Dr. John Cahir, associate professor of meteorology and chairman of the University Faculty Senate Committee on Planning and Development; Dr. James B. Bartoo, dean of the Graduate School; and Dr. Richard L. Morril, executive assistant to the Provost.

The Director of Planning and Budget Officer is Penn State's principal officer of all University planning and budgeting. As head of the Office of Budget and Planning, the director is responsible for the development of operating and capital budgets; institutional research, and the coordination of academic, budgetary and capital program planning.

Mr. Norris will leave his post at Penn State on May 1 to assume responsibilities as executive director of the Council for Postsecondary Education in the state of Washington.

During the period of the search, Steven A. Garban, University controller, will assume responsibilities as the interim director of the Office of Budget and Planning.

Effective May 1, P. Richard Althouse will assume responsibilities as director of the Budget Division, one of three divisions under the Office of Budget and Planning. Mr. Althouse will be responsible for planning, developing and controlling the University's budget. The Institutional Research Division and the Planning Services Division, the two other divisions under the Office of Budget and Planning,

(Continued on page 6)

Mann, McMurty nominated for Senate chairman

The University Faculty Senate will consider a wide variety of reports and resolutions at a special session at 7:30 p.m. Monday, May 1 in the Keller Bldg. auditorium, and at a second session at 1:10 p.m. Tuesday, May 2 in Room 112 Kern Bldg.

The Nominating Committee for 1978-79 Senate officers will present the following nominations and will accept nominations from the floor: for chairman-elect, Dr. Stuart H. Mann, associate professor of operations research, and Dr. George J. McMurty, professor of electrical engineering; for secretary, Dr. George W. Franz, assistant professor of history at the Delaware County Campus; Dr. Thomas J. Knight, associate dean for the Commonwealth Campuses and Continuing Education in Liberal Arts; and Dr. Herbert M. Lundegren, professor of health and physical education.

Nominated for one position on the Faculty Advisory Committee are Dr. Paul Axt, professor of mathematics; Gordon Bowker, associate professor of engineering at the Mont Alto Campus; Dr. John H. Cahir, associate professor of meteorology; Dr. Thomas D. Larson, professor of civil engineering and director of the Pennsylvania Transportation Institute; Dr. Roger B. Saylor, professor of economics and statistics at the Capitol Campus; and Dr. John D. Sink, professor of meat science.

Items on the agenda for the evening session include a proposed rule change affecting extended degree students. The Senate Committee on Extended Degrees proposes that extended degree students not be required to apply for readmission if

they interrupt enrollment in credit courses for a term or longer. Presently, any student "who has interrupted continuous enrollment in credit courses for at least one term," except for the summer term, must seek readmission.

In other action, the Senate Committee on Admissions, Records, and Scheduling will recommend that Section 4 of Senate Policy 34-58 be deleted. The section states that students with physical handicaps are barred from enrolling in courses for which they cannot perform the physical requirements. The committee will point out that its action is in line with Section 504 of the federal Rehabilitation Act of 1973, forbidding discrimination on the basis of a physical handicap.

The Ad Hoc Committee of Engineering Senators will propose an amendment on the use of the course-drop from the fourth through the eighth week of classes. At the April meeting, the ad hoc committee presented a door handout proposing that use of the course drop during those weeks be limited to a maximum of 12 credits for baccalaureate degree candidates and six credits for associate degree candidates. That proposal will be discussed, and in addition, the committee will add an amendment recommending that the policy be extended to include provisional students who intend to become baccalaureate or associate degree candidates.

A proposed change in promotion and tenure procedures will be put forth by the Senate Committee on Faculty Affairs. The committee is attempting to create a more specific mechanism to ensure that when the findings of tenure and promotion

review bodies differ, consultation take place among and within the review bodies.

An informational report on student evaluation of instruction will be presented by the Subcommittee on Student Evaluations. The report will suggest that student evaluations be held after the first two weeks of instruction and again after seven or eight weeks to find out if students believe course objectives are being met. Other suggestions include having the instructor present a written list of course objectives during the first week of the course and looking into the possibility of a "fairly uniform University-wide evaluation form."

The subcommittee will report that as far as can be determined, student evaluation of instruction is being carried out in all Colleges of the University; many students try to answer questions honestly; evaluations after a lapse of at least two years are probably more valuable than those performed during the course; and students want input on the evaluation process.

An informational report on the activities of the Academic and Athletic Standards Committee will be heard.

The Senate Committee on Admissions, Records and Scheduling will deliver a report on the first installment of a regular reporting system for monitoring the academic consequences of University admissions policies and procedures. Detailed academic profiles on students at all Penn State Campuses and in all academic units will be presented.

(Continued on page 5)

News in Brief

Heat to go off in early May

The Executive Energy Conservation Committee advises that heat in buildings used for academic and administrative purposes will be turned off approximately May 4. Heat in the residence halls and the Ritenour Health Center will be turned off approximately May 24.

Air conditioning will be turned on in the research areas May 17, depending on the need in each particular area. J. Carroll Dean, manager of energy conservation programs, should be contacted if that date causes a problem in a specific research area. Air conditioners in academic and administrative buildings will be turned on June 12.

R. E. Zilly, chairman of the committee, says that some minor problems may occur with systems that have been off for the winter. Problems should be reported to the Maintenance and Operations service desk. The phone number is 865-4731.

Hershey opens new anesthesia division

A Division of Anesthesia and Metabolic Research has been established in the Department of Anesthesia at Hershey.

Named to head the division is Dr. Richard A. Hawkins, professor of anesthesia and physiology. Dr. James J. Richter, assistant professor of anesthesia,

has also been appointed to the division.

The division will be involved in goal oriented basic research, according to Dr. Hawkins, with particular interest in neurochemistry and neurophysiology, lung and liver physiology and biochemistry.

Dr. Hawkins holds a B.S. degree from San Diego State University and a Ph.D. degree in physiology from Harvard University. He came to the Medical Center from New York University Medical Center, where he was associate professor of neurosurgery and physiology.

Dr. Richter holds an A.B. from Franklin and Marshall College, M.S. and Ph.D. degrees from Bowman Gray School of Medicine of Wake Forest University, and an M.D. from the University of Connecticut School of Medicine. He came to Hershey from the University of Wisconsin, where he was an assistant professor of anesthesiology.

Air Atlantic Airlines announces new commuter

Air Atlantic Airlines, Inc., a new commuter service in the Centre Region providing transportation between State College and Philadelphia, will soon begin operations.

As the only daily commuter service between State College and Philadelphia, Air Atlantic will provide round-trip transportation twice daily — Monday through Friday — between the two cities.

Leaving University Park Airport at 7 a.m. and 4 p.m., and leaving Philadelphia at 9 a.m. and 6 p.m., passengers will be in flight for one hour and 15 minutes.

The craft utilized by Air Atlantic is the Piper twin-engine Navajo Chieftain, a cabin class aircraft capable of transporting the two Air Atlantic pilots and eight passengers.

PSU helps Lock Haven set up ROTC program

The University and Lock Haven State College have made a formal agreement to establish an Army Reserve Officer Training Corps program at Lock Haven.

The document was signed by Col. Robert Rose, professor of military science at the University; Dr. Francis N. Hamblin, president of Lock Haven State; and Dr. Robert E. Dunham, vice president for undergraduate studies.

Instructors from the University travel to Lock Haven twice a week to teach military science courses to the 11 LHSC students already enrolled in the program. Non-military courses, such as map reading, will be taught by Lock Haven faculty members.

By affiliating with the existing ROTC program at the University, Lock Haven was able to establish its program much sooner than is customary. The College will be able to commission its first officers by May 1980.

Sunshine is where you find it.

Penn Staters

Dr. Robert M. Stern, professor of psychology, has been named head of the Department of Psychology. Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, announced this week. Dr. Stern has served as acting head of the department since last September.

A graduate of Franklin and Marshall College, Dr. Stern received the M.S. degree in psychology from Tufts University and the Ph.D. from Indiana University, Bloomington, Ind. He came to Penn State as an assistant professor in 1965.

Author of numerous research papers and articles in the area of psychophysiology, he also is co-author with Dr. William J. Ray, assistant professor of psychology at Penn State, of a book, *Biofeedback*, published last year.

Two members of the University's faculty have been awarded Fulbright-Hays grants for the coming academic year. They are **Dr. Martin R. Quinn**, assistant professor of English at Beaver Campus, and **Dr. William A. Steele**, professor of chemistry.

Dr. Quinn will be lecturing on 19th and 20th century American and British literature at Tehran University in Iran from September 1978 to June 1979. A member of the faculty since 1975, Dr. Quinn holds A.B. and M.A. degrees from the University of Maryland and a Ph.D. from Penn State. He served as a visiting lecturer at Jundi Shapur University in Ahwaz, Iran in 1974-75.

Dr. Steele will lecture on the dynamics of liquids at the University of Vienna, Austria, from February to June 1979. A member of the faculty since 1955, Dr. Steele received a Guggenheim Fellowship in 1976 and served as Unilever Visiting Professor at the University of Bristol, England. He was a visiting lecturer at UCLA during winter term this year. He is a graduate of Wesleyan University with a Ph.D. from the University of Washington, Seattle.

Dr. Philip H. Baldi, associate professor of linguistics and classics at the University, has been presented the University's Class of 1933 Award for Distinction in the Humanities for 1978. The award is presented annually by the Class of 1933 to an outstanding Penn State faculty member.

Citing Dr. Baldi's ability to communicate with students and his enthusiasm for teaching, Liberal Arts Dean Stanley F. Paulson said that on student evaluation forms, Dr. Baldi's students frequently answer the question, "What did you like best about this course?" with the response, "The teacher."

Dr. Baldi came to Penn State in 1973, after having served as an instructor in English and linguistics at SUNY-Brockport. He has a B.A. in classics from the University of Scranton, and M.A. and Ph.D. in linguistics from the University of Rochester.

At Penn State, he has been active in the development of courses in comparative Greek and Latin grammar, the history of Latin, Sanskrit, and language in its social context. He is a co-editor, with Dr. William R. Schmalstieg, professor and head of Slavic languages, of the journal, *General Linguistics*.

Dr. Gordon F. De Jong, professor of sociology and assistant director, Population Issues Research Center, was selected to receive the Distinguished Alumnus Award by the Department of Sociology at the University of Kentucky. As part of last week's award program, Dr. De Jong presented a public lecture on his research concerning residential preferences and population redistribution and a seminar on population redistribution policies in The Netherlands and Great Britain.

Dr. Barnes W. McCormick, professor and head of the Department of Aerospace Engineering, is marking his 25th year of service at the University.

Since returning to the Penn State faculty in 1957, Dr. McCormick has taught a variety of subjects, including aerospace engineering design, principles of flight testing, aerodynamics of VISTOL aircraft, stability and control of aircraft and missiles, theory of flight, performance of aerospace vehicles, and aerolasticity. He originated a senior thesis course and has also provided undergraduates with the opportunity to design and construct a two-seat light airplane. His presentations are enriched by his background as an instrument-rated, private pilot, and as a certified ground school instructor.

Dr. McCormick, who received three degrees from Penn State, is author of a book, *Aerodynamics of VISTOL Flight*, and more than 40 technical papers. His areas of particular interest and experience include low-speed aerodynamics, aerodynamics of vertical flight, propeller design (including marine propellers), hydrodynamics, aerodynamic noise, and the behavior of vortex systems including their interaction with aircraft and lifting surfaces generally.

A member and past president of the National Association for Aerospace Engineering Department Heads, Dr. McCormick is also a member of the American Helicopter Society, having served as that Society's technical director and as editor of the *Journal of the American Helicopter Society*.

In 1976 Dr. McCormick received the ASEE Aerospace Division AIAA Education Achievement Award for his innovative contributions to aerospace engineering education.

Dr. Raymond E. Untrauer, professor and head of the Department of Civil Engineering, has been named a Fellow of the American Concrete Institute (ACI). ACI presently has 15,000 members and 302 Fellows. Dr. Untrauer was elected "for outstanding contributions to the production or use of concrete materials, products, and structures in education, research, development, design, construction, or management."

Clifford A. Mason, associate professor of engineering at Capitol Campus, has been awarded a NASA Summer Faculty Fellowship for 1978. The fellowship provides the opportunity to participate in research and development activities at the Johnson Space Center in Houston. Prof. Mason will be studying the development of systems and instrumentation for obtaining biomedical data during manned space flights.

David B. Van Dommelen, professor of art education, recently won the Burroughs Wellcome, Inc. purchase prize for his stitchery wall hanging in the Needlework III Invitational in Raleigh, N.C. The piece was titled "Mordant" and was a combination stitchery, collage framed construction. Mr. Van Dommelen acted as the judge for the non-invitational portion of the exhibition, which included 500 pieces of all varieties of creative work in needlework. He also presented several lectures and short workshops.

After 29 years of service to the University, **Allen R. Gray**, professor of physical education, retired April 1.

A native of Downton, Pa., Prof. Gray initially attended Penn State as a graduate assistant in health and physical education in 1948. A year later he was made an instructor in the swimming program and in 1951 was placed in charge of that program.

He became an assistant professor in 1957 and five years later was promoted to full professor in the College of Health, Physical Education and Recreation, where he taught methods and tests and measurements.

Prior to coming to the University, Prof. Gray taught mathematics and physical education at East Berlin High School, where he also coached the soccer, basketball and baseball teams. After a three-year stint in the army during WWII, he returned to high school teaching, this time at Shippensburg.

Mr. Gray holds a B.A. from West Chester State College and an M.Ed. in health and physical education from Penn State. His three children, Rosemary, 29; Susan, 27; and William, 23, all earned their degrees at Penn State.

Dr. Henry J. Hermanowicz, dean of the College of Education, has been appointed to the Board of Directors of the recently created Pennsylvania Council on Economic Education. His appointment was jointly made by the Pennsylvania Secretary of Education, the President of the Pennsylvania AFL-CIO, and the President of the Pennsylvania Chamber of Commerce.

Dr. Bonnie Johnson, assistant professor of speech communication, presented an invited lecture at the University of Minnesota on April 20. Her topic was "The Executive Communicator," and she presented some findings of her current research on how executives establish a network of informal relationships for securing and interpreting information.

Harry R. Allcock, professor of chemistry, recently presented invited colloquia at The University of Alberta at Edmonton, The University of Calgary, and The University of Vermont. He discussed the research on inorganic macromolecules being carried out in his group.

Dr. Kenneth R. Beittel, professor of art education, is exhibiting 50 recent stoneware and porcelain pots at the Sloan Gallery of Lock Haven State College during April. Dr. Beittel also gave an illustrated lecture emphasizing his methods of making and decorating clay pieces of large scale. The gallery has purchased one of his pieces for their permanent collection.

Dr. Gerard J. Brault, professor of French, was the keynote speaker at a colloquium on the French Canadians of New England held at Bates College in Lewiston, Me., April 8-9. Prof. Brault spoke in French on the provincial origins of the French colonists in Canada in the 17th and 18th centuries. On April 10, Prof. Brault was the invited speaker at a senior seminar on Franco-American history being given this semester at Bowdoin College in Brunswick, Me.

Appointments

Arun Kilara as assistant professor of food science at University Park. B.Sc., Dairy Science College, NDRI, Karnal, India; M.Sc., U. of Saskatchewan; Ph.D., U. of Nebraska. Formerly research associate at Nebraska.

Robert R. Warren as assistant professor of engineering at New Kensington. B.S., M.S., U. of Pittsburgh. Formerly associate engineer, D. M. Neill and Associates.

John L. Foley as instructor in food science at University Park. B.S., Iowa State U.; M.S., U. of Massachusetts. Formerly a manager with Sealtest Foods, Land O' Lakes, Inc., and Friendly Ice Cream Corp.

Bookshelf

Dr. Jon P. Nelson, associate professor of economics, has written a book summarizing his own research and the work of other specialists in the field of economic analysis of noise pollution abatement strategies.

Entitled *Economic Analysis of Transportation Noise Abatement*, it is the first comprehensive economic study of U.S. noise pollution problems. The book, which deals with noise from air and highway traffic, was published this month by Ballinger Publishing Company, a subsidiary of J. B. Lippincott.

Dr. Nelson concludes that, using property values and other economic data, it is possible to assign a dollar value to the benefits derived from proposed noise controls in specific cases. Furthermore, he writes, decibel taxes, levied against companies whose trucks or planes exceed specified levels, might be more effective than government regulations and fixed standards in limiting noise pollution problems. Several European countries are currently experimenting with such taxes.

Obituary

Nicholas M. Brentin, associate professor of Romance languages and a member of the faculty since 1944, died April 17. Born Dec. 14, 1913 in Bessemer, Pa., Prof. Brentin graduated from Youngstown University and received a master's degree at Penn State in 1943. He was named an instructor the following year, was promoted to assistant professor in 1954 and associate professor in 1957. Prof. Brentin administered the John W. White scholarship competition and was coordinator of Commonwealth Campus faculty in the Department of Spanish, Italian and Portuguese. His research interests included Spanish poetry, Cervantes and Spanish American literature.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Special Events

Thursday, April 27

Free U. Gentle Thursday, HUB lawn, 10 a.m.-10 p.m.
Phi Kappa Phi annual banquet and initiation, 5:30 p.m., HUB ballroom.

Shakespeare film, *Hamlet* (Williamson/Richardson), 6:30 p.m., Room 101 Chambers.

Interaction—Art and Science Lecture. William Woody, Yale University, on "Eschatology of Nineteenth Courts," 7:30 p.m., Room 112 Kern.

Japanese Language and Literature, H. Tanaka, An Evening of Japanese Films, 7:30 p.m., HUB assembly hall.

Penn State Thespians, *A Funny Thing Happened on the Way to the Forum*, 8 p.m., Pavilion Theatre.

Friday, April 28

Penn State Exhibitions, exhibits and skits by Arts and Architecture Student Council, 9 a.m.-5 p.m., The Mall, Pollock Rd. to Pattee.

Sports: Men's tennis, vs. Columbia, 2:30 p.m., HUB lawn.

Spring Week Carnival, noon-midnight, IM field.

france-cinema, *The Return of the Tall Blond Man*, 7 and 9 p.m., Room 112 Kern.

African Grooves from Mali will play the 21-string kora and sing. Interpretation by Charles Byrd, Indiana University, 7:30 p.m., Robeson Cultural Center.

Spring Theatre, 8 p.m., Room 102 Kern.

Penn State Thespians, *A Funny Thing Happened on the Way to the Forum*, 8 p.m., Pavilion Theatre.

PSU Bass Chorale, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 29

Balloon Launch for the Jesse L. McMannes Memorial Fund, all day, East Campus Intramural Field.

Little International Livestock Show, 8 a.m.-4 p.m., Ice Pavilion.

Spring Week Carnival, noon-midnight, IM field. Free Concert, 1:30-5:30 p.m., featuring Johnny's Dance Band.

Sports: men's golf, Nittany Lion Invitational, Blue Course; women's lacrosse, vs. Rutgers, 2 p.m., IM field; baseball, vs. St. Johns (2), 1 p.m., Beaver Field.

Penn State Thespians, *A Funny Thing Happened on the Way to the Forum*, 2 and 8 p.m., Pavilion Theatre.

france-cinema, *The Return of the Tall Blond Man*, 7 and 9 p.m., Room 112 Kern.

Commons play, *And Miss Reardon Drinks a Little*, 8 p.m., Room 102 Kern. Ticket includes make-your-own sundae bar and beverage.

Kevin McCarthy

Glee 'em Hell, Harry, with Kevin McCarthy, scholarship benefit, 8 p.m., Eisenhower Auditorium.

Faculty Club Big Spring Party, dancing, bridge, poker, floor show, 8:30 p.m., Faculty Club.

Penn State Singers, 8:30 p.m., Music Bldg. recital hall.

Sunday, April 30

Beta Sigma Beta/Sy Barash Regatta, 11:30 a.m., Stone Valley. Rain date, May 7.

University Chapel service, Dr. Samuel DeWitt Proctor, Rutgers University, and pastor, Abyssinian Baptist Church, New York 11 a.m., Frizzell Room, Eisenhower Chapel.

Sports: men's golf, Nittany Lion Invitational. Shaver's Creek Nature Center, Spring Wildflower Walk, 2-4 p.m.; Bees, 3-4:30 p.m., Stone Valley.

Lois Oakley, violin, 3:30 p.m., Music Bldg. recital hall.

Commons Play, *And Miss Reardon Drinks a Little*, 8 p.m., Room 102 Kern. Ticket includes make-your-own sundae bar and beverage.

Monday, May 1

First day for signing summer term NDLS and University Long-Term Loans, Room 108 Shields.

Cinema: Lang, *The Big Heat* (1953), 7 p.m.; Hawks, *The Big Sleep* (1946), 9 p.m., HUB assembly hall.

University Faculty Senate meeting, 7:30 p.m., Keller Bldg. auditorium.

Priestley Lecture. Paul Berg, Stanford University Medical Center, on "SV-40 Virus: Its Structure and Life Style" (11:40), 8 p.m., Room 105 Forum Bldg.

Pam Moyer, clarinet, 8:30 p.m., Music Bldg. recital hall.

Tuesday, May 2

Fixed date for meetings including Commonwealth Campus faculty.

Hartnet Casdin-Silver on "Holograms," 11:10 a.m., HUB ballroom.

Comp. Lit. Luncheon, 12:15 p.m., talk, 1 p.m., Faculty Club. Leon Lyday, Spanish, on "Flores y Papel."

University Faculty Senate meeting, 1:10 p.m., Room 112 Kern.

Alumni Fellow James Mithöland Jr., on "Authors and Publications," 2:30 p.m., Room 118.

English Colloquium, Elmer Borklund, English, on "Some Modern Celtic Myths," 8 p.m., Room 101 Kern.

History of Photography Series Lecture. Gail Buckland, former archivist of the Royal Photographic Society of Great Britain and author, on "William Henry Fox Talbot, Inventor of Photography," 8 p.m., Room 101 Kern.

Priestley Lecture. Paul Berg, Stanford University Medical Center, on "The Physical, Genetic and Functional Organization of SV-40's Chromosome (II)" (2 of 4), 8 p.m., Room 119 Osmond.

Wednesday, May 3

Eco-Action Sun Day, sunrise services, 6 a.m., Beaver Stadium field; fair, 11 a.m.-4 p.m., HUB lawn.

Philip M. Hauser, professor emeritus, University of Chicago, public lecture on "Social Statistics in the Year 2000," 2:30 p.m., Room 112 Kern Bldg.

Commonsplace Theatre, *Mean Streets*, 7:30 and 9:30 p.m., Room 112 Kern.

Artists Series, American Film Theatre, *Genet, The Maids*, 8 p.m., Eisenhower Auditorium.

History of Photography Series Lecture. Nachum T. Gidal, writer and photojournalist, on "My Life in Photojournalism," 8 p.m., Room 101 Kern.

Priestley Lecture. Paul Berg, Stanford University Medical Center, on "Synthesis of Novel Viral Chromosomes" (4 of 4), 8 p.m., Room 105 Forum.

University Theatre, Euripides, *Electra*, student preview, 8 p.m., The Playhouse.

Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, May 4

Interdisciplinary Baroque Colloquium, Robert W. Frank, English; Carl R. Hausman, philosophy, opening addresses, 3 p.m., HUB assembly hall. J. R. Judson, art history, University of North Carolina, on "Rubens and Book Illustrations," 3:30 p.m., HUB assembly hall.

Priestley Lecture. Paul Berg, Stanford University Medical Center, on "Synthesis of Novel Viral Chromosomes" (4 of 4), 8 p.m., Room 105 Forum.

Sports: women's lacrosse, vs. East Stroudsburg, 3:30 p.m.

Samuel Edgerton, professor of art history, Boston University, on "The picture in the picture: Medieval and Renaissance Italy," 4 p.m., HUB assembly hall. Public lecture sponsored by Art History Department and Medieval Studies.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Penn State University Chorus, 8:30 p.m., Eisenhower Auditorium.

Friday, May 5

Last day for signing spring term NDLS and University Long-Term Loans, Room 108 Shields.

Interdisciplinary Baroque Colloquium, Robert W. Green, European history, on "The Classicist-Baroque Antithesis in the Political and Social Order," 10 a.m., Room 101 Kern.

Steven L. Goldman, Lehigh University, on "The Objectivisation of the Real in the Baroque" (3 p.m.), Room 101 Kern.

Sports: women's tennis, vs. Ohio State, Princeton, Michigan, 10 a.m.

Shaver's Creek Nature Center, Evening Pond Walk, 7 p.m., Stone Valley.

Student Film Organization, *Silent Running*, 7, 9, 11 p.m., Room 102 Forum.

Interdisciplinary Baroque Colloquium, D. Douglas Miller, Musica da Camera, in An Evening of Baroque Music, 8 p.m., Gallery C, Museum of Art.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Gary Rusnak, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday May 6

53rd Penn State Dairy Exposition, 8 a.m.-5 p.m., University Dairy Barn.

Shaver's Creek Nature Center, Early Morning Bird Walk, 8-9:30 a.m.; and Wildflower Identification Workshop (by registration only—85¢-185¢), 9:30 a.m.-noon, Stone Valley.

Eco-Action Recycling, 10-3 p.m., Parking Lot 83 and Boalsburg Fire Hall.

Sports: women's golf, Penn State Invitational; women's lacrosse, Central Penn Tournament; women's tennis, vs. Ohio State, Princeton, Michigan, 10 a.m.; softball, vs. Ursinus (2), 1 p.m.; men's track vs. Maryland, 1 p.m.; football, Blue-White game, 2 p.m., Hersheypark Stadium, Hershey.

france-cinema, Molinari, *Male Hunt*, 7 and 9 p.m., Room 112 Kern.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Sunday, May 7

Sports: women's golf, Penn State Invitational; women's lacrosse, Central Penn Tournament; women's tennis, vs. Ohio State, Princeton, Michigan, 10 a.m.

University Chapel service, Dr. Badr Ateya, mineral industries, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, What's New—Young Wildlife in the Spring, 2-4 p.m., Stone Valley.

PSU Wind Ensemble, "Pop's Concert," 3:30 p.m., Arts Courtyard.

france-cinema, Molinari, *Male Hunt*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, April 27

Computation Center, "Introduction to APL" (2 of 6), 7:30 p.m., Room 210 Bus. Adm.

Monday, May 1

Fuel Science, Suzan B. Palmer, Florida Atlantic University, on "Porphyrin Geochemistry in Low to High Rank Bituminous Coals," 4 p.m., Room 301 Siegle.

Computation Center, "Job Control Language" (5 of 6), 7:30 p.m., Room 105 Osmond.

Tuesday, May 2

Biochemistry and Biophysics, Larry C. Davis, Kansas State University, on "Macromolecular Substrate Model for Nitrogenase," 11 a.m., Room 101 Althouse.

Food Science, C. Paden on "Immobilization of Glucose Isomerase," 11:10 a.m., Room 201 Boland.

Analytical Chemistry, Catherine Fenselau on "Biomedical Mass Spectrometry," 1 p.m., Room 339 Davey.

Psychology, Sigvard Rubenowitz, Gothenburg University, Sweden, on "Experiments in Work Redesign in Sweden," 1 p.m., Room 112 Chambers.

Research Applications of Computers, John C. Griffiths, petrography, on "Mineral Resource Assessment," 1 p.m., Room 325 Whitmore.

Solid Waste Management, Warren Custer, H.F. Lenz Co., Johnstown, Pa., on "Solid Waste for Institutional Energy," 2:20 p.m., Room 128 Sackett.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Chemical Engineering, Norman N. Li, Exxon Research & Engineering Co., on "Encapsulation and Separation by Liquid Membranes," 3:45 p.m., Room 140 Fenske.

Genetics, Geraldine Lee on "Mechanisms of Band Formation of Chromosomes with Giemsa and Quinacrine," 3:55 p.m., Room 52 Frear.

Plant Pathology, Chris Miller on "Air Pollution Injury to Plants: A Historical Perspective," 3:55 p.m., Room 213 Buckhout.

Engineering Science and Mechanics, Alex S. Rednor, vice-president, Photoelastic, Inc., Malvern, Pa., on "Photoelastic Determination of Stress Intensity Factors," 4 p.m., Room 113 Sackett.

Computation Center, "Introduction to APL" (3 of 6), 7:30 p.m., Room 201 Bus. Adm.

Wednesday, May 3

Biology/Audio Visual Services, Gotthard Wolf on "Scientific Film as a Research Tool in Zoology and Animal Behaviorism," 3:55 p.m., Room 101 Kern.

Computation Center, "Job Control Language" (6 of 6), 7:30 p.m., Room 105 Osmond.

Thursday, May 4

Ceramic Science, George Y. Onoda Jr., University of Florida, on "Packing and Sintering Relations for Inhomogeneous Mixtures of Coarse and Fine Powders," 11 a.m., Room 310 Siegle.

Chemistry, Herbert House, Georgia Institute of Technology, on "Recent Studies with Organocuprate Reagents," 12:45 p.m., Room 333 Whitmore.

Acoustics, Stefan Czarnetzki, visiting professor, Purdue University, on "Shielding Effects of Barriers in Bounded Space" and "Acoustics in Poland," 1:30 p.m., Room 112 Walker.

Physics, Steven Bishop, Naval Research Laboratory, on "Optically Induced Defects in Amorphous Semiconductors," 3:50 p.m., Room 117 Osmond.

Agromony, Brian Carter, on "Estimating Mean Annual Soil Temperatures for the Appalachians" and "Time as a Factor in the Formation of Soils Developed in Pre-Wisconsinan Glacial Till," 3:55 p.m., Room 111 Tyson.

Meteorology, Robert G. Fiegle, University of Washington, on "Climate Research," 3:55 p.m., Room 112 Walker.

Rail Transport, Lloyd McSparran, General Electric Company, on "Recent Developments in Motive Power and Rapid Transit Equipment Supply," 3:55 p.m., Room 62 Willard.

Geosciences, David Elliott, The Johns Hopkins University, on "Thrust Faults," 4 p.m., Room 22 Deike.

Philosophy, Carl B. Vaughn, on "Categories and the Real Order," 4 p.m., Room 101 Kern.

Biology/Audio Visual Services, Gotthard Wolf on "Scientific Film as a Research Tool in Cell Physiology," 5:57 p.m., Room 102 Chambers.

Computation Center, "Introduction to APL" (4 of 6), 7:30 p.m., Room 201 Bus. Adm.

Friday, May 5

Materials Science and Engineering, Kevin Teichman, UC-Berkeley, on "The Development of Novel Techniques for Lean Combustion," 1:30 p.m., Room 301 Seidle.

Exhibits

Chambers Gallery: Art Education undergraduate student exhibition, through May 16.

Kern Commons Gallery: Ed Lees, photographs, "Five Portraits and an Introduction," David Stineberg, jewelry; Sylvia Rodgers, quilting, "Softstuff"; Erna Martin Yost, Paintings "Canyon Walls," all through April 29. Bob Bott, wall ceramics, through May. Susan Canning, Esther DeLoraso and Suzanne Glascock, prints and drawings, and Mahin Ghanbari, ceramics, opens April 29. Museum of Art: American Art from the Permanent Collection, through April 30; Goya prints and drawings; Robert Kulicke, painter, designer, craftsman.

Zoller Gallery: Richard Rydell, prints, and Bruce West, photographs, opens April 29. Ann Bissell, paintings; Judith Franklin Jones, paintings; Thomas Scullin, paintings, opens May 6.

Former mansion houses Wilkes-Barre Campus

Each year, countless vacationers dig down in their pockets to purchase admission tickets to glamorous mansions where they can see and show the wealthy once lived.

Faculty and staff at Penn State's Wilkes-Barre Campus, however, get paid to work in just such surroundings. Their offices are located in Hayfield House, once the 50-room home of John and Bertha Conyngham. The mansion, along with a 19-car garage (now the Campus Commons building) and 48 acres of land was given to Penn State in 1964 by Mr. and Mrs. Richard J. Robinson — Mrs. Conyngham was Mr. Robinson's aunt.

Mr. Conyngham was a Wilkes-Barre coal industry supplier, his wife, the daughter of a J.P. Morgan banking partner. They built their house, which is located in Lehman Township, several miles outside Wilkes-Barre, at an estimated cost of well over a million dollars in 1934 during the midst of the Depression. The house, which contains more than 33,000 square feet of space, may have been the last of the large mansions built in the United States. Mr. Conyngham was 70 at the time, and he only lived three years more, but his wife used the estate as a summer home until her death in 1964. She was nearly 100 years old.

Although alterations had to be made to adapt the house for use by the Campus, every effort was made to keep its atmosphere intact. Campus Director George W. Bierly, for example, works in Mrs. Conyngham's former boudoir, said to be a copy of Marie Antoinette's at Versailles. Beside it is a marble bathroom — the wooden sides of the tub are so beautifully painted that their simulated marble graining is indistinguishable from the adjoining real article. The bath fixtures, incidentally, are made of gold.

Several of the house's 12 bathrooms have been turned into offices. The public information office has a delightful frieze of polar bears and penguins surrounding an alcove enclosing Mr. Conyngham's former bathtub (which has been boarded over and serves as a shelf). Drapenaves have been placed over the tiled walls to improve their acoustics — it turns out that typing in a tiled bath is somewhat noisy!

Next to the bath is Mr. Conyngham's enormous tiled, enclosed shower stall with seven different control knobs. It is currently used for storage. Mr. Conyngham's closet area (it originally had more than 60 built-in drawers, of which 22 remain) is large enough to accommodate a secretary and her desk.

Maintenance of the house creates a few minor problems. All the hardware was imported from Europe so it is almost impossible to match threads, and of course worn-out parts cannot be

reordered. One exception to this is the slate roof. When it was built, a duplicate set of exactly matched slates was set aside — each slate numbered and color coordinated — to use when repairs became necessary.

The house has three stories, a widow's walk, attic and basement. The latter contains an enormous walk-in safe with an aluminum-lined vault for fur storage and a special bin for wines. Even though classes are now held in the first floor living and dining rooms, their former beauty is easily imagined. Marble fireplaces brought from a French chateau still adorn these rooms (there are 12 fireplaces in the house), as do the original brocade tasseled curtains, for which each tiny tassel was fashioned by hand. Beyond the living room is the graceful "floating" staircase with an intricate handwrought iron and mahogany railing. Except for special occasions, it has been closed to all traffic, however. To conform to State fire regulations, brick enclosed stairwells were built into the house.

Faculty offices are located in what was once a breakfast room. The wall covering, chandelier and floor tiles have a Chinese motif, and the windows look out on a series of fountains.

Students can study in the Conyngham's pine paneled library — the boards were hand-planed — with parquet flooring. Priceless stained glass panels, also brought over from France, can be pulled out over the windows to catch the sun's rays. Study carrels have been placed in a stone walled sunroom, which is graced with a marble fountain. The ceiling area over the Campus library is painted with soft blue sky and pinkish clouds, and the stacks rest on Italian marble floors.

The second floor contained the master bedroom suite and a series of guestrooms, while the third floor was used by the servants. These floors currently house both offices and classrooms.

The Campus employs an around-the-clock staff of nine maintenance workers — the Conynghams had 10 gardeners alone. There is a 15-acre arboretum on the grounds with trees and shrubs brought from around the world, not to mention a glass enclosed gazebo where the Conynghams used to watch sunsets.

Faculty who conduct classes in Hayfield House have become used to their exotic surroundings — lecturing against a background of intricately carved wood paneling, relaxing in a lounge converted from a parl but first time visitors to Wilkes-Barre are always surprised — and appreciative of the thoughtful effort that has gone into maintaining intact a semblance of Hayfield House's former glories.

Library (left) still looks much the same. Faculty desks have replaced table in Chinese breakfast room (below).

Exquisitely carved paneling adorns living room (above), but rug and furnishings were sold. At right, the floating staircase; exterior view at left.

News in brief

(Continued from page 1)

Interdisciplinary Colloquium to deal with Baroque era

The Interdisciplinary Colloquium, an annual event sponsored by the Interdisciplinary Graduate Program in the Humanities, the College of the Liberal Arts, and participating departments, will be held on May 4 and 5 at the University Park Campus. This year's theme is "The Era of the Baroque."

Guest speakers are Dr. J. R. Judson, professor of art history at the University of North Carolina, and Dr. Steven L. Goldman, director of the Humanities Perspectives on Technology Program at Lehigh University. Dr. Judson's topic is "Rubens and Book Illustrations"; Dr. Goldman's, "The Objectification of the Real in the Baroque."

In addition, the following Penn State faculty members will speak and lead discussions: Dr. Robert W. Frank, professor and head of the Department of English; Dr. Carl R. Hausman, professor and head of the Department of Philosophy; and Dr. Robert W. Green, professor of European history. (The Calendar, page 3, carries a complete listing of times and places for the talks.)

At 8 p.m. on Friday, May 5 Musica Da Camera, the University's Chamber orchestra, will present "An Evening of Baroque Music," under the direction of Dr. D. Douglas Miller, professor of music. The concert will begin at 8 p.m. in Gallery C of the Museum of Art. All colloquium sessions are open to the public.

Polish authority on acoustics to speak May 4

Dr. Stefan Czarnecki, a visiting professor at Purdue University's Ray W. Herrick Laboratory, will lecture on "Shielding Effects of Barriers in Bounded Space" and "Acoustics in Poland" at 1:30 p.m. Thursday, May 4 in Room 112 Walker Bldg. His lecture is sponsored by the Graduate Program in Acoustics and the Central Pennsylvania Chapter of the Acoustical Society of America.

Dr. Czarnecki is director of the Acoustical Laboratory of the Polish Academy of Sciences, vice-president of the Committee on Acoustics of the Polish Academy of Sciences, and editor-in-chief of the journal, *Archives of Acoustics*.

Dr. Czarnecki is involved in the study of room acoustics, especially in relation to barriers in industrial halls, aeroacoustics in relation to the generation and propagation of sound by turbulence from flow machinery, and the identification of sound sources and various paths of sound propagation — his main emphasis at Herrick Laboratory.

Cancer Society awards national citation to PSU

The American Cancer Society awarded Penn State a National Citation for cancer control activities last week in Hershey. The society praised the University for the following activities:

- Students have had the opportunity to learn about cancer through programs in residence halls, clubs and organizations, and the Ritenour Health Center.

- Instructors are incorporating American Cancer Society films and programs into course curriculums, both at University Park and at the Campuses.

- Forty-eight programs on breast self-examination, a personal method of detecting breast cancer, were held for women employees.

- Students have volunteered to present educational programs on campus and in their communities, assist with early detection clinics, and hold fund-raising events.

- Instructors have planned and conducted cancer education courses and staffed early detection clinics.

Mr. Miholland

Miholland to serve as Alumni Fellow

James Miholland Jr., senior vice president of Harcourt Brace Jovanovich, Inc., and a 1947 Penn State graduate, will return to the University next week as an Alumni Fellow.

Mr. Miholland will arrive at the University Park Campus on Sunday, April 30 and will stay through Thursday, May 4. His visit is sponsored by the Office of the President, the Penn State Alumni Association, and the College of the Liberal Arts.

He will meet formally and informally with students, and will conduct two public lecture/discussions during the visit. The first, on the topic, "Authors and Publications," will be at 2:30 p.m. on Tuesday, May 2 in Room 318 Hetzel Union Bldg. The second, on "Business Opportunities for the Liberal Arts Graduate," will be at 7 p.m. on Thursday, May 4 in Room 320 HUB.

A native of Pittsburgh, Mr. Miholland entered Penn State in 1940 and enlisted in the U.S. Navy in 1942. He returned to the University in 1946 and was graduated in 1947. After holding a number of jobs in industry, he entered The Johns Hopkins University Graduate School in 1949 and received his M.A. in history in 1951.

He started his career with Harcourt, Brace & Co. as a college textbook salesman.

In 1961, Mr. Miholland became president of The Harvest Publishing Company in Cleveland, and in 1968, he was moved back to New York as a vice president of Harcourt Brace Jovanovich. In 1970, he became head of HBJ's periodical publishing and its insurance operations, and was named a senior vice president and a director of the company.

Mr. Miholland's father, James Miholland Sr., was president of the Penn State Board of Trustees and acting president of Penn State from 1947 to 1950.

Sun Day to offer solar equipment displays

Sun Day, a day of solar discovery and celebration, is being sponsored Wednesday, May 3, at University Park by Eco-Action, a University organization dedicated to preserving the environment.

The purpose of local Sun Day festivities is to show what new solar energy equipment is currently available and to bring a greater awareness of the sun's power to students and State College residents.

"The sun provides clean, economical and safe energy," Jim Perkins, an Eco-Action Sun Day coordinator, said. "We want present and future home owners to know that there is solar equipment now available at reasonable prices. Solar heat is not necessarily expensive."

Several months ago Congress set aside

Dr. Berg

Berg is Priestley lecturer

Dr. Paul Berg, a major figure in the recombinant DNA controversy and a Distinguished Alumnus, will present the 1978 series of Priestley Lectures at the University May 1-4.

The series is titled "The Molecular Anatomy of a Viral Chromosome" and is open to the public. The lectures, which were established in 1926, are sponsored by the Mu Chapter of Phi Lambda Upsilon, chemical honorary, and the College of Science.

The first three talks, to be offered May 1, 2, and 3 at 8 p.m., are titled "SV-40 Virus: Its Structure and Life Style," "The Physical, Genetic and Functional Organization of SV-40's Chromosome (I)," and "The Physical, Genetic and Functional Organization of SV-40's Chromosome (II)." The fourth talk, scheduled for May 4 at 3 p.m., is titled "Synthesis of Novel Viral Chromosomes." All of the talks will take place in Room 105 Forum Bldg, except the second, which will be held in Room 119 Osmond Lab.

Dr. Berg is Willson Professor of Biochemistry and former chairman of the Department of Biochemistry at Stanford University School of Medicine. His current research focuses on the mechanism of gene expression in higher organisms. In addition, he and his colleagues have been active in research which has made possible the recent advances in gene manipulations and in the attempts to consider the potential biohazards such experiments present.

Dr. Berg, a member of the National Academy of Sciences, was named a Distinguished Alumnus by Penn State in 1974 and that year also offered the Paul Althouse Memorial Lecture at Hershey. In 1976 he served as an Alumni Fellow at the University. He is a 1948 graduate of Penn State.

Senate

(Continued from page 1)

Topics under consideration at the May 2 meeting will include a proposed revision of academic drop rules. The change would permit a nondegree student to enroll for a maximum of six credits per term and also provides that a degree or provisional student dropped from this or any other university for poor scholarship may take courses as a nondegree student to improve his or her grade point average to apply for reinstatement to the University. However, the student who has been dropped must sit out one term, other than summer term, following the drop action.

The final report on Baccalaureate Degree Requirements will be presented for legislative action. The full report was published in the April 20 issue of INTERCOM.

May 3 as a day to educate Americans about the benefits of solar power. Earlier this month, State College Mayor Arnold Addison proclaimed that the Borough would observe the holiday.

Sunrise services will be held on a field near Beaver Stadium at 6 a.m. on the morning of May 3. Most of the rest of the day's action will center around a fair on the Hetzel Union Bldg. lawn from 11 a.m. to 4 p.m. Representatives from solar energy companies will be on hand to demonstrate a variety of equipment ranging from hot water heaters to sun-powered radios.

Several Penn State student organizations will be active in Sun Day celebrations. The Astronomy Club will open its observatory in Davey Laboratory from 11 a.m. to 4 p.m. so the public can view sun spots and sun flares. The Photography Club will have a display of sun photos in the HUB.

Tax-deferred annuity plans still available

The Employee Benefits Division wishes to remind all regular, full-time faculty and staff members that they may want to consider participating in one of the three tax-deferred annuity plans made available through the University. The three companies that offer the plans to University employees are The Equitable Life Assurance Society of the United States, Teachers Insurance and Annuity Association (TIAA), and The Variable Annuity Life Insurance Company (VALIC).

Within the past year, both the Equitable and VALIC have made improvements in their programs which have resulted in the insurance companies charging a lower administrative fee.

Basically, a tax-deferred annuity accomplishes two things. It affords an individual an opportunity to defer federal income taxes on current salary and at the same time set aside additional monies for future use, such as retirement.

Employees who feel they may be interested in this program should contact the Employee Benefits Division, Room 103 Willard Bldg. (865-1473).

Future social statistics to be discussed

Philip M. Hauser, Lucy Flower professor emeritus of urban sociology and director emeritus of the Population Research Center at the University of Chicago, will speak on "Social Statistics in the Year 2000" at 2:30 p.m. on Wednesday, May 3 in Room 112 Kern Bldg.

Dr. Hauser is a past president of the National Conference on Social Welfare, American Sociological Association, American Statistical Association, and Population Association of America. He is a member of the National Academy of Sciences and the American Academy of Arts and Sciences.

Arts Roundup

Penn State Singers to perform two oratorios

The Penn State Singers will present two 17th century oratorios at 8:30 p.m. on Saturday, April 29 in the Music Bldg. recital hall.

The 28-vocal group under the direction of Raymond Brown will sing Carissimi's *Jephthah* and Purcell's *Dido and Aeneas*. *Jephthah*, which will be accompanied by organ, is an oratorio based on the story of Jephthah leading the children of Israel into battle against the children of Ammon, and the fate of Jephthah's only daughter whom he offers up as a burnt sacrifice to the Lord.

Dido and Aeneas, which will be accompanied by harpsichord and strings, is based on the Greek tragedy of the warrior Aeneas and Dido, the Queen of Carthage. On his return from the Trojan War, Aeneas sails into Dido's harbor at Carthage. As their new love grows, the spirit Mercury sends word that Aeneas must sail. Dido, resigned to her fate, takes her own life.

Prof. Brown founded the Penn State Singers in 1957 to perform works which lend themselves to a small choral group.

Brass Chorale's spring concert is Friday

The Penn State Brass Chorale will present its spring concert at 8:30 p.m. Friday, April 28 in the Music Bldg. recital hall. The American premiere of two works, *Memorial 1794* by Jacques Guyonnet and *Fanfare by Brass* by conductor James Beneshoff, will be a highlight of the program, which will also include trumpet solos by seniors Vanessa Parker and Jeff Baker, in "Trumpet Voluntary" by Jeremiah Clarke.

Other works on the program include "Greetings to a City" by Arthur Bliss, *Concerto Antiphonal* (1972) by James Waters, "Shivaree" by Leonard Bernstein, "Cerebral and Flouish" by Richard Arnell, "Suite for Brass" by Leonard Lebow, and "Hogarth's Hoe down" by W. Hogarth Lear.

Alard to conclude season

The Alard String Quartet will present two Beethoven quartets at its last concert of the 1977-78 season at 8:30 p.m. Wednesday, May 3 in the Music Bldg. recital hall.

During this academic year, the Alard and the visiting Art Series' quartets, the Cleveland, the Vermeer and the Tokyo, have each included different string pieces by Beethoven in their programs. Those who attended all of these quartet concerts will have heard all of Beethoven's string quartet works after the Alard presents its two selections, Quartet in B flat, Op. 18, No. 6 and Quartet in B flat, Op. 130, "Finale." The latter work is the last piece Beethoven wrote. It was composed on his deathbed.

The Quartet will also play Stravinsky's *Concertino*, one of the two pieces that composer wrote for string quartets, and Mozart's Quartet in D major, K. 155, which the composer wrote at the age of 16.

Also on the program is Milos Rózsa's Oscar winning String Quartet (1950), which was dedicated to actor Peter Ustinov. Rózsa composed numerous film scores, including those for *Last Weekend*, *Quo Vadis*, and *A Double Life*.

Members of the Quartet are violinists Joanne Zagst and Donald Hopkins, violist Raymond Page and cellist Leonard Feldman. All are associate professors of music at the University.

'Electra' opens at Playhouse

The classic Greek tragedy, *Electra*, written by Euripides and translated by John Chioles, opens at the Playhouse Theatre Thursday, May 4 and will continue there through Saturday, May 6 and from May 9-13.

Electra, was written about 400 B.C. and

is thought to be one of Euripides' last works.

Archie Smith directs the current production. Scenic design is by Anne A. Gibson. Robert L. Batchelor has designed the costumes; Charles H. Firmin, the lighting. Vocal direction is by David A. Stern; choreography, by Jean Sabatine. All except Mr. Batchelor, who is a graduate student in theatre, are members of the theatre department faculty. Bert Fenner, associate professor of music, has composed original music for the production.

Tickets are on sale at the Playhouse box office. Hours are 1-6 p.m. daily on nonperformance days and 1-9 p.m. on days of performance. Phone reservations are accepted at 865-1884.

Theatians doing "A Funny Thing Happened"

The Penn State Theatians are presenting *A Funny Thing Happened on the Way to the Forum* April 27, 28 and 29 in the Pavilion Theatre.

Richard Cole, a graduate student in theatre arts, is directing the musical, which was written by Burth Shevelove and Larry Gelbart, based on the comedies of Plautus. The music and lyrics are by Stephen Sondheim.

Certain time is 8 p.m. each night, and there will be a matinee at 2 p.m. on Saturday, April 29. Tickets are on sale from 9 a.m. to 4 p.m. on the first floor of the HUB, across from the main desk. The phone number is 865-9461.

Photography talks arranged

Four speakers will take part in a History of Photography Lecture Series during the first two weeks of May.

Gail Buckland, former archivist of the Royal Photographic Society of Great Britain and the author of several books, will open the series on Tuesday, May 2 with a talk on "William Henry Fox Talbot, Inventor of Photography." Her lecture — and all subsequent ones — will be at 8 p.m. in Room 101 Kern Graduate Bldg.

Nachum T. Gidal, a pioneer photojournalist, will speak on "My Life in Photojournalism" on Wednesday, May 3. Now a resident of Jerusalem, Mr. Gidal was active in Germany during the pre-Hitler period.

"The Truthful Lens" will be the topic of Lucien Goldschmidt on Wednesday, May 10. A well known antiquarian bookdealer, Mr. Goldschmidt is the co-author of *The Unpublished Correspondence of Toulouse Lautrec* and author of the forthcoming book, *The Truthful Lens*.

Dr. I. F. Henisch, professor of the history of photography and professor of physics at Penn State, will conclude the series on Thursday, May 11, talking on "Photography and its History." Founder and editor of the journal, *History of Photography*, Dr. Henisch is a Fellow of the Royal Photographic Society of Great Britain and a Corresponding Member of the Deutsche Gesellschaft für Photographie.

Holograms demonstration to be given May 2

Harriet Casdin-Silver will speak and give a demonstration on holograms at 11:10 a.m. Tuesday, May 2 in the HUB ballroom.

Prof. Casdin-Silver, who teaches physics at Brown University, creates holograms, suspended images that appear to be three-dimensional, by using laser light. The laser light passes through a holographic plate and projects the realistic image. The deep red vision hangs 34 inches in front of the plate.

Prof. Casdin-Silver teaches holography as an art medium and presented the first exhibition at the New York Museum of Holography. She is a fellow at the MIT Center for Advanced Visual Arts.

The presentation is part of a series of lectures and demonstrations in STS 498, Art/Science Interface.

Search committee

(Continued from page 1)

are headed by Leonard Brush and James R. Dungan, respectively.

The search committee co-chairmen also will conduct an administrative program review of the operations of the Office of Budget and Planning while the search for a director is being held. Members of the program review team will be composed of individuals having responsibility for planning and budgeting in comparable universities.

Funding Sources

For further information, call 865-1372

(110-3) The National Institute of Education has issued a booklet "Great Competitions & RFPs FY 1978" describing funding opportunities in educational equity, finance and productivity, education and work, basic skills, school capacity for problem solving, and dissemination and resources. (Ref. IBM)

(111-1) The National Science Foundation has formalized its announcement of Industry/University Cooperative Research Activity (Intercom 302-2, March 16, 1978) through NSF Important Notice No. 72, sent to industrial firms and colleges and universities. Funding will be provided "for the encouragement of cooperative research between industry and universities and colleges." Proposed research is expected to make a long-term contribution toward product and/or process innovation. Some cost sharing is desirable and may involve funds, laboratory space, and/or personnel services. (Ref. NSF Important Notice No. 72)

(111-2) The DOL Occupational Safety and Health Administration (OSHA) has issued a notice of grants available for Training, Education and Related Assistance to promote organizational and operational changes necessary to improve safety and health conditions in the workplace. The deadline is May 31. (Ref. 43 FR 16339-42, 41478)

Staff Vacancies

In accordance with the University's guidelines on employment under the current hiring restrictions, the following position vacancies have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for position vacancies in which no State funds are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been excepted from the current hiring curtailment. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 425-1387). Applications for the staff vacancies will be received until 5 p.m., May 4. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap, as provided by law, sex, or status as a disabled or Vietnam era veteran.

STAFF ASSOCIATE AND WRITER — CONTINUING EDUCATION, University Park. Responsible to the Head, Planning Studies for establishing and maintaining standards of style and format to be followed by Planning Studies personnel in the preparation of reports, papers and articles for publication and dissemination. Responsible for assisting in the development, including contacts with external agencies, and conduct of various studies, surveys, and applied research projects. Responsible for overseeing the maintenance and the updating of the central file on licensing and releasing in the preparation of studies; reviews, annotate and summarize pertinent information on funding opportunities, CE trends, new CE programs, etc., for government, research, professional and other publications. Master's degree (or equivalent experience) in social science, with emphasis in English and/or technical writing, plus familiarity with measurement and evaluation techniques. Three to four years' directly related experience in an applied research environment (academic or scientific) with established publication record. An ability to establish and maintain effective working relationships with faculty, research personnel and members of cooperating organizations is highly desirable.

SENIOR ACCOUNTANT, COST AND REIMBURSEMENT — COLLEGE OF MEDICINE, Hershey. Responsible to the Assistant Director of Financial Services for the management of all cost accounting and third party reimbursement functions, monitoring and interpretation of all pertinent regulations and legislation and maintenance of controls on third party accounts receivables. A bachelor of science degree in accounting or business administration or equivalent, plus a minimum of three to four years of hospital accounting experience with emphasis on cost and budgetary reports and control.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed, although names will be withheld on request.

Editor's note: The officers of the University Faculty Senate recently put together a list of questions dealing with non-academic policies and procedures. Since a number of these questions are of general interest to the University community, we are running them and the answers in INTERCOM.

Question:

Why are modern methods not used to produce the catalog and have a document only three rather than nine months out of date at the time of distribution?

Answer:

Printing Services recently purchased a sophisticated photocomposing system. Procedures now being developed will make it possible to maintain catalog text material in Management Services' IBM 370 and to transfer that material directly to the photocomposing system. It is anticipated that the lead time for the 1980-81 catalog (that is, the interval between the closing of the manuscript and delivery of the catalog) will be eight to ten weeks.

Joan W. McManis

Director, Office of Publications and University Editor

WPSX Highlights

The inner workings of the Ford Motor dynasty and Henry Ford II's corporate empire are revealed in *Henry Ford's America*, Friday, April 28 at 9 p.m. A perspective on the achievements of Henry Ford himself will be featured Wednesday, May 3 at 8 p.m. on *Nova: Road to Happiness*.

The work of gifted tile-maker Geza Saint-Galy is studied Sunday, April 30 at 4:30 p.m. on a half-hour special called *The Saint-Galy Tiles*. Saint-Galy's work includes a three-year project depicting the early history of the state of Virginia. The tiles are located in colonial Williamsburg.

Jacques and Philippe Cousteau attempt to unravel the mystery of the legendary lost island of Atlantis in two special programs of *The Cousteau Odyssey* to be seen Monday, May 1 and Tuesday, May 2 at 8 p.m. They do the majority of their searching near the island of Crete in the Aegean Sea.

The daily activities of life on a Central Pennsylvania farm are recorded in "R.D. 1, Box 99," the final *Small Town, PA* documentary, airing Monday, May 1 at 9 p.m. The program introduces the family of Gerald and Shirley Brown of Gatesburg, Pa., and shows what life on their farm means to them. Tuesday, May 2 at 10 p.m., *Six American Families* visits a family farm in Iowa.

William Conrad narrates a one-hour special about the island of Alcatraz — a symbol of an antiquated penal system — Tuesday, May 2 at 9 p.m. Alcatraz uses newsreels and vintage film to study the history of the maximum security prison.

Members of the Milwaukee Repertory Theatre appear in *Trial of the Moke*, a tense portrayal of the systematic persecution of the first black cadet to graduate from West Point. The drama will be presented Wednesday, May 3 at 9 p.m. on *Great Performances*.

Two farmers, one in Georgia and one in Senegal, provide the basis for an analysis of two economic systems — America's government-supported free enterprise system and the state-controlled system of third world nations — Thursday, May 4 at 9 p.m. on *World*.

News in Brief

Hurwitz to visit as Alumni Fellow

Dr. Albert Hurwitz, president of the International Society for Education Through Art (ISEA), will visit the University Park Campus from Wednesday, May 10 through Friday, May 12 as an Alumni Fellow.

Having traveled widely as president of the international society, he will also present a public lecture and slide show on children's art from around the world. The lecture is scheduled for 7:30 p.m. on Thursday, May 11 in Kern auditorium.

Since 1966, Dr. Hurwitz has been the coordinator of visual and related arts for the public schools in Newton, Mass.

ISEA, which includes members from almost every country in the world, is a professional organization for art educators and others with an interest in the various forms of education through the arts. Dr. Hurwitz was formerly vice president of the National Art Education Association.

He is a 1978 recipient of the Distinguished Alumnus Award from Penn State and a 1977 recipient of the same award from Peabody College in Nashville, Tenn., where he earned a B.S. and an M.A. in art education. His M.F.A., in drama, was conferred by Yale University, and his Ed.D., in art education, by Penn State.

A regular contributor to professional journals in his field, Dr. Hurwitz is the author of two books, *Programs of Promise* and *The Joyous Vision*. He is the co-author, with Charles Gaiskell, of *Children and Their Art*. He has been affiliated as an actor and director with the Institute of Contemporary Art in Washington, D.C., and has produced 16 Off-Broadway plays in New York City.

The Alumni Fellows Program is sponsored by the Office of the President, Penn State Alumni Association, and Colleges of the University. Dr. Hurwitz is a guest of the College of Education.

Policy described for military leaves

At this time of year, as military reservists and National Guard members make requests for leaves of absence for annual military training duty, the University, in accordance with the law, will grant such leaves without salary, regardless of an individual's length of regular University service.

University policy also provides that if a regular faculty or staff member has six months of regular University service prior to the date of the requested leave, the leave is granted according to the provisions of PS-20 (Leave of Absence for Annual Military Training Duty).

PS-20 provides that a regular faculty or staff member employed on a 12-month basis, whose military base pay is less than his or her University salary would be for the same calendar period covering the leave of absence, will be paid the difference by the University for a period of active duty of at least seven calendar days up to a maximum of 15 calendar days, upon request by the faculty or staff member.

A staff member may elect to use accumulated vacation during the leave. In such instances, the individual continues to receive full salary from the University for the amount of time charged to accumulated vacation.

Art historian will speak on May 12

Dr. Samuel Y. Edgerton, professor of art history at Boston University, will present a talk on "The *pittura infamante* in Medieval and Renaissance Italy" at 4 p.m. Friday, May 12 in the HUB assembly room.

Dr. Edgerton received his Ph.D. at the University of Pennsylvania and is a specialist in the history of late medieval and Renaissance art. He has held a National Endowment for the Arts and Humanities fellowship and was also a fellow of the Institute for Advanced Study at Princeton University.

Dr. Edgerton is visiting University Park as a guest lecturer in the course, "Crime, Courts and Society in the Middle Ages,"

(Continued on page 4)

Council formed to coordinate concerns of the handicapped

The formation of the Presidents' University Coordinating Council for Concerns of the Handicapped was announced recently by President John W. Oswald.

The council, according to Dr. Oswald, is one of the University's responses both to the 1975 report from the University President's Commission on the Physically Handicapped Student and to Sections 503 and 504 of the U.S. Rehabilitation Act of 1973.

President Oswald's commission reported 27 specific recommendations on ways to aid handicapped students and employees at the University. Sections 503 and 504 require that all federally funded institutions make programs and services accessible to their handicapped employees and students and not discriminate against them in hiring or admissions.

Dr. Raymond O. Murphy, vice-president for Student Affairs, is chairman of the council. Other members include Ralph Zilly, vice-president for business; Dr. Robert Quinn, dean of academic instruction for Commonwealth Campuses; Dr. Robert Dunham, vice-president for Undergraduate Studies; Floyd Fischer, vice-president for Continuing Education; Dr. James Bartoo, dean of the Graduate School; William Asbury, affirmative action officer of the University; Phillip A. Grosnick, interim coordinator of services for the physically handicapped; Benjamin Lane, dean of Student Affairs; Behrend College; Dr. Jerry South, dean of Student Affairs, Capitol Campus; and Gaye Sheffler, director of Student Affairs, Hershey

Medical Center.

President Oswald has charged the council to act as a coordinating point for individual members in their respective responsibilities regarding the handicapped. The council will serve as a clearinghouse and information source for members and will make recommendations to President Oswald. It will suggest priorities for the improvement of access to the handicapped and will oversee the University's compliance with federal guidelines. Other duties include keeping alert to the possibility of federal funding and receiving reports from the Handicapped Students Association and from any other interested or concerned agency or party.

The charge also states that the council shall establish and review University-wide policies and procedures relating to the general welfare of handicapped persons at the University.

The University is dealing with the problems of all the disabled persons it enrolls or employs at each of the Campuses under a two-phased transition plan designed to make all programs accessible to the handicapped by June 1980. The transition plan was drawn up by Dr. Murphy, Dr. Dunham, Mr. Zilly, Dr. John Leathers, administrative director for Commonwealth Campuses, and Ray T. Fortunato, assistant vice-president for personnel administration. It was submitted to Provost Edward D. Eddy last December.

There are several aspects to the University's plan including a self-evaluation of all educational policies, programs and procedures affecting the handicapped.

The plan also directs that each academic unit, through scheduling changes or other accommodations, ensure that course work is accessible.

The Office of Physical Plant is directed to complete its on-going survey of buildings, athletic facilities, walkways and roadways around the University. Physical Plant is also to continue "chipping away" at already diagnosed physical barriers.

Each academic and administrative unit is to conduct a self-evaluation to identify barriers and recommend ways to ensure access to programs and services. Needs for any auxiliary learning aids for handicapped students must also be identified.

The plan provides that research be done concerning the handicapped elementary and secondary students in private and public schools in Pennsylvania to find out how many are potential University students. The research should arrive at an estimate of how many disabled students the University can expect to serve in the future.

In 1980, a special Ad Hoc Committee on the Handicapped is to be formed to report to President Oswald on what has been accomplished and what goals remain to be met. That's the second phase of the plan.

In July of 1976, the University filed its assurance of compliance with the Department of Health, Education and Welfare, at that time assigning responsibility for making programs

(Continued on page 4)

Senate at Monday night session limits use of the course drop

The University Faculty Senate approved an amendment revising the policy regarding the eight-week course drop at a session held Monday evening in the Keller Bldg. auditorium.

The legislation, put forth by the Ad Hoc Committee of Engineering Senators, limits the use of course drops from the fourth through the eighth week of classes to a maximum of 12 credits for baccalaureate degree candidates and six credits for associate degree candidates. The regulation also applies to provisional students who intend to become degree candidates.

The Senate also voted to delete a section of Senate Policy that had indicated that students with physical handicaps could be prevented access to scheduled courses at the University in certain cases. The deletion was made because Sections 503 and 504 of the U.S. Rehabilitation Act of 1973 prohibit discrimination against handicapped individuals and also direct that all University programs be made accessible to the handicapped.

A rule change affecting extended degree students was also passed. The new rule says that students do not have to apply for

readmission if they interrupt credit work for at least one term if they were on leave of absence, if they were not enrolled during summer term, or if they are extended degree candidates.

Senators heard informational reports on student evaluation of instruction and the activities of the Academic and Athletic Standards Committee.

The Senate Committee on Admissions, Records and Scheduling reported on the first results of a regular reporting system for monitoring University admissions policies and procedures. The Snyder Amendment, requiring annual reports to the Pennsylvania Legislature about faculty activities, was also discussed.

The Senate was to meet again Tuesday afternoon at Kern Bldg. to discuss a proposed change in promotion and tenure procedures as well as a proposed revision of academic drop rules.

The final report on Baccalaureate Degree Requirements was also to be presented for action.

The Nominating Committee for 1978-79 Senate officers was to present nominations and accept nominations from the floor.

Penn Staters

Dr. John E. Searles, professor of education, has been awarded a Fulbright-Hays grant to use during the coming academic year. He will conduct research on the use of instructional design models at the Studies and Planning Center of the Ministry of Education in Lisbon, Portugal.

Dr. J. L. Duda, professor of chemical engineering, recently presented seminars to the department of polymer science at the University of Massachusetts in Amherst and the department of chemical engineering at the Polytechnic Institute of New York in Brooklyn. His topic was "Molecular Diffusion in Polymer Solutions."

Dr. Sam Y. Zamrik, professor of engineering mechanics, was named a member of the United States national delegation to the Advisory Group for Aerospace Research and Development of NATO. The delegation held technical meetings April 10-14 in Aalborg, Denmark, where specialists from U.S. and Europe met to discuss failure analysis of structural components that are of interest to NATO nations. At the meeting, Dr. Zamrik presented a talk on "The Effect of Elevated Temperature on the Life of Structural Components under a Complex Loading System."

Charles D. Ameringer, professor of Latin American history, took part in an April 4 seminar to examine Brazilian and Venezuelan perspectives in the development of the Amazon Basin on April 4 at the Johns Hopkins University. Dr. Ameringer, who has written a book chapter about Venezuelan foreign policy, was one of 20 scholars invited to participate.

Roger M. Herman, professor of physics, presented seminars at three universities recently on "Nonlinear Optics in Kerr Liquids." Dr. Herman spoke at Georgia Tech, Kent State, and Memorial University, St. John's, Newfoundland.

Dr. Jerold E. Elliott, associate professor of recreation and parks, has received the highest award granted by the Association of Interpretive Naturalists. At the association's recent national conference in Tucson, he was presented the Fellow Award for "achievement of excellence in the field of interpretation of the natural environment." Dr. Elliott serves on the National Board of AIN as chairman of professional certification and training, and is a member of the editorial board of the *Journal of Interpretation*.

Provost **Edward D. Eddy** delivered the Honors Convocation address at the University of New Hampshire on April 30. From 1949 to 1960, Dr. Eddy served the University of New Hampshire successively as assistant to the President, acting president, and vice president and provost.

Dr. Ronald Keiper, associate professor of biology at the Mont Alto Campus, delivered two lectures April 20 and 21 at Cornell University's Veterinary College. His talks were drawn from his research experiences with the feral ponies at Assateague Island and dealt with his observations of pony behavior.

Bookshelf

The Curse is not another in the recent rash of scary books about demonic possession or the supernatural, although it does discuss taboos, rituals, myths and symbolism.

Dr. Emily Toth, assistant professor of

English, is co-author of this cultural history of menstruation. Documenting the overall influence of the menstrual cycle on woman, man and society, *The Curse* was described by the *New York Times* as "hard-headed, richly documented..."

An analysis of the treatment of menstruation in anthropology, literature, history, advertising and even jokes is developed by the authors.

Finding that attitudes toward menstruation are rarely positive and seldom discussed in any culture, the authors report that the very word taboo may originate in the Polynesian word for menstruation: "tupua."

The book was published by the New American Library.

The Macmillan Publishing Co., Inc., has recently published the third edition of *Practical Public Speaking* by **Dr. Eugene E. White**, professor of speech communication and acting head of the Department of Speech Communication. Earlier editions of the book received more than 20 reprints and were adopted by more than 200 colleges and universities. Dr. White is the author of seven other books in the field of rhetoric.

Obituary

Henry Menusian Jr., who retired in 1968 as professor emeritus of entomology extension after 25 years with Penn State, died April 8. He was 76. Born in France, Dr. Menusian earned a doctorate from Cornell University. During his years at Penn State, he pioneered in introducing chemical insect control measures to Commonwealth farmers.

G11-1) The Department of Energy (DOE) is proposing to establish an Appropriate Technology Small Grants Program. Project awards would be limited to \$10,000 for concept development, and \$50,000 each for development and for demonstration projects. (Ref. 43FR185-90, 4/17/78)

G12-1) The Social Security Administration has grant money available for Income Maintenance Research and Demonstration Grants. Priority areas include: fraud control demonstration, electronic fund transfer, automation, aid to families with dependent children management, and welfare analysis. Unsolicited proposals are also accepted. Deadline: June 30. (Ref. 43FR17661-62, 4/17/78) (CFDA 13.766)

G12-2) The National Science Foundation has several programs with July deadlines — July 1, U.S.-Israel Binational Science Program; Office of Oceanographic Facilities and Support; Earth Science Research; U.S. Australia Cooperative Science Program (seminar and workshops); July 3, Division of Earth Sciences (unsolicited research); July 7, Division of Environmental Biology (unsolicited research); and July 31, Division of Behavioral and Neural Sciences (unsolicited research); Division of Materials Research (unsolicited research).

Faculty Club President Marjorie East watches R. Dorn Hetzel, instructor in theatre arts, try out his grandfather's desk. The desk and an office table belonging to Penn State President Ralph Dorn Hetzel (1926-47) are on loan to the Club, along with several side chairs dating from the administration of President George Atherton (1882-1906), from the Penn State Room.

From the Press

The Rhumb Line of Symbolism, by Laurent LeSage. 267 pages. \$12.75

The author holds that the self-styled Symbolist poets represent only an articulate phase of a steady course in French poetry from the Romantic period to the present. Twenty French poets from Sainte-Beuve to Valéry are explored. The aim of the book is to reconcile the broad and narrow views of Symbolism. Its method is to give the ideas and experiences of the poets representative of the movement, together with a selection from their writings.

This is the eleventh book authored by Dr. LeSage, professor emeritus of Romance languages at the University. Among his works are *The French New Criticism*, *The French New Novel*, and *Joan Girardoux: His Life and Works*. He has been a frequent contributor to the *New York Times Book Review* and for 20 years was the regular reviewer of French books for the *Saturday Review of Literature*.

Philadelphia and the China Trade, 1682-1846, by Jonathan Goldstein. 121 pages. \$9.50.

This book examines the close ties Philadelphia merchants had with their Chinese counterparts almost a century before the American Revolution. The author points out that in its heyday, Philadelphia controlled approximately one-third of the United States' trade with China. He also explores the attitude of Philadelphia merchants toward the Chinese merchants and their government.

Dr. Goldstein teaches Chinese history at Villanova University.

A Theology of Encounter: The Ontological Ground for a New Christianity, by Charles B. Ketcham. 170 pages. \$12.50.

Taking a more radical position than most contemporary theologians, the author says that a Christian can affirm his belief without denying the beliefs of others by claiming Christian revelation is reasonable

and faithful to tradition, but not necessarily infallible or exclusively definitive.

To the Christian, in Dr. Ketcham's words: "It is in the life, death, and Resurrection of Christ that God presently reveals Himself; this is what is meant by the term *Christ-event*... The Church is therefore the community of those whose unity is in the Christ-event, those whose identity has been and is being influenced by their encounter with God in this event."

Dr. Ketcham is the author of *The Search for Meaningful Existence, Faith and Freedom*, and *Federico Fellini: The Search for a New Mythology*. He is the Bishop James M. Thoburn Professor of Religion at Allegheny College.

In a Defiant Stance: The Conditions of Law in Massachusetts Bay, the Irish Comparison, and the Coming of the American Revolution, by John Phillip Reid. 222 pages. \$14.50.

Dr. Reid, a professor of law at New York University, presents a case for the argument that law and the control of law have a more powerful effect on the course of history than is generally assumed. In particular, he compares the relative lack of violence in the American Revolution with Ireland's long and bloody struggle for independence.

Focusing on the most rebellious American colony, Massachusetts Bay, he points out that law was locally controlled and that imperial law was almost nonexistent as an influence on the daily lives of individuals. In Ireland, however, because of imperial control of legal machinery, nationalists were forced to resort to secret, underground violence.

Dr. Reid examines various Massachusetts Bay institutions — the governorship, council, grand jury, traverse jury, and magistrates — to show the consequences of Whig party control, in contrast to the situation in 18th-century Ireland.

The Case-or-Controversy Provision, by James E. Radcliffe. 285 pages. \$13.50.

Dr. Radcliffe traces the case-or-controversy limitation (Article III, Section 2) from its genesis in the U.S. Constitutional Convention through 188 years of application by the Supreme Court. The book makes a clear distinction between the integral components of the case-or-controversy provision and judicially created doctrines.

Dr. Radcliffe took his Ph.D. at Penn State and is professor of government at Shippensburg State College.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Shaver's Creek Nature Center, Evening Pond Walk, 7:30-9 p.m., Stone Valley.

Student Film Organization, *Silent Running*, 7, 9, 11 p.m., Room 102 Forum.

Interdisciplinary Baroque Colloquium, D. Douglas Miller, *Musica da Camera*, "An Evening of Baroque Music," 8 p.m., Gallery C, Museum of Art.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Gary Rusnak, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, May 6

53rd Penn State Dairy Exposition, 8 a.m.-5 p.m., University Dairy Barns.

Shaver's Creek Nature Center, Early Morning Sun Walk, 6:30-9 a.m., Wildflower Identification Workshop (by registration only - 865-1851), 9:30 a.m.-noon, Stone Valley.

Eco-Action Recycling, 10 a.m.-3 p.m., Parking Lot 83 and Boalsburg Fire Hall.

Sports: women's golf, Penn State Invitational; women's lacrosse, Central Penn Tournament; women's tennis, vs. Ohio State.

Princeton, Michigan, 10 a.m.; softball, vs. Ursinus (2), 1 p.m.; men's track, vs. Maryland, 4 p.m.; football, Blue-White game, 2 p.m., Hersheypark Stadium, Hershey.

france-cinema, Molinaro, *Male Hunt*, 7 and 9 p.m., Room 112 Kern.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Sunday, May 7

Sports: women's golf, Penn State Invitational; women's lacrosse, Central Penn Tournament; women's tennis, vs. Ohio State.

Princeton, Michigan, 10 a.m.

University Chapel service. Dr. Badr Ateya, mineral industries, 11 a.m., Eisenhower Chapel.

Shaver's Creek Nature Center, Young Wildlife in the Spring, 2-4 p.m., Stone Valley.

PSU Jazz Blue Band, "Big Band Music," 2 p.m., Music Bldg. recital hall.

Annual Academic Assembly program to present Evan Pugh Scholars Awards, President Sparks Awards and the President's Freshman Awards, 3:30 p.m., Eisenhower Auditorium.

PSU Wind Ensemble, "Pops Concert," 4 p.m., Arts Courtyard.

france-cinema, Molinaro, *Male Hunt*, 7 and 9 p.m., Room 112 Kern.

Monday, May 8

Cine-theque, Yates, *Bullitt* (1968), 7 and 9 p.m., HUB assembly hall.

Painter Herbert Katzman discusses his work, 8 p.m., Zoller Gallery.

Landscape Architecture Lecture, Kenneth Polakowski, University of Michigan, on "Land Planning in Australia - What's Up Down Under?" 7:30 p.m., Room 26 Mineral Sciences.

Claremont Woodwind Quintet, 8:30 p.m., Music Bldg. recital hall.

Tuesday, May 9

Last drop deadline.

Last date for prospective graduate students to submit completed application materials for admission to summer term.

Last date for graduate students to apply for permission to resume study in summer term.

Friends of the Museum of Art Gallery Talk.

Robert Kulicke, New York designer and craftsman, on "Jewelry," 10:30 a.m., Museum of Art.

Native American Symposium Series. Dr. William Demmert, director, Office of Indian Affairs, Washington, D.C., on "Organization and Administration of Indian Education Programs," 12:30 p.m., Room 112 Kern.

Comp. Lit. Luncheon, 12:15 p.m., talk 1 p.m., Faculty Club. Rodelle Weintraub, English, on "The Celibate Marriage: Charlotte Shaw in Shaw's Later Plays."

Sports: softball, vs. West Chester, 2 p.m.; men's tennis, vs. Edinboro, 2 p.m.; baseball, vs. Indiana (Pa.) (2), 1 p.m.

Raoul C. van Caenegem, University of Ghent, on "English Common Law, a Divergence from the European Pattern," 3 p.m., Rare Books Room, Pattee.

Spanish, Italian, Portuguese/IAHS Lecture.

Edmundo Bendezi, on "Martin Adan: Unknown Master of Spanish American Poetry," 4 p.m., Room 312 Keller.

Comp. Lit. Film Series, *Desica, Miracle in Milan*, 7 and 9 p.m., Room 112 Kern.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Wednesday, May 10

Raoul C. van Caenegem, University of Ghent, on "Gallert of Bruges and Flemish Law," 11:10 a.m., Room 111 Boucke.

Commonplace Theatre, *If*, 7:30 and 9:30 p.m., Room 112 Kern.

Comp. Lit. Film Series, *Resnais, Night and Fog*, French with English subtitles, 8 p.m., Room 151 Willard.

History of Photography Series Lecture. Lucien Goldschmidt, editor and bookseller, on "The Truthful Lens," 8 p.m., Room 101 Kern.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Composer's Concert, Faculty presentation of music students' compositions, 8:30 p.m., Music Bldg. recital hall.

Thursday, May 11

Sports: softball, vs. Clarion (2), 2 p.m.

History Colloquium, Raoul C. van Caenegem, University of Ghent, on "Some Urban Legislation of Philippe of Alsace, Count of Flanders," 2:30 p.m., Room 124 Sparks.

"End of Another Year" Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.

Alumni Fellow Albert Hurwitz on "Children's Art from Around the World," 7:30 p.m., Kern auditorium.

Central Pennsylvania Society of the Archaeological Institute of America/Dept. of Art History. Louis Dupree, anthropology, on "Recent Archaeological Discoveries in Afghanistan and China," 8 p.m., Room 258 Willard.

History of Photography Series Lecture. Heinz K. Henisch, physics and history of photography, on "Photography and Its History," 8 p.m., Room 101 Kern.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Friday, May 12

Sports: women's track, Lady Lion Invitational; men's tennis, vs. Bucknell, 2 p.m.

Samuel Y. Edgerton, professor of art history, Boston University, on "The Pittura Infante in Medieval and Renaissance Italy," 4 p.m., HUB assembly room. Public lecture sponsored by Art History Department and Medieval Studies.

"End of Another Year" Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.

Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Philosophy Dept. Dottore Lecture, Wilfrid Sellars, University of Pittsburgh, on "Categories and Conceptual Schemes in Philosophy," 8 p.m., Laurel Room, Nittany Lion Inn.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

David Hudson, tenor, accompanied by Thomas Ahrens, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, May 13

Last date for submitting petition to Records Office to graduate in absentia in May.

Sports: women's track, Lady Lion Invitational.

Shaver's Creek Nature Center, Nature Workshop for Freshchildren and Parents (by registration only - 865-1851), 9:30 a.m.-noon, Stone Valley.

Springtime varsity sports include baseball and golf. At top, Gary Durbin; below, pitcher Mike Guman.

france-cinema, *The Sex Shop*, 7 and 9 p.m., Room 112 Kern.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

University Choirs and PSU Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 14

University Chapel service. Special musical program directed by Raymond Brown, 11 a.m., Music Bldg. recital hall.

Shaver's Creek Nature Center, Spring Wildflower Walk, 2-4 p.m., Stone Valley.

Penn State Glee Club, 3 p.m., Eisenhower Auditorium.

Opening Reception, "End of Year Student Show," 3-5 p.m., Zoller Gallery.

france-cinema, *The Sex Shop*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, May 4

Acoustics/Central Pennsylvania Chapter of the Acoustical Society of America, Stefan Czarnecki, Purdue University, on "Shielding Effects of Barriers in Bounded Space," and "Acoustics in Poland," 1:30 p.m., Room 112 Wacker.

Biology/Audio Visual Services, Gotthard Wolf on "Scientific Film as a Research Tool in Cell Physiology," 5-7 p.m., Room 102 Chambers.

Computation Center, "Introduction to APL" (4 of 6), 7:30 p.m., Room 201 Bus. Adm.

Friday, May 5

Materials Science and Engineering, Kevin Teichman, UC-Berkeley, on "The Development of Novel Techniques for Lean Combustion," 1:30 p.m., Room 301 Sudick.

Physical Chemistry, Daniel Sudick on

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

"Luminescence of Lanthanide Ions as a Structural Probe," 4 p.m., Room 333 Whitmore.

Monday, May 8

Biochemistry and Biophysics, Edward Eddy, on "Conversations with Provost Eddy," 3:55 p.m., Room 101 Althouse.

Fuel Science, Thomas Ryan, mechanical engineering, on "Methodology for Determining Combustion Characteristics of I.C. Engine Fuels," 4 p.m., Room 301 Steidle.

Tuesday, May 9

Biochemistry and Biophysics, Priscilla Cooper, Stanford University, on "Excision Repair Pathways in E. coli," 11:10 a.m., Room 101 Althouse.

Food Science, E. Wongsitkarn, on "Degree of Gelatinization of Starch in Baked Products," 11:10 a.m., Room 201 Borland.

Analytical Chemistry, George Goodloe on "Mass Spectrometry and Ion-Molecule Reactions," 1 p.m., Room 339 Davis.

Solid Waste Management, Lowen Shearer, mechanical engineering, on "European Experiences with Energy Recovery Systems," 2:20 p.m., Room 128 Sackett.

Chemical Engineering, Leonard G. Austin, materials science, on "Simulation Models of Size Reductions," 3:45 p.m., Room 140 Fenske.

Genetics, Jenn Yue Yeh on "Starch Characterization of the Dull Maisse Endperm Mutant," 3:55 p.m., Room 52 Frear.

Plant Pathology, Roger Kaiser on "Plant Virology: Past Problems and Present Solutions," 3:55 p.m., Room 213 Buckhout.

Engineering Science and Mechanics, H. R. Hardy Jr. on "Stability Evaluation of Geologic Structures," 4 p.m., Room 113 Sackett.

Geosciences, Roy J. Greenfield, geophysics, on "Geophysical Methods for Locating Trapped Miners," 4 p.m., Room 22 Deike.

Computation Center, "Introduction to APL" (5 of 6), 7:30 p.m., Room 201 Bus. Adm.

Thursday, May 11

Chemistry, Stephen J. Lippard, Columbia University, on "Platinum Complexes: Probes of Polynuclear Structures and Anti-Tumor Drugs," 12:45 p.m., Room 333 Whitmore.

Physics/Astronomy, W. S. Benedict, University of Maryland, on "Spectroscopy of Planetary Atmospheres," 3:50 p.m., Room 117 Osmond.

Agronomy, Michael Hoover, on "The Use of the Elevated Sand Mound for On-site Surface Sewage Disposal in Pennsylvania," and Bruce Willman on "Chemical and Bacterial Renovation of Septic Tank Effluent in Sand Columns," 3:55 p.m., Room 111 Tyson.

Rail Transport, A. L. Sams, vice-president, DeLeuw & Cather Co., Washington, D.C., on "Northeast Corridor Improvement Project," 3:55 p.m., Room 62 Willard.

Computation Center, "Introduction to APL" (6 of 6), 7:30 p.m., Room 201 Bus. Adm.

Friday, May 12

Philosophy/Speech Communication/Liberal Arts/IAHS, Ernesto Garcia, director, Center for the Study of the Humanities and Philosophy, University of Munich, on "Languages as the Presupposition of Religion: A Problem of Rhetoric as Philosophy?" 10 a.m., Room 124 Sparks.

Chambers Gallery: Art Education undergraduate student exhibition, through May 19.

Kern Commons Gallery: Bob Botti, wall ceramics, through May 6. Susan Canning, Esther Del Rosso and Suzanne Glascock, prints and drawings; Mahin Chahar, ceramics, both through May 13.

Museum of Art: Goya prints and drawings, through May 28. Robert Kulicke, painter, draftsman, through June 25.

Zoller Gallery: Ann Bissell, Judith Franklin Jones, and Thomas Scullin, paintings, May 6-11; End of Year Student Show, opens May 14.

Hammond Gallery: Current Glassworks by Art Dept. students.

Wagner Bldg.: "The Special Collection of the U.S. Navy Combat Art of World War II," 8 a.m.-4 p.m., weekdays; noon-5 p.m., Sunday, through May 8.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed although names will be withheld on request.

QUESTION:

Four copies of a March 31 memo summarizing recent developments in Business Services were received at our Earth and Mineral Sciences Library — one to each of the staff. Why? We are asked to save energy; why not paper, envelopes, etc.? One copy would have been sufficient to each section, or perhaps, two, but not four.

Name withheld

ANSWER:

The memorandum of March 31 regarding Business Services was sent to members of the University faculty and staff to inform them of services available in this area. This method of mailing was actually an economy. It was designed so that recipients could pass along extra copies to clerical personnel. At the present time, there exists no distribution listing by office or section that would allow a mailing of the type you suggest to be made.

R.L. Crowley
Assistant Vice President for
Business Services

Editor's note: The officers of the University Faculty Senate recently put together a list of questions dealing with non-academic policies and procedures. Since a number of these questions are of general interest to the University community, we are running them and the answers in INTERCOM.

QUESTION:

Why with the energy crisis and pleas for reduced usage did many buildings continue to be overheated to the point of being uncomfortable, even though repeated requests were made by the occupants to reduce the heat?

ANSWER:

Such a general question can only receive a generalized answer, both as to buildings and time frame.

In a concerted effort to save electricity, we significantly reduced the operating time of ventilation systems. This, of course, allowed the accumulation of heat from lighting, human bodies, solar gain and system losses. To have prevented it would have increased the electrical consumption.

A second cause of overheating — and none of these is mutually exclusive — may simply have been the malfunction of a particular control system or component or the absence of a component. Our first indication of this type of problem usually is a call to the Physical Plant Service Desk by a building or departmental coordinator. Our response time on such calls has generally been excellent, especially during the recent electrical emergency.

A third cause of overheating, which applies only to those 30-odd buildings directly heated by steam, is due to the fact that older control systems are not capable of operating reliably at the reduced comfort levels. This, in turn, leads to the necessity of employing workmen to control these systems manually.

In respect to the phrase, "repeated requests," used in the question, we have found that generally such words result more from a sense of frustration rather than from a lack of response from a contact through the proper channels. If we receive more specific information, we can not only correct the overheating problem but also review our own procedures for preventing "repeated requests."

R.E. Zilly
Vice President for Business

Assistant/Associate Provost bids asked

Applications are now being accepted for the position of Assistant/Associate Provost of the University.

The Assistant/Associate Provost will be directly responsible to the University Provost for the coordination of relationships with various academic and administrative divisions of the University as assigned. The individual also will conduct studies, prepare proposals, coordinate procedures involved in program review, and represent the Provost in certain faculty and administrative committees.

Candidates should have earned the highest degree awarded in their discipline or professional field, have gained

significant administrative and teaching experience in at least two institutions of higher education, be experienced in the development and funding of innovative academic programs, be able to write clearly and imaginatively, and have the ability to work effectively with people individually and in groups.

Title is dependent on experience and qualifications.

Nominations and letters of application with resumes should be sent by May 15 to:

Search Committee
Office of the Provost
The Pennsylvania State University
205 Old Main
University Park, Pennsylvania 16802

UNICARE review urged

Faculty and staff members of the University should periodically review the deduction being taken for their group health insurance (UNICARE) to be certain that they are paying for the correct coverage.

The reason the review should be made is that changes in family status may affect your costs and your coverage. For example, when you get married, when you have a first child, or when your spouse stops working for the University, you run the risk of having inadequate dependent coverage unless you do something about it.

You should check your coverage if any of the following circumstances arise:

1. Your spouse or only dependent child begins working for the University as a regular employee.
2. Your spouse or only dependent child dies.
3. You are divorced.
4. Your only dependent child enters military service or reaches age 19 (or 23 in the case of a full-time student).
5. Your only dependent child gets married.

To determine whether or not you have the right coverage or are paying the right

amount, compare the amounts shown on your salary check stub with the amount you should be paying as shown in the following table:

Insured Persons	Monthly	Bi-weekly
Employee only	None	None
Employee, child, children	\$1.75	\$0.80
Employee, spouse	\$3.60	\$1.66
Employee, spouse, child or children	\$5.00	\$2.30

(These rates apply when all insured persons are under age 65. Persons over age 65 are insured in a different plan at no cost.)

If a change should be made, call, write, or visit the Employee Benefits Division, Room 133 Willard Bldg., 865-1473. Faculty and staff members at locations away from University Park may receive assistance by contacting their Personnel Officer or Business Manager.

The University has no way of knowing whether a change should be made, so it is the employee's responsibility to keep the records up-to-date and accurate. No refunds for overpayment will be made unless it is shown the University was in error.

News in brief

(Continued from page 1)

and his talk, which is open to the public, is being sponsored by the Department of Art History, Medieval Studies and the Institute for the Arts and Humanistic Studies.

Pops concert May 7

The annual spring pops concert of the Penn State Symphonic Wind Ensemble will be held at 4 p.m. Sunday, May 7 in the Arts Courtyard.

According to conductor Smith Toulson, associate professor of music, the program will be a varied one that should appeal to a wide variety of musical tastes and backgrounds, and parents are welcome to bring their children to this informal, outdoor event.

Industrial designer to speak May 9

William Katavolos, architect and industrial designer, will deliver a public lecture at 7:30 p.m. Tuesday, May 9 in Room 102 Forum Bldg. His talk, "Correlation: The Future of Architecture," is the last of the 1977-78 Spring Lecture Series sponsored by the Department of Architecture.

Katzman to talk about his paintings

New York artist Herbert H. Katzman will deliver an illustrated lecture on his work at 8 p.m. Monday, May 8 in Zoller Gallery. Mr. Katzman has had exhibits at the Museum of Modern Art, the Art Institute

of Chicago, and the Whitney and Hirshhorn museums, and his paintings are represented in their collections.

Claremont playing May 8

The Claremont Woodwind Quintet will present its final concert of the current season at 8:30 p.m. Monday, May 8 in the Music Bldg. recital hall.

Based on the theme, "The Romantic Woodwind Quintet," the group has chosen three works for its program. Le Tombeau de Couperin by Maurice Ravel was originally written for piano and then transcribed for orchestra by the composer and for woodwind quintet by Mason Jones, of the Philadelphia Orchestra. Quintet by Carl Nielsen is a contemporary piece that uses the English horn, as well as the traditional quintet instruments, and Partita by Irving Fine is another modern work that incorporates elements of baroque structure.

The Claremont Woodwind Quintet is made up of four Penn State music department faculty members — Smith Toulson, clarinet; Overda Page, flute; Monte Bedford, oboe; and Christopher Callahan, French horn; and William Dole, bassoon.

Medieval scholar visiting

Raoul C. van Caenegem professor of medieval history and the history of medieval law at the University of Ghent, will visit the University Park Campus next week in conjunction with Medieval Studies Week and the interdisciplinary course, "Crime, Courts, and Society in the Middle Ages."

Prof. van Caenegem is the author of numerous books and articles but is probably best known for his *Guide to the*

Sources of Medieval History, the standard guide in the field, and *The Birth of English Common Law*.

He will speak at 3 p.m. on Tuesday, May 9 in the Rare Books Room at Pattee Library on the topic, "English Common Law, a Divergence from the European Pattern," at 11:10 a.m. on Wednesday, May 10 in Room 111 Boucke Bldg., on "Galbert of Bruges and Flemish Law," and at 2:30 p.m. on Thursday, May 11 in Room 124 Sparks, on "The Urban Legislation of Philip of Alsace, Count of Flanders." All three lectures are open to the public.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed on the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387), by May 11. These suit-
VACANCIES will be accepted until 5 p.m., May 11. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS — STUDENT AFFAIRS, New Kensington Responsible to the Dean of Student Affairs for the administration and coordination of various functions within Student Affairs operations at the New Kensington Campus, primarily student activities and financial aid. Participates in the delivery of service and conducts aspects of other programs of Student Affairs, including secondary school relations, orientation and other general areas of Student Affairs. Master's degree in student personnel administration, counseling, or related field, plus up to one year directly related experience, or a bachelor's degree and equivalent job-related effective experience of more than two years.

SUPERVISOR, LIABILITIES SERVICES, OUTPATIENT LABORATORY AND STUDENT LABORATORIES — COLLEGE DE MEDICINE, Hershey Responsible to Manager, Clinical Laboratories for supervision and operation of Liaison Service, Outpatient Laboratory and Student Laboratories. Bachelor's degree in science or medical technology — MT (ASCP) — and/or equivalent, plus a minimum of three years' experience in clinical laboratories.

BUSINESS MANAGER — INTERCOLLEGE RESEARCH PROGRAMS, University Park Responsible to Director of the Computation Center for the general business affairs of the center. Administers Computation Center budget, initiates and monitors actions for purchasing, contracting for services, personnel actions, collecting revenue. Maintains and projects schedules of equipment installed at various sites. Analyzes expenses and revenue, prepares budget projections, determines actions to insure maximum cost effectiveness. Supervises print shop. B.S. degree in accounting or business administration, plus three years of directly related experience, including one year's experience with business procedures of The Pennsylvania State University.

EDITOR, PUBLICATIONS AND PUBLIC INFORMATION — INFORMATION SERVICES IN CONTINUING EDUCATION, University Park Responsible to the Head of Publications and Public Information for the development, editing, and production of Continuing Education promotion and public information literature. Principal duties and responsibilities include writing finished copy of brochures, pamphlets, etc. as required by Continuing Education staff, reviewing and editing draft copy for promotional and public information material; supervising the maintenance and utilization of Continuing Education-held mailing lists; representing the Head of Publications and Public Information and functioning as chief liaison personnel Continuing Education to the Office of the University Editor; determining general specifications of publications; and functioning as expediter of printing in order to guarantee adherence to specifications, especially delivery deadline. Bachelor's degree in journalism, English, related field or its equivalent, plus five to seven years of directly related experience in publications and public information.

APPLICATIONS PROGRAMMER/ANALYST — MANAGEMENT SERVICES, University Park Responsible for the analysis, design, and programming required in the development and modification of computer programs. Conduct interviews with system users, perform feasibility studies, and investigate alternative modes of data handling to support systems design recommendations for modification or development. Bachelor's degree or equivalent in built computer systems and one to two years of directly related experience in computer programming and analysis.

Handicapped

(Continued from page 1)

accessible to Dr. Murphy and Mr. Asbury. "This program has the potential for helping everyone," Mr. Asbury says. "Anyone of use could become handicapped in the future."

Penn State Intercom

Mr. Addison

Mr. Stormer

Dr. Matson

Addison, Matson, Stormer to receive University awards

Three members of the University's staff will be honored at an awards reception Sunday, May 14.

Arnold Addison, personnel director of the Applied Research Laboratory and professor of industrial relations, will receive the Barash Award for Human Service.

Dr. Margaret B. Matson, professor of sociology and social welfare, has been named the 1978 recipient of the McKay Donkin Award.

David E. Stormer, director of University Safety, will accept the John E. Wilkinson Award.

The Barash Award, a \$1,000 check, was created in 1975 by the family of the late Sy Barash, of State College, to recognize annually a full-time member of the faculty, staff, or student body at University Park "who has contributed most, apart from regular duties, to human causes, public service activities and organizations, or the welfare of fellow humans."

Mr. Barash, a Penn State graduate, was in business in State College from 1953 until his death in 1975 and over the years devoted a great amount of energy and leadership to human causes, both on and off the campus.

Prof. Addison, a member of the University faculty since 1948, was cited by the Award Committee for his work in local government. A member of the State College Borough Council for 18 years, he currently serves as State College Mayor.

Prior to his service on Borough Council, he was chairman of the State College Civil Service Commission.

Prof. Addison led the establishment of a new University Relations Committee under the new home rule charter for State College in 1976 and was elected its first chairman. He continues to serve on the committee, which is a major communications link between the University and the municipality.

He received the A.B. and M.A. degrees from West Virginia University and did additional graduate work in labor management at Penn State. In 1967 he was a Ford Foundation visiting professor of management in the Graduate School of Business, Monterrey Institute of Technology, Mexico.

The \$500 McKay Donkin Award is given annually to the faculty or staff member, including retired personnel, who has "contributed most to the economic, physical, mental or social welfare of the University faculty."

It was established with contributions made by the family and friends of the late

McKay Donkin, who, prior to his death in 1968, had served for more than ten years as vice president for finance and treasurer of the University.

Dr. Matson was cited by a nominating committee for her tireless participation in a number of University activities.

In particular, the committee said, Dr. Matson has been a longtime advocate of faculty participation in University governance and has worked hard and effectively to make shared responsibility a reality. She has served as vice-chairman of the University Faculty Senate, interim head of her department, a member of the Faculty Advisory Committee and the University's Five-Year Budget Planning Task Force and has been active on University Council.

Dr. Matson, who is retiring this year, received a bachelor's degree in sociology from the University of Missouri and a Ph.D. from Penn State, also in sociology.

While social welfare courses were taught at Penn State before Dr. Matson came to the University, she is credited with developing the social welfare major and with greatly expanding the course offerings. She is the author of a widely used monograph, *Field Experience in Undergraduate Programs in Social Welfare*.

In the recommendation for the \$500 John E. Wilkinson Award which recognizes outstanding achievement in the administrative field, Mr. Stormer was cited for his "imagination and aggressiveness in development of new management techniques," and for "skills in relating to students and organized student groups."

One of his major concerns, the recommendation notes, has been the appointment of better educated, better trained personnel in the Department of University Safety.

During the past three years, an average of more than 10,000 hours of supervised training has been conducted for department personnel. Of the current 54 regular personnel in the Department, two officers hold a master's degree, 18 hold a bachelor's degree, three hold an associate degree, and 10 officers are continuing their college education.

Under Mr. Stormer, the new position of Police Services Officer was created, and a system of neighborhood police teams has been installed to work closely with inhabitants of the various residence hall areas.

A native of northern Michigan, Mr. Stormer received a B.S. in police administration and M.S. in criminal justice, both from Michigan State.

News in Brief

Fact finding group exploring calendar questions

An informal fact-finding group is making an exploratory study of various aspects of the question of changing from a term to a semester system at the University.

The decision to make the study was brought about by the energy crisis of last winter, according to Provost Edward D. Eddy.

When the term break was extended an additional week last January, it provided Penn State with hard data on cost savings for the first time, Dr. Eddy explained.

The Provost emphasized that the group is only gathering facts and is not concerned with making a final decision on the change. Principally, it will consider three questions:

— Would a change to the semester system result in significant savings in energy?

— Would it result in significant cost savings?

— Would it significantly improve the quality of teaching?

In describing the fact finding process to the University Faculty Senate at its April 30 meeting, Dr. Eddy announced that he would particularly appreciate receiving any comments which individual faculty members would care to make in regard to the third question, which is the most difficult to measure.

"I have been told that many faculty members prefer the 50-minute period to the 75-minute period," Dr. Eddy said, "and I have also been told that many

faculty members feel that students need more time to prepare good term papers than is available under the term period. Beyond these factors, in terms of the quality of the educational process, we have no hard data or solid body of opinion.

"Apparently," Dr. Eddy continued, "those who have taught under both systems prefer the longer semester."

Although the entire University would not be closed down in January, substantial savings in the coldest part of the year might be realized by the mothballing of the student residence halls and dining halls, as well as of other large student facilities.

"I want to stress, however," Dr. Eddy added, "that we have no preconceived ideas about the advantages of either system. Penn State is such a gigantic enterprise that we would have to consider very carefully the initial costs of making calendar changes."

"It's a little like moving from a big house to a smaller one. Any savings on the mortgage payments might be wiped out by the moving costs."

University to plan Faculty Club operation

In anticipation of a formal request by officers of the Faculty Club for the University to accept responsibility for operation of its facility, President John W. Oswald said this week that the University will plan, in all likelihood, to operate the facility in conjunction with the Nittany Lion Inn.

(Continued on page 4)

Senate approves revisions of BDR

The University Faculty Senate voted last Tuesday to approve a revision in Baccalaureate Degree Requirements (BDR) for each College in the University.

The new BDR sets at 46 the number of credits needed by degree candidates to satisfy general education requirements. Baccalaureate degree programs are divided into general education requirements, courses in the student's major field and electives.

The vote followed extensive debate, which often centered on the minimum credit distribution for each College to satisfy the requirement that students take a certain number of courses in art, humanities, social and behavioral sciences, and natural sciences.

The Senate Ad Hoc Review Committee on Baccalaureate Degree Requirements had set the general education requirement at 43 credits. The committee's plan called for nine credits in communications (certain English and speech courses), six credits in quantification (including specified mathematics, applied mathematics, computer science, statistics and philosophy courses), four credits in health sciences and physical education (designated physical education, health sciences, food science, nutrition and health education courses), and 24 credits in the areas of arts, humanities, social and behavioral sciences and natural sciences.

However, an amendment offered by Dr. E. Willard Miller, associate dean for resident instruction in the College of Earth and Mineral Sciences, stipulated 27 credits

for the "distribution or breadth requirement" encompassing arts, humanities, social and behavioral sciences and natural sciences. Under the amendment, which was approved by the Senate, three credits were added in the field of natural sciences.

The approved distribution chart for each College calls for nine credits in natural sciences and six credits each in the arts, humanities and social and behavioral sciences—a total of 27 credits for "distribution or breadth."

Dr. Nunzio J. Palladino, dean of the College of Engineering, offered an amendment to allow a student, with the consent of his or her advisor, to use three credits from the course headings under arts, humanities and social and behavioral sciences to pursue a program in depth of nine credits in a sequence of courses in one of those areas provided it is not in the student's major field. The Senate approved the amendment.

Dr. Thomas D. Larson, professor of civil engineering and director of the Pennsylvania Transportation Institute, presented the BDR committee's report. He told the senators, "The curriculum may be the most important thing a University says about itself."

He also likened the difficulties in reaching a workable compromise on baccalaureate degree requirements to the nation's problems in coming up with a national energy policy.

During the lengthy debate, Provost (Continued on page 4)

Penn Staters

Dr. Gladys I. Ritchie has been named associate dean of academic instruction for Commonwealth Campuses, effective May 1. Dr. Ritchie has served in the position on an interim basis since Aug. 15, 1978.

Prior to the interim appointment, Dr. Ritchie had been working in the Office of the Dean of Academic Instruction for Commonwealth Campuses as an administrative intern.

Dr. Ritchie holds an M.A. in English from the University of Colorado and a Ph.D. in speech communication from Temple University. She has participated in post doctoral studies in film history and criticism at Temple University.

Dr. Ritchie joined Penn State as an assistant professor of speech at the Delaware County Campus in June 1968. She was promoted to associate professor in 1973.

She was named "Outstanding Teacher of the Year" at the Delaware County Campus in 1972, the first year that the award was presented there. She was cited for "her excellent teaching, high standards and concern for students, and her outstanding contributions to all aspects of Campus life."

Prior to joining Penn State, she was assistant professor of English at Wichita State University in Kansas.

Dr. Paul L. Michael has been named a Fellow of the Acoustical Society of America. Professor of environmental acoustics and director of the University's Environmental Acoustics Laboratory, Dr. Michael was cited for his contributions to industrial acoustics and noise control.

Dr. Walter Severs, professor of pharmacology at Hershey, has been selected to receive the University of Pittsburgh Distinguished Alumnus Award for 1978.

Dr. Henry S. Albinski, professor of political science, has just returned from a month-long trip to Australia, New Zealand and Papua New Guinea under the auspices of a U.S. State Department American Specialist grant. Prof. Albinski presented lectures and seminars at several universities and before public affairs groups. He also presented an invited paper at an international conference in Canberra sponsored by the Australian Institute of International Affairs. His topic was "American Perspectives on the ANZUS Alliance."

Dr. Harry Alcock, professor of chemistry, is one of ten scientists from the United States invited to participate in a joint U.S.-Brazilian program to be held at the dedication of a new Macromolecular Science Institute in Rio de Janeiro. One of the purposes of the program is to stimulate interactions between U.S. and Brazilian research groups in the field of macromolecules.

Dr. C. Dale Thierien, associate professor of biology, recently presented invited lectures at the University of Washington, Seattle, and Western Washington University, Bellingham. Dr. Thierien discussed his research on slime molds.

Dr. V. S. Stubican, professor of materials science and engineering, returned recently from a six-month leave of absence which he spent as Max Planck Professor at the Max Planck Institute for Solid State Research in Stuttgart, West Germany. There he worked on theoretical and structural aspects of new types of solid state electrolytes for use in high-power batteries and fuel cells.

During his stay in Europe, he also lectured on "Transport Phenomena in Solids" and "Zirconia Ceramics" at the Philips Research Laboratories in Aachen; the Annawerke Co. research laboratory in Coburg; the Universities of Aachen, Cologne, and Hanover; and the Imperial College in London.

Dr. Gerald M. Moser, a member of the University faculty since 1949, has retired with the rank of professor emeritus of Romance languages.

He came to Penn State from the University of Illinois as an assistant professor in what was then the Department of Romance Languages. During his years here and partly through his efforts, a separate Department of Spanish, Italian, and Portuguese evolved and the course offerings in Portuguese and Brazilian studies were greatly expanded.

Born in Leipzig, Germany, Dr. Moser attended school in that city, studied law and art history briefly at the University of Geneva and then went to the Sorbonne, where he stayed for six years and earned three degrees in German and Portuguese. He was later awarded a post-graduate study fellowship at the University of Chicago. In 1962-63, he was a Fulbright Scholar at the University of Lisbon, Portugal, and during the summer of 1966, he conducted research on Spanish literature in Madrid under a grant from the American Philosophical Society.

Before coming to Penn State, Dr. Moser taught at the University of Illinois, the University of Wisconsin, Cornell University, Bridgewater College in Virginia, and the Oxford Academy in Pleasantville, N.J.

He is the author of two books on the Lusophone (Portuguese language) literatures of Africa and collaborated with H.C. Woodbridge on a book about South American poet Rubén Darío.

In retiring before reaching the age of 65, Dr. Moser says, he is following the advice given 300 years ago by Baltasar Gracián, the Spanish prose writer and Jesuit priest: "Don't linger on like a setting sun. 'Tis a maxim for the wise: leave things before they leave you."

He adds, however, that he intends to continue to study, write and publish during his retirement. He and his wife, Ingeborg, a State College area teacher, will maintain their residence in Ferguson Township.

Dr. George W. Gokel, assistant professor of chemistry, recently presented invited lectures on "Chemistry in Mixed Phase Media" at the Ethyl Corporation of Baton Rouge and at the Louisiana State University. He also presented a lecture on "Oxathiolane-dioxides as Synthetic Equivalents" at Tulane University.

Kenneth Holderman, vice-president emeritus of Commonwealth Campuses and a member of the University's Board of Trustees, was honored at the Spring Advisory Board Dinner Meeting of the New Kensington Campus where the Campus Theater Green Room was formally dedicated to him.

Also honored at the affair was Albert J. Miller, Campus librarian, who received the Director's Award for Outstanding Academic Achievement and Service to the University.

Prof. Alfred McClung and Campus Director Robert Arbuckle, received the Silver Jubilee Citation of the Department of General Engineering for their promotion of engineering technology at Penn State.

Renting your house - without tears

There's more to renting your house than just turning the keys over to the tenants.

The University Housing Referral Service, a division of The Faculty Women's Club, has put together a written guide on suggestions for faculty or staff members who are considering renting their homes. It's called "Everything You Always Wanted to Know About Renting Your House." But Were Afraid to Even Think About."

The guide is available for 25 cents at the Faculty Women's Club office in Room 313 Willard Bldg. and is based on the experiences of approximately 25 families who rented their State College area homes while they were away from the University. Designed primarily for faculty families leaving the area for sabbaticals or leaves of absence, the guide contains tips that can apply to anyone renting houses.

Detailed suggestions on how to handle the lease, the utilities, insurance, damages, storage, repairs and other items are included. The benefits of using a realtor to oversee certain details in the owner's absence are also discussed.

The Housing Referral Service was set up to help University employees list homes for rent and to take inquiries from people looking for rentals in the State College area. A nominal fee is charged for listing a house rental. The fee is used for office expenses such as stamps, printing and the telephone bill.

Volunteer help is used at the office, which is open from 9:30 a.m. to 11:30 a.m. Tuesdays and from noon until 2 p.m. Thursdays.

An answering service takes care of queries when the office is closed. The phone number is 865-1538.

The rental guide was written by a committee chaired by Judy Aronson. The members included Nancy Spear, Jane Richey and Judy Sammis. Actual writing began in the winter of 1976.

The Housing Referral Service accepts no responsibility to either party in a referral case. The service staff hopes clients will have read the guide to "Everything You Always Wanted to Know..." and arrangements will proceed smoothly from that point.

From left: Mr. Dawson, President Oswald, and George Reach, president of Campus Advisory Board, at dedication of Dawson Bldg.

Worthington Scranton honors Dawson

Robert E. Dawson, former director of the Worthington Scranton Campus, was honored Friday, April 28 with the naming of the Campus Classroom Administration Bldg. as Robert E. Dawson Bldg.

Principal speaker for the noon dedication luncheon was President John W. Oswald. Other speakers included Robert H. Jones, former director of the General State Authority; former Penn State President Eric A. Walker; and Penn State alumnus James F. Valvano.

Mr. Dawson served as administrative head of the Penn State Evening School from 1942 to 1958 when he was appointed director of the Worthington Scranton Campus, a position he held until his retirement in 1971.

The newly designated Robert E. Dawson Bldg. erected in 1968, the first structure to be erected on the Dunmore acreage acquired in purchases in 1959 and 1964. It was constructed at a cost of \$1.4 million.

Marshall H. Kaplan, associate professor of aerospace engineering, conducted a one-day colloquium on communications satellites April 23 in San Diego under the sponsorship of the American Institute of Aeronautics and Astronautics. He also conducted a tutorial session on launching, positioning, and acquisition of geostationary communications satellites.

Obituary

F. Joseph Bedenk, professor emeritus of physical education, died May 2 at the age of 81. Born in Williamsport, Mr. Bedenk received a B.S. in business administration from Penn State in 1924 and his master's degree in that field from Columbia University.

He came to Penn State in 1930 after coaching at Rice and the University of Florida. He was named head baseball coach in 1931, a position he held for 32 years. In 1949 he was also head football coach of the Nittany Lions.

Baudelaire: A Self-Portrait by eminent professors Lois Boe Hyslop and Francis E. Hyslop, originally published by the Oxford University Press in 1957, is to be reprinted by the Greenwood Press of Westport, Conn. In 1957 it was chosen as one of its offerings by the Readers' Subscription Book Club.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Special Events

Thursday, May 11

End of Another Year Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.
USC, Democratic Candidates Night, 7 p.m., HUB main lounge.

Alumni Fellow Albert Hurwitz on "Children's Art from around the World," illustrated public lecture, 7:30 p.m., Room 112 Kern.

Art History/Archaeological Institute of America Lecture: Louis Dupree, adjunct professor, anthropology, on "Recent Archaeological Discoveries in Afghanistan and China," 8 p.m., Room 258 Willard.

History of Photography Lecture: Heinz K. Henisch, physics and history of photography, on "Photography and Its History," 8 p.m., Room 101 Kern.

University Theatre, Euripides, *Electra*, 8 p.m., The Playhouse.

Friday, May 12

Sports: women's track, Lady Lion Invitational tennis, vs. Bucknell, 2 p.m.

Speech Communication Carroll C. Arnold Lecture: Dr. Arnold, on "Levels of Rhetorical Understanding," 2:30 p.m., Room 112 Kern.

Art History/Medieval Studies Lecture: Samuel Y. Edgerton, Boston University, on "The *pittura infamante* in Medieval and Renaissance Italy," 4 p.m., HUB assembly hall.

End of Another Year Candlelight Dinner, 4:45-7 p.m., Terrace Room, HUB.

Isle and Square Dance Roundup, 7:30 p.m., Room 133 White.

STO film, *Ora*, 7:30, 9:30 and 11:30 p.m., Room 111 Forum.

Philosophy Department Dottner Lecture: Wilfred Sellars, University of Pittsburgh, on "Categories and Conceptual Schemes in Philosophy," 8 p.m., Laurel Room, Nittany Lion Inn.

University Theatre, *Electra*, 8 p.m., The Playhouse.

David Hudson, accompanied by Thomas Ahrens, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, May 13

Last date for submitting petition to Records Office to graduate in absentia in May.

Sports: women's track, Lady Lion Invitational. Shaver's Creek Nature Center, Nature Workshop for Preschoolers and Parents (by registration only — 865-1851), 9:30 a.m.-noon, Stone Valley.

Children's Theatre Weekend. *Tuck Everlasting*, 11 a.m. and 3 p.m., HUB ballroom; *For the Love of a Worm*, 11 a.m. and 2 p.m., Fisher Plaza. Free.

Franchise-cinema, *The Sex Shop*, 7 and 9 p.m., Room 112 Kern.

STO film, *Ora*, 7:30, 9:30 and 11:30 p.m., Room 111 Forum.

University Theatre, *Electra*, 8 p.m., The Playhouse.

University Choirs and PSU Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 14

Children's Theatre Weekend. *Tuck Everlasting*, 11 a.m. and 3 p.m., HUB ballroom.

University Chapel service. Raymond Brown directs a special musical program, 11 a.m., Music Bldg. recital hall.

Shaver's Creek Nature Center, Spring Wildflower Walk, 2-4 p.m., Stone Valley.

Opening Reception, "End of Year Student Show," 3-5 p.m., Zoller Gallery.

Penn State Glee Club, 3 p.m., Eisenhower Auditorium.

Franchise-cinema, *The Sex Shop*, 7 and 9 p.m., Room 112 Kern.

Monday, May 15

Cinematheque, Fredkin, *The French Connection* (1972), 7 and 9 p.m., HUB assembly hall.

White Band concert, 7 p.m., Fisher Plaza.

Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, May 16

International Program Lecture: Jeffrey Race on "The Economic Background of Recent Political Events in South East Asia," 1 p.m., Room 112 Kern.

Wednesday, May 17

Commons Kaleidoscope, "1977 Master's Golf Tournament," noon, Kern lobby.

Shakespeare film, *King Lear* (Brook/Scofield), 6:30 p.m., Room 101 Chambers.

Commonplace Theatre, *First Circle*, 7:30 and 9:30 p.m., Room 112 Kern.

Graduate Quartet, 8:30 p.m., Music Bldg. recital hall.

Thursday, May 18

Shakespeare film, *King Lear* (Brook/Scofield), 6:30 p.m., Room 101 Chambers.

Friday, May 19

Early registration for summer term, 8:30 a.m.-4:30 p.m., Room 112 Shields, through Wednesday, May 24.

Sports: men's track, Penn State Open.

Medieval Studies, Society for Creative Anachronisms, Medieval Combat Demonstration, 7 p.m., HUB lawn. Rain place: HUB ballroom.

Shaver's Creek Nature Center, Ghoules and Beasts and Things that Go Bump in the Night, 8 p.m., Stone Valley.

Karen Keating, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, May 20

Last day for signing spring term Emergency Loans, Room 108 Shields.

Shaver's Creek Nature Center, Early Morning Bird Walk, 8-9:30 a.m.; Spring Wildflower Walk, 2-4 p.m., Stone Valley.

Eco-Action Recycling, 10 a.m.-3 p.m., Parking Lot 83 and Boalsburg Fire Hall.

Spring term classes end.

Sunday, May 21

Final examinations.

Shaver's Creek Nature Center, History in the Rocks, 2-4 p.m., Stone Valley.

Ruth Johnson, violin, 8:30 p.m., Music Bldg. recital hall.

Seminars

Thursday, May 11

Computation Center, "Introduction to AFL" (6/4 of 6), 7:30 p.m., Room 201 Bus. Admin.

Friday, May 12

Philosophy/Speech Communication, Ernesto Grassi, University of Munich, on "Languages as the Presupposition of Religion: A Problem of Rhetoric as Philosophy?" 10 a.m., Room 124 Sparks.

Civil Engineering/Pa. Transportation Institute, Joel Horowitz, U.S. EPA, Washington, D.C., on "On the Methods of Evaluating Transportation Options," 12:45 p.m., Room 132 EE East.

Monday, May 15

Philosophy/Speech Communication, Ernesto Grassi, University of Munich, and Carroll Arnold, emeritus professor of speech communication, on "Types of Rhetoric and Problems of the Relationship between Philosophy and Rhetoric," 10 a.m., Room 124 Sparks.

Materials Research, J. B. Wachtman, National Bureau of Standards, 1978 president of

American Ceramic Society, on "Materials Research for the National Energy Supply," 1:30 p.m., Room 189 MRL.

Biochemistry and Biophysics, Manfred Mayer, Johns Hopkins University, on "The Activation Pathways of the Complement System," 3:55 p.m., Room 101 Althouse.

Fuel Science, Alan A. Leff on "A Mass Spectral Study of the Pyrolysis Products of Coal under Rapid Heating Conditions," 4 p.m., Room 301 Steidle.

Tuesday, May 16

Biochemistry and Biophysics, Manfred Mayer, Johns Hopkins University, on "The Membrane Attack Mechanism of the Complement System," 11:10 a.m., Room 101 Althouse.

Analytical Chemistry, Hayden Clark on "The PSU High Resolution Mass Spectrometry System — An Example Lab Box Design," 1 p.m., Room 339 Davey.

Solid Waste Management, Richard Panizek, geology, on "Living with Leachate," 2:20 p.m., Room 128 Sackett.

Genetics, Bernie May on "Quantitative Inheritance in Salmonidae," 3:55 p.m., Room 52 Frear.

Thursday, May 18

Ceramic Science, Dennis Reedy, Ohio State University, on "Electromigration and Electrolysis in Ceramics," 11 a.m., Room 301 Steidle.

Man-Environment Relations, Rodney Erickson, geography, on "Issues in Urban and Industrial Relocation," 2 p.m., Room S131 Henderson.

Agency, James Irons on "Remote Sensing of Strip Mines through Image Texture Analysis," and Robert Mathewson on "Computer Enhancement of Aerial Photography for Agronomic Use," 3:55 p.m., Room 111 Tyson.

Meteorology, Richard Goldberg, atmospheric science, NASA Goddard Space Center, on "Solar Activity — A Factor in Weather and Climate," 3:55 p.m., Room 112 Walker.

Rail Transport, James W. Boone, Office of Rail Economics and Operations, Federal Railroad Administration, on "Intermodal Competition and Economic Discrimination: A Reassessment," 3:55 p.m., Room 62 Willard.

Philosophy, Aaron Druckman, philosophy, on "Three Unpires and the Devil," 4 p.m., Room 69 Willard.

Acoustics, Fred J. Everly, research associate, ARL, on "Adaptive Array Noise Cancelling Using Stochastic Approximation Techniques," 4 p.m., Room 73 Willard.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Exhibits

Anthropology Museum: Open Tuesday and Thursday, 9-11:45 a.m., 12:45-5 p.m.; Wednesdays, 9 a.m.-noon. North African ceramics, Materials from Afghanistan; Mezzo-American Archaeology.

Chambers Gallery: Art Education undergraduate student exhibition, through May 19.

Hammond Gallery: Current Glass Works by Art Dept. students, through May 12.

Kern Commons Gallery: Susan Canning, Ester Del Rosso, and Suzanne Glascock, prints and drawings; Mahin Ghanbari, ceramics, all through May 13; Michael Pascucci, sculpture and drawings, opens May 13.

Museum of Art: Goya prints and drawings, through May 28; Robert Kulicke, painter, designer, craftsman, special exhibition, Jerome Wilkin's "Painter's Crossing"; American paintings from the permanent collection.

Pattee Galleries: East Corridor gallery, Patricia Bellan Gillen, "Graphics on Silk and Paper," through May 12; Lending Services Lobby, Ingrid Putsch, prints and drawings, through May 26.

Zoller Gallery: End of Year Student Show, May 14-19; Cindy Stan, prints, and Diane Tetrault, ceramics, May 21-26.

WPSX Highlights

At age 47, Winslow Homer turned his back on the world to spend his last years in a solitude which produced some of his greatest work. Saturday, May 14 at 7:30 p.m., Winslow Homer in Maine recalls the painter's years at Prout's Neck, Maine, through his own words and memories of relatives and friends.

Sunday, May 14 at 1 p.m., Channel 3 presents **Campus Visions**, a showcase of video and film productions created by students in the speech communication, journalism, and theatre and film departments at Penn State. The one-hour special will include commentary by Craig Tenney, assistant professor of journalism. **Campus Visions** can also be seen Saturday, May 20 at 2 p.m.

Bridgestone Tennis Doubles Championships, Sunday, May 14 at 3 p.m., provides recorded coverage of the finals match between the team of Françoise Durr and Virginia Wade and the team of Billy Jean King and Martina Navratilova.

Three days of hearings in Washington, D.C. are condensed into the one-hour special, **Incarcerated Children**, to be seen Monday, May 15 at 9 p.m. Witnesses who appear on the program tell of their experiences as children incarcerated in public institutions and of solitary confinement and other penal methods employed there. Talkabout, Tuesday, May 16 at 7:30 p.m., takes a look at another problem for American youths with a discussion of child abuse. Scheduled to appear on the program are Robert L. Burgess, professor of human development and Lee Miller, administrator of Child-Line and abuse registry for the Pennsylvania Department of Welfare.

Few pioneers doubted that the "varmints" of the American west — the rattlesnake, the coyote, and wild mustang — should be destroyed. But today these animals have staunch defenders as revealed Tuesday, May 16 at 8 p.m. in a repeat broadcast of the **National Geographic Special: The Animals Nobody Loved**.

News in brief

(Continued from page 1)

If this is done, he said that it would have to be operated in a fully self-supporting manner, as is the Inn now.

"In effect," Dr. Oswald explained, "the facility would function as a part of the Inn and in support of the educational programs of the University, including the various Colleges, Continuing Education, and others.

"The facility would continue, of course, to be available for use by the Faculty Club organization and other organizations and groups under arrangement with the Inn."

Other details, including the issue of a possible physical link to the Inn, located nearby, and other matters will be examined during the next few months in preparation for a re-opening of the facility in the fall, Dr. Oswald said.

The Faculty Club building was opened on August 31, 1976, and was built with designated gifts of more than \$1,000,000. Owned by the University, it has been leased to the Faculty Club, which has had complete responsibility for its operation.

Sellers to deliver Dotterer lecture May 12

"Categories and Conceptual Schemes in Philosophy" will be the topic of Prof. Wilfred Sellers for the Ninth Annual Dotterer Lecture at 8 p.m. Friday, May 12 in the Laurel Room of the Nittany Lion Inn.

Research professor in the philosophy of science at the University of Pittsburgh, Dr. Sellers has served as president of the American Philosophical Association.

Among his special interests are the theory of knowledge, the history of philosophy and the philosophy of science. He is the author of three books, *Science, Perception and Reality*, *Science and Metaphysics*, and *Philosophical Perspectives*.

The Dotterer Lecture Series was established in the Department of Philosophy to honor the late Prof. Ray Dotterer who served as head of the department from 1938 until his retirement in 1947.

Calendar news due

Information for the summer term calendar, which will appear in the June 8 edition of INTERCOM, should be sent by May 18 to Lee Morrill, calendar editor, Room 312 Old Main, 865-2501.

Recent digs in China, Afghanistan to be described

Dr. Louis Dupree, adjunct professor of anthropology at the University, will give an illustrated lecture on "Recent Archaeological Discoveries in Afghanistan and China" at 8 p.m. tonight (Thursday) in Room 258 Willard Bldg.

The talk will be sponsored by the Central Pennsylvania Society of the Archaeological Institute of America and the Department of Art History.

Dr. Dupree is a member of the American Universities field staff and has excavated at many sites in Afghanistan. He has just returned from a tour of China.

McKinnon named housing, food head

William H. McKinnon, assistant director of University housing at the University of Wisconsin, has been named assistant vice-president for housing and food service operations at Penn State, effective June 5.

He will succeed Otto E. Mueller, who plans to retire July 21 after 25 years at the University.

Mr. McKinnon, a 1959 graduate of Stout State University at Menomonie, Wis., has a master's degree in business administration from SUNY-Albany. He has been at Wisconsin since 1968.

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed although names will be withheld on request.

Editor's note: The officers of the University Faculty Senate recently put together a list of questions dealing with non-academic policies and procedures. Since a number of these questions are of general interest to the University community, we are running them and the answers in INTERCOM.

QUESTION

Why is no system of merit available for individuals with long tenure and excellent service in fixed clerical grades?

ANSWER:

The salary plan for clerical employees of The Pennsylvania State University does provide for both long service and merit increases. During learning periods, employees may receive periodic increases, and for the first two years of service the employee receives an anniversary increase based on continued satisfactory service. Also, the plan provides for two additional increases which may be granted on a biannual basis to those employees whose work performance "is determined to be outstanding and the appraisal qualifies the employee for a merit increase."

In addition, historically, each July 1 when pay increases have been granted, the entire clerical salary structure has been increased. Therefore, clerical employees at the top of the ranges have received increases comparable to those received by other classifications of employees.

Ray T. Fortunato
Assistant Vice President for Personnel Administration

Arnold to present first Carroll C. Arnold lecture

Dr. Carroll C. Arnold, professor emeritus of speech communication, will deliver the first Carroll C. Arnold Lecture at 2:30 p.m. Friday, May 12 in Kern auditorium. The lecture has been established by the Department of Speech Communication.

Nationally known for his work in rhetorical criticism and the history of rhetoric, Dr. Arnold will speak on "Levels of Rhetorical Understanding." He is currently serving as Distinguished Visiting Professor of Speech Communication at the University of Delaware.

Choirs, Symphony join forces May 13

For their 30th anniversary spring concert, the University Choirs will be joined by the Penn State Symphony Orchestra in performance at 8:30 p.m. Saturday, May 13 in Eisenhower Auditorium.

Two major works will make up the program. They are *Schicksal* by Johannes Brahms and *Carmina Burana* by Carl Orff. Tickets are on sale at \$3 at the auditorium box office.

Glee Club to offer Mother's Day concert

The Penn State Glee Club's final performance of the 1977-78 season will be a Mother's Day concert at 3 p.m. Sunday, May 14 in Eisenhower Auditorium.

Senate

(Continued from page 1)

Edward D. Eddy commented, "The report bids to do something we need to do badly and that is to say what an educated person is."

The main feature of the debate was the number of credits allotted to natural sciences.

Prior to the Senate's approval of Dr. Miller's amendment to increase the natural science requirement from six to nine credits, a number of Senators argued in favor of the amendment.

Dr. Roger M. Herman, professor of physics, said, "It's not the scientist who will be hurt (by the six credit requirement). It's the non-scientist who won't be able to communicate with the scientist."

The Senate approved the plan for implementation of the BDR report. The plan recommends that a standing subcommittee of the Senate Curricular Affairs Committee be appointed to work with the Provost in implementing the requirements.

There are four specific conditions of implementation. First, pass-fail courses cannot be used to satisfy baccalaureate degree requirements; second, when a student changes major, the courses taken under his or her old major to satisfy the 27 credit "distribution or breadth"

requirement will be accepted by the student's new department; third, each major will identify the 46 credits required for the general education section of its degree requirements and will prepare them for publication in the undergraduate catalog; fourth, departments and programs are to submit plans for meeting the requirements by May 1, 1979. Plans are submitted through each College and given to the standing subcommittee of the Curricular Affairs Committee.

In other action, the Senate passed legislation establishing guidelines to ensure that when the findings of tenure review bodies differ, consultation take place among and within the review bodies. The legislation alters a portion of PS-23 entitled "Review Procedures" to read:

"Whenever one review level reaches an initial decision which diverges from a tenure recommendation it has received, an effort shall be made to clarify the reasons for the divergence. Consultations for this purpose shall be conducted by representatives of the reviewing levels concerned. Reviews shall be carried out, therefore, so as to assure that divergences in final tenure recommendations between levels will reflect genuine differences in evaluation rather than misunderstanding of the record."

The Senate also approved a revision in academic drop rules. The revision provides that a student dropped for poor scholarship may apply to take courses as a non-degree student to improve his or her grade point average in order to apply for reinstatement. However the student may not register as a non-degree student for at least one term (not counting summer term) after he or she was dropped. Once the student has non-degree status, he or she may take only six credits per term except at Capitol Campus, where courses are normally four credits each. There the student may register for eight credits. The rule applies to students dropped as degree or provisional students from this or any other university.

The report of the Nominating Committee for 1978-79 Senate officers was approved without change. There were no nominations from the floor. The list of nominees was published in the April 27 issue of INTERCOM.

Staff Vacancies

In accordance with the University's guidelines, employees in need of the current hiring restrictions, the following positions have been determined to be necessary in order to maintain essential services for the University. Hiring has also been authorized for positions in these areas. Positions are involved, i.e., positions funded completely by research grants and contracts, and those financed entirely by auxiliary enterprise funds.

Consequently, the position vacancies listed below have been exempted from the current hiring restrictions. All employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these positions will be received until 5 p.m. May 14. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

COUNSELOR, STUDENT AFFAIRS — Delaware County Campus Responsible to the Dean of Student Affairs for conducting personal, educational, career and placement counseling programs. Assists with Summer Counseling and Orientation. Assists with work of the other Student Affairs and Campus divisions assigned by the Dean of Student Affairs. Master's degree in clinical or counseling psychology, counselor education, or equivalent training, plus a minimum of two years of applicable professional experience in educational/counseling or related experience.

ASSISTANT TO THE HOSPITAL DIRECTOR, COLLEGE OF MEDICINE — HERSHEY Responsible to the Hospital Director for coordinating and assisting in the development of hospital programs, planning, and short-range planning, management indicators, training and development, patient relations, and other programs as assigned. Master's degree in hospital administration or planning, or equivalent, plus two to three years of directly related experience in the health care or related industry.

PRODUCER/HOST, COLLEGE OF AGRICULTURE — University Park Produce and host "Farm, Home and Garden" television daily and weekly broadcast on the Pennsylvania Public Television Network, and produce and host "Home and Garden" radio series. Create and produce radio and television news spots, promotion announcements, etc. Teach radio and television broadcasting in workshops, seminars, etc. Responsible for planning, writing, reviewing and editing program copy materials in cooperation with extension specialists, faculty and others. Prepare feature news releases. Bachelor's degree (or equivalent) in broadcast, speech, journalism, mass communications or similar discipline, plus one to two years of effective experience in radio and/or television performing, producing, programming, or teaching that have a relationship to Cooperative Extension Service objectives, philosophy and public service. Master's degree highly desirable.

PROGRAMMER/ANALYST A, COLLEGE OF AGRICULTURE, Administrative Services — University Park Confer with research project personnel to determine the objectives of the study, anticipated results, degree of confidentiality and use of project data. Assist researchers in the design of survey forms. Perform analysis possible and time requirements. Develop new computer programs and upgrade, maintain and adapt existing programs to solve general and specific research problems at the Computer Center and other installations; plan logical steps to solution of problem, use of computer system components, input and output data formats and translate plans into computer instructions. Advise and assist researchers in efficient execution and the debugging of programs written by researchers themselves and in the utilization of library programs and peripheral equipment. A bachelor's degree with a major in mathematics, statistics or computer science and from two to four years of effective experience is required. Course work in algebra, number analysis, statistics, computer languages and systems programming are particularly desirable.

PROCEDURES SPECIALIST — Controller's Office — University Park Responsible to Senior Procedures Specialist in the Systems and Procedures Department. Develop and manage systems analysis, systems analysis, procedures preparation and form design and control, plus maintenance of the University Policy Manual and General Forms Usage Guide. Bachelor's degree in business administration and/or years of directly related experience. Accounting background desirable.

SOLID STATE DEVICE ENGINEER, COLLEGE OF ENGINEERING — University Park Provide technical support for ongoing research in solid state device and circuits. Design and fabricate solid state devices and develop advanced techniques, initiate experiments with materials. Responsible for operation and improvement of complex optical-electric systems. Assist in preparation of proposals and presentation of reports, papers, and publications. Maintain liaison with industry and up-to-date knowledge of literature and developments in applicable fields. M.S. in engineering or physics, or its equivalent, and at least two years' directly related experience in solid state research and development which includes various aspects of device technology.

Penn State Intercom

It's a bird, it's a plane — it's two new options in air service

On a recent rainy Friday night a University administrator arrived in Pittsburgh (from New York) by air to find that Midstate was closed and Allegheny would not be flying. But instead of the usual options — a three-hour drive to State College or a night at the Pittsburgh airport hotel — he boarded a commuter plane, flew directly to University Park, and was home by 10 p.m.

His flight was the result of the new service initiated within the past two weeks by two commuter airlines — Air Atlantic and Trans Penn — both operating out of University Park.

Air Atlantic, the older of the two lines, has been in business at Penns Cave Airport since 1969, according to its president, Russ Schleiden.

Air Atlantic's Schedule

Philadelphia	
Depart University Park	7 a.m.
Arrive Philadelphia	8:20 a.m.
Depart University Park	4:30 p.m.
Arrive Philadelphia	5:50 p.m.
Depart Philadelphia	9 a.m.
Arrive University Park	10:20 a.m.
Depart Philadelphia	6:30 p.m.
Arrive University Park	7:50 p.m.

Trans Penn's Schedule

Pittsburgh	
Depart University Park	6:35 a.m.
Arrive Pittsburgh	7:30 a.m.
Depart University Park	12:15 p.m.
Arrive Pittsburgh	1:10 p.m.
Depart University Park	7:30 p.m.
Arrive Pittsburgh	8:25 p.m.
Depart Pittsburgh	8:35 a.m.
Arrive University Park	9:45 a.m.
Depart Pittsburgh	1:35 p.m.
Arrive University Park	2:25 p.m.
Depart Pittsburgh	9 p.m.
Arrive University Park	9:50 p.m.
Baltimore	
Depart University Park	9:55 a.m.
Arrive Baltimore	10:45 a.m.
Depart University Park	3:35 p.m.
Arrive Baltimore	4:25 p.m.
Depart Baltimore	11 a.m.
Arrive University Park	12:05 p.m.
Depart Baltimore	5 p.m.
Arrive University Park	5:50 p.m.

Starting with one single engine plane, it branched out from charter flights to carrying freight and now has 13 aircraft and 16 employees.

Mr. Schleiden, who took his own first flight in 1962 as a member of Penn State's football team, is a former Air Force pilot. His company also operates out of Midstate, where it takes over the terminal building management in 1975.

Air Atlantic's primary aircraft is an eight-passenger Navajo Chieftain, which carries a pilot and co-pilot as crew.

Eastbound passengers can make connections to John F. Kennedy Airport through ALTAIR in Philadelphia — the 7 a.m. flight out of University Park connects with ALTAIR's 9:10 a.m. flight to JFK, arriving at 10 a.m.

Air Atlantic also offers daily over-the-counter freight service to Philadelphia.

"We are trying to provide first-class service," Mr. Schleiden says, and interviews with two recent Air Atlantic passengers confirm his claims. Both found the plane — which is new — comfortable and the service excellent.

Trans Penn, a smaller line, is offering daily service out of University Park to Pittsburgh and Baltimore for passengers travelling outside the Commonwealth. It, too, flies Navajos and has two separate two-man crews. Freight service is also available.

According to Trans Penn president Richard Lambert, local transportation studies have shown that the completion ratio for commuter aircraft at University Park is equal to or greater than that at Midstate.

This is under the present VORDME approach, a non-precision, instrument approach system, which brings an aircraft over the airport — from that point, the pilot must visually select the runway on which to land.

An Instrument Landing System is currently being installed and is scheduled to become operative by late summer or early fall. When the federally funded project is completed, pilots approaching University Park will be lined up directly with the runway on which they will land.

"Currently," Mr. Lambert notes, "the chances of a flight being cancelled are slim. However, if University Park is closed, we can usually land at Millifin County Airport and will then take our passengers to State College or Bellefonte

(Continued on page 4)

News in Brief

6,522 to graduate

With more than 4,775 graduates scheduled to receive degrees at the University Park Campus on Saturday, May 27, five commencement exercises will be held. Three are scheduled for 10:30 a.m. and two for 1:30 p.m.

The multiple programs, which will provide adequate seating for all guests, are necessary because Beaver Stadium, where spring term exercises traditionally are held, is not available. Construction to enlarge the capacity of the stadium is in progress.

In addition to the 4,779 candidates for degrees at University Park, there are 1,743 graduates at other Campuses across the State, bringing to 6,522 the total number scheduled to receive degrees at the close of the term. There are 4,814 candidates for the baccalaureate degree, 1,173 to receive an associate degree for completion of two-year programs, and 535 listed for advanced degrees.

Because of the multiple programs, there will be no visiting speaker. William K. Ulenich, of Clearfield, as president of the Board of Trustees, will join President John W. Oswald in conferring the degrees at the exercises at 10:30 a.m. in Recreation Bldg.

Commencement Exercises

- 10:30 a.m.
Recreation Bldg.: Business Administration, Education, Human Development
- Eisenhower Auditorium: Agriculture, Arts and Architecture, Earth and Mineral Sciences.
- HUB: Graduate School
- 1:30 p.m.
Recreation Bldg.: Engineering, Science, Health, Physical Education and Recreation
- Eisenhower Auditorium: Liberal Arts

HUB parking lot to be closed May 25

The HUB parking lot, Brown F, will be closed to faculty, staff and visitors Thursday, May 25 to accommodate the Delegate Election of Trustees. Faculty and staff members with Brown F parking stickers should park in a designated open faculty-staff area in accordance with University parking regulations. The closest open areas are Blue D at the Milton S. Eisenhower Auditorium, and Blue F and Blue G at Pollock and South Halls.

Next INTERCOM June 8

INTERCOM will not be published between terms. The next issue, which will appear June 8, will carry the summer term calendar. Information for the calendar should be sent in no later than May 19 to Lee Mornill, calendar editor, Room 312 Old Main, 865-2501.

PI office wins 4 awards in CASE competition

Penn State's Office of Public Information and Relations has won four awards, including the top one in public relations, in national competition sponsored by the Council for the Advancement and

Senate to hear informational reports June 6

The University Faculty Senate will hear a number of informational reports and will be asked to act on several legislative items at the Tuesday, June 6 meeting. The complete agenda was not available at press time, but the Senate Office indicated that the legislative reports would include a number of recommendations by the Committee on Committees and Rules.

The suitability of course numbers will be the subject of recommendations from the Curricular Affairs Committee. The Faculty Affairs Committee is also expected to present several recommendations relating to PS-25.

The Intra-University Relations Committee will propose legislation on delegation of responsibilities, and the Senate will be asked to act on a request for delegation of responsibilities to Berks Campus. The Committee on Undergraduate Instruction will propose a change in class attendance rules.

Annual informational reports from standing committees will include the report of the Senate Committee on Academic and Athletic Standards. A report by the Student Affairs, Awards, and Scholarships Committee will also be presented. The Committee on Undergraduate Instruction will present its annual report on the activities of the Division of Undergraduate Studies and the Division of Institutional Services.

The Senate will also hear the report of the Special Joint Administrative Senate Committee on Insurance, as well as a progress report on a study being conducted on part-time faculty of the University.

The results of the balloting for 1978-79 Senate officers will also be announced.

Support of Education (CASE).

In competition involving total public relations programs, Penn State won the grand award of \$500 for its PR approaches in support of University objectives.

Public Information also received: — The grand award for its news and public service announcements on black awareness, which were produced for radio stations throughout Pennsylvania and other states.

— The special programs merit award in the volunteer category for assisting with the cleanup of Johnstown following last July's flood; and

— A citation, in the special public relations problems category, for its publicity programs involving black faculty, staff and students during 1977.

Arthur Ciervo, director of public information and relations, will accept the awards on behalf of all members of his staff at CASE's national Assembly in July in Hollywood, Fla.

Pattee assignments for study space to be made May 30

Members of the faculty who wish to obtain faculty study space assignments in Pattee Library for the summer term should note that the assignments will be made on a first-come, first served basis Tuesday,

(Continued on page 4)

Penn Staters

Dr. Jeffrey A. Kurland, assistant professor of anthropology, has presented lectures during this academic year at the University of California at Berkeley, the University of California at Davis, the University of California at Riverside, Bloomsburg State College, The CUNY Graduate Center, Rutgers University at New Brunswick, SUNY at Buffalo, and Tarrant County Junior College at Fort Worth. His talks were based on his research on human and nonhuman sociobiology.

Robert Trehy, professor of music and a Fellow of the Institute for the Arts and Humanistic Studies, recently performed leading roles with the Opera Company of Boston under the direction of Sara Caldwell. Mr. Trehy, a baritone, appeared as the "Stranger" in the Lukas Foss opera, *The Jumping Frog of Calaveras County*, in productions at the Kennedy Center in Washington, D.C., on April 26 and 27 and the Boettcher Auditorium in Denver on May 3 and 4. On April 29, Mr. Trehy performed a pops concert with the Hartford Symphony in Hartford.

Dr. Jean MacCluer, associate professor of biology, recently presented invited lectures at UCLA's Division of Medical Genetics and at the Columbia University College of Physicians and Surgeons, New York.

Dr. Joseph J. Villafranca, associate professor of chemistry, has been honored with the 1978 C. I. Noll Award for excellence in undergraduate teaching in the College of Science.

A member of the Penn State faculty since 1971, Dr. Villafranca has taught courses in freshman chemistry, sophomore organic chemistry, senior level advanced organic and inorganic laboratories and graduate level physical organic mechanisms. His research interests include cellular regulation at the enzyme level; biological approaches to enzyme mechanisms and structure using magnetic resonance techniques; and isotopic labeling experiments.

A graduate of the State University of New York at Fredonia, he earned the Ph.D. degree at Purdue University, where he received the Alfred K. Balls Research Award. Prior to joining the University faculty, he was a postdoctoral fellow at the Institute of Cancer Research in Philadelphia.

The Noll Award is named in honor of Dr. C. I. Noll, professor emeritus of chemistry and former dean of the College of Science.

Dr. Winfred M. Phillips, associate professor of aerospace engineering and director of the University's artificial heart engineering effort, presented an invited lecture May 9 to the bio-medical section of the New York Academy of Medicine. Dr. Phillips' talk, "Deformability of Red Blood Cells," was a report on work he did last year at the Institut de Pathologie Cellulaire in Paris, while on leave from the University.

Wilma R. Ebbitt, professor of English, is co-author of *Writer's Guide and Index to English*, sixth edition, a text for college composition courses recently published by Scott, Foresman.

The text combines a comprehensive rhetoric with a reference-handbook made up of articles, alphabetically arranged, on matters of syntax, usage, and mechanics that plague experienced as well as inexperienced writers. Sources of illustrative materials range from such popular magazines as *Newsweek* and *Sports Illustrated* to the *New York Review of Books* and scholarly journals; both parts of the book draw freely on student prose.

Prof. Johnstone

Prof. Baker

Dr. Henry W. Johnstone, professor of philosophy, is observing his 25th year of service to the University.

A graduate of Haverford College with a B.A. in philosophy, he served in the U.S. Army for three and a half years during World War II, and then went to Harvard, where he earned an M.A. and Ph.D. in philosophy.

For four years, he was on the faculty of Williams College in Williamstown, Mass., and came to Penn State in 1952 as an instructor in philosophy. He was later promoted to assistant and then to associate professor, and in 1961 was named professor of philosophy.

Dr. Johnstone has been acting chairman of his department on two occasions, once in 1961-62 and again in 1974-75. During the 1960-61 academic year, he was a Fulbright Lecturer at Trinity College in Dublin, Ireland, and before that, he had a fellowship in Belgium under the auspices of the Belgian/American Educational Foundation. In 1969, he was a visiting professor at the University of Bonn in Germany, and in 1971-72, he was again a Fulbright Lecturer, this time at the American University of Beirut.

Editor for eight years of the journal, *Philosophy and Rhetoric*, he has published six books and more than 100 articles and reviews.

Dr. Johnstone was an assistant to the vice president for research and graduate studies from 1966 to 1970, and was director of the Institute for the Arts and Humanistic Studies from 1968 to 1970. He is currently doubling as a part-time graduate student in the University's Department of Classics, working on an M.A. in Greek.

Gordon L. Baker, associate professor of physics at The Behrend College, is marking his 25th year of service to the University.

A native of Sioux Falls, S.D., Prof. Baker received his B.A. from the University of South Dakota, Vermillion, in mathematics, physics and meteorology. After serving in the Army Air Force as a meteorologist in the Pacific during World War II, he received his M.A. in physics from Washington University in St. Louis.

Mr. Baker was hired as an instructor of physics at the four-year-old Behrend "Center" in 1952, and became an assistant

professor in 1956. He was appointed to his present rank in 1963. In his 25 years at Behrend, Prof. Baker has taught physics, mathematics, meteorology and physical science courses.

Murray S. Martin, associate dean of libraries, recently had a book, *Budgetary Control in Academic Libraries*, published by JAI Press, Inc., of Greenwich, Connecticut. The book is Volume 5 in a series by JAI Press, Inc., on Foundations in Library and Information Science. Dean Martin's work is concerned with fiscal management and the varied facets of budgeting, including requests, control, analysis, priorities, monitoring finances and coping with change.

Dr. Stephen F. Jablonsky, assistant professor of accounting and public administration, and **Dr. Max Richards**, professor of management, were honored by the Master of Business Administration Association at an awards banquet May 16. The M.B.A. Association presented the 1977-78 Excellence in Teaching Award to the two men, who were chosen to receive the honor based on evaluations of instructors conducted by the M.B.A. Association at the end of each term.

Dr. Thomas E. Long, associate professor of vocational education, has been named to the committee planning the Conrail Adult Railroad Training Center to be built and operated in Altoona. Dr. Long serves as a representative of higher education to the committee. National legislators, regional and county officials, Conrail officials, industrial and business representatives and secondary school educators also serve on the committee.

Henry J. Hermanowicz, dean of the College of Education, served as the keynote speaker for a one-day conference on April 28 at Teachers College, Columbia University, in honor of Dr. Margaret Lindsey upon her retirement from Columbia University. Dr. Lindsey, a native of Pennsylvania, had earned her master's degree at Penn State and she was selected as a Penn State Alumni Fellow in 1977. Upon her retirement from Columbia University, Dr. Lindsey will become Distinguished Professor of Education at the University of Florida.

Computer Programming Workshop offered

The Computation Center will offer a five-day programming workshop during the break between spring and summer terms. The workshop will be held on Wednesday, Thursday and Friday, May 31, June 1 and 2, and on Monday and Tuesday, June 5 and 6. It is open to all faculty, staff and graduate students.

Basic computer concepts and techniques of programming in the FORTRAN IV Language will be studied. The workshop is oriented toward those who have had no previous computer experience.

Lectures will be given in Room 112 Buckhout Laboratory throughout each day, beginning at 9 a.m. and resuming at 1:30 p.m. after a lunch break. Sample programs will be studied and practice problems will be assigned throughout the five-day period. In order to gain the maximum benefit, participants should plan to devote the entire five days to a workshop.

Registrations will be accepted by Pauleta Cowen, Room 229 Computer Bldg. (863-0422) beginning immediately. A charge of \$3 (cash or interdepartmental transfer) for course materials will be made for each registrant. Computer charges will be born by the Computation Center, and participants can use the computer for practice purposes free of charge throughout the summer term.

Calendar

May 18-27

Special Events

Thursday, May 18
Shakespeare film, *King Lear* (Brook/Scofield), 6:30 p.m., Room 101 Chambers.
Alard String Quartet, part of Art/Science Interface end-of-term program, 7 p.m., Ice Pavilion.

Friday, May 19
Early registration for summer term, 8:30 a.m.-4:30 p.m., Room 112 Shields, through Wednesday, May 24.

Sports: men's track, Penn State Open; Medieval Studies, Society for Creative Anachronisms, Medieval Combat Demonstration, 7 p.m., HUB lawn. Rain place: HUB ballroom. Shaver's Creek Nature Center, Ghoules and Beasts and Things that Go Bump in the Night, 8 p.m., Stone Valley.
Karen Keating, piano, 8:30 p.m., Music Bldg. recital hall.

Saturday, May 20
Last day for signing spring term Emergency Loans, Room 108 Shields.
Shaver's Creek Nature Center, Early Morning Bird Walk, 8:30 a.m.; Spring Wildflower Walk, 2 p.m., Stone Valley.
Eco-Action Recycling, 10 a.m.-3 p.m., Parking Lot 83 and Bousberg Fire Hall.
Spring term classes end.

Sunday, May 21
Final examinations.
Shaver's Creek Nature Center, History in the Rocks, 2 p.m., Stone Valley.
Opening Reception for Cindy Stan, printmaking, and Diane Tetrauhl, ceramics, 3-5 p.m., Zoller Gallery.

Monday, May 22
Final examinations.

Tuesday, May 23
Final examinations.
ARI Lecture, Elton Adewale, political science, on "The Rhodesian Question," 10:45 a.m., Walker conference room, Applied Science Bldg.
Soccer Clinic, 6:30-8:30 p.m., Jeffrey Field.
Marinho Vusto Queiroz and Luiz Jose Caldas Franca, Brazilian coaches, will conduct.

Wednesday, May 24
Final examinations.

Thursday, May 25
Board of Trustees meeting, Room 402 Keller.
Applied Research Lab, Edward L. Titelman, University of Rochester, on "Applications of Wide Band Signal Processing," 10:45 a.m., Walker conference room, Applied Science Bldg.

Friday, May 26
Board of Trustees meeting, Room 402 Keller.

Saturday, May 27
Commencement. Colleges of Business Administration, Education, Human Development, 10:30 a.m., Rec. Bldg. Colleges of Agriculture, Arts and Architecture, Earth and Mineral Sciences, and Agriculture Business Associates, 10:30 a.m., Eisenhower Auditorium. Graduate School, 10:30 a.m., HUB ballroom. Colleges of Engineering, Health, Physical Education and Recreation; Science, 1:30 p.m., Rec. Bldg. College of the Liberal Arts and I.A.S.-Associates, 1:30 p.m., Eisenhower Auditorium.
Old Main Tower open, 9 a.m.-4 p.m.

Exhibits

Chambers Gallery: art education undergraduate student exhibition, through May 19.

Kern Commons Gallery: Michael Pascani sculpture and drawings, through May 27.

Museum of Art: Goya prints and drawings, through May 28; Robert Kulicke, painter, designer, craftsman; American paintings from the Permanent Collection; Jerome Wilkins' *Painter's Crossing*.

Patter, Lending Services: Ingrid Putsch, prints and drawings, through May 26.

Zoller Gallery: End of Year Student Show, through May 19; Graduate Thesis Exhibition by Cindy Stan, prints, and Diane Tetrauhl, ceramics, May 21-26.

A Senate Report on Freshman Admissions

Editor's note: The following charts were submitted to the Senate by its Committee on Admissions, Records and Scheduling, which is monitoring the academic consequences of admissions policies and procedures. This is only the first installment in an on-going study, the committee emphasizes. Material collected on associate degree admissions will appear in a later issue of INTERCOM.

Penn State Intercom

University faculty promotions announced

The following promotions, effective July 1, have been announced by the University:

TO PROFESSOR:

Ronald F. Abler, geography
Richard A. Anthes, meteorology
Sidney E. Barnard, food science
Michael H. Begnal, English
Charles A. Cole, engineering, Capitol Campus
Sabir H. Dahir, engineering, Capitol Campus
Ronald P. Danner, chemical engineering
Rosa G. de Pena, meteorology
William J. Duker III, East Asian history
Robert J. Eberhart, veterinary science
James Eisenstein, political science
F. Thomas Farrell, mathematics
Robert H. Farson, journalism
Burt L. Fennner, music
Stephen J. Fonash, engineering sciences
Harold L. Gilmore, management, Capitol Campus
Carl W. Haeseler, pomology
Richard H. Herman, mathematics
Thomas P. Hettmansperger, statistics
Peter C. Jurs, chemistry
Marshall H. Kaplan, aerospace engineering
Donald Bonney Keat II, education
John W. Kreider, pathology, Hershey
Manfred Kroger, food science
Richard E. Llorens, engineering mechanics, King of Prussia
Michael J. Mahoney, psychology
Stephen H. Miller, surgery, Hershey
John T. Neisworth, special education
Jon P. Nelson, economics
Hiroshi Ohmoto, geochemistry
Winfred M. Phillips, aerospace engineering
Rajna V. Raman, mining engineering
John A. Salvia, special education
Lee W. Saperstein, mining engineering
Dennis W. Thomson, meteorology
Joanne Trautmann, humanities and English, liberal arts, Hershey
Cecil R. Trueblood, education
Barry Voight, geology

Rex H. Warland, rural sociology
David P. Wooldridge, biology, Ogontz
Arian Zarkower, veterinary science

TO ASSOCIATE PROFESSOR:

Joel H. Anderson, mathematics
Margaret M. Baltes, human development and nursing
Paul R. Blankenhorn, wood technology
Dennis F. Brestensky, English, Fayette College
Eric J. Braude, mathematics, Behrend College
Russell Brignano, English, Beaver
Robert L. Butterworth, political science
Michael M. Coleman, polymer science
Sam M. Cordes, agricultural economics
Roger N. Cornish, theatre arts
Michael C. Danahy, French
Carolyn R. Dexter, social science and sociology, Capitol Campus
Samuel J. DiRoberto, accounting, Ogontz
Peter B. Everett, man-environment relations
James L. Farr, psychology
A. Daniel Frankforter, history, Behrend College
Zvi Friedman, pediatrics, Hershey
Gregory L. Geoffrey, chemistry
Jonathan G. Goldstein, computer science
Thomas A. Hale, French and comparative literature
William Park Hanson, art
George R. Himmer Jr., history, York
Craig R. Humphrey, sociology
Frederick J. Humphrey II, psychiatry, Hershey
Drew W. Hyman, community development
Richard W. Hyman, microbiology, Hershey
William G. Irons, anthropology
Ronald G. Johnson, physics, Delaware County
Nicholas A. Joukovsky, English
William S. Kammerer, medicine, Hershey
Roger L. Ladda, pediatrics, Hershey
Alphonse E. Leure-duPree, anatomy, Hershey
David R. MacKenzie, plant pathology

William E. Mattis Jr., engineering, Delaware County
Alexander McPherson Jr., biochemistry, Hershey
Kenneth H. Messner, surgery, Hershey
Arthur C. Miller, civil engineering
James H. Mortensen, agricultural education
Barry L. Myers, business law
Gordon K. Nelson, human development, Schuylkill
Wesley A. Olsen, physical education, Ogontz
Arthur H. Patterson, man-environment relations
Eva J. Pell, plant pathology
Lawrence J. Piliene, physics, Altoona
Stephen Porter, art
D. Eugene Rannels, physiology, Hershey
Richard J. Ravizza, psychology
Raymond W. Regan, civil engineering
Edgar J. Sanford, surgery, Hershey
Anton C. Schoolwerth, medicine, Hershey
Linda D. Schoop, educational psychology, New Kensington
Laura S. Sims, nutrition in public health
Steven H. Smith, music
Charles C. Snow, organizational behavior
Larry D. Spence, political science
Darrel J. Steffensmeier, sociology
William Thompson Jr., acoustical mechanics
Francis C. Turner, agricultural extension
Robert C. Vannucci, pediatrics, Hershey
William J. White, comparative medicine, Hershey
Sherry L. Willis, early child education
Ian S. Zagon, anatomy, Hershey

TO ASSOCIATE LIBRARIAN:

Richard J. Fitzsimmons, Worthington
Scranton
Miriam D. Pierce, Life Sciences
Robert S. Seeds, Life Sciences

TO ASSISTANT PROFESSOR:

James O. Ballard, medicine, Hershey
Gordon S. Bergsten, economics
Thomas M. Caccese, physical education, Hazleton

Douglas Chervanek, family and community medicine, Hershey
Richard C. Cordis, architecture
Daniel L. Doran, physical education, Delaware County
Mark H. Dorfman, American studies and history, Capitol Campus
Jerry L. Goodrich, industrial engineering
Larry Grossman, anaesthesia, Hershey
John W. Harman Jr., engineering, Capitol Campus
Glen H. Helman, philosophy
R. Dorn Hetzel, theatre arts
Robert King, mining engineering
Joan Long, pharmacology, Hershey
Joseph J. Manak, engineering, Beaver
Kenneth E. McIlvried, computer science, DuBois
Daniel A. Montgomery, landscape architecture
Judith L. Myers, recreation and parks
Overda A. Page, music
Gerald Potter, recreation and parks
Iris J. Prager-Decker, physical education, Capitol Campus
Patricia Rizzolo, English, Ogontz
Kathleen Rose, pharmacology, Hershey
David Russell, family and community medicine, Hershey-Millersburg
John E. Siegel, family and community medicine, Hershey-Millersburg
Robert L. Stout, economics, Delaware County
Bernard E. Thorn, recreation and parks
Richard Zelinka, mgmt. development (Ind. Eng.), McKeesport
Arthur Zucker, humanities, Hershey

TO SENIOR ASSISTANT LIBRARIAN:

Beverly Feldman, Reference
Stuart J. Glogoff, Lending Services
Rosemary King, Cataloging
Deena J. Morganti, Berks
Ellen J. Siegel, Serials
Frederick Van Antwerp, Reference

TO RESEARCH ASSOCIATE:

Harold W. Harpster, animal science
Patricia L. Sanders, pesticides

News in Brief

Revised budget may be adopted in July

The interim budget for the 1978-79 fiscal year was approved by the Board of Trustees at its May meeting. This action permits the University to meet payroll and operating costs for the next fiscal year, prior to adoption of a final budget.

When the State appropriation is determined, trustees then will be able to adopt a revised budget for 1978-79, including adjustments for salary and wage increments. The hope is that this can be done at the trustee meeting in July.

The salary increases would then be reflected in the July pay checks.

Penn State's appropriation has been approved by the House and is now before the Senate, which is expected to act during June.

Behrend to host Joyce Colloquium

The Behrend College will be hosting a James Joyce Colloquium 1978: New Directions in Joyce Studies June 14-16. The colloquium will bring together some of the country's most noted Joyce scholars.

Dr. Archie K. Loss, associate professor of English and head of the Division of Arts and Humanities at Behrend, is the director of the colloquium, which will include the presentation of papers and panels on selected Joyce topics.

Dr. Michael Begnal, professor of English at University Park, is among those participating. His paper is titled "Eimegan's Wake and the Relevance of Plot."

Joyce Colloquia have been held for a number of years and now alternate with the international Joyce Symposia. The Colloquia are held in even-numbered years, the Symposia in odd. All participants in this colloquium have

published significant work on Joyce during the last five years.

Registration for the colloquium will be from noon to 5 p.m. on June 14. Further information is available by calling Dr. Loss at Behrend at 814-898-1511.

Publications data due from faculty

Members of the faculty who wish their publications and professional activities listed in the University's annual bibliographies should send this information to their department heads, research deans, or intercollege research unit directors.

Detailed instructions for the submission of these listings are given in a May 1 memo from Dr. R. G. Cunningham, vice president for research and graduate studies. Copies of this memo are available from department heads or research deans.

Commonwealth Campus faculty should send their listings to the department head at University Park, with an informal copy

(Continued on page 6)

McMurty, Franz, Cahir elected to Senate posts

Dr. George W. McMurty, professor of electrical engineering, is the new chairman-elect of the University Faculty Senate. Dr. George W. Franz, assistant professor of history at the Delaware County Campus, won the balloting for the position of secretary.

Senators also elected Dr. John H. Cahir, associate professor of meteorology, to the Faculty Advisory Committee. He will serve until 1981.

Dr. Lee W. Saperstein, section head and professor of mining engineering, is the 1978-79 Senate chairman.

A full report on the June 6 meeting will appear next week in INTERCOM. The text of Thomas E. Daubert's remarks to the Senate on the completion of his term as chairman appears on page 6.

Penn Staters

Dr. Helen A. Guthrie, professor of nutrition, has been selected to receive the 1978 Borden Award for her outstanding work in nutrition research and education. The \$1,000 award and a gold medal will be presented to Dr. Guthrie next month at the annual meeting of the American Home Economics Association in New Orleans.

Director of Penn State's Nutrition Information and Resource Center, Dr. Guthrie is one of the few nutritionists engaged in basic research who at the same time seeks ways of applying study results to the day-to-day nutrition needs and problems of the world's populations. Her most recent research has focused on developing methods to evaluate people's nutritional status and studying nutritional status as a predictor of nutritional risk.

Dr. Guthrie has a B.S. in home economics from the University of Western Ontario, her M.S. in nutrition and biochemistry from Michigan State, and a Ph.D. in physiology from the University of Hawaii. She is the author of two books, *Introductory Nutrition and Programmed Nutrition*. Dr. Guthrie has been president of the Society for Nutrition Education and serves on the Food and Nutrition Board of the National Research Council and the National Nutrition Consortium.

Floyd B. Fischer, vice president for Continuing Education, received the Julius M. Nolte Award, recognized generally as the highest national honor in the continuing education profession, at the recent annual meeting of the National University Extension Association in Indianapolis. The award is presented in recognition of unusual and extraordinary contributions to the cause of continuing education at the university level.

At the same meeting, **Dr. Robert Stefanak**, Earth and Mineral Sciences' associate dean for Continuing Education, was presented the Faculty Service Award. He was recognized for his efforts in combining teaching, research and continuing education functions.

Helmut J. Golatz, professor and head of labor studies, was one of four persons named by President Carter to membership on the National Advisory Council on Extension and Continuing Education. His term extends to June 30, 1980. The council advises the Secretary of Health, Education and Welfare and the Commissioner of Education.

Dr. Robert M. Smith, assistant provost and professor of special education, has been appointed dean of the College of Education of Virginia Polytechnic Institute and State University.

Dr. Smith earned his B.S. from the University of Maryland and his master's and D.Ed. degrees at the University of Illinois. Before coming to Penn State in 1967, he had held faculty positions at the Universities of Florida, Pittsburgh, and Delaware. He also served for a year as an American Council on Education Fellow in academic administration.

Dr. Smith has written eight books and numerous monographs and journal articles, principally on mental retardation and left palate rehabilitation. He is editor of the McGraw-Hill Series in Special Education and is a Fellow of the American Association on Mental Deficiency.

Dr. Arnulf Muan, professor of mineral sciences and associate dean for research in Earth and Mineral Sciences, recently received the American Ceramic Society's 1978 John Jeppson Award. The award recognizes distinguished scientific, technical or engineering achievements in ceramics.

Dr. T. M. Kando, associate professor of recreation and parks, presented a paper at this year's World Congress of Sociology in Uppsala, Sweden. His topic was "Cultural Action and Cultural Free Enterprise."

From left: Dr. Fagan, President Oswald, Dr. Keiper.

Dr. Edward R. Fagan, professor of education, and **Dr. Ronald R. Keiper**, associate professor of biology at Mont Alto, received the Christian R. and Mary F. Lindback Awards for Distinguished Teaching at spring term commencement. The awards consist of a plaque and a check for \$1,000.

Dr. Fagan holds B.S. and M.S. degrees from the University of Wisconsin and a D.Ed. in the teaching of English from Teachers College, Columbia University. He joined the Penn State faculty in 1962 after serving as associate professor of education at SUNY-Albany.

At Penn State, Dr. Fagan used modular course-content organization to provide prospective teachers with a model for individualizing instruction and developed materials for the analysis of marginalia in freshman composition. In the area of course improvement, he developed a new course, "Selected Problems in the Teaching of Contemporary English," and re-designed methods course contents to provide materials for slow learners in English.

The author of several textbooks, Dr. Fagan, during the past year, taught an innovative course, "Literature through Science," to non-guaged sophomores, juniors and seniors in the State College

Area School District Alternative Program as a teaching model for prospective teachers and interested colleagues.

In nominating Dr. Keiper for the Lindback Award, students and faculty cited him as "a gifted, devoted teacher who understands that good teaching is more than a collection of communication skills . . ." They also emphasized his knowledge of his field, his ability "to expand on the teaching material used for any specific course" and his encouragement of independent research activities on the part of students.

Dr. Keiper joined the Penn State faculty in 1968. A graduate of Muhlenberg College, he received an M.S. in wildlife biology and Ph.D. in zoology from the University of Massachusetts.

At Mont Alto, Dr. Keiper's course innovations have made his classes among the most popular on campus. He created special laboratories on the "vertebrate skeletal system" and "the biological effects of pollution"; developed project requirements for BI SC 3, Man and His Environment, which fit into individual majors; arranged various field trips; and established campus birding and bird-banding groups.

His recent research has focused on the feral ponies at Assateague Island.

Dr. Frank Anthony, who has served on the faculty since 1950, will retire July 1 as professor emeritus of agricultural education.

He holds three Penn State degrees, B.S. '34, M.S. '49 and Ph.D. '56. From 1934 to 1943, he was on the staff of the National Farm School.

Dr. Anthony has been active in promoting safety education through the school systems of the State. The Pennsylvania Game Commission on May 21 presented him with its highest award, the Senior Wildlife Conservation Award, recognizing his dedication to wildlife conservation and his work in hunter education.

He was also cited by the Pennsylvania Rural Electric Association, which named him "Man of the Year" in 1969 for his work in developing educational programs for the efficient use of electricity and in conservation of energy. In 1972, he was awarded the American Farmer Degree in Kansas City by the National Future Farmers of America.

Dr. and Mrs. Anthony plan to maintain their residence in State College.

Ben Morgan, professor of animal science extension, will retire June 30 with almost 22 years of service to the University. Prior to his appointment to the College of Agriculture faculty, Prof. Morgan served 21 years on the West Virginia Cooperative Extension Service staff.

A native of Fairmont, W. Va., he received an A.B. from Fairmont State College and a B.S. in animal husbandry from West Virginia University.

As Penn State Extension animal scientist, Mr. Morgan played a major role in the development of the Pennsylvania Livestock and Allied Industries Association and helped set up the Keystone International Livestock Exposition. He was also instrumental in the reorganization of the Pennsylvania Sheep and Wool Growers' Association and in establishing the Pennsylvania Meat Animal Evaluation Center.

The author of many livestock publications, Prof. Morgan was named an Honorary Fellow of the American Society of Animal Science in 1976. He was named Pennsylvania's Livestock Man of the Year in 1975.

Dr. Robert J. McIntyre, assistant professor of economics, recently served as special advisor to a World Health Organization expert meeting on Research in Adolescent Fertility in Europe, held in Warmünde, German Democratic Republic. Dr. McIntyre presented a paper on the "Economic and Social Determinants of Fertility in Europe."

Dr. Norman Freed, associate professor of physics and assistant dean for resident instruction in the College of Science, recently spent three weeks conducting research and lecturing in Europe. He presented a series of seminars on "Pion-Nucleus Interactions in the Near Threshold Region" at the Deutsches Elektronen Synchrotron Laboratory (DESY) in Hamburg, West Germany, and at the Institute for Nuclear Physics of the University of Lund, Sweden. He also presented invited colloquia at the Niels Bohr Institute of the University of Copenhagen, Denmark; University of Stockholm, Sweden; International Centre for Theoretical Physics, Trieste, Italy; and the Swiss Institute for Nuclear Research, Zurich.

Dr. Howard B. Palmer, professor of energy science and associate dean of the Graduate School, has been appointed to the advisory board of the Department of Energy's new Combustion Research Facility.

Dr. E. Willard Miller, associate dean for resident instruction and professor of geography in Earth and Mineral Sciences, has been elected a fellow of The Explorers Club. Recognized as one of the world's most distinguished scholarly societies, The Explorers Club has served since 1904 as an international focal point in the search for new knowledge.

Jan S. Prybyla, professor of economics, presented a paper on "Patterns of Industrial Development" at an international symposium on Chinese Policies Since the Death of Mao held at the University of the Saar in Saarbrücken, West Germany. The symposium was sponsored by Saar University and the European Consortium for Political Research. Prof. Prybyla also participated in the seventh Sino-American Conference on Mainland China held recently in Taipei, Taiwan.

Obituary

Eleanor D. Wilson, an assistant professor of physics at Ogontz, was killed in an automobile accident on May 23 in Philadelphia. She was 53 years old. Mrs. Wilson, a native of Philadelphia, joined the Campus faculty in 1958. She held B.S. and M.A. degrees from Temple University and worked as an engineer with General Electric during World War II. At Ogontz, she wrote and taught a special course on the Physics of Energy for students with no technical background.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

SUMMER TERM 1978

Thursday, June 8

Continuing Education registration, 1-8 p.m., Room 101 Kern.
London Bus schedule: Monday-Friday, 1:30 and 2:30, leaves from HUB main entrance, throughout term.

Friday, June 9

Registration (10 week term), 8 a.m.-5 p.m., IM 846g.

Continuing Education registration, 9 a.m.-5 p.m., Room 101 Kern.

Pre-examination in German for advanced-degree candidates.
HUB Craft Center course registration, through June 17. Friday, 7-10 p.m., Saturday, 10 a.m.-6 p.m., Sunday through Thursday, noon-5 p.m., Room 312 HUB.

Sunday, June 11

Astronomy Open House, 9-11 p.m., roof of Davey Lab. See the moon, Mars, Saturn, star clusters and the Ring Nebula. Also astronomy software sale.

Week of June 12

Monday, June 12

Summer term classes begin, 8 a.m.

Wednesday, June 14

Sigma Delta Epsilon, Graduate Women in Science, luncheon meeting. Andrea Mastro, student in biophysics, on "Tumor Promoters and Lymphocyte Activation," noon, Room 101 Kern.

Commonplace Theatre, *Captain Blood*, 7:30 and 9:30 p.m., Room 112 Kern.

Friday, June 16

Last date for registering with foreign language departments (other than French and Spanish) for written language examinations. Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, June 17

Penn State Open, chess games, all day, Room 301 HUB.

Cinema Internationale, *Magical Mystery Tour*, a 1967 Beatles TV Special, and *Hendrix Plays Berkeley*, documentary of a 1970 performance, two complete showings, 8 and 10 p.m., Room 112 Kern.

Sunday, June 18

Penn State Open, chess games, all day, Room 301 HUB.

Free U course registration, 1-6 p.m., HUB ballroom.

Cinema Internationale, *Magical Mystery Tour* and *Hendrix Plays Berkeley*, 8 and 10 p.m., Room 112 Kern.

Week of June 19

Monday, June 19

Free U course initiators workshop, 8-10:30 p.m., HUB reading room.

Colo Slide Club meeting, 7:30 p.m., Room 112 Kern.

Wednesday, June 21

Late registration deadline (10 week term). Add deadline (10 week term). Commonsplace Theatre, *Bananas*, 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, June 22

Festival Theatre, Neil Simon, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Friday, June 23

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Spectrum, An Evening with Gordon MacRae, 8 p.m., Eisenhower Auditorium.

Saturday, June 24

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Sunday, June 25

Festival Theatre, *The Sunshine Boys*, 7:30 p.m., The Pavilion Theatre.

Week of June 26

Monday, June 26

Registration (8 week term), 1-5 p.m., Shields Bldg. lobby.

Last date for August graduates to activate diploma cards in Registrar's Office and pay theses fees at Bursar's Office.

Tuesday, June 27

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Wednesday, June 28

Commonsplace Theatre, *Play It Again, Sam*, 7:30 and 9:30 p.m., Room 112 Kern.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Spectrum, The Enick Hawkins Dance Company, 8 p.m., Eisenhower Auditorium.

Thursday, June 29

Pass/fail (10 week term).

Festival Theatre, Hugh Wheeler and Leonard Bernstein, *Candide*, 8 p.m., The Playhouse.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Friday, June 30

Pass/fail (10 week term).

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Saturday, July 1

Last date for August graduates to deliver doctoral theses to committee.

Behind the Scenes of *The Sunshine Boys*, 2 p.m., Pavilion Theatre. Free tickets at The Playhouse boxoffice.

Cinema Internationale, *Allegro Non Troppo*, animated film, 8 and 10 p.m., Room 112 Kern.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Sunday, July 2

Festival Theatre, *The Sunshine Boys*, 2 p.m. and 7:30 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 7:30 p.m., The Playhouse.

Week of July 3

Monday, July 3

Drop deadline (10 week term).

Course repeat deadline (10 week term).

Pass/fail (10 week term).

Preregistration deadline (fall term).

Cinema Internationale, *Allegro Non Troppo*, 8 and 10 p.m., Room 112 Kern.

Tuesday, July 4

Independence Day, no classes.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Wednesday, July 5

Late registration deadline (8 week term).

Add deadline (8 week term).

Last date for written foreign language examinations (other than French and Spanish) for advanced-degree candidates.

Commonsplace Theatre, *One Day in the Life of Ivan Denisovich*, 7:30 and 9:30 p.m., Room 112 Kern.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Thursday, July 6

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Friday, July 7

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Spectrum, The Romero Trio, 8 p.m., Eisenhower Auditorium.

Saturday, July 8

Last date for final oral doctoral examinations for August graduates.

Last date for August graduates to deliver masters theses or papers to adviser.

Behind the Scenes of *Candide*, 2 p.m., The Playhouse. Free tickets at The Playhouse boxoffice.

Cinema Internationale, Marguerite Duras, *Nathalie Granger*, French with English subtitles, 8 and 10 p.m., Room 112 Kern.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Sunday, July 9

Festival Theatre, *The Sunshine Boys*, 2 p.m. and 7:30 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 2 p.m. and 7:30 p.m., The Playhouse.

Opening reception for the CPFA exhibit, "Contemporary American Art," 5:30-7:30 p.m., Museum of Art.

Week of July 10

Monday, July 10

Cinema Internationale, *Nathalie Granger*, 8 and 10 p.m., Room 112 Kern.

Tuesday, July 11

Pass/fail (8 week term).

Opening Ceremonies for the 12th Annual Central Pennsylvania Festival of the Arts, 7:30-10 p.m., Allen Street Mall.

CSA Council meeting, 7 p.m., Room 101 Kern.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Wednesday, July 12

Pass/fail (8 week term).

Sigma Delta Epsilon, Graduate Women in Science luncheon meeting. Linda Deford, student in genetics, on "Turkey Parthenogenesis and Haplids," noon, Room 101 Kern.

CPFA Children's Events, campus and town locations.

Commonsplace Theatre, *The Longest Yard*, 7:30 and 9:30 p.m., Room 112 Kern.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Spectrum, The Pennsylvania Ballet, program for a young audience, 8 p.m., Eisenhower Auditorium.

Thursday, July 13

Drop deadline (8 week term).

Course repeat deadline (8 week term).

Pass/fail (8 week term).

12th Annual Central Pennsylvania Festival of the Arts, through July 16, campus locations and Allen Street Mall.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Spectrum, The Pennsylvania Orchestra, Pops Concert, 8 p.m., Eisenhower Auditorium.

Friday, July 14

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Cinema Internationale, Herzog, *Fata Morgana* (1970), German, 8 and 10 p.m., Room 112 Kern.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Spectrum, The Pennsylvania Ballet, 8 p.m., Eisenhower Auditorium.

Saturday, July 15

IATIS, 4th Annual Penn State Fiddlers' Competition, noon, CPFA Tent, Old Main lawn.

An Evening of African Music and Fashions, 7:30 p.m., Walnut assembly room, Robeson Cultural Center.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Spectrum, The Pennsylvania Ballet, 8 p.m., Eisenhower Auditorium.

Sunday, July 16

Festival Theatre, *Candide*, 2 p.m. and 7:30 p.m., The Playhouse.

Week of July 17**Monday, July 17**

College of Education/Phi Delta Kappa Lecture. Caryl M. Kline, Pa. Secretary of Education, will speak, 2:20 p.m., Room 112 Kern. Cinema Internationale, *Fata Morgana*, 8 and 10 p.m., Room 112 Kern.

Wednesday, July 19

Commonsplace Theatre, *The President's Analyst*, 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, July 20

Festival Theatre, Preston Jones, *Lu Ann Hampton Lattery Oberlander*, the second play of *A Trax Trilogy*, 8 p.m., The Pavilion Theatre.

Friday, July 21

Board of Trustees meeting at Hazleton. College of Education/Phi Delta Kappa Lecture. Stuart Forth, Dean of University Libraries, on "A View from the Bridge: Learning in Libraries 1980, and Thereafter," 12:45 p.m., Room 112 Kern. Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre. Spectrum, Broadway a la Carte, 8 p.m., Eisenhower Auditorium.

Saturday, July 22

Board of Trustees meeting at Hazleton. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Sunday, July 23

Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 7:30 p.m., The Pavilion Theatre.

Week of July 24**Monday, July 24**

Last date for August graduates to deliver theses to Graduate School Office. Last date for Departments to certify to Graduate School completion of required papers for August graduates.

Last date for August graduates to order cap, gown and hood locally.

First day for signing Fall Term NDSL and University Long Term Loans, Room 108 Shields. Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, July 25

College of Education/Phi Delta Kappa Lecture. Leila V. Moore, education, on "The Affective Domain: A Diagnostic Aid to Learning," 11 a.m., Room 112 Kern. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Wednesday, July 26

Commonsplace Theatre, *They Shoot Horses, Don't They?* 7:30 and 9:30 p.m., Room 112 Kern. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Thursday, July 27

Fixed date for meetings involving Commonwealth Campus faculty. College of Education/Phi Delta Kappa Lecture. Helen I. Snyder, educational psychology, on "Basic Skills: The Tip of an Iceberg?" 3:55 p.m., Room 112 Kern. Festival Theatre, Samuel Gallu, *An Offer You Can't Refuse*, World Premiere, 8 p.m., The Playhouse.

Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Friday, July 28

Fixed date for meetings involving Commonwealth Campus faculty. Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse. Spectrum, Loretta Lynn Show, starring Loretta Lynn and the Coal Miners, 7 and 9 p.m., Eisenhower Auditorium. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Saturday, July 29

Behind the Scenes of *Lu Ann Hampton Lattery Oberlander*, 2 p.m., Pavilion Theatre. Free tickets at The Playhouse boxoffice. Cinema Internationale, Tavernier, *Let Joy Reign Supreme*, French with English subtitles, 8 and 10 p.m., Room 112 Kern. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Sunday, July 30

Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 2 p.m. and 7:30 p.m., The Pavilion Theatre. Festival Theatre, *An Offer You Can't Refuse*, 7:30 p.m., The Playhouse.

Week of July 31**Monday, July 31**

Cinema Internationale, *Let Joy Reign Supreme*, 8 and 10 p.m., Room 112 Kern.

Tuesday, August 1

Bloodmobile, 9 a.m.-5 p.m., HUB ballroom. Commonsplace Coffeehouse, *An Offer You Can't Refuse*, 8 p.m., The Playhouse. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Wednesday, August 2

Commonsplace Theatre, *O Lucky Man*, 7:30 and 9:30 p.m., Room 112 Kern. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Thursday, August 3

Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Friday, August 4

Square Dance Festival, 8 p.m.-midnight, HUB. Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Saturday, August 5

Square Dance Festival, 9 a.m.-midnight, HUB. Behind the Scenes of *An Offer You Can't Refuse*, 2 p.m., The Playhouse. Free tickets at the boxoffice.

Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 8 p.m., The Pavilion Theatre.

Sunday, August 6

Festival Theatre, *An Offer You Can't Refuse*, 2 p.m. and 7:30 p.m., The Playhouse. Festival Theatre, *Lu Ann Hampton Lattery Oberlander*, 2 p.m. and 7:30 p.m., The Pavilion Theatre.

Week of August 7**Monday, August 7**

Late drop deadline (10 and 8 week terms). College of Education/Phi Delta Kappa Lecture. Robert L. Shrigley, education, on "Strategies in Classroom Management," 8 a.m., Room 112 Kern. Last day for signing Summer Term NDSL and University Long Term Loans, Room 108 Shields.

Tuesday, August 8

Japanese Teachers Program, Slide Contest, People/Places, 7:30 p.m., Room 112 Kern. All invited. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse.

Wednesday, August 9

Sigma Delta Epsilon, Graduate Women in Science luncheon meeting, noon, Room 101 Kern. Frances Pannebaker, student in agronomy, on "Soil and Waste Monitoring for Establishment of Vegetative Cover on Fly Ash Disposal Areas." Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse.

Thursday, August 10

Cinema Internationale, Orson Wells, *F for Fake*, 8 and 10 p.m., Room 112 Kern. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse.

Friday, August 11

Commonsplace Theatre, *White Heat*, 7:30 and 9:30 p.m., Room 112 Kern. Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse.

Saturday, August 12

Last date for submitting petition to Records Officer to graduate in absentia in August. Commonsplace Theatre, *White Heat*, 7:30 and 9:30 p.m., Room 112 Kern. Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse.

Sunday, August 13

Festival Theatre, *An Offer You Can't Refuse*, 2 p.m. and 7:30 p.m., The Playhouse.

Week of August 14**Monday, August 14**

Cinema Internationale, *F for Fake*, 8 and 10 p.m., Room 112 Kern.

Tuesday, August 15

University Faculty Senate Council meeting, 2:10 p.m., Room 101 Kern.

Wednesday, August 16

Commonsplace Theatre, *Slither*, 7:30 and 9:30 p.m., Room 112 Kern.

Friday, August 18

Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Week of August 21**Monday, August 21**

Summer term classes end, 9:55 p.m. Early registration for fall term, 8:30 a.m.-4:30 p.m., Room 112 Shields, through Friday, August 25. Last day for signing Summer Term Emergency Loans, Room 108 Shields. Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Tuesday, August 22
Final examinations.

Wednesday, August 23
Final examinations.

Thursday, August 24
Final examinations.

Sunday, August 27
Commencement.

Exhibits

Earth and Mineral Sciences Museum
Open Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m. Closed Mondays and main legal holidays. Steidle Bldg.

Frost Entomological Museum
Open 9 a.m.-noon, 1-4:30 p.m. weekdays. Live aquatic insects; live seasonal insects. Room 102 Patterson.

Hammond Gallery

William Mayer, MFA Thesis Exhibition, June 25-30. CPFA Exhibit, July 11-16.

HUB Gallery

Art Alliance Juried Exhibit, July 1-31.

Kern Commons Gallery

Bonnie Detsch, jewelry, through June 24. Don's Coyle, oil paintings; Weislaw Zdaniewski and Dennis Charnier, photographs, June 24-July 8. CPFA Invitational Photography Exhibit Stamp Show, July 8-22.

David Armstrong, water colors, July 8-29. George Lavanish, wildlife drawings, July 22-August 5.

Paul Flexner, oil paintings, July 29-August 12. Surinam Wood Carvings, July 29-August 19. Daphne Sola, prints, August 5-19.

Museum of Art

Open noon-5 p.m. daily. Closed Mondays. Tours on Sundays at 1:30 p.m. Robert Kulicke, painter, designer, craftsman, through June 25.

Special exhibition on Jerome Witkin's *Painter's Crossing: American Paintings from the Permanent Collection*, through July 2.

Contemporary American Prints from the Permanent Collection, through September 10. Mauricio Lasansky: A Retrospective Exhibition of Prints and Drawings, July 9-August 20.

CPFA exhibition of Contemporary American Art, selected by Paul Shanley, July 9-September 17.

Pattee Galleries

David Balas, photographs, "Tribute to John O'Hara," East Corridor Gallery, through June 20.

Thomas Bewick, "British Birds," main lobby, through June 20.

Robeson Cultural Center, Walnut Bldg.
Billie Veitch-Clemon, silk screen photos illustrating African proverbs, June 17-July 15. Exhibit of African fashions, July 17-July 31.

Sackett Gallery

PSU Architecture students, "The Architectural Component of Light," drawings, photos and models, through summer term.

From the Trustee Docket

Admissions dean to be appointed

Penn State's recruitment and admissions functions and programs will be integrated into a single Office of Admissions, reporting directly to the Provost, and a Dean of Admissions will be named to serve as the administrative head of the new office. Authorization for these actions was given by the trustees.

The Dean of Admissions, a new position, will have overall responsibility for admissions and recruitment programs that relate to all Penn State campuses.

In a report to the Board, Provost Edward D. Eddy said that Penn State's past and present efforts in undergraduate student recruitment and admissions have been effective and highly efficient.

While many other colleges and universities have faced enrollment declines, he noted, Penn State has been able to enroll a full class of qualified students each year.

However, Dr. Eddy told the Board, a projected steady decline in the number of students reaching college age throughout the 1980s and 1990s is expected to bring about significant changes in the admissions environment.

"In light of this," Dr. Eddy continued, "special efforts will have to be made to bring about the opportunities of higher education to all students. Since prospective students want and expect full information about the University's many programs and locations, communication with them through effective publications, correspondence and personal contact is becoming an increasingly important part of the admissions program."

A carefully coordinated admissions and communication program, he said, also can provide better balance in student choice and enrollment among fields of study.

Currently, the responsibility for relations with prospective students at the University is divided among several units, each reporting to different executive officers.

Pointing out that competition for students, especially the most qualified, will become intense, the Provost said Penn State's admissions effort will have to meet new tests and challenges in identifying, attracting, and communicating with able students.

"Our newly integrated admissions program is intended to provide the capacity to meet these new demands through an effective and coordinated approach," he concluded.

Private support increases

Progress toward the goal of doubling private support of the University from alumni and friends was reviewed by the Committee on Educational Policy, and it was announced that two major projects of the Penn State Fund Council exceeded their fund-raising goals.

In a report, Dr. Stanley O. Ikenberry, senior vice president for administration, said that private support for the Human Resources Bldg. at the Berks Campus and support for the Engineering Activities Center at University Park have met or surpassed Fund Council goals.

A successful community capital fund campaign led by Berks Campus Advisory Board members raised 109 percent of its \$1.5 million goal for a proposed multi-purpose facility that will feature a physical education-convention unit.

It was reported that more than \$266,000 has been contributed or pledged for the Engineering Activities Center.

The Penn State Fund Council identified high-priority needs of the University and in July 1976 organized special appeals for the projects. At the same time, ongoing private fund raising was continued and expanded in order to increase private support to the University significantly.

Dr. Ikenberry also reported on the status of four additional special projects:

— Museum of Art Endowment: Pledges or contributions totaling more than \$500,000 have been received toward a goal of \$2 million. The endowment fund will be used to assemble outstanding exhibitions of works, attract visiting lecturers, offer unique educational experiences in the arts for students, extend the resources of the Museum to greater numbers of people, build a high-quality permanent collection, and provide proper conservation of the works of art.

— Indoor Sports Complex: The project involves renovating the ice pavilion and converting the space into a sports complex which would provide an indoor track and practice area for varsity and intramural sports. Contributions and pledges totaling some \$440,000 have been received toward the \$1.5 million goal.

— Scholarships and Fellowships: Since July 1, 1976, gifts totaling \$481,157 have been received for the endowed scholarship programs, an ongoing project designed to attract and retain promising students and to help meet the needs of deserving students.

— Chairs, Professorships and Fellows: Support in this area totals \$435,790. Gifts of this kind will provide opportunities for distinguished faculty members to make outstanding contributions.

Phase I plans for sports complex okayed

Support from alumni and friends will make possible ultimate construction of a new Indoor Sports Complex for Penn State.

Final plans for the first phase of this project were approved by the University's Board of Trustees at its May 26 meeting. The Board also designated as the architectural firm to design the total Sports Complex the firm of Deeter Ritchey Sippel Associates of Pittsburgh.

In taking these actions, the trustees authorized the expenditure of a sum not to exceed \$202,885 for construction of Phase I and a sum not to exceed \$235,000 for architectural design costs of the total complex. As of the end of April, \$440,116 has been contributed for the complex by alumni and friends of Penn State.

In Phase I, a concrete base covered by an artificial surface will be installed on the present floor of the University Ice Pavilion to begin conversion of the facility for indoor sports use.

According to Dr. Robert J. Scannell, dean of the College of Health, Physical Education and Recreation, the Indoor Sports Complex is needed to provide space for indoor activity for football,

baseball, softball, soccer, lacrosse, field hockey and track, when outdoor practice fields are not useable.

Dean Scannell said the phasing of the project has been approached primarily for two reasons: the urgent need for indoor activity space for varsity teams and intramurals and a desire to limit the time during which the ice skating programs would have to be interrupted.

Estimates indicated that approaching the total project without phasing might have interrupted the ice skating program for two or more years.

Dean Scannell also said that the project will enhance several other aspects of programs of the College of Health, Physical Education, and Recreation. It will provide more space availability for recreational activities and for specialized classes. In addition to athletics, recreational, and physical education activities, it is anticipated that the complex will also be used periodically by other groups, such as the Blue Band and the R.O.T.C.

Plans approved for Engineering Center

Approval was given sketch-preliminary plans for renovations to the glass-enclosed area that connects Hammond Bldg. and Sackett Bldg. The area will serve as an Engineering Activities Center, which will be used for such functions as seminars, informal meetings, conferences, and engineering honor society activities.

Funds were contributed by private companies, alumni, and the Penn State Engineering Society.

Modifications involving three levels of the area will include the addition of insulation, air conditioning, furnishings and lighting.

After completion, the Center will offer a more suitable meeting place for students, faculty and alumni. Improved entrance to the College of Engineering and the offices of the dean, as well as the creation of an information center will be provided. The exhibition hall will be enhanced, as will the aesthetics of a prominent focal point of the University.

Editor's Note: A corporate gift of \$50,000 from General Motors to Penn State was announced last week. The funds will be used to help defray costs for renovations to the Hammond Building.

Graduate program changes

A new program in Engineering Science, administered through the Department of Engineering Science and Mechanics, will admit its first students in the upcoming fall term.

With the addition of this program, Penn

State becomes the only institution in Pennsylvania offering graduate work in Engineering Science. The University's undergraduate degree program in the field is also the only one of its kind in the Commonwealth.

"The graduate program will couple mathematical analysis with the sciences and engineering sciences to allow a level of flexibility and general training not now available," Dr. John R. Mentzer, head of the Department of Engineering Science and Mechanics, explained.

Trustees also heard a report on a decision to discontinue the Master of Nursing degree program. The Department of Nursing will continue to offer the Master of Science degree.

The Master of Nursing was originally a terminal professional degree. Its objective was to prepare the nurse for practice in various settings, but it lacked a research component.

The faculty of the Department of Nursing felt that, in addition to a strong clinical background, all nurses require a basic knowledge of research and research methods.

"This dual focus can best be achieved within the Master of Science Program," according to Dr. Janet Williamson, head of the Department of Nursing.

New options offered

A new Associate Degree in Science will be offered this fall. It is designed to provide a general two-year education in science and to prepare students for potential certification in professional programs in medical-related fields.

The 64-credit program consists of 52 credits in required courses, plus 12 credits in courses dealing with biological, mathematical and physical sciences. The degree will be offered at six campuses—Altoona, Hazleton, McKeesport, New Kensington, Ogontz and Shenango Valley.

In the College of Earth and Mineral Sciences, the mining engineering major will be split into two options. The mining option will deal mainly with the extraction of mineral deposits; the mineral processing option will deal with the problems of concentrating and refining minerals.

Also in E&MS, the ceramic science major will become the ceramic science and engineering major. This has been done to recognize the engineering aspects of the program and its accreditation by the Engineering Council for Professional Development.

Still another change in major is in the College of Agriculture, where the animal science major will be the animal bioscience major. The new title more accurately describes the content and goals of the major, which prepares students for careers or advanced study in areas of animal agriculture requiring in-depth knowledge of the natural sciences.

A final change affects a program in the College of Human Development. The functional apparel design and management emphasis (clothing studies) will be phased out as soon as students currently in the program complete their degrees.

Life Sciences Bldg. named for Dr. Mueller

The late Dr. Erwin W. Mueller, who served as Evan Pugh professor of physics until his retirement with eminent rank in 1976, has been honored in the naming of the Life Sciences Bldg.

One of the University's most distinguished faculty members, Dr. Mueller in 1975 was elected to both the National Academy of Sciences and the National Academy of Engineering. Last November, the National Medal of Science was awarded posthumously to Dr. Mueller and presented by President Carter to Dr. Mueller's daughter. Dr. Mueller died on May 17, 1977.

William K. Ullrich, center, Clearfield newspaper publisher and broadcast executive and president of the Board of Trustees, received the 1978 Lion's Paw Medal Award from John Brutzman, left, president of the Lion's Paw Alumni Association, on June 3. With them is President Oswald. The award, established in 1965 by the Lion's Paw Alumni Association, honors persons who have contributed notable service to the University and fostered its traditions.

News in brief

(Continued from page 1)

to their Campus director and Commonwealth Campus dean.

Contributions should be in the department head's hands in sufficient time to reach the Office of the Vice President for Research and Graduate Studies by July 31.

The bibliography is printed in two publications. *Research Publications and Professional Activities and University Publications and Reports to Agencies*. To be included are research papers and articles, books that have been reviewed and printed by established publishers, substantive and/or final reports sent to state and federal agencies, information materials (articles and reports printed in non-standard journals), and novels, short stories, musical compositions, exhibits of fine arts, inventions, patents and any other activity that meets recognized standards of excellence in its field.

More detailed information is contained in the May 1 memo.

Trustee elections reported

Three new members have joined four re-elected incumbents for three-year terms on the Board of Trustees.

Howard O. Beaver Jr., of Reading, president and chief executive officer of Carpenter Technology Corporation, and Samuel A. Breene, of Oil City, chairman of the board and chief executive officer of Brookville Glove Manufacturing Co., Inc., were elected by county industrial society delegates. They succeeded Samuel F. Hinkle of Hershey, a Board member since 1963, and G. Albert Shoemaker of Pittsburgh, a trustee since 1957 and president of the Board from 1970 to 1973. Mr. Hinkle and Mr. Shoemaker were not candidates for re-election.

Burton L. Hetherington of Ringtown, a partner in H-I Farms, succeeds Harry R. Ulrich of Hummelstown, first named to the Board in 1969. Mr. Hetherington was elected by county agricultural society delegates, who also re-elected J. Luther Snyder of Camp Hill, master of the Pennsylvania State Grange. Mr. Snyder was first named to the Board in 1975. Mr. Ulrich was not a candidate for re-election.

Alumni of the University, balloting by mail, re-elected H. Jesse Arnelle, of San Francisco; Kenneth L. Holderman, of State College; and Helen D. Wise, of State College. They were chosen from six nominees.

Mr. Arnelle, first elected in 1969, is a trial attorney in San Francisco; Mr. Holderman, vice-president emeritus for the University's Commonwealth Campuses, has been on the board since 1975; and Mrs. Wise, representative to the Pennsylvania House of Representatives from the 77th district, has been a trustee since 1969.

Mr. Beaver, who is president of the Berks Campus Advisory Board and a member of the Alumni Council, is a 1948 graduate of Penn State.

Mr. Breene, former member of the Board of Trustees, maintains a law practice in Oil City.

Mr. Hetherington is a leader in the Commonwealth's horticultural industry.

Sports entries to be taken

Entries will be taken in the Intramural Office from Monday, June 12, until noon, Thursday, June 15, for basketball and softball. There will be both men's slow pitch softball and Co-Rec softball. Co-Rec teams must consist of five men and five women at all times.

Entries will be taken in the Intramural Office from Monday, June 19, until noon, Thursday, June 22, for tennis — men's and women's singles, mixed doubles and men's and women's racquetball singles.

For further information, call the Intramural Office at 865-5401.

Eric Hawkins and Cathy Ward in "Parson Weems and the Cherry Tree, etc."

Spectrum tickets will go on sale at Eisenhower June 13

The Erick Hawkins Dance Company will make its first appearance at University Park as part of Nittany Mountain Summer's Spectrum of Music and Dance Friday, June 28, at Eisenhower Auditorium.

The program will feature "Parson Weems and the Cherry Tree, etc.," which premiered in New York in April.

Tickets for all Spectrum programs go on sale beginning Tuesday, June 13, at the Eisenhower box office.

An Evening with Gordon MacRae opens the Spectrum series on June 23. Other programs scheduled are the Romero Trio, July 7; The Pennsylvania Orchestra Pops Concert, July 13; two performances by the Pennsylvania Ballet, July 14 and 15; a Pennsylvania Ballet Program Designed for a Young Audience, July 12; Broadway a la Carte, July 21; and two performances of the Loretta Lynn Show on July 28.

Discounts of up to 25 percent are

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., June 15. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ELECTRON MICROSCOPIST — COLLEGE OF MEDICINE, Hershey. Responsible to a professor in the Department of Pathology for the operation, care and preparation of materials for the use of the electron microscope. Bachelor's degree or equivalent, plus one to two years of directly related experience.

MEDICAL SOCIAL WORKER I — COLLEGE OF MEDICINE, Hershey. Responsible to the Social Services Coordinator to serve as part of the health care team in providing practical help and emotional support to patients and their families and assume consultation functions. A bachelor's degree in social work or in a related human services field, with one to two years of directly related experience in social work.

RESEARCH AIDE — COLLEGE OF AGRICULTURE, Hershey. Responsible for the routine inorganic and organic chemical analysis of animal tissues including (a) preparation, standardization, and testing of analytical reagents, (b) a working knowledge of atomic absorption spectroscopy for the determination of various elements in animal tissues, and (c) working knowledge of ultra-violet and light spectroscopy for the determination of various inorganic and organic chemical constituents in animal tissues. Bachelor of science degree in chemistry, biochemistry, biophysics or a closely related degree, and at least one year of research experience or directly related laboratory experience is required.

available, based on the number of events patron selects. For further information, call 863-0255.

Senate Chairman's closing remarks

Editor's note: The following is the text of retiring Senate Chairman Thomas E. Daubert's closing comments.

Since I was elected Chairman-Elect of the Senate two years ago I have been a proponent of and worked toward two major goals — the implementation, strengthening, and expansion of the faculty role in the system of shared governance which characterizes the Penn State system and the improvement of communications with all segments of the academic community: students, faculty, administration, Colleges and Campuses.

I'd like to talk about some of the accomplishments in these areas and allude to some of the areas where additional work is required.

1. INTERCOM has been used extensively and often repetitively to inform and seek input from the faculty on all items of major importance to be presented to the Senate. The response from the faculty has been spotty, but the opportunity for input has been available. The questions posed by the Senate Officers to various administrators and their answers have been published, and more are forthcoming. A faculty response section has been initiated and should be operational by fall term.

2. Over the past two years I have visited the 17 Commonwealth Campuses, Capitol Campus, Behrend College, and the College of Medicine at Hershey to discuss items of mutual academic interest with faculty, students and administrators. These visits were extremely helpful in gaining understanding of the unique and common problems and potential of the various units of the University and were mutually helpful in advancing the concepts of shared governance, as well as making the Senate leadership more responsive to the concerns of faculty at locations other than University Park.

3. Two workshops for College and Campus faculty organization chairmen were held prior to Senate meetings. Again the opportunity for discussion of mutual and individual concerns was made available.

4. Three widely-publicized discussion sessions with University Park faculty were held at various locations during the fall term. The low attendance at these sessions signified either satisfaction with the current state of affairs, complete disinterest, or irreconcilable dissatisfaction.

5. Various meetings with student groups

including student government Academic Assembly personnel and student Senators were held throughout the year, and specific issues were discussed.

6. The FAC has functioned well throughout the year in advising the President, the Provost, and the Senior Vice-President for Administration. I have had individual conferences with all the vice-presidents and other central administrators throughout the year.

I believe communication and the opportunity for practicing shared governance have been at an all-time high this year. However, while communications and the concept of shared governance at the central University level are good, problems still exist in some Colleges and at some Campuses. The necessity for College, department, and Campus faculty organizations to have full input in their advisory and consultative roles is yet to be realized in order to make the system of shared governance work. Through the constitutions and bylaws approved by the Senate and the President, College and Campus faculties are asked and empowered to be a major force in shaping academic programs and carrying out the College or Campus missions. Progress has been made at all levels, but improvement in College and Campus administrative-faculty cooperation and mutual decision making is still necessary before it can be stated that the system is really successful at the working level.

Turning to the Senate and its major legislative role on academic matters, we have accomplished much this year. At the President's Convocation last September, I spoke about major issues in baccalaureate education which many of these areas — revised BDR requirements and their essential nature, admissions requirements by College and program as related to total resources, retention and graduation standards as applied to specific curricula, and the dichotomy between maintenance of both quality and wide flexibility of programs in the '80s. We have made much progress in addressing each of these areas this year, and actually only program-by-program implementation of much of the already enacted enabling legislation remains. I see this package of legislation as a real credit to the Senate and its committees. Last year's basic skills legislation was implemented with success. The major report on the climate for research which is still evolving is an important attempt to put the place of research and the responsibilities of the various constituencies related to research in real

perspective.

What about our advisory powers? The area of promotion and tenure has been actively considered. The Faculty Affairs Committee presented several changes that to the Senate resulting in recommendations to the President for changes in PS-23 and the President and I appointed a joint committee to study the entire policy of PS-23 after three years of experience with it. A report is due in fall 1979. The question of part-time faculty, including their role and prerogatives, is undergoing study, and the insurance and fringe benefits area has been studied by a joint committee of faculty and administrators. Several assists were given in attempting to convince the legislature of the worth of Penn State to the Commonwealth of the 1977 State budget impasse.

The area of delegation of authority from the Senate to College and Campus faculty organizations received almost a full year of discussion by the Intra-University Relations Committee and provided a forensic session to the Senate. Questions such as delegation of authority and responsibility for approval of non-credit offerings to Colleges and Campuses, delegation for associate degree requirements to Campus faculty organizations or consortia of Campus organizations, and certain delegations to College organizations were discussed. However, no conclusions could be reached by many faculty, as well as College, Campus, and departmental administrators, appear unwilling to attempt to transfer any authority to those directly concerned. My greatest disappointment is the parochial attitude of many faculty and administrators, which prevents true delegation even when justified and safeguarded. In a changing market situation, I believe that more delegations are necessary for the continued health and even survival of certain of our Campuses and programs. I hope the next year will see real progress in this area.

The Committee on Planning and Development has provided major input into the beginning of new Academic Plans. I see a responsibility for me to see that the faculty to be even more influential in the coming year. As the "Plan for the 1980s" develops, many very difficult and serious decisions will be necessary for the possible contracting or no more than stable '80s. The Senate must use its collective wisdom to make a strong voice in this area. I am certain that the Penn State of the '80s has an even stronger academic stature than the Penn State of the '70s.

Penn State Intercom

News in Brief

TIAA retirement contribution rate will be increased

On behalf of each faculty or staff member who belongs to the Teacher's Insurance and Annuity Association (TIAA) retirement program, the University makes a contribution which by law is determined each year by the State Employees' Retirement Board based on an actuarial evaluation.

From July 1, 1975, through June 30, 1978, the amount of the University's contribution has been 6.64 percent of salary. That amount will be increased beginning July 1, 1978, to 7.65 percent of salary.

Shenango Valley network changed

Effective today, June 15, the new network number for the Shenango Valley Campus is 641-2337.

Pollock Road to be closed off

Monday and Tuesday, June 19 and 20, Pollock Road will be closed at Schwab Auditorium.

Calendar change

Since Kern Graduate Bldg. will only remain open until 11 p.m. during the summer months, Cinema Internationale has changed the times of its film showings. All 8 p.m. and 10 p.m. showings will be moved back to 7 p.m. and 9 p.m.

Steidle Bldg. named

The Mineral Industries Building was formally named the Edward Steidle Building at a ceremony on Saturday, June 3.

The building's name was changed in March by the Board of Trustees to honor the late Dr. Edward Steidle, dean of the School of Mineral Industries, now the College of Earth and Mineral Sciences. He was dean from 1928 until his retirement with emeritus rank in 1953.

Senate gets Basic Skills report

The University Faculty Senate heard reports on long-term policy issues, the Basic Skills Program and various insurance plans at its June 6 meeting in Kern Bldg. New Senate officers were also announced and a number of legislative items were handled during the session — the last one until September.

The Senate Committee on Planning and Development identified and commented on several long-term policy issues, including admissions, recruitment, the size and functions of the Graduate School, the hard choices ahead, the possible need for new organizational arrangements and the wisdom of defending and improving quality within the University. One aspect of the report dealt with projected declining student population pools. (The full text of the report will be published in INTERCOM.)

"The faculty should provide the vision of what we, as a University, want to be. The task of the policy planners is to reconcile that vision with the evidence of what is possible. From that, we will be able to see more clearly what we ought to be," the committee report said.

Dr. Helen I. Snyder's report on the first year operation of the Basic Skills Program is printed on page 3. In comments to INTERCOM, Dr. Snyder described her year as coordinator of the Basic Skills Program as "exploratory."

"We were looking to see if the structure would work and through the year we discovered some real organizational problems," she said.

She said she was unable to measure adequately effectiveness of Basic Skills courses in aiding passage of the retake tests and in subsequent course work because accurate data was not always forwarded by faculty members. Many reports did not separate students who took Basic Skills courses and tests from those who just showed up to take the tests. Other students were able to bypass the retake tests on the basis of faculty decisions.

"Their (faculty) motives were humane, but it hurt my data collection," Dr. Snyder

said. "It confirms what I've believed — that you can't ask teaching faculty to collect data."

Dr. Snyder said she believes that broader intake and exit tests for the Basic Skills Program are needed in all areas of baccalaureate degree requirements rather than just in English and mathematics. She also advocates a comprehensive examination to test skills prior to graduation and also, perhaps, midway through a student's degree work.

"The University has a right to ask whether or not a student has command of skills," she said.

The full report of the Joint Administrative-Faculty Committee on Insurance Matters will appear in next week's INTERCOM.

In other action, the Senate Committee on Faculty Affairs presented two recommendations to the President of the University which were approved by the Senate. The first recommendation calls for a modification to FS-23 providing that a candidate for tenure whose case terminates at the College level be notified promptly of the decision. The second recommendation proposes that a negative sixth year tenure recommendation by a dean shall not be a final decision if all previous recommendations are positive. In that instance, the case shall be sent up to the University level for review. The recommendation does not apply to Commonwealth Campus faculty where recommendations are reviewed by the DAICC as well as the College dean.

The Senate also approved a wording change in its class attendance policy. The policy now says, in part, "Instructors should also provide, within reason, opportunity to make up work for students who are obliged to miss classes for other legitimate reasons." Previously, that sentence was followed by a list of examples including jury duty, illness, or emergencies beyond the student's control. The Senate voted down a proposal to add religious holidays to the list and then proceeded to strike out the other examples also.

The Senate approved legislation by the Committee on Admissions, Records and Scheduling dealing with admissions requirements for Behrend College. The change will show Behrend as a college of enrollment for fall term, 1979. Currently, prospective Behrend students must first be admitted to any other Penn State College and then become Behrend degree candidates by formally changing colleges of enrollment.

The Committee on Committees and Rules proposed a number of procedural changes aimed at providing a consistent and operable system for the staffing of committees and improving the efficiency of conducting Senate business. All of the proposals were approved.

A proposed amendment to the Constitution and Bylaws was presented to give better Senate representation to graduate students, including medical students, outside of University Park. The change would provide for election of three graduate student senators from University Park and one from another Campus. The present version of the Constitution and Bylaws says that four graduate student senators shall be elected but specifies no location. No action was taken because constitutional changes may not be voted upon at the meeting at which they are proposed. The question will come up for a vote at the September session.

The Ad Hoc Committee on Degree Definitions proposed a description of baccalaureate degrees to be used in the undergraduate catalog. The description was approved by the Senate.

Senators were also presented with a number of additional informational reports. These included the reports of the Subcommittees on Academic Standards, Athletic Standards, Reinstatements, and Recognition of Good Teaching and Advising.

The Advisory Subcommittee to the Division of Undergraduate Studies provided a report of activities along with the Advisory Subcommittee to the University Division of Instructional

(Continued on page 4)

Senate chairman — "of, by and for" the faculty

Dr. Saperstein

Although he only assumed the official duties of Senate chairman this month, Lee W. Saperstein is in his third year as a Senate officer — a term as secretary and another as chairman-elect are behind him. His experiences as an officer and as a member of the Senate since 1972 have provided him with a definite point of view toward his role.

"I think it's very rash of a Faculty Senate Chairman to believe he will accomplish something specific in a single year that people before him haven't been able to do," he told an interviewer.

"I am very sensitive that I am the representative of the faculty. I think the faculty have opinions on the shape and structure of the University, and if I have a goal, it will be to get these opinions expressed."

The Senate officers are not "junior administrators," Dr. Saperstein notes. "We are only there for a year and are intentionally rotated to provide

representation to the faculty. No matter how little aware I may be of the mission of certain areas of the University, I still represent them."

Actually, Dr. Saperstein, a member of the faculty since 1967 and professor and section chief of mining engineering, has been closely associated with many aspects of the University's "mission." In addition, to teaching and research activities, he presides over an associate degree program in mining technology which is offered at three Campuses, as well as over \$450,000 worth of continuing education programs.

"But no one person can ever really have a finger on the structure of a University as big as Penn State," he cautions.

A native New Yorker who graduated from the Bronx High School of Science, Dr. Saperstein went on to earn his B.S. at the Montana School of Mines, and in 1963 was awarded a Rhodes Scholarship. He used it to study at Oxford University.

(Continued on page 4)

Penn Staters

Dr. Robert W. Christina, associate professor and director of the Motor Behavior Laboratory in the College of Health, Physical Education and Recreation, has been elected president of the North American Society for the Psychology of Sport and Physical Activity (NASPPA). The main purposes of the Society are (1) to encourage and promote the study of the relationship of various behavioral sciences to sport and physical activity; and (2) to improve the quality of teaching and research in sport psychology, motor development, and motor learning.

Anthony V. Galanti, associate professor of engineering at Hazleton, has received a National Science Foundation Science Faculty Professional Development Award. The award is designed to help experienced science faculty members improve their effectiveness as science teachers for undergraduate students.

Due to an error on the promotion list, the name of **Harold W. Harpster** appeared as a newly appointed research associate. He is an assistant professor of animal science.

Dr. George W. Brindley, professor emeritus of mineral sciences, has been elected to honorary membership in the French Society of Mineralogy and Crystallography. He was chosen at a special ceremony commemorating the 100th anniversary of the Society's founding, held May 19 in Paris. He is one of only ten honorary members of the Society. Dr. Brindley is known worldwide for his work on clay minerals.

Dr. Parris H. Chang, professor of political science, presented lectures last month on "U.S.-China Relations" at the Singapore Institute of International Relations and at Singapore University. His visit was sponsored by the U.S. Department of State, which also sponsored a talk by him at the Melbourne (Australia) Pacific Institute. Dr. Chang is currently on leave in Australia.

Dr. Robert L. Kabel, professor of chemical engineering, recently returned from a two week visit to Pahlavi University in Shiraz, Iran, where he presented eight lectures on topics including chemical reactor scale-up, catalytic kinetics, and natural removal of atmospheric pollutants.

Three division directors in the College of Human Development have been appointed for interim terms until June 30, 1979, according to Dr. Joseph H. Britton, acting dean of the College. **Dr. Paul O. Woolley**, who served during 1977-78 as acting director of Biological Health, will continue in the post. **Dr. Joe A. Miller** will become director of the Division of Community Development, effective July 1, when **Dr. Walter Freeman**, the current director, returns to full-time teaching and research duties. Effective Sept. 1, **Dr. Fred W. Vondracek** will become director of Individual and Family Studies, replacing **Dr. Paul Baltes**, who will be away on sabbatical leave.

Dr. A. K. Blackadar, professor and head of the Department of Meteorology, was recently appointed chairman of the boundary layer dynamics and air-sea interaction working group of the International Commission on Dynamic Meteorology. This group consists of 20 members representing 11 countries. It was established by the International Association of Meteorology and Atmospheric Physics (IAMAP) of the International Union of Geophysics and Geodesy. Dr. Blackadar is currently chairman of the U.S. National Committee of IAMAP.

Dr. W. Harry Schaffer, Extension southeast area community resource development agent, has been promoted to assistant director of the southeast Extension region. He will supervise programs in Berks, Bucks, Chester, Delaware, Lehigh, Montgomery, Northampton, and Philadelphia counties.

Dr. Gregory L. Geoffroy, associate professor of chemistry, has recently presented invited lectures on his research into the chemistry of transition metal cluster compounds to the Departments of Chemistry of the University of Minnesota, The Ohio State University, and the State University of New York at Binghamton, as well as to the research laboratories of Union Carbide Corporation, Tennessee Eastman Company, and Bell Laboratories.

Dr. John P. Hagen, professor emeritus of astronomy, has received the International Radio Consultative Committee (CCIR) Honor Award for Distinguished Contributions to the committee's international work. The award was presented to Dr. Hagen on June 7 in Kyoto, Japan, at ceremonies marking CCIR's 50th anniversary. One of the world's leading solar radio astronomers, Dr. Hagen served as chairman of CCIR's U.S. Study Group 4, which was established in 1960 to deal with problems relating to space and radio astronomy.

Dr. Theodore Kantner, assistant professor of family and community medicine at Hershey, presented a paper, "The Effectiveness of an Antihistamine in Treating Common Cold Symptoms," at the Eighth World Conference in Family Medicine-General Practice in Montreux, Switzerland. The paper was co-authored by Dr. James Crutcher, assistant professor of family and community medicine.

Dr. Richard R. Klimpel, research manager of the engineering analysis, operations research, statistics and thermal research groups of the Dow Chemical Co., has been named adjunct professor of mineral engineering. Dr. Klimpel also serves as Dow's senior consultant on particulate processes and chemical products for mining applications.

He has a B.S. degree in chemistry and mathematics and an M.S. degree in mathematics and statistics from North Dakota State University. He joined Dow in 1964, after receiving his Ph.D. degree in fuel science at Penn State.

Dr. John C. Szychalski, professor of business logistics, has been named editor of *Transportation Journal*, a quarterly periodical for academicians, government officials and executives involved with research and management in transportation and business logistics.

Dr. Frederick M. Williams, associate professor of biology, presented invited talks recently in Mainz and London. In Germany, he spoke at a session on population ecology at the International Symposium of the Academy of Science and Literature sponsored by the German Society for Research. He discussed "Single or Multiple Nutrient Limitations? A Model and Its Ecological Implications." In England, he spoke at the Microbiology Department Seminar at Queen Elizabeth College, University of London.

Dr. Richard C. Bradt, professor of ceramic science and engineering, was recently elected a fellow of the American Ceramic Society.

Dr. Peter H. Given, professor of fuel science, recently delivered the 1978 Lubrizol Lectures, sponsored by the chemistry department of Muskingum College. He spoke on "The Nature of Coal and Thoughts on Its History," and "Coal Chemistry and Coal Liquefaction."

Dr. Harmer A. Weeden is retiring this month with emeritus status as professor of civil engineering.

A member of the faculty since September 1955, Dr. Weeden taught at Bucknell University from 1939 to 1955 and served two years in the U.S. Navy on the Destroyer Escort.

In 1967, Dr. Weeden spent a year as a visiting professor of civil engineering at the University of Hawaii, and he spent a sabbatical leave at the University College, London in 1971. He returned to Europe in 1976 to teach at a summer surveying program in Lampeter, Wales.

Dr. Weeden's most recent research has been conducted through the Office of Remote Sensing of Earth Resources and focuses on the evaluation of soil and rock conditions, as well as on land use, employing computer processing of multispectral scanning data to produce thematic maps. He is the author of numerous technical articles, and of a chapter on air photo interpretation in the forthcoming book, *Remote Sensing in Geology*.

In 1975, Dr. Weeden was named "Surveyor of the Year" by the Pennsylvania Society of Professional Engineers and "Outstanding Advisor" by the College of Engineering.

Dr. Robert F. Neuhaud, coordinator of the Office of Clinical Experiences in the College of Education, is the 1978 recipient of the College's Outstanding Teaching Award. The award recognizes "outstanding performance as teacher, adviser, developer of quality instructional processes, and evoker of professional aspiration and competence."

Obituary

Dr. Lawrence S. Darken, who retired as professor of mineral science last year, died June 7. A member of the National Academy of Sciences, Dr. Darken had been director of the Edgar C. Bain Laboratory for Fundamental Research at U.S. Steel before joining Penn State's faculty in 1972. He was born Sept. 18, 1909, in Brooklyn, N.Y.

Three chosen for Provost's fellowships

Three faculty members have been chosen to receive Provost's fellowships to attend the Summer Institute for Women in Higher Education sponsored by Bryn Mawr College and Higher Education Resource Services-Mid Atlantic (HERS).

Provost Edward D. Eddy said that participants were chosen from a group nominated by University deans and directors of Penn State's Campuses.

Chosen to attend the Institute are Barbara Bleau, assistant professor of mathematics at Capitol Campus; Dr. Carol Cartwright, associate professor of education at University Park; and Dr. Marietta Raneri, assistant professor of English at Delaware County.

The Institute is designed for professional women in higher education who wish to prepare themselves for further administrative responsibilities. The session will be held July 5-28. Emphasis will be on academic governance, finance and budgeting, management skills, administrative uses of the computer, and professional development.

Professor Bleau serves as undergraduate coordinator for the Business Administration program at Capitol Campus. She received the 1976 James Jordan Award for Teaching Excellence and recently completed a project in which she produced a remedial mathematics workbook. She received her B.A. in mathematics from Ohio Wesleyan and her M.A. from Case Western Reserve University. She has also done graduate study at the University of Illinois.

Dr. Cartwright is completing work on several books and has an extensive record of publication and research. Along with her husband, Dr. G. Phillip Cartwright, professor of special education, she co-authored a book, *Developing Observation Skills*, published in 1974. She has also produced handbooks on identification of handicapped children and diagnostic teaching of pre-school and primary school children. She received both her M.Ed. and her Ph.D. degrees in special education from the University of Pittsburgh.

Dr. Raneri was 1977-78 chairman of the Delaware County Campus Faculty Senate and serves on the Campus Budget Advisory Board. She has done research into the writing of Donis Lessing and is presently developing a new Liberal Arts course dealing with "Investigating Change." She earned both the M.A. and Ph.D. degrees in English from the State University of New York.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

A Report on the

Basic Skills Program's First Year

I shall try to make two points today: the current status of the students identified as being in the Basic Skills categories, and the revised view of the dimensions of the "Basic Skills problem" occasioned by some analyses of the relationship of SAT scores to placement test scores.

Table 1a includes data already presented to you in November by the chairman of the Committee on Basic Skills. It adds the numbers of Basic Skills students located in the winning and losing groups. Proportions have been spring adjusted significantly, only the total number changed, the numbers of students in each Basic Skill category into a percentage. You will note that the total number of students in Basic Skills remains at 25 percent of the incoming class. I wish to emphasize the ephemeral quality of that value; the cut-off scores for the placement test are set by the cognate faculties on the basis of professional judgment. They are not empirically derived; the percentage, therefore, could easily be raised to the 50 percent reported in the 1978 AAHE report or to a value as low as 10 percent simply by moving the scores. It is important for us to realize that these 25 percent, therefore, are in all likelihood part of a much larger group showing some level of disability in basic writing and computation skills.

It has been impossible to disentangle the effects of taking a special course, i.e. English 4 or Math 0, from the effects of self study for two reasons. First, faculties and advisors exercised a great deal of freedom in devising ways for students to clear their records. Some students were permitted to bypass the retake tests and courses on the basis of faculty decisions that the placement test scores must have been wrong. Others assigned students to the Basic Skills courses although the placement scores were high enough to place students in the regular sequence of coursework. Second, the reports sent to the Basic Skills office, requests notwithstanding, did not separate those students who took the course from those who showed up just to take the test. In English, that may not have mattered anyway since, with the Curriculum Affairs Committee's approval, English 4 is prerequisite to English 10. The result is that any other means of removing the writing deficiency is virtually ruled out.

The consequences has been that I cannot perform the evaluation which was a large part of my charge: to ascertain the effectiveness of the Basic Skills courses in passing the retake tests and in subsequent coursework.

The next set of data, Tables 2a and 2b, have good news and bad news in them. Table 2a shows the numbers of students passing the course or otherwise removing the deficiency over the four testing periods; 3109 records of Basic Skills deficiency were removed. You recall from the November report that about 23 percent of the students thus identified were deficient in both English and mathematics; hence the total in the last column of Table 2b shows the number of persons while the totals in 2a show the number of instances.

The bad news is in the middle row of Table 2b. 344 or 12 percent of the students in the Basic Skills categories failed to remove the deficiency or deficiencies in the fourth testing. This does not include students in their first or second term; only those in the third or fourth term are in that number. It is disappointing that the number is that high. Anne Herpel and others in Vice President Dunham's office will be checking each of these 344 cases individually. We may hope that some will have dropped out earlier and thus not, in fact, be third-termers.

The number cannot be higher than 344; everyone hopes it will be lower since this is the group to which the Senate decision on drop action (from degree status) applies.

A comment about the value after Withdrawals, etc. There are more first- and second-termers in Basic Skills than are in that value;

many have already removed their deficiencies by taking the course and/or test.

My second point is to show you some analyses I have made of broader scholastic measures and to suggest to you a somewhat different interpretation of the "Basic Skills problem." I became increasingly dissatisfied with the

implication that an arbitrarily established cut-off score on homemade tests could identify "real" subpopulations within the class. So, with Ralph Lochlin's assistance, I carried out a two-step analysis of the relationship between SAT verbal-mathematics scores and the relevant placement test scores. The regression coefficients were positive but not strong. Then I constructed the probability curve from the question: What is the probability that a student in the 1st SAT interval will score at or below the cut-off score on the placement test? The resulting curve is in Figure 1. It is apparent why the regression coefficients were not as high as would be expected; there is "noise" in the relationship. At about SAT-verbal 450, the near-zero probability of failing to surpass the cut-off score ends abruptly. With each succeeding lower interval of SAT-verbal scores, the probability climbs higher so that segments of the curve begin to look like an exponential increase. Similarly with the SAT-mathematics scores, except the "break" occurs at the 500 score. The interpretation I put on this distinctive break is that we have inserted probes into a broader scholastic aptitude measure which separate our incoming freshman class into two populations. The placement test scores could be set at any level — preferably derived empirically. I should add: We will thereby distinguish between those students whose overall scholastic aptitude is high enough that they are unlikely to need instruction in the skill being tested locally, and the rest who will need increasing amounts of instruction, testing, monitoring and evaluating throughout their careers at Penn State. The point is that we would be almost certain to find a similar "break" in any other measure of scholastic aptitude for which we wished to write a local test, e.g. oral communication, analytic thinking, problem solving ability, and so on.

The question arises: How many of the latter group are we likely to find? The bell shaped curve shows the distribution of SAT-verbal mathematics scores for the fall '77 class. It is obvious that about 60 percent of our new students have SAT scores to position them at or below the "break." We are not talking about 2988 students, ladies and gentlemen; we are talking about something over 6000 students who will need instruction, counseling on academic plans, evaluation and monitoring throughout their tenure at this institution.

My interpretation runs counter to the prevailing theme that Basic Skills deficiencies are merely an unfortunate hiatus in the student's store of knowledge; it follows that a dose of high potency basic skills instruction will correct the matter. And once the high schools realize the universities are unhappy with the way they are teaching, they'll mend their ways. Quite the contrary, in my view. The high schools' and elementary schools' faculties have been telling us for nearly five years that something was terribly wrong with students' aptitude, motivation and general quality. We have, to repeat a comment many of you have heard me make repeatedly, a massive cultural shift occurring — world wide — which shows itself within our bailiwick as lowered scholastic aptitude. Every European system, the Russian school system, mainland China, the Arab countries all report steadily declining scores on measures of general scholastic aptitude. Invariably, they first show up as declining competence in the fundamental skills of operation and manipulation of ideas. The really alarming thing is that the decline remains steady although conditions change. The Wirtz Commission reported that the decline in SAT scores up to 1965 could be attributed to a changing mix in the college-bound population; that did not account for the decline at the same rate — in 1970. We should have paid more attention to the implications of that fact.

My last figure represents my own effort to foretell what is in store for us at Penn State. I plotted the mean SAT scores at Penn State from 1967 to 1975 against the national means for the same years to get the appropriate regression values. Then I did a visual "best-fit" extension of the national means to 1988; using the regression alpha values, I calculated the resultant predicted mean SAT scores at Penn State for the same decade. The results so shocked me that I rummaged through the literature, searching for hard evidence that the SAT decline has "bottomed out." I found no such evidence.

Let me conclude with the comment of a colleague recently when I showed him these figures. He said, "Well, for a good many years, the kids have been bright enough and motivated enough that it really didn't matter too much how we taught; they'd learn on their own. Now, I guess, we'll find out whether we can teach." To which I can only add, "Amen."

Helen I. Snyder,
Coordinator

Ask the Editor

Questions for Ask the Editor should be sent to Room 312 Old Main, University Park, 865-7517. Letters should be signed although names will be withheld on request.

Editor's note: The officers of the University Faculty Senate recently put together a list of questions dealing with non-academic policies and procedures. Since a number of these questions are of general interest to the University community, we are publishing them, along with the responses to them, in INTERCOM.

QUESTION:

With what rationale were the policies on check-deposit of continuing part-time faculty and staff developed? At the present time, such checks can only be obtained at Shields, causing inconvenience and a sense of second-class citizenship to personnel, as well as a need for more tellers at the Bursar's Office.

ANSWER:

Checks for Fixed Term faculty may be deposited under the same provisions as those for faculty on Standing Appointments. Wage payroll (part-time) staff present a problem in that the amounts of the paychecks usually vary from pay period to pay period, and we presently have no convenient and secure method for notifying each individual of the amount of his or her paycheck. We would like to be able to do something about this, and we are working on it, but right now there are problems which prevent it from becoming a reality.

Controller

WPSX Highlights

Every year, thousands of Americans from across the country gather at Oshkosh, Wis., for the largest aviation event in the world, the annual Experimental Aircraft Fly-In. Friday, June 9, at 9 p.m., *Affair in the Air* captures the excitement of the eight-day event with its antique and homebuilt aircraft, stunt flyers and famous pilots.

Beverly Sills, John Alexander, Susanne Marsee, and Richard Fredericks star in *Roberto Devereux*, Sunday, June 18, at 10 p.m. on *In Performance at Wolf Trap*. Donizetti's opera tells the tragic love story of England's Queen Elizabeth I and the Earl of Essex.

It has been 25 years since Julius and Ethel Rosenberg were executed for conspiring to sell U.S. atomic secrets to the Soviet Union. On the anniversary of their death, a 90-minute special called *The Rosenberg-Sobell Case Revisited* reexamines the facts and the possible cold-war prejudices that led to the Rosenbergs' conviction. The special will be broadcast Monday, June 19, at 9 p.m.

James Michener returns to the vast, sun-drenched Pacific to examine its unique cultures on *James Michener's World*, Tuesday, June 20, at 8 p.m. The hour-long tour, "The South Pacific: End of Eden?" takes viewers to such places as New Guinea, New Zealand, Bora Bora and Guadalcanal. Mr. Michener offers viewers one of the last chances to see this region "before it plunges into the mainstream of modern life."

Good Mornin' Blues, an hour-long special, to be seen Tuesday, June 20, at 9 p.m., explores the Mississippi Delta roots of country blues music, which has provided the basis for rhythm and blues, rock and roll, soul, and other forms of modern music.

Calendar

June 15 - 25

Special Events

Thursday, June 15
Commons Kaleidoscope, "Remember the Ladies," noon, Kern lobby,
HUB Craft Center course registration, noon-5 p.m., Room 312 HUB.

Friday, June 16
Last date for registering with foreign language departments (other than French and Spanish) for written language examinations.
HUB Craft Center course registration, 7-10 p.m., Room 312 HUB.
Commonspace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, June 17
Penn State Open, chess games, all day, Room 301 HUB.
HUB Craft Center course registration, 10 a.m.-6 p.m., Room 312 HUB.
Cinema Internationale, *Magical Mystery Tour*, 1967 Beatles TV Special, and *Jim Plays Berkeley*, documentary of a 1970 performance, two complete showings, 7 and 9 p.m., Room 112 Kern.

Sunday, June 18
Penn State Open, chess games all day, Room 301 HUB.
Free U course registration, 1-6 p.m., HUB ballroom.
Cinema Internationale, *Magical Mystery Tour* and *Jim Plays Berkeley*, 7 and 9 p.m., Room 112 Kern.

Monday, June 19
Free U course initiators workshop, 8-10 p.m., HUB reading room.
Color Slide Club meeting, 7:30 p.m., Room 112 Kern.

Wednesday, June 21
Late registration deadline (10 week term).
Add deadline (10 week term).
Commonspace Theatre, *Bananas*, 7:30 and 9:30 p.m., Room 112 Kern.

Thursday, June 22
Commons Kaleidoscope, "Candyland America," noon, Kern lobby.

New Senate head

(Continued from page 1)

where he received his D.Phil. in engineering science.

Dr. Saperstein believes that helping with the planning of Penn State's role in the 1980s will be one of the Senate's most important tasks in the year ahead. He hopes to provide its various committees with a set of suggested topics to study.

The maintenance of academic quality at the University is a matter of serious concern to him.

"As far as I can tell, quality depends on the faculty and students, with the faculty imposing certain demands on the students in terms of courses and programs," he continues. "The level at which we expect students to perform is a measure of quality."

"How do we square this with the fact that 10 percent of our freshmen may be provisionally students? Should the University perhaps be smaller?"

"During the next month, I hope to put together a set of questions that pertain to the future of the University and then sort them out into topics that can be studied by Senate committees."

"After discussing these issues, perhaps the Senate can arrive at an opinion that I would hope the administration might respect — or at least by airing any faculty discontent, we could gain administrative understanding of it."

"I've joked that if the administration disappeared, the faculty could reinvent it. But if the faculty disappeared, the administration would have to go home."

"Of course the Senate includes students and administrators, but basically, it's 80 percent faculty, and I believe that's where the Senate officers owe their allegiance."

Festival Theatre, Neil Simon, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Friday, June 23
Commonspace Coffeehouse, 8 p.m., Room 102 Kern.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.
Spectrum, "An Evening with Gordon MacRae," 8 p.m., Eisenhower Auditorium.

Saturday, June 24
Cinema Internationale, *Cabaret*, 7 and 9 p.m., Room 112 Kern.
Festival Theatre, *The Sunshine Boys*, 7:30 p.m., The Pavilion Theatre.

Sunday, June 25
Festival Theatre, *The Sunshine Boys*, 7:30 p.m., The Pavilion Theatre.

Exhibits

Chambers Gallery: Deborah Conway, ceramics; Ken Hall, silkscreen collages.

Earth and Mineral Sciences Museum: open Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m. Steidle Bldg.

Frost Entomological museum: open 9 a.m.-noon, 1-4:30 p.m., weekdays. Live aquatic insects; live seasonal insects. Room 102 Patterson.

Hammond Gallery: William Mayer, MFA thesis exhibition, opens June 25.

Kern Commons Gallery: Bonnie Deutsch, jewelry, through June 24; Doris Coyle, oil paintings, Weislaw Zdaniewski and Dennis Charrerie, photographs, open June 24.

Museum of Art: Robert Kulicke, painter, designer, craftsman, through June 25; special exhibition on Jerome Witkin's *Painter's Crossing*: American paintings and contemporary American prints from the Permanent Collection.

Pattee Galleries: David Balas, photographs, "Tribute to John O'Hara," East Corridor Gallery, and Thomas Bewick, "British Birds," main lobby, both through June 20.

Robertation Cultural Center: Bilke Veitch-Kernon, silk-screen photos illustrating Jamaican protests, opens June 17, Walnut Bldg.

Sackett Gallery: PSU architecture students, "The Architectural Component of Light," drawings, photos and models.

Senate meeting

(Continued from page 1)

Services.

The Committee on Student Affairs, Awards and Scholarships presented a summary review of research and the Curricular Affairs Committee reported on procedures and course level definitions.

The Faculty Affairs Subcommittee on Part-Time Faculty also presented a report.

As a result of the Senate elections, Dr. George W. McMurtry, professor of electrical engineering, was named chairman-elect of the Senate and Dr. George W. Franz, assistant professor of history, was elected secretary. Dr. John J. Cahir, associate professor of meteorology, was elected to the Faculty Advisory Committee.

Dean James B. Bartoo of the Graduate School, Dr. Philip A. Klein, professor of economics and Dr. Jacqueline L. Schoch, associate director of academic affairs at DuBois Campus, were named to the Faculty Rights and Responsibilities Committee. Alternates are Dr. Miles T. Pigott, professor of engineering research; Dr. Donald E. Fahlman, assistant professor of physics at Altoona Campus; and Dean Stuart Forth of the University Libraries.

Elected to the University Promotion and Tenure Committee were Dr. John Kolesar, professor of engineering at McKeesport Campus; Dr. Arthur O. Lewis Jr., associate dean of the College of the Liberal Arts; and Dr. Robert F. Schmalz, professor of geology.

Dr. Helen A. Guthrie, professor of nutrition, was named to the Standing Joint Committee on Tenure; Dr. Russell A. Reed, assistant professor of chemistry at Berks Campus, is the alternate.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1300 (network line 475-1837). Applications for these vacancies will be accepted until 5 p.m., June 22. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as disabled or Vietnam era veteran.

SCANNING ELECTRON MICROSCOPY TECHNICIAN — COLLEGE OF AGRICULTURE, University Park Operate scanning electron microscope. Prepare specimens of biological materials for scanning electron microscopy, including critical point drying and sputter coating. Perform minor maintenance on scanning electron microscope and support equipment. Take pictures of images with camera; assist with other photographic work related to microscopy. Assist with the operation of the preparation of samples for transmission electron microscope and light microscopes. Bachelor's degree or equivalent in one of the life sciences and from six to 12 months of effective experience. Electromechanics course work or experience desirable.

LEAO SYSTEM DEVELOPER — INTERCOLLEGE RESEARCH PROGRAM, University Park Responsible to the Manager of the Systems Development Group in the Computer Center in providing technical leadership and coordinately developing of major computer systems. Responsible for operating systems, major modifications of existing available system software, and the development of complete subsystems. Generates and researches proposals for new operating system enhancement projects. Provides leadership in group reviews, design and code in accordance with accepted programming productivity standards. Master's degree (or equivalent) in computer science or related discipline, plus over four years' to seven years' experience in system programming and system development on large IBM system under MVT or MVS. Demonstrable technical leadership ability.

GREENHOUSE SUPERVISOR — COLLEGE OF AGRICULTURE, University Park Direct retail sale operation of the greenhouse. Coordinate wholesale operations with local florists. Assist faculty in preparing demonstration projects for class work. Teach laboratory topics as directed. Supervise the overall operation of the greenhouse and related facilities including planting, fertilizing and harvesting plant material. Responsible for maintaining appropriate levels of materials and supplies to include pots, fertilizer, pesticides, etc. necessary for greenhouse operation. Supervise the dispensing of materials and supplies. Bachelor's degree or equivalent in horticulture or related science, plus at least 15 credits of graduate work in horticulture or six to 12 months of directly related experience. Management experience is highly desirable.

RESEARCH AIOF — COLLEGE OF AGRICULTURE, University Park Act as liaison between University and Hybrid Breeding Program of the Pennsylvania Foundation Seed Corporation, and the Hybrid Seed Corn Industry in relation to the Experimental Corn Hybrid Evaluation Program. Supervise and participate in the data collection, data processing and data interpretation of program results. Supervise the design and planting of hybrid crops at various research sites. Responsible for locating and arranging planting test sites with farmers and maintain cooperative relationships to insure program success. Bachelor's degree or equivalent in plant science, plus six to 12 months of directly related experience. Practical experience in statistical procedures and data processing routines desired.

VETERANS AFFAIRS ASSISTANT — ADMISSIONS, Capital Campus Responsible for Office of Admissions and Registration of the dissemination of information relative to veterans' veteran students, and for information concerning various campus related services. A bachelor's degree or equivalent outside study or training, plus over 12 months of up to and including 12 months of directly related experience. Military service experience highly desirable.

STAFF PHARMACIST — PHARMACY, Herney Responsible to the Assistant Manager of Pharmacy Supervisor to perform pharmaceutical functions of inpatient and outpatient dispensing, intravenous admixture and hyperalimentation preparation, extemporaneous compounding, providing drug information to physicians, students, nurses and patients. Maintain inpatient and outpatient drug profiles, enter Formulary regulations and maintain required pharmaceutical records and inventory levels. Bachelor of science in pharmacy, plus one to two years of directly related experience. Pennsylvania registration in pharmacy eligibility required.

Penn State Intercom

Coming up: Erick Hawkins Dance Company (above), Archie Smith (left) and Bruce Hall in *The Sunshine Boys*, and singer Gordon MacRae.

News in Brief

July 3 is not a holiday

Questions have arisen concerning the observance of Independence Day at the University. According to the Office of Personnel Administration, although certain holidays such as Memorial Day have been moved to Mondays and are observed as extended weekends in most states, Independence Day has not been moved.

This year, Independence Day falls on Tuesday, and the University will observe the holiday on Tuesday, July 4, along with the rest of the nation. Monday, July 3, will be a regular work day.

College of Medicine receives accreditation

The College of Medicine has been awarded full accreditation for a period of eight years by the Liaison Committee on Medical Education (LCME).

The LCME, composed of representatives of the American Association of Medical Colleges and the American Medical Association, is responsible for evaluating and accrediting all the education programs in the nation leading to the M.D. degree. The accreditation was based on a review of in-depth written reports and on-site interviews of faculty, staff and students made in October 1977.

Noting with pleasure the fact that the College of Medicine received full accreditation for such an extended period, Dr. Harry Prystowsky, Medical Center provost and dean, also pointed to the fact that the College's next review will be in conjunction with that of the entire University in 1985-86 by the Commission on Higher Education of the Middle States Association. "We appreciate the Liaison Committee's recognition that the College of Medicine is an integral part of the University," he added.

The College first received reasonable assurance of accreditation from the Liaison Committee in 1965. Provisional approval was granted in 1967, and full accreditation was awarded for two years in 1971 and five years in 1973.

Junior golf lessons available

Junior golf lessons for boys and girls, ages nine through 16, will be offered again this summer. Lessons will be given two times a week for four weeks, beginning the last week in June. For registration and further information, contact the Penn State Blue Golf Shop, 865-7462.

RACE nears goal of 200 members

One hundred sixty persons have thus far joined Runners Act to Clean Environment (RACE), an organization established a month ago at the University.

"We are rapidly approaching our goal of recruiting at least 200 members by Aug. 1," said Dean Robert J. Scannell of the College of Health, Physical Education and Recreation, who is co-director of RACE.

"The excellent response to date indicates that a lot of local residents are willing to do their part to clean up the environment," he added. "All we ask is that members pick up at least two cans or

(Continued on page 3)

Summer brings varied arts programs to campus

Singer Gordon MacRae, whose career has spanned four decades and included Broadway musicals, the movies, radio, television and recordings, will perform at 8 p.m. tomorrow (June 23) in Eisenhower Auditorium. The event is the first of the Nittany Mountain Summer Festival Spectrum series.

Mr. MacRae, who made his singing debut with the bands of Les Brown and Harry James at the New York World's Fair of 1939-40, is perhaps best known for his starring roles in the motion picture musicals, *Oklahoma!* and *Carousel*.

During the 1940s, he was the singing star of the radio series, "The Railroad Hour," and in 1954 he began producing "The Gordon MacRae Show" for television.

On Broadway, Mr. MacRae first appeared in the 1942 production of *Junior Miss*. In 1946 he was featured with Ray Bolger in *Three to Make Ready*, and in 1967 he returned to Broadway to star in *I Do! I Do!*

Tickets for all Nittany Mountain Summer Spectrum events are on sale at the Eisenhower box office from 10 a.m. to 4 p.m. Monday through Friday and beginning at 5 p.m. on evenings of performance.

The Sunshine Boys, a comedy by Neil Simon, opens in the Pavilion Theatre tonight and continues there through Sunday, July 9, with performances on all days except Mondays. The production is the first of this summer's Festival Theatre, which will present four plays over an eight-week period.

Other plays on the summer schedule are *Candide*, the Leonard Bernstein musical, which opens next Thursday, June 29, at the Playhouse Theatre; *Li Ann Hampton Laverly Oberlander*, one of the *Texas Trilogy* by Preston Jones, which opens July 20 in the Pavilion; and *An Offer You Can't Refuse*, a new play by Penn State alumnus Samuel Gallu, opening July 27 in the Playhouse.

The Sunshine Boys, which centers on the encounter between two retired vaudeville performers who are reunited for a TV special, was first produced in New York in 1972 and later made into a motion picture.

Appearing in the roles of the reunited entertainers in the Festival Theatre production are Archie Smith, an associate professor of theatre at the University and a veteran character actor, and Bruce Hall, a professional actor with extensive experience in local, regional and Broadway theatre. David Wurst, who portrays the agent who arranges the

reunion, is returning to the University for his second Festival Season. He appeared in last year's production of *The Last Meeting of the Knights of the White Magnolia*.

Other members of the cast include Liz Kramer, Tom Spivey, Lowell Manfull, Douglas N. Cook and Joan Cook. Robert Leonard is directing the production.

As part of Festival Theatre offerings, "Behind the Scenes" events are planned for each production to allow interested persons to interact informally with the show's director, technical staff and actors. "Behind the Scenes" for *The Sunshine Boys* will take place at 2 p.m. Saturday, July 1, in the Pavilion. Tickets are free and are available at the Playhouse box office in the Arts Bldg.

The box office is selling tickets to all Festival Theatre performances. Hours are 10 a.m. to 9 p.m. daily. Information and reservations are available by telephone at 865-1884.

□

The Erick Hawkins Dance Company, a contemporary dance troupe, will perform at 8 p.m. Wednesday, June 28, in Eisenhower Auditorium as the second offering of this season's Nittany Mountain Summer Festival.

(Continued on page 4)

Penn Staters

Dr. Jan S. Prybyla, professor of economics, has written a book, *The Chinese Economy: Problems and Policies*. The book has just been published by the University of South Carolina Press. It is an up-to-date analysis of the various problems facing Communist China's economy and the policy solutions offered in the fields of population, agriculture, industry, money and banking, transport and communications, domestic and foreign trade, and health and education. Prof. Prybyla visited the People's Republic of China in 1974 with the Penn State delegation, and also visited Taiwan in 1976 and again this year. He is the author of *The Political Economy of Communist China* published in 1970 and of numerous articles on the Chinese economy.

Patricia Ward, associate professor of French and comparative literature, was recently elected to serve as national vice-president of the Conference on Christianity and Literature from 1978-1980. CCL is a professional organization for teachers interested in the relationship between religion and literature, particularly from the perspective of Christianity.

Robert Trehy, professor of music, was featured soloist in a pops concert of the St. Louis Symphony on June 3. He appeared with the Detroit Symphony in two similar concerts on May 24 and 25.

Dr. Joseph Jordan, professor of chemistry, presented invited talks last week at Louis Pasteur University in Strasbourg, France, on recent advances in bioelectrochemical modelling of hemoproteins and Vitamin B12. He also gave a seminar at the Laboratory of Interfacial Electrochemistry of the French National Science Foundation in Bellevue near Paris.

Dr. Roger P. Ware, associate professor of mathematics, presented a series of invited talks on quadratic forms at Konstanz University and at the Conference on Quadratic Forms in Oberwolfach, both in West Germany. He also spoke at Johannes Kepler University in Austria.

James I. Tarman, associate director of athletics, has been elected to the Board of Trustees of Gettysburg College as an alumni trustee. He will serve a six-year term.

Dr. Arun Kilara has been appointed assistant professor of food science. A graduate of the Dairy Science College, NDRI of Karnal, India, Dr. Kilara did graduate work in dairy and food science at the University of Saskatchewan and received his Ph.D. in food science and technology from the University of Nebraska.

Robert Blackston has been promoted to assistant professor of history at the Altoona Campus.

Dr. Harold Sargent, director of the Shenango Valley Campus, has been elected chairman of the Council of Commonwealth Campus Directors, and Hugh Barclay, director of the Fayette Campus, was elected vice-chairman.

Thomas J. Pelick and **W. Jack Hughes** have been promoted to the position of research associate at the Applied Research Laboratory.

Retirements

An association with Penn State which began in 1930 is ending with the July 1 retirement of **Henry I. Herring**, director of the Schuylkill Campus and associate professor of mathematics.

Mr. Herring started as director of the then-named Pottsville Center in 1949, and he supervised its move to the present

campus east of Schuylkill Haven and its growth from 120 students to the current population of 650 full-time students.

Mr. Herring is a Penn State alumnus, having earned a B.A. in education in 1934 and his M.A. in mathematics in 1935. He also took graduate work in meteorology at the Massachusetts Institute of Technology while serving in the Army Air Force from 1942 to 1946. He retired with the rank of the Captain. From 1936 to 1942, he was a teacher of mathematics and science at Cressona High School.

Active in community affairs, Mr. Herring is a past president of the Pottsville YMCA, the Schuylkill County Anti-Tuberculosis Society and the Pottsville Rotary. He has also served as chairman of the Pottsville Area School Authority and as a member of the board of the Pottsville Benevolent Society for Children.

Everett R. McLaughlin, professor of engineering research, retires June 30, with the title professor emeritus, after 37 years of service to the University.

Prof. McLaughlin, who received his B.S. and M.S. degrees in mechanical engineering from Penn State, joined the faculty in 1941 as an instructor in the Engineering Experiment Station. In 1945, he was promoted to associate professor, and in 1966, to professor. In 1969, he transferred to the Department of Architectural Engineering.

Prof. McLaughlin has been a member of the graduate faculty in the mechanical engineering department and has supervised master's degree theses in both mechanical and architectural engineering.

His research has focused on the building industry, especially heat and moisture transmission of building materials, condensation, icing, infiltration, water leakage, solar heat gain and dehumidification.

Working successfully on problems dealing with transient heat transfer in structures, Prof. McLaughlin has carried out many of his studies in the Thermal Research Laboratory. He has published some 25 articles and technical papers and has served as a consultant to more than 45 companies.

Otto E. Mueller, assistant vice-president for Housing and Food Service Operations, will retire July 1 after almost 25 years of service with the University.

A graduate of the University of Wisconsin, Mr. Mueller also served as housing bureau director there.

He came to Penn State in 1953 as director of Housing. In 1962 he was made director of Housing and Food Services and became assistant vice-president in 1971.

When he arrived, the University enrollment was only 11,500 students with 5,100 living on campus. Today, the University's Housing and Food Service Operations house more than 15,000 students and provide more than 30,000 meals each day during the term.

Mr. Mueller is a past president of the National Association of College and University Housing Officers. In 1977, he was the recipient of the Distinguished Ivy Award in recognition of the outstanding quality and excellence of the University Housing and Food Service Operations.

Dr. T. Sherman Stanford, special assistant to the senior vice president for administration, is retiring from the University after more than 25 years of service.

He joined the University's main campus staff in 1953 as assistant college examiner and was named associate dean of admissions in 1958. He became director of admissions and registrar in 1965, and two years later he was appointed director of academic services, a position he held for four years. He served then as assistant to the provost and vice president for academic affairs until 1973 when he assumed his present position.

McLaughlin

Herring

Stanford

Mueller

After graduation from Sheffield, Pa., High School, Dr. Stanford received a B.S. from Thiel College in 1936 and his M.S. and D.Ed. from Penn State, in 1939 and 1955, respectively.

Before coming to University Park, he was director of admissions of Lycoming College, where he also served as associate professor of chemistry and principal of Ridgway High School. He served as a captain with the U.S. Marine Corps in World War II.

Dr. Stanford has been active in many State and national professional organizations. He served as vice president and president of the Middle States Association of Collegiate Registrars and Officers of Admissions and as president of the Pennsylvania Association of College Admissions Counselors.

He was a member of the Pennsylvania Department of Education Committee on Student Admissions Application Problems, as well as of the Department's Advisory Committee on Vocational Educational Management Information Systems. He was also appointed to the National Planning Council for Subject Matter Taxonomy.

The author of numerous professional papers, Dr. Stanford received the Distinguished Alumni Award of Thiel College and was a member of the Board of Directors of Lycoming College.

Two members of the York Campus faculty, with more than 20 years of service to the University between them, have retired.

Kenneth B. Shiffert, associate professor of physics, began teaching at York as a part-time graduate math instructor for engineering students during the early '60s, and assumed his full-time position in 1968. He earned B.S. degrees in both physics and education from Muhlenberg College, and his M.S. in physics and mathematics from Lehigh University, where he also completed doctoral courses in physics.

Before assuming his teaching post at the Campus, he was a research physicist and engineer at Borg Warner Corp. and was principal engineer in systems and design analysis at Bendix Corp.

Assistant professor of engineering John H. Partridge has every intention of

Czekaj

starting a third career upon his retirement from Campus teaching. His first retirement came in 1965 after serving 30 years in the Marine Corps. He then went on to complete an M.Ed. in general engineering at Penn State. He holds a B.S. in electrical engineering from the U.S. Naval Academy at Annapolis. Prof. Partridge's first choice of new careers is to become a minister.

Ed Czekaj, director of athletics, is marking his 25th year with the University.

As most followers of Penn State football are well aware, Mr. Czekaj's association with the University dates back well before he was hired as assistant graduate manager of athletics in 1953. Mr. Czekaj is a 1948 Penn State graduate and played on the undefeated 1947 football squad.

A native of Mt. Pleasant, Pa., he was on the athletic staff of The Johns Hopkins University and served a hitch in the Marine Corps before coming to the University. He received his M.Ed. from the University in 1954 and was named ticket manager and assistant business manager a year later. In 1957 he was named business manager, and he assumed the post of associate director of athletics in 1967. Two years later, he succeeded Dean Ernest B. McCoy, who was retiring, as athletic director.

Informational Report of the Joint Administrative/Faculty

Insurance Matters Committee

The Committee has reviewed the personnel-related insurance package of the University with regard to current coverages, possible current coverage improvements, and potential additions to the program. The insurance needs of the faculty and staff are continually under review in the effort to obtain a comprehensive package that will yield the greatest benefit for the dollars expended.

The University philosophy with respect to the faculty and staff benefit package has been to develop a program that will cover the individual employee and his or her family at a time when he may be subjected to a heavy out-of-pocket medical payment in contrast to attempting to cover every first dollar of cost incurred. Consideration of insurance benefits should include the entire University community—the faculty and the staff. Normally group insurance programs require the participation of at least 75 percent of the people involved.

INSURANCE PLANS REVIEWED:

Eleven separate features pertaining to the employee insurance benefits package were placed before the Committee for review. Some of these represented overall coverage complaints and dissatisfactions expressed by employees to Personnel Administration. Others were listed as a result of the concerns expressed by members of the faculty and staff with respect to new inclusions which could provide more extensive coverage to the program. In each case, details of plan coverages and approximate costs associated with the features of each plan were made available by Personnel Administration to the Committee. The 11 items examined were:

1. In-hospital doctors' fees—Unicare
2. "Within 24 hours of accident" rule—Unicare
3. Outpatient x-ray and laboratory maximum—Unicare
4. Maternity benefits—Unicare
5. Multi-Major Medical Deductions within the family unit—Unicare
6. Major medical maximum—Unicare
7. Prescription drug insurance
8. Vision care insurance
9. Dental care insurance
10. Total and permanent disability coverage (TIAA-CREF)
11. Annual physical exams

The Committee assigned three of the above items to a lower priority which reserved them for future consideration. This was done because either increased coverage action had been implemented within the last year, present coverage was considered to be adequate, or the proposed coverage was too costly for the value returned to the employee. Those items were, respectively, maternity benefits, outpatient x-ray and laboratory maximum benefit, and prescription drug insurance. A brief statement concerning each is warranted:

Maternity benefits—Increased July 1, 1977. The plan now reimburses up to \$600 for mother's hospital expenses and up to \$350 for the doctor's charge for a normal delivery.

Outpatient x-ray and laboratory benefit—Provides up to \$100 per year for such services for each insured person. Additional charges are covered under major medical subject to the \$100 deductible.

Prescription drug insurance—Prescribed drugs are covered under the major medical benefit subject to the \$100 deductible. The remaining eight benefit packages were examined in greater detail, and these are outlined here without regard to a particular priority. It must be emphasized that all cost information associated with each of the following is to be considered as approximate.

Monday, June 26, at 9 p.m., Frederick Wiseman's Canal Zone documents the daily life of the American residents in the ten by 50-mile strip of Central America which is controlled by the United States.

1. In-Hospital Doctors' Fees—Unicare

A. The present schedule reimburses non-surgical in-hospital calls by a physician up to the following: \$15 for the first visit, \$10 for the second visit, and \$5 for each subsequent visit up to a maximum of \$280 at which point major medical coverage takes over.

B. A suggested revision of this fee schedule is: \$30 for the first visit and \$10 for each subsequent visit up to an allowable maximum of \$280. This would more closely approach actual fees than the current schedule permits although it would not provide complete and total payment. The major medical coverage becomes effective when appropriate.

C. Cost of Revised Plan:

(1) This modification of the present group plan would cost approximately \$61,000 per year to cover all employees and dependents now enrolled in the plan.

2. "Within 24-Hours of an Accident" Rule—Unicare

A. Emergency treatment provides a \$15 benefit if the insured seeks emergency treatment from a physician for an injury within 24 hours following the occurrence of the trauma. This has caused many problems. Occasionally symptoms become acute after the 24-hour period has elapsed and coverage for emergency room treatment is then denied because of this rule.

B. Suggested revision of the rule and estimated costs:

(1) "Within 72-hours of an accident." The additional cost would be approximately \$6000 per year.

3. Multi-Major Medical Deductions within the Family Unit—Unicare

A. The present major medical plan reimburses 80 percent of covered medical expenses for each individual after the individual has satisfied the deductible expense of \$100 in a calendar year. Under these circumstances, each member of the family is treated as a separate unit with respect to the \$100 deductible clause. This means a family of four could pay as much as \$400 if each member was unfortunate enough to have incurred covered expenses which resulted in a major medical claim.

B. Suggested revision of this rule and estimated costs:

(1) Once two (2) members of a family each satisfy the \$100 deductible clause and establish major medical claims, all remaining members of that family are then automatically covered under the major medical plan. The estimated additional cost would be \$11,500 per year.

4. Major Medical Maximum—Unicare

A. The present major medical benefit package provides a \$100,000 lifetime maximum payment for each insured individual. Automatic restoration up to \$1000 per year and full restoration to \$100,000 are provided to the insured upon return to good health. To date no employee's medical expense has closely approached this coverage maximum. However, continuing escalation of overall medical costs suggest that close and continuing attention be given to this upper limit. Should medical expenses exceed the \$100,000 maximum, the coverage becomes the obligation of the insured who could result in a financial catastrophe for the individual.

B. Suggested revision of this rule and estimated costs:

(1) Increase major medical maximum to \$150,000 per lifetime. This would add approximately \$60,000 per year to the cost of our present Unicare package.

5. Vision Care Insurance

This coverage is not available under the Unicare group package; however, the Committee was provided with data for consideration.

A. Many plans are available and the following is one which was considered:

(1) The plan would pay 100 percent of the first \$10 charged and 80 percent of all costs above \$10 to a maximum of \$30 per insured per year.

(2) Typical coverages include: Charges made by a legally qualified physician, optometrist, or optician, for eye refractions (one year), lenses, frames, and contacts—latter three qualified by the policy.

(3) Coverage does not include such items as sunglasses, broken glasses, anything covered under workman's compensation, surgical, or medical treatment.

B. Estimated cost of coverage:

(1) \$340,000 per year. This cost is based on the following approximate unit costs:

\$11.00 per employee per year

\$25.00 for dependents per year

\$36.00 complete family coverage per year

6. Dental Care Insurance

This coverage also is not available under the present Unicare group package; however, the following group plan was one of several examined.

A. Plan A—Dental

(1) Stipulations

(a) Maximum expenditure of \$500 per insured per calendar year.

(b) Lifetime maximum of \$500 per insured for orthodontics.

(c) Deductible—\$25 per year per insured, limit of two deductibles per family.

(2) Plan coverages:

(a) This plan would pay 80 percent of

routine oral examinations, extractions, oral surgery, fillings (other than gold), root canal therapy, periodontics, drugs, etc.

(b) Plan also pays 60 percent for dentures, inlays, bridge work, crowns, gold fillings, and orthodontics.

(3) Cost:

(a) Approximately \$1,610,000 per year. This cost is based on the following estimated unit rates:

\$ 58.00 per employee per year

112.00 for dependents per year

\$170.00 complete family coverage per year

7. Annual Physical Examinations

A. This type of coverage is not provided for in the present group Unicare plan. The Committee is advised that this feature is not a standard practice in group medical plans; and, therefore, it is difficult to get bids on such a program. Requested estimates, however, suggested a plan which would provide for one examination per year with a maximum of \$50 per examination per insured employee and each dependent. The cost to include this in the present Unicare plan is estimated to be \$143,000 per year.

B. An alternate plan with the same coverage as above, excluding the children only, not the spouse, would cost approximately \$107,000 per year.

8. Total and Permanent Disability—TIAA-CREF

The present TIAA-CREF retirement annuity program does not provide for the disability benefits which are available under the other retirement programs available to University employees. Consequently, this matter was considered; however, an in-depth examination was not feasible prior to this report.

There are several constraints connected with proceeding on this feature. One, only 23.5 percent of the academic personnel and 14 percent of the total faculty and staff participate in TIAA-CREF; and two, normally a group insurance plan requires at least 75 percent participation of the group covered.

Although no assurance is currently available that a disability package could be developed for TIAA-CREF, it is estimated that the cost of incorporating this feature into the present package would approach \$200,000 per year.

SUMMARY

The deliberations of the Committee have resulted in establishing a block of five programs which should receive the highest priority for consideration with respect to the present group-plan insurance program. These and associated approximate costs are:

	Estimated Annual Cost
1. Major Medical Maximum	
A. Increase from \$100,000 to \$150,000	\$ 60,000
2. Multi-Major Medical Deductions Within the Family Unit	
A. Establish maximum at two \$100 deductibles per family	\$ 11,500
3. Dental Care Insurance	
A. Plan A (see text)	\$1,600,000
4. "Within 24 Hour Accident" Rule	
A. Change to 72-hours	\$ 6,000
5. In-Hospital Doctors' Fees	
A. Modify to \$30-\$110 (see text)	\$ 61,000

The above five items have been forwarded to the President of the University to form the basis of consideration for implementing changes in, and additions to, the University's plan of faculty and staff benefits.

Joint Administrative/Faculty Committee on Insurance Matters

The *Dybbuk*, one of the most popular Yiddish plays, was recently produced by Penn State's Experimental Theatre Company. Tuesday, June 27, at 7:30 p.m., writer Leon Katz, director Dan Ronen, and occult expert Robert Lima, appear on *Talkabout* to discuss the project using photographs from the recent production. Baritone Robert Trehy of Penn State's College of Music is featured Tuesday, June 27, at 9 p.m. on *Music at Penn State*. Accompanied by Pianist Philip Dettra, Prof. Trehy gives a recital of music by Mozart, Schubert, Ravel, Britten, and Giordano.

Tennessee Williams has used the American South as a background for most of his theatrical works. *Tennessee Williams' South*, a 90-minute special to be seen Tuesday, June 27, at 9:30 p.m., combines scenes from his most famous plays with segments illustrating the beauty of the Southern states.

Nova explores the future of 99 million acres of Alaskan wilderness Wednesday, June 28, at 8 p.m.

News in brief

(Continued from page 1)

bottles every time they run and return them to the nearest trash container."

RACE is an organization for runners and joggers, but other people active in the outdoors are encouraged to join. Included among members thus far are walkers, fishermen, golfers and bird-watchers.

There are no fees or meetings involved with membership.

Area residents who would like to join RACE should contact Dean Scannell at 865-2565 or Arthur Ciervo, co-director, at 865-7517.

WPSX Highlights

George Crumb: Voice of the Whale, Friday, June 23, at 9 p.m., centers around a performance of *Vox Balenae* for *Three Naked Players* by George Crumb, and includes a demonstration of the unique effects and musical instruments which figure in the composition.

Monday, June 26, at 9 p.m., Frederick Wiseman's Canal Zone documents the daily life of the American residents in the ten by 50-mile strip of Central America which is controlled by the United States.

Interdisciplinarity

Editor's note: This is one of a series of articles on the topic of interdisciplinarity. It is a version of a portion of the introduction to Interdisciplinarity and Higher Education, which will be published by the Penn State Press.

The theoretical basis for resisting interdisciplinary developments lies in the argument that most current disciplines, which are represented by distinct administrative units, have their own integrity and natural autonomy. Each discipline has its own intrinsic principles, and each has developed in accord with methodologies and assumptions that are neither translatable into those of one or more other disciplines nor exhaustively traceable to a more fundamental discipline. Some of those who affirm this view of the traditional disciplines regard interdisciplinary programs with indifference, if not hostility.

Added to this theoretical opposition is resistance to new interdisciplinary developments provoked when interdisciplinarians try to impose their concepts on their colleagues. Rather than waiting for a natural evolution of new disciplinary alignments, interdisciplinarians sometimes attempt to force unusual and sometimes exotic alignments on their colleagues. However, because they have not yet defined their principles or the domain of data that constitutes their subject matter, their opponents remain skeptical. After all, students cannot in four or even eight years of study gain a thorough knowledge and understanding of the data and methods of even a single discipline. Thus the interdisciplinarian is charged with being a generalist — "a jack of all trades and master of none." Or, if not this, he is charged with amateurism and encroachment in areas outside his specialty, if he has one. He, in turn, charges the traditionalist disciplinarian with stultifying conservatism, lack of vision, and inflexibility bred of vested interests.

There is something to be said for both sides of this dispute. But the justification on each side depends on the distinction already alluded to, but too easily overlooked: between what is natural and what is artificial. It is the artificial development of interdisciplinary programs that should be resisted. It is natural development that should be accepted and sometimes fostered by both disciplinarians and interdisciplinarians.

The most obvious artificial development of interdisciplinary study is administrative fiat, based on the view that a new structure is more economical or more convenient for determining needs for faculty positions. Such fiat may be the expression of deep concern about rapidly changing social and economic problems and current student demands, although student demands are sometimes fickle if not whimsical, and what appears to be a social or economic need one year may have vanished a few years later. Faculties and administrations find it difficult to resist these pressures, which have led to attempts to redesign curricula, to introduce experimental and what are called "innovative" courses, and sometimes "new" re-alignments of disciplines and reorganization of academic structure. Interdisciplinary efforts occurs when faculty are intellectually motivated to be "different." In such cases, the interdisciplinary effort may represent innovation simply for its own sake. We expect disciplines to change; without change they would not progress. And it is to be expected that some of us would like to be in the forefront of progress. Yet interdisciplinary efforts based exclusively on these expectations do not grow naturally out of concerns common to more than one discipline or out of problems which seem insoluble from the perspectives of single disciplines.

Interdisciplinary developments, however, can be natural rather than

artificial. It should be obvious when we look at the history of thought that disciplines have evolved. Physics is, in the twentieth century, dramatically different in content and methodology from physics in the time of Newton. Contemporary psychology is different from psychology in the nineteenth century. History, which was once one of the humanities, is now sometimes classified as a social science. Examples such as these suggest that established disciplines are not invariably and perpetually controlled by clearly defined and universally accepted principles. Specialists in the disciplines define their disciplines according to what they accept as data and the way these data should be approached, and these differences align the discipline with other disciplines — developmental psychology with biology, history with philosophy, certain kinds of philosophy with mathematics, biophysics with biology.

It might be concluded from this characterization of natural interdisciplinary effort that deliberate attempts to change disciplines and design new disciplinary programs are misguided — and that all are artificial. We might conclude that the only respectable and realistic way to engage in interdisciplinary efforts is from within, letting each specialist break out of his boundaries as necessity leads him to do so. Yet I think there are occasions when interdisciplinary study should be deliberately promoted.

It is worth noting that some established disciplines seem to be especially adapted to being interdisciplinary in the sense that they are concerned with synthesizing knowledge. One such discipline is philosophy, particularly when it takes the form of reflective understanding of specific disciplines of kinds of experiences: philosophy of science, philosophy of art or aesthetics, philosophy of religion, etc. Philosophy has the longest tradition of any formal discipline which might be considered essentially interdisciplinary. But there are others. Literary criticism, which may be viewed as a subdiscipline of Literature of Letters, is an example of a discipline that necessarily calls on methods and data from other disciplines, such as psychoanalysis, anthropology, philosophy, and history. And as theories of criticism change, so does the selection of the disciplines on which literary criticism draws. Anthropology too seems to be linked to other distinct disciplines — in this case, primarily those of the natural and social sciences.

These disciplines have their own distinctive characteristics. Nevertheless, they draw upon and sometimes extend other disciplines. They seem inherently to be integrative. And they may be viewed as appropriate focal points for understanding and perhaps promoting natural interdisciplinary efforts. If this is so, then it is not necessarily artificial to engage in deliberate attempts to develop programs that are interdisciplinary when they develop out of or with their focus in inherently interdisciplinary disciplines.

However, whatever the proper focus or base for interdisciplinary efforts, it is essential to be cautious about the administrative structure within which these efforts take place. A formal setting for interdisciplinary work, if it is to avoid artificiality and at the same time promote natural developments, must maintain a flexible organization that serves as an arena or "sounding board" for faculty to try out ideas, to come together from different disciplines when need or new interests draw them together. Interdisciplinary development in then be natural. And this organization should serve as at least a temporary "home" for students who want to look outside the boundaries of their degree program discipline.

Carl R. Hausman,
professor and head of philosophy

Calendar

June 22-July 2

Special Events

Thursday, June 22

Commons Kaleidoscope, "Candyland America," noon, Kern lobby.
Festival Theatre, Neil Simon, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Friday, June 23

Student Travel Organization film, *Carrie* (R), 7:45 and 9:45 p.m., Room 111 Forum.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.
Spectrum, "An Evening with Gordon MacRae," 8 p.m., Eisenhower Auditorium.

Saturday, June 24

Cinema Internationale, *Caharet*, 7 and 9 p.m., Room 112 Kern.
STO film, *Carrie* (R), 7:45 and 9:45 p.m., Room 111 Forum.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Sunday, June 25

STO film, *Carrie* (R), 7:45 and 9:45 p.m., Room 111 Forum.
Festival Theatre, *The Sunshine Boys*, 7:30 p.m., The Pavilion Theatre.

Monday, June 26

Registration (8 week term), 1-5 p.m., Shields Bldg. lobby.
Last date for August graduates to activate diploma cards in Registrar's Office and pay these fees at Bursar's Office.
Cinema Internationale, *Caharet*, 7 and 9 p.m., Room 112 Kern.

Tuesday, June 27

Shaver's Creek Nature Center, "Frogs, Toads and Snakes," 7 p.m., Stone Valley.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Wednesday, June 28

Commonplace Theatre, *Play It Again, Sam*, 7:30 and 9:30 p.m., Room 112 Kern.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.
Spectrum, The Erick Hawkins Dance Company, "Parson Weems and the Cherry Tree, etc.," 8 p.m., Eisenhower Auditorium.

Thursday, June 29

Passfall (10 week term).
Commons Kaleidoscope, "Trading Currency Futures," noon, Kern lobby.
Festival Theatre, Hugh Wheeler and Leonard Bernstein, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Friday, June 30

Passfall (10 week term).
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-187). Applications for these staff vacancies will be accepted until 5 p.m., June 29. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Summer arts

(Continued from page 1)

Making up the program will be three pieces: "Greek Dream," "Cantilever," and "Parson Weems and the Cherry Tree, etc."

The last piece, with music by composer Virgil Thomson, explores the theme of the American folk hero and has been widely acclaimed by critics. Mr. Hawkins dances the principal role.

Tickets to the performances are on sale at the Eisenhower box office 10 a.m.-4 p.m. Monday through Friday and beginning at 5 on evenings of Spectrum events.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Saturday, July 1

Last date for August graduates to deliver doctoral theses to committee.

Behind the Scenes of *The Sunshine Boys*, 2 p.m., Pavilion Theatre. Free tickets at The Playhouse box office.

Cinema Internationale, *Allegro Non Tropo*, an mated film, 7 and 9 p.m., Room 112 Kern.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Sunday, July 2

Festival Theatre, *The Sunshine Boys*, 2 and 7:30 p.m., The Pavilion Theatre.

Festival Theatre, *Candide*, 7:30 p.m., The Playhouse.

Seminars

Friday, June 23

Ionosphere Research Laboratory, Marcel Nicolet, consultant to the Ionosphere Research Lab, on "Aeronomy of the Stratosphere and Mesosphere," 4 p.m., Room 323, EE East.

Exhibits

Chambers Gallery: Deborah Conway, ceramics and Ken Hall, silk-screen collages, through June 28.

Earth and Mineral Sciences Museum: open Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m. Steidle Bldg.

Frost Entomological Museum: open 9 a.m.-noon, 1-4:30 p.m., weekdays. Live aquatic insects; live seasonal insects. Room 102 Patterson.

Hammond Gallery: William Mayer, MEA thesis exhibition, June 25-30.

HUB Gallery: CPFA, Art Alliance juried exhibit, opens July 1.

Kern Commons Gallery: Bonnie Deutsch jewelry, through June 24; Doris Coyle, oil paintings, Weislaw Zdaniewski and Dennis Charrington, photographs, opens June 24.

Signer of Art: Robert Kulicke, painter, designer, craftsman, through June 25; American paintings from the Permanent Collection featuring Jerome Witkin's *Painter's Crossing* through July 2; contemporary American prints from the Permanent Collection.

Robeson Cultural Center: Billie Veitch-Clenon, silk-screen photos illustrating Jamaican proverbs. Walnut Bldg.

Sackett Gallery: PSU architecture students, "The Architectural Component of Light," drawings, photos and models.

APPLICATIONS PROGRAMMER/ANALYST — UNIVERSITY LIBRARIES, University Park. Responsible to Senior Analyst/Programmer for conducting analysis of data processing and operational problems, determining detailed requirements to solve problems, formulating logical statement of systems problems, and preparing computer programs to satisfy desired end results. Make presentations and submit written reports. Assist in providing direction and control with the specifications of project schedules. Bachelor's degree or equivalent in basic computer systems and two years' effective experience in computer programming and analysis is required.

INTERCOM is an internal communications medium published weekly during the first term of the class schedule for the academic community of The Pennsylvania State University.

Penn State Intercom

Open Letter to the University Community

June 29, 1978

Teamsters Union Local No. 8, representing Penn State Technical-Service employees, has decided to strike effective 12:01 a.m., Saturday, July 1, 1978. The University has made every effort to avoid a strike, but has not been successful primarily because of the struggle between two competing unions.

The University's offer, rejected by the Teamsters' membership, was a three-year proposal involving wages and benefits costing the University an annual average in excess of 6 percent. The Union's final demands, on the other hand, would result in excess of six percent. The Union's final alone in excess of 30 percent (including 17.5 percent just for wages). This package would cost an average of 20-25 percent yearly over the three-year period.

The University has two principal sources of revenue: the State appropriation (pegged for an increase of

five percent next year after two years with no increase) and student charges which are among the highest of all public universities in the nation. An increase in technical-service compensation of the magnitude proposed by the Teamsters is far beyond the resources of the University. Principally and centrally, however, at the outset of discussion on finances, when the Teamsters fixed its demands at such an exorbitant level, it became apparent to us that the Union's strategy included a strike.

The University's negotiations with the Teamsters leadership since last January obviously have been hampered by contention over which union should represent the technical-service employees. The American Federation of State, County and Municipal Employees (AFSME), Council 83, petitioned the Pennsylvania Labor Relations Board for an election to replace Teamsters Local No. 8. A representation election has been set by

the Labor Board for Thursday, July 13.

The University is now wedged between two competing unions. One obviously doesn't want to bargain before an election and thus is striking; the other is striving to gain control. Penn State is caught in the middle.

The University will remain open and will continue to operate its academic program and essential services throughout the period of the strike.

Faculty members, staff and clerical employees are expected to continue to meet their responsibilities. Employees in the striking bargaining unit must reach their own decisions regarding whether to participate in the strike or to report for work. Jobs will continue to be available for all employees.

Students who are in the residence halls should be aware that housekeeping services will be limited to public areas, bathrooms and removal of trash.

Scheduled meal service will be maintained. There will be some modification and consolidation, however, in HUB dining services.

The unfortunate prospect of a strike has raised many questions throughout the entire University community. An information sheet has been prepared to respond to particular questions. It will be disseminated widely and updated as necessary.

Of course there will be inconveniences. Every effort will be made to keep these to a minimum. Your understanding and cooperation will help keep the University operating in its essential role as an educational institution.

Sincerely,

Edward D. Eddy,
Provost

Information for Employees of The Pennsylvania State University

The Office of Personnel has prepared the following list of key information and questions and answers regarding the strike. We hope you find this helpful.

KEY INFORMATION:

1. Occupied dining halls and residence halls currently in use for the Summer Term will operate.
2. The Creamery Sales Room will be open.
3. The Lion's Den and the Kern Building Cafeteria will be open. The Lion's Den will have longer hours and an expanded menu.
4. Interoffice and U.S. Mail Service will continue. Schedules will vary from normal schedules. There will be one stop per building per day (Mon.-Fri.) for interoffice mail. If it may be necessary for departments to pick up U.S. Mail, they will be notified. UPS will not deliver to campus. If practical, UPS shipments should be directed to your home.
5. University telephones will continue in operation as usual.
6. The Campus Bus Loop System and London Bus tours will be discontinued.
7. Fleet operations will continue. Driver service will not be available.
8. Department of Purchases and General Stores services will continue. General Stores items are available at the store's window at the Maintenance Building; deliveries will not be made.
9. Parking and traffic regulations will continue in effect.
10. Payroll schedules will continue as usual for employees who are working.
11. Minimal custodial service will be provided for restrooms. There will be no custodial service for offices, classrooms and laboratories. Building occupants will be asked to dispose of waste in plastic bags, which will be picked up in hallways.
12. Emergency maintenance and repair services will be provided. Routine services will be discontinued.
13. Athletic and recreational facilities will be available for use.

14. Pattee Library and the Pollock Undergraduate Library will maintain regular Summer Term hours. Hours at the Branch Libraries — Davey, Hammond, Sackett, McAllister and Deike — will be reduced somewhat. Specific hours will be posted.

QUESTIONS AND ANSWERS

1. Are technical-service employees allowed to work if there is a strike?
A. Yes. The University is not involved in a lock out. Jobs will continue to be available to all employees.
2. Are faculty members, staff and clerical employees expected to work during the strike?
A. Yes. The University will continue to function. Faculty members, staff and clerical employees not covered by the Teamsters' agreement are expected to report to work as usual.
3. Are all technical-service employees permitted to strike?
A. No. Guards and other security employees are not legally or contractually permitted to strike.
4. Will striking technical-service employees receive their University benefits (hospitalization, major medical, life insurance, educational privileges, etc.)?
A. No. A striking employee, under the law, is not entitled to wages or compensation during a strike.
5. Will those technical-service employees who do report for work in the event of a strike receive their benefits?
A. Yes.
6. If a technical-service employee on strike becomes ill during the strike, will he or she be able to use sick leave accumulation?
A. No. An employee is not entitled to any pay or compensation for time missed during a strike.
7. If a technical service employee had

previously scheduled vacation and a strike occurs during the time he or she had vacation scheduled, would the employee be entitled to receive vacation pay for that period?

A. Ordinarily no. If an employee is on vacation when the strike begins the employee will be requested to return to work.

8. What is an employee expected to do if he or she has problems crossing a picket line?

A. The employee should go to the closest telephone and call his or her supervisor. The employee will receive instructions at that time.

9. May the Teamsters place large numbers of pickets at the entrances of the University and, therefore, block anyone from entering the University?

A. No. It is unlawful to block entrances, and an injunction would be sought to stop such picketing. It is unlawful to threaten, interfere with, or disturb anyone who is attempting to move about the campus.

10. Are faculty members, staff or clerical employees expected to report for work, even though they may receive verbal harassment from those picketing?

A. Yes. Verbal harassment is not sufficient reason for absences from work.

11. Will parking lots be open?

A. Yes. Some surveillance will be provided. Employees are encouraged, however, to walk to work or to use public transportation to avoid potential traffic problems.

12. What actions can a picket perform legally?

A. A picket has the legal right to inform the public that a certain group of employees is striking an employer. They cannot deny access to the University property, nor can they engage in violence or vandalism.

13. Some technical-service employees may absent themselves from work and say they are not on strike but are staying

away because they are afraid to come to work or are in sympathy with the strikers. Would these employees be considered on strike?

A. Yes. A technical-service employee who absents himself or herself for whatever reason during the strike is considered to be on strike. An employee who says he or she is afraid to cross a picket

If you have a question

Employees with any strike-related questions are encouraged to call their supervisor, personnel representative, or the special telephone in the Office of Personnel Administration — 865-3419.

The special phone will be manned from 7 a.m. through 7 p.m. for the first several days of the strike and on a Monday through Friday schedule thereafter.

line should be given instructions as to where and when it is considered safe to cross the picket line.

14. May striking employees return to work if they change their minds?
A. Yes. Their supervisors should keep accurate records of time worked.

15. How do the various colleges and departments handle calls from the news media?

A. All contacts from news personnel should be referred to the Office of Public Information and Relations. The phone number is 865-7517.

16. How will communications with employees be handled?

A. Supervisors should answer questions directly. In addition, to counteract rumors, the University has established a central information number which individuals may call to obtain up-to-date and accurate information. The number is 865-3419. A staff member will be available daily to answer the questions from 7 a.m. through 7 p.m. for the first several days of the strike and on a Monday through Friday schedule thereafter.

Penn Staters

Dr. Peter H. Schneeman and Dr. James M. Rambeau, assistant professors of English, have been awarded Fulbright lectureships for the coming year. Dr. Schneeman will go to Rumania and Dr. Rambeau to Bulgaria. Both men will serve as lecturers in American literature.

Dr. C. Max Lang, professor and chairman of comparative medicine at Hershey, has been named to the National Cancer Institute's Clinical Cancer Program Project and Cancer Center Support Review Committee. His appointment is effective through June 30, 1982.

Dr. R. V. Ramani, professor of mining engineering, has received the Distinguished Alumni Award of the Indian School of Mines, Dhanbad, India. The award was made recently in conjunction with the school's golden jubilee observance. Dr. Ramani graduated from the school in mining engineering in 1962.

Dr. Donald P. Verene, associate professor of philosophy, is co-editor of *Essays in Humanity and Technology*, the recently published collection of papers from a 1977 conference on human values and the technological society. The conference was held at Sauk Valley College in Illinois, and David Lovekin, an assistant professor of philosophy there, edited the volume with Dr. Verene.

Both men are contributors to the book, along with another Penn State faculty member, Dr. Henry W. Johnstone, Jr., professor of philosophy.

Dr. John A. Lucas, professor of physical education, and Dr. Ronald A. Smith, associate professor of physical education, have co-authored a book on the history of sport, *Saga of American Sport*, published recently by Lea & Febiger of Philadelphia.

The volume traces the development of sport in America from colonial times to the present, and emphasizes the impact of historical forces such as religion, urbanization, industrialization and technology on the evolution of organized sport.

Dr. Terence H. Risby, assistant professor of chemistry, is the co-author of a monograph designed to aid in the study of air pollution. The volume, *Determination of Toxic Metal and Metalloids in Ambient Air*, is number 42 in a series of scholarly monographs by Penn State authors published by the Penn State Press.

Intended as a reference work, the text is divided into five chapters. Each chapter contains a general description of the toxic elements and their sources, sampling procedures, and theoretical and practical considerations necessary when using a particular analytical technique.

Samuel J. DiRoberto, assistant professor of accounting at Ogonitz, received the Campus's seventh annual Outstanding Teaching Award. He was selected by a committee of the Ogonitz Faculty Senate from nominations by students and faculty.

David B. Van Dommelen, professor of art education, has been reappointed to the Crafts Advisory Panel of The Pennsylvania Council on the Arts. Prof. Van Dommelen has served on the panel for the last two years.

Dr. David L. Pearson, assistant professor of biology, recently presented an invited paper at the International Ornithological Congress in Berlin, Germany. He discussed a comparison of foraging ecology between common and rare bird species in tropical lowland forest communities.

Prof. Harrison

Prof. Rubin

Prof. Sauerlender

Prof. Addison

Retirements

John M. Harrison, who will retire July 1, has been awarded the rank of professor emeritus of journalism. He has been at Penn State for 17 years.

Mr. Harrison's wife, Shirley, also retired from the University this year, and the couple plans to move to Iowa City. Mrs. Harrison became a member of the faculty in 1965, after having held various full- and part-time teaching positions at Penn State for four years. As an assistant professor in the College of the Liberal Arts, she taught courses in English, the humanities and American studies. She holds a master's degree in the humanities from the University of Iowa.

Mr. Harrison was formerly associate editor and chief editorial writer for the Toledo, Ohio, Blade. He also served for three years as an instructor in journalism at the University of Iowa, where he was publisher of the Daily Iowan, the university newspaper, and editor of the Iowa Publisher, a magazine published by the School of Journalism.

He received his B.A. in sociology in 1934 and his M.A. in American civilization in 1961, both from the University of Iowa. He also studied at Harvard University as a Nieman Fellow.

From 1935 to 1947, he was editor of the Oakland, Iowa, Acorn, a weekly newspaper owned by his father. He was publisher of the paper from 1945 to 1947. The Acorn was cited numerous times in press association contests for general excellence of editorial writing, typography, and community service. It was the 1946 winner of the National Editorial Association general excellence award.

Mr. Harrison is the author of the book, *The Man Who Made Nashy*, David Ross Locke, and co-editor of *Muckraking, Past, Present, and Future*, published in 1974 by Penn State's Press. He also edited *American Newspapers*, 1790-1933.

Dr. Joseph Jay Rubin, biographer of poet Walt Whitman, will retire July 1 with the rank of professor emeritus of American literature.

He will remain in State College, where he is working on a biography of William Leggett, editor in the 1820s and '30s of the New York Evening Post and The Plaindealer.

In 1973, Dr. Rubin's book, *The Historic Whitman*, was published by The Pennsylvania State University Press. The book is considered by many scholars to be the definitive work on the early forces in Whitman's career.

Dr. Rubin is also the author of an earlier study, *Walt Whitman of the New York Aurora*, published in 1950 and reprinted in 1972.

In addition, in the early 1960s, he conceived and directed the publication of the Monument Edition of the novels of J.W. DeForest, a 19th century American realist.

In 1950, Dr. Rubin founded the nonprofit Bald Eagle Press, which specialized in printing 19th century Americana. With his wife, Eleanor, as designer of the books, he acted as editor and production manager. Representative

titles include *Baudelaire on Poe*, Calhoun: Basic Documents, and 100 Pennsylvania Buildings.

After Penn State's Press was founded in 1956, Dr. Rubin served as chairman of the University Press Committee and also served on the Press's advisory board.

A 1933 Penn State graduate with B.A. and M.A. degrees in English, he went on to Yale University, where he earned the Ph.D. in 1940. After service in the U.S. Army during World War II, he returned to Penn State, where he had been a member of the faculty since 1935.

Dr. Owen H. Sauerlender, professor of economics and assistant director of the Institute for Research on Land and Water Resources, will retire July 1 with the rank of professor emeritus of economics.

A native of Jamaica, West Indies, he came to Penn State in 1955. His B.S. in economics and his M.S. in agricultural economics were conferred by Iowa State University. He earned a Ph.D. in economics at the University of Minnesota. Prior to his appointment at Penn State, he taught at Minnesota and the University of Illinois. From 1947 to 1949, he was an economist with the Government of Jamaica.

Dr. Sauerlender's research has been primarily in the development of techniques by which the tools of economic analysis can be applied to the practical problems of public policy. In this connection, he has investigated regional impacts of transportation planning, the effects of interstate highways and interchanges on local property values, the regionalization of water and waste management systems, equity in real estate tax assessment, and many other aspects of the economic and social effects of public policy. Currently, he is involved in a series of research projects on the quality of life in urban communities as it is affected by the environment and by public and private development.

He is the co-author of a book, *Methodological Framework for Comprehensive Transportation Planning*, and author of numerous articles in professional journals.

Arnold Addison, a faculty member at the University since 1949, retired June 30, with the rank of professor emeritus of industrial relations.

He was appointed personnel director of the Ordnance Research Laboratory in 1948 and joined the faculty a year later as an associate professor of engineering research. In 1963 he received a joint appointment with the Applied Research Laboratory and the Industrial and Management Systems Engineering Department. He was named professor in 1973.

Prof. Addison received the B.A. and M.S. degrees from West Virginia University and did graduate work in labor management and economics at Penn State. He is a recognized authority in the field of personnel management.

He has been a consultant to various municipal governments in Pennsylvania and is the author of *A Guide to Collective Bargaining in the Public Sector in Pennsylvania and Municipal Personnel Manual*.

Twice he was visiting professor at the Productivity Center of the Monterrey Institute of Technology, Monterrey, Mexico. In 1967 he was Ford Foundation Visiting Professor of Management at Monterrey Institute of Technology.

He is the current mayor of State College.

Howard E. Dyche Jr., professor of engineering at McKeesport, has retired with the rank of professor emeritus after almost 23 years with the University.

He came to McKeesport in 1955 after being employed for 17 years with Westinghouse Electric Co. and Westinghouse Air Brake Co. He received the B.S. degree in 1938 and the M.S. in 1942 in electrical engineering from the University of Pittsburgh. While employed at Westinghouse, he was a part-time faculty member at the University of Pittsburgh.

At McKeesport, Prof. Dyche helped develop the first associate degree programs and also assisted with curriculum development for the first baccalaureate degree program offered at the Campus in 1959.

He will continue to serve as chairman of the Engineer's Council for Professional Development Faculty Committee on Accreditation for McKeesport Campus.

Obituaries

Francis T. Hall Jr., professor emeritus of electrical engineering, died June 21. A member of the faculty from 1939 to 1965, Prof. Hall held B.S. and M.S. degrees from the Massachusetts Institute of Technology. He served as assistant dean of general engineering at Penn State from 1959 until his retirement, and after that held a similar post at Boston University until his death.

Michael Felack, assistant professor of speech communication at New Kensington and a full-time faculty member since 1970, died June 26. Born July 4, 1917, Prof. Felack received both the B.A. and M.A. degrees from the University of Pittsburgh. He was a part-time faculty member from 1963 to 1970 while serving as news director of WKPA and WYDD Radio in New Kensington. At the Campus he worked for several years with the Public Information and Relations Department.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the academic community of The Pennsylvania State University.

Special Events

Thursday, June 29

Pass/fail (10-week term).
Commons Kaleidoscope, "Trading Currency Futures," noon, Kern Lobby.
Festival Theatre, Hugh Wheeler and Leonard Bernstein, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Friday, June 30

Pass/fail (10-week term).
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Saturday, July 1

Last date for August graduates to deliver doctoral theses to committee.
Behind the Scenes of *The Sunshine Boys*, 2 p.m., Pavilion Theatre. Free tickets at The Playhouse box office.

Cinema Internationale, *Allegro Non Troppo*, animated film, 7 and 9 p.m., Room 112 Kern.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Sunday, July 2

Festival Theatre, *The Sunshine Boys*, 2 and 7:30 p.m., The Pavilion Theatre.
Festival Theatre, *Candide*, 7:30 p.m., The Playhouse.

Monday, July 3

Drop deadline (10-week term).
Course repeat deadline (10-week term).
Pass/fail (10-week term).
Preregistration deadline (fall term).
Cinema Internationale, *Allegro Non Troppo*, 7 and 9 p.m., Room 112 Kern.

Tuesday, July 4

Independence Day, no classes.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Wednesday, July 5

Late registration deadline (8-week term).
Add deadline (8-week term).
Last date for written foreign language examinations (other than French and Spanish) for

advanced-degree candidates.

Commonplace Theatre, *One Day in the Life of Ivan Denisovich*, 7:30 and 9:30 p.m., Room 112 Kern.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Thursday, July 6

Commons Kaleidoscope, "An Age Revolution and an American Asset," noon, Kern Lobby.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Friday, July 7

Cinema Internationale, *Casablanca*, 7 and 9 p.m., Room 112 Kern.
Student Travel Organization film, *Bananas*, 7:45 and 9:45 p.m., Room 111 Forum.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.
Spectrum, The Romeros Guitar Trio, 8 p.m., Eisenhower Auditorium.

Saturday, July 8

Last date for final oral doctoral examinations for August graduates.

Last date for August graduates to deliver master's theses or papers to adviser.
Behind the Scenes of *Candide*, 2 p.m., The Playhouse. Free tickets at The Playhouse box office.

Cinema Internationale, Marguerite Duras, *Nathalie Granger*, French with English subtitles, 7 and 9 p.m., Room 112 Kern.
STO film, *Bananas*, 7:45 and 9:45 p.m., Room 111 Forum.

Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Festival Theatre, *The Sunshine Boys*, 8 p.m., The Pavilion Theatre.

Sunday, July 9

Third Annual CPFA Ten-Miler, 11 a.m. Entry forms at Rec Bldg. and Athletic Attic.
Festival Theatre, *Candide*, 2 and 7:30 p.m., The Playhouse.
Festival Theatre, *The Sunshine Boys*, 2 and 7:30 p.m., The Pavilion Theatre.
Cinema Internationale, *Casablanca*, 7 and 9 p.m., Room 112 Kern.
STO film, *Bananas*, 7:45 and 9:45 p.m., Room 111 Forum.

Monday, July 10

Cinema Internationale, *Nathalie Granger*, 7 and 9 p.m., Room 112 Kern.

Alan Brasington portrays *Candide* in the musical at the Playhouse.

Tuesday, July 11

Pass/fail (8-week term).
GSA Council meeting, 7 p.m., Room 101 Kern.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.

Wednesday, July 12

Pass/fail (8-week term).
Sigma Delta Epsilon, Graduate Women in Science luncheon meeting, Linda Deford, genetics, on "Turkey Parthenogenesis and Haploids," noon, Room 101 Kern.
Commonplace Theatre, *The Longest Yard*, 7:30 and 9:30 p.m., Room 112 Kern.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Spectrum, The Pennsylvania Ballet program for a young audience, 8 p.m., Eisenhower Auditorium.

Thursday, July 13

Drop deadline (8-week term).
Course repeat deadline (8-week term).
Pass/fail (8-week term).
Commons Kaleidoscope, "Trouble with Trash," noon, Kern Lobby.
Festival Theatre, *Candide*, 8 p.m., The

Playhouse.
Spectrum, The Pennsylvania Orchestra, Pops Concert, 8 p.m., Eisenhower Auditorium.

Friday, July 14

Pennsylvania Ballet Open Rehearsal, 1 p.m., Eisenhower Auditorium. Limited seating.
Cinema Internationale, Herzog, *Fata Morgana* (1970), German, 7 and 9 p.m., Room 112 Kern.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Spectrum, The Pennsylvania Ballet, 8 p.m., Eisenhower Auditorium.

Saturday, July 15

An Evening of African Music and Fashions, 7:30 p.m., Walnut Assembly Room.
Festival Theatre, *Candide*, 8 p.m., The Playhouse.
Spectrum, The Pennsylvania Ballet, 8 p.m., Eisenhower Auditorium.

Sunday, July 16

Festival Theatre, *Candide*, 2 and 7:30 p.m., The Playhouse.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., July 7. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap as provided by law, sex, or status as a disabled or Vietnam era veteran.

LABORATORY SUPERVISOR — COLLEGE OF THE LIBERAL ARTS, University Park. Responsible to the Coordinator of the Liberal Arts Data Laboratory for various administrative and technical functions. These include supervision and training of laboratory assistants, the development and operation of users' training programs, development and maintenance of computer programs and datasets, consultation with and assistance for users of hardware and software, maintenance of equipment and of supply inventories, assisting in financial management, and other general requirements of operation. A baccalaureate degree, preferably in social sciences or humanities or its equivalent, and one to two years of directly related data processing experience is required. Individual must be able to program in Fortran and Assembler and have experience in data processing support organizations as well as a knowledge of the care and use of unit record and computing equipment.

MEDICAL SOCIAL WORKER II — COLLEGE OF MEDICINE, Hershey. Responsible to the Social Services Coordinator for providing inpatient and outpatient medical social services and provide practical help and emotional support to patients and their families. Master of social work degree from an accredited college or university and/or equivalent of one to two years' directly related experience.

ASSISTANT DEAN OF STUDENT AFFAIRS.

Resident. Responsible to the Dean of Student Affairs for administration and coordination of various functions within the Student Affairs' operation at The Behrend College, primarily in the areas of recruitment and conduct standards. Participates in the delivery of services and coordinates aspects of other Student Affairs' programs, including Freshman Orientation, the Student Handbook, working with student groups and special programs. Master's degree in college student personnel or equivalent, with two to four years of directly related experience in student affairs' administration position.

ASSISTANT ACCOUNTANT — CONTROLLER'S OFFICE, University Park. Responsible to the Deputy Controller and to assigned accounting personnel for assistance in a wide variety of duties working toward the overall goal of obtaining a well-rounded accounting experience in all areas assigned within the Office of the Controller. A bachelor's degree or equivalent, preferably in accounting or related field and over three months of directly related experience.

EDITORIAL ASSISTANT — CONTINUING EDUCATION, University Park. Responsible to the Assistant Director of Broadcasting (Administration) for assisting in research, writing, monitoring status of projects for developing and maintaining files and periodically collating data and drafting reports on various activities of the unit; for arranging schedules for com-

munity ascertainment interviews for unit staff; for composing and typing routine correspondence. Written and oral communication skills essential. Knowledge of television production and programming helpful. Bachelor's degree in English, journalism, or related field and six to 12 months of directly related experience in television community services, other community services, education field work, or similar situation.

CONFERENCE COORDINATOR — CONTINUING EDUCATION, University Park. Responsible for the functions of development, organization, operation, and administration of Continuing Education programs and conferences, and services for off campus groups using University facilities. Bachelor's degree. Two or three years' directly related experience in business, industry or education desirable.

Computer Science head being sought

A search committee has been formed to review nominations and applications for the position of head of the Department of Computer Science.

All inquiries, resumes and nominations should be directed to Dr. Norman Freed, Chairman, Search Committee, Room 211 Whitmore Laboratory. Application deadline is Nov. 1.

McKeesport post open

Dr. H. G. McGibbeny, director of the McKeesport Campus, announces the reopening of the search for an Associate Director for Academic Affairs at McKeesport.

The Associate Director for Academic Affairs will serve as the chief academic officer of the Campus. This individual will, under the supervision of the Campus Director, be responsible for providing leadership and developing and maintaining academic programs in resident and continuing education. Other areas of responsibility include assessing local community academic needs; academic planning and development; recruitment, assignment, evaluation and development of faculty; course scheduling and records; and participation in other Campus and University activities.

Applicants for this position are expected to have a doctoral degree and a minimum of five years of experience in teaching and/or administration of higher education.

An advisory search committee is being established to assist the director in the search. Applications and letters of nomination should be forwarded to Dr. McGibbeny no later than July 24. Two copies of a resume should accompany letters of application.

Faculty Club to continue

Editor's note: Because questions have arisen in the University community about the future status of the Faculty Club, INTERCOM asked Acting Club President Robert L. Clewett and Kenneth P. Mortimer, the treasurer and chairman of the Club's Continuation Committee, to respond to some of the concerns which have been voiced.

Q. If the Faculty Club no longer has a building, how can it exist?

A. We know there are 520 people who wanted a Faculty Club because they paid their membership fees and joined, and there have been less than a dozen resignations since the clubhouse was closed. Relinquishing the burden of managing a building and the food service could be a real plus for the Faculty Club. It will now be possible to focus attention on Faculty Club activities and to be a great deal more flexible in arranging them. Our goals remain the same — to give an opportunity to faculty to mix beyond department and College lines and to enhance the spirit of the University community.

Q. Are any specific activities being planned for fall?

A. A Continuation Committee, chaired by Ken Mortimer, has been formed. Members include Club Chairman Marjorie East, James Hammond, Monte Christiansen, Jean Pellegri, Leon Lyday and Henry Sams. The Committee hopes to have ready a set of recommendations for the Club's Board of Directors in August or September on what the Faculty Club should look like next year. A number of ideas are being discussed. There seems to be a good deal of support among the members for the continuation of the Speakeasy as a place to eat lunch. There's an enthusiastic group which would like to continue the Friday night beer parties, which were so popular last year. There might be an annual dance, theatre parties, or activities organized around various interest groups. There also seems to be a

feeling that any organizational structure should be informal. We need a low profile organization with high profile activities.

Q. Will the Faculty Club still have the use of the former Club building?

A. President Oswald has said that the University will plan, in all likelihood, to operate the facility in conjunction with the Nittany Lion Inn, and if it does, "the facility," according to the President, "would continue of course to be available for use by the Faculty Club organization and other organizations and groups under arrangement with the Inn."

Q. What has happened to the \$50 cash deposits which members paid on joining the Club?

A. This money is safe in a separate account. The Faculty Club is still a corporation, and it still has assets, among which are the membership deposits. We have met all our bills; no payrolls were missed; and our vendors are being taken care of as money from the May billings is received.

Q. The deposits were supposed to provide working capital when the Club opened. Since the Club no longer has any responsibility for its building or food service, what is the point of keeping the money?

A. At a meeting last May, the membership suggested that the Club keep these funds until the Board of Directors decides what will be needed to support operations next fall. The Board will meet early in September to discuss the future structure of the Club.

Q. Are monthly dues still being deducted from members' paychecks?

A. Payroll deductions have been stopped for June, July and August. Persons who paid a year in advance will receive credit on their dues accounts, and adjustments will be made on future billings.

Course improvement proposals approved

Seven course improvement proposals have been accepted for funding by the office of the Vice President for Undergraduate Studies, according to Vice President Robert E. Dunham.

The projects will be coordinated and administered by Dr. Donald W. Johnson, director of the University Division of Instruction Services, and final reports are due by June 30, 1979.

The projects include:

- Improving and developing materials for Biological Sciences 1 and 2, the Department of Biochemistry and Biophysics.

- Developing teaching modules and a student manual for FSHA 330, Food Production Systems, the Division of Man-Environment Relations.

- Developing materials and writing a

laboratory manual for Civil Engineering 44, the Department of Civil Engineering.

- Developing materials for Economic Entomology 12, the Department of Entomology.

- Creating new materials for the Science, Technology and Society Program, an Intercollege Undergraduate Program.

- Developing a measurement system for the Electrical Engineering labs, the Department of Electrical Engineering.

- Developing materials for Library Studies 001, the College of Liberal Arts.

The projects were selected by a six-member committee, chaired by Dr. Johnson, which included representatives from the Colleges, Campuses, the University Faculty Senate, the Administration and the student body.

WPSX Highlights

In rehearsal in France and on tour in Canada, ballerina Karen Kain is profiled Saturday, July 1, at 9 p.m. on **Karen Kain: Ballerina**. She is seen in various roles, as the one-hour documentary special traces her career, beginning with her early training at the National Ballet of Canada.

Opera Theatre returns to Channel 3 Monday, July 3, at 9 p.m. with a one-hour documentary and performance special celebrating the Santa Fe Festival.

Bass-baritone, Donald Gramm — who appeared at Penn State in *Be Glad Then America* — introduces highlights of the 1976 season with excerpts from the premiere of *The Mother of Us All* by Virgil Thomson and Gertrude Stein, and other productions.

Penn State Television's **Be Glad Then America... A Documentary**, which traces the history of the University's Bicentennial opera presentation of John LaMontaine's *Be Glad Then America* is featured Monday, July 3, at 10 p.m. Members of the Penn State choirs join Donald Gramm, Richard Lewis, David Lloyd, and Odette under the direction of Sarah Caldwell in performance segments which blend with documentary segments to show behind-the-scenes activities.

Arthur Fiedler and the Boston Pops Orchestra throw a Fourth of July party for 300,000 people on the banks of Boston's Charles River on an **Evening at Pops Special**, Tuesday, July 4, at 8 p.m. Included in their concert is music by Sousa, Handel, Strauss, Offenbach, and Tchaikovsky.

The Romero brothers

Arts Roundup

Guitarists to appear

The Romero Brothers, an internationally acclaimed trio of Spanish guitarists, will be appearing in concert at 8 p.m. Friday, July 7, in Eisenhower Auditorium.

With a repertoire that ranges from Baroque through Flamenco, the three brothers, Celin, Pepe and Angel, have played to sell-out crowds throughout the United States and Europe. They have performed with virtually every major American symphony orchestra.

The Romero's concert is the third event of Nittany Mountain Summer's Spectrum of Music and Dance series. Tickets are on sale from 10 a.m. to 4 p.m. Monday through Friday at the Eisenhower Auditorium box office. The box office will reopen at 5 p.m. the evening of the performance. VISA, MasterCard and out-of-town mail orders are accepted. For further information, call (814) 363-0255.

'Candide' opens

The Festival Theatre's production of *Candide*, a musical based on the Voltaire novel, has opened in the Playhouse Theatre.

The play, from a book by Hugh Wheeler, was set to music by Leonard Bernstein, with lyrics by Richard Wilbur. Additional lyrics were provided by Stephen Sondheim and John Latouche.

Garland Wright is directing the production, the second of this Festival season. Musical director is Bruce Trinkle, associate professor of music at the University. Mr. Wright and Mr. Trinkle have shared credits on previous Festival productions of *The Golden Apple*, *A Little Night Music* and *Gershwin Revisited*.

Candide is a tale about the education of a perpetual innocent, Candide, and his lost love, Cunegonde, from whom he becomes separated when war forces them to flee their country. Candide, played by Stephen Lehigh, has a series of bizarre adventures as he travels around the world in search of Cunegonde, played by Margaret Benzack.

The Festival Theatre Company will hold "Behind the Scenes," a look at the development of *Candide*, at 2 p.m., July 8. "Behind the Scenes" is a chance for interested patrons to meet with members of the cast and production crew in an informal discussion atmosphere. Free tickets to "Behind the Scenes" are available at the Playhouse Theatre Box Office.

Performances of *Candide* will continue through July 16. Show times are Tuesday through Saturday, 8 p.m.; Sunday matinees, 2 p.m.; and Sunday evening performances, 7:30 p.m. Single tickets are

on sale at the Playhouse Theatre Box Office from 10 a.m. to 9 p.m. daily. Reservations may be made by calling (814) 865-1884 during those hours. Tickets on reserve must be paid for no later than 48 hours before the performance.

Ballet to return

Four public programs will be presented by the Pennsylvania Ballet and Orchestra during their residency at the University July 10-16. The residency coincides with the Central Pennsylvania Festival of the Arts and is part of Nittany Mountain Summer Festival '78.

The Ballet and Orchestra will perform jointly on July 12 in a program designed for a young audience and on July 14 and 15 in general programs. On July 14 the Orchestra will present a pops concert titled "Music for a Summer Evening." There will also be an open rehearsal of the company, but the time for that event has not yet been determined.

The Wednesday young people's program will consist of two works, "Interplay," a light and joyful piece with music by Morton Gould and choreography by Jerome Robbins; and "Under the Sun," a piece inspired by the works of sculptor Alexander Calder and choreographed by Margot Sappington to the music of Michael Kamen.

The Friday Ballet program will repeat these two works and include as well "Divertimento No. 15," a classical piece with Balanchine choreography and Mozart music.

Saturday evening's performance will consist of "Pas de Dix," also a classical work, choreographed by Balanchine to music by Alexander Glazunov; "Signatures," a work created specifically for the Pennsylvania Ballet, with choreography by Benjamin Harkavy; artistic director of the company, and music by Maurice Klaproff, Ballet musical director and conductor of the Pennsylvania Orchestra; and "Symphony in C," another classical work, with Balanchine choreography and Bizet music.

The Wednesday pops concert by the Pennsylvania Orchestra will present a variety of popular and light classical works, including Bartok's "Romanian Dances," "Rags and Waltzes" by Scott Joplin and Gershwin's *Rhapsody in Blue*. Curtain time for all performances is 8 p.m. Tickets for ballet and orchestra events are being handled by the Nittany Mountain Summer Spectrum box office at Eisenhower Auditorium. Hours are 10 a.m.-4 p.m. Monday through Friday and beginning at 5 p.m. on days of performance.

Penn State

Reporter

Intercom

Penn Staters

Dr. Margaret B. Matson, professor of sociology and social welfare, and Dr. Frederick R. Matson, research professor of archaeology, have retired with a combined total of 55 years of service.

Margaret Matson has been awarded the rank of professor emerita of sociology and social welfare and Frederick Matson, the rank of professor emeritus of archaeology.

Earlier this year, Margaret Matson was honored as the 1978 recipient of the McKay Donkin Award and the Liberal Arts Alumni Award for Distinction in the Social Sciences.

A member of the University faculty since 1953, she served as vice-chairman of the University Faculty Senate, interim head of her department, a member of the Faculty Advisory Committee, University Council and the University's Five-Year Budget Planning Task Force.

Since 1975, Dr. Matson has been a member of the Commission on Higher Education of the Middle States Association and has served on a number of accreditation teams. From 1973 to 1977, she was a member of the board of directors of the Council on Social Work Education.

Dr. Matson received a B.A. in sociology from the University of Missouri and a Ph.D. from Penn State. While social welfare courses were taught at Penn State before she came to the University, she is credited with developing the social welfare major and with greatly expanding the course offerings. There are now almost 300 majors in the social welfare program, making it the sixth largest major field in the College of the Liberal Arts.

She is the author of a widely used monograph, *Field Experience in Undergraduate Programs in Social Welfare*.

Frederick Matson's research and field work have combined his interests in ceramics and archaeology. He has also played a major role in the acquisition of pottery for the University's Museum of Anthropology.

He was elected a Fellow of the Society of Antiquaries of London last year and is the immediate past-president of the Archaeological Institute of America.

A member of Penn State's faculty since 1948, Dr. Matson was first appointed as a professor of ceramics. In 1953, he was named professor of archaeology. From 1957 to 1966, he also served as an assistant and associate dean for research and graduate study in the College of the Liberal Arts and as director of the University's Social Science Research Center.

He has done extensive field work, both in this country and the Near East. A native of Chicago, he earned a B.S. in ceramic engineering from the University of Illinois. His M.A. in anthropology and Ph.D. in ceramic archaeology were conferred by the University of Michigan.

He has lectured throughout the world and recently served as Walker-Atnes Professor at the University of Washington. He is a research collaborator at Brookhaven National Laboratory, where he is working on neutron activation analyses of Egyptian and Near Eastern clay and pottery. A Fellow of the American Ceramic Society since 1958, he was both its Orton Lecturer and Distinguished Lecturer.

He has been a University Seminar Associate of Columbia University, and in 1969, he was appointed a Wilbour Fellow of the Department of Ancient Art of the

Margaret Matson

Frederick Matson

Brooklyn Museum. He is also a research associate of the Carnegie Museum in Pittsburgh and is on the Scientific Advisory Committee of the Winterthur Museum in Delaware.

Dr. W. LaMarr Kopp has been named director of the Office of Foreign Studies, following the retirement on June 30 of Dr. Dagobert de Levie. Dr. Kopp is professor of German and associate dean for undergraduate studies in the College of the Liberal Arts.

Dr. de Levie, also a professor of German, had been director of Foreign Studies since the program's inception in 1962.

Originally known as the Study Abroad Program, Foreign Studies has made it possible for more than 3,000 Penn State students to study in 22 locations in different countries during the past 16 years.

Dr. Kopp, who came to the University in 1962, formerly taught at Augsburg College in Minneapolis; Goshen College in Goshen, Ind.; the University of Pennsylvania, and Temple University.

He was also executive director of the Mennonite Voluntary Service, an international organization operated in cooperation with UNESCO from 1954 to 1957. During those years, he traveled approximately 250,000 miles throughout Western Europe to meet with officials of various agencies establishing and operating projects involving students and other young people from many countries.

A graduate of Goshen College, he received his M.A. from the University of Minnesota and his Ph.D. from Penn State, both in German. From 1972 to 1975, he made five visits to Germany in the service of the American Association of Teachers of German.

Dr. Edward J. Massaro, professor of biochemistry at SUNY-Buffalo, has been appointed professor of veterinary science

News in Brief

Ballet in residence

The Pennsylvania Ballet will end a week's residency at the University with two public programs Friday and Saturday, July 14 and 15, in Eisenhower Auditorium. Curtain time for both performances is 8 p.m.

The Friday evening program features three works — *Divertimento No. 15*, a classical piece with music by Mozart and choreography by Balanchine; *Under the Sun*, a modern work inspired by the mobiles of Alexander Calder, with music by Michael Kamen and choreography by Margo Sappington; and *Grand Pas Espagnol*, five Spanish dances with music by Moszkowski and choreography by Benjamin Harkavy, artistic director of the Ballet.

The Saturday evening performance will include two Balanchine works, *Pas de Dix*, with music by Alexander Glazunov, and *Symphony in C*, music by Bizet; and *Signatures*, a work designed specifically for the Ballet with choreography by Mr. Harkavy and music by Maurice Klapow, musical director of the Ballet and conductor of the Pennsylvania Orchestra.

Tickets for both programs are on sale at the Eisenhower box office. Hours are 10 a.m. to 4 p.m. Monday through Friday and beginning again at 5 p.m. on days of performance. The box office will also be open at 1 p.m. this Saturday.

The Ballet's residency at the University is an offering of Nittany Mountain Summer Festival '78 and is supported in part by a grant from the National Endowment for the Arts.

Secretary Kline to speak

Pennsylvania Secretary of Education, Caryl M. Kline, will speak at the Phi Delta Kappa/College of Education 1978 Summer Lecture Series at 2:20 p.m. on Monday, July 17, in Room 112 Kern Graduate Bldg. Her topic will be "Educational Priorities in Pennsylvania."

The public is invited to the lecture, and free tickets may be obtained at Kern's Information Center or by sending a request with a stamped, self-addressed envelope to Kern.

and director of the Center for Air Environment Studies. He will be responsible for the academic programs of the Center, which is in the office of the Vice President for Research and Graduate Studies. The mission of the Center is to offer opportunities for interdisciplinary research on air environment problems.

Dr. Massaro attained his B.A. at Rutgers and his M.A. and Ph.D. from the University of Texas. An environmental toxicologist/biochemistry and an expert in the area of toxicology of heavy metals, Dr. Massaro joined the SUNY faculty in 1968 after serving as a research associate at Johns Hopkins and Yale.

Anne Herpel, an administrative aide in the Office of the Vice President for Undergraduate Studies, has been named basic skills coordinator at the University, effective immediately.

A 1970 Penn State graduate with a B.A. in general arts and sciences, Ms. Herpel

Paychecks at Bursar's

The regular pay day for pay earned during the last half of June is Friday, July 14, 1978. Paychecks for University Park, technical-service employees on strike will be available for employee pickup at window number six in the Bursar's Office, Room 103 Shields Bldg., from 9 a.m. to

Publications combined

During the strike by the University's technical-service employees, INTERCOM and the PENN STATE REPORTER have been combined into one publication.

4:30 p.m., July 14, 1978. Checks will be mailed directly to banks for those employees with automatic bank deposit arrangements.

Identification will be required at the time of pickup. Each individual must pick up his or her own check personally. Checks not picked up on July 14 will be held and may be picked up at the Bursar's Office from 8:30 a.m. to 4:30 p.m., Monday through Friday, the following week.

Employees driving to campus to pick up checks are asked to park in the Orange L parking lot of University Drive off Curtin Road.

University Park, technical-service employees working during this period will receive their paychecks at their work sites on Friday, July 14.

Checks for employees at facilities other than University Park will be available through each facility business office.

Reserve reading lists due

Reserve reading lists for fall term 1978 should be submitted to the Reserve Reading Room, W11 Pattee on or before July 24, to allow ample time for processing. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes; all reserve lists will be processed strictly in order received.

Only required readings, which will circulate either for a two-hour period or for an overnight loan period, will be placed on reserve.

Typewritten lists should be submitted on reserve forms which are available by mail or in person in W11 Pattee.

joined the University's staff in 1971.

The three-year experimental basic skills program was launched last year and is designed to help students develop basic skills necessary for success at the university level. Research oriented, it was approved by the University Faculty Senate.

Dr. Peter D. Bennett, professor of marketing, will serve as a distinguished visiting professor in the Department of Marketing Administration, University of Texas at Austin, during the fall semester.

Charles P. Hary, an assistant professor of engineering at Capital Campus, died June 27. He was 51. A graduate of the U.S. Naval Academy at Annapolis, Prof. Hary earned the MSME degree at the U.S. Naval Postgraduate School. He served in the Navy from 1944 to 1968. He had been a member of Capitol's faculty for ten years.

Calendar

July 13-23

Special Events

Thursday, July 13

Drop deadline (8-week term).
Course repeat deadline (8-week term).

Robeson Cultural Center: Billie Veitch-Clennon, silk-screen photos, through July 15.

Sackett Gallery: PSU architecture students, "The Architectural Component of Light," drawings, photos and models.

Pattee Galleries: Amish quilts, East Corridor Gallery. Dawn Ulincy, watercolors, Lending Services Lobby.

CPFA Exhibits, open Monday-Wednesday, noon-5 p.m., Thursday-Sunday, noon-8 p.m. Fairmount Elementary School, Juried Fine Art Show, Art Alliance Juried Show, Art in Photography, St. Andrews Episcopal Church Parish Hall, Heritage Plus, Juried Fine Arts Show, Art in Stamps.

painting and maintenance. Leadership qualities and experience in supervisory capacity are required.

ASSISTANT DIRECTOR FOR QUALITY RELATIONS, Altona Campus. Responsible to the Campus Director for organizing and conducting a comprehensive University Relations program for the entire Campus, including Continuing Education, Public Information and Relations to the Endowments, Alumni and community activities. Bachelor's degree or equivalent, plus two to four years of directly related experience, preferably involving newspaper and/or journalistic writing or public relations. Relevant experience in higher education is desirable.

PSYCHIATRIC ASSISTANT (Two Positions) - COLLEGE OF MEDICINE, Hershey. Responsible to the Chief of the Psychiatric Inpatient Unit. This responsibility is delegated on a day by day basis to the Psychiatric Nurse Supervisor and to the nurse team leader on the Psychiatric Assistant's assigned shift. Assist the nursing staff in the management of psychiatric inpatients. An associate degree or equivalent to two years of college, preferably in a related medical field or in psychology or equivalent professional experience.

PROJECT ASSISTANT - COLLEGE OF EDUCATION, University Park. Responsible to the Project Director of Admissions Prevention Laboratory for the coordination and implementation of data analyses to include participation in the design of evaluation research, administration of a Management Information System, selection, development, and adaptation of computer programs, maintenance of data storage and supervision of coders and data processors. Master's degree or equivalent with major coursework in computer programming, research design, and/or statistics, plus one to two years of effective experience in the collection of quantitative and formal training, which provides comparative knowledge of the principles, methods, materials, techniques and procedures of data analysis. Prior experience with the University's Computerization Center is highly desirable. A Fixed-Term position, funding annually.

Funding Sources

For further information, call 865-1372 (Network 7-475-1372).

(316-1) Danforth Foundation reminds students planning to apply for 1979 graduate fellowships that GRE scores are required. Be sure to schedule these examinations in the fall quarter. Tests taken after Oct. 1 may be reported too late to meet the Onanforth Foundation deadline. The deadline for graduate students to apply for nomination is Oct. 31, 1978. Each graduate student interested in applying should schedule an interview with Olan B. F. Howell, Room 320 Kern Graduate Bldg., before Oct. 31, 1978. Because Penn State can nominate 15 graduate students this year, we can probably nominate all interested graduate students. This is a change from previous years when undergraduates were given preference. There is also greater interest in applications from science students this year. Each applicant should request nomination in writing stating her/his local and permanent addresses and phone numbers and affirming interest in teaching as a career. Seniors planning to apply should contact R. E. G. O'Connell, Room 117 Old Main, who is liaison officer for undergraduate students. When you schedule your GRE examinations, be sure to arrange that the results of your tests be forwarded to Onanforth Foundation. Awards are for one year, renewable for up to four years. The stipend is \$2500 plus tuition plus a dependency allowance if applicable. (Ref. FO 78-9)

(316-2) US Dept. of Transportation (Office of University Research, OIR-50, Room 9413, Nassif Bldg., 407 7th St., SW, Washington, DC 20590) offers postdoctoral fellowships for faculty wishing a year's experience in OOT operations. For further information write to the address given above. (Ref. FO 78-9)

(316-3) The British Council General (2320 PSFS Bldg., 125 12th St., Philadelphia, PA 19107; phone 215-915-2400) offers graduate studentships. When you schedule your GRE examinations, be sure to arrange that the results of your tests be forwarded to Onanforth Foundation. Awards are for one year, renewable for up to four years. The stipend is \$2500 plus tuition plus a dependency allowance if applicable. (Ref. FO 78-9)

(316-4) Preliminary proposals for the NSF Ethics and Values in Science and Technology (EVIST) program are due by Sept. 1. Contact Dr. William Blaupied in the Office of Science and Society (202-282-7770). (Ref. NSF Bulletin)

(316-5) The NSF Public Understanding of Science (PUS) program has an Oct. 1 deadline for preliminary proposals. Contact Dr. Jean Intermaggio in the Office of Science and Society (202-282-7770). (Ref. NSF Bulletin)

(316-6) NSF grants are awarded in support of doctoral dissertation research in the environmental, behavioral, neural and social sciences. Grants are intended to provide funds for (a) travel, surveys, equipment and services. Funds may not be used for stipends, tuition or dependents. Proposals must be submitted through the department by the dissertation advisor. (Ref. NSF 78-17)

(316-7) NSF supports basic research in demography, economics, human geography and regional science, law and social sciences, political science, sociology, and interdisciplinary studies including natural sciences and engineering. The next two deadlines are Aug. 15 and Oct. 1. Contact the Division for Biological, Behavioral and Social Sciences (202-632-4286). (Ref. NSF 77-15)

FELLOWSHIPS

For further information, inquire at Room 320 Kern or call 865-2514.

(317-1) American Film Institute (501 Ocheny Drive Beverly Hills, Calif. 90210) administers for the National Endowment of the Arts a program of grants to filmmakers. For further information write to the address given above. The application deadline is Sept. 15.

(317-2) National Endowment for the Arts (Visual Arts Program, Mail Stop 700, 1300 Constitution Avenue, Washington, D.C. 20506) has fellowships for video artists. The application deadline is Oct. 16. For further information write to the address given above.

INTERCOM is an internal communications medium published weekly during the first two terms of the class schedule for the academic community of The Pennsylvania State University.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., July 20, 1978. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam area veteran.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS - STUDENT AFFAIRS, Delaware County Campus. Responsible to the Dean of Student Affairs for the administration and coordination of various functions within Student Affairs' operations, primarily secondary school relations, admission, and recruitment; participates in the delivery of services and controls aspects of other programs including change of assignments, provisional degree and non-degree students and college fairs. Master's degree in student personnel administration, counseling or related field, plus up to one year directly related experience or a bachelor's degree and equivalent job related experience of more than two years.

PROGRAMMER/ANALYST - INTERCOLLEGE PROGRAMS, University Park. Responsible for analysis, design, implementation, and maintenance of systems and procedures necessary for the management accounting function of the Computer Center. Other responsibilities include analysis and presentation of management information, including accounting and other systems data, interface with faculty and staff

with regard to problems related to the above areas. Bachelor's degree in business administration or computer science or equivalent training, plus two to three years of directly related experience which includes analysis and design of computer oriented systems, course credit or experience with Fortran or PL/I, and business accounting. Potential for promotion to master's degree is highly desirable.

COLLEGE HEALTH NURSE, Beaver Campus. Responsible administratively to the Dean of Student Affairs and professionally to the Director of Nursing Service for providing nursing care to the student body, including the treatment of minor and temporary illnesses and accidents, plus making appointments and referring students and employees to a physician or hospital when necessary. Graduate or an accredited nursing program or its equivalent and current license in Pennsylvania as a registered nurse, plus six to nine months of directly related experience with some public health experience or training.

MANAGER, PATIENT NUTRITIONAL CARE - COLLEGE OF MEDICINE, Hershey. Responsible to the Assistant Hospital Director for the development and execution of educational programs in clinical nutrition for medical students, interns, residents, medical dietitians and interns, nursing interns, community nutrition and other health professional groups. Registered dietitian, graduated from an accredited internship or equivalent, plus three to four years of directly related experience required.

MAINTENANCE FOREMAN, Shertango Valley Campus. Responsible to the Business Manager for planning and scheduling the maintenance, operation, repair and preventive maintenance of the mechanical and utilities installation, building systems and facilities at the Shertango Valley Campus. Also responsible for the scheduling and supervision of physical plant employees. Associate degree in electrical or mechanical technology, or an equivalent amount of organized outside study or training with a high school education, plus two to four years of directly related experience in carpentry, electrical work, landscaping, plumbing,

Reporter Intercom

WHAT HAPPENED?

Negotiators for Teamsters Local No. 8 presented the University with a set of take-it-or-leave-it demands when collective bargaining resumed on Tuesday. The University responded with a good faith, equitable offer. If ratified by Teamster members, it would have settled the three-week-old strike against Penn State. The Teamster negotiating team refused, however, to take the offer to its membership for a vote.

1. WHAT WERE THE MAJOR ITEMS IN THE UNIVERSITY'S OFFER?

- A three-year contract;
- A 19 per cent wage increase by July 1, 1980;
- On top of this 19 per cent are the fringe benefit costs related to the wage increases;
- Wage increases in the first year of 6.25 per cent; in the second year, 6 per cent; and in the third year, 5.75 per cent;
- A dental insurance plan, free for employees, beginning in the second year of the contract;
- Dependent coverage under the dental plan at group

rates; and

- Assumption of part of the cost of dependent coverage under the dental plan in the third year.
- The union's negotiating team spent less than 10 minutes discussing this offer, then broke off negotiations.

2. WHAT WERE THE UNION'S DEMANDS?

- A three-year contract, which Penn State has offered;
- Wage increases of 8 per cent per year, or approximately 26 per cent in wage increases, when compounded, over the three-year period;
- In addition, an automatic cost-of-living clause;
- A dental insurance plan for employees which was offered; and
- In addition, insurance plans for vision care and prescription drugs.

3. WHAT ARE THE MAJOR BARRIERS TO REACHING A SETTLEMENT?

Wages, of course, remain a major issue. What also makes the current Teamsters' proposal

prohibitive are the demands for the introduction of an automatic cost-of-living clause and the introduction of two additional insurance plans — vision care and prescription drugs — in addition to the dental plan already offered by Penn State.

Penn State's funding status with the Commonwealth presents a barrier to a cost-of-living clause. The Commonwealth of Pennsylvania has no cost-of-living clause in its contracts with more than 100,000 state employees. No other state-related university in Pennsylvania, to our knowledge, has a cost-of-living clause in any union contract. Like Penn State, these institutions and agencies have no direct control over the major source of their income and cannot agree to an automatic cost-of-living clause.

The University is deeply disappointed over this most recent development in negotiations. We will continue to make every effort to end the strike, and we remain ready to resume negotiations at any time.

The Pennsylvania State University

News in brief

Play opens at Pavilion

Lu Ann Hampton Laverdy Overlander, the second of playwright Preston Jones' *Trilogy*, opens at 8 p.m. tonight at the Pavilion Theatre and continues there through Aug. 6.

The Last Meeting of the Knights of the White Magnolia, the first of the *Trilogy*, was one of the productions of last season's Festival Theatre, and the current show has many of the same characters and reveals more of the life of the people of Bradleyville, Texas, population 6,000 and decreasing.

The drama is a mixture of sadness and humor and has been credited with playing a key role in establishing Mr. Jones as one of the country's leading playwrights.

The title role will be performed by Dawn Dilawick, a member of the Equity company of Festival Theatre. In the course of the play she matures from a high school senior, through two marriages, into middle age Robert E. Leonard, who directed last season's *Trilogy* production, is directing the current work. Also returning for the second production are actors David Wurst, as Rufe, and Paul C. Thomas, as Red Grover.

Tickets for this and *An Offer You Can't Refuse*, the last Festival production of the season, are on sale at the Playhouse box office, which is located in the Arts Bldg. Box office hours are 10 a.m. to 9 p.m. daily, and phone reservations may be placed during these hours. The number is 865-1884.

Broadway review set

Broadway a la Carte, a vocal and instrumental review of hits from Broadway musicals, will be presented at 8 p.m. on Friday, July 21, in the Milton S. Eisenhower Auditorium.

The review will be performed by a quartet of young professionals from New York's Eastern Opera Theatre. Opening with "There's no Tune like a Show Tune," they sing and dance their way through a fast-paced medley of songs from popular composers, including Rodgers and Hammerstein, Irving Berlin, Leonard Bernstein, Stephen Sondheim, George Gershwin and Cole Porter.

Solos from *West Side Story*, *Showboat*,

Carousel, and *Naughty Marietta* open the show, and a 50-song medley, comprising the show's entire second act, includes numbers from *South Pacific*, *Guys and Dolls*, *Fiddler on the Roof*, *Finian's Rainbow*, and *Cabaret*.

The Eastern Opera Theatre is in residence at the American Shakespeare Theatre in Stratford, Conn. With its sister company, the Manhattan Savoyards, the group has performed in colleges, universities and summer festivals throughout the country, and has accompanied many major symphony orchestras.

Broadway a la Carte will be presented as part of Nittany Mountain Summer's Festival '78. The festival's remaining event in the Spectrum series for this season is the Loretta Lynn show, which will have two performances at 7 and 9 p.m. on Friday, July 28.

Tickets for both the Loretta Lynn show and *Broadway a la Carte* are on sale at the Eisenhower Auditorium box office. Box office hours are 10 a.m. through 4 p.m. Monday through Friday and 10 a.m. until 9 p.m. on the evening of each performance. Tickets may be ordered by phone, and may be charged on Mastercharge or VISA cards, or paid for by checks made out to The Pennsylvania State University. For information and ticket orders, call (814) 863-0255.

Dr. Snyder to be speaker

Associate professor of educational psychology Helen I. Snyder will speak at the Phi Delta Kappa/College of Education 1978 Summer Lecture Series on Thursday, July 27, at 3:55 p.m. in 112 Kern Auditorium. Her topic will be "Basic Skills: The Tip of an Iceberg?"

The public is invited to the lecture, and free tickets may be obtained at Kern's Information Center or by sending a request with a stamped, self-addressed envelope to Kern.

Liability coverage

The University's comprehensive general liability policy covers faculty members or other employees who might be charged with negligence in connection with an injury to a handicapped student, according to University lawyer Delbert J. McQuaide.

Mr. McQuaide's opinion was sought by Provost Edward D. Eddy in response to

numerous inquiries received from faculty indicating concern about their liability for injuries to the handicapped.

Although there is no body of law on this particular subject, Mr. McQuaide noted that "the Provost that, in his opinion, 'there is no cause for alarm.'"

In addition to coverage under the University's insurance, Mr. McQuaide noted that "the touchstone of a negligence claim is reasonableness and foreseeability." He continued:

"Conduct by a faculty member toward a handicapped person need be only reasonable under the circumstances, having due regard for the handicap. If the faculty members act in a manner such that an injury is not reasonably foreseeable, there should be no liability. Of course, reasonable conduct toward a handicapped person may involve some precautions not normally taken."

Travel discounts available

In response to requests from faculty and

staff for information about motel and rental-car agency discounts when travelling on University business, the Department of Purchasing Services reports that many of the major motel chains offer a discount of at least 10 per cent upon presentation of a Corporate Rate number and University identification.

Avis has extended a special discount rate program to the University for automobile rentals.

Up-to-date information on motel and rental agency policies may be obtained by sending a brief memo to the Department of Purchasing Services, attention Joan Everhart, Room 219 Shields Bldg. Queries will be answered promptly.

"On the Avenue . . ."

Twenty recent books of The Pennsylvania State University Press are being exhibited in a window of the New York Public Library's new circulating branch, Fifth

(Cont. on page 2)

Approximately 180 buildings at University Park are being surveyed this summer to identify physical barriers to the handicapped. Six teams of two students each are conducting the surveys under the direction of the Office of Physical Plant. The results will be used to determine where improvement is needed and how much it may cost. Here, Barbara Bruce, a 14th term student in home economics administration, and Bob Carlson, 13th term, civil engineering, measure the handrails on a set of steps near Buckhout Laboratory.

Saturday, July 29
Behind the Scenes of *Lu Ann Hampton Laverly Oberlander*, 2 p.m., The Pavilion Theatre. Free tickets at The Playhouse box office.
Cinema Internationale, Tavernier, *Let Joy Reign Supreme*, French with English subtitles, 7 and 9 p.m., Room 112 Kern.

STO film, *The Spy Who Loved Me*, 7:45 and 10 p.m., Room 111 Forum.
Festival Theatre, *An Offer You Can't Refuse*, 8 p.m., The Playhouse.
Festival Theatre, *Lu Ann Hampton Laverly Oberlander*, 8 p.m., The Pavilion Theatre.
Sunday, July 30
Festival Theatre, *Lu Ann Hampton Laverly Oberlander*, 2 and 7:30 p.m., The Pavilion Theatre.
Festival Theatre, *An Offer You Can't Refuse*, 7:30 p.m., The Playhouse.
STO film, *The Spy Who Loved Me*, 7:45 and 10 p.m., Room 111 Forum.

Exhibits

Anthropology Museum: open Tuesday, Wednesday, Thursday, noon-4 p.m. Pre-Columbian materials, Greek ceramics.
Chambers Gallery: Vinod Kobisz, Karl Love, Gregg A. Mierka - mixed media, opens July 24
Earth and Mineral Sciences Museum: open Tuesday-Friday, 9 a.m.-5 p.m., Saturday and Sunday, 1-5 p.m., Steidle Bldg.
Frost Entomological Museum: open 9 a.m.-noon, 1-4:30 p.m., weekdays. Live aquatic insects; live seasonal insects. Room 102 Patterson.
Kern Commons Gallery: Andrew Schuster, ceramics, through July 21. George Lavashin, wildlife drawings, opens July 22.
Pattee Galleries: Amish quilts, East Corridor Gallery; Dawn Ullery, watercolors, Lending Services Lobby.
Robeson Cultural Center: African fashions
Sackett Gallery: PSU architecture students, "The Architectural Component of Light," drawings, photos and models.

News in Brief

(Cont. from page 1)

Avenue at 40th Street in Manhattan, during July. The library inventing leading presses to install exhibits in the show windows of the former Arnold Constable store before it is remodeled. Among the books in the Penn State display are Bridget Ann Henrich's *Fast and Feast: Food in Medieval Society*, Francis E. Hyslop's *Henri Evenslop: Belgian Painter in Paris* and Stanley Weintraub's *Aubrey Beardsley: Imp of the Perverse*.
In a nearby library window, the Association of American University Presses is exhibiting the Penn State Press's *Gymnastic Safety Manual*, together with other winners of the organization's annual

design and manufacture awards. The manual was edited by Gene Wettstone and designed by Glenn Ruby, with production supervised by Janet Dietz.

Craft classes offered

The second summer session of classes offered by the HUB Craft Centre will begin next week, and registration is being conducted now. Memberships are also available to persons interested in using Craft Centre facilities and equipment.
Courses are started Sunday through Thursday evenings, and a few are also offered mornings. Batik, macramé, stained glass, hand-built pottery, and wheel-thrown pottery are the subjects this session. For additional information, call 863-0611.

WPSX Highlights

In November, 1977, Amnesty International, U.S.A., honored victims of political persecution throughout the world - those individuals whose plays, poetry, music, and journalism have led to the forfeiture of their freedom. Art Buchwald hosts public television coverage of this event Friday, July 21, at 9 p.m. on *The Night of the Empty Chairs*. American peer stand-ins filled the empty chairs of their persecuted counterparts.
Wagner's opera *The Flying Dutchman* will be presented on Opera Theatre Monday, July 24, beginning at 9 p.m. Norman Bailey and Gwyneth Jones star in the production.
Tuesday, July 25, at 8 p.m., modern Hawaiians retrace an ancient journey across the 3,000 miles of ocean from Hawaii to Tahiti on *Voyage of the Hukule'a*, a National Geographic Special.

Wednesday, July 26, at 8 p.m., Nova provides a rare look at Zaire's Mbun pygmies, revealing the secrets of a culture that has survived for thousands of years, untouched by modern civilization.
Members of the Los Angeles Actors Theatre - Ralph Waite, Donald Moffat, and Dana Elcar - star in Samuel Beckett's classic absurdist drama, *Waiting for Godot*, Wednesday, July 26, at 9 p.m. on Great Performances.

Grant fields include agriculture, natural resources, oceanography, environmental urban and regional planning, industrial technology, energy, biomedical sciences, and basic sciences. Deadline is Aug. 21. Request applications from Mr. Charles Garvey, Office of Advanced and Applied Technology Affairs, Bureau of Ocean and International Environmental and Scientific Affairs, Room 4327A, Department of State, 2201 C Street, N.W., Washington, D.C. 20520 (Ref 43FR30002-3, 07/12/78).
(319-2) The Association of American Colleges announces a two year Quality in Liberal Learning (QILL) program of direct costs made possible by a grant from the Ford Foundation. Eligible projects may fall within three themes and should show application beyond the host campus. Themes are: 1) helping communities between or among the humanities, social sciences, and natural sciences; 2) strengthening the liberal learning component of continuing education; and 3) helping integral liberal learning with career and professional education. Awards range from \$10,000 to \$100,000 and are expected to average \$2,500. Faculty administration, staff, or students are eligible. The next three deadlines are Oct. 16, Feb. 15, 1979, and June 15, 1979. Application may be made at any time.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 863-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 3 p.m. July 27, 1978. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

APPLICATIONS/PROGRAMMER ANALYST, MANAGEMENT SERVICES - University Park Responsible to designated project leader for conducting analyses of data processing operations, supporting the degree audit system; determining detailed requirements for upgrading operational systems and preparing computer programs to satisfy the end result. Make presentations and submit written reports. Assist in providing direction and control within the specifications of project schedule. Bachelor's degree or equivalent in basic computer systems and one to two years of directly related experience in computer programming and analyses is required. A working knowledge of COBOL and PL/I is highly desirable.
COORDINATOR, CAMPUS RESIDENTIAL LIFE - Hazleton Responsible to the Dean of Student Affairs for carrying out specific responsibilities for the Residence Hall Program, which includes administrative, educational, cultural and personal services to the students. Assumes full responsibility for the residence hall in the absence of the supervisor. Bachelor's degree or equivalent plus at least one to two years of directly related experience is required, or a

master's degree or equivalent in student personnel or related field with three to six month's residence hall experience. This is a 10-month continuing position.
SUPERVISOR, CRITICAL CARE MONITORING, COLLEGE OF MEDICINE - Hershey Responsible to the Patient Unit Coordinator for the administration and coordination of the critical care unit monitoring system to include the supervision of a varying number of critical care monitoring technicians. A bachelor's degree in electrical or electronic engineering or equivalency, plus one to two years of directly related experience.
APPLICATIONS/PROGRAMMER ANALYST, MANAGEMENT ENGINEERING - University Park Analyze, design, and develop data processing systems. Provide operational support for implemented systems. Bachelor's degree or equivalent training in computer science or related field plus one to two years of experience in data processing system design and development. Proficiency in COBOL and/or BASIC desired.
PROGRAMMER, UNIVERSITY LIBRARIES - University Park Responsible for analysis, program design, coding, documentation, and other programming tasks required to develop an operational on-line bibliographic data-base. Bachelor's degree or equivalent in computer science or related field, plus two years of directly related experience preferably in data-base design or on-line multi-access computer systems.
NURSE, IN-PATIENT AND EMERGENCY ROOM, STUDENT AFFAIRS - University Park Responsible to Head, College Health Nurse, In-Patient and Emergency Room, for providing nursing service in the in-patient service area and for the emergency room and assisting licensed physician and dentist in-patient care. Graduate from an accredited nursing program or its equivalent and current licensure in Pennsylvania as a registered nurse, plus six to nine months of directly related experience.

(319-2) The U.S. - Spanish Joint Committee for Scientific and Technological Cooperation announces the availability of research grants to U.S. postdoctoral scientists for work in Spain between Nov. 1, and October 31, 1979. Six to ten month periods are available as well as one to three month short stays.

Obituary

Dr. Carl W. Hasek, professor emeritus of economics and a member of the faculty from 1914 to 1949, died June 22. He was 89 years old. Dr. Hasek was head of the department of economics and sociology and organized the Bureau of Business Research at Penn State, serving as its first director. The author of *Principles of Economics*, he had a B.A. from Lehigh, M.A. from Harvard, and Ph.D. from Columbia.

From the Trustee Docket

Mellon Trusts give funds to promote academic excellence

The Trustees have established a Fund for Academic Excellence to be built on the foundation of a new grant of \$500,000 to the University from the Richard King Mellon Charitable Trusts of Pittsburgh.

The Mellon Trusts support was announced by Provost Edward D. Eddy.

The grant will be used to establish a new fund emphasizing academic quality, according to Dr. Eddy. "The monies are to be expended by the President and the Provost on the highest priorities of the institution which cannot be met from other funding available to the University.

"The overall goal of the Fund is the improvement of instruction and research, with special attention given to the enhancement of quality and distinctiveness in educational programs.

"This kind of special enrichment is needed badly and will act as a catalyst for additional funds designed to improve the University's educational programs."

The Mellon grant, to be made in two grants of \$250,000 in 1978 and 1979, is to be augmented on a continuing basis by contributions from non-governmental gifts, including those from alumni.

According to Provost Eddy, "The Fund for Academic Excellence will act as an internal foundation with projects including, but not limited to, the identification and encouragement of young teacher-scholars, special programs in the field of conservation and management of natural resources, the study of ethics and values in American

society, and innovations in content and method in the teaching process."

The trustees of the Mellon Trusts have indicated a special interest in applying funds toward programs in conservation and management of natural resources.

"The Mellon Trusts grant for special projects in such fields as conservation," Dr. Eddy added, "will now make it possible for Penn State to go well beyond the basic support which is available from State and student sources."

Austere budget adopted

The Trustees adopted a maintenance and operating budget for 1978-79 which avoids a tuition increase beyond the one approved last January, effective for the spring term. This increase continues into this academic year.

"The Penn State budget for 1978-79 is an austere one," President John W. Oswald said. "With a State appropriation of \$112 million and with additional cutbacks in permanent budgets, I am pleased we were able to avoid a further tuition increase and at the same time provide adjustments in salaries and overall compensation."

"Funds in the budget for salary adjustments are needed to meet a variety of needs," he added. "Portions of these funds will be used for basic salary increments, for merit increases, for promotions and reclassifications, and for certain equity and market considerations."

The general funds portion of the total operating budget approved by the Board

supports the University's basic programs of teaching, research and service. It is supported primarily by tuition from students and State appropriation funds.

Dr. Oswald told the Trustees that the gap between the appropriation requested and the appropriation actually approved by the legislature was being closed by: 1) eliminating \$3 million proposed to restore previous cuts; 2) eliminating needed expenditure increases of \$3.7 million; 3) making further internal budget reductions and reallocations of \$2.2 million; and 4) increasing net revenue from tuition by \$3.6 million by continuing the increased rates approved by the Trustees last January.

The \$203,094,000 general funds budget excludes self-supporting activities of the University, such as residence hall programs, Hershey's teaching hospital, intercollegiate athletic programs, book stores, and other auxiliary enterprises. Also excluded are some \$47.7 million that the University receives in the form of contracts, grants, and gifts in support, primarily, of research.

The operating budget, including the general funds portion, all auxiliary enterprises and federal research grants, totals \$387,000,000 — an increase of 4 percent over last year's figure of \$370,997,000. Of the budget total, 28.9 percent comes from State appropriations.

Hershey tuition increased

Tuition for medical students at the College of Medicine has been increased by the Board of Trustees by \$440 for Pennsylvania residents, or some 11 per cent.

Effective with the fall term in September, full-time medical students who are Pennsylvania residents will pay \$4,400 a year. The tuition increase was necessary to provide a balanced operating budget for the College of Medicine. Income from tuition is used for educational purposes. The Medical Center's hospital and auxiliary enterprises generate their own funds and are self-supporting.

This new rate will be among the highest of state-supported medical schools in the United States. Rates for out-of-state students will also increase 11 per cent, or \$686. The new annual tuition rate for out-of-state students will be \$6,936.

President John W. Oswald said the tuition increase was necessary because no change was made by the Legislature in the per capita appropriation for medical students.

"The per capita appropriation at the College of Medicine has not changed since 1971-72," he added.

Dr. Oswald said that all possible options to hold tuition increases to a minimum were employed in the College of Medicine but that costs, due primarily to inflation, had increased sharply.

11 appointed to Steering Committee

Eleven faculty members, students and administrators have been named to serve on a Steering Committee that will coordinate the development of a new Penn

State Academic Policy Plan for the 1980s.

Steps to develop the new plan were initiated last November when the University's Board of Trustees directed that the current Academic Policy Plan, enacted in 1972, be revised.

Dr. Stanley O. Ikenberry, senior vice president for administration, told the University's Trustees that the following faculty and staff members had been asked to serve on the Steering Committee:

Dr. George J. McMurtry, chairman-elect of the University Faculty Senate and professor of electrical engineering; Dr. Murray S. Martin, chairman of the Senate Committee on Planning and Development and associate dean of the University Libraries; Dr. James M. Beattie, dean of the College of Agriculture, professor of horticulture, and a representative of the Council of Academic Deans; and Dr. Thomas D. Larson, chairman of the Task Force on Purpose, Programs, and Priorities, and professor of civil engineering.

Also, Dr. Robert J. Scannell, dean of the College of Health, Physical Education and Recreation, professor of physical education, and chairman of the Task Force on Students and Society; Dr. Carol B. Cartwright, chairman of the Task Force on Faculty and Staff and associate professor of education; Dr. John W. Malone Jr., chairman of the Task Force on Resources and Supporting Services and head of the Department of Agricultural Economics and Rural Sociology; and Dr. Randolph C. Albright, chairman of the Student Academic Assembly.

The committee membership will also include a representative of the Council of Commonwealth Campus Directors.

Dr. Ikenberry and Dr. Edward D. Eddy, University provost, will act as co-chairmen of the Steering Committee.

Two staff members serving the committee will be Dr. Kenneth P. Mortimer, special consultant, professor, and director of the Center for the Study of Higher Education; and Dr. G. Gregory Lozier, University planning specialist in the Office of Budget and Planning.

According to Dr. Ikenberry, the plan will be based on four broad areas of investigation by University task forces. The task forces and their objectives are:

— Task Force on Purposes, Programs, and Priorities: to assess the historical role of the University and of other institutions in Pennsylvania higher education;

— Task Force on Students and Society: to define Penn State's constituencies, project enrollments, and anticipate shifts in demand for services;

— Task Force on Faculty and Staff: to consider staffing needs relative to the demands of the 1980s; and

— Task Force on Resources and Supporting Services: to examine the University's resources and supporting services and develop a realistic projection of them for the years to come.

Dr. Ikenberry said the role of the Steering Committee would be to work in conjunction with those four task forces and with the Committee on Educational Policy of the Board of Trustees, develop drafts of the new plan, and generally give coordination and direction to the effort.

Penn Staters

Dr. Wayne D. Lammie, the 1977 recipient of the University's John E. Wilkinson Award for Administrative Excellence in his role as associate director at Shenango Valley, has been named director of the Schuylkill Campus, effective July 24. He succeeds Henry I. Herring, who retired.

A graduate of Muskingum College, Dr. Lammie received his M.A. in history from the University of Pittsburgh and his Ph.D., also in history, from Ohio State.

He taught at Neshannock Junior-Senior High School for four years, joining the Shenango Valley Campus in 1966 to teach history and political science. In 1973, he was named acting assistant director for resident instruction. He received an academic promotion to assistant professor of history in 1973 and was named associate director for academic affairs in 1974.

Dr. Lammie is active in the Pennsylvania Association of Two Year Colleges and has served on two committees of the Southeastern Pennsylvania Higher Education Council.

Dr. Richard C. Bradt, professor of ceramic science and engineering, has been named head of the Department of Materials Science and Engineering.

He succeeds Dr. Philip L. Walker Jr., Evan Pugh professor of materials science and engineering, who will now devote full time to teaching and research. Dr. Walker has served as head of the department since its formation in 1967. It now has five sections—ceramic science and engineering, fuel science, metallurgy, polymer science and solid state science.

Dr. Bradt received his B.S. in metallurgy from Massachusetts Institute of Technology. His M.S. and Ph.D. degrees were granted by Rensselaer Polytechnic Institute. He joined the Penn State Faculty in 1967.

The co-editor of five sets of proceedings of international symposia, he has published nearly 100 scientific papers. His main research efforts have been directed toward characterizing the mechanical behavior of a wide range of ceramic materials through the use of strength and fracture mechanics techniques.

In 1973, he received the Matthew J. and Anne C. Wilson Outstanding Teaching Award of the College of Earth and Mineral Sciences. He is a Fellow of the American Ceramic Society.

Ernst Ignatz Schurer, formerly of Yale University and the University of Florida, has been named professor and head of the Department of German. He succeeds Dr. Richard K. Seymour, who has chosen to return to full-time teaching.

A native of Loning, Germany, Dr. Schurer earned his B.A. with highest honors at the University of Texas and his M.A. at Yale, where he was a Woodrow Wilson Fellow. Following a year of study in Berlin on an exchange fellowship at the Free University, he returned to Yale to complete his Ph.D.

From 1965 to 1973, he taught in the Department of Germanic Languages and Literatures at Yale, serving as director of undergraduate studies and director of graduate studies in German. He was awarded a Morse Fellowship in 1968 and spent the following academic year in West Berlin, doing research on Expressionism in the archives of the Academy of Arts.

Awarded an Alexander von Humboldt Fellowship in 1973, Dr. Schurer was also appointed professor in the Department of Germanic and Slavic Languages and Literatures at the University of Florida that year. At Florida, he served as undergraduate and graduate coordinator, and as acting chairman of his department. He was awarded an extension of the Alexander von Humboldt Fellowship for the 1976-77 academic year.

Dr. Lammie

Dr. Bradt

Dr. David Nahrwald has been appointed associate dean for patient care of the College of Medicine. Dr. Nahrwald will continue to serve as professor of surgery and as chief of general surgery, a position he has held since 1974. He came to Hershey as associate professor of surgery in 1970 from Indiana University, where he had been assistant professor of surgery since 1968.

Dr. Nahrwald holds A.B. and M.D. degrees from Indiana University. He also served his surgical internship and residency there. He then worked as a U.S. Public Health Service trainee in gastrointestinal physiology at the University of California at Los Angeles. He is the author of 73 published articles and abstracts dealing with both basic science and clinical disciplines, specifically gastrointestinal physiology and surgery. His particular area of interest has been research in the mechanisms and control of gastrointestinal secretions.

Dr. Simon Belasco, professor of Romance linguistics and director of the Linguistics Program, has been named a Fellow of the Institute for the Arts and Humanistic Studies. Dr. Stanley Weintraub, director of the Institute and research professor of English, has announced.

Dr. Belasco, who helped to create and develop the undergraduate and graduate programs in linguistics, was an instructor in Romance languages and a research associate in audiology at the University of Pennsylvania, and a research associate in psycho-acoustics at the Jefferson Medical College before coming to Penn State in 1953.
